Revision: Cushman, 1924. U. S. Natl. Mus., Proc. 64 (20): 18-20.

arealis Cushman. N. H., N. Y., Pa., Md.

Absyrtus arealis Cushman, 1924. U. S. Natl. Mus., Proc. 64 (20): 19. ♂, ♀.

paniscoides (Ashmead). Vt. w. to Minn., s. to n. Ala. and Tex.

Perilissus paniscoides Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 197. ♀ (♂ misdet.).

perilissoides Cushman. Conn., Ohio, Okla.

Absyrtus perilissoides Cushman, 1924. U. S. Natl. Mus., Proc. 64 (20): 19. ♂, ♀.

Genus LOPHYROPLECTUS Thomson

Lophyroplectus Thomson, 1883. Opusc. Ent. 9: 915.

Type-species: *Paniscus oblongopunctatus* Hartig. Monotypic.

Two species are known, one European and one Japanese.

oblongopunctatus (Hartig). Ont.; Europe. Introduced in N. S., N. B., Que., Maine and Ont. in 1935 through 1941 without becoming established; introduced again in Maine in 1958 and in Ont. in 1962 and 1964 and apparently established in Ont. Host: *Neodiprion serifer* (Geoffroy). The host listed was the target species for the most recent introductions in Ont.

Ichneumon luteator Thunberg, 1822; 1824. Acad. Imp. des Sci. St. Petersburg, Mem. 8: 259; 9: 308. ♀. Preocc. by Fabricius, 1798.

Paniscus oblongopunctatus Hartig, 1838. Jahresber. Fortschr. Forstwiss. Forstl. Naturk. 1: 272. ♂, ♀.

Taxonomy: Roman, 1916. Zool. Bidr. Uppsala 1: 266, 291. — Oehlke, 1966 (1965). Beitr. z. Ent. 15: 855-856.

Biology: Pschor-Walcher, 1967. Commonwealth Inst. Biol. Control, Tech. Bul. 8: 9-15, 44.

— Griffiths, Rose, and Bird, 1971. Commonwealth Inst. Biol. Control (Trinidad), Tech. Commun. 4: 107, 157, 158, 160-161. — Rose, 1977 (1976). Canad. Ent. 108: 1395-1398.

Genus OPHELTES Holmgren

Opheltes Holmgren, 1859 (1858). Svenska Vetensk.-Akad., Ofvers. af ... Forh. 15: 323.

Type-species: *Ichneumon glaucopterus* Linnaeus. Monotypic.

Nephopheltes Cushman, 1924. U. S. Natl. Mus., Proc. 64 (20): 16.

Type-species: *Nephopheltes japonicus* Cushman. Monotypic and orig. desig.

This is a Holarctic genus including only two species.

glaucopterus barbieri Cushman. Newfoundland (insular) w. to Alaska, s. to S. C., n. Ga., s.e. Kans., Colo., and s.w. Oreg. Host: *Cimex americana* Leach. *O. glaucopterus*

glaucopterus (Linnaeus) is Eurasian, and *O. glaucopterus apicalis* (Matsumura) occurs in northeastern Asia.

Campoplex flavipennis Provancher, 1874 (May). Nat. Canad. 6 (5): 143. ♀. Preocc. by Cresson, 1874 (January).

Opheltes glaucopterus var. *barbieri* Cushman, 1924. U. S. Natl. Mus., Proc. 64 (20): 16. ♀. *Opheltes glaucopterus galbipennis* Walkley, 1958. In Krombein et al., U. S. Dept. Agr., Agr. Monog. 2, Sup. 1, p. 54. N. name for *C. flavipennis* Provancher. N. syn.

Biology: Orcutt and Aldrich, 1892. S. Dak. Agr. Expt. Sta., Bul. 30: 5. — Fyles, 1894. Ent. Soc. Ontario, Ann. Rpt. 25: 54, 55. — Comeau, 1944. Ann. de L'Acfas (Montreal) 10: 103.

Morphology: Whitmarsh, 1910. Ent. Soc. Amer., Ann. 3: 197, 204-206, 208.

Genus LATHROLESTES Foerster

Lathrolestes Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 196.

Type-species: *Tryphon clypeatus* Zetterstedt. Desig. by Viereck, 1914 from seven species included by Thomson, 1883

Laphyroscopterus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 197.

Type-species: *Tryphon gorskii* Ratzburg. Desig. by Viereck, 1914 from three species included by Thomson, 1883.

Homalomma Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 198.

Type-species: *Homalomma caliroae* Rohwer. Included and desig. by Rohwer, 1915.

Ecclinops Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 201.

Type-species: *Tryphon orbitalis* Gravenhorst. Desig. by Viereck, 1914 from seven species included by Thomson, 1883.

Camporychus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 208.

Type-species: *Lathrolestes marginatus* Thomson. Monotypically included and desig. by Townes, 1970.

Laphyroscopterus Thomson, 1883. Opusc. Ent. 9: 915. Emend.

Lathrolestes Thomson, 1883. Opusc. Ent. 9: 916. Emend.

Tryphonopsis Brauns, 1898. Ver. Freunde Naturgesch. Mecklenburg, Arch. 51: 62.

Type-species: *Tryphonopsis ensator* Brauns. Monotypic.

Ritzemabosia Smits van Burgst, 1912. Tijdschr. v. Ent. 55: 269.

Type-species: *Ritzemabosia meridionalis* Smits van Burgst. Monotypic.

Culmina Benoit, 1955. Mus. Roy. Congo Belge, Tervuren, Ann. (ser. 8, Sci. Zool.) 38: 32.

Type-species: *Culmina ruwenzorica* Benoit. Monotypic and orig. desig.

This is a large genus of Neotropic, Holarctic, Oriental, and Ethiopian distribution. The majority of the species occur in the Holarctic Region. Most species presumably parasitize sawflies, but a European species identified as *L. clypeatus* (Zetterstedt) has been reared from two species of the primitive microlepidopteran family Eriocraniidae and *L. mnemonicae* (Rohwer) has also been reared from an eriocraiid.

caliroae (Rohwer). Northern Va., n. Ala. Host: *Caliroa* sp. on *Nyssa sylvatica*, *Caliroa* sp. on *Quercus prinus*.

Homalomma caliroae Rohwer, 1915. U. S. Natl. Mus., Proc. 49: 218. ♀.

Homalomma eriocompoides Rohwer, 1915. U. S. Natl. Mus., Proc. 29: 219. ♀.

constrictus (Provancher). Que.

Phygadeuon constrictus Provancher, 1882. Nat. Canad. 13 (no. 155): 336; 13 (no. 156): 357. ♂.

iladus (Davis). Que., N. Y., R. I., Md., n. Ga., Ont. Host: *Metallus rohweri* MacG.

Spanotecnus iladus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 303. ♂.

Lathrolestes visscheri DeGant, 1933. U. S. Natl. Mus., Proc. 82 (11): 5. ♂.

Lathrolestes metalli Cushman, 1933. U. S. Natl. Mus., Proc. 82 (14): 10. ♂.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 100 (syn.).

luteolator (Gravenhorst). N. Y., w. N. C., n. Ga., Wis.; Europe.

Mesoleptus luteolator Gravenhorst, 1829. Ichn. Europaea, v. 2, p. 42. ♂.

Tryphon Gorskii Ratzburg, 1852. Ichn. d. Forstins., v. 3, p. 126. ♂.

Polygoncus suburbe Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 306. ♀.

Taxonomy: Pfankuch, 1906. Ztschr. System. Hym. Dipt. 6: 22 (syn.). —Townes, 1944. Amer. Ent. Soc., Mem. 11: 502 (syn.).

mentalis (Davis). N. H., N. C., n. Ga.

Polygoncus mentalis Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 306. ♀.

Monoblastus nigriventris Ashmead, 1902. In Slosson, Ent. News 12: 321. Nomen nudum.

mnemonicae (Rohwer). Northern Va. Host: *Dysseriocrania griseocapitella* (Wlshm.). Notes in the U. S. Natl. Museum seem to indicate that this host record is correct. The host is a

leaf-mining microlepidopteran of the primitive family Eriocraniidae; it spins a cocoon in the soil.

Symplera mnemonicae Rohwer, 1914. Ent. Soc. Wash., Proc. 16: 141. ♂, ♀.

nasoni Davis. Ill.?, Sask., Colo., Alta., Mont.

Lathrolestes nasoni Davis, 1897. Amer. Ent. Soc., Trans. 24: 264. ♀ (♂ misdet.?).

Lathrolestes similis Davis, 1897. Amer. Ent. Soc., Trans. 24: 265. ♀.

Lathrolestes nasonii Dalla Torre, 1901. Cat. Hym., v. 3, p. 321. Emend.

nigricollis (Thomson). Europe. Introduced in insular Newfoundland in 1973; because only ten adults were released, establishment would seem to have been precluded. Host: *Fenusia pusilla* (Lep.). The host cited was the target species for the release of *nigricollis* in Newfoundland.

Perilissus (Luphyroscopus) nigricollis Thomson, 1883. Opusc. Ent. 9: 915. ♂.

Perilissus minutus Bridgman, 1888 (1887). Ent. Soc. London, Trans. 35: 370. ♂. syn.?

obscurellus (Davis). Conn., N. Y.

Spanotecnus obscurellus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 304. ♀.

pictus Cushman. Eastern S. Dak.

Phytodietus truncatus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 371. ♀. Preocc. in *Lathrolestes* by Provancher, 1888.

Lathrolestes pictus Cushman, 1933. U. S. Natl. Mus., Proc. 82 (14): 11. ♂.

Lathrolestes cinctus Townes, 1945. Amer. Ent. Soc., Mem. 11: 502. N. name for *P. truncatus* Davis.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 11: 100.

platynus (Davis). Southern Mich.

Polyoncus platynus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 306. ♂.

Polyoncus unicus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 306. ♀.

rufigaster Cushman. Maine, Va., N. C., Ont., Ohio. Host: *Metallus rohweri* MacG., sawfly on blackberry, leaf miner.

Lathrolestes rufigaster Cushman, 1933. U. S. Natl. Mus., Proc. 82 (14): 13. ♂, ♀.

scutellatus (Ashmead). D. C., n. Va.

Prionopoda scutellata Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 441. ♀.

tomostethi (Cushman). Mass., N. Y., Ohio. Host: *Tomostethus multicinctus* (Roh.).

Perilissus tomostethi Cushman, 1935. Wash. Acad. Sci., Jour. 25: 558. ♂, ♀.

truncatus (Provancher). Western N. C.? s.w. B. C.

Mesochorus truncatus Provancher, 1888. Addit. Corr. Faune Ent. Canada Hym., p. 365. ♀.

TRIBE SCOLOBATINI

This small Neotropic, Holarctic, and Oriental tribe includes three genera, two of which are represented in North America.

Genus PHYSOTARSUS Townes

Physotarsus Townes, 1966. In Townes and Townes, Amer. Ent. Inst., Mem. 8: 139, 330.

Type-species: *Tryphon maculipennis* Cresson. Orig. desig.

This is apparently a moderate-sized genus with one or more undescribed species occurring in Texas.

Genus SCOLOBATES Gravenhorst

Scolobates Gravenhorst, 1829. Ichn. Europaea, v. 2, p. 357.

Type-species: *Scolobates crassitarsus* Gravenhorst. Desig. by Westwood, 1840.

Aglyphus Giraud, 1872. Soc. Ent. de France, Ann. (ser. 5) 1: 411.

Type-species: *Aglyphus nigripennis* Giraud. Monotypic.

Parabraconia Schmiedeknecht, 1914. Opusc. Ichn., v. 5, p. 2803.

Type-species: *Parabraconia nigripennis* Schmiedeknecht. By subsequent monotypy from inclusion by Schmiedeknecht, 1925, of *S. nigripennis* (Giraud); both names are preocc. by *Scolobates nigripennis* Sichel, 1860. The type-species is regarded

as a synonym of *S. nigripennis* (Giraud); both names are preocc. by *Scolobates nigripennis* Sichel, 1860.

This is a small Holarctic and Oriental genus.

auriculatus (Fabricius). N. H., Mass., N. Y., Pa., Md., Ont., Mich., Tex., n. B. C. Ecology: Three specimens in the U. S. Natl. Museum collection were collected in July from snow at an altitude of 7000 ft. at London Hill Mine, Bear Lake, B. C. Host: *Arge clavicornis* (F.), *A. pectoralis* (Leach), *A. scapularis* (Klug).

Ichneumon auriculatus Fabricius, 1804. Systema Piezatorum, p. 69.

Ichneumon auricularator Thunberg, 1822; 1824. Acad. Imp. des Sci. St. Petersburg, Mem. 8: 266; 9: 323. Emend.

Ichneumon elevator Thunberg, 1822; 1824. Acad. Imp. des Sci. St. Petersburg, Mem. 8: 266; 9: 323. ♂. Preocc. by Panzer, 1799.

Scolobates crassitarsus Gravenhorst, 1829. Ichn. Europaea, v. 2, p. 360. ♂, ♀.

Scolobates hylotomae Kriechbaumer, 1877. Ent. Nachr. 3: 135. ♂, ♀.

Prionopoda canadensis Harrington, 1892. Canad. Ent. 24: 98. ♀.

Scolobates auriculatus var. *niger* Roman, 1917. Ent. Tidskr. 38: 273. ♀. Syn.?

Scolobates auriculatus var. *nigrifacies* Teunissen, 1953. Tijdschr. v. Ent. 96: 16. ♀. Syn.?

Taxonomy: Holmgren, 1859 (1858). Svenska Vetensk.-Akad., Ofvers af ... Forh. 15: 330 (syn.). — Roman, 1912. Zool. Bidr. Uppsala 1: 235, 252 (syn.). — Bauer, 1961. Beitr. z. Ent. 11: 745 (syn.).

Biology: Pschorn-Walcher and Kriegel, 1965. Ztschr. f. Angew. Ent. 56: 268-269.

TRIBE MESOLEIINI

This is a large Holarctic tribe. Taxonomically, it is possibly the most difficult group of Ichneumonidae. This seems to be reflected in the fact that to use Townes' (1970) key to the genera it is particularly necessary to have a collection including reliably identified representatives of the various genera.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 104-127 (genera of world).

Genus OTLOPHORUS Foerster

Otlophorus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 202.

Type-species: *Tryphon vepretorum* Gravenhorst. Desig. by Viereck, 1914 from five species included by Thomson, 1895.

Neales Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 204.

Type-species: *Tryphon vepretorum* Gravenhorst. By subsequent monotypy from inclusion by Kriechbaumer, 1897.

Dialges Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 206.

Type-species: *Tryphon vepretorum* Gravenhorst. By subsequent monotypy from inclusion by Kriechbaumer, 1897.

Aeolometes Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 207.

Type-species: *Scolobates italicus* Gravenhorst. By subsequent monotypy from inclusion by Thomson, 1892.

Tachyporthus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 210.

Type-species: *Scolobates italicus* Gravenhorst. By subsequent monotypy from inclusion by Kriechbaumer, 1901.

Holmgrenia Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 213.

Type-species: *Holmgrenia lanceolata* Davis. Desig. by Viereck, 1914 from six species included by Davis, 1898.

Aelometes Thomson, 1894. Opusc. Ent. 19: 2034. Emend.

Otlophorinus Hincks, 1944. Roy. Ent. Soc. London, Proc. (ser. B) 13: 35.

Type-species: *Mesoleius pulverulentus* Holmgren. Orig. desig.

This a moderate-sized genus of Holarctic distribution.

fissus (Provancher). Que., N. Y., R. I.

Mesoleius fissus Provancher, 1879. Nat. Canad. 11: 257. ♂.

lanceolatus (Davis). N. Y., Ont., Colo., w. Wash.

Holmgrenia lanceolata Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 294. ♂, ♀.

Genus ATITHASUS Foerster

Atithasus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 210.

Type-species: *Atithasus stellarius* Davis. By subsequent monotypy from inclusion by Davis, 1898.

A single species is known.

bimaculatus (Ashmead). N. H., Pa., Va., Ind., Ill., Iowa, e. Kans., Tex.

Grypocentrus bimaculatus Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 199. ♀.

Atithasus stellarius Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 291. ♂, ♀.

Genus BARYTARBES Foerster

Polytreta Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 202.

Type-species: *Mesoleius (Barytarbus) laeviusculus* Thomson. Desig. by Viereck, 1914 from two species included by Thomson, 1892.

Isodiaeta Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 204.

Type-species: *Tryphon segmentarius* Gravenhorst. Monotypically included and desig. by Perkins, 1962. The type-species is Gravenhorst's identification of *Ichneumon segmentarius* Fabricius.

Hybrestes Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 210. Preocc. by Reichenbach, 1850.

Type-species: *Tryphon adpropinquator* Gravenhorst. Monotypically included and desig. by Townes, Momoi, and Townes, 1965.

Barytarbes Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 212.

Type-species: *Tryphon colon* Gravenhorst. Desig. by Viereck, 1914 from five species included by Thomson, 1883.

Barytarbus Thomson, 1883. Opusc. Ent. 9: 931. Emend.

Polytreta Thomson, 1892. Opusc. Ent. 17: 1873. Emend.

This is a Holarctic genus of moderate size.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 116 (Nearctic spp. assigned).

antennatus (Provancher). Que., N. Y.?

Mesoleius antennatus Provancher, 1877. Nat. Canad. 9: 15. ♀. Barron's (1975) rejection of the lectotype selected by Gahan and Rohwer (1918) appears to be valid inasmuch as Provancher did not indicate that he had more than one specimen.

Mesoleius antennatus Provancher, 1879. Nat. Canad. 11: 260. ♀. Preocc. by Provancher, 1877; Provancher's 1879 description is apparently an inadvertent second description as a new species of the same specimen he described in 1877.

Taxonomy: Gahan and Rohwer, 1918. Canad. Ent. 50: 31. — Barron, 1975. Nat. Canad. 102: 426.

compos (Davis). "Canada," Mich.

Alexeter compos Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 321. ♂.

honestus (Cresson). Que., N. H., Conn., N. Y., N. J., Pa., Ill.

Mesoleptus honestus Cresson, 1868. Amer. Ent. Soc., Trans. 2: 98. ♂, ♀.

Mesoleptus albifrons Cresson, 1868. Amer. Ent. Soc., Trans. 2: 98. "♀" = ♂.

provancheri (Cushman). Que., N. Y., Pa., Mich.

Mesoleptus variabilis Provancher, 1883. Nat. Canad. 14: 7. ♀. Preocc. by Provancher, 1875.

Mesoleptus provancheri Cushman, 1917. Ent. Soc. Wash., Proc. 19: 165. N. name for *M. variabilis* Provancher, 1883.

Genus ALEXETER Foerster

Alexeter Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 199.

Type-species: *Mesoleptus ruficornis* Gravenhorst. Desig. by Viereck, 1914 from three species included by Woldstedt, 1877. The type-species is regarded as a synonym of *A. sectator* (Thunberg).

Adranes Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 205. Preocc. by LeConte, 1850. Type-species: *Tryphon multicolor* Gravenhorst. Monotypically included and desig. by Townes, Momoi, and Townes, 1965.

Zemiphron Foerster 1868. Naturh. Ver. Rheinlande, Verh. 25: 206.

Type-species: *Mesoleius laevissimus* Strobl. Monotypically included and desig. by Perkins, 1962.

This is a large Holarctic genus.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 116-117 (Nearctic spp. assigned).

canaliculatus (Provancher). Que. w. to s.e. Alaska, s. to D. C. and n. Calif.

Paniscus canaliculatus Provancher, 1874. Nat. Canad. 6: 105. ♂.

Paniscus albotarsatus Provancher, 1874. Nat. Canad. 6: 106. ♂.

difficilis (Davis). Colo., s.w. Alta., w. Wash.

Rhaestes difficilis Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 312. ♂.

innoxius (Cresson). Nev., s. B. C., w. Wash.

Mesoleptus innoxius Cresson, 1879 (1878). Acad. Nat. Sci. Phila., Proc. 30: 371. ♂.

lucens (Provancher). Que., N. H., N. C., n. Ga., s. Mich.

Campoplex lucens Provancher, 1874. Nat. Canad. 6: 144. ♂. Barron (1975) regarded the holotype of *C. lucens* as being lost; therefore, application of the name should be based upon the synonymy of Townes (1945).

Mesoleptus riparius Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 315. ♂, ♀.

Hadrodactylus affinis Ashmead, 1902. In Slosson, Ent. News 13: 6. Nomen nudum.

Taxonomy: Townes, 1945. Amer. Ent. Soc., Mem. 11: 514. —Barron, 1975. Nat. Canad. 102: 499-500.

luteifrons (Cresson). Southwestern N. W. T.

Mesoleptus luteifrons Cresson, 1868. Amer. Ent. Soc., Trans. 2: 99. ♂.

notatus Davis. Alta., w. Wash., Oreg.

Alexeter notatus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 321. ♂.

scapularis (Cresson). N. H., R. I., Conn., N. Y., N. J., Md.

Mesoleptus scapularis Cresson, 1868. Amer. Ent. Soc., Trans. 2: 98. ♂.

Genus PROTARCHUS Foerster

Protarchus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 201.

Type-species: *Tryphon rufus* Gravenhorst. By subsequent monotypy from inclusion by Woldstedt, 1877. The type-species is regarded as a synonym of *P. testatorius* (Thunberg).

Zacalles Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 201.

Type-species: *Zacalles magnus* Davis. By subsequent monotypy from inclusion by Davis, 1898.

Protarchoides Cushman, 1922. U. S. Natl. Mus., Proc. 61 (8): 25.

Type-species: *Protarchoides longipes* Cushman. Monotypic and orig. desig.

This is a small Holarctic genus.

Revision: Walley, 1938. Canad. Ent. 70: 230-232.

longipes (Cushman). Que., Maine, N. H., n. Mich., s. B. C. Host: *Trichiosoma* sp.

Psilosarge(!) longipes Ashmead, 1902. In Slosson, Ent. News 13: 321. Nomen nudum.

Protarchoides longipes Cushman, 1922. U. S. Natl. Mus., Proc. 61 (8): 26. ♀.

Protarchoides mandibularis Cushman, 1924. U. S. Natl. Mus., Proc. 64(20): 9. ♀.

magnus (Davis). N. H., N. Y.

Zacalles magnus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 283. ♀.

mellipes (Provancher). Northern Ont., s. Alta., B. C.

Coleocentrus mellipes Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 113. ♂.

Contrary to Barron (1975) the lectotype was selected by Walley (1938).

Protarchoides pallipes Cushman, 1927. U. S. natl. Mus., Proc. 72 (13): 15. ♀.

Taxonomy: Walley, 1938. Canad. Ent. 70: 231 (syn. and lectotype selection). —Barron, 1975. Nat. Canad. 102: 508.

pallidicornis (Walley). Northern Ont.

Protarchooides pallidicornis Walley, 1938. Canad. Ent. 70: 231. ♀.

Genus LAMACHUS Foerster

Zaphthora Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 206.

Type-species: *Tryphon eques* Hartig. Monotypically included and desig. by Townes, Momoi, and Townes, 1965.

Adexioma Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 206.

Type-species: *Adexioma angularia* Davis. By subsequent monotypy from inclusion by Davis, 1898.

Lamachus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 206

Type-species: *Tryphon lophyrum* Hartig. Desig. by Viereck, 1914 from six species included by Thomson, 1892. Included by Thomson as *T. lophyrorum* "Hartig," *lophyrorum* being an emendation of Ratzburg, 1844. The type-species is regarded as a synonym of *L. frutetorum* (Hartig).

Torocampus Schmiedeknecht, 1913. Opusc. Ichn. v. 5, p. 2797.

Type-species: *Tryphon eques* Hartig. By subsequent monotypy from inclusion by Schmiedeknecht, 1914.

Bathyglyptus schmiedeknecht, 1913. Opusc. Ichn., v. 5, p. 2802. Preocc. by Case, 1911.

Type-species: *Bathyglyptus australis* Schmiedeknecht. By subsequent monotypy from inclusion by Schmiedeknecht, 1914.

This is a Holarctic genus of moderate size. The species parasitize Diprionidae.

albopictus Cushman. Japan. Introduced in N. B. in 1939, but the small number of individuals (22) released would seem to have precluded establishment. The target species for the release in N. B. was *Gilpinia hercyniae* (Htg.).

Lamachus albopictus Cushman, 1937. Insecta Matsumurana 12: 37. ♂, ♀.

angularius (Davis). Southern Idaho, Wash., w. Oreg. Host: *Neodiprion scutellatus* Roh., *N. tsugae* Midd.

Adexioma angularia Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 284. ♀.

Lamachus oregon Cushman, 1939. Wash. Acad. Sci., Jour. 29: 401. ♂, ♀.

coalitorius (Thunberg). Europe. Introduced in N. S., N. B., Que., N. H., Vt., Mass., and Ont. between 1936 and 1940, apparently without becoming established. The target species for releases in North America was *Gilpinia hercyniae* (Htg.).

Ichneumon coalitorius Thunberg, 1822; 1824. Acad. Imp. des Sci. St. Petersburg, Mem. 8: 278; 9: 358. [male].

Mesoleius ophthalmicus Holmgren, 1857 (1855). Svenska Vetensk.-Akad. Handl. (n. f.) 1: 162. ♂. In placing the names below in synonymy with *ophthalmicus*, Oehlke (1966) apparently overlooked the fact that Roman (1912) had suppressed *ophthalmicus* as a synonym of *coalitorius*.

Mesoleius marginatus Brischke, 1871. Phys.-Oekonom. Gesell. Koenigsberg, Schr. 11: 74. ♂. N. syn.

Mesoleius spectabilis Holmgren, 1876. Svenska Vetensk.-Akad. Handl. (n. f.) 13: 8. ♀. N. syn.

Taxonomy: Roman, 1912. Zool. Bidr. Uppsala 1: 244, 291. —Oehlke, 1966 (1965). Beitr. z. Ent. 15: 861-862.

Biology: Morris, Cameron, and Jepson, 1937. Bul. Ent. Res. 28: 369. —Finlayson and Finlayson, 1958. Canad. Ent. 90: 587-589.

contortionis Davis. Maine s. to n. Fla., w. to Wis. and Ark. Host: *Gilpinia hercyniae* (Htg.), *Neodiprion abietis* (Harris), *N. lecontei* (Fitch), *N. nanulus nanulus* Schedl, *N. pratti banksianae* Roh.

Lamachus contortionis Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 284. ♀.

Lagarotis diprioni Rohwer, 1915. U. S. Natl. Mus., Proc. 49: 217. ♂, ♀.

eques (Hartig). Europe. Introduced in N. B., Que., Vt., N. J., and Ont. between 1936 and 1941, apparently without becoming established. Host: *Neodiprion sertifer* (Geoff.). The host cited was one of the target species for releases in North America; the other target species was *Gilpinia hercyniae* (Htg.).

Tryphon eques Hartig, 1838. Jahresber. Fortschr. Forstwiss. Forstl. Naturk. 1: 272. [male, female].

Mesoleius silvarum Holmgren, 1876. Svenska Vetensk.-Akad. Handl. (n. f.) 13: 10. ♂, ♀.

Taxonomy: Oehlke, 1966 (1965). Beitr. z. Ent. 15: 858-859.

Biology: Pschorr-Walcher, 1967. Commonwealth Inst. Biol. Control, Tech. Bul. 8: 15-18, 45.

lophymi (Ashmead). N. B., Maine, N. H., Mass., Ont., Wis. Host: *Neodiprion abietis* (Harris), *N. abbotii* (Leach), *N. nanulus nanulus* Schedl, *N. pinetum* (Nort.), *N. pinusrigidae* (Nort.), *N. pratti banksiana* Roh.

Neoeryma lophymi Ashmead, 1898. In Dimmock and Ashmead, Ent. Soc. Wash., Proc. 4: 169. ♂, ♀.

ruficoxalis (Cushman). Maine, Ont., s. Man. *Neodiprion abietis* (Harris).

Labrossyta ruficoxalis Cushman, 1919. Ent. Soc. Wash., Proc. 21: 118. ♀.

Lamachus ruficornis (!) Cushman, 1939. Wash. Acad. Sci., Jour. 29: 400.

tsugae Cushman. Que., Ont., w. Oreg. Host: *Neodiprion abbotii* (Leach), *N. nanulus nanulus* Schedl, *N. pratti banksiana* Roh., *N. tsugae* Midd.

Lamachus tsugae Cushman, 1939. Wash. Acad. Sci., Jour. 29: 401. ♂, ♀.

virginianus (Rohwer). Mass., Va., e. N. C., Ohio. Host: *Neodiprion lecontei* (Fitch). Probably not distinct from *L. lophymi* (Ashmead).

Lagarotis virginianus Rohwer, 1915. U. S. Natl. Mus., Proc. 49: 218. ♂.

Genus NEOSTROBLIA Heinrich

Neostroblia Heinrich, 1953. Wien. Ent. Gesell., Ztschr. 38: 211.

Type-species: *Mesoleius ruficollis* var. *pseudolituratus* Strobl. Monotypic and orig. desig.

This Holarctic genus includes two described species. The type-species is European.

incessans (Davis). N. H., Colo.? The lectotype was collected on Mt. Washington, N. H. by A. T. Slosson, apparently in the "alpine region."

Rhaestes incessans Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 311. ♀.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 119.

Genus SCOPESIS Foerster

Scopesis Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 209.

Type-species: *Mesoleius guttiger* Holmgren. Desig. by Viereck, 1914 from eleven species included by Thomson, 1894. Perkins (1962) regarded the type-species as being a synonym of *S. bicolor* (Gravenhorst).

Scoparches Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 211.

Type-species: *Tryphon bicolor* Gravenhorst. Monotypically included and desig. by Perkins, 1962.

Scopesus Thomson, 1894. Opusc. Ent. 19: 2028. Emend.

Hyposyntactus Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 217.

Type-species: *Hyposyntactus flavifrons* Ashmead. Monotypic.

This is a Holarctic genus of moderate size.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 120 (Nearctic spp. assigned).

gesticulator tarda (Provancher). Que. w. to Alaska, s. to n. Ga., Mich., Colo., and Oreg. *S. gesticulator gesticulator* (Thunberg) is Eurasian.

Tryphon tardus Provancher, 1875. Nat. Canad. 7: 119. ♀.

Mesoleius laetus Cresson, 1879 (1878). Acad. Nat. Sci. Phila., Proc. 30: 372. ♂. Formerly preocc. in *Mesoleptus* by Gravenhorst, 1829.

Lampronota nigropicta Davis, 1895. Amer. Ent. Soc., Trans. 22: 31. ♂. Syn.?; regarded as a subspecies distinct from *gesticulator tarda* by Townes (1970), but evidently would have a range entirely overlapped by *g. tarda*.

Mesoleptus distinctus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 314. ♂, ♀. Syn.? Preocc. by Cresson, 1864.

Mesoleptus nigralis Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 314. ♀. Syn.?

Mesoleptus pictus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 315. ♂, ♀. Syn.? Presumably the species described in Davis' key as *distinctus*.

Mesoleptus Vancouveriensis Dalla Torre, 1901. Cat. Hym. v. 3, p. 365. N. name for *Mesoleius laetus* Cresson.

Scopasis(?) monticola Ashmead, 1902. In Slosson, Ent. News 13: 6. Nomen nudum.

Hyposyntactus flavifrons Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 217. ♂.

Scopasis monticola Cushman, 1922. U. S. Natl. Mus., Proc. 61 (8): 26. ♂, ♀. Syn.?

rufonotatus fidelis (Davis). N. H., N. Y., N. C., n. Ga., w. Wash. *S. rufonotatus rufonotatus* (Holmgren) is European.

Mesoleius fidelis Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 297. ♂, ♀.

Genus HIMERTA Foerster

Ithagenes Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 158. Preocc. by Agassiz, 1846.

Type-species: *Ichneumon defectivus* Gravenhorst. Monotypically included and desig. by Townes, 1970.

Himerta Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 200.

Type-species: *Euryproctus (Himertus) bisannulatus* Thomson. Desig. by Viereck, 1914 from two species included by Thomson, 1883.

Clepsiporthus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 200.

Type-species: *Mesoleptus rubiginosus* Cresson. Desig. by Viereck, 1914 from four species included by Davis, 1898.

Enoecetis Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 211.

Type-species: *Enoecetis scutellaris* Kriechbaumer. By subsequent monotypy from inclusion by Kriechbaumer, 1897.

Dolioctenus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 212.

Type-species: *Ichneumon defectivus* Gravenhorst. Monotypically included and desig. by Perkins, 1962.

Himertus Thomson, 1883. Opusc. Ent. 9: 926. Emend.

Neoprotarchus Cushman, 1924. U. S. Natl. Mus., Proc. 64 (20): 10.

Type-species: *Neoprotarchus ater* Cushman. Monotypic and orig. desig.

Daisetsuzania Uchida, 1930. Hokkaido Imp. Univ., Faculty Agr., Jour. 25: 289.

Type-species: *Daisetsuzania albifrons* Uchida. Monotypic and orig. desig.

This is a Holarctic genus of moderate size.

annulata (Davis). Northern Mich.

Lampronota annulata Davis, 1895. Amer. Ent. Soc., Trans. 22: 31. ♂.

atra (Cushman). Alta., n.w. Calif.

Neoprotarchus ater Cushman, 1924. U. S. Natl. Mus., Proc. 64 (20): 10. "♂" = ♀.

flavida (Davis). N. H., e. N. C., Mich., Mo., S. Dak., Kans., Alta., w. Wash.

Clepsiporthus flavidus Davis, 1896. In Slosson, Ent. News 7: 264. Nomen nudum.

Clepsiporthus flavidus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 326. ♀.

Himertus dakota Cushman, 1927. U. S. Nat. Mus., Proc. 72 (13): 14 ♂ ?, ♀.

rubiginosa (Cresson). Alta., s.w. B. C., Wash., Calif.

Mesoleius? rubiginosus Cresson, 1879 (1878). Acad. Nat. Sci. Phila., Proc. 30: 372. ♂.

Genus RHINOTORUS Foerster

Spudaea Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 211. Preocc. by Snellen van Vollenhoven, 1867.

Type-species: *Tryphon leucostomus* Gravenhorst. Desig. by Viereck, 1914 from three species included by Thomson, 1883.

Rhinotorus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 211.

Type-species: *Spudaea longicornis* Schmiedeknecht. Included and desig. by Perkins, 1962.

Spudaeus Thomson, 1883. Opusc. Ent. 9: 932. Emend. Preocc. by Gistel, 1848.

Prospudaea Hincks, 1944. Roy. Ent. Soc. London, Proc., Ser. B: Taxonomy 13: 35. N. name for Spudaea Foerster.

This is a small Holarctic genus.

ovalis (Davis). N. H., Mich., Colo., w. Wash.

Spudaea ovale Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 291. ♂, ♀.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 122.

Genus ARBELUS Townes

Arbelus Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 122.

Type-species: *Mesoleius idahoensis* Davis. Orig. desig.

This is a Holarctic genus of moderate size. There are five undescribed or undetermined Nearctic species.

idahoensis (Davis). Colo., n. Idaho, w. Wash., n.w. Oreg.

Mesoleius idahoensis Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 297. ♂, ♀. Suppressed as a synonym of *M. nuperus* Davis by Townes (1945); apparently resurrected from synonymy by Townes (1970).

Taxonomy: Townes, 1945. Amer. Ent. Soc., Mem. 11: 515.

intimatus (Davis). Mont.?, Colo., Wash.

Mesoleptus intimatus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 317. ♂.

nuperus (Davis). N. H., N. Y.

Mesoleius nuperus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 296. ♀.

Genus CAMPODORUS Foerster

Phagesorus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 212.

Type-species: *Tryphon caligatus* Gravenhorst. Monotypically included and desig. by Townes, Momoi, and Townes, 1965.

Campodorus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 213.

Type-species: *Mesoleius melanogaster* Holmgren. Monotypically included and desig. by Perkins, 1962.

Cuboscopesis Heinrich, 1952. Ann. and Mag. Nat. Hist. (12) 5: 1080.

Type-species: *Cuboscopesis epachthoides* Heinrich. Monotypic and orig. desig.

According to Townes (1970), this is a very large Holarctic genus.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 123-124.

alaskensis (Ashmead). Southwestern Alaska.

Calliphurus alaskensis Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 220. ♂, ♀.

aquilonaris (Walkley). Southwestern Alaska.

Calliphurus frigidus Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 222. ♂. Formerly preocc. in *Mesoleius* by Holmgren, 1857.

Mesoleius aquilonaris Walkley, 1958. In Krombein et al., U. S. Dept. Agr. Agr. Monog. 2, Sup. 1, p. 56. N. name for *Calliphurus frigidus* Ashmead.

clypeatus (Ashmead). Southwestern Alaska.

Calliphurus clypeatus Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 220. ♀ (♂ misdet.).

contractus (Davis). Alta.

Mesoleius contractus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 297. ♀. Preocc. by Holmgren, 1857; not renamed because of uncertain synonymy.

convexus (Davis). N. H.

Mesoleius convexus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 298. ♀.

Taxonomy: Townes, 1945. Amer. Ent. Soc., Mem. 11: 519 (suppressed as syn. of *Mesoleius visoris* Davis). — Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 124 (regarded as not congeneric with *M. visoris*).

euurae (Ashmead). Northeastern Calif. Host: *Pontania resinicola* (Marl.).
Bassus euurae Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 440. ♂.

insularis (Ashmead). Southwestern Alaska, Wash.

Zootrephes insularis Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 225. ♂.
kukakensis (Ashmead). Southwestern Alaska.

Calliphyrurus kukakensis Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 222. ♀.

lituratus (Holmgren). Southeastern N. W. T.; n. Eurasia. Recorded from Akpatok Isl., N. W. T. by Poulton (1934); specimen apparently identified by C. Ferriere.

Mesoleius lituratus Holmgren, 1857 (1855). Svenska Vetensk.-Akad. Handl. (n. f.) 1: 147.

Mesoleius Sahlbergi Woldstedt, 1874. Bidr. till Kann. Finlands Nat. 21: 44. ♀.

Mesoleius (Saotus) rubidus Thomson, 1883. Opusc. Ent. 9: 935. ♀. Syn.?; suppressed as a syn. of *lituratus* "var." *Sahlbergi* by Roman (1909).

Mesoleius sahlbergii Dalla Torre, 1901. Cat. Hym., v. 3, p. 266. Emend.

Taxonomy: Roman, 1909. In Hamberg, naturw. Untersuch. Sarekgebirges Schwedisch-Lappland, v. 4, p. 346. — Poulton, 1934. Ann. and Mag. Nat. Hist. (10) 14: 53. — Hellen, 1950. Notulæ Ent. 30: 29 (syn.). — Townes, Momoi, and Townes, 1965. Amer. Ent. Inst., Mem. 5: 262 (generic placement).

picens (Davis). Colo., Alta.

Holmgrenia pictens Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 294. ♀.

sexcarinatus (Ashmead). Alaska.

Polyterus sexcarinatus Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 217. ♀.

Genus SMICROLIUS Thomson

Syndipnus subg. *Smicrolius* Thomson, 1895. Opusc. Ent. 19: 2008.

Type-species: *Syndipnus (Smicrolius) parvicalcar* Thomson. Monotypic.

According to Townes (1970) this small Holarctic genus includes two undescribed Nearctic species.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 124.

Genus MESOLEIUS Holmgren

Mesoleius Holmgren, 1856 (1854). Svenska Vetensk.-Akad. Handl. 75: 69.

Type-species: *Tryphon aulicus* Gravenhorst. Desig. by Viereck, 1912.

Allocritus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 211.

Type-species: *Mesoleius tenuiventris* Holmgren. Monotypically included and desig. by Perkins, 1962.

Cryptocentrus Walsh, 1873. Acad. Sci. St. Louis, Trans. 3: 156. Preocc. by Ehrenberg, 1837.

Type-species: *Tryphon submarginatus* Cresson. Monotypic.

Mesolioides Pfankuch, 1906. Ztschr. System. Hym. Dipt. 6: 85. Emend.

Alfkenia Pfankuch, 1906. Ztschr. System. Hym. Dipt. 6: 89. Syn.?

Type-species: *Ichneumon integrator* Mueller. Monotypic.

Habrodenmus Schmiedeknecht, 1913. Opusc. Ichn., v. 5, p. 2799.

Type-species: *Mesoleius elongatus* Brischke. By subsequent monotypy from inclusion by Schmiedeknecht, 1914.

This is a large Holarctic genus.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 125 (restriction of definition and list of Nearctic spp. remaining in genus).

articulatus Davis. Sask., Colo., Wash.

Mesoleius articulatus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 300. ♀.

audax Davis. N. H.

Mesoleius audax Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 299. ♀.

conformus Davis, N. H., R. I., Alta.

Mesoleius conformus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 300. ♂, ♀.

cresoni (Davis). Tex.

Holmgrenia cresoni Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 293. ♀.

Holmgrenia cresonii Dalla Torre, 1901. Cat. Hym., v. 3, p. 270. Emend.

excavatus (Provancher). Que.

Tryphon excavatus Provancher, 1875. Nat. Canad. 7: 310. ♂.

Taxonomy: Barron, 1975. Nat. Canad. 102: 468.

insidiosus (Cresson). N. H., Mass., N. Y., Pa., Ont., Ohio, Mich., Iowa, Colo.

Mesoleptus insidiosus Cresson, 1868. Amer. Ent. Soc., Trans. 2: 98. ♂.

Mesoleius convergens Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 296. ♀.

Mesoleius visorius Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 296. ♂, ♀.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 125 (syn.).

minor (Ashmead). Southwestern Alaska.

Calliphyrurus affinis Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 221. ♀. Preocc. in

Mesoleius by Brischke, 1892.

Calliphyrurus minor Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 221. ♂, ♀.

Mesoleius congener Walkley, 1958. In Krombein et al., U. S. Dept. Agr., Agr. Monog. 2,

Sup. 1, p. 55, 56. N. name for *C. affinis* Ashmead.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 125 (syn.).

pertinax Davis. Maine, N. H.

Mesoleius pertinax Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 299. ♂, ♀.

pulchranotus Davis. N. Y.? Tex. Host: *Periclista media* (Nort.)?

Mesoleius pulchranotus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 298. ♂.

stejnegeri Ashmead. Eastern U. S. S. R. The type locality is Ostrov Bering (i.e. Bering Isl.), U. S. S. R.; this was incorrectly indicated as an Alaskan locality in previous Nearctic catalogs of Ichneumonidae. However, it seems likely that the species will be found in the Aleutian Islands.

Mesoleius stejnegeri Ashmead, 1899 (1898). In Jordan, Fur Seals and Fur Seal Isls. No. Pacific, v. 4, p. 337. ♀.

submarginatus (Cresson). Que., N. W. T.?, and B. C., s. to N. C., Ill., and Colo.

Tryphon? submarginatus Cresson, 1864. Ent. Soc. Phila., Proc. 3: 274. ♂.

tarsalis (Cresson). Que., R. I., Conn., N. Y., Md., N. C., Alta. Host: *Croesus latitarsus* Nort.

Tryphon tarsalis Cresson, 1868. Amer. Ent. Soc., Trans. 2: 106. ♀ (♂ misdet.?).

tenthredinis Morley. Newfoundland (insular) w. to n. Alta. and central B. C., s. to n. Md., Wis., and Mont.; Europe; Japan. Introduced. Host: *Pristiphora erichsonii* (Htg.), *Gilpinia hercyniae* (Htg.). Parasitism of *G. hercyniae* appears at most to be very occasional. Effectiveness as a parasite of *P. erichsonii* decreased greatly as a resistant strain of *erichsonii* capable of encapsulating the eggs of *M. tenthredinis* spread throughout much of the present Nearctic range of *erichsonii*. Attempts to diversify the gene pool of the North American population of *tenthredinis* (English origin) by releasing specimens from Bavaria which are resistant to egg encapsulation are presumably too recent (1963 through 1969) for signs of success to be evident.

Mesoleius tenthredinis Morley, 1912. In Hewitt, Canada Expt. Farms, Bul. (ser.2) 10: 26. ♂, ♀.

Mesoleius romanii Teunissen, 1945. Leyden Rijks Mus. van Natuurlijke Hist., Zool. Meded. 25: 209. ♂, ♀.

Taxonomy: Townes and Townes, 1951. In Muesebeck et al., U. S. Dept. Agr., Agr. Monog. 2: 334 (syn.).

Biology: Hewitt, 1912. Canada Expt. Farms, Bul. (ser. 2) 10: 25-28. —Graham, 1931. Canad. Ent. 63: 99-102. —Hopping, Leach, Hugh, and Morgan, 1943. Sci. Agr. 24: 58. —Lejeune, 1946. Canada Dept. Agr., Sci. Serv., Div. Ent., Forest Insect Invest., Bi-mon. Prog. Rpt. 3 (2): 2-3. —Drooz, 1953. Jour. Econ. Ent. 46: 828. —Graham, 1953. Quebec Soc. Prot. Plants, Ann. Rpt. 35: 61. —Muldrew, 1953. Canad. Jour. Zool. 31: 313. —Muldrew, 1956. Forestry

Chron. 32: 21. —Drooz, 1957. Jour. Econ. Ent. 50: 212. —Drooz, 1960. U. S. Dept. Agr., Tech. Bul. 1212: 29-32. —McGugan and Coppel, 1962. In McCleod, McGugan, and Coppel, Commonwealth Inst. Biol. Control, Tech. Commun. 2: 110-114. —Turnock and Muldrew, 1971. Commonwealth Inst. Biol. Control, Tech. Commun. 4: 177-180, 181-182, 186-188.

Morphology: Finlayson, 1960. Canad. Ent. 92: 933-935 (final-instar larva).

Genus HYPERBATUS Foerster

Hyperbatus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 210.

Type-species: *Mesoleius segmentator* Holmgren. Monotypically included and desig. by Townes, Momoi, and Townes, 1965.

According to Townes (1970) this genus includes the Eurasian type-species and three undescribed Nearctic species.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 126.

Genus SAOTIS Foerster

Saotis Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 210.

Type-species: *Mesoleius (Saotus) brevispina* Thomson. Desig. by Viereck, 1914 from five species included by Thomson, 1883.

Saotus Thomson, 1883. Opusc. Ent. 9: 933. Emend.

This is a Holarctic genus of moderate size.

clypeatus (Ashmead). Southwestern Alaska, w. Wash.

Eryolytus clypeatus Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 168. ♀.

hoeli Roman. Eastern Greenland.

Saotis Hoeli Roman, 1933. Norges Svalbard-og Ishavs-undersokelser, Skrifter om Svalbard og Ishavet 53: 9. ♀.

Taxonomy: Roman, 1934. Ann. and Mag. Nat. Hist. (10) 14: 609 (variation).

mellipes (Provancher). Que.

Echthrus mellipes Provancher, 1874. Nat. Canad. 6: 60. ♀ (♂ misdet.).

Genus ANONCUS Townes

Anoncus Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 127.

Type-species: *Mesoleius striatus* Davis. Orig. desig.

Townes said that this is a large Holarctic genus.

confusus (Ashmead). Southwestern Alaska.

Calliphurus confusus Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 223. ♂.

perplexus (Ashmead). Southwestern Alaska.

Calliphurus perplexus Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 222. ♂.

striatus (Davis). Que., Maine, N. H., Colo.

Mesoleius striatus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 299. ♂, ♀.

Dizemon regalis Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 312. ♀.

zebratus (Davis). N. Y.

Mesoleptus zebratus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 316. ♂, ♀.

UNPLACED TAXA OF MESOLEIINI

The following were treated as species of *Mesoleius* by Townes and Townes (1951). Presumably, they are species whose types had not been studied recently enough by Townes to enable him to assign them to genera in accordance with his 1970 treatment of the genera of Ctenopeltatinae. The types of the Provancher species were studied by Barron (1975), who cited the generic placements of Townes and Townes and Townes (1951) without indicating that they either remained correct or had become obsolete.

Taxonomy: Townes and Townes, 1951. In Muesebeck *et al.*, U. S. Dept. Agr., Agr. Monog. 2: 332, 333, 334. —Barron, 1975. Nat. Canad. 102: 445, 448, 545, 554-555.

Ecytus robustus Provancher, 1883. Nat. Canad. 14: 8. ♀. Que.

Mesoleius Chicoutimiensis Provancher, 1888. Addit. Corr. Faune Ent. Canada Hym., p. 368. ♀.
Que.

Mesoleius comeauï Townes, 1945. Amer. Ent. Soc., Mem. 11: 511. N. name for *Tryphon canaliculatus* Provancher (which see).

Mesoleius groenlandicus Roman, 1930. Ann. and Mag. Nat. Hist. (10) 5: 285. ♂. Greenland.

Taxonomy: Townes, 1961. Ent. Soc. Wash., Proc. 63: 110.

Tryphon canaliculatus Provancher, 1875. Nat. Canad. 7: 116. ♀. Que. Formerly preocc. in *Mesoleius* by Provancher, 1874; replaced in 1945 by *Mesoleius comeauï* Townes (which see).

Tryphon rufopectus Provancher, 1888. Addit. Corr. Faune Ent. Canada hym., p. 367. "♂" = ♀. Que.

TRIBE EURYPROCTINI

This tribe is Neotropic, Holarctic, and Oriental, but the majority of the taxa occur in the Holarctic region only. Of the sixteen genera currently recognized, twelve have Nearctic species.

Genus SYNOMELIX Foerster

Zemiophora Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 203.

Type-species: *Tryphon scutulatus* Hartig. By subsequent monotypy from inclusion by Thomson, 1894.

Synomelix Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 206.

Type-species: *Synomelia sieboldii* Kriechbaumer. By subsequent monotypy from inclusion by Kriechbaumer, 1897. Perkins (1962) regarded the type-species as being synonymous with *S. albipes* (Gravenhorst).

Zemiophorus Thomson, 1894. Opusc. Ent. 19: 2000. Emend.

This is a small Holarctic genus. Perkins (1962) disputed Townes (1945) suppression of *Zemiophora* as a synonym of *Synomelix*.

Taxonomy: Townes, 1945. Amer. Ent. Soc., Mem. 11: 521. —Perkins, (1962). Brit. Mus. (Nat. Hist.) Ent., Bul. 11: 457, 464.

fasciata (Davis). Mass.

Dialges fasciatus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 286. ♂.

longitarsis (Ashmead). Southwestern Alaska.

Sychnoporus longitarsis Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 216. ♂.

obesa (Davis). Que., R. I., N. Y., Pa., Va., w. N. C., n. Ga.

Stiphrosomus obesa Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 312. ♀.

signatipes (Cresson). "Hudson's Bay Territory."

Tryphon signatipes Cresson, 1868. Amer. Ent. Soc., Trans. 2: 105. ♀.

Genus SYNODITES Foerster

Zootrepes Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 162. This name was suppressed as a synonym of *Synodites* by Townes, Momoi, and Townes (1965) who were acting as first revisors. It should be noted that volume 25 of Naturh. Ver. Rheinlande, Verh. was published in two halves; *Zootrepes* appeared in the first half and *Synodites* appeared in the second half. If it is subsequently shown that the second half or the author's separates it would, of course, be necessary to suppress *Synodites* as a synonym of *Zootrepes*. *Zootrepes*.

Type-species: *Bassus (Zootrepes) hilaris* Woldstedt. By subsequent monotypy from inclusion by Woldstedt, 1880.

Sychnoporus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 208, 220. The variant spelling *Sychnoporthus* appeared on p. 220.

Type-species: *Sychnoporus rufopectus* Ashmead. By subsequent monotypy from inclusion by Ashmead, 1898.

Listrota Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 209.

- Type-species: *Phobetes canadensis* Harrington. By subsequent monotypy from inclusion by Davis, 1898.
- Polyterus* Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 209.
Type-species: *Polyterus franconiaensis* Davis. Desig. by Viereck, 1914 from two species included by Davis, 1898.
- Synodites* Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 211.
Type-species: *Tryphon assimilis* Holmgren. Desig. by Viereck, 1914 from five species included by Thomson, 1894. The type-species is regarded as a synonym of *S. notatus* (Gravenhorst).
- Camponastes* Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 212.
Type-species: *Camponastes basilicus* Davis. By subsequent monotypy from inclusion by Davis, 1898.
- Sarcorychus* Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 212.
Type-species: *Tryphon notatus* Gravenhorst. Monotypically included and desig. by Perkins, 1962.
- Zootrephus* Thomson, 1890. Opusc. Ent. 14: 1486. Emend.
Synodytes Thomson, 1894. Opusc. Ent. 19: 2001. Emend.
- basilicus** (Davis). Vt., Wash.
Camponastes basilicus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 292. ♀.
canadensis (Harrington). Southwestern B. C., Wash.
Phobetes canadensis Harrington, 1894. Canad. Ent. 26: 248. ♀.
- censoris** (Davis). Que., N. H.
Mesoleius censoris Davis 1898 (1897). Amer. Ent. Soc., Trans. 24: 297. ♀.
- franconiaensis** (Davis). N. H., R. I.
Polyterus Franconiaensis Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 289. ♀.
olympiae (Ashmead). Maine, N. H., Mass., Conn., N. Y., n. Va., w. Wash. Host: *Nematus erythrogaster* Nort., *N. ventralis* Say, willow sawfly, tenthredinid on *Populus tremuloides*.
Mesoleius olympiae Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 199. ♂, ♀.
Sychnoporus rufopunctatus Ashmead, 1898. In Dimmock and Ashmead, Ent. Soc. Wash., Proc. 4: 169. "♂" = ♀.
- virginiensis** (Ashmead). Que., N. H., Va., N. C., n. Ga. Host: Sawfly on white birch.
Bassus virginianus Ashmead, 1890. (1889). U. S. Natl. Mus., Proc. 12: 440. ♀.
Mesoleius puritanicus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 299. ♀.
Polyterus albipectus Walley, 1937. Canad. Ent. 69: 192. ♂, ♀.

Genus PANTORHAESTES Foerster

- Trophocotonus* Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 206
Type-species: *Tryphon xanthostomus* Gravenhorst. Desig. by Viereck, 1914 from two species included by Thomson, 1894.
- Pantorhaestes* Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 206.
Type-species: *Tryphon xanthostomus* Gravenhorst. By subsequent monotypy from inclusion by Pfankuch, 1906.

This is a small Holarctic genus.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 132 (status of Nearctic spp. changed).

- assiduus assiduus** (Cresson). Mass., Mich., Sask.
Mesoleptus assiduus Cresson, 1868. Amer. Ent. Soc., Trans. 2: 97. ♂.
assiduus excavatus (Davis). Mont.
Erigloea excavata Davis, 1897. Amer. Ent. Soc., Trans. 24: 275. ♀.
xanthostomus frontalis (Davis). Que. w. to Alta., s. to D. C., Ind., and Colo. *P. xanthostomus xanthostomus* (Gravenhorst) occurs in Europe.
Dialges frontalis Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 285. ♂, ♀.
Dialges frontalis var. *tricolor* Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 285. ♂, ♀.
Dialges frontalis var. *rivalis* Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 286. ♀.

Genus MESOLEPTIDEA Viereck

Mesoleptidea Viereck, 1912 (Sept. 30). Ent. Soc. Wash., Proc. 14: 176.

Type-species: *Mesoleptus cingulatus* Gravenhorst. Orig. desig.

Gnathonophorus Schmiedeknecht, 1912 (Nov.). Opusc. Ichn., v. 5, p. 2519.

Type-species: *Gnathonophorus moricei* Schmiedeknecht. By subsequent monotypy from inclusion by Schmiedeknecht, 1913.

This is a Holarctic genus of moderate size.

decens (Cresson). Que., Maine, N. H., Conn., N. Y., Pa., Va., Colo. Host: Sawfly on *Sambucus*.

Mesoleptus decens Cresson, 1868. Amer. Ent. Soc., Trans. 2: 101. ♂.

flavifrons (Cresson). N. H., R. I., N. Y., N. J.

Mesoleptus flavifrons Cresson, 1864. Ent. Soc. Phila., Proc. 3: 269. ♂.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 133 (generic transfer).

kodiakensis (Ashmead). Southwestern Alaska.

Hypocryptus kodiakensis Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 208. ♂.

unalaskae (Ashmead). Southwestern Alaska.

Mesoleptus unalaskae Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 210. ♀.

Genus ANISOTACRUS Schmiedeknecht

Anisotacus Schmiedeknecht, 1913. Opusc. Ichn., v. 5, fasc. 34 (June), p. 2710; v. 5, fasc. 35 (Nov.), p. 2725. Schmiedeknecht indicated on p. 2725 that this is a new name for "Epacthus Thomson, Opusc. entom. XIX, p. 1999 (non *Epacthes* Foerster, 1868)."

However, it seems clear from his discussion that rather than proposing a replacement name for *Epacthus* because he believed it to be preoccupied by *Epacthes*, he proposed it in the sense that he regarded *Epacthus* Thomson as being a misidentification of *Epacthes* Foerster. That is, he was proposing a "new name" for *Epacthes* Foerster sensu Thomson. Schmiedeknecht indicated that Thomson placed two unrelated species in *Epacthus*, *Tryphon erythropalpus* "Gravenhorst" and *Mesoleius tenellus* Holmgren; Schmiedeknecht placed *Tryphon erythropalpus* (desig. as the type-species of *Epacthes* by Viereck, 1914) in *Trematopygus* and proposed his "new name for *Epacthus*" only for *Mesoleius tenellus* Holmgren.

Type-species: *Mesoleius tenellus* Holmgren. Monotypic.

This is a Holarctic genus of moderate size.

popofensis (Ashmead). Southwestern Alaska, Alta.

Hypocryptus popofensis Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 208. ♂ = ♀.

spatiosus (Davis). Que., N. Y., R. I.

Synchrotopter spatiosus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 306. ♀.

truncatus (Davis). N. Y., "Canada," Mont.

Clepsiporthus truncatus Davis, 1898. Amer. Ent. Soc., Trans. 24: 326. ♂, ♀.

Genus HADRODACTYLUS Foerster

Dizemon Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 199.

Type-species: *Mesoleptus typhae* Gravenhorst. By subsequent monotypy from inclusion by Kriechbaumer, 1891. The type-species is Gravenhorst's identification of and lapsus for *Ichneumon tiphae* Geoffroy. The taxonomy of *H. tiphae* is discussed by Idar (1974).

Hadrodactylus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 199.

Type-species: *Ichneumon tiphae* Geoffroy. Desig. by Viereck, 1914 from two species included by Woldstedt, 1877.

Zemiodes Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 200.

Type-species: *Mesoleptus erythropodus* Kriechbaumer. Desig. by Perkins, 1962 from two species included by Kriechbaumer, 1891.

Narcopoea Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 204.

Type-species: *Mesoleptus typhae* Gravenhorst. By subsequent monotypy from inclusion by Kriechbaumer, 1891. See above discussion of type-species of *Dizemon*.

Meropaches Schmiedeknecht, 1913. Opusc. Ichn., v. 5, p. 2705.

Type-species: *Meropaches bulsanensis* Schmiedeknecht. Monotypic.

This is a large Holarctic genus. The usual hosts are presumed to be sawflies of the genus *Dolerus*.

Taxonomy: Idar, 1974. Ent. Scand. 5: 23 (discussion bearing on identity of *Ichneumon tiphae* Geoffroy).

coxatus (Davis). N. Y. s. to Va., w. to s.w. S. Dak.

Hadrodactylus elongatus var. *coractus* Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 320. ♂, ♀.

elongatus (Cresson). Mass., Alta.

Mesoleptus elongatus Cresson, 1868. Amer. Ent. Soc., Trans. 2: 96. ♂, ♀.

femoratus (Davis). Colo. See *Hadrodactylus seldoviae* (Ashmead).

Catoglyptus femoratus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 310. ♂, ♀.

Taxonomy: Townes, 1945. Amer. Ent. Soc., Mem. 11: 489. —Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 80.

flavicornis (Provancher). Que.

Mesoleptus flavicornis Provancher, 1879. Nat. Canad. 11: 228. ♀.

inceptus (Cresson). Que. w. to s.w. B. C., s. to N. C., Iowa, and Colo.

Mesoleptus inceptus Cresson, 1868. Amer. Ent. Soc., Trans. 2: 96. ♂, ♀.

Mesoleptus propinquus Cresson, 1868. Amer. Ent. Soc., Trans. 2: 97. ♂.

Zemiodes coloradensis Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 323. ♂, ♀.

laurentianus (Provancher). Que.

Tryphon Laurentianus Provancher, 1875. Nat. Canad. 7: 118. ♂.

longicornis (Cresson). N. H., N. Y., Del., Mich.

Mesoleptus longicornis Cresson, 1864. Ent. Soc. Phila., Proc. 3: 270. ♂.

magnacornis (Davis). Wash.

Zemiodes magnacornis Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 324. ♂.

seldoviae (Ashmead). N. Y., Pa., N. C., Mich., Colo., Alta. Idaho, Alaska.

Hadrodactylus elongatus var. *femoratus* Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 320. ♂, ♀. Preocc. in *Hadrodactylus* by Davis, 1898, p. 310.

Hypocryptus seldoviae Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 209. ♂, ♀.

seminiger (Provancher). Que., Pa., Ont., Colo., Mont., Nev.

Paniscus seminiger Provancher, 1874. Nat. Canad. 6: 107. ♀ (♂ misdet.).

Hadrodactylus ruficornis Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 320. ♀.

tibialis (Ashmead). Southwestern Alaska, w. Wash.

Hypocryptus tibialis Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 209. ♂.

variegatipes (Ashmead). Southwestern Alaska.

Hypocryptus variegatipes Ashmead 1902. Wash. Acad. Sci., Proc. 4: 208. ♂.

Genus SYNDIPNUS Foerster

Polypyristis Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 208.

Type-species: *Tryphon lateralis* Gravenhorst. Desig. by Viereck, 1914 from two species included by Roman, 1909.

Syndipnus Foerster, 1868. Naturh. Ver. Rheinlande Verh. 25: 209.

Type-species: *Euryproctus (Syndipnus) macrocerus* Thomson. Desig. by Viereck, 1914 from nine species included by Thomson, 1883.

Tlemon Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 209.

Type-species: *Tlemon delicatus* Ashmead. By subsequent monotypy from inclusion by Ashmead, 1902.

Dicksonia Holmgren, 1881 (1880). Novas Species Ins. Cura et Labore A. E. Nordenskioldii e Novaia Semlia Coactorum, p. 11.

Type-species: *Dicksonia arctica* Holmgren. Monotypic.

Neastus Holmgren, 1883. In Holmgren and Aurivillius, Ent. Tidskr. 4: 154.

Type-species: *Neastus laeviceps* Holmgren. Monotypic.

Anaglymmus Roman, 1914. Arkiv for Zool. 9 (2): 3.

Type-species: *Anaglymmus incisus* Roman. Desig. by Viereck, 1921.

This is a moderately large Holarctic genus.

Revision: Walley, 1940. Canad. Ent. 72: 135-145.

Taxonomy: Walley, 1945. Canad. Ent. 77: 41-43 (additions to revision).

alaskensis Walley. Northeastern N. W. T., interior Alaska.

Syndipnus alaskensis Walley, 1940. Canad. Ent. 72: 138. ♂, ♀.

conformis (Holmgren). Western Sask.; Europe.

Trematopygus conformis Holmgren, 1857 (1855). Svenska Vetensk.-Akad. Handl. (n. f.) 1: 183. ♂.

delicatus (Ashmead). Southwestern Alaska, Sask. Not included in the revision by Walley (1940).

Tlemon delicatus Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 216. ♂.

gaspeianus (Provancher). Que. Host: *Pikonema alaskensis* (Roh.). According to Townes and Townes (1951), *S. gaspeianus* is "transcont. in Canad. Zone."

Tryphon gaspeianus Provancher, 1879. Nat. Canad. 11: 252. ♀.

Taxonomy: Townes and Townes, 1951. In Muesebeck et al., U. S. Dept. Agr., Agr. Monog. 2: 337.

lateralis (Gravenhorst). N. H., s. Alta.; Europe. Host: *Pachynematus extensicornis* (Nort.).

Tryphon lateralis Gravenhorst, 1829. Ichn. Europaea, v. 1, p. 690. [male].

Syndipnus punctiscuta Thomson, 1894. Opusc. Ent. 19: 2005. ♂, ♀.

Taxonomy: Pfankuch, 1907. Ztschr. System. Hym. Dipt. 7: 19 (syn.).

panicularius (Holmgren). Interior Alaska; n. Europe.

Mesoleius panicularius Holmgren, 1857 (1855). Svenska Vetensk.-Akad. Handl. (n. f.) 1: 178. ♀.

phygadeuontoides Walley. Northern Man.

Syndipnus phygadeuontoides Walley, 1945. Canad. Ent. 77: 42. ♀.

probatus Walley. N. Y., Ont. Host: *Nematus* sp. on poplar.

Syndipnus probatus Walley, 1940. Canad. Ent. 72: 144. ♂, ♀.

rubiginosus Walley. P. E. I., N. B., Que., Maine, Ont., n. Minn., s. Man., Sask. Host: *Pikonema alaskensis* (Roh.), *P. dimmockii* (Cress.).

Syndipnus rubiginosus Walley, 1940. Canad. Ent. 72: 140. ♂, ♀.

ungavae Walley. Northern Que.

Syndipnus ungavae Walley, 1940. Canad. Ent. 72: 139. ♀.

Genus HYPAMBLYS Foerster

Hypamblys Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 212.

Type-species: *Mesoleius transfuga* Holmgren. Desig. by Viereck, 1914 from four species included by Thomson, 1894.

Apystus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 212.

Type-species: *Tryphon albopictus* Gravenhorst. Monotypically included and desig. by Perkins, 1962.

Lathropagus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 213.

Type-species: *Mesoleius buccatus* Holmgren. Monotypically included and desig. by Perkins, 1962.

This is a Holarctic genus of moderate size.

albifacies (Provancher). Mass., N. Y., Ont.

Mesostenus albifacies Provancher, 1888. Addit. Corr. Faune Ent. Canada Hym., p. 362. ♀.

albopictus (Gravenhorst). Maine, s.e. and s.w. Alaska, central Wash., n.w. Calif.; Europe. Host:

Anoplonyx laricivorus (R. and M.), *Pristiphora abbreviata* (Htg.).

Tryphon albopictus Gravenhorst, 1829. Ichn. Europaea, v. 2, p. 255. ♂.

Mesoleius transfuga Holmgren, 1857 (1855). Svenska Vetensk.-Akad. Handl. (n. f.) 1: 164. ♂, ♀.

Calliphurus popofensis Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 221. ♂.

Calliphurus glacialis Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 222. ♂.

Mesoleius gymnonychi Rohwer, 1920. U. S. Natl. Mus., Proc. 57: 223. ♀.

Taxonomy: Pfankuch, 1907. Ztschr. System Hym. Dipt. 7: 18 (syn.). —Townes, 1945. Amer. Ent. Soc., Mem. 11: 527 (syn.).

Biology: Hinz, 1961. Schweiz. Ent. Gesell., Mitt. 34: 4.

conformis (Walley). Ont., N. C., w. Oreg.

Ipoctonus conformis Walley, 1933. Canad. Ent. 65: 257. ♂, ♀.

Genus PHOBETES Foerster

Phobetus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 198.

Type-species: *Tryphon fuscicornis* Holmgren. Desig. by Viereck, 1914 from two species included by Thomson, 1889.

Ipoctonus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 199. Preocc. by Heine, 1860.

Type-species: *Ichneumon chrysostomus* Gravenhorst. Desig. by Viereck, 1914 from three species included by Thomson, 1889.

Philotynma Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 209.

Type-species: *Ichneumon chrysostomus* Gravenhorst. Desig. by Townes, Momoi, and Townes, 1965 from four species included by Townes, Townes, and Gupta, 1961.

Phobetus Thomson, 1889. Opusc. Ent. 13: 1430. Emend. Preocc. by LeConte, 1856.

Griphodes Kriechbaumer, 1894. Termesz. Fuzetek 17: 57.

Type-species: *Griphodes caligatus* Kriechbaumer. Monotypic.

Phobettus Hincks, 1944. Roy. Ent. Soc. London, Proc., Ser. B: Taxonomy 13: 34. N. name for *Phobetus* Thomson.

Ipoctoninus Hincks, 1944. Roy. Ent. Soc. London, Proc., Ser. B: Taxonomy 13: 35. N. name for *Ipoctonus* Foerster.

Troctonus Townes, 1944. Amer. Ent. Soc., Mem. 11: 21. Nomen nudum.

This is a moderately large genus of Neotropic, Holarctic, and Oriental distribution. The majority of the species occur in the Holarctic region.

egregius (Davis), Wash.

Mesoleptus egregius Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 317. ♂. Preocc.

secondarily in *Mesoleptus* if *Exolytus egregius* Foerster is a species of *Mesoleptus*.

rufigaster (Provancher). Ont.

Tryphon rufigaster Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 104. ♀.

The lectotype selected by Gahan and Rohwer (1918) was rejected by Mason (1955).

Barron (1975) selected a new lectotype.

Taxonomy: Gahan and Rohwer, 1918. Canad. Ent. 50: 200. —Townes, 1945. Amer. Ent. Soc., Mem. 11: 163 (syn.). —Mason, 1955. Canad. Jour. Zool. 33: 20. —Barron, 1975. Nat. Canad. 102: 551.

striatus (Davis). Maine, Colo., Alta., Wash.; Mexico. Host: *Ametastegia glabrata* (Fall.).

Mesoleptus striatus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 318. ♂.

Mesoleptus torpens Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 318. ♂, ♀.

Mesoleptus scrupulosus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 318. ♂, ♀.

Mesoleius balteatus Cushman, 1919. U. S. Natl. Mus., Proc. 55: 541. ♀.

uniformis (Provancher). Que., Ont., Alta. Host: *Trichiosoma triangulum* Kby.

Campoplex unicolor Provancher, 1874. Nat. Canad. 6: 144. ♂. Formerly preocc. in *Mesoleptus* by Cresson, 1864.

Mesoleptus uniformis Provancher, 1879. Nat. Canad. 11: 232. N. name for *C. unicolor* Provancher.

Genus HYPERALLUS Foerster

Gastroporus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 206.

Type-species: *Hyperallus caliroae* Viereck. Monotypically included and desig. by Perkins, 1962.

Hyperallus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 210.

Type-species: *Hyperallus caliroae* Viereck. By subsequent monotypy from inclusion by Viereck, 1911.

Only one species is known.

caliroae Viereck. N. Y., Va., La., n.e. Kans. Host: *Caliroa liturata* MacG., C. sp. on *Quercus rubra*.

Hyperallus caliroae Viereck, 1911. U. S. Natl. Mus., Proc. 40: 189. ♂, ♀.

Polyterus caliroae Rohwer, 1915. U. S. Natl. Mus., Proc. 49: 221. ♂. Preocc. in *Hyperallus* by Viereck, 1911.

Hyperallus virginianensis Townes, 1945. Amer. Ent. Soc., Mem. 11: 528. N. name for *P. caliroae* Rohwer.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 138 (syn.).

Biology: Cushman, 1911. U. S. Dept. Agr., Bur. Ent. Bul. 97, pt. 5, p. 101-102.

Genus OCCAPES Townes

Occapes Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 138.

Type-species: *Occapes sierrae* Townes. Orig. desig.

This is a small Holarctic genus.

sierrae Townes. Northern Calif.

Occapes sierrae Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 139. ♂, ♀.

Genus EURYPROCTUS Holmgren

Euryproctus Holmgren, 1857 (1855). Svenska Vetensk.-Akad. Handl. (n. f.) 1: 109.

Type-species: *Mesoleptus annulatus* Gravenhorst. Desig. by Viereck, 1912.

Sychnoleter Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 197.

Type-species: *Mesoleptus geniculatus* Gravenhorst. Monotypically included and desig. by Thomson, 1889.

Hypocryptus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 198.

Type-species: *Mesoleptus (Hypocryptus) testaceicornis* Brischke. By subsequent monotypy from inclusion by Brischke, 1892. The type-species is regarded as a synonym of *E. mundus* (Gravenhorst).

Xenonastes Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 208.

Type-species: *Euryproctus alpinus* Holmgren. Monotypically included and desig. by Townes, Momoi, and Townes, 1965.

Fovaya Cameron, 1903. Ztchr. System. Hym. Dipt. 3: 341.

Type-species: *Fovaya annulicornis* Cameron. Monotypic.

This large genus is Holarctic and Oriental (a few spp.).

Revision: Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 327-330.

albocinctus Davis. N. H.

Euryproctus albocinctus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 328. ♀.

albopunctus Davis. N. H.

Euryproctus albopunctus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 328. ♂, ♀.

annulatipes (Provancher). Que.

Mesoleptus annulatipes Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 93, 96.

♂. The alternate spelling *cinctipes* on p. 93 (key) was rejected in favor of *annulatipes* by Barron (1975).

Taxonomy: Barron, 1975. Nat. Canad. 102: 424.

bituminosus Davis. N. H., Mass., Minn., Alta., Idaho, Wash., Oreg.

Euryproctus bituminosus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 328. ♀.

clavatus (Provancher). Que.

Exetastes clavatus Provancher, 1883. Petite Faune Ent. Canada Hym., p. 386. ♀.

Euryproctus curvator Davis. Que. s. to n. Ga., w. to Mich.

Tryphon annulatus Provancher, 1875. Nat. Canad. 7: 119. ♀. Preocc. in *Euryproctus* by Gravenhorst, 1829. The holotype located by Barron (1975) supplants the "lectotype" selected by Gahan and Rohwer (1918).

Euryproctus curvator Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 329. ♂.

Taxonomy: Gahan and Rohwer, 1918. Canad. Ent. 50: 32. — Barron, 1975. Nat. Canad. 102: 425-426.

dakotaensis Davis. Eastern S. Dak., n.e. Kans.

Euryproctus dakotaensis Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 330. ♂.

depressus (Provancher). Que., N. H.

Mesoleptus depressus Provancher, 1875. Nat. Canad. 7: 114. ♂. The holotype located by Barron (1975) supplants the "lectotype" selected by Gahan and Rohwer (1918).

Taxonomy: Gahan and Rohwer, 1918. Canad. Ent. 50: 32. — Barron, 1975. Nat. Canad. 102: 461.

latigaster (Provancher). Ont.

Mesostenus latigaster Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 77. ♀.

longicornis (Provancher). Que., N. Y., Ont.

Mesostenus longicornis Provancher, 1874. Nat. Canad. 6: 300. ♂.

Tryphon Moyeni Provancher, 1875. Nat. Canad. 7 (4): 120. ♂.

Mesoleptus longipes Provancher, 1875. Nat. Canad. 7 (9): 271. ♂. In view of the fact that the holotype is lost (Barron, 1975), I see no rationale for Townes (1945) failure to apply this name according to the actions of the first revisor, the first revisor being Provancher (1879), who suppressed *longipes* and *longicornis* (the latter then being preocc. in *Mesoleptus* by Cresson, 1864) as synonyms of *Mesoleptus moyeni* (Provancher).

Mesoleptus perditus Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 97. ♂.

Euryproctus moyenii Dalla Torre, 1901. Cat. Hym., v. 3, p. 348. Emend.

Taxonomy: Provancher, 1879. Nat. Canad. 11: 223. — Townes, 1945. Amer. Ent. Soc., Mem. 11: 543. — Barron, 1975. Nat. Canad. 102: 498, 499, 510, 529-530.

petiolatus Davis. N. H., N. Y., Pa., Mich.

Euryproctus petiolatus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 328. ♀. Suppressed as a synonym of *Mesoleptus longipes* Provancher by Townes (1945); see synonymy of preceding species, *E. longicornis*.

Taxonomy: Townes, 1945. Amer. Ent. Soc., Mem. 11: 534.

puritanicus Davis. Mass.

Euryproctus puritanicus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 330. ♀.

ramis Davis. N. H., Alta, Colo.

Euryproctus sessilis Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 329. ♀.

Euryproctus ramis Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 329. ♀.

sentinis Davis. Maine, N. H., R. I., N. Y., Ont., Tex.

Euryproctus rufopictus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 330. ♀.

Euryproctus sentinis Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 330. ♀.

SUBFAMILY ANOMALONINAE

This is a medium-sized subfamily of worldwide distribution. Gauld (1976) recognized only two tribes and 35 genera or subgenera as opposed to the four tribes and 37 genera recognized by Townes (1971). Although I am not entirely convinced that the several genera reduced to subgeneric status by Gauld should be treated as subgenera, and although I generally regard the subgeneric category as being a nomenclatural nuisance, I have nevertheless followed Gauld's classification here, because in its entirety it appears to be an excellent piece of work.

Taxonomy: Townes, 1971. Amer. Ent. Inst., Mem. 17: 122-159 (genera of world). — Gauld, 1976. Brit. Mus. (Nat. Hist.) Ent., Bul. 33: 1-135 (genera of world).

TRIBE GRAVENHORSTIINI

Members of this tribe are internal parasites of Lepidoptera, ovipositing into the larvae and always emerging from the pupae.

Genus HABRONYX Foerster

Gauld (1976) recognized four subgenera, three of which are represented by Nearctic species.

Taxonomy: Townes, 1971. Amer. Ent. Inst., Mem. 17: 130-131. —Gauld, 1976. Brit. Mus. (Nat. Hist.) Ent., Bul. 33: 31-41.

Genus HABRONYX Subgenus HABRONYX Foerster

Habronyx Foerster, 1860. Naturh. Ver. Rheinlande, Verh. 17: 147.

Type-species: *Habronyx gravenhorstii* Foerster, Monotypic. The type-species is regarded as a synonym of *H. heros* (Wesmael).

Acanthostoma Kriechbaumer, 1895. Naturf. Gesell. Leipzig, Sitzber. 19: 128.

Type-species: *Acanthostoma japonicum* Kriechbaumer. Monotypic. The type-species is regarded as a synonym of *H. insidiator* (Smith).

Macrostemma Shestakov, 1923. Mus. Zool., Russ. Acad. Sci., Ann. 24: 46.

Type-species: *Macrostemma elegans* Shestakov. Monotypic.

Formosanomalon Uchida, 1928. Hokkaido Imp. Univ., Faculty Agr., Jour. 21: 241.

Type-species: *Formosanomalon baibarensis* Uchida. Monotypic and orig. desig.

This small subgenus is known from all zoogeographic regions. The "Marginal Index" of the Nearctic species disagrees with Gauld's (1976) definition of the subgenus *Habronyx*, and Gauld appears to have placed too much emphasis on this character in his key couplet which differentiates the subgenera *Habronyx* and *Camposcopus*.

luteopectus (Norton). Conn., N. Y., N. C., Mich.

Anomalon luteo-pectus Norton, 1863. Ent. Soc. Phila., Proc. 1: 363. ♂.

Anomalon luteopectum Dalla Torre, 1901. Cat. Hym., v. 3, p. 167. Emend.

Gravenhorstia luteopecta Townes, 1951. In Townes and Townes, in Muesebeck et al., U. S. Dept. Agr., Agr. Monog. 2: 397. Emend.

Taxonomy: Townes, 1971. Amer. Ent. Inst., Mem. 17: 131.

magniceps (Cresson). N. Y., N. J., Pa., n. Va., Mich., Ill., n.e. Kans., n.e. Tex., s. Ariz. Host: Geometrid?; *Hemaris diffinis* (Bdv.), *Anisota oslari* Roths., *Dryocampa rubicunda rubicunda* (F.).

Anomalon magniceps Cresson, 1872. Amer. Ent. Soc., Trans. 4: 170. ♀.

Anomalon fuliginosa Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 356. ♀. N. syn.

Taxonomy: Walkley, 1967. In Krombein et al., U. S. Dept. Agr., Agr. Monog. 2, sup. 2, p. 211 (generic placement).

Genus HABRONYX Subgenus CAMPOS COPUS Foerster

Camposcopus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 145.

Type-species: *Camposcopus aclerivora* Rohwer. Monotypically included and desig. by Rohwer, 1915.

Labrorychus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 146.

Type-species: *Anomalon nigricorne* Wesmael. By subsequent monotypy from inclusion by Brischke, 1880.

Blaptocampus Thomson, 1892. Opuse. Ent. 16: 1765.

Type-species: *Anomalon nigricorne* Wesmael. Desig. by Viereck, 1914.

This is a small subgenus of Holarctic, Oriental, and Australian distribution.

aclerivorus (Rohwer). Maine, R. I., Pa., Mich., Minn. Host: *Paralobesia viteana* (Clem.).

Acrobasis comptoniella Hulst, A. *rubrifasciella* Pack., *Acleris* sp., *Argyrotaenia velutinana* (Wlk.).

Camposcopus aclerivora Rohwer, 1915. U. S. Natl. Mus., Proc. 49: 226. ♀.

Genus HABRONYX Subgenus HABROCAMPULUM Gauld

Habronyx subg. *Habrocampulum* Gauld 1976. Brit. Mus. (Nat. Hist.) Ent., Bul. 33: 38.
Type-species: *Anomalon biguttatum* Gravenhorst. Monotypic and orig. desig.

This is a small Holarctic subgenus. I am grateful to have been informed of the existence of a Nearctic species by Dr. Ian Gauld (personal commun., 1977). Dr. Gauld said that the Nearctic specimens he had seen were in the collection of the American Entomological Institute, Ann Arbor, Mich.

Genus APHANISTES Foerster

Aphanistes Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 145.

Type-species: *Anomalon bellicosum* Wesmael. Desig. by Viereck, 1914 from three species included by Brischke, 1880.

Anochilacrum Enderlein, 1921. Stettin. Ent. Ztg. 82: 12.

Type-species: *Anochilacrum flavigena* Enderlein. Monotypic and orig. desig.

This is a large genus which is known from all zoogeographic regions except the Ethiopian. The Nearctic species are being revised by Dr. H. P. Hopper.

hyalinus (Norton). Que. s. to n. Ga., w. to Ill. Host: *Datana contracta* Wlk., *Schizura concinna* (J. E. S.), *Symmerista albifrons* (J. E. S.), *Phosphila turbulenta* Hbn., *Halisidota caryae* (Harris).

Anomalon hyaline Norton, 1863. Ent. Soc. Phila., Proc. 1: 361. ♀.

Anomalon nigro-rufus Norton, 1863. Ent. Soc. Phila., Proc. 1: 361. ♀.

Anomalon basilicon Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 359. ♀.

Anomalon edemae Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 360. ♂, ♀.

puparum (Ashmead). Mid-coastal Calif. Host: Noctuid.

Agrypon puparum Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 424. ♀.

Genus BARYLYPA Foerster

Baryllypa Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 146.

Type-species: *Baryllypa genalis* Thomson. Desig. by Viereck, 1914 from two species included by Thomson, 1892.

Laphyctes Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 146. Preocc. by Dujardin, 1844, Reichenbach, 1850, and Stal, 1853.

Type-species: *Laphyctes insidiator* Foerster. Desig. by Viereck, 1914 from three species included by Foerster, 1878.

Sarntheinia Dalla Torre, 1901. Wien. Ent. Ztg. 20: 52. N. name for *Laphyctes* Foerster.

Hadromanus Szepligeti, 1905. In Wytsman, Gen. Ins., fasc. 34, p. 14.

Type-species: *Anomalon (Labryrhybus) laevicoxe* Schmiedeknecht. Monotypic.

Magnibucca Morley, 1913. Rev. Ichn. Brit. Mus., v. 2, p. 79.

Type-species: *Magnibucca testacea* Morley. Monotypic.

Trochiscomerus Meyer, 1931. Konowia 10: 8.

Type-species: *Trochiscomerus schmiedeknechti* Meyer. Monotypic.

This is a large genus of Neotropic, Holarctic, Oriental, and Australian distribution.

Taxonomy: Townes, 1971. Amer. Ent. Inst., Mem. 17: 139-140. —Gauld, 1976. Brit. Mus. (Nat. Hist.) Ent., Bul. 33: 44-46.

elongata (Davis). Mich., S. Dak., Alta.

Anomalon elongatum Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 357. ♂, ♀.

Anomalon bipartitana Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 358. ♂.

irona Grimble. Northern Mich.

Baryllypa irona Grimble, 1967. Canad. Ent. 99: 1332.

paeneferruginea (Viereck). Western Kans.

Anomalon paeneferrugineum Viereck, 1905. Kans. Acad. Sci., Trans. 19: 310. ♀.

relicta (Fabricius). "North America."

Ophion relictus Fabricius, 1798. Sup. Ent. System., p. 236. [male].

Taxonomy: Townes, 1961. Ent. Soc. Wash., Proc. 63: 111. —Gauld, 1976. Brit. Mus. (Nat. Hist.) Ent., Bul. 33: 47-48.

smithii (Davis). N. J., Ga.

Anomalon smithii Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 357. ♂.

sulcata (Provancher). Vt., R. I., N. Y., Ont.

Podogaster sulcatus Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 90. ♀.

Genus CORSONCUS Townes

Corsoncus Townes, 1971. Amer. Ent. Inst., Mem. 17: 141.

Type-species: *Anomalon magum* Cresson. Monotypic and orig. desig.

This is a small Neotropic and Nearctic genus. The generic limits of *Corsoncus* were redefined by Gauld (1976). Except for *C. nigricans* (Cresson), the Nearctic species here newly placed in *Corsoncus* had been referred to *Hadromanus* (now a synonym of *Barylypa*) by Townes (1971). I have not seen the types of the species now placed in *Corsoncus*.

Taxonomy: Townes, 1971. Amer. Ent. Inst., Mem. 17: 140. —Gauld, 1976. Brit. Mus. (Nat. Hist.) Ent., Bul. 33: 46-48.

apicalis (Cresson), n. comb. Kans., Colo.

Cremastus fulvescens var. *apicalis* Cresson, 1865. Ent. Soc. Phila., Proc. 4: 286. ♀.

Cremastus fulvescens var. *seminiger* Cresson, 1865. Ent. Soc. Phila., Proc. 4: 286. ♂, ♀.

Anomalon fulvescens var. *hemimelanus* Viereck, 1905. Kans. Acad. Sci., Trans. 19: 310. ♀.

clavatus (Davis), n. comb. S. C., Ga.

Anomalon clavatum Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 357. ♀.

fulvescens (Cresson), n. comb. Colo., Ariz.

Cremastus fulvescens Cresson, 1865. Ent. Soc. Phila., Proc. 4: 285. ♂, ♀.

nigricans (Cresson), n. comb. Colo.

Cremastus fulvescens var. *nigricans* Cresson, 1865. Ent. Soc. Phila., Proc. 4: 286. ♀.

orbitalis (Cresson). Tex., Colo.

Anomalon orbitalis Cresson, 1872. Amer. Ent. Soc., Trans. 4: 170. ♂.

pallitarsis (Cresson), n. comb. N. Y., Del., W. Va., S. C., Tex. Host: *Cirrophanus triangulifer* Grt.

Anomalon pallitarse Cresson, 1872. Amer. Ent. Soc., Trans. 4: 170. ♂.

Anomalon palliditarse Dalla Torre, 1901. Cat. Hym., v. 3, p. 168. Emend.

Genus LIOPTERNA Townes

Liopterna Townes, 1971. Amer. Ent. Inst., Mem. 17: 138.

Type-species: *Liopterna schlingeri* Townes. Monotypic and orig. desig.

A single species is known.

schlingeri Townes. Southern Calif. Known from a single male collected at a locality cited by Townes as 3 miles west of "Octoella Wells," Calif. It is apparent that this is a misspelling for Ocotilla Wells in San Diego County. The type-locality would presumably lie at the eastern edge of the Anza-Borrego Desert State Park.

Liopterna schlingeri Townes, 1971. Amer. Ent. Inst., Mem. 17: 138. ♂.

Genus THERION Curtis

Therion Curtis, 1829-1830. Guide to Arrangement Brit. Insects, p. 101.

Type-species: *Ichneumon circumflexus* Linnaeus. Desig. by Curtis, 1839.

Therium Agassiz, 1846. Nom. Zool., Index Univ., p. 368. Emend.

Eroxilum Wesmael, 1849. [Brussels] Acad. Roy. de Belg., Bul. 16 (pt. 2): 119, 222.

Type-species: *Ichneumon circumflexus* Linnaeus. Monotypic.

According to Townes (1971) this moderately large genus is known from all zoogeographic regions except the Australian Region.

Taxonomy: Townes, 1971. Amer. Ent. Inst., Mem. 17: 156-157.

circumflexum (Linnaeus). Que. w. to s.w. B. C., s. to N. J., N. Mex., and Calif.; Eurasia; n. Africa. Host: *Acronicta dactylinus hesperida* Sm.?

Ichneumon circumflexus Linnaeus, 1758. Syst. Nat., ed. 10, v. 1, p. 566. [female].

Erochilum occidentale Cresson, 1879 (1878). Acad. Nat. Sci. Phila., Proc. 30: 366. ♀.

Anomalon nigrum Provancher, 1879. Nat. Canad. 11 (no. 127): 142. ♂, ♀.

Anomalon japonicum Cameron, 1906. Entomologist 39: 98. ♀.

Erochilum callosum Shestakov, 1923. Mus. Zool., Russ. Acad. Sci., Ann. 24: 44. Sex not indicated.

Erochilum tarsatum Shestakov, 1923. Mus. Zool., Russ. Acad. Sci., Ann. 24: 44. Sex not indicated.

Erochilum laricis Matsumura, 1926 (1925). Mus. Zool., Russ. Acad. Sci., Ann. 26: 36. ♀.

Erochilum circumflexum ab. *nigroscutellata* Hellen, 1926. Soc. pro Fauna et Flora Fenn., Acta 56 (6): 15. ♀.

Erochilum circumflexum var. *nipponicum* Uchida, 1928. Hokkaido Imp. Univ., Faculty Agr., Jour. 21: 236. ♂, ♀.

Taxonomy: Uchida, 1958. Insecta Matsumurana 21: 92-93 (syn). —Townes, Momoi, and Townes, 1965. Amer. Ent. Inst., Mem. 5: 380-381 (syn.).

Morphology: Iwata, 1960. Acta Hym. 1: 169 (ovary and egg).

confusum (Ashmead). Va., N. C., S. C., Tex. Host: *Acronicta americana* (Harris), A. *hastulifera* (J. E. S.).

Schizoloma confusa Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 426. ♀.

Erochilum acronyctae Riley, 1890. In Riley and Howard, U. S. Dept. Agr., Insect Life 3: 155. Nomen nudum.

Erochilum acronyctae Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 190. ♀. Townes (1945) selected as lectotype the specimen which Ashmead erroneously recorded as being from D. C.; the type-locality is actually Va.

Taxonomy: Townes, 1945. Amer. Ent. Soc., Mem. 11: 724.

fuscipenne (Norton). N. B. w. to Hudson Bay and s. B. C., s. to Va., N. Mex., and Calif. Host: *Estigmene acrea* (Drury), *Halisidota maculata* (Harris), *Acronicta americana* (Harris), A. *dactylinus hesperida* Sm., *Meronlonche lupini* (Grt.).

Erochilum fuscipennis Norton, 1863. Ent. Soc. Phila., Proc. 1: 359. ♀.

Erochilum verticale Morley, 1913. Rev. Ichn. Brit. Mus., v. 2, p. 78. ♀.

Taxonomy: Townes, 1961. Ent. Soc. Wash., Proc. 63: 106.

longipes (Provancher). Tex., s.e. Wyo., Colo., Utah, Ariz., Nev., s. B. C., Oreg., Calif. Host: *Heliothis* sp., *Spodoptera exigua* (Hbn.).

Anomalon californicum Cresson, 1879 (1878). Acad. Nat. Sci. Phila., Proc. 30: 367. Preocc. in *Anomalon* by Cresson, 1879, p. 367.

Heteropelma longipes Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 120, 363. ♂.

Anomalon simile Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 423. ♀.

morio (Fabricius). N. S. w. to Wash., s. to Fla., s.e. Kans., and n.w. Nev.; Mexico. Host: *Cycnia inopinata* (Hy. Edw.), *Diacrisia virginica* (F.), *Estigmene acrea* (Drury), *Halisidota maculata* (Harris), *Hyphantria cunea* (Drury).

Ichneumon morio Fabricius, 1781. Species Insectorum, v. 1, p. 436. [female].

Ophion mundus Harris, 1835. In Hitchcock, Rpt. Geol. Min. Bot. Zool. Mass., ed. 2, p.585. . Nomen nudum.

Ophion mundus Say, 1836. Boston Jour. Nat. Hist. 1: 239. ♂.

Anomalon flavipes Brulle, 1846. In Lepeletier, Hist. Nat. Ins. Hym. v. 4, p. 170. ♂, ♀.

Anomalon nigripennis Provancher, 1874. Nat. Canad. 6: 173. ♂ (? misdet.?).

Taxonomy: Townes, 1961. Ent. Soc. Wash., Proc. 63: 109.

nigripes Dreisbach. Mass., Conn., N. Y., Pa., n.w. Md., Mich. Host: *Halisidota tessellaris* (J. E. S.), *Euthisanotia grata* (F.).

Therion nigripes Dreisbach, 1947. N. Y. Ent. Soc., Jour. 55: 201. ♂, ♀.

petiolatum (Davis). Maine, N. Y., Mich., Wis., S. Dak.

Exochilum petiolatum Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 356. ♂, ♀.

sassacus Viereck. N. B. w. to Wash., s. to Ala. and Mo. Host: *Cycnia inopinata* (Hy. Edw.), *C. tenera* Hbn., *Hyphantria cunea* (Drury), *H. textor* (Harris).

Therion sassacus Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey Bul. 22: 287. ♂.

Therion waccagum Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey Bul. 22: 287. ♂.

tenuipes (Norton). Mass., Conn., N. Y., Md., N. C., S. C., Ind.

Exochilum tenuipes Norton, 1863. Ent. Soc. Phila., Proc. 1: 360. ♀.

Exochilum diabolus Morley, 1913. Rev. Ichn. Brit. Mus., v. 2, p. 73. ♀.

Taxonomy: Townes, 1961. Ent. Soc. Wash., Proc. 63: 106.

texanum (Ashmead). Mass. s. to e. N. C., w. to n.e. Kans. and Tex.; Mexico? Ecology: Flies around *Smilax*. Host: *Psychomorpha epimenis* (Drury).

Exochilum texanum Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 426. ♂.

varicolor (Viereck). N. B., Me., N. H., Vt., Conn., N. Y., Pa., Md., s.w. Va., w. N. C., N. Mex.

Exochilum varicolor Viereck, 1903. In Skinner, Amer. Ent. Soc., Trans. 29: 90. ♂.

Genus HETEROPELMA Wesmael

Schizoloma Wesmael, 1849. [Brussels] Acad. Roy. de Belg., Bul. 16 (pt. 2): 120.

Type-species: *Ichneumon amictus* Fabricius. Monotypic.

Heteropelma Wesmael, 1849. [Brussels] Acad. Roy. de Belg., Bul. 16 (pt. 2): 120.

Type-species: *Heteropelma calcator* Wesmael. Monotypic.

Schizopoma Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 145, 220. Unnecessary n. name for *Schizoloma* Wesmael.

Tanypelma Townes, 1971. Amer. Ent. Inst., Mem. 17: 157.

Type-species: *Heteropelma fulvicorne* Townes. Orig. desig.

In his revision of *Heteropelma*, Gauld (1976) recognized 17 species in the world. The genus is known from all zoogeographic regions except the Ethiopian Region.

Revision: Gauld, 1976. Brit. Mus. (Nat. Hist.) Ent., Bul. 34: 155-219 (spp. of the world).

Taxonomy: Townes, 1971. Amer. Ent. Inst., Mem. 17: 157-158 (syn.). —Gauld, 1976. Brit. Mus. (Nat. Hist.) Ent., Bul. 33: 51-53.

datanae Riley. Que. w. to n. Minn., s. to s. Ga., s. La., and n.e. Kans. Host: *Datana contracta* Wlk., *D. integriformis* G. and R., *D. ministra* (Drury), *D. perspicua* G. and R.

Anomalon flavicorne Brulle, 1846. In Lepeletier, Hist. Nat. Ins. Hym., v. 4, p. 171. ♀.
Preocc. by Say, 1823.

Heteropelma datanae Riley, 1888. U. S. Dept. Agr., Insect Life 1: 177. “♀” = ♂, ♀.

Heteropelma fulvicorne(!) Morley, 1913. Rev. Ichn. Brit. Mus., v. 2, p. 68. Lapsus for and misidentification of *Anomalon flavicornis* Say.

Heteropelma fulvicorne Townes, 1945. Amer. Ent. Soc., Mem. 11: 729. N. name for *A. flavicorne* Brulle.

Taxonomy: Gauld, 1976. Brit. Mus. (Nat. Hist.) Ent., Bul. 34: 185-187.

Genus GRAVENHORSTIA Boie

Gauld (1976) recognized four subgenera, only one of which has Nearctic species.

Taxonomy: Gauld, 1976. Brit. Mus. (Nat. Hist.) Ent., Bul. 33: 55-61.

Genus GRAVENHORSTIA Subgenus GRAVENHORSTIA Boie

Gravenhorstia Boie, 1856. Arch. f. Naturgesch. 2: 42.

Type-species: *Gravenhorstia picta* Boie. Monotypic.

Odontopsis Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 150. Preocc. by Hasselt, 1823.

Type-species: *Gravenhorstia picta* Boie. Monotypically included and desig. by Viereck, 1914. Dalla Torre (1901) placed *Odontopsis* in synonymy with *Gravenhorstia*, but no species were thereby included, contrary to the statement of Perkins (1962).

This subgenus is confined to the Mediterranean Basin.

Taxonomy: Perkins. 1962. Brit. Mus. (Nat. Hist.) Ent., Bul. 11: 440.

Genus GRAVENHORSTIA Subgenus ERIGORGUS Foerster

Erigorgus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 146.

Type-species: *Anomalon fibulator* Gravenhorst. Desig. by Perkins, 1962 from three species included by Brischke, 1880.

Sympatris Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 146.

Type-species: *Anomalon ferrugineus* Norton. By subsequent monotypy from inclusion by Viereck, 1917.

Paranomalon Viereck, 1912. Ent. Soc. Wash., Proc. 14: 175.

Type-species: *Ophion flavifrons* Gravenhorst. Monotypic and orig. desig. See synonymy of *G. (E.) cerinops* (Gravenhorst).

This large subgenus is known from all zoogeographic regions except the Ethiopian Region.

Taxonomy: Perkins, 1962. Brit. Mus. (Nat. Hist.) Ent., Bul. 11: 422, 455. —Townes, 1971.

Amer. Ent. Inst., Mem. 17: 133-134.

ambigua (Norton). Mass.

Anomalon ambiguus Norton, 1863. Ent. Soc. Phila., Proc. 1: 362. ♀.

cerinops (Gravenhorst). Greenland?; Eurasia.

Ophion flavifrons Gravenhorst, 1807. Vergl. Uebers. Zool. Systeme, p. 267. Sex not indicated. Preocc. by Fabricius, 1798.

Anomalon cerinops Gravenhorst, 1829. Ichn. Europaea, v. 3, p. 658. ♂, ♀.

Ophion (Anomalon) pubescens Zetterstedt, 1840. Insecta Lapponica, Hym., p. 393. ♂.

Taxonomy: Holmgren, 1860 (1858). Svenska Vetensk.-Akad. Handl. (n. f.) 2 (8): 20-21 (syn.). —Lundbeck, 1897 (1896). Dansk Naturhist. For. Kjobenhavn, Vidensk. Meddel. (for 1896), p. 235 (Greenland record).

curta (Norton). Maine w. to Alta., s. to Ark., Tex., and Colo.

Anomalon curtus Norton, 1863. Ent. Soc. Phila., Proc. 1: 362. ♂.

edwardsii (Cresson). Southwestern B. C.

Anomalon Edwardsii Cresson, 1879 (1878). Acad. Nat. Sci. Phila., Proc. 30: 367. ♀.

eureka (Ashmead). Southwestern S. Dak., Colo., w. Mont., s.w. B. C., s.e. Wash., n.e. Calif.

Anomalon (?) eureka Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 423. ♀.

ferruginea (Norton). Tenn., Ga., Ill., Tex.

Anomalon ferruginea Norton, 1863. Ent. Soc. Phila., Proc. 1: 363. ♀.

neglecta (Morley). Hudson Bay. The reference by Gauld (1976) to *Therion neglectum* (Morley) was, according to a letter I received from him in 1976, based upon Morley's male from N. S. The latter was excluded as a syntype by Morley's statement that "four pairs, including the type, were taken about Hudson's Bay in 1844, except a single male found ... in Nova Scotia." The identification by Townes (1961) was based upon a female syntype labeled "Hudsons Bay."

Exochilum neglectum Morley, 1913. Rev. Ichn. Brit. Mus., v. 2, p. 76. ♂, ♀.

Taxonomy: Townes, 1961. Ent. Soc. Wash., Proc. 63: 106. —Gauld, 1976. Brit. Mus. (Nat. Hist.) Ent., Bul. 33: 51.

propinquua (Cresson). Colo.

Anomalon propinquum Cresson, 1865. Ent. Soc. Phila., Proc. 4: 284. ♂.

rotunda (Davis). Northeastern Kans.

Anomalon rotundus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 360. ♂.

rufula (Provancher). Que., N. H., Mass., N. Y., Md., n. Va., Ont., Ind.

Anomalon rufulum Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 80. ♀.

semirufa (Norton). Que. w. to s.e. S. Dak., s. to Md., Tenn., and n.e. Kans.

Anomalon semi-rufus Norton, 1863. Ent. Soc. Phila., Proc. 1: 362. ♀.

suburbis (Davis). Northern Idaho.

Anomalon suburbis Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 358. ♂, ♀.

xanthopsis (Ashmead). Colo., w. Mont., n.e. Calif.

Anomalon xanthopsis Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 423. ♂.

Genus TRICHOMMA Wesmael

Trichomma Wesmael, 1849. [Brussels] Acad. Roy. de Belg., Bul. 16 (pt. 2): 119, 139.

Type-species: *Anomalon (Trichomma) fulvidens* Wesmael. Monotypic.

Trichomella Szeppligeti, 1910. Leyden Mus., Notes 32: 91.

Type-species: *Trichomma clavipes* Krieger. Desig. by Viereck, 1914.

This moderately large genus is known from all zoogeographic regions except the Ethiopian Region.

eneicator (Rossi). Eurasia. Introduced in N. J. in 1931 without becoming established. Host:

Grapholitha molesta (Bsk.). The host cited was the target species for the releases in N. J.

Ichneumon Eneicator Rossi, 1790. Fauna Etrusca, v. 2, p. 48. ♀.

Trichomma ruficorix Foerster, 1860. Naturh. Ver. Rheinlande, Verh. 17: 149. ♀.

Taxonomy: Krieger, 1904. Ztschr. System. Hym. Dipt. 4: 165-166.

Biology: Rosenberg, 1934. Bul. Ent. Res. 25: 214-217. — Telenga, 1934. Anz. f. Schaeldlingsk. 10: 101-106. — Allen, Holloway, and Haeussler, 1940. U. S. Dept. Agr., Cir. 561: 59-60.

— Simmonds, 1944. Sci. Agr. 25: 1-30. — Zech, 1959. Ztschr. f. Angew. Ent. 44: 204.

maceratum (Cresson). Colo., s. Idaho, s.w. Utah, Calif. Host: *Etiella zinckenella* (Treit.),

Melitara dentata (Grt.), *Pima granitellum* (Rag.), *Barbara colfaxiana taxifoliella* (Bsk.).

Anomalon maceratum Cresson, 1879 (1878). Acad. Nat. Sci. Phila., Proc. 30: 368. ♂.

Trichomma granitellae Viereck, 1912. U. S. Natl. Mus., Proc. 42: 645. ♂.

Trichomma epischniae Viereck, 1912. U. S. Natl. Mus., Proc. 42: 645. ♀.

Taxonomy: Townes and Townes, 1951. In Muesebeck et al., U. S. Dept. Agr., Agr. Monog. 2: 396 (syn.).

reticulatum Davis. Southwestern Maine, N. Y., N. J., Ohio, s. Mich., e. Mo., n.e. Kans., B. C.?

Host: *Grapholitha molesta* (Bsk.), *Melissopus latiferreanus* (Wlsm.), *Canarsia ulmiarrosorella* Clem., *Nephopteryx subfuscella* (Rag.).

Trichomma reticulata Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 361. ♀.

Genus AGRYPON Foerster

Agrypion Foerster, 1860. Naturh. Ver. Rheinlande, Verh. 17: 151.

Type-species: *Ophion flaveolatum* Gravenhorst. Desig. by Morley, 1913.

Trichonotus Cameron, 1905 (July). Roy. Asiatic Soc., Straits Branch, Jour. 44: 124. Preocc. by Schneider, 1801; Rafinesque, 1815; and Loew, 1857.

Type-species: *Trichonotus reticulatus* Cameron. Monotypic.

Trichionotus Cameron, 1905 (August). Ann. and Mag. Nat. Hist. (7) 16: 168.

Type-species: *Trichionotus reticulatus* Cameron. Monotypic. The holotype of the type-species is also the holotype of *Trichonotus reticulatus* Cameron.

Odontagrypon Cameron, 1906. So. African Mus., Ann. 5: 90.

Type-species: *Odontagrypon spilonotus* Cameron. Desig. by Viereck, 1914.

Agrypion subg. *Paragrypon* Uchida, 1941. Insecta Matsumurana 15: 159.

Type-species: *Gongropelma kikuchii* Uchida. Orig. desig.

Dioborus Rao, 1953. Indian Forest Rec., New Ser., Ent. 8: 204.

Type-species: *Dioborus indica* Rao. Monotypic and orig. desig. The type-species is regarded as a synonym of *A. nox* Morley.

This is a very large genus represented in all zoogeographic regions. The name *Labryrhychus* was for many years incorrectly applied to a large part of the species in this genus because of an erroneous type-species designation by Viereck (1914). The names *Trichonotus* and *Trichionotus* were more recently applied to most of the species which had been in *Labryrhychus* auct., but Gauld (1976) has suppressed them as synonyms of *Agrypon*. Gauld apparently did not know more than a few species intermediate between *Agrypon* and *Trichonotus*, but the discussion by Schmid (1970, p. 1539) appears to support Gauld's suppression of *Trichonotus*.

Taxonomy: Viereck, 1914. U. S. Natl. Mus., Bul. 83: 80. — Townes, 1957. Ent. Soc. Wash., Proc. 63: 115 (syn.). — Townes, Townes, and Gupta, 1961. Amer. Ent. Inst., Mem. 1: 311, 316 (syn.). — Perkins, 1962. Brit. Mus. (Nat. Hist.) Ent., Bul. 11: 433-434 (type-species correction). — Townes, Momoi, and Townes, 1965. Amer. Ent. Inst., Mem. 5: 373, 374 (syn.). — Walkley, 1967. In Krombein, U. S. Dept. Agr., Agr. Monog. 2, sup. 2, p. 211 (homonymy *Trichonotus*). — Schmid, 1970. Canad. Ent. 102: 1539-1541. — Townes, 1971. Amer. Ent. Inst., Mem. 17: 141-142, 143-144. — Gauld, 1976. Brit. Mus. (Nat. Hist.) Ent., Bul. 33: 66-68, 70.

aestivale (Viereck), n. comb. Mass., N. Y., Md., n. Va. Host: *Archips fervidanus* (Clem.).
Labryrhychus aestivalis Viereck, 1921. Psyche 28: 79. ♀.

alpinum (Davis), n. comb. N. Y., Ont., Mich., Wis.?, Sask., Colo., Idaho. Host: *Thymelicus lineola* (Ochs.)?, *Choristoneura pinus* Free.?

Anomalon alpinus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 360. ♀.

anale (Say), n. comb. Que. w. to Wash., s. to D. C. and s. Ill. Host: *Orygia leucostigma* (J. E. S.), *Malacosoma americanum* (F.), *M. californicum fragile* (Str.), *M. disstria* Hbn., *Ichthyura inclusa* Hbn., *Cycnia tenera* Hbn.

Ophion analis Say, 1829. Contrib. Maclurian Lyceum to Arts and Sci. 1: 75. ♀.

Taxonomy: Cushman and Gahan, 1921. Ent. Soc. Wash., Proc. 23: 168.

boreale Ashmead, restored comb. East-central B. C.?

Agrypon boreale Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 424. ♀. The label of the holotype reads: "Ft. McLeod, Brit. Amer.; Aug., 1882." British America being synonymous with Canada, it is not altogether certain that the type-locality is Ft. McLeod, B. C. rather than Ft. Macleod in southern Alta. (the latter being spelled [or misspelled] McLeod in an 1886 Atlas belonging to me). The two places should be different enough ecologically for this question to be resolved with relative certainty.

canadense (Provancher), n. comb. Que.

Anomalon canadensis Provancher, 1874. Nat. Canad. 6: 175. ♀.

Taxonomy: Barron, 1975. Nat. Canad. 102: 439-440 (lectotype selected).

carinifer Schmid. Colo., s.w. Alta., s. B. C., n.e. Calif.

Agrypon carinifer Schmid, 1970. Canad. Ent. 102: 1540. ♂, ♀.

chlamidiatum (Provancher), n. comb. Que., Maine?, N. H.?

Anomalon chlamidiatum Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 82. ♀.

Atrometus flavifrons Ashmead, 1902. In Slosson, Ent. News 13: 6. Nomen nudum.

filiforme (Provancher), n. comb. Que.

Anomalon filiforme Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 83. ♀ (♂ misdet.?).

flaveolatum (Gravenhorst), N. S.? Eurasia. A species identified as *A. flaveolatum* was introduced in N. S. from 1956 through 1958, and *A. flaveolatum* has been reported as being established there. Host: *Operophtera brumata* (L.). Schmid (1970) stated that *Agrypon provancheri* (Dalla Torre) may be a subspecies or synonym of *A. flaveolatum*; therefore, it needs to be corroborated that the species that is said to have been recovered in N. S. is not the one that had already been there prior to any releases of individuals from Europe, or, otherwise, that the introduced species really is *A. flaveolatum*. The host cited was the target species for releases in N. S. of the species identified as *A. flaveolatum*.

Ichneumon auricapillus Gmelin, 1790. In Linnaeus, Syst. Nat., ed. 13, v. 1, pt. 5, p. 2699.

Sex not indicated. Syn.?

Ophion flaveolatum Gravenhorst, 1807. Vergl. Uebers. Zool. Systeme, p. 268. [male?].

melleum (Cresson). R. I., Md., Va., Tex. Ecology: Occurs in "overgrown fields." *Anomalon melleum* Cresson, 1872. Amer. Ent. Soc., Trans. 4: 171. ♀.

metallicum (Norton). Mass., R. I., Mich.

Anomalon metallicus Norton, 1863. Ent. Soc. Phila., Proc. 1: 364. ♀.

prismaticum (Norton), n. comb. N. B.? Que.?, Maine?, N. H.?, Vt.?, Mass., Conn., Ont.?, Ohio?, Minn.? Host: *Ostrinia nubilalis* (Hbn.)?, *O. penitalis* (Grt.)?, *Archips cerasivoranus* (Fitch)? The host and distribution data added by Walkley (1967) are based on specimens in the U. S. Natl. Museum collection. I have queried all of these because I do not feel assured that there is any material in the U. S. Natl. Museum collection which is reliably identified as *A. prismaticum*.

Anomalon prismaticus Norton, 1863. Ent. Soc. Phila., Proc. 1: 364. ♀.

Taxonomy: Walkley, 1967. In Krombein, U. S. Dept. Agr., Agr. Monog. 2, sup. 2, p. 211.

provancheri (Dalla Torre). N. S. w. to s.e. Alaska, s. to n. Ga., Iowa, Colo., Ariz., and Calif. Host: *Melanolophia imitata* (Wlk.), *Operophtera bruceata* (Hulst). No host data were cited by Schmid (1970).

Anomalon unicolor Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 82. ♀. Preocc. by Ratzeburg, 1874.

Anomalon Provancheri Dalla Torre, 1901. Cat. Hym., v. 3, p. 169. N. name for *Anomalon unicolor* Provancher.

Atrometus alaskensis Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 233. ♂, ♀.

Taxonomy: Walkley, 1958. In Krombein et al., U. S. Dept. Agr., Agr. Monog. 2, sup. 1, p. 61. — Schmid, 1970. Canad. Ent. 102: 1540-1541.

pseudargioli (Howard). Mass., R. I., Conn., W. Va. Host: *Celastrina pseudargiolus* (B. and L.), *Strymon melinus* (Hbn.). *Anomalon pseudargioli* Howard, 1889. In Scudder, Butterflies of East. U. S., v. 3, p. 1881. ♀.

Genus PARANIA Morley

Parania Morley, 1913. Rev. Ichn. Brit. Mus., v. 2, p. 96.

Type-species: *Parania nototrichoides* Morley. Monotypic. The type-species is regarded as a synonym of *P. tricolor* (Szepligeti).

This is a small Neotropic, Holarctic, Oriental, and Ethiopian genus. Until recently the name *Atrometus* was incorrectly applied to this genus.

Revision: Schmid, 1969. Canad. Ent. 101: 778-784.

Taxonomy: Townes, Townes, and Gupta, 1961. Amer. Ent. Inst., Mem. 1: 315-316 (syn.). — Townes, 1971. Amer. Ent. Inst., Mem. 17: 144-145, 153. — Gauld, 1976. Brit. Mus. (Nat. Hist.) Ent. Bul. 33: 70-71.

badia (Schmid). Mass., Conn., N. Y., Ohio, s. Mich., w. N. Dak. Host: *Archips argyrospilus* (Wlk.).

Atrometus badius Schmid, 1969. Canad. Ent. 101: 779. ♂, ♀.

geniculata (Holmgren). N. S. w. to w.-cent. B. C., s. to n. Ga., Kans., s.w. N. Mex., and s. Calif.; Europe. Host: *Psilcrosis* sp., *Homadaula anisocentra* (Meyr.), *Acleris variana* (Fern.).

Argyrotaenia velutinana (Wlk.), *Choristoneura fumiferana* (Clem.), *C. lambertiana* (Bsk.), *Anchylopera nubeculana* Clem., *Ancylis comptana* (Froel.), *Grapholithia molesta* (Bsk.), *Phaneta amphorana* (Wlsm.), *Rhyacionia buoliana* (D. and S.), *R. frustrana* *bushnelli* (Bsk.), *R. f. frustrana* (Comst.), *R. neomexicana* (Dyar), *Spilonota ocellana* (D. and S.), *Strepsicrates smithiana* (Wlsm.), *Anarsia lineatella* Zell., *Aroga trialbamaculella* (Chamb.), *Acrobasis rubrifasciella* Pack., *Dioryctria reniculella* (Grt.), *Ostrinia nubilalis* (Hbn.), *Eublemma minimum* (Gn.).

Anomalon geniculatum Holmgren, 1857. Svenska Vetensk.-Akad., Ofvers. af ... Forhandl. 14: 182. ♂, ♀.

Angitia paediscae Riley, 1890. In Riley and Howard, U. S. Dept. Agr., Insect Life 3: 156. Nomen nudum.

Agrypon paediscae Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 190, errata. ♂, ♀. The spelling *praediscae* appears on p. 190 and the correction *paediscae* appears in the errata, the errata evidently being published at the same time as the rest of the paper. The lectotype selected by Schmid (1969) is here rejected because it was not one of Ashmead's syntypes. Although Ashmead's syntypes included several specimens from Fortress Monroe (=Fort Monroe, Hampton), Va., it was indicated by Ashmead that they were specimens labeled 3422 with the superscript 01. Notes in the U. S. Natl. Museum under that Bureau of Entomology number indicate that specimens so labeled were reared from the olethreutid *Strepsicrates smithiana* collected at Ft. Monroe on *Myrica cerifera*, but that Bureau number does not apply to specimens reared from other hosts. The specimen here rejected as lectotype is labeled as being reared from a lepidopteran on roots of grass. Among the labels of the female specimen here selected as lectotype are Ashmead's handwritten identification label and a label bearing the aforementioned Bureau of Entomology number and the date "10/7, 84" (i.e. July 10, 1884).

Anomalon clavipes Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 359. ♂.

Podogaster evetirivorus Rohwer, 1914. Ent. Soc. Wash., Proc. 16: 142. ♂, ♀.

obscura (Schmid), n. status. South-cent. Ariz. If this taxon proves to be conspecific with *geniculata*, it would almost certainly be better treated as a synonym of *geniculata* rather than as a subspecies thereof.

Atrometus geniculatus obscurus Schmid, 1969. Canad. Ent. 101: 783. ♂, ♀.

Genus METOA Townes

Metoa Townes, 1971. Amer. Ent. Inst., Mem. 17: 147.

Type-species: *Anomalon exile* Provancher. Monotypic and orig. desig.

This is a Nearctic genus. Townes said that he had seen eight species.

exilis (Provancher). Que. s. to N. C., w. to Mich. Several host records were published in 1898 and 1911, but I suspect that they involve misidentifications of *Anomalon exile* and doubt that they would pertain to any species of *Metoa*.

Anomalon exile Provancher, 1874. Nat. Canad. 6: 175. ♀.

verbosa (Cresson), n. comb. Western Oreg. s. to s. Calif.

Anomalon verbosum Cresson, 1879 (1878). Acad. Nat. Sci. Phila., Proc. 30: 368. ♂, ♀.

Genus CALCANEUM Townes

Calcaneum Townes, 1971. Amer. Ent. Inst., Mem. 17: 145.

Type-species: *Calcaneum oporinum* Townes. Monotypic and orig. desig.

This is a Nearctic genus. Specimens which I have seen from N. Mex. and s.e. Wash. appear to represent an undescribed species, and thus it appears that there are at least two species in the genus.

oporinum Townes. Conn., N. Y., N. J., Md., Va. Ecology: Occurs in fall in fields.

Calcaneum oporinum Townes, 1971. Amer. Ent. Inst., Mem. 17: 146. ♂, ♀.

Genus OPHIONELLUS Westwood

Pharsalia Cresson, 1872. Amer. Ent. Soc., Trans. 4: 177. Preocc. by Thomson, 1864.

Type-species: *Pharsalia texana* Cresson. Desig. by Viereck, 1914.

Ophionellus Westwood, 1874. Thesaurus Ent. Oxon., p. 128.

Type-species: *Ophionellus fragilis* Westwood. Monotypic.

Hymenopharsalia Morley, 1913. Rev. Ichn. Brit. Mus., v. 2, p. 97. N. name for *Pharsalia* Cresson. The volume in which Morley proposed this name was received by the Smithsonian Institution on May 2, 1913.

Parophionellus Brues and Richardson, 1913. Amer. Mus. Nat. Hist., Bul. 32: 495.

Unnecessary n. name for *Pharsalia* Cresson. The paper in which this name was proposed is dated Oct. 7, 1913 and was received at the Smithsonian Institution on Oct. 11, 1913.

This large genus is confined to the New World, most of the species being Neotropic.

Revision: Cushman, 1922. U. S. Natl. Mus., Proc. 60 (21): 14-20.

Taxonomy: Townes, 1945. Amer. Ent. Soc., Mem. 11: 710 (syn.). —Gauld, 1976. Brit. Mus. (Nat. Hist.) Ent., Bul. 33: 82-84.

bridwelli (Cushman). Md., n. Va., S. C.

Hymenopharsalia bridwelli Cushman, 1922. U. S. Natl. Mus., Proc. 60 (21): 19. ♀.

foutsii (Cushman). Que., Maine, Mass., N. Y., Pa., Md., Ind., Mo., Mont., Ariz. Host: *Homadaula anisocentra* (Meyr.), *Episimus argutanus* (Clem.), *Arogalea cristifasciella* (Chamb.), gelechiid on *Salix*.

Hymenopharsalia foutsii Cushman, 1922. U. S. Natl. Mus., Proc. 60 (21): 18. ♀.

texanus (Cresson). S. C., Ga., Kans., Tex., N. Mex., Calif.; Mexico.

Pharsalia texana Cresson, 1872. Amer. Ent. Soc., Trans. 4: 177. ♀.

virginiensis (Cresson). N. Y., Md., D. C., Va., W. Va., S. C., Ind., Mo.

Pharsalia virginensis Cresson, 1872. Amer. Ent. Soc., Trans. 4: 177. "♂" = ♀.

Genus OPHIOPTERUS Brulle

Ophiopterus Brulle, 1846. In Lepeletier, Hist. Nat. Ins. Hym., v. 4, p. 153.

Type-species: *Ophiopterus coarctatus* Brulle. Monotypic.

Ophiopterus(!) Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 87, 180, 215.

Ophiopterus Schulz, 1906. Spolia Hym., p. 96. Emend.

Ophiopterus Morley, 1912. Rev. Ichn. Brit. Mus., v. 1, p. 66. Emend. Preocc. by Schulz, 1906.

This is a small genus of Neotropic and Nearctic distribution.

cincticornis (Cresson). D. C., S. C., Ga., Ill., Tex.; Puerto Rico, Cuba, Mexico.

Trachynotus cincticornis Cresson, 1865. Ent. Soc. Phila., Proc. 4: 49. ♂, ♀.

Ophiopterus ferrugineus Cresson, 1873. Acad. Nat. Sci. Phila., Proc. 25: 380. ♀.

Nototrachys(?) *annulicornis* Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 422. ♂, ♀.

Taxonomy: Townes, 1945. Amer. Ent. Soc., Mem. 11: 711 (syn.).

UNPLACED TAXA OF GRAVENHORSTIINI

Anomalon exrnfum Walkley, 1958. In Krombein et al., U. S. Dept. Agr., Agr. Monog. 2, sup. 1, p. 62. N. name for *Anomalon rufus* Provancher (which see).

Anomalon nigritum Norton, 1863. Ent. Soc. Phila., Proc. 1: 363. ♂. Mass. Gauld's (1976) placement of this species in *Gravenhorstia* (*Erigorgus*) was based upon a specimen from Mexico identified as *A. nigritum* by Morley (1913). Morley's identification could not serve to fix the identity of *A. nigritum* (the holotype of which is lost) unless it can be shown (1) that Morley's Mexican species also occurs in Mass. and (2) that specimens from Mass. also agree with Norton's description (the combination seeming very improbable).

Taxonomy: Morley, 1913. Rev. Ich. Brit. Mus., v. 2, p. 86. —Gauld, 1976. Brit. Mus. (Nat. Hist.) Ent., Bul. 33: 61.

Anomalon nigro-varium Brulle, 1846. In Lepeletier, Hist. Nat. Ins. Hym., v. 4, p. 172. ♀. L'Amérique sept.; Bastard. The holotype has not been found.

Taxonomy: Norton, 1863. Ent. Soc. Phila., Proc. 1: 359. —Townes, 1961. Ent. Soc. Wash., Proc. 63: 104 (search for holotype).

Anomalon rufus Provancher, 1874. Nat. Canad. 6: 174. ♀. Que. Preocc. by *Anomalon rufum* Holmgren, 1857; replaced by *Anomalon exrufum* Walkley (which see). Barron (1975) did not find the holotype, but thought there was strong evidence that the holotype would be a species of *Trichionotus*.

Taxonomy: Barron, 1975. Nat. Canad. 102: 556-557.

Anomalon vivum Cresson, 1879 (1878). Acad. Nat. Sci. Phila., Proc. 30: 368. ♀. Oreg. No type specimen was found by Cresson (1916).

Taxonomy: Cresson, 1916. Amer. Ent. Soc., Mem. 1: 63.

TRIBE ANOMALONINI

This tribe includes only two genera, *Anomalon* and *Neogreeneia*.

Genus ANOMALON Panzer

Anomalon Jurine, 1801. In Panzer, Litteratur-Ztg. Erlangen, Intelligenzbl. 1: 163. Nomen nudum.

Anomalon Panzer, 1804. Faunae Ins. German., heft 94, pl. 15.

Type-species: *Anomalon cruentatus* Panzer. Monotypic. The type-species is here regarded as a synonym of *A. cruentatum* (Geoffroy), n. comb.

Trachynotus Gravenhorst, 1829. Ichn. Europaea, v. 3, p. 713. Preocc. by Latreille, 1829 (April).

Type-species: *Ophion foliator* Fabricius. Monotypic. The type-species is here regarded as a synonym of *A. cruentatum* (Geoffroy).

Ochlerus Gistel, 1848. Naturgesch. Thierreichs f. hoehere Schulen, p. xi. N. name for *Trachynotus* Gravenhorst. Preocc. by Spinola, 1837.

Nototachys Marshall, 1872. Ent. Soc. London, Trans. 20: 259. N. name for *Trachynotus* Gravenhorst.

Ophioneura Cameron, 1904. Albany Mus., Rec. 1: 174.

Type-species: *Ophioneura flavomaculata* Cameron. Monotypic.

Stictophion Cameron, 1906. So. African Mus., Ann. 5: 85.

Type-species: *Stictophion rufipes* Cameron. Desig. by Viereck, 1914.

Erythrofion Cameron, 1906. So. African Mus., Ann. 5: 87.

Type-species: *Erythrofion ferrugineus* Cameron. Monotypic. The type-species is regarded as a synonym of *A. rufipes* (Cameron).

Anomalum Schulz, 1906. Spolia Hym., p. 96. Emend.

Trachypterus Morley, 1912. Rev. Ichn. Brit. Mus., v. 1, p. 67.

Type-species: *Trachypterus primus* Morley. Monotypic.

Pseudonototachys Meyer, 1930. Konowia 9: 221.

Type-species: *Pseudonototachys pallidus* Meyer. Monotypic. The type-species is regarded as a synonym of *A. kozlovi* (Kokujev).

Microcremastes Hedwig, 1961. Beitr. z. Naturkundlichen Forsch. Suedwestdeut. 19: 292.

Type-species: *Microcremastes amseli* Hedwig. Monotypic and desig. by Townes, 1971. The included taxa were *M. amseli* and *M. amseli* "f. *flavus*" Hedwig; for those who consider the latter to be an unavailable name, *M. amseli* is the type-species by monotypy.

This is a very large genus, known from all zoogeographic regions. As far as is known, the usual hosts are soil-dwelling larvae of Coleoptera, but an undescribed species from Maryland has been reared by Dr. J. F. G. Clarke from an undescribed species of *Exartema* (Lepidoptera: Olethreutidae) which in turn was reared from the seed heads of an unidentified species of annual plant which was growing in a swampy area where the basal portions of the plants were submerged in water. Oddly enough, this new species of *Anomalon* from Maryland is virtually indistinguishable from *Anomalon californicum* (Cresson), which is known to me from Hawaii and California (as far north as San Francisco) and apparently is found in relatively dry habitats.

californicum (Cresson). N. Mex.?, Ariz.?, mid-coastal and s. Calif.; Hawaii. The N. Mex. and Ariz. records are cited with a query because it appears that, as with *ejuncidum* (Say), a

number of species have been confused under the name *californicum* (also see introduction to *Anomalon*).

Nototachys californicus Cresson, 1879 (1878). Acad. Nat. Sci. Phila., Proc. 30: 366. ♀.
canadense (Provancher), revised status. Que. Cushman and Gahan (1921) suppressed
canadense as a synonym of *ejuncidum* (which see).

Trachynotus Canadensis Provancher, 1879. Nat. Canad. 11 (no. 126): 119. ♀. Preocc. in
Anomalon by *Agrypon canadense* (Provancher), 1874.

Taxonomy: Cushman and Gahan, 1921. Ent. Soc. Wash., Proc. 23: 156 (syn.).

ejuncidum Say. "United States." It is my opinion that perhaps as many as ten species have been confused under this name; therefore, I have resurrected the names suppressed as synonyms of *ejuncidum* by Cushman and Gahan (1921) and Townes (1945) and leave it to a revisor to determine the application of the name *ejuncidum*.

Anomalon ejuncidus Say, 1836. Boston Jour. Nat. Hist. 1: 233, 241-242. ♀.

Taxonomy: Cushman and Gahan, 1921. Ent. Soc. Wash., Proc. 23: 156. —Townes, 1945. Amer. Ent. Soc., Mem. 11: 708-709 (syn.).

fuscatum (Cresson), revised status. Fla.; Cuba. Townes (1945) suppressed *fuscatum* as a synonym of *ejuncidum* (which see).

Trachynotus fuscatus Cresson, 1865. Ent. Soc. Phila., Proc. 4: 50. ♂, ♀.

Taxonomy: Townes, 1945. Amer. Ent. Soc., Mem. 11: 708 (syn.).

reticulatum (Cresson). Colo. It is my opinion that, as with *californicum* and *ejuncidum*, a number of species have been confused under the name *reticulatum*; therefore, for distribution I have cited only the type locality.

Trachynotus reticulatus Cresson, 1865. Ent. Soc. Phila., Proc. 4: 285. ♂.

texanum (Cresson), revised status. Central Tex. Cushman and Gahan (1921) suppressed *texanum* as a synonym of *ejuncidum* (which see).

Trachynotus texanus Cresson, 1872. Amer. Ent. Soc., Trans. 4: 169. ♀.

Taxonomy: Cushman and Gahan, 1921. Ent. Soc. Wash., Proc. 23: 156.

Genus NEOGREENEIA Viereck

Neogreeneia Viereck, 1912. U. S. Natl. Mus., Proc. 42: 641.

Type-species: *Neogreeneia picticornis* Viereck. Monotypic and orig. desig.

This is a small Nearctic and Neotropic genus. No hosts are known. Townes (1971) believed that *Neogreeneia* represents little more than a distinct species group of the genus *Anomalon*. Despite his decided lumping tendency, Gauld (1976) retained *Neogreeneia* as a valid genus.

Taxonomy: Townes, 1971. Amer. Ent. Inst., Mem. 17: 124, 125-126. —Gauld, 1976. Brit. Mus. (Nat. Hist.) Ent., Bul. 33: 88.

picticornis Viereck. N. Y. w. to s. Mich., s. to s. Fla. and n.e. Tex.

Neogreeneia picticornis Viereck, 1912. U. S. Natl. Mus., Proc. 42: 641. ♀.

SUBFAMILY CAMPOPLEGINAE

This large subfamily is represented by three tribes, Nonnini, Hellwigiini, and Campoplegini. The latter tribe includes the vast majority of genera and species of Campopleginae and is the only tribe represented in America north of Mexico.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 143-193 (genera of world as "Porizontinae").

TRIBE CAMPOPLEGINI

Townes (1961) subdivided the Campoplegini into two tribes, and Townes (1970, 1971) maintained the same tribal classification. I do not feel that this classification has any particular practical or phyletic merit, and, therefore, recognize only a single tribe here.

The Campoplegini are internal parasites of the larvae (cf. *Campoplex*) of Lepidoptera, Symphyta, and Coleoptera. Campoplegine parasites of Symphyta and Coleoptera are far less nu-

merous than those of Lepidoptera.

The generic classification adopted here is largely in agreement with that of Townes (1970). The few departures from that classification which are not based on more recent publications reflect my own thinking and prejudices regarding Campoplegini and the generic category in general.

Revision: Viereck, 1925; 1926. Canad. Ent. 57: 176-181, 198-204, 223-228, 296-303; 58: 2-8, 30-38, 71-78, 122-130, 143-149, 176-182, 196-201, 219-225, 257-260, 276-283 (revision mostly of specimens in Canad. Natl. collection; systematically unsound and not usable for identification).

Taxonomy: Townes, 1961. In Townes, Townes, and Gupta, Amer. Ent. Inst., Mem. 1: 449-451. —Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 148-193 (genera of world). —Townes, 1971. Amer. Ent. Inst., Mem. 17: 241. —Finlayson, 1975. Ent. Soc. Canada, Mem. 94: 137 p. (final-instar larvae of most genera in North America which have been reared).

Genus SINOPHORUS Foerster

Sinophorus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 153.

Type-species: *Limneria (Sinophorus) canarsiae* Ashmead. By subsequent monotypy from inclusion by Ashmead, 1898.

Eulimneria Schmiedeknecht, 1907. Hym. Mitteleuropas, p. 600.

Type-species: *Ichneumon albidus* Gmelin. Desig. by Morley, 1913.

Campoplex subg. *Campoletidæ* Viereck, 1912. U. S. Natl. Mus., Proc. 42: 634. N. syn.

Type-species: *Campoplex (Campoletidæ) caradrinæ* Viereck. Monotypic and orig. design.

This moderately large genus is somewhat arbitrarily delineated from *Campoplex*. It is Neotropic, Holarctic, and Oriental, with the great majority of species occurring in the Holarctic Region. The species apparently occur in grasslands or sparsely wooded areas. The hosts are various Lepidoptera.

albicinctus (Viereck), n. comb. N. J.? e. N. C.? Sask., Colo., s.e. Wyo., s. Alta., s. B. C. Ecology:

One of the specimens in the U. S. Natl. Museum collection was collected in the Rocky Mountains of Wyoming at an elevation of 9600 ft.

Pyracmon albicinctum Viereck, 1925; 1926. Canad. Ent. 57 (7): 180 (key); 58 (1): 4. ♂, ♀.

alkæ (Ellinger and Sachtleben). Eurasia. Introduced in Mass., Conn., R. I., N. Y., Pa., Ont., Ohio, and Mich. between 1920 and 1933; reported as recovered in Mass. and Mich. by Jones (1929), but apparently not established in any of the release areas. Host: *Ostrinia nubilalis* (Hbn.). In literature published before the description of *alkæ* in 1928 and in some literature for more than ten years thereafter, the species was misidentified as *crassifemur* (Thomson). Dr. R. I. Sailer (see Syme, 1971) is of the opinion that *alkæ* is conspecific with *rufifemur* (Thomson), but I was unable to verify this by examining the *rufifemur* type. Material reared from both *Ostrinia nubilalis* and *Rhyacionia buoliana* (D. and S.) at the same locality would undoubtedly be very helpful in the solution of this question.

Limnerium alkæ Ellinger and Sachtleben, 1928. Internat. Corn Borer Invest., Sci. Rpts. 1: 115. ♂, ♀.

Taxonomy: Ellinger and Sachtleben, 1929. Internat. Corn Borer Invest., Sci. Rpts. 2: 63-64.

—Aubert, 1959 (1958). Soc. Ent. de France, Ann. 127: 160. —Oehlke, 1963. Beitr. z. Ent. 13: 403 (lectotype selection). —Syme, 1971. Commonwealth Inst. Biol. Control (Trinidad), Tech. Commun. 4: 196 (footnote).

Biology: Paillot, 1928. Internat. Corn Borer Invest., Sci. Rpts. 1: 83-91. —Jones, 1929. U. S. Dept. Agr., Tech. Bul. 98: 3, 24-27 (as *crassifemur*). —Thompson and Parker, 1930. Jour. Agr. Res. 40: 321-345 (as *crassifemur*). —Goidanich, 1931. R. Ist. Super. Agr., Lab. di Ent., Bol. 4: 106-113. —Baker and Arbuthnot, 1933. Ent. Soc. Amer., Ann. 26: 297-302 (as *crassifemur*). —Clark, 1934. U. S. Dept. Agr., Tech. Bul. 455: 11, 20, 27, 31. —Baker, Bradley, and Clark, 1949. U. S. Dept. Agr., Tech. Bul. 983: 6, 8, 133-137, 141. —Adlung, 1963. Anz. f. Schaeldlingsk. 36: 174.

caradrinae (Viereck), n. comb. Southeastern Colo. Host: *Spodoptera exigua* (Hbn.)? Known to me only from the holotype and one other specimen, the former labeled as reared from *S. exigua* (as "Caradrina exigua") collected at Rocky Ford, Colo. The host record is queried because *S. exigua* is a much reared species, and it seems to me, therefore, that *caradrinae* may have been reared from some other noctuid which was misidentified as *exigua*.

Campoplex (Campotidea) *caradrinae* Viereck, 1912. U. S. Natl. Mus., Proc. 42: 634. ♂.

erufinectus (Walkley). Southwestern N. Dak., Nebr., n.e. Kans., n.w. Tex., Sask., s. Alta., n. Utah, s. Ariz. Host: *Heliothis oninis* (D. and S.), *H. zea* (Bod.).

Pyracmon ruficinctum Viereck, 1925; 1926. Canad. Ent. 57 (7): 180 (key); 58 (1): 5. ♂.
Formerly preocc. in *Campoplex* by Gravenhorst, 1829.

Campoplex erufinectus Walkley, 1958. In Krombein et al., U. S. Dept. Agr., Agr. Monog. 2, sup. 1, p. 59. N. name for *P. ruficinctum* Viereck.

Taxonomy: Finlayson, 1975. Ent. Soc. Canada, Mem. 94: 21, 92, 135 (final-instar larva).

furus (Cresson), n. comb. N. Y. w. to Mich., s. to e. N. C. and Tex.

Limneria fura Cresson, 1872. Amer. Ent. Soc., Trans. 4: 173. ♀.

Limneria melanocoxa Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 430. ♀. The holotype is the same specimen as the holotype of *furus*.

Limnerium melanocoxum Dalla Torre, 1901. Cat. Hym., v. 3, p. 99. Emend.

popofensis (Ashmead), n. comb. Southwestern Alaska. Known to me only from the Shumagin Islands (Popof Isl.) and Pribilof Islands (St. Paul Isl.), Alaska.

Zachresta popofensis Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 234. ♂.

rufifemur (Thomson). Eurasia. Introduced in Ont. in 1935 and 1955 through 1958; none of the suspected recoveries have been confirmed by identification of reared adult specimens (see Syme, 1971). Host: *Rhyacionia buoliana* (D. and S.). The host cited was the target species for releases of *rufifemur* in Ont.

Limneria rufifemur Thomson, 1887. Opusc. Ent. 11: 116. [male, female].

Biology: Thorpe, 1930. Bul. Ent. Res. 21: 394. —Thorpe, 1932. Parasitology 24: 107-110.

—Thorpe and Caudle, 1939. Parasitology 30: 525, 527-528. —Juillet, 1959. Canad. Ent. 91: 713-716. —Wylie, 1960. Entomophaga 5: 119. —Pschorr-Walcher, 1960. Pflanzenschutz 25: 17. —Adlung and Sailer, 1963. Allg. Forst-u. Jagdztg. 134: 231, 233. —Schindler, 1965. Ztschr. f. Angew. Ent. 55: 356. —Eichorn, Pschorr-Walcher, and Schroeder, 1965. Anz. f. Schaedlingsk. 38: 107.

sulcatellus (Viereck), n. comb. Southern Sask., Wyo., s. Alta., w. Wash., n. Calif. Host:

Lorostegi sp., *L. sticticalis* (L.).

Campoplex (*Campoplex*) *sulcatellus* Viereck, 1925; 1926. Canad. Ent. 57 (9): 225 (key); 58 (5): 130. ♀.

validus (Cresson). N. S. w. to s. B. C., s. to e. N. C., n.e. Kans., and n. Mex. Host:

Macrobots theseusalis (Wlk.), *Nephopteryx uvinalia* (Rag.), *Psorosina hammondi* (Riley), *Saucrobotys futilalis* (Led.), *Plathypena scabra* (F.), *Hyphantria cunea* (Drury), *H. textor* Harris, *Grapholita molesta* (Bsk.), *Acleris minuta* (Rob.). With the exception of *Psorosina hammondi* and *Acleris minuta* (the hosts of type-specimens of synonyms cited below), I have listed only hosts from labels of specimens which I have identified as *validus*. Some of the host records reported in the literature pertain to misidentified specimens in the U. S. Natl. Museum collection.

Mesoleptus? *validus* Cresson, 1864. Ent. Soc. Phila., Proc. 3: 258. ♂, ♀.

Mesoleptus montanus Cresson, 1865. Ent. Soc. Phila., Proc. 4: 261. ♀. Preocc. by Gravenhorst, 1829.

Limneria excavata Provancher, 1875. Nat. Canad. 7: 146. ♀.

Limneria teratis Weed, 1887. Ill. State Lab. Nat. Hist., Bul. 3: 40. ♀.

Limneria (*Sinophorus*) *canarsiae* Ashmead, 1898 (1897). Ent. Soc. Wash., Proc. 4: 126. ♀.
Linneria tristis(!) Dalla Torre, 1901. Cat. Hym., v. 3, p. 105. Lapsus for *L. teratis* Weed; also transferred to *Limnerium* as *triste*(!).

Anomphota angusta Viereck, 1906. Amer. Ent. Soc., Trans. 32: 180. ♀.

Campoplex (*Echphora*) *canadensis* Viereck, 1925; 1926. Canad. Ent. 57 (8): 203 (key); 58 (11): 282. ♀.

Campoplex (Campoplex) juxta Viereck, 1925; 1926. Canad. Ent. 57 (9): 226 (key); 58 (6): 147. ♀.

Campoplex (Campoplex) militaris Viereck, 1925; 1926. Canad. Ent. 57 (9): 226 (key); 58 (6): 147. ♀.

Biology: Timberlake, 1912. U. S. Dept. Agr., Bur. Ent., Tech. Ser. 19: 71-92. —Tothill, 1922. Canad. Dept. Agr., Bul. (n. s.) 3: 74-76. —Morris, 1964. Canad. Ent. 96: 364, 365, 366-367. —Morris, 1976. Canad. Ent. 108: 834, 835, 836.

Morphology: Cushman, 1926. Ent. Soc. Wash., Proc. 28: 43 (first instar larva).

xanthostomus (Gravenhorst). Eurasia; n. Africa. Reported as introduced in Orange Co., Calif. (apparently in 1948) without becoming established (see Clausen, 1956). No "voucher" specimens are present in the U. S. Natl. Museum collection; hence, I do not feel certain that the species released in Calif. was really *S. xanthostomus* or even a species of *Sinophorus*. The target species for the release of *xanthostomus* in Calif. was the native *Paramyelois transitella* (Wlk.).

Campoplex xanthostomus Gravenhorst 1829. Ichn. Europaea, v. 3, p. 460. ♂.

Campoplex deserticola Tosquinet, 1896. Soc. Ent. de Belg., Mem. 5: 412. ♂.

Taxonomy: Aubert, 1964. Soc. Ent. de France, Bul. 69: 159. —Townes, Momoi, and Townes, 1965. Amer. Ent. Inst., Mem. 5: 274 (lectotype selected). —Shaumar, 1966. Entomophaga 11: 458, 461 (syn.).

Biology: Clausen, 1956. U. S. Dept. Agr., Tech. Bul. 1139: 23.

Genus SESIOPLEX Viereck

Campoplex subg. *Sesioplex* Viereck, 1912. U. S. Natl. Mus., Proc. 42: 644.

Type-species: *Campoplex (Sesioplex) depressus* Viereck. Monotypic and orig. desig.

Dr. Klaus Horstmann (personal commun., 1976) told me that he knew a European species which may be referable to *Sesioplex*, but *depressus* is the only species known to me. The name *Sesioplex* is here resurrected from synonymy because *depressus* has structural characteristics which make it a misfit in *Campoplex* or *Sinophorus*.

depressus (Viereck). Que. w. to Iowa, s. to n. Ga. and n.e. Kans. Host: *Gnorimoschema gallaeolidaginis* (Riley).

Campoplex (Sesioplex) depressus Viereck, 1912. U. S. Natl. Mus., Proc. 42: 644. ♀. The holotype is labeled as follows: "from F. M. Webster; Feb. 3, [18]87; Par[asite] on *Gelechia solidaginis*; iss[ued] March 25, [18]87." This is certainly the specimen which Riley and Howard (1890) identified as "*Limneria dimidiatus* Cr[esson]," from "LaFayette, Ind., March 25, 1887." Because Webster was never stationed in La., Viereck's statement that the type locality is "Louisiana" is erroneous.

Sesioplex relativus Viereck, 1925. Canad. Ent. 57 (7): 177 (key); 57 (12): 298. ♀.

Taxonomy: Riley and Howard, 1890. U. S. Dept. Agr., Insect Life 3: 157.

Biology: Miller, 1963. Ohio Jour. Sci. 63: 71.

Genus CAMPOPLEX Gravenhorst

Campoplex Gravenhorst, 1829. Ichn. Europaea, v. 3, p. 453.

Type-species: *Ichneumon difformis* Gmelin. Desig. by Westwood, 1840.

Dioratrica Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 153.

Type-species: *Porizon borealis* Zetterstedt. Monotypically included and desig. by Townes, Momoi, and Townes, 1965.

Omorgus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 153.

Type-species: *Limneria mutabilis* Holmgren. Desig. by Viereck, 1912 from 32 species included by Thomson, 1887. Horstmann (1969) suppressed *mutabilis* as a synonym of *difformis* (Gmelin).

Omorga Thomson, 1887. Opusc. Ent. 11: 1052, 1125. Emend.

Zatranozema Viereck, 1912. Ent. News 23: 45. Placed with a query as a synonym of *Campoplex* by Townes (1970). Proposed as a "new name" for *Tranosema* Foerster in the sense of Szepligeti as opposed to the sense of Thomson (see *Tranosema*).

Type-species: *Tranosema bicolor* Szepligeti. Monotypic. Szepligeti (1911) applied the name *Tranosema* to three species, but two of them were placed in *Tranosema* with a query; therefore *Zatranosema* is monotypic.

Casinaria subg. *Pseuderipteroides* Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey Bul. 22: 269.

Type-species: *Mesoleptus porrectus* Cresson. Monotypic and orig. desig.

This very large genus has a worldwide distribution. The hosts are principally microlepidoptera which feed in concealment (such as in leaf rolls, cases, buds, etc.). As with most Campoplegini, some *Campoplex* species apparently kill their hosts while the latter are in the larval stage and spin a cocoon after emerging from the host, but in an undetermined proportion of *Campoplex* species the cocoon is spun inside the pupal shell of the host. The latter is also the case for some (but definitely not all) species of *Venturia*. Dr. Klaus Horstmann is preparing a revision of the western Palearctic species of *Campoplex*.

Taxonomy: Szepligeti, 1911. In Wytsman, Gen. Ins., fasc. 114, p. 30. — Horstmann, 1969 (1968). Opusc. Zool. 102: 1. — Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 151-152.

angularis Viereck. R. I., N. Y., N. J., Ont.

Campoplex (Campoplex) angularis Viereck, 1925; 1926. Canad. Ent. 57 (9): 226 (key); 58 (6): 148. ♂, ♀.

argenteus (Provancher). Que. w. to s. B. C., s. to n.w. S. C. Host: *Epiblema strenuana* (Wlk.). *Linnaea argentea* Provancher, 1874. Nat. Canad. 6: 147. ♀.

Campoplex (Campoplex) ontario Viereck, 1925; 1926. Canad. Ent. 57 (9): 226 (key); 58 (6): 148. ♀.

atridens Townes. N. Y., Pa., Ont., Ohio, Mich., Iowa, Colo., Mont., Idaho, Wash., Oreg. Host: *Ancylis comptana* (Froel.), *Evora hemidesma* (Zell.), *Archips argyrospilus* (Wlk.).

Campoplex (Campoplex) erythromera Viereck, 1925 (Sept.); 1926. Canad. Ent. 57 (9): 226 (key); 58 (6): 146. ♂. Preocc. in *Campoplex* by Viereck, 1925 (July).

Campoplex atridens Townes, 1945. Amer. Ent. Soc., Mem. 11: 593. N. name for *C. (C.) erythromera* Viereck.

brachyurus Viereck. Que., N. H., Ont., Wis. Host: *Bucculatrix canadensisella* Champ.

Zaporus minutus Ashmead, 1902. In Slosson, Ent. News 13: 321. Nomen nudum.

Nythobia minuta Cushman, 1922. U. S. Natl. Mus., Proc. 61 (8): 19. ♀. Preocc. in

Campoplex by *Dusona minuta* (Holmgren), 1856; because of the homonymy, I had intended that *N. minuta* be newly suppressed here as a synonym of *brachyurus* even though I have seen only four specimens (including the two holotypes) and do not feel absolutely certain about the correctness of the synonymy. Because of a misunderstanding, the synonymy was published by Finlayson (1975).

Nemeritis brachyurus Viereck, 1925; 1926. Canad. Ent. 57 (7): 178 (key); 58 (7): 178. ♀. In the 1926 portion of Viereck's paper as "*Campoplex (Nemeritis) brachyurus*."

Taxonomy: Finlayson, 1975. Ent. Soc. Canada, Mem. 94: 16, 19-20, 91, 135 (final-instar larva). *cavus* Viereck. Ont.

Campoplex (Campoplex) cavus Viereck, 1925; 1926. Canad. Ent. 57 (9): 226 (key); 58 (6): 149. ♀.

conocola (Rohwer). Eastern Ont. w. to B. C., s. to n. Fla., Ark., and s. Calif. Ecology:

Parasitizes a variety of microlepidoptera which feed on Pinaceae, especially cone borers, but also species which feed in small branches or bark. Host: *Barbara colfaxiana taxifoliella* (Bsk.), *Laspeyresia fletcherana* Kft., *Petrova albicapitana* (Bsk.), *Rhyacionia zozana* (Kft.), *Dioryctria amatella* (Hulst), *D. clarioralis* (Wlk.), *D. zimmermanni* (Grt.), *Tetralopha robustella* Zell.?, *Synanthedon novaroensis* (Hy. Ed.).

Pyracmon conocola Rohwer, 1917. U. S. Natl. Mus., Proc. 53: 159. ♂, ♀.

crassatus (Viereck), revised status. Que. w. to s.e. Sask., s. to n.w. S. C. and Ohio. Host: *Exartema cornanum* Heinr., *E. permundanum* Clem., *Proteoteras willingana* (Kft.).

Townes (1945) and Barron (1975) have incorrectly applied the name *hyalinus* (Provancher) to this species, contrary to the valid lectotype selection of Gahan and Rohwer (1918). See the discussion under *Synetaeris hyalina* (Provancher).

Neonortonia crassata Viereck, 1925. Canad. Ent. 57 (7): 179 (key); 57 (12): 301. ♂.

Campoplex (Campoplex) moderatus Viereck, 1925; 1926. Canad. Ent. 57 (9): 225 (key); 58 (6): 143. ♀. N. syn.

Campoplex (Campoplex) deceptivus Viereck, 1925; 1926. Canad. Ent. 57 (9): 226 (key); 58 (6): 146. ♀. N. syn.

Taxonomy: Gahan and Rohwer, 1918. Canad. Ent. 50: 28. —Walley, 1933. Canad. Ent. 65: 254-255 (redescription of *moderatus*). —Townes, 1945. Amer. Ent. Soc., Mem. 11: 596-597. —Barron, 1975. Nat. Canad. 102: 484.

dimidiatus (Cresson). Ill.

Mesoleptus dimidiatus Cresson, 1864. Ent. Soc. Phila., Proc. 3: 265. ♀. Preocc. in *Campoplex* by *Dusona dimidiata* (Brulle), 1846.

ecoxalis Walkley. N. H. Known only from the holotype which was collected on the top of Mt. Washington.

Phaedroctonus coxalis Ashmead, 1900. In Slosson, Ent. News 11: 319. Nomen nudum.

Cymodusa coxalis Cushman, 1922. U. S. Natl. Mus., Proc. 61 (8): 10. ♀. Preocc. in *Campoplex* by Spinola, 1851.

Campoplex coxalis Walkley, 1958. In Krombein et al., U. S. Dept. Agr., Agr. Monog. 2, sup. 1, p. 59. N. name for *Cymodusa coxalis* Cushman.

epinotiae Viereck. Coastal Calif. Host: *Epinotia arcostaphylana* Kft. Known only from the holotype which is from Carmel, Calif.

Campoplex epinotiae Viereck, 1912. U. S. Natl. Mus., Proc. 43: 586. ♀.

erythromerus (Viereck). Ont.

Nemeritis erythromerus Viereck, 1925; 1926. Canad. Ent. 57 (7): 178 (key); 58 (7): 177. ♀. In the 1926 part of Viereck's paper as "*Campoplex (Nemeritis) erythromerus*."

frustranae Cushman. Southeastern Mass. w. to n. Ohio, s. Ill., and s.w. Nebr., s. to central Ga., central Miss., and n.w. Ark. Host: *Rhyacionia frustrana* (Comst.), *R. rigidana* (Fern). Introduced in Nebr. following the accidental introduction of *R. frustrana* in pine plantations.

Campoplex frustranae Cushman, 1927 (June 2). Jour. Agr. Res. 34 (7): 620 (key), 621 (fig.). ♀.

Taxonomy: Cushman, 1927 (June 24). Jour. Agr. Res. 34 (8): 739 (more complete description including differences of male).

Biology: Baumhofer, 1929. Jour. Econ. Ent. 22: 1001. —Cushman, 1932. Ent. Soc. Wash., Proc. 34: 28. —Dowden, 1962. U. S. Dept. Agr., Agr. Handb. 226: 37, 42, 51. —Eikenbary and Fox, 1968. Ent. Soc. Amer., Ann. 61: 1430-1433.

fusiformis (Provancher). N. B. s. to w. N. C., w. to s.w. Tex. Information at the American Entomological Institute, Ann Arbor, Mich. indicates that the synonymy below must be considered very tentative.

Linneria fusiformis Provancher, 1874. Nat. Canad. 6: 148. ♀.

Amorphota ferruginea Viereck, 1906. Amer. Ent. Soc., Trans. 32: 220. ♀.

Campoplex (Campoplex) grossulariflorae Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey Bul. 22: 263. ♀.

Campoplex (Campoplex) maquinai Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey Bul. 22: 263. ♀.

Campoplex (Campoplex) pentagoetorum Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey Bul. 22: 263. ♂.

Neonortonia scaposa Viereck, 1925. Canad. Ent. 57 (7): 179 (key); 57 (12): 301. ♂.

Pseuderipternoides deceptus Viereck, 1925. Canad. Ent. 57 (7): 179 (key); 57 (12): 302. ♀.

Pseuderipternoides neglectus Viereck, 1925. Canad. Ent. 57 (7): 179 (key); 57 (12): 302. ♂.

Pseuderipternoides pulchellus Viereck, 1925. Canad. Ent. 57 (7): 179 (key); 57 (12): 303. ♀. *Campoplex (Campoplex) hullensis* Viereck, 1925 (Sept); 1926. Canad. Ent. 57 (9): 225 (key); 58 (6): 144. ♀. Preocc. in *Campoplex* by Viereck, 1925 (July).

Campoplex (Campoplex) signatus Viereck, 1925; 1926. Canad. Ent. 57 (9): 226 (key); 58 (6): 144. ♂.

haywardi Blanchard. Bolivia, Uruguay, Argentina. Introduced in southern Calif. "after 1963" according to Leong and Oatman (1968), apparently without becoming established. Host:

Phthorimaea operculella (Zell.). The host cited was the target species for introductions in Calif.

Campoplex haywardi Blanchard, 1942. In Hayward, Tucuman Estac. Expt. Agr., Rev. Indus. y Agr. 33: 83. Nomen nudum.

Campoplex haywardi Blanchard, 1947 (1946). Acta Zool. Lilloana 3: 295. ♂, ♀.

Biology: Leong and Oatman, 1968. Ent. Soc. Amer., Ann. 61: 26: 36.

hexagonalis (Viereck). Southern Alta.

Pseuderipternooides hexagonalis Viereck, 1925. Canad. Ent. 57 (7): 179 (key); 57 (12): 302. ♀.

hullensis (Viereck). Que.

Neonortonia hullensis Viereck, 1925. Canad. Ent. 57 (7): 179 (key); 57 (12): 301. ♂.

infumatus (Provancher). Que.

Linneria infumata Provancher, 1874. Nat. Canad. 6: 148. ♀. The lectotype selected by Gahan and Rohwer (1918) is not conspecific with the lectotypes for the names suppressed as synonyms of *infumatus* by Townes (1945); see *parallelus* Viereck.

Taxonomy: Gahan and Rohwer, 1918. Canad. Ent. 50: 29. — Townes, 1945. Amer. Ent. Soc., Mem. 11: 597. — Barron, 1975. Nat. Canad. 102: 489 (confirmation of Gahan and Rohwer lectotype).

macer (Cresson). Colo.

Mesoleptus macer Cresson, 1865. Ent. Soc. Phila., Proc. 4: 262. ♀.

mellipes (Provancher). Que., Maine, Mass., Ont., Mich., Wis., S. Dak., Sask., n. Idaho, s. B. C.

Host: *Epinota nanana* (Treit.), *Coleotechnites piceella* (Kft.), *Eucordylea ducharmeii* Free., *Exoteleia dodecella* (L.), *Coleophora laricella* (Hbn.), *C. pruniella* Clem. I suspect that the name *mellipes* and the other names listed as synonyms therof apply to one or more species which lose the second intercubitus in smaller specimens (i.e. those that develop on smaller hosts).

Linneria rufipes Provancher, 1874. Nat. Canad. 6: 149. ♀. Preocc. in *Campoplex* by Gravenhorst, 1829 and Holmgren, 1872.

Linneria mellipes Provancher, 1883. Petite Faune Ent. Canada, p. 831 (errata). N. name for *L. rufipes* Provancher. Barron (1975) and other authors have incorrectly concluded that this name was a lapsus and apparently were unaware of its proposal in the index of the Petite Faune.

Nemeritis melanomerus Viereck, 1925; 1926. Canad. Ent. 57 (7): 178 (key); 58 (7): 177. ♂. In the 1926 part of Viereck's paper as "Campoplex (*Nemeritis*) melanomerus."

Nemeritis decoratus Viereck, 1925; 1926. Canad. Ent. 57 (7): 179 (key); 58 (7): 180. ♀. In the 1926 part of Viereck's paper as "Campoplex (*Nemeritis*) decoratus."

Nemeritis laevis Viereck, 1925; 1926. Canad. Ent. 57 (7): 179 (key); 58 (7): 179. ♀. In the 1926 part of Viereck's paper as "Campoplex (*Nemeritis*) laevis."

Phaedroctonus piceae Cushman, 1935. Wash. Acad. Sci., Jour. 25: 260. ♂, ♀.

nigricinctus (Ashmead). N. J., D. C. Host: Small "tineid" on *Betula nigra*, *Ametastegia recens* (Say)?

Linneria nigricincta Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 431. ♂, ♀.

Taxonomy: Townes and Townes, 1951. In Muesebeck et al., U. S. Dept. Agr., Agr. Monog. 2: 361 (lectotype selected).

nigricoxa (Provancher). Que. Known only from the lectotype. Notes I made in studying the lectotype in 1974 indicate that it may be a composite specimen.

Linneria nigricoxa Provancher, 1882. Nat. Canad. 13: 364. ♀.

Linnerium nigricoxum Dalla Torre, 1901. Cat. Hym., v. 3, p. 99. Emend.

Taxonomy: Gahan and Rohwer, 1918. Canad. Ent. 50: 29 (lectotype selected). — Barron, 1975. Nat. Canad. 102: 516.

nolae (Ashmead). Que. s. to R. I., w. to Sask., Colo., and s. Calif. Host: *Trichotaphe* sp., *Nola* sp. on *Salix*, *Cnephacia longana* (Haw.).

Linneria nolae Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 431. ♂, ♀.

- Campoplex (Campoplex) grimsbyensis* Viereck, 1925; 1926. Canad. Ent. 57 (9): 226 (key); 58 (6): 145. ♀. N. syn.
- Taxonomy: Townes, 1945. Amer. Ent. Soc., Mem. 11: 597.
- phthorimaeae** (Cushman). Va.?, w. Calif. Host: *Keiferia inconspicuella* (Murtf.)?, K. *lycopersicella* (Wlsm.), *Phthorimaea operculella* (Zell.), *Heliothis zea* (Bod.). I have not seen specimens from places other than Calif. which I could definitely identify as *phthorimaeae*, but would suppose that the range of the species is not restricted to Calif. The species was described from six males and four females; the male allotype and four of the other male paratypes are of the genus *Diadegma*, apparently an undescribed species. In the U. S. Natl. Museum collection I presently find only eight specimens of *C. phthorimaeae* reared from *P. operculella* by J. E. Graf, but there are 40 specimens of the *Diadegma* sp. which Graf reared from that host. Therefore, it seems likely that the discussion of Graf (1917) pertains more to the *Diadegma* sp. than to *C. phthorimaeae*. Whether the University of Calif. (Riverside) shipped both species to Hawaii (see Weber, 1951) and other parts of the World remains to be seen. Chittenden (1922) reported *phthorimaeae* as having been reared from *Udea rubigalis* (Gn.), but that record pertains to yet another apparently undescribed species of *Diadegma*. See also *Diadegma compressum* (Cresson).

Genus PORIZON Fallen

Porizon Fallen, 1813. Spec. Nov. Hym. Disp. Meth., p. 18.

Type-species: *Ichneumon moderator* Linnaeus. Monotypic. Included as "*Ophion moderator* Fabr[icius]" by Fallen, but cannot be treated as the Fabrician identification of *I. moderator* Linnaeus because the description given by Fabricius (1804 [where he placed *moderator* in *Ophion*]) does not add anything to the Linnaean description and alters it only insignificantly by omitting the phrase "ore tentaculato." Moreover, Fabricius did not indicate that he had acquired or had seen specimens of *moderator* (see further discussion below).

Phaedroctonus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 153. N. syn.

Type-species: *Phaedroctonus minutus* Ashmead. By subsequent monotypy from inclusion by Ashmead, 1902.

For many years the name *Porizon* was applied to various Tersilochinae, especially to an assemblage of species (now placed in the genus *Barycuenis*) which did not include *Porizon moderator* in the sense of Fallen or of subsequent authors (*moderator* auct. being placed in *Tersilochus*). Accordingly, Viereck (1914) proposed the name *Porizonidea* to apply to *Porizon* of authors and suppressed *Tersilochus* as a synonym of *Porizon*. Roman (1932) discovered that *I. moderator* Linnaeus is a species of Campopleginae, but made no adjustment in the application of the name *Porizon*. Townes (1945) applied the name *Tersilochini* to "Porizonini" of authors (cf. Hincks, 1945), but the name *Porizon* continued to be used sporadically for various Tersilochinae, particularly before Townes and Townes (1951) applied the name "Porizonini" to the Campoplegini. Townes (1965) applied the name *Porizon* to *Campoplex paniscus* Gravenhorst, which he distinguished from "moderator Linnaeus." Horstmann (1970) discovered that Roman (1932) and Townes (1965) had not correctly identified the *moderator* type specimen, and had incorrectly suppressed *Nemeritis cremastoides* Holmgren as a synonym of *moderator*. Horstmann indicated *moderator* to be a species of *Venturia*; he erected the genus *Leptocampoplex* (which see) for *cremastoides* (i.e. *Porizon* sensu Townes [1965, 1970], in part), and placed *paniscus*, with uncertainty, as a synonym of *Macrus filiventris* Gravenhorst (see *Macrus*). As a consequence of the findings of Horstmann (1970), Townes (1971) indicated that *Venturia* should be suppressed as a synonym of *Porizon*.

In 1972 I borrowed a specimen of *Porizon moderator* from Dr. Horstmann and learned that the Nearctic *Phaedroctonus temporalis* Cushman is a junior synonym of *moderator*. In my opinion, *Porizon* is recognizable as a genus distinct from either *Venturia* or *Campoplex*, the separation from *Campoplex* being more subjective, as is suggested by Townes (1945) placement of the species here included in *Porizon* and by the fact that Townes (1970) continued to treat *Phaedroctonus* as a synonym of *Campoplex*.

There had never been much doubt that Fallen had intended the name *Porizon* to apply to

what we now call Tersilochinae (cf. Hincks, 1945), and Horstmann (1970, 1971) studied a specimen of *Probles rufipes* (Holmgren) which had been identified as *Porizon moderator* by Falten. For that reason, Horstmann (1970) suggested that an application for the suppression of the names *Porizon* and *Porizontinae* should be made to the International Commission on Zoological Nomenclature, and Fitton and Gauld (1976) suggested that the case needed to be referred to the Commission. If the facts revealed by Horstmann (1970) had been established soon after Roman (1932) published on the identity of *Ichneumon moderator*, it might then have been logical to seek a ruling that would have made *Tersilochus rufipes* Holmgren the type-species of *Porizon*. Acceptance of *I. moderator* Linnaeus as the type-species of *Porizon* would leave us with a zoological rather than nomenclatural problem, and would eliminate any need for making an application to the Commission. I believe that the option of regarding the nomenclatural problem as settled and striving to solve the zoological one is the option which would be most uniformly accepted. I believe that Dr. Horstmann concurs with me on this, and I am hopeful that Drs. Fitton and Gauld will also.

Porizon is a small genus of Holarctic and Neotropic (southern Mexico) distribution. Most of the species are parasitic on microleptidoptera which feed on coniferous trees, especially cone moths and needle miners. *P. transfuga* (Gravenhorst), which is placed in *Porizon* only provisionally, parasitizes *Gracilaria syringella* (F.), the lilac leaf miner, and two specimens of *cupressi* (Ashmead), which has otherwise been reared only from conifer-feeding hosts, were reared from a leaf tier on *Rhamnus purshianus*.

Taxonomy: Fabricius, 1804. *Systema Piezatorum*, p. 137. —Viereck, 1914. U. S. Natl. Mus., Bul. 83; 122, 144, 145. —Roman, 1932. Ent. Tidskr. 53: 9. —Townes, 1945. Amer. Ent. Soc., Mem. 11: 592, 593, 597, 598, 602, 73. —Hincks, 1945. Entomologist 78: 90 (including opinions of J. F. Perkins). —Townes and Townes, 1951. In Muesebeck et al., U. S. Dept. Agr., Agr. Ent., Nachrichtenbl. 19: 77-79. —Townes, 1971. Amer. Ent. Inst., Mem. 17: 241. —Fitton and Gauld, 1976. Systematic Ent. 1: 248-249.

argyresthiae (Rohwer), n. comb. Southwestern Oreg. Host: *Argyresthia libocedrella* Bsk.

Known from a long series of specimens reared at Ashland, Oreg. in 1914.

Phaedroctonus argyresthiae Rohwer, 1917. U. S. Natl. Mus., Proc. 53: 162. ♂, ♀.

cupressi (Ashmead), n. comb. Que., Maine, N. H., s.w. Va., w. N. C., w. Iowa, s.w. Alaska, w. Wash., n. Calif. Host: *Periploca nigra* Hodges, *Epinotia nanana* (Treit.), *Argyresthia cupressella* Wlsm., *A. thuarella* Pack., needle miner on *Abies concolor*, leaf tier on *Rhamnus purshianus*.

Limneria cupressi Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 437. ♀.

Phaedroctonus minutus Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 235. ♀.

Phaedroctonus epinotiae Cushman, 1935. Wash. Acad. Sci., Jour. 25: 559. ♂, ♀. Formerly preocc. in *Campoplex* by Viereck, 1912. N. syn.

Campoplex nanana Townes, 1945. Amer. Ent. Soc., Mem. 11: 598. N. name for *P. epinotiae* Cushman. N. syn.

laspeyresiae (Rohwer), n. comb. Colo., N. Mex., w. Mont., n. Idaho, s.e. Wash., s.w. Oreg., n.e. Calif. Host: *Laspeyresia piperana* (Kft.), *L. toreuta* (Grt.).

Meleborus(!) laspeyresiae Rohwer, 1917. U. S. Natl. Mus., Proc. 53: 161. ♀.

milleri (Rohwer), n. comb. Southwestern Oreg. Host: *Diorystria abietella* (D. and S.). Known only from the holotype which is a rather poor specimen from Ashland, Oreg. This species is placed in *Porizon* only tentatively; the petiole is similar to that of *Nemeritis* spp., and the second intercubitus is present, although abnormally positioned in one of the fore wings of the holotype.

Angitia milleri Rohwer, 1917. U. S. Natl. Mus., Proc. 53: 159. ♀.

moderator (Linnaeus). Vt., N. Y., Ont., N. Mex., w. Mont., Idaho, s-coastal Akaska; Europe. Host: *Laspeyresia youngana* (Kft.). A 1972 letter I received from Dr. Klaus Horstmann says that males are apparently uncommon in Europe.

Ichneumon moderator Linnaeus, 1758. Syst. Nat., ed 10, v. 1, p. 564. ♀.

Campoplex flaviventris Ratzeburg, 1844. Ichn. d. Forstins., v. 1, p. 98. ♀.

Limneria (Phaedroctonus) ensifera Brischke, 1880. Naturf. Gesell. Danzig, Schr. 4: 172. ♀.

Phaedroctonus temporalis Cushman, 1935. Wash. Acad. Sci., Jour. 25: 560. ♀. N. syn.

Taxonomy: Roman, 1932. Ent. Tidskr. 53: 9 (misdet.). — Horstmann, 1970. Bayer. Ent., Nachrichtenbl. 19: 78-79. — Horstmann, 1973. Deut. Ent. Gesell., Mitt. 32: 9, 11.

transfuga (Gravenhorst), n. comb. Newfoundland (insular), N. B., Que., Ont.; Eurasia.

Adventive. Host: *Gracilaria syringella* (F.). Not previously recorded from North America; the North American distribution given here is based upon specimens I have seen in the Canadian Natl. Collection and that of the U. S. Natl. Museum. I do not know that the species has been reared in North America, but it presumably was introduced in parasitized hosts on lilac (*Syringa vulgaris*). The species is placed in *Porizon* only provisionally; if related species exist, it should probably be placed with them in a separate genus.

Campoplex transfuga Gravenhorst, 1829. Ichn. Europaea, v. 3, p. 521. ♂, ♀.

Phaedroctonus transfugus Schmiedeknecht, 1909. Opusc. Ichn., v. 4, p. 1640. Emend.

Phaedroctonus syringellae Hedwig, 1944. Ztschr. f. Ent. [Breslau] 19 (3): 4. sex?

Taxonomy: Horstmann, 1973. Deut. Ent. Gesell., Mitt. 32: 9, 11.

Genus VENTURIA Schrottky

Idechthis Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 154. Preocc. by Huebner, 1821.

Type-species: *Idechthis oahuensis* Ashmead. By subsequent monotypy from inclusion by Ashmead, 1901.

Venturia Schrottky, 1902. Buenos Aires, Mus. Nac. de Hist. Nat., An. 8: 102.

Type-species: *Venturia argentina* Schrottky. Orig. desig.

Devorgilla Cameron, 1907. Tijdschr. v. Ent. 50: 51.

Type-species: *Devorgilla dilatata* Cameron. Monotypic.

Balcarcia Brethes, 1922. Soc. Cient. Argentina, An. 93: 133.

Type-species: *Balcarcia bergi* Brethes. Monotypic.

Notamorphota Blanchard, 1947 (1946). Acta Zool. Lilloana 3: 292. It is apparent that three of the figures in this paper are mislabeled. The figure labeled as being that of *Notamorphota timocraticae* (fig. 2, p. 293) is actually that of *Sagaritis grioti* Blanchard. The figure labeled as being that of *Hyposoter denieri* Blanchard (fig. 5, p. 301) is the one which should have been labeled *N. timocraticae*, and the figure labeled as being that of *S. grioti* (fig. 6, p. 304) is the one which should have been labeled *H. denieri*.

Type-species: *Notamorphota timocraticae* Blanchard. Monotypic and orig. desig.

Exidechthis Walkley, 1958. In Krombein et al., U. S. Dept. Agr., Agr. Monog. 2, sup. 1, p. 59. N. name for *Idechthis* Foerster.

This rather large genus has a worldwide distribution, but the number of species occurring in temperate areas appears to be fewer than that occurring in tropical and subtropical areas. See biological discussion under *Campoplex*.

Revision: Horstmann, 1973. Deut. Ent. Gesell., Mitt. 32: 7-12 (European spp.).

Taxonomy: Townes and Townes, 1966. Amer. Ent. Inst., Mem. 8: 143 (syn.).

canescens (Gravenhorst). Southern Canada, s.e. Alaska, and continental U. S. A.; temperate and tropic areas around the world. Ecology: Most often found in buildings where grains or flour are stored. In the U. S. Natl. Museum collection there are two specimens reared from bumble bee nests, one from Anderson, S. C. and the other from Boulder Co., Colo. (the latter labeled "ex *Ephestia* sp."). Adventive. Host: *Anagasta kuehniella* (Zell.), *Plodia interpunctella* (Hbn.). The hosts listed are the ones most commonly parasitized in North America; for additional hosts and their significance see the very excellent paper by Salt (1976). Males are unknown in North America, occasional in northern Europe, but apparently more common in the Mediterranean Basin. The biology of this species has perhaps been studied more intensively than that of any other ichneumonid. The biological references cited below are the more important ones known to me, and I have no doubt overlooked some important papers, particularly those published more recently.

Campoplex canescens Gravenhorst, 1829. Ichn. Europaea, v. 3, p. 555. ♀. Name of questionable validity because preocc. in *Campoplex* by *Ichneumon canescens* Gmelin, 1791 on p. 549 (in synonymy) of Gravenhorst's same volume.

 Type-species: *Campoplex tenuiventris* Gravenhorst. Monotypically included and
 desig. by Viereck, 1914.
Horogenes Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 152. This name was
 incorrectly applied to what is now called *Diadegma* from about 1925 into the 1960's
 (most uniformly after 1945).
 Type-species: *Campoplex tenuiventris* Gravenhorst. By subsequent monotypy from
 inclusion by Brischke, 1880.
Anempheres Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 154.
 Type-species: *Anempheres diaphanaiae* Viereck. By subsequent monotypy from
 inclusion by Viereck, 1911.
Nothanomalon Szepligeti, 1915. In Wytsman, Gen. Ins., fasc. 34, p. 39.
 Type-species: *Nothanomalon novoguineensis* Szepligeti. Monotypic.
Trophocampa Schmiedeknecht, 1907. Hym. Mitteleuropas, p. 598.
 Type-species: *Campoplex mesozostus* Gravenhorst. Monotypic and orig. desig.
Febriegia Viereck, 1912. U. S. Natl. Mus., Proc. 42: 638.
 Type-species: *Campoplex texanus* Ashmead. Monotypic and orig. desig.
Neonortonia Viereck, 1912. U. S. Natl. Mus., Proc. 43: 592.
 Type-species: *Campoplex genuinus* Norton. Monotypic and orig. desig.
Zastenomorpha Viereck, 1921. Psyche 28: 81.
 Type-species: *Zastenomorpha lamina* Viereck. Monotypic.
Zastenogastra Viereck, 1925. Roy. Soc. Canada, Proc. and Trans. (3) 19 (5): 259.
 Type-species: *Zastenogastra graciliventris* Viereck. Monotypically included and
 desig. by Viereck, 1926.
Nothanomaloidea Uchida, 1928. Hokkaido Imp. Univ., Faculty Agr., Jour. 21: 273. Preocc.
 by Viereck, 1925.
 Type-species: *Nothanomaloidea matsuyamensis* Uchida. Monotypic and orig. desig.
Deltops Seyrig, 1935. Paris, Mus. d'Hist. Nat., Mem. (n. s.) 4: 84.
 Type-species: *Deltops granulicoris* Seyrig. Monotypic and orig. desig.
Longicharops Uchida, 1940. Insecta Matsumurana 14: 131. N. name for *Nothanomaloidea*
 Uchida.
Neonortoniella Blanchard, 1947. Montevideo, Mus. Hist. Nat., Comun. Zool. 2: 4.
 Type-species: *Neonortoniella plusiae* Blanchard. Monotypic and orig. desig.
Casinarioides Aubert, 1960. Soc. Ent. de Mulhouse, Bul. 16: 661.
 Type-species: *Casinaria monticola* Thomson. Monotypic and orig. desig.

This large genus occurs in all zoogeographic regions. The hosts are various kinds of lepidopterous larvae, mostly those of macrolepidoptera which do not conceal themselves when feeding.

Revision: Walley, 1947. Sci. Agr. 27: 364-395.

affinisima Carlson, n. name. Que. w. to s. Alta., s. to e. S. C. and Colo.

Casinaria affinis Walley, 1947. Sci. Agr. 27: 394. ♂, ♀. Preocc. by Tschek, 1871.

Taxonomy: Finlayson, 1975. Ent. Soc. Canada, Mem. 94: 27, 96, 135 (final-instar larva).

ambigua (Townes). Tex. Known only from the holotype.

Nematopodius texanus Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 414. ♂. Preocc. in
Casinaria by *Campoplex texanus* Ashmead, 1890 (p. 427) and by *Dusona texana*
 (Ashmead), 1890 (p. 427).

Charops ambigua Townes, 1945. Amer. Ent. Soc., Mem. 11: 607. N. name for *N. texanus*
 Ashmead.

canadensis Walley. Que., N. Y., Md., Ont., n. Mich.

Casinaria canadensis Walley, 1947. Sci. Agr. 27: 390. ♂, ♀.

Taxonomy: Finlayson, 1975. Ent. Soc. Canada, Mem. 94: 26, 27-28, 96, 135 (final-instar larva).

cavigena Walley. Southern B. C., s.w. Calif. Host: Geometrid.

Casinaria cavigena Walley, 1947. Sci. Agr. 27: 379. ♀.

Taxonomy: Finlayson, 1975. Ent. Soc. Canada, Mem. 94: 26, 28, 97, 135 (final-instar larva, new distribution).

claviventris Holmgren. Ont., s. Sask.; Europe.

Casinaria claviventris Holmgren, 1860 (1858). Svenska Vetensk.-Akad. Handl. 2 (8): 49. ♂.
♀.

Casinaria pinguis Walley, 1947. Sci. Agr. 27: 386. ♂, ♀.

Taxonomy: Townes and Townes, 1951. In Muesebeck *et al.*, U. S. Dept. Agr., Agr. Monog. 2: 364 (syn.).

coloradensis Walley. Colo. Known from two specimens collected at Four-mile Hill, 8 mi. south of Steamboat Springs, Colo. on July 21, 1896, apparently by C. F. Baker.

Casinaria coloradensis Walley, 1947. Sci. Agr. 27: 371. ♀.

corrupta Walley. Southern Tex.

Casinaria corrupta Walley, 1947. Sci. Agr. 27: 385. ♂, ♀.

eupitheciae Viereck. Que. w. to s. B. C., s. to n.w. S. C., s. Wis., and w. Wash.; Ecuador? Host: *Eupithecia gibsonata* Tay., *E. helvetica* Bdv., *E. luteata* Pack., *E. miserulata* Grt., *E. palpata* Pack.

Casinaria eupitheciae Viereck, 1912. U. S. Natl. Mus., Proc. 43: 586. ♂, ♀.

Campoplex (Hypothereutes) impetus Viereck, 1925; 1926. Canad. Ent. 57 (8): 204 (key); 58 (9): 223. ♀.

Taxonomy: Finlayson, 1975. Ent. Soc. Canada, Mem. 94: 15, 26, 32, 100, 135 (final-instar larva).

forcipata Walley. N. B. w. to s. Alta., s. to Md., s. Ohio, s. w. Tex., s.e. N. Mex., Ariz., and s. Calif. Host: *Itame pustularia* (Gn.), *Semiothisa "granitata"* auct., *S. oweni* Swett, *S. sexmaculata* (Pack.), *Malacosoma disstria* Hbn.

Casinaria forcipata Walley, 1947. Sci. Agr. 27: 393. ♂, ♀.

genuina (Norton). N. S. w. to s. B. C., s. to Del., Ill., Tex., N. Mex., and s. Wash. Host: *Apantesis virgo* (L.), *Estigmene acrea* (Drury), *Hyphantria cunea* (Drury), *Acronicta oblinata* (J. E. S.).

Campoplex genuinus Norton, 1863. Ent. Soc. Phila., Proc. 1: 367. ♂, ♀.

Mesoleptus major Cresson, 1864. Ent. Soc. Phila., Proc. 3: 257. ♂.

Campoplex niger Provancher, 1879. Nat. Canad. 11 (no. 127): 148. ♀. Preocc. by Brulle, 1846 and Provancher, 1874.

Anephares(?) rufipes Hancock, 1911. Nature Sketches in Temperate America, p. 177. ♀.

geometrae geometrae Walley. N. S., Que., N. Y., N. J., Md., W. Va., w. N. C., Ont. Host:

Caripeta angustiorata Wlk., *C. divisata* Wlk., *Eufidonia notataria* Wlk., *Paraphia piniata* Pack., *Protoboarmia porcelaria* (Gn.), *Semiothisa "granitata"* auct.

Casinaria geometrae geometrae Walley, 1947. Sci. Agr. 27: 380. ♂, ♀.

Taxonomy: Finlayson, 1975. Ent. Soc. Canada, Mem. 94: 27, 30-31, 99, 135 (final-instar larva).

geometrae occidentalis Walley. Southern B. C. s. to s.w. Calif. Host: *Caripeta* sp., *Enypia venata* (Grt.), *Melanolophia imitata* (Wlk.), *Sabulodes caberata* Gn., *Semiothisa "granitata"* auct.

Casinaria geometrae occidentalis Walley, 1947. Sci. Agr. 27: 382. ♂, ♀.

Taxonomy: Finlayson, 1975. Ent. Soc. Canada, Mem. 94: 27, 31, 99, 135 (final-instar larva).

grandis Walley. Fla., s. La., Tex. Host: *Sibine stimulea* (Clem.).

Campoplex texanus Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 427. ♀. Preocc. in *Casinaria* by *Dusona texana* (Ashmead), 1890 (p. 427).

Casinaria grandis Walley, 1947. Sci. Agr. 27: 376. N. name for *Campoplex texanus* Ashmead.

infesta (Cresson). R. I. w. to s. Mich. and Iowa, s. to s. Fla. and Tex.; Mexico, Costa Rica,

Argentina; Hawaii. Host: *Desmia funeralis* (Hbn.), *Diaphania hyalinata* (L.), *Herpetogramma bipunctalis* (F.), *Hymenia fascialis* Cram., *H. perspectalis* Hbn., *H.*

recurvalis (F.), *Mimorista flavidissimilis* (Grt.), *Ostrinia oblitteralis* (Wlk.), *Udea rubigalis* (Gn.), *Autographa falcifera* (Kby.), *Ancylis comptana* (Froel.).

Limneria infesta Cresson, 1872. Amer. Ent. Soc., Trans. 4: 172. ♀.

Campoplex divisus Cresson, 1874 (1873). Acad. Nat. Sci. Phila., Proc. 25: 385. ♂.

Limneria sessilis Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 433. ♀. Preocc. by Provancher, 1875.

Limneria? *erythrogaster* Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 434. ♀.

Limnerium Ashmeadii Dalla Torre, 1901. Cat. Hym., v. 3, p. 90. N. name for *L. sessilis* Ashmead.

Limnerium erythrogasterum Dalla Torre, 1901. Cat. Hym., v. 3, p. 95. Emend.

Angitia autumnalis Viereck, 1906. Amer. Ent. Soc., Trans. 32: 181. ♀.

Anempheres diaphaniae Viereck, 1911. U. S. Natl. Mus., Proc. 40: 188. ♀.

Taxonomy: Townes, 1946. Bol. Ent. Venezolana 5: 36 (syn.).

Biology: Swezey, 1926. Hawaii. Ent. Soc., Proc. 6: 296. — Williams, 1931. Handb. Ins.

lamina (Viereck). Mass., N. Y., Pa., Md., n. Va., Ont., s. Ohio, Iowa. Host: *Epargyreus clarus* (Cram.).

Zastenomorpha lamina Viereck, 1921. Psyche 28: 81. ♀.

limenitidis (Howard). Que. w. to s. B. C., s. to D. C., s. Tex., and Ariz. Host: *Dasychira basiflava* (Pack.), *D. plagiata* (Wlk.), *Orgyia antiqua* (L.), *O. leucostigma* (J. E. S.), *O. pseudotsugata* (McD.), *Malacosoma americanum* (F.), *Limenitis archippus* (Cram.), *Hyphantria cunea* (Drury), *Catocala antinympha* (Hbn.).

Limneria limenitidis Howard, 1889. In Scudder, Butterflies of Eastern U. S., v. 3, p. 1883. ♂.

Amorphota orgyiae Howard, 1897. U. S. Dept. Agr., Div. Ent., Tech. Ser. 5: 53. ♂, ♀.

Pseudocasinaria ceanothi Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey Bul. 22: 270. ♂.

Neonortonia graciliforma Viereck, 1925. Canad. Ent. 57 (7): 179 (key); 57 (12): 300. ♂.

Taxonomy: Townes and Townes, 1951. In Muesebeck et al., U. S. Dept. Agr., Agr. Monog. 2: 365 (syn.). — Finlayson, 1975. Ent. Soc. Canada, Mem. 94: 27, 30, 98, 135 (final-instar larva).

Biology: Howard, 1897. U. S. Dept. Agr., Div. Ent., Tech. Ser. 5: 20-21.

melanolophiae Walley. Southern B. C. Host: *Melanolophia imitata* (Wlk.).

Casinaria melanolophiae Walley, 1959. Canad. Ent. 91: 565. ♂, ♀.

Taxonomy: Finlayson, 1975. Ent. Soc. Canada, Mem. 94: 27, 31-32, 100, 135 (final-instar larva).

scabriformis Viereck. Mass. s. to n.w. S. C., w. to n.e. Kans. Host: *Eupithecia miserulata* Grt. *Casinaria scabriformis* Viereck, 1912. U. S. Natl. Mus., Proc. 42: 635. ♀.

Taxonomy: Townes, 1945. Amer. Ent. Soc., Mem. 11: 607.

semothisae Walley. Que. w. to s. B. C., s. to D. C., Ark., and Oreg. Host: *Caripeta divisata* (Wlk.), *Semiothisa bisignata* wlk.), *S. "granitata"* auct., *S. sexmaculata* (Pack.). The cocoon description given by Finlayson (1975) contrasts with that in Walley's (1947) revision of *Casinaria*.

Casinaria semiothisae Walley, 1941. Canad. Ent. 73: 169. ♂, ♀.

Taxonomy: Finlayson, 1975. Ent. Soc. Canada, Mem. 94: 15, 26, 32-33, 100, 135 (final-instar larva).

tenuiceps Walley. Md., n. Ga.

Casinaria tenuiceps Walley, 1947. Sci. Agr. 27: 378. ♂, ♀.

vadosa Walley. R. I., Md., n. Ga., Tex.

Casinaria vadosa Walley, 1947. Sci. Agr. 27: 395. ♀.

Genus CHAROPS Holmgren

Charops Holmgren, 1859 (1858). Svenska Vetensk.-Akad., Ofvers. af ... Forhandl. 15: 324.

Type-species: *Campoplex decipiens* Gravenhorst. Monotypic. The type-species is regarded as a synonym of *Casinaria cantator* (De Geer).

Zacharops Viereck, 1912. U. S. Natl. Mus., Proc. 42: 646.

Type-species: *Charops annulipes* Ashmead. Monotypic and orig. desig.
Gongropelma Enderlein, 1921. Stettin. Ent. Ztg. 83: 13.

Type-species: *Gongropelma formosanum* Enderlein. Orig. desig. The type-species is regarded as a synonym of *C. bicolor* (Szepligeti).

Most of the species in this fairly large genus occur in the tropics, and there is only a single Nearctic species. The cocoons of at least some of the species are suspended from foliage by a thread of silk. The hosts are various lepidopterous larvae which do not conceal themselves when feeding.

Revision: Gupta and Sharda Maheshwary, 1971 (1970). Oriental Insects 4: 453-480 (Indian spp.).

annulipes Ashmead. Que. s. to n. Fla., w. to n.e. Kans. and e. Tex.

Charops annulipes Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 414. ♂.

Genus DUSONA Cameron

Dusona Cameron, 1901 (1900). New Zeal. Inst., Trans. and Proc. 33: 107.

Type-species: *Dusona stramineipes* Cameron. Monotypic.
Delopia Cameron, 1903. Ztschr. System. Hym. Dipt. 3 (5): 304.

Type-species: *Delopia cariniscutis* Cameron. By subsequent monotypy from inclusion by Cameron, 1903 (3 [6]: 337-338 of same jour.).

Anisitsia Viereck, 1912. U. S. Natl. Mus., Proc. 42: 632. Preocc. by Eigenmann, 1903.
Type-species: *Campoplex villosus* Norton. Orig. desig.

Campoplegidea Viereck, 1912. U. S. Natl. Mus., Proc. 42: 644.

Type-species: *Campoplex oxyacanthae* Boie. Monotypic and orig. desig.
Pseudocasinaria Viereck, 1912. U. S. Natl. Mus., Proc. 42: 644.

Type-species: *Casinaria americana* Ashmead. Monotypic and orig. desig.
Thymarimorpha Viereck, 1913. U. S. Natl. Mus., Proc. 46: 384.

Type-species: *Thymarimorpha platygastera* Viereck. Monotypic and orig. desig. The type-species is regarded as a synonym of *D. gnara* (Cresson).

Viereckiana Strand, 1914. Arch. f. Naturgesch. (A) 80 (1): 163. N. name for *Anisitsia* Viereck.

Zachrestinus Enderlein, 1921. Stettin. Ent. Ztg. 82: 38.

Type-species: *Zachrestinus fractocristatus* Enderlein. Monotypic and orig. desig.
Idiosomidea Viereck, 1925. Roy. Soc. Canada, Proc. and Trans. (3) 19 (5): 271.

Type-species: *Campoplex photomorphus* Viereck. Orig. desig.

Neodelopia Benoit, 1957. Inst. Sci. Madagascar, Mem. (E) 8: 314.

Type-species: *Neodelopia pauliani* Benoit. Monotypic and orig. desig.

This very large genus is known from all zoogeographic regions. The hosts are larvae of macrolepidoptera which feed on trees and shrubs and do not conceal themselves while feeding. More rearings in North America have been from Geometridae than from Lepidoptera of other families.

Revision: Walley, 1940. Sci. Agr. 20: 647-734.

Taxonomy: Townes and Townes, 1951. In Muesebeck et al., U. S. Dept. Agr., Agr. Monog. 2: 370 (syn.). —Townes, Momoi, and Townes, 1965. Amer. Ent. Inst., Mem. 5: 285-286 (syn.).

alia (Norton). Mass. The holotype is lost and no revisor has yet decided what name should be suppressed as a synonym of *alia*.

Campoplex alias Norton, 1863. Ent. Soc. Phila., Proc. 1: 367. ♀.

americanana (Ashmead). Mass. w. to s. B. C., s. to Ala., n.e. Tex., and Colo.

Campoplex expertus Cresson, 1872. Amer. Ent. Soc., Trans. 6: 171. "♂" = ♀.

ferruginea Walkley. Southern Fla.

Dusona ferruginea Walkley, 1963. Ent. News 74: 239. ♀.

flavescens (Walley). Tex., s. Ariz., Calif.; n. Mexico. Host: *Anacamptodes fragillaria* (Grossb.).

Campoplegidea flavescens Walley, 1940. Sci. Agr. 20: 710. ♀. The holotype was collected at Phoenix, Ariz. on April 11, 1897, probably on *Salix*, by R. E. Kunze.

fossata (Viereck). Que., N. H., N. J., Pa., Ont., Man., Sask., s. Alta., w. Oreg.

Campoetus fossatus Viereck, 1926. Roy. Soc. Canada, Proc. and Trans. (3) 20 (5): 182. ♂.

fuscitarsis (Viereck). Que. w. to s. Alta., s. to N. C. and n. Mich. Host: *Eufidonia notataria* (Wlk.).

Campoplegidea (Viereckiana) fuscitarse Viereck, 1926. Roy. Soc. Canada, Proc. and Trans. (3) 20 (5): 175. ♀.

glauea caliginosa (Walley). Sask., s. Alta., s.-coastal Alaska s. to n. Calif.

Campoplegidea caliginosa Walley, 1940. Sci. Agr. 20: 693. ♀.

Taxonomy: Townes, 1945. Amer. Ent. Soc., Mem. 11: 634 (status change).

glauea glauca (Norton). Que. w. to Man., s. to Md. and n.e. Kans. Host: *Lygris diversilineata* (Hbn.), *L. gracilinotata* (Gn.). A third, undescribed subspecies was recorded from Ariz. by Townes and Townes (1951).

Campoplex glaucus Norton, 1863. Ent. Soc. Phila., Proc. 1: 366. ♂.

Campoplex dissitus Norton, 1863. Ent. Soc. Phila., Proc. 1: 367. ♀.

Campoplegidea rossi Viereck, 1925. Roy. Soc. Canada, Proc. and Trans. (3) 19 (5): 268. ♂.

Taxonomy: Townes, 1945. Amer. Ent. Soc., Mem. 11: 633-634 (syn.). —Townes and Townes, 1951. In Muesebeck et al., U. S. Dept. Agr., Agr. Monog. 2: 372.

gracilis (Walley). Conn., N. Y., Pa., s.e. Ont., n. Ohio, Mich., s.w. Man.

Campoplegidea gracilis Walley, 1940. Sci. Agr. 20: 701. ♀.

grahami (Walley). N. H., Colo., s.w. B. C. In the East this species apparently has been collected only on the top of Mt. Washington, N. H.

Campoplegidea grahami Walley, 1940. Sci. Agr. 20: 698. ♀.

insolita (Walley). Que., Ont., s. Man.

Campoplegidea insolita Walley, 1940. Sci. Agr. 20: 681. ♀.

interstitialis (Walley). Que., Mo.?

Campoplegidea interstitialis Walley, 1940. Sci. Agr. 20: 703. ♀.

johsoni (Walley). Eastern Mass., s.e. N. Y., N. J.

Campoplegidea johnsoni Walley, 1940. Sci. Agr. 20: 729. ♀.

laminata (Walley). Que. w. to s. Man., s. to Pa., n. Mich., and Tex.

Campoplegidea laminata Walley, 1940. Sci. Agr. 20: 680. ♂, ♀.

lapponica kukakensis (Ashmead). Que. w. to s.w. Alaska, s. to N. Y., n. Mich., w. Ont., and s.

Idaho. Host: *Hydria prinivora* (Ferg.), *Rheumaptera hastata* (L.). *D. lapponica*
lapponica (Holmgren) is European.

Zachresta kukakensis Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 235. ♂.

Campoplegidea caudata Walley, 1940. Sci. Agr. 20: 686. ♂, ♀.

Taxonomy: Townes, 1945. Amer. Ent. Soc., Mem. 11: 635 (syn. and status change).

laticincta (Cresson). Que. w. to s. Alta. and w. Oreg., s. to n. Ga., n. Ohio, Colo., and n. Calif.
Host: *Heliothis* sp., noctuid.

Campoplex laticinctus Cresson, 1865. Ent. Soc. Phila., Proc. 4: 283. ♀.

Campoplex nigripes Provancher, 1874. Nat. Canad. 6: 145. ♀. Preocc. by Gravenhorst, 1829
and Brulle, 1846.

Campoplegidea brooksi Viereck, 1925. Roy. Soc. Canada, Proc. and Trans. (3) 19 (5): 264.
♂, ♀.

lobata (Walley). Que., N. Y., n. Va., S. C., n. Ga., Ont., Man., s. B. C. Host: *Semiothisa*
“*granitata*” auct., *S. sexmaculata* (Pack.).

Campoplegidea lobata Walley, 1940. Sci. Agr. 20: 713. ♂, ♀.

luctuosa (Provancher). Que., s.w. Alta., n. Idaho, Ariz., s. B. C. n. Calif. Host: *Enypia venata*
(Grt.), *Hydriomena divisaria* (Wlk.), *H. furcata* (Thun.).

Campoplex luctuosus Provancher, 1875. Nat. Canad. 7: 145. ♀.

Anisitsia nigerrima Viereck, 1912. U. S. Natl. Mus., Proc. 43: 583. ♀.

Taxonomy: Townes, 1945. Amer. Ent. Soc., Mem. 11: 636 (syn.).

magnifica (Walley). N. Y., n. Ala.

Campoplegidea magnifica Walley, 1940. Sci. Agr. 20: 727. ♂, ♀.

major (Cresson). Que., Mass., R. I., Pa., s. Mich., Man., N. Mex., s.w. B. C. Host: *Schizura*
unicornis (J. E. S.), *Abbotiana clemataria* (J. E. S.).

Campoplex major Cresson, 1879 (1878). Acad. Nat. Sci. Phila., Proc. 30: 369. ♀.

Campoplegidea (Viereckiana) totalis Viereck, 1926. Roy. Soc. Canada, Proc. and Trans. (3)
20 (5): 174. ♀.

minor (Provancher). N. S. w. to s.-coastal Alaska, s. to n. Va., n. Mich., Colo., s.w. Mont., and s.
B. C. Host: *Eupithecia luteata* Pack., *E. transcanadata* MacK.

Campoplex minor Provancher, 1879. Nat. Canad. 11 (no. 127): 150. ♀.

Pseudocasinaria decorata Viereck, 1926. Roy. Soc. Canada, Proc. and Trans. (3) 20 (5): 183.
♂.

Amorpha pacifica Viereck, 1926. Roy. Soc. Canada, Proc. and Trans. (3) 20 (5): 184. ♂.

Campoplegidea mitis Walley, 1940. Sci. Agr. 20: 689. ♀.

Campoplegidea maritima Walley, 1940. Sci. Agr. 20: 689. ♀.

Taxonomy: Townes, 1945. Amer. Ent. Soc., Mem. 11: 636-637 (syn.).

montrealensis (Viereck). N. S. s. to n. Ga., w. to Man.

Campoplegidea (Viereckiana) montrealensis Viereck, 1926. Roy. Soc. Canada, Proc. and
Trans. (3) 20 (5): 181. ♂.

nigritibialis (Viereck). Southern Idaho, s.w. B. C., Wash., n. Calif.

Campoplegidea (Viereckiana) nigritibialis Viereck, 1926. Roy. Soc. Canada, Proc. and
Trans. (3) 20 (5): 178. ♀.

obesa (Davis). Maine, Mass., N. Y., Pa., s.w. Va., Mich. This species with a long ovipositor was
not included in Walley's (1940) revision of *Dusona*.

Zachrasta(?) obesa Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 361. ♀.

occidentalis (Davis). Southwestern B. C., w. Wash.

Campoplex occidentalis Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 361. ♂, ♀.

ocellata (Walley). Md., s. Tex.

Campoplegidea ocellata Walley, 1940. Sci. Agr. 20: 718. ♀.

pallescens (Walley). Eastern N. C., Tenn., S. C., Ga., s. Fla.

Campoplegidea pallescens Walley, 1940. Sci. Agr. 20: 722. ♀.

pectoralis (Walley). Que., Ont., n. Mich., s. Sask., n. and s. Alta., s. B. C. Host: *Deilinea bryantaria* (Tay.).

Campoplegidea pectoralis Walley, 1940. Sci. Agr. 20: 686. ♀.

pilosa (Walley). Colo., Ariz., s.w. B. C., Oreg., n. Calif. Host: *Enypia packardata* Tay., *E. venata* (Grt.), *Melanolophia imitata* (Wlk.).

Campoplegidea pilosa Walley, 1940. Sci. Agr. 20: 733. ♂, ♀.

planata (Viereck). Que., N. Y., Md., Ont., Mich., Ill. Host: Noctuid.

Campoplegidea planata Viereck, 1925. Roy. Soc. Canada, Proc. and Trans. (3) 19 (5): 267. ♀.

pulchella (Walley). Southwestern Utah, n.w. Ariz., s. Calif.

Campoplegidea pulchella Walley, 1940. Sci. Agr. 20: 717. ♂, ♀.

quebecensis (Walley). Que., Mass.

Campoplegidea quebecensis Walley, 1940. Sci. Agr. 20: 731. ♀.

relecta (Davis). N. H., N. Y., s.e. B. C.

Campoplex relectum Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 361. ♀.

Campoplegidea egregiata Viereck, 1925. Roy. Soc. Canada, Proc. and Trans. (3) 19 (5): 266. ♀.

Taxonomy: Townes, 1945. Amer. Ent. Soc., Mem. 11: 638 (syn.).

robusta (Walley). Mass., N. J., Pa., n. Ga., s. Ohio, s. Mich.

Campoplegidea robusta Walley, 1940. Sci. Agr. 20: 725. ♂, ♀.

rotunda (Walley). N. S., Que., Wash.

Campoplegidea rotunda Walley, 1940. Sci. Agr. 20: 697. ♀.

rufescens (Walley). Southern N. Y. w. to s. Mich. and Iowa, s. to n. Va., Mo., and n.e. Kans.

Campoplegidea rufescens Walley, 1940. Sci. Agr. 20: 720. ♂, ♀.

rufigaster (Walley). N. H. s. to s. Fla., w. to s. Mich. and w. Ky.

Campoplegidea rufigaster Walley, 1940. Sci. Agr. 20: 705. ♀.

scalaria (Provancher). Que., Alta., Wash.

Campoplex scalarius Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 84. ♀ (♂ misdet.).

Campoplex scalaris (!) Provancher, 1889. Addit. Corr. Faune Ent. Canada Hym., p. 449 (index).

Campoplegidea scalaris Walley, 1940. Sci. Agr. 20: 654, 706, 707. Emend.

seamansi (Viereck). Southern Man., Colo., s.w. Alta., s. B. C. Host: Geometrid, *Choristoneura conflictana* (Wlk.)?

Campoplegidea edmontonensis Viereck, 1925. Roy. Soc. Canada, Proc. and Trans. (3) 19 (5): 266. ♂.

Campoplegidea seamansi Viereck, 1925. Roy. Soc. Canada, Proc. and Trans. (3) 19 (5): 268. ♀.

Amorphota bicoloripes Viereck, 1926. Roy. Soc. Canada, Proc. and Trans. (3) 20 (5): 184. ♀.

Taxonomy: Townes, 1945. Amer. Ent. Soc., Mem. 11: 639 (syn.).

semirufa (Provancher). Que., Vt., N. Y., Mich., Colo., s. B. C. Host: *Pheosia rimosa* Pack.

Campoplex semirufus Provancher, 1882. Nat. Canad. 13: 364. ♀.

Campoplegidea okanaganensis Viereck, 1925. Roy. Soc. Canada, Proc. and Trans. (3) 19 (5): 270. ♀.

signata (Viereck). N. B., Que., N. C., Ont., n. Mich., Man., Sask., n. B. C. Host: Noctuid.

Campoplegidea signata Viereck, 1925. Roy. Soc. Canada, Proc. and Trans. (3) 19 (5): 262. ♂, ♀.

simulans arizonensis (Walley). Southern Ariz.

Campoplegidea arizonensis Walley, 1940. Sci. Agr. 20: 709. ♂, ♀.

Taxonomy: Townes and Townes, 1951. In Muesebeck et al., U. S. Dept. Agr., Agr. Monog. 2: 374 (status change).

simulans simulans (Walley). N. J., S. C.

Campoplegidea simulans Walley, 1940. Sci. Agr. 20: 704. ♂, ♀.

stricklandi (Viereck). Southwestern Alta.

Campoplegidea stricklandi Viereck, 1925. Roy. Soc. Canada, Proc. and Trans. (3) 19 (5): 269. ♂.

subtilis (Viereck). Southwestern Alta.

Campoplegidea (Viereckiana) subtilis Viereck, 1926. Roy. Soc. Canada, Proc. and Trans. (3) 20 (5): 176. ♀.

tepaneca (Cresson). Ariz.; Mexico, Guatemala? This species was not included in Walley's (1940) revision of *Dusona*.

Campoplex tepanecus Cresson, 1874. Acad. Nat. Sci. Phila., Proc. 25: 382. ♂, ♀.

texana (Ashmead). D. C., n. Ga., n.e. Kans., Tex., Wash.; Guatemala.

Casinaria texana Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 427. ♀.

Taxonomy: Townes, 1945. Amer. Ent. Soc., Mem. 11: 640 (syn. corrected).

townsendi (Walley). N. Mex. Apparently known only from the type series which was collected at an elevation of 8000 ft. in the White Mts.

Campoplegidea townsendi Walley, 1940. Sci. Agr. 20: 703. ♂, ♀.

tumida (Walley). Ariz., w. Oreg.

Campoplegidea tumida Walley, 1940. Sci. Agr. 20: 716. ♀.

turmalis (Walley). Southwestern Tex.

Campoplegidea turmalis Walley. 1940. Sci. Agr. 20: 711. ♀.

vara (Walley). N. S. w. to Sask., s. to N. J., Pa., and n. Mich.

Campoplegidea vara Walley, 1940. Sci. Agr. 20: 663. ♂, ♀.

variabilis (Franklin). N. S., Que., Maine, Mass. Host: *Ematurga amitaria* (Gn.). The record for *variabilis* as a parasite of *Synchlora rubrifrontaria* Pack. published by Schaffner and Griswold (1934) is based upon a misidentified specimen in the U. S. Natl. Museum collection. The specimen is now too badly damaged to be reidentified readily.

Campoplex variabilis Franklin, 1915. Ent. News 26: 356. ♀. Preocc. by *Campoplex variabilis* (Bridgman), 1886.

Biology: Schaffner and Griswold, 1934. U. S. Dept. Agr., Misc. Pub. 188: 148.

varicoxa (Viereck). Que., N. H., N. Y., Pa., Md., n. and w. Ont., s. Alta., s.w. B. C. Host: *Nemoria mimosaria* (Gn.).

Campoplegidea (Viereckiana) varicoxa Viereck, 1926. Roy. Soc. Canada, Proc. and Trans. (3) 20 (5): 180. ♂.

Campoplegidea (Viereckiana) reticulata Viereck, 1926. Roy. Soc. Canada, Proc. and Trans. (3) 20 (5): 181. ♂.

Pseudocasinaria paenealia Viereck, 1926. Roy. Soc. Canada, Proc. and Trans. (3) 20 (5): 182. ♂.

vibecifera (Viereck). Ont.?, Mich.?, e. Sask. Host: Geometrid.

Campoplegidea vibecifera Viereck, 1925. Roy. Soc. Canada, Proc. and Trans. (3) 19 (5): 270. ♂.

vicina (Provancher). Que., Ont., Man. Host: *Semiothisa "granitata"* auct., *S. sexmaculata* (Pack.).

Campoplex vicinus Provancher, 1874. Nat. Canad. 6: 145. ♂, ♀.

villosa (Norton). Que. w. to s. B. C., s. to w. N. C., s. Mich., n.e. Kans., N. Mex., and Oreg. Host: *Pero* sp.

Campoplex villosus Norton, 1863. Ent. Soc. Phila., Proc. 1: 365. ♂, ♀.

vitticollis (Norton). Que. w. to s.e. Alaska, s. to n. Ga., n. Ala., Tex., N. Mex., and Ariz. Host:

Caripeta divisata Wlk., *Hypagrypis piniata* (Pack.), *Phigalea titea* (Cram.), *Malacosoma disstria* (Hbn.)?

Campoplex vitticollis Norton, 1863. Ent. Soc. Phila., Proc. 1: 365. ♀.

woodi (Viereck). Que., Pa., Md., n. Va., Ont., s. Ohio.

Campoplegidea (Viereckiana) woodi Viereck, 1926. Roy. Soc. Canada, Proc. and Trans. (3) 20 (5): 177. ♂.

Campoplegidea (Viereckiana) erythrosoma Viereck, 1926. Roy. Soc. Canada, Proc. and Trans. (3) 20 (5): 177. ♀.

wyomingensis (Viereck). N. S. w. to s. B. C., s. to s.w. Va., Ohio, and w. Wyo. In Walley's (1940) revision of *Dusona*, *wyomingensis* was incorrectly suppressed as a synonym of *diversa* (which see).

Campoplex wyomingensis Viereck, 1906. Amer. Ent. Soc., Trans. 32: 342. ♂.

Campoplegidea walleyi Viereck, 1925. Roy. Soc. Canada, Proc. and Trans. (3) 19 (5): 271. ♀.

Taxonomy: Townes, 1945. Amer. Ent. Soc., Mem. 11: 643 (*wyomingensis* resurrected).

Genus LEPTOCAMPOPLEX Horstmann

Leptocampoplex Horstmann, 1970. Bayer. Ent., Nachrichtenbl. 19: 78.

Type-species: *Nemeritis cremastoides* Holmgren. Monotypic and orig. desig.

A single Holarctic species is known. The genus appears to be closely related to *Menaka* Gupta and Gupta (1971), from which *Leptocampoplex* differs principally by lacking the second intercubitus. The name *Porizon* was incorrectly applied to *Leptocampoplex* by Townes (1965, 1970); see the introductory discussion of *Porizon*.

Taxonomy: Townes, 1965. Polskie Pismo Ent. 35: 410 (as *Porizon*). — Townes, 1970 (1969).

Amer. Ent. Inst., Mem. 13: 157, 167-168, 278 (as *Porizon*). — Gupta and Gupta, 1971.

Oriental Insects 5: 111-116 (related Indian genus).

cremastoides (Holmgren). Ont., Mich.; Europe. Host: *Ptilinus pectinicornis* (L.)? Townes (1970) gave the Nearctic range as "eastern North America" in referring to what he regarded as being an undescribed Nearctic species. Horstmann (1970) stated that he believed the Nearctic specimens he had seen (apparently borrowed from Townes) to represent only an undescribed subspecies of *cremastoides*, differing from the European one in having the underside of the scape pale (i.e. "helle"). In view of the fact that the known Nearctic range of *cremastoides* is not similar to that of most Holarctic ichneumonid species, proof that *cremastoides* is not adventive in North America should precede validation of a name for the Nearctic population. The host record cited with a query above pertains to a specimen acquired from A. W. Stelfox by the U. S. Natl. Museum; the specimen is labeled "? parasitic on *Ptilinus pectinicornis*!"

Nemeritis cremastoides Holmgren, 1860 (1858). Svenska Vetensk.-Akad. Handl. (n. f.) 2: 105. ♀.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 168, 278 (as "*Porizon moderator*," misdet.). — Horstmann, 1970. Bayer. Ent., Nachrichtenbl. 19: 79.

Genus PYRACMON Holmgren

Pyracmon Holmgren, 1859 (1858). Svenska Vetensk.-Akad., Ofvers. af ... Forhandl. 15: 326.

Type-species: *Porizon fumipennis* Zetterstedt. Monotypic and orig. desig.

This is a small Holarctic genus. Townes (1970) knew five species, one of them being an undescribed Nearctic species. Dr. John Barron has informed me (personal commun., 1977) that the latter has been reared from Elateridae and will be described by Mr. G. S. Walley. Dr. Klaus Horstmann will probably have published a revision of the European species prior to the appearance of this catalog.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 169.

sepiella (Holmgren). N. H., Mich.; Eurasia. Host: *Macropogon piceus* LeC. Numerous additional Nearctic localities will presumably be given by Mr. G. S. Walley in a forthcoming paper.

Limneria sepiella Holmgren, 1860 (1858). Svenska Vetensk.-Akad. Handl. (n. f.) 2 (8): 63. ♂, ♀.

Pyracmon sepiellum Townes, 1965. In Townes, Townes, and Gupta, Amer. Ent. Inst., Mem. 5: 283. Emend.

Genus RHIMPHOCTONA Foerster

Rhimphoctona Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 153.

Type-species: *Rhimphoctona rufipes* Tschek. By subsequent monotypy from inclusion by Tschek, 1871. The type-species is regarded as a junior synonym of *R. grandis* (Fonscolombe).

Xylophylax Kriechbaumer, 1878. Ent. Nachr. 4: 210.

Type-species: *Pyracmon (Parapyracmon) rufocoxalis* Clement. Monotypically included and desig. by Townes, 1970.

Helcostizidea Rohwer, 1913. Ent. Soc. Wash., Proc. 15: 185.

Type-species: *Cubocephalus atrocoxalis* Ashmead. Orig. desig.

Pyracmon subg. *Parapyracmon* Clement, 1924. Deut. Ent. Ztschr. (for 1924), p. 117-131.

Type-species: *Pyracmon [Parapyracmon] rufocoxalis* Clement. Desig. by Townes, 1970.

Pyracmonoides Viereck, 1925 (July). Canad. Ent. 57 (7): 177-178.

Type-species: *Pyracmonoides separatum* Viereck. Desig. by Viereck, 1925 (Dec.).

This is a small Holarctic genus.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 162-163 (generic syn. and referral of Nearctic spp.).

alaskensis (Ashmead). Alaska. More explicit locality data are presumably unavailable; one of the labels of each of the three syntypes says "U. S. N. M. Acc[ession] 25341," but it would be uncharacteristic for the Smithsonian Institution to have meaningful information pertaining to that number.

Cubocephalus alaskensis Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 203. ♀.

atrocoxalis (Ashmead). Que. w. to interior Alaska, s. to n. Calif.

Cubocephalus atrocoxalis Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 203. ♀. Described from "Alaska" and "Easton, Wash." The only syntype I have found bears a label with the same U. S. N. M. accession number as on labels of the syntypes of *alaskensis* (which see).

lipoparia (Viereck). Ont.

Pyracmonoides lipoparium Viereck, 1925. Canad. Ent. 57 (7): 178 (key); 57 (12): 299. ♂.

macdunnoughi (Viereck). Que., Alta., interior Alaska, w. Oreg.

Pyracmon macdunnoughi Viereck, 1925; 1926. Canad. Ent. 57 (7): 180 (key); 58 (1): 5. ♀.

macrocephala (Provancher). Que. w. to Mont., s. to w. N. C. and Idaho.

Limneria macrocephala Provancher, 1874. Nat. Canad. 6: 149. ♀.

Pyrachmon(!) aldrichi Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 363. ♂, ♀.

Cubocephalus nigricornis Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 203. ♀. Preocc. in *Cubocephalus* by Provancher, 1875.

Pyracmonoides succineum Viereck, 1925. Canad. Ent. 57 (7): 178 (key); 57 (12): 300. ♂.

Pyracmonoides trochantericum Viereck, 1925. Canad. Ent. 57 (7): 178 (key); 57 (12): 299. ♂.

separata (Viereck). Western Yukon.

Pyracmonoides separatum Viereck, 1925. Canad. Ent. 57 (7): 178 (key); 57 (12): 298. ♂, ♀.

vancouverensis (Harrington). Colo., s. Alta., Idaho, s.w. B. C., Wash., n. Calif.

Pyracmon vancouverensis Harrington, 1894. Canad. Ent. 26: 246. ♀.

xanthognatha (Rohwer). Western Mont., Idaho, Wash., Oreg., n. Calif. Host: Cerambycid in bark of *Abies concolor*.

Helcostizidea xanthognatha Rohwer, 1914. Ent. Soc. Wash., Proc. 15: 186. ♀.

Genus NEMERITIS Holmgren

Nemeritis Holmgren, 1860 (1858). Svenska Vetensk.-Akad. Handl. (n. f.) 2 (8): 104.

Type-species: *Campoplex macrocentrus* Gravenhorst. Desig. by Viereck, 1914.

Pseudonemeritis Szeppligeti, 1916. Mus. Natl. Hungarici, Ann. 14: 338.

Type-species: *Pseudonemeritis minor* Szeppligeti. Desig. by Townes, 1970.

This is a Holarctic and Neotropic genus of small to moderate size. A number of species have been reared from Rhaphidiidae. Apparently hosts other than Rhaphidiidae are not known, which apparently explains the fact that in the New World *Nemeritis* is confined to western North America and Chile.

Revision: Horstmann, 1973. Opusc. Zool. 125: 1-14 (European spp.). — Horstmann, 1975.

Polskie Pismo Ent. 45: 251-266 (elaboration).

macrurus (Viereck). Wyo., s. B. C., n. Calif.

Campoplex (*Campoplex*) *macrurus* Viereck, 1925; 1926. Canad. Ent. 57 (9): 226 (key); 58 (5): 146. ♀.

Genus **BATHYPLECTES** Foerster

Canidia Holmgren, 1860 (1858). Svenska Vetensk.-Akad. Handl. (n. f.) 2 (8): 103. Preocc. by Thomson, 1857.

Type-species: *Canidia pusilla* Holmgren. Desig. by Viereck, 1914.

Rhexineura Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 156.

Type-species: *Campoplex exiguis* Gravenhorst. Monotypically included and desig. by Townes, 1970.

Bathyplectes Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 156.

Type-species: *Campoplex exiguis* Gravenhorst. Monotypically included and desig. by Viereck, 1914.

Canidiella Ashmead, 1900. Canad. Ent. 32: 368. N. name for *Canidia* Holmgren.

Biolysia Schmiedeknecht, 1907. Hym. Mitteleuropas, p. 601.

Type-species: *Nepista marginella* Thomson. Monotypic.

This is a Holarctic genus of moderate size. Horstmann (1973, 1974) treated *Biolysia* as distinct from *Bathyplectes* to facilitate an easier distinction of the Palearctic genus *Nepista*. Because the species referable to *Biolysia* do not differ significantly in habits or life histories from other *Bathyplectes* species and because *Bathyplectes bryanti* Viereck is structurally intermediate, I prefer to treat *Bathyplectes* and *Biolysia* as synonymous. Known hosts include only weevils of the genus *Hypera*, but the majority of *Bathyplectes* species have not been reared. The native Nearctic species are poorly represented in collections, and the majority of them are undescribed.

Revision: Horstmann, 1974. Ent. Germ. 1: 58-81 (western Palearctic spp.).

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 164-165 (syn.). — Horstmann, 1973. Polskie Pismo Ent. 43: 729-731 (discussion and inclusion in generic key).

anurus contractus (Thomson). Central Calif.; s.w. U. S. S. R., Iran, s. Yugoslavia?, s. Germany, n. Italy, n. France, Ireland. Introduced. Host: *Hypera brunneipennis* Boh. Besides *a. contractus* and *a. anurus* (Thomson), Horstmann (1974) recognized *a. graecator* Aubert (treated here below); he knew *a. anurus* from southern Sweden (lectotype), The Netherlands, and northern and middle Germany. I am not convinced that these subspecies will be treated as valid taxa when more specimens have been collected and studied, but I here accept them as valid because my knowledge of western Palearctic zoogeography is not adequate for rejecting them for reasons of being insufficiently sound zoogeographically. Dr. Richard Dysart informed me (personal commun., 1977) of the establishment in Calif. of a population he thought most likely to be principally of Iranian origin. For that reason I have applied the name *a. contractus* to it.

Canidia contracta Thomson, 1887. Opusc. Ent. 11: 1113. ♀.

Taxonomy: Horstmann, 1974. Ent. Germ. 1: 61, 66-67.

Biology: Fisher, Schlinger, and van den Bosch, 1961. Jour. Econ. Ent. 54: 196, 197 (as *corvina*, misdet.; introductions and cocoon jumping behavior).

anurus graecator Aubert. Southern N. H., s. Vt., Mass., Conn., N. Y., N. J., Pa., Del., Md., Va., W. Va., N. C., S. C., s.e. Ont., Ohio, s. Mich., s. Ind., Ky., Tenn., Mo., w. S. Dak., Okla.; s. Yugoslavia, Greece, middle and s. Italy, s. France, n. Africa. Introduced. Host: *Hypera postica* (Gyll.). According to Dysart and Day (1976) the bulk of the *anurus* individuals released in eastern North America were of "French [apparently southern] origin," although small numbers came from Sicily and the U. S. S. R.

Bathyplectes anurus graecator Aubert, 1970. Soc. Ent. de Mulhouse, Bul. 26: 68. ♂, ♀.

Taxonomy: Horstmann, 1974. Ent. Germ. 1: 61, 67.

Biology: Kaufman, 1939. *Ztschr. f. Angew. Ent.* 26: 421-422 (as *corvina*, misdet.). —Baccetti, 1958. *Redia* 43: 226-253 (as *corvina*, misdet.). —Brunson and Coles, 1968. U. S. Dept. Agr., Prod. Res. Rpt. 101: 3-4, 7 (releases). —Day, 1970. *Jour. Econ. Ent.* 63: 586-589 (value of jumping cocoons). —Morrison and Pass, 1974. *Jour. Econ. Ent.* 67: 141-142. —Dysart and Day, 1976. U. S. Dept. Agr., Prod. Res. Rpt. 167: 2-3, 9-14, 39, 44-45 (releases and recoveries). —Gordh and Hendrickson, 1976. *Ent. News* 87: 271-274 (sexual behavior). —Dysart and Bingham, 1977. *Coop. Plant Protect. Rpt.* 2: 24-26 (recoveries). —Yeargan and Latheef, 1977. *Environmental Ent.* 6: 31-34.

bryanti Viereck. Southern Alta. Known only from the holotype, which was collected at Bilby, Alta.

Bathyplectes bryanti Viereck, 1925; 1926. *Canad. Ent.* 57 (9): 225 (key); 58 (9): 223. ♀. In the 1926 part of Viereck's revision as "*Campoplex (Bathyplectes) bryanti*"; nowhere in the 1925 part of the revision was *Bathyplectes* indicated to be a subgenus of *Campoplex*.

curculionis (Thomson). Southern Que. w. to s. Alta. and Wash., s. to n. Ga., n. Miss., Europe, n. Africa. Introduced. Host: *Hypera brunneipennis* Boh., *H. plantaginis* (DeG.), *H. postica* (Gyll.). The lectotype selected by Townes, Momoi, and Townes (1965) may not pertain to the present species (see Horstmann, 1974). Thomson probably had no reared material, but indicated that *curculionis* is the species which Holmgren (1860) had misidentified as *subcinctus* (Gravenhorst). Under *subcinctus*, Holmgren in turn referred to Ratzeburg (1852, p. 82; cf. Ratzeburg, 1848, p. 82) who cited hosts of reared specimens. Specimens reared from *H. postica* and *H. plantaginis* were identified by Horstmann (1974) as var. 1 of *B. curculionis*. *B. brevitor* Aubert (1974) was described as a species related to *curculionis*, the description of *brevitor* being based upon two Yugoslavian specimens reared from *H. plantaginis*. If *curculionis* var. 1 of Horstmann (1974) proves not to be conspecific with *curculionis*, it seems probable that *brevitor* will prove to be the correct name for it.

Canidia curculionis Thomson, 1887. *Opusc. Ent.* 11: 1113. ♀. Aubert (1960) gave descriptive notes concerning a female in the Thomson collection which he regarded as being the lectotype, but he did not cite a locality or other information pertaining to the labeling of that specimen; Townes, Momoi, and Townes (1965) selected a female lectotype from Stehag, Skane, Sweden, which had been labeled as lectotype by Aubert.

Taxonomy: Holmgren, 1860 (1858). *Svenska Vetensk.-Akad. Handl. (n. f.)* 2 (8): 103-104.

exiguus (Gravenhorst). Que. w. to s. B. C., s. to s. Va., central Mo., and central Oreg.; Europe. Adventive. Host: *Hypera nigrirostris* (F.), *H. punctata* (F.), *H. rumicis* (L.). This species apparently became established in North America along with one of the accidentally introduced hosts (most likely *H. nigrirostris*), but the oldest North American record known to me for *exiguus* is that for one of Viereck's paratypes of the synonym *phytonomi*. It was collected in Prince Edward Co., Ont. in 1890, and although I have not seen the specimen, I have little reason to doubt that it is a specimen of *exiguus* because there are a number of *exiguus* specimens in the U. S. Natl. Museum collection which were collected at Toronto, Ont. in 1896. The oldest United States record known to me is that for Viereck's paratype of the synonym *etemankiakorum*, which he collected in New Haven, Conn. in 1904 and which is in the U. S. National Museum collection. The oldest record known to me for western North America is 1918 (Puyallup, Wash., June 15; L. P. Rockwood). The entry of *B. exiguus* into western North America may have been independent of its establishment in the East, because the adventive thelytokous European species of *Gelis* studied by Caldwell and Wilson (1975), as a parasite of *B. curculionis* in Indiana, was reared from *B. exiguus* in northwestern Oreg. (Forest Grove and Seaside) in 1928 (cf. Rockwood, 1920); I have not seen specimens of it collected in eastern North America before 1957. Dr. K. W. R. Zwart told me (personal commun., 1976) that this species of *Gelis* is apparently undescribed.

Campoplex subcinctus Gravenhorst, 1829. Ichn. Europaea, v. 3, p. 494. ♀.

Campoplex exiguus Gravenhorst, 1829. Ichn. Europaea, v. 3, p. 499. ♀.

Campoplex (*Bathyplectes*) *etemankiakorum* Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey Bul. 22: 263. ♂.

Bathyplectes phytonomi Viereck, 1925; 1926. Canad. Ent. 57 (9): 225 (key); 58 (9): 222. ♂, ♀. In the 1926 part of Viereck's paper as "*Campoplex* (*Bathyplectes*) *phytonomi*" (see discussion under *bryanti*).

Taxonomy: Horstmann, 1974. Ent. Germ. 1: 62, 73, 75.

Biology: Rockwood, 1920. Canad. Ent. 52: 39. —Detweiler, 1923. Cornell Univ. Agr. Expt. Sta., Bul. 420: 19. —Chamberlin, 1933. Ent. Soc. Wash., Proc. 35: 106. —Sechrist and Treese, 1963. Ohio Agr. Expt. Sta., Res. Bul. 956: 23. —Caldwell and Wilson, 1975. Environmental Ent. 4: 333-336 (Gelis).

sessilis (Provancher), revised status. Que. In 1974 I studied the holotype (see Barron, 1975) and found that *sessilis* had been incorrectly suppressed as a synonym of *exiguus* by Townes (1945).

Limneria sessilis Provancher, 1875. Nat. Canad. 7: 148. ♀.

Taxonomy: Townes, 1945. Amer. Ent. Soc., Mem. 11: 612. —Barron, 1975. Nat. Canad. 102: 566.

stenostigma (Thomson). Southern N. H., Mass., N. Y., n. Del.? s.e. Ont., n.e. Ohio, w. Colo.; w. U. S. S. R., s. Sweden s. to s. Germany and n. France. Introduced. Host: *Hypera postica* (Gyll.). *B. stenostigma* differs from other *Bathyplectes* species with known biologies in that its final-instar larva emerges from the host larva before the latter spins its cocoon. It is interesting that this biological difference in *stenostigma* would appear to correlate with its habit of spinning a double cocoon (see Brunson and Coles, 1968). The introductions in western Colo. were apparently accompanied by the accidental release and unfortunate establishment of the thelytokous hyperparasite which I have identified as *Mesochorus nigripes* (Ratzeburg) (which see).

Canidia stenostigma Thomson, 1887. Opusc. Ent. 11: 1114. ♂? (? misdet.). Thomson failed to insert the sex symbols which usually preceded his statement of length, or range of lengths, for each species (in this case "Long. vix 4 mm."), or perhaps omission of the sex symbols was a printers error. From Thomson's description of the ovipositor it is apparent that he had a female. Neither Thomson's length measurement, nor anything else in his description indicate that he had a male specimen or a second specimen of either sex. Therefore, the validity of Aubert's (1970) selection of a male lectotype labeled "Germ." (and relegation of a female specimen to paralectotype status) would appear to rest solely upon whether or not it can be disproved that the male was found near Aachen by Foerster, the only source Thomson cited for his specimen (or specimens) of *stenostigma*.

Taxonomy: Aubert, 1970. Soc. Linn. de Lyon, Bul. Mens. 39: 276-277. — Horstmann, 1974. Ent. Germ. 1: 62, 70.

Biology: Brunson and Coles, 1968. U. S. Dept. Agr., Prod. Res. Rpt. 101: 5, 8 (as "sp. Bagged" and "n. sp."). — Dysart and Coles, 1971. Ent. Soc. Amer., Ann. 64: 1361-1367. — Dysart and Day, 1976. U. S. Dept. Agr., Prod. Res. Rpt. 167: 3, 14, 36, 39, 48-49 (releases and recoveries).

tristis (Gravenhorst), N. Y. w. to s. Mich. and e. Kans., s. to n.w. S. C. and n. Miss.; also central Calif.; s.w. Asia (U. S. S. R.), Europe. Introduced. Host: *Hypera punctata* (F.). The species is thelytokous, but males have been collected in N. J., Pa., Md., and Va. Possibly, males are even rarer in Europe because Horstmann (1974) had seen none. *Campoplex tristis* Gravenhorst, 1829. Ichn. Europaea, v. 3, p. 492. ♀ (♂ misdet.?). *Canidia trochantella* Thomson, 1887. Opusc. Ent. 11: 1114. ♀.

Taxonomy: Horstmann, 1974. Ent. Germ. 1: 76, 77-78.

Genus CAMPOLETIS Foerster

Sagaritis Holmgren, 1859 (1858). Svenska Vetensk.-Akad., Ofvers. af ... Forhandl. 15: 325. Preocc. by Billberg, 1820 and Huebner, 1821.

Type-species: *Campoplex declinator* Gravenhorst. Monotypic and orig. desig. The type-species is regarded as a synonym of *C. dilatator* (Thunberg).

Echphora Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 154. Preocc. by Conrad, 1843.

Type-species: *Campoplex viennensis* Gravenhorst. Desig. by Viereck, 1914 from three species included by Thomson, 1887.

Campoletis Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 157.

Type-species: *Mesoleptus tibiator* Cresson. By subsequent monotypy from inclusion by Houghton, 1907.

Anilastus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 157.

Type-species: *Campoplex rapax* Gravenhorst. Desig. by Viereck, 1914 from 27 species included by Thomson, 1887.

Anilasta Thomson, 1887. Opusc. Ent. 11: 1053, 1168. Emend.

Ephoropsis Ashmead, 1900. Canad. Ent. 32: 368. N. name for *Echphora* Foerster.

Sagaritopsis Hincks, 1944. Roy. Ent. Soc. London, Proc., Ser. B: Taxonomy 13: 36. N. name for *Sagaritis* Holmgren.

This very large genus is known from all zoogeographic regions. The genus is rather difficult taxonomically, and there are no usable works treating the species of any large country or other major geographic area. Most of the species occur in unforested habitats and many of them parasitize Noctuidae; a species exceptional to both generalizations is *C. pyralidis* Walley.

Taxonomy: Walley, 1927. Canad. Ent. 59: 227-231 (key to spp. in Canadian National Collection).

apicata (Viereck). Ont.

Sagaritis apicata Viereck, 1925; 1926. Canad. Ent. 57 (8): 200 (key); 58 (5): 128. ♀. In the 1926 portion of Viereck's revision as *S. apicatus*.

aprilis (Viereck). Conn., N. Y., N. J., n. Mich., w. Ont., S. Dak., s. B. C., w. Wash. Host: *Polia purpurissata* (Grt.), *Xylomyges dolosa* Grt., *Enargia decolor* (Wlk.).

Sagaritis aprilis Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey Bul. 22: 263. ♂.

Sagaritis bigelowi Viereck, 1925; 1926. Canad. Ent. 57 (8): 198 (key); 58 (2): 33. ♀.

Sagaritis citrinus Viereck, 1925; 1926. Canad. Ent. 57 (8): 200 (key); 58 (5): 123. ♀.

argentifrons (Cresson). Que. w. to s. B. C., s. to Va., Mo., s. Tex., Colo., and n. Calif. Host: *Agrotis ipsilon* (Hufn.), *Anicla infecta* (Ochs.), *Laciniipolia renigera* (Steph.), *Crambus mutabilis* Clem., *C. zeelus* Fern.

Mesoleptus dubitatus Cresson, 1864. Ent. Soc. Phila., Proc. 3: 259. ♀. Formerly preocc. in *Limnerium* by Holmgren, 1860.

Mesoleptus argentifrons Cresson, 1864. Ent. Soc. Phila., Proc. 3: 261. ♂.

Mesoleptus vicinus Cresson, 1864. Ent. Soc. Phila., Proc. 3: 268. ♀.

Limnerium provancheri Dalla Torre, 1901. Cat. Hym., v. 3, p. 102. N. name for *M. dubitatus* Cresson.

Sesioplex heliaeformis Viereck, 1925. Canad. Ent. 57 (7): 177 (key); 57 (12): 298. ♀.

Sagaritis strigosus Viereck, 1925; 1926. Canad. Ent. 57 (8): 199 (key); 58 (3): 73. ♂, ♀.

Sagaritis evansi Viereck, 1925; 1926. Canad. Ent. 57 (8): 199 (key); 58 (3): 74. ♀.

Sagaritis englishi Viereck, 1925; 1926. Canad. Ent. 57 (8): 199 (key); 58 (3): 75; 58 (5): 129. ♀. On p. 129 in the 1926 part of his revision Viereck made a correction to his 1925 key which makes it uncertain that the lectotype he selected in 1926 (p. 75) applies to the name validated in the 1925 key.

Sagaritis conspicuus Viereck, 1925; 1926. Canad. Ent. 57 (8): 200 (key); 58 (5): 123. ♂.

Sagaritis interruptus Viereck, 1925; 1926. Canad. Ent. 57 (8): 200 (key); 58 (5): 127, 129. ♂. The lectotype selected (in effect) by Viereck in 1926 (p. 127) does not apply with certainty to the name validated in the 1925 key because of errors in the latter which were corrected in 1926 (p. 129).

atkinsoni (Viereck). Southeastern Man., s. Sask., s. Alta., n. Idaho, e. Wash., w. Oreg.

Sagaritis atkinsoni Viereck, 1925; 1926. Canad. Ent. 57 (8): 199 (key); 58 (2): 38; 58 (5): 129.

Sagaritis teulonensis Viereck, 1925; 1926. Canad. Ent. 57(8): 200 (key); 58 (5): 124, 129. ♂. ♀. The lectotype selected (in effect) by Viereck in 1926 (P. 124) does not apply with certainty to the name validated in the 1925 key because of errors in the latter which were corrected in 1926 (p. 129).

Biology: King and Atkinson, 1928. Ent. Soc. Amer., Ann. 21: 173-174, 185.

atypicus (Viereck). Que., Ont., s. Alta.

Sagaritis atypicus Viereck, 1925; 1926. Canad. Ent. 57 (8): 198 (key); 58 (2): 36. ♀.

Sesioplex canadensis Cushman, 1930 (1929). U. S. Natl. Mus., Proc. 76 (25): 8. ♂, ♀.

australis (Viereck). Southern Sask., Wyo., and N. Mex., w. to s. B. C. and w. Oreg. Host: *Euxoa ochrogaster* (Gn.).

Limnerium australis Viereck, 1903. In Skinner, Amer. Ent. Soc., Trans. 29: 91. ♀.

banksi (Viereck). Northern Va.

Campolex banksi Viereck, 1921. Psyche 28: 72. ♀.

californica (Holmgren). Calif.

Sagaritis californica Holmgren, 1869 (1868). Eug. Resa, pt. 2 (Zool.), sect. 1 (Ins.), p. 418. ♂.

Taxonomy: Townes, 1961. Ent. Soc. Wash., Proc. 63: 112 (note on type specimen).

chlorideae Uchida. Japan, India. Introduced in southern Ga. in 1965 and possibly Ariz. in 1968 (personal commun., J. R. Coulson, 1977), presumably without becoming established. Host: *Phthorimaea operculella* (Zell.)?, *Heliothis armiger* (Hbn.), *H. assulta* Gn. The target species for the release in Ga. was presumably either *Heliothis virescens* (F.), or *H. zea* (Bod.). In some literature the species was misidentified as *Campoletis "perdistinctus"* (Viereck).

Campoletis chlorideae Uchida, 1957. Kyushu Imp. Univ., Ent. Lab., Mushi 30: 29. ♂, ♀.

Taxonomy: Carlson, 1972. Ent. News 83: 77 (as Asian sp., probably undescribed). —Gupta, 1974. Oriental Insects 8: 112-115.

Biology: Gangrade, 1964. Ent. Soc. Amer., Ann. 57: 570-574.

clavata (Provancher). Que. s. to s.e. S. C., w. to n.e. Kans. Host: *Heliothis zea* (Bod.)?

Limneria clavata Provancher, 1875. Nat. Canad. 7: 148. "♀" = ♂.

Sagaritis conjunctiformis Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey Bul. 22: 262. ♂.

Sagaritis xanthotaenius Viereck, 1925; 1926. Canad. Ent. 57 (8): 198 (key); 58 (2): 37. ♀.

Sagaritis latus Viereck, 1925; 1926. Canad. Ent. 57 (8): 198 (key); 58 (2): 37. ♀.

Sagaritis hexagonalis Viereck, 1925; 1926. Canad. Ent. 57 (8): 199 (key); 58 (2): 37; 58 (5): 129. ♂. The lectotype selected (in effect) by Viereck in 1926 (p. 37) does not apply with certainty to the name validated in the 1925 key because of errors in the latter which were corrected in 1926 (p. 129).

Sagaritis beaulieu Viereck, 1925; 1926. Canad. Ent. 57 (8): 199 (key); 58 (2): 38. ♂.

Sagaritis basalis Viereck, 1925; 1926. Canad. Ent. 57 (8): 201 (key); 58 (5): 128. ♂, ♀.

Sagaritis garretti Viereck, 1925; 1926. Canad. Ent. 57 (8): 201 (key); 58 (5): 129. ♀.

Sagaritis nigriscapus var. *rufitrochanteralis* Walley, 1927. Canad. Ent. 59: 232. ♀.

Taxonomy: Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 89 (sex of *clavata* syntypes stated to be male not "female"). —Gahan and Rohwer, 1917. Canad. Ent. 49: 433 (female "lectotype" incorrectly selected for *clavata*). —Barron, 1975. Nat. Canad. 102: 451-452 (valid lectotype selected for *clavata*).

clitellaria (Walley). Southern B. C.

Sagaritis clitellarius Walley, 1927. Canad. Ent. 59: 232. ♂.

compacta (Provancher). Southern B. C., w. Wash.

Limneria compacta Provancher, 1884. In Taylor, Canad. Ent. 16: 91. Nomen nudum.

Limneria compacta Provancher, 1885. Canad. Ent. 17: 116. ♀.

Sagaritis downsi Viereck, 1926. Canad. Ent. 58 (2): 36. [male].

Sagaritis downesi(!) Viereck, 1926. Canad. Ent. 58 (2): 36.

conjuncta (Cresson). Ill.

Mesoleptus conjunctus Cresson, 1864. Ent. Soc. Phila., Proc. 3: 262. ♂, ♀.

distincta (Provancher). Que., N. H., N. Y., Ont., n. Ill., Minn., s. B. C. Host: *Catocala* sp.

Limneria distincta Provancher, 1882. Nat. Canad. 3: 365. ♀. Suppressed as a synonym of *C. tibiator* (Cresson) by Townes (1945); resurrected by Townes and Townes (1951).

Walkley (1958) and Barron (1975) regarded *distincta* as unavailable by virtue of having been replaced by *Cymodusa provancheri* Viereck (which see), but I do not believe they were correct. Walkley treated the name *provancheri* (Viereck) as the valid name for *C. distincta*, overlooking the fact that *provancheri* was preocc. in *Campoletis* by Dalla Torre, 1901.

Sagaritis apicalis Viereck, 1925; 1926. Canad. Ent. 57 (8): 198 (key); 58 (2): 36. ♂.

Taxonomy: Townes, 1945. Amer. Ent. Soc., Mem. 11: 626. —Townes and Townes, 1951. In Muesebeck et al., U. S. Dept. Agr., Agr. Monog. 2: 367. —Walkley, 1958. In Krombein et al., U. S. Dept. Agr., Agr. Monog. 2, sup. 1, p. 59, 60. —Barron, 1975. Nat. Canad. 102: 462.

diversa (Viereck). Southwestern Alta.

Sagaritis diversus Viereck, 1925; 1926. Canad. Ent. 57 (8): 198 (key); 58 (2): 33. ♀.

flavicincta (Ashmead). Mass. and s.e. Ont. w. to s.w. B. C., s. to central Fla., s. Tex., s. Ariz., and s. Calif.; Mexico s. to Uruguay. Host: *Agrotis ipsilon* (Hufn.), *Dargida procincta* (Grt.), *Feltia subterranea* (F.), *Heliothis virescens* (F.), *H. zea* (Bod.), *Lacinipolia stricta*

- (Wlk.), *Pseudaletia unipuncta* (Haw.), *Spodoptera eridania* (Cram.), *S. frugiperda* (J. E. S.), *S. ornithogalli* (Gn.), *Trichoplusia ni* (Hbn.), *Manduca quinquemaculata* (Haw.), *Ostrinia nubilalis* (Hbn.), *Udea ribigalis* (Gn.), *Pieris rapae* (L.).
Limneria flavicincta Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 436. ♂.
Limnerium perdistinctus Viereck, 1905. Kans. Acad. Sci., Trans. 19: 304. ♀.
Amorphota nocturna Viereck, 1905. Kans. Acad. Sci., Trans. 19: 308. ♂.
Limnerium (Campoleptis) prodeniae Viereck, 1911. U. S. Natl. Mus., Proc. 40: 190. ♂, ♀.
Sagaritis trochanteralis Viereck, 1925; 1926. Canad. Ent. 57 (8): 199 (key); 58 (3): 75. ♀.
Sagaritis twinni Viereck, 1925; 1926. Canad. Ent. 57 (8): 200 (key); 58 (3): 72. ♂, ♀.
Sagaritis modestus Viereck, 1925; 1926. Canad. Ent. 57 (8): 201 (key); 58 (5): 126. ♂.

Taxonomy: Carlson, 1972. Ent. News 83: 75-82.

Biology: Luginbill, 1928. U. S. Dept. Agr., Tech. Bul. 34: 61-63 (as *dubitatus*, misdet.). — Vickery, 1929. U. S. Dept. Agr., Tech. Bul. 138: 36-39 (as *dubitatus*, misdet.). — Wene, 1943. Jour. Econ. Ent. 36: 333-334 (as *provancheri*, misdet.). — Grayson, 1944. Jour. Econ. Ent. 37: 712-713 (as *provancheri*, misdet.).

gorhami (Viereck), N. S.

Sagaritis gorhami Viereck, 1925; 1926. Canad. Ent. 57 (8): 199 (key); 58 (3): 73. ♀.

heliae (Ashmead). Va. Host: *Epizuxis aemula* (Hbn.).

Limneria heliae Riley, 1890. In Riley and Howard, U. S. Dept. Agr., Insect Life 3: 158. Nomen nudum.

Limneria heliae Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 194. ♂.

hoppingi (Viereck). Southern B. C., w. Wash.

Sagaritis hoppingi Viereck, 1925; 1926. Canad. Ent. 57 (8): 199 (key); 58 (3): 76. ♂.

imperfecta (Viereck). Ont.?, Sask.

Sagaritis imperfectus Viereck, 1925; 1926. Canad. Ent. 57 (8): 200 (key); 58 (5): 127, 129. ♀.

The lectotype selected (in effect) by Viereck in 1926 (p. 127) does not apply with certainty to the name validated in the 1925 key because of errors in the latter which were corrected in 1926 (p. 129).

incompleta (Viereck). Southeastern Ont.

Sagaritis incompletus Viereck, 1925; 1926. Canad. Ent. 57 (8): 199 (key); 58 (3): 71. ♂.

intermedia (Viereck). Utah, s. B. C., Wash., w. Oreg., n. Calif. Host: *Neuronia* sp.?

Sagaritis intermedius Viereck, 1925; 1926. Canad. Ent. 57 (8): 198 (key); 58 (2): 34. ♂.

Sagaritis trackas Viereck, 1925; 1926. Canad. Ent. 57 (8): 199 (key); 58 (3): 72. ♂.

Sagaritis taylori Viereck, 1925; 1926. Canad. Ent. 57 (8): 201 (key); 58 (5): 126. ♀.

julia (Viereck). Southwestern Alta., s.w. Oreg., n.e. Calif. Host: *Choreutis balsamorrhizella* Bsk., *C. silphella* (Grt.).

Sagaritis julius Viereck, 1925; 1926. Canad. Ent. 57 (8): 200 (key); 58 (5): 125. ♂.

Taxonomy: Townes, 1945. Amer. Ent. Soc., Mem. 11: 627. — Carlson, 1972. Ent. News 83: 76-77.

kingi (Viereck). Southern Sask.

Sagaritis kingi Viereck, 1925; 1926. Canad. Ent. 57 (8): 200 (key); 58 (3): 77; 58 (5): 129. ♀.

linearis (Viereck). Southern Sask.

Sagaritis linearis Viereck, 1925; 1926. Canad. Ent. 57 (8): 200 (key); 58 (3): 76. ♂.

lipomerus (Viereck). Mass., N. Y., Pa., Ont., s. Sask., s. Alta.

Sagaritis lipomerus Viereck, 1925; 1926. Canad. Ent. 57 (8): 198 (key); 58 (2): 32. ♂, ♀.

Sagaritis rufiscapus Viereck, 1925; 1926. Canad. Ent. 57 (8): 199 (key); 58 (3): 75. ♂.

longiceps (Roman). Greenland; n.e. U. S. S. R.

Echphoropsis longiceps Roman, 1926 (1914). Acad. Imp. des Sci. St. Petersburg, Mem. (8) 29 (7): 13. ♂. The copy of Roman's paper in the file of the Systematic Entomology Laboratory is labeled in Roman's handwriting as "Received July 1926, A. Rn." The copy in the library of the U. S. Natl. Museum was received by the Museum on April 8, 1927.

maiata (Viereck). Southern B. C.

Sagaritis maius Viereck, 1925; 1926. Canad. Ent. 57 (8): 200 (key); 58 (5): 125, 129. ♂. The lectotype selected (in effect) by Viereck in 1926 (p. 125) does not apply with certainty to

the name validated in the 1925 key because of errors in the latter which were corrected in 1926 (p. 129). Doubt also stems from the fact that the lectotype was collected in April.

media (Viereck). Ont.

Sagaritis medius Viereck, 1925; 1926. Canad. Ent. 57 (8): 198 (key); 58 (2): 34. ♀.

melanocerus (Viereck). Southern Ont.

Sagaritis melanocerus Viereck, 1925; 1926. Canad. Ent. 57 (8): 200 (key); 58 (5): 123. ♂.

melanomerus (Viereck). N. H. Known only from the lectotype, which was collected in the alpine region of Mt. Washington.

Sagaritis melanomerus Viereck, 1925; 1926. Canad. Ent. 57 (8): 200 (key); 58 (5): 122. ♂.

nigricoxa (Viereck). Southern Alta.

Sagaritis nigricoxa Viereck, 1925; 1926. Canad. Ent. 57 (8): 199 (key); 58 (3): 74. ♀.

nigripes (Cresson). Ill., Sask., Alta.

Mesoleptus nigripes Cresson, 1864. Ent. Soc. Phila., Proc. 3: 267. ♀.

Mesoleptus hostilis Cresson, 1864. Ent. Soc. Phila., Proc. 3: 267. ♂.

nigriscaposa (Viereck). Southern Sask.

Sagaritis nigriscapus Viereck, 1925; 1926. Canad. Ent. 57 (8): 201; 58 (5): 128. ♂.

oxylus (Cresson). Que. w. to w. Wash. s. to s. Fla., Okla., and w. Oreg. Host: *Achatodes zeae* (Harris), *Bellura densa* (Wlk.), *B. obliqua* (Wlk.), *Epiglaea apicata* (Grt.), *Nephelodes emmedonii* f. *violens* Gn., *Oligia fractilinea* (Grt.), *Papaipema lysimachiae* Bird, *P. nebris* (Gn.), *Pseudaleitia unipuncta* (Haw.), *Spodoptera frugiperda* (J. E. S.).

Mesoleptus oxylus Cresson, 1864. Ent. Soc. Phila., Proc. 3: 262. ♂, ♀.

Limneria occidentalis Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 432. ♀.

Limneria nephelodis Riley, 1890. In Riley and Howard, U. S. Dept. Agr., Insect Life 3:

158. Nomen nudum.

Limneria nephelodis Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 194. ♂.

Limneria lawrencei Viereck, 1906. Amer. Ent. Soc., Trans. 32: 178. ♀.

Sagaritis ruficoxalis Viereck, 1916. Biol. Soc. Wash., Proc. 29: 170. ♂, ♀.

Sagaritis nigrisignatus Viereck, 1925; 1926. Canad. Ent. 57 (8): 199 (key); 58 (3): 71. ♂, ♀.

Sagaritis stramineiscapus Viereck, 1925; 1926. Canad. Ent. 57 (8): 201 (key); 58 (3): 126. ♀.

Biology: Lowry, 1927. N. H. Agr. Expt. Sta., Tech. Bul. 34: 22. — Beckwith and Driggers, 1928. N. J. Agr. Expt. Sta., Ann. Rpt. 48: 139. — Beckwith, 1929. N. Y. Ent. Soc., Jour. 37: 415. — Guppy, 1967. Canad. Ent. 99: 100-101.

pacifica (Walley). Western Wash., w. Oreg., n. Calif.

Sagaritis ruficrus var. *pacifica* Walley, 1927. Canad. Ent. 59: 233, 234. ♂.

parasignata (Walley). Southeastern Sask.

Sagaritis parasignatus Walley, 1927. Canad. Ent. 59: 232. ♀.

patsuiketorum (Viereck). Maine w. to s. B. C., s. to w. N. C., n. Ala., N. Mex., n. Utah, and n. Calif.; s. Mexico? Host: *Loxostege sticticalis* (L.), *Phlyctaenia coronata tertialis* (Gn.), *P. extricalis* (Gn.), *Udea rubigalis* (Gn.), *Grapholitha molesta* (Bsk.). In the U. S. Natl.

Museum collection there is a male specimen labeled as being collected in Oaxaca, Mexico by L. O. Howard. It remains to be seen whether I have correctly identified this specimen and whether it is correctly labeled.

Sagaritis patsuiketorum Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey Bul. 22: 262. ♀.

Sagaritis unicolor Viereck, 1925; 1926. Canad. Ent. 57 (8): 198 (key); 58 (2): 33. ♂, ♀.

Sagaritis lipopus Viereck, 1925; 1926. Canad. Ent. 57 (8): 198 (key); 58 (2): 35. ♀.

Sagaritis cingulatus Viereck, 1925; 1926. Canad. Ent. 57 (8): 198 (key); 58 (2): 35. ♂.

Sagaritis melanostomus Viereck, 1925; 1926. Canad. Ent. 57 (8): 199 (key); 58 (3): 71. ♀.

plena (Provancher). Que., s.w. Alta.

Limneria plena Provancher, 1875. Nat. Canad. 7: 146. ♀.

Sagaritis chrysitali Viereck, 1925. Canad. Ent. 57 (8): 200 (key); 58 (3): 77. ♀.

Taxonomy: Barron, 1975. Nat. Canad. 102: 532-533 (*plena* holotype).

pyralidis Walley. Que. s. to e. S. C., w. to s. Sask. and n.w. Ark. Host: *Tetralopha aplastella* Hulst, *Acrobasis* sp. on *Myrica*, *A. betulella* Hulst, *A. caryivorella* Rag., *A. comptoniella*

Hulst, *A. juglandis* (LeB.), *Jacoma nyssaecolella* (Dyar), *Meroptera pravella* (Grt.), *Nephopteryx subfuscella* (Rag.), *Salebriaria engeli* (Dyar), *Aristotelia* sp.
Campoletis pyralidis Walley, 1970. Canad. Ent. 102: 1528. ♂, ♀.

Morphology: Finlayson, 1967. Canad. Ent. 102: 1257-1258 (as *Campoletis* n. sp.).

rufosignata (Viereck). Southern Ont.

Sagaritis rufosignatus Viereck, 1925; 1926. Canad. Ent. 57 (8): 198 (key); 58 (2): 34. ♂.
septentrionalis (Viereck). Mont., s.w. Alta., and s. B. C., s. to central Utah, w. Nev., and n.

Calif. Host: *Euxoa pallipennis* Sm.

Sagaritis septentrionalis Viereck, 1925; 1926. Canad. Ent. 57 (8): 200 (key); 58 (3): 76. ♀.
Sagaritis aequalis Viereck, 1925; 1926. Canad. Ent. 57 (8): 200 (key); 58 (5): 122, 129. ♂, ♀.

The correction made by Viereck in 1926 (p. 129) suggests that the lectotype which he in effect selected in 1926 (p. 124) for *S. laevis* Viereck would apply to the name *aequalis* as validated in the 1925 key.

Sagaritis laevis Viereck, 1925; 1926. Canad. Ent. 57 (8): 200 (key); 58 (5): 124, 129. ♂, ♀.

The correction made by Viereck in 1926 (p. 129) suggests that the lectotype which he in effect selected in 1926 (p. 122) for *S. aequalis* Viereck would apply to the name *laevis* as validated in the 1925 key.

Sagaritis ruficrus Viereck, 1925; 1926. Canad. Ent. 57 (8): 201 (key); 58 (5): 127. ♂.

Sagaritis approximans Walley, 1927. Canad. Ent. 59: 231. ♂.

Sagaritis vierecki Walley, 1927. Canad. Ent. 59: 233. ♂, ♀.

signata (Viereck). Southern B. C.

Sagaritis signatus Viereck, 1925; 1926. Canad. Ent. 57 (8): 199 (key); 58 (3): 72. ♀.

sonorensis (Cameron). Md., s. Ill., n. Colo., s.w. Alta., s.e. Wash., and n.w. Oreg., s. to e. S. C., n. Fla., s. Tex., s. Ariz., and s. Calif.; Cuba and Mexico s. to Peru. Host: *Autographa californica* (Spey.), *Heliothis phorospila* (G. and R.), *H. virescens* (F.), *H. zea* (Bod.), *Peridroma saucia* (Hbn.), *Plathypena scabra* (F.)?, *Spodoptera exigua* (Hbn.), *Trichoplusia ni* (Hbn.), *Anthocaris midea* (Hbn.). In the earlier biological papers cited below, *sonorensis* was misidentified as *perdistincta*, now a synonym of *flavicincta* (which see). My 1972 paper was directed at eliminating the taxonomic confusion of *sonorensis* with *flavicincta*, but the unusual pattern of the distribution known for *sonorensis* in North America and the existence in the Canadian National Collection of a series of *sonorensis* specimens labeled as collected at an altitude of 7500 ft. (at Sunshine Lodge) in Banff Natl. Park, Alta. seem to indicate the need for further taxonomic study in connection with studies of host relations, etc.

Limneria sonorensis Cameron, 1886. Biol. Cent.-Amer., Hym., v. 1, p. 307. [female].

Limnerium (Angitia) websteri Viereck, 1910. U. S. Natl. Mus., Proc. 38: 382. ♀.

Taxonomy: Carlson, 1972. Ent. News 83: 75-82.

striatipes (Ashmead). N. H., N. Mex. The type-locality (not mentioned by Ashmead) is "Top of [Las Vegas] range, [N. Mex.], betw[een] Sapello and Pecos Rivers, Ab[ou]t 11,000 ft."

[elevation]." Townes and Townes (1951) indicated that the species is also known from Mt. Madison, N. H.

Limneria striatipes Ashmead, 1901. *Psyche* 9: 148. ♀ (♂ misdet.).

taeniolata (Viereck). N. Mex. Known only from the holotype, which was collected at Beulah.

Limnerium taeniolata Viereck, 1903. In Skinner, Amer. Ent. Soc., Trans. 29: 92. ♂.

tibialis (Viereck). Southern B. C., w. Wash.

Sagaritis tibialis Viereck, 1925; 1926. Canad. Ent. 57 (8): 200 (key); 58 (3): 77. ♀.

tibiator (Cresson). Northern N. Y. s. to s.w. S. C. and n. Ala., w. to s.e. Iowa and n.e. Kans.

Host: *Rhodophora gaurae* (J. E. S.), geometrid on apple?

Mesoletus tibiator Cresson, 1864. Ent. Soc. Phila., Proc. 3: 259. ♂.

Ischnoscopus taeniatus Viereck, 1905. Kans. Acad. Sci., Trans. 19: 305. ♀.

yakutatensis (Ashmead). Southeastern Alaska.

Ischnoscopus yakutatensis Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 236. ♂, ♀.

Genus CALLIDORA Foerster

Pantropa Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 155.

Type-species: *Limneria albovineta* Holmgren. By subsequent monotypy from inclusion by Townes, 1970. The designation of Townes (1970) reads: "(*Callidora annellata* Thomson) = *albovineta* Holmgren." Article 68 (c) of the International Code of Zoological Nomenclature indicates that *albovineta* is the type-species by monotypy in spite of the intentions of Townes, which apparently were that it be *annellata*.

Callidora Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 157.

Type-species: *Callidora annellata* Thomson. Desig. by Viereck, 1914 from two species included by Thomson, 1887. The type-species is regarded as a synonym of *C. albovineta* (Holmgren).

Neocallidora Ozols, 1966. Latv. Ent. 11: 49.

Type-species: *Campoplex analis* Gravenhorst. Monotypic and orig. desig.

This is a small Holarctic and Oriental genus. No hosts are known.

Revision: Tigner, 1969. Mich. Ent. 2: 36-39 (spp. of world).

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 165-166.

surata Tigner. Central Tenn., s.w. N. Dak., central S. Dak., s. Tex., e. Wyo., s. Alta., n. Utah.

Callidora surata Tigner, 1969. Mich. Ent. 2: 39. ♂, ♀.

tegularis Tigner. Northeastern Pa., s.e. Mich.

Callidora tegularis Tigner, 1969. Mich. Ent. 2: 38. ♂, ♀.

Genus CYMODUSA Holmgren

Cymodusa Holmgren, 1859 (1858). Svenska Vetensk.-Akad., Ofvers. af ... Forhandl. 15: 325.

Type-species: *Cymodusa leucocera* Holmgren. Monotypic and orig. desig.

Apparently the name *leucocera* is validated in this work by virtue of article 16 (a) (vi) of the Internat'l. Code of Zool. Nomenclature, even though Holmgren indicated that he knew five Scandinavian species of *Cymodusa*.

Thersitia Schmiedeknecht, 1907. Hym. Mitteleuropas, p. 598.

Type-species: *Thersitia egregia* Schmiedeknecht. Monotypic. The type-species is regarded as a synonym of *leucocera* Holmgren.

This is a Neotropic, Holarctic, and Oriental genus of moderate size.

Revision: Gupta and Gupta, 1974. Oriental Insects 8: 1-14 (Oriental spp.).

distincta (Cresson). Maine w. to s. B. C., s. to n. Ga., n.e. Kans., Colo., and w. Oreg.

Mesoletus subrubidus Cresson, 1864. Ent. Soc. Phila., Proc. 3: 264. ♂.

Mesoletus distinctus Cresson, 1864. Ent. Soc. Phila., Proc. 3: 266. ♀.

Limnerium vigilis Viereck, 1906. Amer. Ent. Soc., Trans. 32: 179. ♂.

Idechthis biconjunctus Viereck, 1906. Amer. Ent. Soc., Trans. 32: 180. ♂.

Campoplex (Nepiera) amasecontorum Viereck, 1917 (1916). Conn. State Geol. and Nat.

History Survey Bul. 22: 266. ♂.

- Cymodusa plesius* Viereck, 1925; 1926. Canad. Ent. 57 (7): 180 (key); 58 (1): 4. ♀.

Cymodusa melanocera Viereck, 1925; 1926. Canad. Ent. 57 (7): 180 (key); 58 (1): 3. ♂.
Cymodusa gracilicornis Viereck, 1925; 1926. Canad. Ent. 57 (7): 180 (key); 58 (1): 4. ♀.
nigripes (Viereck). N. B., N. S.
Neonortonia nigripes Viereck, 1925. Canad. Ent. 57 (7): 179 (key); 57 (12): 300. ♂.
Formerly preocc. in *Campoplex* by Gravenhorst, 1829 and Brulle, 1846.
Neonortonia laevissima Viereck, 1925. Canad. Ent. 57 (7): 179 (key); 57 (12): 301. ♂.
- Taxonomy: Townes, 1945. Amer. Ent. Soc., Mem. 11: 598 (syn. and first revisor choice of names). —Walkley, 1958. In Krombein *et al.*, U. S. Dept. Agr., Agr. Monog. 2, sup. 1, p. 59 (*nigripes* suppressed because of secondary homonymy). —Walkley, 1967. In Krombein *et al.*, U. S. Dept. Agr., Agr. Monog. 2, sup. 2, p. 201 (transfer to *Cymodusa* as *laevissima*).
partis (Viereck). Que.
Campoplex (Diadegma) partis Viereck, 1925; 1926. Canad. Ent. 57 (9): 227 (key); 58 (11): 280. ♂.
- provancheri* Viereck. N. S.
Cymodusa provancheri Viereck, 1925; 1926. Canad. Ent. 57 (7): 180 (key); 58 (1): 4. ♀. In 1926 (p. 4) Viereck, in effect, selected a lectotype for *provancheri* and, at the same place, wrote: "(*Limneria*) *Cymodusa provancheri* new name = *Cymodusa distincta* Provancher, not Cresson." Walkley (1958) treated *provancheri* as a replacement name for *Limneria distincta* Provancher, and Barron (1975) concurred with Walkley, stating that "Viereck's designation of a holotype for *provancheri* is disallowed (Int. Code Zool. Nom. art. 72 (d))." Article 72 (d), however, has no bearing on this case because Viereck did not originally (i.e. 1925, p. 180) propose *provancheri* expressly as a replacement for any prior name. Moreover, my knowledge of Viereck's idiosyncrasies leads me to believe that he most likely proposed the name *provancheri* for what he thought to be Provancher's misidentification of *distincta* (Cresson). Viereck frequently used the term "new name" in that context. Although Viereck was very inconsistent, I regard it as unlikely that he would have regarded a specimen that Provancher never saw as being the holotype if he had intended the name *provancheri* to be a replacement name (cf. Viereck's proposal of the replacement name *Amelocotus taeniopus*). Also see discussion under *Camptolepis distincta* (Provancher).

Taxonomy: Walkley, 1958. In Krombein *et al.*, U. S. Dept. Agr., Agr. Monog. 2, sup. 1, p. 59, 60. —Barron, 1975. Nat. Canad. 102: 462.

Genus CYMODUSOPSIS Viereck

Cymodusopsis Viereck, 1912. U. S. Natl. Mus., Proc. 43: 588.

Type-species: *Cymodusopsis aristoteliae* Viereck. Monotypic and orig. desig.

This is a small Neotropic and Nearctic genus.

- aristoteliae* Viereck. N. J., Mo., S. Dak., n.e. Kans. Host: *Aristotelia pudibundella* (Zell).
Cymodusopsis aristoteliae Viereck, 1912. U. S. Natl. Mus., Proc. 43: 588. ♂, ♀.

Genus SPUDASTICA Foerster

Spudastica Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 155.

Type-species: *Spudastica petiolaris* Thomson. By subsequent monotypy from inclusion by Thomson, 1887. The type-species is regarded as a synonym of *kriechbaumeri* (Bridgman).

Townes (1970) indicated that this Holarctic genus appears to be represented by one species which has a number of geographic variants. However, there appear to be at least two distinct species in North America. I have seen specimens from Mass., N. J., Md., and Va. which appear to represent an undescribed species which apparently occurs in swampy areas. *S. kriechbaumeri* has been reared from species of the noctuid genus *Orthosia*.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 169.

canadensis Walley. Que., Ont., Colo. Ecology: A specimen which seems to agree with Walley's description of *canadensis* was reared from its cocoon which was collected under a stone at Garden of the Gods, El Paso Co., Colo.

Spudastica canadensis Walley, 1944. Canad. Ent. 76: 157. ♂, ♀.

Genus MELOBORIS Holmgren

Meloboris Holmgren, 1859 (1858). Svenska Vetensk.-Akad., Ofvers. af ... Forhandl. 15: 326.

Type-species: *Meloboris gracilis* Holmgren. Monotypic. Apparently the name *gracilis* is validated in this work by virtue of article 16 (a) (vi) of the Internat'l. Code of Zool. Nomenclature, even though Holmgren indicated that he knew three Scandinavian species of *Meloboris*.

Pseudocymodusa Habermehl, 1922. Konowia 1: 105.

Type-species: *Cymodusa elachistae* Brischke. Monotypic. The type-species is regarded as a synonym of *M. alternans* (Gravenhorst).

Anoixis Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 180. N. syn.

Type-species: *Anoixis alophus* Townes. Monotypic and orig. desig.

This is a small Holarctic genus. There are a number of undescribed Nearctic species. Apparently there are no host records. Townes (1965, 1970) treated *Nepiera* as a synonym of *Meloboris*, but I believe *Nepiera* is sufficiently different from *Meloboris* to warrant separation of the two.

Taxonomy: Townes, 1965. Polskie Pismo Ent. 35: 413-414. —Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 172-174, 180-181. —Horstmann, 1970. Bayer. Ent., Nachrichtenbl. 19: 81-82, 83.

alopha (Townes), n. comb. N. H., R. I., s. Ont., Mich. I have seen a pair of specimens in the Canadian Natl. Collection which have the nervellus intercepted by the discoidella (cf. Townes' fig. 170).

Anoixis alophus Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 180. ♂, ♀.

Genus NEPIERA Foerster

Asinamora Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 155. N. syn.

Type-species: *Ichneumon collector* Thunberg. By subsequent monotypy from inclusion by Townes, Momoi, and Townes, 1965. The designation of Townes, Momoi, and Townes (1965) reads: "(*Limneria concinna* Holmgren) = *collector* Thunberg." Article 68 (c) of the Internat'l. Code of Zool. Nomenclature indicates that *collector* is the type-species by monotypy in spite of the intentions of Townes, Momoi, and Townes, which presumably were that it be *concinna*.

Nepiera Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 156.

Type-species: *Limneria concinna* Holmgren. By subsequent monotypy from inclusion by Thomson, 1887. The type-species is regarded as a synonym of *N. collector* (Thunberg).

This is a genus of small to moderate size. It is known to me only from the Neotropic, Holarctic, and Australian Regions, but the placement of the Ethiopian species *Limneria helminda* Holmgren in *Meloboris* by Townes and Townes (1973) would presumably indicate that *helminda* is a species of *Nepiera*.

Taxonomy: Townes, 1965. Polskie Pismo Ent. 35: 414. —Townes, Momoi, and Townes, 1965. Amer. Ent. Inst., Mem. 5: 291. —Horstmann, 1970. Bayer. Ent., Nachrichtenbl. 19: 81-82, 83. —Townes and Townes, 1973. Amer. Ent. Inst., Mem. 19: 155.

basilaris (Provancher). Que.

Limneria basilaris Provancher, 1875. Nat. Canad. 7: 147. "♂" = ♀. The specimen indicated as being the lectotype by Gahan and Rohwer (1917) and the holotype by Barron (1975) was incorrectly stated by them as being a male. My notes on the holotype indicate that is a female of the genus *Nepiera*, and that it is similar to and perhaps conspecific with *benevola* Gahan. My notes also indicate that the male in the Provancher collection does not have the hind coxa black; it thereby fails to agree with Provancher's original description. It represents an undescribed species of the genus *Meloboris*. In the U. S.

Natl. Museum collection there is a female specimen, apparently conspecific with the latter, which was identified as "*Nepiera basilaris*" by Dr. H. K. Townes in 1942. I presume that the distribution given for *basilaris* by Townes and Townes (1951) pertains to that undescribed species of *Meloboris*.

benevola Gahan. Southern N. Mex., n. Utah, n.e. Oreg. Host: *Colias eurytheme* Bdv.

Nepiera benevola Gahan, 1914. U. S. Natl. Mus., Proc. 48: 157. ♂, ♀.

curticauda (Viereck). Southern B. C., w. Wash., w. Oreg., n. Calif.

Campoplex (Diadegma) curticauda Viereck, 1925; 1926. Canad. Ent. 57 (8): 227 (key); 58 (11): 280. ♀.

fuscifemora Graf. Western Wash. s. to s. Calif.; central Mexico. Host: *Phthorimaea operculella* (Zell.), *Argyrotaenia citrana* (Fern.), *Heliothis zea* (Bod.), *Peridroma saucia* (Hbn.), *Spodoptera exigua* (Hbn.), *Trichoplusia ni* (Hbn.), *Cynthia cardui* (L.).

Nepeira(?) benevola var. *fuscifemora* Graf, 1917 (Feb.). U. S. Dept. Agr., Bul. 427: 46, 47. ♀. In the first line of the paragraph on p. 46 headed "*Nepeira benevola* var. *fuscifemora* Cushm." Graf said: "this parasite (fig. 44)." Figure 44 is on p. 47, and the fact that the name in its legend is "*Nepeira benevola*" (omitting var. *fuscifemora*) is of no significance. Walkley (1966) attempted to show that Graf figured *benevola* rather than *fuscifemora* because "the figure shows the hind femora with the apices and bases dark," which she asserted "is true of *benevola* but not of *fuscifemora*." Walkley failed to observe that Graf figured the inner surfaces of the femora, not the outer ones, and the pattern of coloration shown in Graf's figure is altogether typical for the inner femoral surfaces of *fuscifemora*, but has not been observed by me in specimens of *benevola*.

Nepiera benevola var. *fuscifemora* Gahan, 1917 (May). U. S. Natl. Mus., Proc. 53: 208. ♂, ♀. Preocc. by Graf, 1917 (Feb.).

Taxonomy: Walkley, 1966. Ent. Soc. Wash., Proc. 68: 156.

marginata (Provancher). Que., w. to w. Wash., s. to w. N. C., Mo., s. N. Mex., and s. Calif. Host: *Actebia fennica* (Tausch.), *Graphiphora smithi* (Snell), *Pseudaletia unipuncta* (Haw.), *Cynthia cardui* (L.), *Vanessa atalanta* (L.), *Solenobia* sp.

Campoplex marginatus Provancher, 1874. Nat. Canad. 6: 146. ♂, ♀.

Angitia (Diocetes) unicus Viereck, 1926. Canad. Ent. 58 (7): 182. ♂.

Genus PHOBOCAMPE Foerster

Hypothereutes Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 156.

Type-species: *Hypothereutes(?) geometrae* Ashmead. By subsequent monotypy from inclusion by Ashmead, 1898.

Phobocampe Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 156.

Type-species: *Campoplex crassiusculus* Gravenhorst. Desig. by Viereck, 1914 from eight species included by Thomson, 1887.

Phobocampa Thomson, 1887. Opusc. Ent. 11: 1120. Emend.

This is a Neotropic, Holarctic, and Oriental genus of moderate size. It is hoped that completion of the task of preparing the present work will enable me to soon finish a long dormant revision of the Nearctic species. My partially completed manuscript treats 21 Nearctic species (including

one not indigenous), but several years ago I received specimens of one or two additional species. The number of Palearctic species appears to be somewhat smaller. The small amount of Neotropic material I have seen included four species.

Most species normally parasitize only macrolepidoptera which do not conceal themselves when feeding. Many of the new host records which are given here are from specimens deposited in the Canadian National Collection by the Canadian Forest Insect Survey.

Taxonomy: Finlayson, 1975. Ent. Soc. Canada, Mem. 94: 56-62 (final-instar larvae).

Morphology: Finlayson, 1964. Canad. Ent. 96: 1155-1158 (caudal appendages of some final-instar larvae).

bicingulata bicingulata (Gravenhorst). Newfoundland (Labrador), s.w. Alta., w. N. W. T., Yukon, n.w. B. C., interior Alaska; n.w. Asia (U. S. S. R.), Europe. Specimens agreeing in coloration with this subspecies also occur in southern B. C. (as do intermediate specimens), but because they are not the preponderant form there, southern B. C. is treated as being within the range of the subspecies *bicingulatus vernalis* (Viereck). An undescribed subspecies is known from Colo., N. Mex., and Ariz., and *bicingulata nipponensis* Momoi is known from Japan.

Campoplex bicingulatus Gravenhorst, 1829. Ichn. Europaea, v. 3, p. 527. ♂, ♀.

Phobocampe bicingulata f. *ruficoxa* Aubert, 1962. Rev. Franc. d'Ent. 29: 146. ♂, ♀. N. syn.

bicingulata vernalis (Viereck), n. status. N. S. w. to n.e. Alta. and s. B. C., s. to s.w. S. C., n.

Ala., e. Nebr., s. Sask., s.e. Alta., and s. Calif. **Ecology:** The only rearings have been from hosts (mostly Noctuidae) feeding on trees, but it is presumed that these rearings were from ectones between forest and open areas; the habitat of *b. vernalis* appears to tend more toward the latter. The fact that *b. vernalis* is by far our most commonly collected form of *Phobocampe* appears to relate in part to the fact that it occurs in open weedy or grassy areas. Host: *Anomogyna* sp., *Lithophane* sp., *Palthis angulalis* (Hbn.), *Syngrapha rectangularis* (Ottol.), *Ichthyurus* sp., *Eupithecia fletcherata* Tay.

Campoplex (Hypothereutes) vernalis Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey Bul. 22: 264. ♀. Incorrectly suppressed as a synonym of *elyi* (Viereck) by Townes and Townes (1951).

Campoplex (Hyposoter) stenus Viereck, 1925; 1926. Canad. Ent. 57 (8): 204 (key); 58 (9): 220. ♂.

Campoplex (Amelocotonus) speciosus Viereck, 1925; 1926. Canad. Ent. 57 (9): 223 (key); 58 (10): 257. ♀.

Taxonomy: Townes and Townes, 1951. In Muesebeck et al., U. S. Dept. Agr., Agr. Monog. 2: 376.

clisiocampae (Weed). N. S. w. to central Alta. and s. B. C., s. to n.w. S. C., n.w. Ark., and n. Calif. Host: *Malacosoma americanum* (F.), *M. californicum pluviale* (Dyar), *M. disstria* Hbn., *Datana ministra* (Drury), *D. perspicua* (G. and R.), *Heterocampa* sp., *Schizura concinna* (J. E. S.), *S. ipomeae* (Dbldy.), *S. semirufescens* (Wlk.), *S. unicornis* (J. E. S.), *Symmerista canicosta* Francl., *Paonias* sp., *Smerinthus jamaicensis* (Drury), *Sphinx* sp., *Operophtera brumata* (L.), *Actias luna* (L.). Specimens reared from *Operophtera brumata* which I have seen were abnormal, and it seems unlikely that it is a suitable host for *clisiocampae*.

geometrae (Ashmead). N. S. w. to s. B. C., s. to n. Ga., n. Ala., n.e. Kans., w. S. Dak. and n.e. Calif. Host: *Alsophila pomataria* (Harris), *Biston betularia cognataria* (Gn.), *Caripeta divisata* Wlk., *Erranis tiliaria tiliaria* (Harris), *E. tiliaria vancouverensis* Hulst, *Paleacrita vernata* (Pack.). This species has been reared more frequently from *Erranis tiliaria* than from all other hosts combined.

Hypothenemus (?) *geometrae* Ashmead, 1898. In Dimmock and Ashmead, Ent. Soc. Wash., Proc. 4: 167. ♂.

Campoplex (*Hypothenemus*) *concisis* Viereck, 1925; 1926. Canad. Ent. 57 (8): 204 (key); 58 (9): 224. ♂, ♀.

Campoplex (*Ischnoscopus*) *angustus* Viereck, 1925; 1926. Canad. Ent. 57 (9): 223 (key); 58 (8): 198. ♀.

largo (Viereck), revised status. Que. w. to s. B. C., s. to w. N. C., Colo., and w. Oreg. Host: *Trichopolites lobidactylus* (Fitch). Suppressed as a synonym of *geometrae* (Ashmead) by Townes (1945).

Campoplex (*Ischnoscopus*) *largo* Viereck, 1925; 1926. Canad. Ent. 57 (9): 223 (key); 58 (8): 198. ♀.

Taxonomy: Townes, 1945. Amer. Ent. Soc., Mem. 11: 647.

pallida (Cushman). Mass., Conn., N. Y., N. J., s.e. Pa., Md. Host: *Heterocampa guttivitta* (Wlk.). *Callidora pallida* Cushman, 1922. U. S. Natl. Mus., Proc. 60: 20. ♀.

pallipes (Provancher). Que. w. to n.w. B. C., s. to e. N. C., Iowa, s. Man., N. Mex., Ariz., and n. Calif. Host: Noctuid, *Syngrapha* sp., *S. alia interalia* (Ottol.), *S. rectangula nargenta* (Ottol.), *S. selecta* (Wlk.), *Orygia antiqua* (L.), *O. definita* (Pack.), *O. leucostigma* (J. E. S.), *O. pseudotsugata* McD.

Limneria pallipes Provancher, 1875. Nat. Canad. 7: 147. ♀.

Limnerium pallidipes Dalla Torre, 1901. Cat. Hym., v. 3, p. 101. Emend.

Campoplex (*Campoplex*) *arcanus* Viereck, 1925; 1926. Canad. Ent. 57 (9): 226 (key); 58 (6): 146. ♀.

tempestiva (Holmgren). Europe. Introduced in N. S. in 1955, 1957, 1961, and 1962 without becoming established. Host: *Operophtera brumata* (L.). The host cited was the target species for the introduction in N. S.; I have seen *tempestiva* specimens which were reared from other geometrid hosts, but none of the latter occur in North America. This species has frequently been misidentified as *crassiuscula* (Gravenhorst), the name under which the introductions in N. S. have been reported (e.g. McGugan and Coppel, 1962; Embree, 1971). Voucher material I have seen would appear to indicate that releases of *tempestiva* in N. S. were accompanied by releases of about equal numbers of an undescribed species of *Phobocampe* which I also know as a parasite of *Lymantria dispar* (L.) and which has been misidentified as *P. disparis* (Viereck) in Japan (see *unicincta* [Gravenhorst]).

Limneria tempestiva Holmgren, 1860 (1858). Svenska Vetensk.-Akad. Handl. (n. f.) 2 (8): 94. ♂, ♀.

Taxonomy: Aubert, 1972. Ent. Scand. 3: 149 (lectotype selection).

Biology: Wylie, 1960. Entomophaga 5: 120-121 (as "crassiuscula," presumably pertaining to spp., including *tempestiva*). — McGugan and Coppel, 1962. Commonwealth Inst. Biol.

Control, Tech. Commun. 2: 66, 171. — Embree, 1971. Commonwealth Inst. Biol. Control, Tech. Commun. 4: 170, 172, 174.

unicincta (Gravenhorst). Southeastern N. H., n.w. Mass., e.-central N. Y., n.e. Pa.; Europe.

Introduced. Host: *Lymantria dispar* (L.). The native range of this species extends into eastern Europe, but *unicincta* is not known to me from Asia or from any European locality east of Moscow, U. S. S. R. It has been recorded as a parasite of *Lymantria dispar* in Japan (as *Phobocampe disparis*), but those records pertain to the undescribed species referred to above in the discussion of *P. tempestiva*, and they probably also pertain in part to *Hyposoter vierecki* Townes. I suspect that *unicincta* does not occur in Japan. Muesebeck and Parker (1933) found *unicincta* to be a univoltine species, this fact apparently explaining the relative ease with which it was established in the United States.

Campoplex unicinctus Gravenhorst, 1829. Ichn. Europaea, v. 3, p. 529. ♀ (♂ misdet.).

Lectotype here selected as the female in the Gravenhorst collection labeled as lectotype by Townes in 1964 and by me in 1969 and bearing Gravenhorst's small label marked "f" (see Townes, 1965, p. 405). In his description of *confusa*, Thomson (1887) indicated that he regarded Gravenhorst's description of the *C. unicinctus* male as applying to *confusa*, and Gravenhorst's description of the male seems to agree with Thomson's conclusion.

Hyposoter disparis Viereck, 1911. U. S. Natl. Mus., Proc. 40: 478. ♂, ♀. Lectotype here selected as the female in the U. S. Natl. Museum collection bearing Viereck's identification label and labels reading: "Gip Moth Lab No. 529 —07; 20 Aug.; Type No. 13074 U. S. N. M." Muesebeck and Parker (1933, p. 335) saw notes which indicated that the type locality is probably Kiev, U. S. S. R.

Taxonomy: Thomson, 1887. Opusc. Ent. 11: 1122. — Townes, 1965. Polskie Pismo Ent. 35: 403-407 (labeling in the Gravenhorst collection of Ichneumonidae).

Biology: Howard and Fiske, 1911. U. S. Dept. Agr. Bur. Ent., Bul. 91: 191. — Howard, 1914. Ent. Soc. Amer., Ann. 7: 87 (establishment). — Burgess and Crossman, 1929. U. S. Dept. Agr., Tech. Bul. 86: 49-54. — Muesebeck and Parker, 1933. Jour. Agr. Res. 46: 335-347. — Semevskiy, 1973. Ent. Obozr. 52: 44 (probably the sp. misdet. as *pulchella* [Thomson]).

Genus TRANOSEMA Foerster

Tranosema Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 157.

Type-species: *Tranosema arenicola* Thomson. Desig. by Viereck, 1914 from three species included by Thomson, 1887.

This is a small Holarctic genus. I know only two species, both of which have Holarctic distributions. The species *Limneria interrupta* Holmgren and *Campoplex (Angitia) rosanae* Viereck, which were placed in *Tranosema* by Townes (1970), are here regarded as species of *Diadegma* (*rosanae* being a synonym of *D. acronyctae* [Ashmead]).

Taxonomy: Walley, 1966. Canad. Ent. 98: 832-835 (treatment of the two identified spp. occurring in the Nearctic Region). — Townes, 1970 (1969). Amer. Ent. Inst. Mem. 13: 176-177.

rostrale rostrale (Brischke). Que. w. to B. C., s. to n. N. Y., n. Mich., n. Minn., w. Mont., and w. Wash.; Europe. Host: *Malacosoma californicum pluviale* Dyar?, *Aphelia alieniana* (Fern.), *Archips argyrospilus* (Wlk.), *A. rosanus* (L.), *Choristoneura fumiferana* (Clem.), *C. lambertiana* (Bsk.). *T. rostrale abulum* Momoi (1968) is known from Japan.

Limneria rostralis Brischke, 1880. Naturforsch. Gesell. Danzig, Schr. (n. f.) 4: 150. ♂, ♀.

Tranosema arenicola Thomson, 1887. Opusc. Ent. 11: 1138. ♂, ♀.

Tranosema arenicolum Dalla Torre, 1901. Cat. Hym., v. 3, p. 107. Emend.

Campoplex (Angitia) cacoeciae Viereck, 1924. Canad. Ent. 56: 76. ♀. N. syn.

Taxonomy: Momoi, 1968. Kontyu 36: 180-181. — Aubert, 1971. Soc. Ent. de Mulhouse, Bul. 27: 38 (syn.).

Biology: Zwoelfer, 1963. Ztschr. f. Angew. Ent. 51: 348. — Paradis and Leroux, 1965. Ent. Soc. Canada, Mem. 43: 49.

taeniopus (Viereck). Newfoundland (s. Labrador), P. E. I., Que., Ont., s.e. Alaska, s.e. B. C., w. Wash.; Europe.

Hypothereutes annulipes Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 236. ♀. Formerly preocc. in *Campoplex* by Cresson, 1864.

Campoplex (Ameloclonus) taeniopus Viereck, 1925. Canad. Ent. 57 (9): 223. N. name for *H. annulipes* Ashmead.

Genus DOLOPHRON Foerster

Dolophron Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 155.

Type-species: *Limneria pedella* Holmgren. Monotypically included and desig. by Townes, 1970.

Townes (1970) said that this is a Holarctic genus including *pedella* and two undescribed species, one North American and one Japanese. *D. pedella* is the only species known to me; I have in the past identified as *Dolophron* a few Nearctic specimens which were sent to me for identification, but now regard those specimens as representing an unidentified species of *Synetaeris*.

pedella (Holmgren). Europe. Introduced in N. H. in 1931 without becoming established. Host: *Heterarthrus nemoratus* (Fall.). According to Dowden (1941) only 12 mated females were released in the attempt to establish *pedella* in N. H. on *H. nemoratus*.

Limneria pedella Holmgren, 1860 (1858). Svenska Vetensk.-Akad. Handl. (n. s.) 2 (8): 73. ♂, ♀.

Transoema pedellum Dalla Torre, 1901. Hym. Cat., v. 3, p. 107. Emend.

Synetaeris albicoxis Schmiedeknecht, 1909. Opusc. Ichn., v. 4, p. 1670. ♀.

Taxonomy: Cushman, 1933. U. S. Natl. Mus., Proc. 82 (14): 16 (variation). —Hinz, 1964.

Entomophaga 9: 71 (lectotype selected). —Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 175 (syn.).

Biology: Dowden, 1941. U. S. Dept. Agr., Tech. Bul. 757: 8, 9, 11, 22-25, 51.

Genus SYNETAERIS Foerster

Synetaeris Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 155.

Type-species: *Synetaeris heteropus* Thomson. Desig. by Viereck, 1914 from three species included by Thomson, 1887.

This is a small genus; it is known to me from the Holarctic and Ethiopian Regions. There are a number of unidentified or undescribed Nearctic species, some of which will probably prove to be Holarctic species that have already been described from Europe or Asia.

hyalina (Provancher), n. comb. Que.

Limneria hyalina Provancher, 1874. Nat. Canad. 6: 147. ♀ (♂ misdet.). Townes (1945) and Barron (1975) have applied this name to *Campoplex crassatus* (Viereck), contrary to the valid lectotype selection of Gahan and Rohwer (1918). Barron's rejection of the Gahan and Rohwer lectotype because of what he regarded as lack of agreement with the original description has no validity. Because Provancher stated that he had two females and one male, lack of agreement with the original description does not prove that the Gahan and Rohwer lectotype was not one of Provancher's syntypes. Gahan and Rohwer (1918) evidently thought the specimen agreed sufficiently well with the description to have been a syntype, and their lectotype selection stands as valid unless evidence of some other sort is found to prove that the specimen they selected was not a syntype.

Taxonomy: Gahan and Rohwer, 1918. Canad. Ent. 50: 28. —Townes, 1945. Amer. Ent. Soc., Mem. 11: 596-597. —Barron, 1975. Nat. Canad. 102: 484.

tenuifemur (Walley). N. B., Ont., e. B. C. Host: *Choristoneura fumiferana* (Clem.).

Synetaeris tenuifemur Walley, 1963. Canad. Ent. 95: 23. ♂, ♀.

Biology: Miller and Renault, 1963. Canad. Ent. 95: 24-28.

Genus PHILOSITUS Townes

Philositus Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 187.

Type-species: *Philositus encophorus* Townes. Monotypic and orig. desig.

A single species is known.

encophorus Townes. Maine, Conn., N. Y., N. J., Pa., s.e. Va., Ont. w. Wash. Host: *Tetralopha* sp., *T. aplastella* Clem., lepidopteran on poplar.

Philositus encophorus Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 188. ♂, ♀.

Taxonomy: Barron and Bisdee, 1977. Ent. Soc. Amer., Ann. 70: 48-50 (final-instar larva).

Genus MACRUS Gravenhorst

Macrus Gravenhorst, 1829. Ichn. Europaea, v. 3, p. 707.

Type-species: *Macrus filiventris* Gravenhorst. Desig. by Viereck, 1914.

Two species are known.

Revision: Horstmann, 1970. Bayer. Ent. Nachrichtenbl. 19: 80-81.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 178.

parvulus solenobiae (Ashmead). Maine, Mass., N. Y., N. J., Del., Mo. Host: *Solenobia walshella* Clem., *Grapholitha molesta* (Bsk.).

Limneria solenobiae Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 433. ♂.

Taxonomy: Horstmann, 1970. Bayer. Ent., Nachrichtenbl. 19: 80, 83 (status revised).

Genus ENYTUS Cameron

Diocles Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 153. Preocc. by Menetries, 1849 and Reichenbach, 1850.

Type-species: *Campoplex exareolatus* Ratzeburg. Deig. by Viereck, 1914 from two species included by Schmiedeknecht, 1907. The type-species is regarded as a synonym of *E. apostata* (Gravenhorst).

Enytus Cameron, 1905. Invertebrata Pacifica 1: 132.

Type-species: *Enytus maculipes* Cameron. Monotypic.

Inareolata Ellinger and Sachtleben, 1928. Internat. Corn Borer Invest., Sci. Rpts. 1: 117. N. name for *Diocles* Foerster.

This is a small to moderate-sized genus of Holarctic and Neotropic distribution. Contrary to the discussion of Horstmann (1970), *Enytus* can be recognized more or less as defined by Townes (1970).

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 177-178. —Horstmann, 1970. Bayer. Ent., Nachrichtenbl. 19: 82-83.

albipes (Provancher). Que., Conn., R. I., N. Y. The species was inadvertently placed in *Casinaria* by Barron (1975).

Porizon albipes Provancher, 1888. Addit. Corr. Faune Ent. Canada Hym., p. 364. ♀.

Nemeritis ocellatus Viereck, 1925; 1926. Canad. Ent. 57 (7): 178 (key); 58 (7): 179. ♂. In the 1926 part of Viereck's paper as "Campoplex (*Nemeritis*) *ocellatus*."

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 178 (transfer to *Enytus*). —Barron, 1975. Nat. Canad. 102: 420-421.

alticola (Cushman), n. comb. N. H. Known only from the holotype, which was collected on Mt. Washington.

Zaporus alticola Ashmead, 1906. In Slosson, Ent. News 17: 324. Nomen nudum.

Diocles alticola Cushman, 1922. U. S. Natl. Mus., Proc. 61 (8): 11. ♀.

eureka (Ashmead). Southwestern Idaho, B. C. s. to s. Calif. Host: *Archips argyrospilus* (Wlk.), *Argyrotaenia dorsalana* (Dyar), *Choristoneura rosaceana* (Harris), *Cnephiasia longana* (Haw.), *Pandemis limitata* (Rob.), *Malacosoma californicum pluviale* Dyar?, *Acrobasis vaccinii* Riley.

Limneria eureka Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 436. ♂.

Enytus maculipes Cameron, 1905. Invertebrata Pacifica 1: 132. ♀.

Campoplex (*Diocles*) *rosaceanae* Viereck, 1925; 1926. Canad. Ent. 57 (9): 227 (key); 58 (7): 181. ♀.

- montanus* (Ashmead), n. comb. N. B. w. to interior Alaska, s. to Maine, Mich., N. Mex., and n. Calif.; Greenland; Europe. Host: *Dioryctria* sp.?, *Zeiraphera* sp., *Z. fortunana* Kft., *Acleris variana* (Fern.), *Choristoneura fumiferana* (Clem.), *C. occidentalis* Free., leaf roller on poplar, leaf tier on *Vaccinium*.
Ischnocerus montanus Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 418. ♀.
Nemeritis conodora Viereck, 1925; 1926. Canad. Ent. 57 (7): 178 (key); 58 (7): 179. ♀. In the 1926 portion of Viereck's work as "Campoplex (Nemeritis) concolor[!]." N. syn.
Angitia (Inareolata) laticeps Roman, 1938. Ann. and Mag. Nat. Hist. (11) 1: 541. ♂, ♀.
Formerly preocc. in *Diadegma* by Viereck, 1925. N. syn.
Horogenes patens Townes, 1945. Amer. Ent. Soc., Mem. 11: 659. N. name for *A. (I.) laticeps* Roman.

Taxonomy: Horstmann, 1969; 1973. Beitr. z. Ent. 19: 441; 23: 132, 134.

- obliteratus* (Cresson). N. Y. and Ont. s. to n. Fla., w. to central Nebr. Host: *Grapholitha molesta* (Bsk.), *Paralobesia viteana* (Clem.), *Rhyacionia frustrana* (Comst.)?, *Anthophila pariana* (Clerck), *Homadaula albizziae* Clarke, *Coleophora serratella* (L.), *Arogalea cristifasciella* (Cham.), *Acleris minuta* (Rob.), *Argyrotaenia velutinana* (Wlk.).
Mesoleptus oblitteratus Cresson, 1874. Ent. Soc. Phila., Proc. 3: 260. ♀.
Limneria elegans Weed, 1887. Ill. State Lab. Nat. Hist., Bul. 3: 40. ♀.
Limneria salicicola Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 437. ♀. I believe that the data which Ashmead gave for the holotype may not apply to it (see discussion of the holotype of *Diadegma acronyctae* [Ashmead]).
Limneria salicicolum Dalla Torre, 1901. Cat. Hym., v. 3, p. 103. Emend.
Thymaris slingerlandana Ashmead, 1904. Canad. Ent. 36: 333. ♀.
Nemeritis dolichourus Viereck, 1925; 1926. Canad. Ent. 57 (7): 178 (key); 58 (7): 178. ♀.

Biology: Boyce, 1947. Ent. Soc. Ont., Ann. Rpt. 77: 21, 22, 24, 27, 28, 29, 33. —Allen, 1962. U. S. Dept. Agr., Tech. Bul. 1265: 49-50. —Dustan and Boyce, 1966. Ent. Soc. Ont., Ann. Rpt. 96: 100, 101, 102.

- oculus* (Viereck), n. comb. Ont., s.w. Alta. Host: Geometrid?, *Operophtera bruceata* (Hulst)? The host records are queried because Geometridae seem unlikely to be hosts for members of this genus.
Nemeritis oculus Viereck, 1925; 1926. Canad. Ent. 57 (7): 178 (key); 58 (7): 179. ♂. In the 1926 portion of Viereck's paper as "Campoplex (Nemeritis) oculus."

Genus DIADEGMA Foerster

- Angitia* Holmgren, 1859 (1858). Svenska Vetensk.-Akad., Ofvers. af ... Forhandl. 15: 327. Preocc. by Walker, 1858.
Type-species: *Angitia glabricula* Holmgren. Monotypic.
Diadegma Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 153.
Type-species: *Campoplex crassicornis* Gravenhorst. By subsequent monotypy from inclusion by Schmiedeknecht, 1907.
Pectenella Morley, 1915 (1916). Ichn. Britannica, v. 5, p. 65, 173, 174, 175, 183, 342, 364, 392. The preoccupied variant spelling *Pectinella* appeared on pages 65 and 183 (see Townes, 1965).
Type-species: *Angitia latungula* Thomson. Monotypic.
Arealina Enderlein, 1921. Stettin. Ent. Ztg. 82: 41.
Type-species: *Arealina imbecilla* Enderlein. Monotypic and orig. desig.
Nothanomalooides Viereck, 1925. Roy. Soc. Canada, Proc. and Trans. (3) 19 (5): 272.
Type-species: *Nothanomalooides stenosomus* Viereck. Monotypic and orig. desig.
Neoorathula Rao, 1953. Indian Forest Rec., New Ser., Ent. 8: 179.
Type-species: *Neoorathula pierisae* Rao. Monotypic and orig. desig.
Diadegma subg. *Neangitia* Horstmann, 1969. Beitr. z. Ent. 19: 414.
Type-species: *Angitia glabricula* Holmgren. Orig. desig.

This is a very large genus of worldwide distribution. Horstmann (1969) recognized three subgenera; he applied the name *Nythobia* Foerster to the largest subgenus. I am not convinced that the name *Nythobia* should be applied to anything other than its type-species, *N. pusio* (Holmgren).

Revision: Walley, 1967. Canad. Ent. 99: 925-943 (spp. of the "stenosomus complex").

—Horstmann, 1969; 1973. Beitr. z. Ent. 19: 413-472; 23: 131-150 (European spp.).

Taxonomy: Townes, 1965. Polskie Pismo Ent. 35: 413-415. —Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 178-179. —Townes and Townes, 1973. Amer. Ent. Inst., Mem. 19: 155 (generic syn. revised).

acronyctae (Ashmead). Newfoundland (insular) w. to s. Sask., s. to w. N. C., n. Mich. and Colo. Host: *Ancylis comptana* (Froel.), microlepidoptera on *Salix*, *Acleris variana* (Fern.), *Archips rosanaus* (L.).

Limneria acronyctae Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 194. ♂. Ashmead cited no locality for the holotype, and the host data Ashmead cited are erroneous. Circumstantial evidence indicates that the data which Ashmead (1890) and Riley and Howard (1890) cited for the holotype of *Limneria salicicola* Ashmead (the latter say: "Inquiline Lepid. Larvae in willow gall, London, Ontario, March 1872") apply also, if not exclusively, to the holotype of *acronyctae*. This appears to be supported by the fact that several *acronyctae* specimens in the Canadian Natl. Collection emerged from galls on willow. The latter were apparently referred to by Finlayson (1975).

Campoplex (Angitia) rosanae Viereck, 1924. Canad. Ent. 56: 68. ♀. N. syn.

Campoplex (Ischnoscopus) alterus Viereck, 1925; 1926. Canad. Ent. 57 (9): 223 (key); 58 (8): 196. ♀. N. syn.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 177 (placed *rosanae* in *Tranosema*). —Finlayson, 1975. Ent. Soc. Canada, Mem. 94: 63, 64-65, 121, 137.

Biology: Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 437. —Riley and Howard, 1890. U. S. Dept. Agr., Insect Life 3: 158 (data for *Limneria salicicola* Ashmead).

acutum (Viereck). Idaho, B. C. s. to n. Calif. Host: *Platyptilia carduidactyla* (Riley). Other host records have been published, but I am reluctant to regard them as being correct without seeing specimens pertaining to them.

Campoplex (Hyposoter) vancouverensis Viereck, 1925; 1926. Canad. Ent. 57 (8): 203 (key); 58 (8): 200. ♀.

Campoplex (Hyposoter) acutus Viereck, 1925; 1926. Canad. Ent. 57 (8): 203 (key); 58 (8): 200. ♀.

Angitia platyptiliae Cushman, 1939. Pan-Pacific Ent. 15: 183. ♂, ♀.

Biology: Lange, 1941. Calif. Agr. Expt. Sta., Bul. 53: 22, 67.

aestivale (Viereck). N. S. w. to w. Ont., s. to n. Va. Host: *Psilocorsis* sp. on *Myrica gale*, *P. cryptolechiella* (Cham.), *P. reflexella* Clem.

Angilia aestivalis Viereck, 1921. Psyche 28: 71. ♀.

Taxonomy: Walley, 1967. Canad. Ent. 99: 926, 933-934.

albertae (Walley). Northern Alta.

Angitia albertae Walley, 1929. Canad. Ent. 61: 191. ♀.

albicincta Walley. Colo. Known only from the holotype, which was collected near Bond at an elevation of 7000 ft.

Diadegma albicincta Walley, 1967. Canad. Ent. 99: 941. ♀.

antennaeliae (Walley). N. Y., n. Va., Ont. Host: *Coleophora* sp. on rose, *C. alniella* Heinr., *C. serratella* (L.).

Campoplex (Angitia) antennaeliae Walley, 1932. Canad. Ent. 64: 182. ♀ (♂ misdet.).

blackburni (Cameron). Northwestern Oreg., w. Calif.; Hawaii. Adventive? Host: *Phthorimaea operculacea* (Zell). I have seen six specimens from North America; three of them were collected in 1897 (two at Hood River, Oreg.; one at Baden, Calif.); two of them were reared from the host cited at Chino, Calif., apparently in 1920. Other hosts have been recorded in Hawaii by Swezey (1907, 1915). Reports of the occurrence of *blackburni* in Bermuda are almost certainly erroneous; they appear to pertain to *compressum* (Cresson). Species appearing to be related to *blackburni* are Oriental, suggesting that *blackburni* may be adventive in North America as well as in Hawaii.

Limneria blackburni Cameron, 1883. Ent. Soc. London, Trans. 31: 192. [female].

comptoniellae (Viereck). Que. w. to Minn., s. to Pa. Host: *Acrobasis betulella* Hulst, A. *caryivorella* Rag., A. *comptoniella* Hulst, A. *rubrifasciella* Pack., A. *sylviella* Ely. Cushman indicated that four of his paratypes, which are labeled "ex tortricid," were reared from "Gelechia trialbamaculella Chambers or (*Olethreutes*) *Peronea permutana* Duponche." Therefore, neither of the present equivalents of those names can be cited with any certainty as a host.

Campoplex (Hyposoter) comptoniellae Viereck, 1925; 1926. Canad. Ent. 57 (8): 204 (key); 58 (9): 219. ♂, ♀.

Campoplex digitatus Cushman, 1926. U. S. Natl. Mus., Proc. 67 (23): 11. ♂, ♀.

crassulum Walley. N. S., Maine, N. Y., Ont. Host: *Coleophora asterosella* McD., C. *granifera* Braun.

Diadegma crassula Walley, 1967. Canad. Ent. 99: 935. ♂, ♀.

discoocellellae (Viereck). D. C. Host: *Chionodes violaceofusca* (Zell.).

Limnerium (Horogenes) discoocellellae Viereck, 1911. U. S. Natl. Mus., Proc. 39: 404. ♀.

falciferum Walley. Southwestern Alta.

Diadegma falcifera Walley, 1967. Canad. Ent. 99: 938. ♀.

fenestrale (Holmgren). Oreg.?; Eurasia. Specimens in the U. S. Natl. Museum collection appear to indicate that *fenestrale* was released against and recovered from *Cnephasia longana* (Haw.) in Oregon in 1950. Host: *Cnephasia longana* (Haw.). My identification of the specimens reared from *Cnephasia longana* is based upon agreement with a specimen identified as *fenestrale* by Dr. Klaus Horstmann; the latter was in turn compared with the *fenestrale* lectotype in 1976 and differed from it only in having the hind tibia more strongly infuscate apically and basally. It should be mentioned here that the lectotype selected by Townes, Momoi, and Townes (1965) is invalid by virtue of the prior selection of another specimen by Hinz (1964). Horstmann (1969) mentioned having specimens in his collection which were reared from *Plutella xylostella* (L.) but gave no other host records. Walley (1929) stated that there were "five specimens [in the Canadian National Collection] from Ottawa, Ont., Sept., 1924 (A. Richardson) which answer to the description of *A[ngitia] fenestralis* (Holmg.)." The occurrence of *fenestrale* in Ont. has not been confirmed.

Limneria fenestralis Holmgren, 1860 (1858). Svenska Vetensk.-Akad. Handl. (n. f.) 2 (8): 59. ♂, ♀.

Taxonomy: Walley, 1929. Canad. Ent. 61: 193. — Boyd, 1934. Soc. Brit. Ent., Trans. 1: 135-138 (variation and comparison with *euceropagum* Horstmann, which was misdet. as "*Angitia ceropaga* [Gravenhorst]"). — Hinz, 1964. Entomophaga 9: 70. — Townes, Momoi, and Townes, 1965. Amer. Ent. Inst., Mem. 5: 296-297. — Horstmann, 1969; 1973. Beitr. z. Ent. 19: 460-461; 23: 133. — Gupta, 1974. Oriental Insects 8: 104-105.

Biology: Hardy, 1939. Bul. Ent. Res. 29: 352-355, 356, 357, 365, 371 (as compared with *euceropagum* [= "ceropaga"]). — Lloyd, 1942. Rev. Canad. de Biol. 1: 633-634 (as compared with *euceropagum* [= "ceropaga"]).

glabriculum (Holmgren). Newfoundland (n. Labrador), n. Que., n. Yukon; Europe.
Angitia glabricula Holmgren, 1859 (1858). Svenska Vetensk.-Akad., Ofvers. af ... Forhandl. 15: 327. ♂, ♀.

Diadegma frigida Walley, 1967. Canad. Ent. 99: 941. ♂, ♀.

Taxonomy: Horstmann, 1969; 1973. Beitr. z. Ent. 19: 427-428; 23: 133, 141.

groenlandicum (Roman). Western Greenland. Horstmann (1969) placed *groenlandicum* as a synonym (with a query) of *D. trochanteratum* (Thomson). In 1976 I studied the *trochanteratum* lectotype and the *groenlandicum* holotype; I compared my homotype for the former with the holotype of the latter and do not think it possible that the two names are synonymous.

interruptum pterophorae (Ashmead). N. S. w. to interior Alaska, s. to Pa., Mich., and n. Calif.

Host: *Archips rosanaus* (L.), *Argyrotaenia citrana* (Fern.), *Choristoneura conflictana* (Wlk.), *C. rosaceana* (Harris), *Cnephiasia longana* (Haw.), "Tortrix" on apple, "Tortrix" on filbert, olethreutid on rose, *Spilonota ocellana* (D. and S.). *D. interruptum* *interruptum* (Holmgren) is European, and I have not studied specimens of it other than the lectotype; therefore, I have little basis for judging the soundness of the subspecific distinction of the Nearctic population (see Townes, 1970). I am in agreement with Horstmann (1973) that placement of the present species in *Diadegma* is more justifiable than was Townes' (1970) placement of it in *Tranosema*, but I am not yet willing to accept Horstmann's suppression of *interruptum* as a synonym of *praerogator* (Linnaeus), in spite of his statement (1973) that the type of *praerogator* is a typical *interruptum* male. My confidence in the opinions of Dr. Horstmann ordinarily being complete, I would regard the question of the identity of *praerogator* as being settled were it not for the fact that he indicated that the type was labeled "salicis," but neglected to refute or otherwise discuss Linnaeus' indication that *praerogator* had been reared from the lymanniid *Leucoma salicis* (L.). The manner in which the *praerogator* type is mounted (see Roman, 1932) and the supposed deterioration of the specimen with time would seem to necessitate (1) consideration of the Linnaean host record and (2) comparison of the *praerogator* type with males of *Hyposoter* species which could be expected to parasitize *L. salicis*. This seems all the more necessary in view of the fact that I have seen specimens of a European species of *Hyposoter*, not colored unlike *interruptum*, which were reared from a lymanniid, and which have cocoons agreeing with Roman's description of the one mounted next to the *praerogator* type.

Limneria pterophorae Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 435. ♀. Contrary to Ashmead's statement, the label of the holotype reads: "From *Tortrix* on apple."

Campoplex (Angitia) basizona Viereck, 1924. Canad. Ent. 56: 67. ♂. *C. basizona* had been placed in *Hyposoter* by Townes (1945); the holotype was reared from *Archips rosanaus* (L.) and agrees well with other material of *interruptum pterophorae* which I studied in the Canadian Natl. Collection. N. syn.

Taxonomy: Roman, 1932. Ent. Tidskr. 53: 10 (type of *I. praerogator*). —Townes, 1945. Amer. Ent. Soc., Mem. 11: 660, 664. —Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 177. —Horstmann, 1973. Beitr. z. Ent. 23: 134-135 (generic placement, suppression of name *interruptum*).

johanseni (Viereck). Que., R. I., S. Dak.

Campoctonoides johanseni Viereck, 1925. Canad. Ent. 57 (7): 177 (key); 58 (12): 297. ♂, ♀.

laricinellum (Strobl). Europe. Introduced in Maine, N. H., Vt., Mass., Conn., N. Y., and Ont.

between 1931 and 1939 and very recently in Idaho, without becoming established, at least at release sites in eastern North America. Host: *Coleophora laricella* (Hbn.). The host cited was the target species for all of the introductions in North America. In most publications the name *nana* (Gravenhorst) was applied to this species, but Horstmann (1969) stated that the type of *nana* was not found in the Gravenhorst collection, and he applied the name in accordance with specimens identified as *nana* in the Thomson collection.

Angitia laricinella Strobl, 1904. Naturw. Ver. f. Steiermark, Mitt. 40: 86. ♂, ♀.

Taxonomy: Horstmann, 1969; 1973. Beitr. z. Ent. 19: 439, 443; 23: 133-134.

Nemeritis lyonetiae Viereck, 1925; 1926. Canad. Ent. 57 (7): 178 (key); 58 (7): 178. ♂. In the 1926 portion of Viereck's revision as "*Campoplex (Nemeritis) lyonetiae*."

minutum (Viereck). N. Y., N. C., Colo., B. C.

Campoplex (Hyposoter) minutus Viereck, 1925; 1926. Canad. Ent. 57 (8): 204 (key); 58 (9): 221. ♀. Preocc. by Holmgren, 1856 and also secondarily by Cushman, 1922; not renamed here because of uncertain synonymy.

mollipla (Holmgren). Rhodesia, South Africa, Mauritius. Introduced in Calif. in 1966, without becoming established. Host: *Phthorimaea operculella* (Zell.). The host cited was the target species for the release in Calif. I have used the spelling *mollipla* and regard *molliplum* as an unjustified emendation because *mollipla* is indecipherable; for that reason Holmgren's proposal of it with an upper case M must be accepted as indicating that it is a proper name, as was done by Dalla Torre (1901), who acted as first revisor in transferring the species to *Limnerium* as *mollipla*.

Limneria Mollipla Holmgren, 1869 (1868). Eug. Resa, pt. 2 (Zool.), sect. 1 (Ins.), p. 417. ♂.

Campoplex (Hyposoter) truncatus Viereck, 1925; 1926. Canad. Ent. 57 (8): 203 (key); 58 (8): 200. ♀.
- ungavae** Walley. Newfoundland (n. Labrador), n. Que., Colo. Ecology: The specimens from Colo. were collected at elevations of 11,700 ft. and 12,000 ft. in the Rocky Mts.
Diadegma ungavae Walley, 1967. Canad. Ent. 99: 939. ♂, ♀.

Genus ERIBORUS Foerster

Zaporus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 152.

Type-species: *Campoplex dorsalis* Gravenhorst. By subsequent monotypy from inclusion by Schmiedeknecht, 1907.

Eriborus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 153.

Type-species: *Campoplex perfidus* Gravenhorst. Desig. by Morley, 1913 from two species included by Schmiedeknecht, 1907.

Bosmina Cameron, 1899. Manchester Lit. and Phil. Soc., Mem. and Proc. 43 (3): 120.

Preocc. by Baird, 1845.

Type-species: *Bosmina spinipes* Cameron. Monotypic.

Hymenobosmina Dalla Torre, 1901. Wien. Ent. Ztg. 20: 52. N. name for *Bosmina* Cameron.

Neobosmina Cameron, 1906. Entomologist 39: 250. Probably a lapsus for *Hymenobosmina* Dalla Torre, as evidenced by Cameron's inclusion of *Bosmina mandibularis* Cameron and by the fact that he gave no indication that he was describing a new genus; possibly not treatable as a lapsus without more definite proof.

Type-species: *Neobosmina pilosella* Cameron. Desig. by Viereck, 1914.

This is a large genus of the Old World. The number of Palearctic species appears to be small, and it is my impression that more *Eriborus* species occur in the Oriental Region than in other tropical and subtropical parts of the Old World.

Revision: Momoi, 1970. Pacific Insects 12: 384-388 (spp. of Ryukyu Archipelago).

Taxonomy: Townes, Townes, and Gupta, 1961. Amer. Ent. Inst., Mem. 1: 243 (syn.). —Oehlke, 1964. Ent. Abhandl. 29: 571 (footnote). —Horstmann, 1969. Beitr. z. Ent. 19: 414, 415.

molestae (Uchida). Korea, Japan. Introduced between 1932 and 1953 at 321 localities from Mass. w. to Ill., s. to Ga. and Ark., according to Allen (1962); there was temporary establishment at least from many of the releases between 1932 and 1937, but the species has apparently not persisted anywhere in the United States. The host cited was the target species for releases in the United States.

Diocetes molestae Uchida, 1933. Wash. Acad. Sci., Jour. 23: 148. ♀.

Biology: Garman, 1939. Conn. (State) Agr. Expt. Sta., Bul. 428: 65-66, 67. —Allen, Holloway, and Haeussler, 1940. U. S. Dept. Agr., Cir. 561: 51-52. —Haeussler, 1940. U. S. Dept. Agr., Tech. Bul. 728: 21-24, 48-49, 59. —Allen, 1954. Jour. Econ. Ent. 47: 278. —Allen, 1962. U. S. Dept. Agr., Tech. Bul. 1265: 120.

terebrans (Gravenhorst). Mass. and Ont. w. to N. Dak., s. to Md., Ill., and Iowa; Eurasia.

Introduced. Host: *Ostrinia nubilalis* (Hbn.), lepidopteran in red pine shoot? One specimen in the U. S. Natl. Museum collection is labeled as having been reared from a red pine tip infested by *Rhyacionia buoliana* (D. and S.).

Campoplex terebrans Gravenhorst, 1829. Ichn. Europaea, v. 3, p. 503. ♂, ♀.

Angitia (*Diocetes*) *gigantea* Szeppligeti, 1916. Mus. Natl. Hungarici, Ann. 14: 373. ♀.

Eugnomus pyraustae Okamoto, 1921. Hokkaido Agr. Expt. Sta., Rpt. 12: 15. ♂.

Angitia (*Diocetes*) *punctoria* Roman, 1923. Ent. Tidskr. 44: 171. ♂, ♀.

Taxonomy: Aubert, 1964. Soc. Linn. de Lyon, Bul. Mens. 33: 64 (syn.). —Townes, 1965.

Polskie Pismo Ent. 35: 410 (syn.). —Townes, Momoi, and Townes, 1965. Amer. Ent. Inst., Mem. 5: 304 (syn.). —Horstmann, 1969. Beitr. z. Ent. 19: 453-454.

Biology: Clark, 1934. U. S. Dept. Agr., Tech. Bul. 455: 9, 11, 20-21, 28, 31. —Ellinger and Sachtleben, 1929. Biol. Reichsanst. f. Land-u. Forstw., Arb. 17: 327. —Clark and Carter, 1943. Jour. Econ. Ent. 36: 120. —Baker, Bradley, and Clark, 1949. U. S. Dept. Agr., Tech. Bul. 983: 74, 75-90, 91.

Genus LATHROSTIZUS Foerster

Lathrostizus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 154.

Type-species: *Lathrostiza sternocera* Thomson. Desig. by Viereck, 1914 from two species included by Thomson, 1887.

Lathrostiza Thomson, 1887. Opusc. Ent. 11: 1153. Emend.

This is a small Holarctic genus. The known hosts include nematine sawflies of the genera *Pontania*, *Euura*, and *Hoplocampa*.

Revision: Horstmann, 1971. Deut. Ent. Gesell., Mitt. 30 (1): 8-12; 30 (2): 16-18 (European spp.).

euurae (Ashmead). Western Mont., s.w. Idaho, Utah, s. Ariz., w. Nev., s. Calif. Host: *Euura* sp. *Pontania* sp. I suspect that the species studied by Caltagirone (1964) and Finlayson (1975) is not *euurae*.

Limneria euurae Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 433. ♂, ♀. The type locality is Pahreah, Kane Co., Utah.

Biology: Caltagirone, 1964. Ent. Soc. Amer., Ann. 57: 287-289 (possibly not *euurae*).

—Finlayson, 1975. Ent. Soc. Canada, Mem. 94: 80-81, 132, 137 (possibly not *euurae*).

modestus (Brues). Arctic N. W. T.

Dioctes modestus Brues, 1919. Rpt. Canad. Arctic Exped. 1913-18, v. 3, pt. G, p. 23. ♂, ♀.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 187 (generic placement).

Genus OLESICAMPE Foerster

Limneria Holmgren, 1859 (1858). Svenska Vetensk.-Akad., Ofvers. af ... Forhandl. 15: 326. Preocc. by Adams, 1851.

Type-species: *Campoplex longipes* Gravenhorst. Desig. by Viereck, 1912. The type-species is Gravenhorst's identification of *Ichneumon longipes* Mueller. *Olesicampe* Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 153.

Type-species: *Campoplex longipes* Gravenhorst. Desig. by Viereck, 1912 from 26 species included by Thomson, 1887. The type-species is Gravenhorst's identification of *Ichneumon longipes* Mueller.

Omoborus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 154.

Type-species: *Omoborus kincaidi* Davis. By subsequent monotypy from inclusion by Davis, 1898.

Holocremnus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 157.

Type-species: *Limneria cothurnata* Holmgren. Desig. by Viereck, 1914 from 22 species included by Thomson, 1887.

Olesicampa Thomson, 1887. Opusc. Ent. 11: 1053, 1139. Emend.

Holocremna Thomson, 1887. Opusc. Ent. 11: 1053, 1176. Emend.

Limneria Ashmead, 1900. Canad. Ent. 32: 368. N. name for *Limneria* Holmgren.

Zaplatystoma Viereck, 1925. Canad. Ent. 57 (7): 177, 180, 181.

Type-species: *Zaplatystoma typicum* Viereck. By orig. indication and also subsequent desig. of Viereck, 1926.

This is a large genus. As presently defined in the structural sense, it appears to include species from all zoogeographic regions, but by far the greatest number of species occur in the Holarctic Region. From our knowledge of the habits of a considerable number of the species occurring in the Holarctic Region there has developed the supposition that parasitism of sawfly larvae clearly distinguishes *Olesicampe* from *Hyposoter* (parasites of Lepidoptera larvae). Structural differentiation of the two genera is rather arbitrary, however, particularly when one looks at the world fauna, in which case the differentiation of *Olesicampe* from *Lemophagus* also appears arbitrary. Although it seems certain that some of the species currently placed in *Olesicampe* will prove not to be parasites of sawflies, it appears equally as certain that nearly all of the Nearctic and Palearctic species of *Olesicampe* are parasites of sawflies. In all cases known to me, *Olesicampe* species kill the host after it has spun its cocoon and emerge as adults from the host cocoon.

alaskensis (Ashmead). N. H., s.e. Alaska, B. C., Wash., Oreg.

Olesicampa alaskensis Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 235. ♂.

annulata (Provancher). Que.

—Kulman, Thompson, and Witter, 1974. Gt. Lakes Ent. 7: 23-25.

brachyura (Ashmead). N. Y., Mich.

Limneria brachyura Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 431. ♀.

Limnerium brachyurum Dalla Torre, 1901. Cat. Hym., v. 3, p. 91. Emend.

californica (Cresson). Southern Calif.

Limneria californica Cresson, 1879 (1878). Acad. Nat. Sci. Phila., Proc. 30: 369. ♂.

cushmani (Viereck). N. Y., N. C., Ont., Sask., Wash.

Campoplex (Amelocoetus) diversus Viereck, 1925; 1926. Canad. Ent. 57 (9): 224 (key); 58 (11): 277. ♀. Preocc. by Norton, 1863.

Campoplex (Amelocoetus) cushmani Viereck, 1926. Canad. Ent. 58 (11): 279. N. name for *C. (A.) diversus* Viereck.

decora (Viereck). Southern B. C.

Zaplatystoma decorum Viereck, 1925; 1926. Canad. Ent. 57 (7): 181 (key); 58 (2): 31. ♀.

delicata (Viereck). Ont.

Campoplex (Amelocoetus) delicatus Viereck, 1925; 1926. Canad. Ent. 57 (9): 224 (key); 58 (11): 278. ♀.

dentata (Provancher). Que.

Macrus dentatus Provancher, 1874. Nat. Canad. 6: 150. ♀. The "lectotype" selected by Gahan and Rohwer (1918) was rejected by Barron (1975) in favor of a specimen which agrees with the original description and appears to be the holotype.

Taxonomy: Gahan and Rohwer, 1918. Canad. Ent. 50: 28. —Barron, 1975. Nat. Canad. 102: 460, 548.

egregia (Viereck). Ont.

Zaplatystoma egregium Viereck, 1925; 1926. Canad. Ent. 57 (7): 181 (key); 58 (2): 30. ♀.

extrema (Holmgren). Greenland.

Limneria extrema Holmgren, 1872. Svenska Vetensk.-Akad., Ofvers. af ... Forhandl. 29 (6): 98. ♀.

Taxonomy: Roman, 1930. Ann. and Mag. Nat. Hist. (10) 5: 287.

flaviceps (Viereck). Que., R. I., N. Y., Va.

Limneria sericea Provancher, 1875. Nat. Canad. 7: 148. ♂. Apparently preocc. in *Olesicampe* by *Campoplex sericeus* Holmgren, 1856.

Holocremnus flaviceps Viereck, 1921. Psyche 28: 75. ♂.

flavirictus (Cresson). Que., N. H., R. I., Conn., N. Y., Pa., S. Dak.

Mesoleptus flavirictus Cresson, 1864. Ent. Soc. Phila., Proc. 3: 263. ♀.

Zaplatystoma cinereum Viereck, 1925; 1926. Canad. Ent. 57 (7): 181 (key); 58 (1): 7. ♀.

fossata (Viereck). Ont.

Pyracmon fossatum Viereck, 1925; 1926. Canad. Ent. 57 (7): 180 (key); 58 (1): 6. ♂.

johsoni (Viereck). N. H.

Zaplatystoma johnsoni Viereck, 1925; 1926. Canad. Ent. 57 (7): 181 (key); 58 (2): 32. ♀.

kincaidi (Davis). Western Wash.

Omoborus kincaidi Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 363. ♂.

Omoborus kincaidii Dalla Torre, 1901. Cat. Hym., v. 3, p. 118. Emend.

lata (Viereck). Southeastern Man., s.w. Alta.

Zaplatystoma simplex Viereck, 1925; 1926. Canad. Ent. 57 (7): 181 (key); 58 (2): 30. ♀.

Zaplatystoma latum Viereck, 1925; 1926. Canad. Ent. 57 (7): 181 (key); 58 (1): 7. ♂.

lophyri (Riley). Que. s. to n. Fla., w. to Minn. and n.e. Iowa. Host: *Neodiprion abbotii* (Leach), *N. lecontei* (Fitch), *N. pinetum* (Nort.), *N. swainei* Midd., *N. sp.* in *virginiana* complex. *Limneria lophyri* Riley, 1877. Mo. State Ent., Ann. Rpt. 9: 32. ♂, ♀.

Biology: Tripp, 1961. Canad. Ent. 93: 51-52, 55 (also fig. final-instar larva). — Riordan, 1963. Canad. Jour. Zool. 41: 1242.

macellator (Thunberg). Europe. Introduced in N. S., N. B., Que., Vt., and Ont. between 1933 and 1940, without becoming established. Host: *Gilpinia frutetorum* (F.), *G. polytoma* (Htg.). The hosts cited were apparently the ones from which rearings were made of individuals released in North America, and most of the rearings were apparently from *G. polytoma*. The target species for the releases in North America was *G. hercyniae* (Htg.), and *hercyniae* was not recorded as a host of *macellator* by Oehlke (1966). Oehlke apparently did not study type specimens other than that of *Campoplex reductus* Hartig, and his suppression of *reductus* as a synonym of *macellator* is apparently based upon Roman's (1912) suppression of *Holocremna frutetorum* Thomson as a synonym of *macellator*. My notes on the lectotype of *frutetorum* indicate that it probably pertains to the present species, but there is a definite need for careful study by one revisor of all three of the types in question. A specimen matched by me with one in the Holmgren collection labeled as lectotype of *Limneria cothurnata* Holmgren (But possibly not yet selected by publication) indicates that *cothurnata* is erroneously treated as a synonym of *macellator* by Oehlke (1966) and Aubert (1973).

Ichneumon macellator Thunberg, 1822; 1824. Acad. Imp. des Sci. St. Petersburg, Mem. 8: 265; 9: 320. [male].

Campoplex reductus Hartig, 1838. Jahresber. Fortschr. Forstwiss. Forstl. Naturk. 1: 272. ♀.

Holocremna frutetorum Thomson, 1887. Opusc. Ent. 11: 1178. ♂, ♀.

Olesicampe ratzeburgi auct., 1936-1975. *Limneria ratzeburgi* Tschek (1871) was suppressed with a query as a synonym of *macellator* by Oehlke (1966), but Aubert (1973) indicated that synonymy to be incorrect.

Taxonomy: Tschek, 1871. Zool.-Bot. Gesell. Wien, Verh. 21: 64-65 (description of *L. ratzeburgi*). — Roman, 1912. Zool. Uppsala 1: 266, 291 — Oehlke, 1966 (1965). Beitr. z. Ent. 15: 865-867. — Aubert, 1973. Soc. Linn. Lyon, Bul. Mens. 42: 23. — Finlayson, 1975. Ent. Soc. Canada, Mem. 94: 78, 79-80, 131, 137 (final-instar larva).

Biology: Finalyson and Reeks, 1936. Canad. Ent. 68: 160-166. — Morris, Cameron, and Jepson, 1937. Bul. Ent. Res. 28: 364-367. — Lovaszy, 1939. Ent. Soc. Fenn., Ann. 5: 226-228. — Finlayson and Finlayson, 1958. Canad. Ent. 90 (9): 558; 90 (10): 587, 589. — Dowden, 1962. U. S. Dept. Agr., Agr. Handb. 226: 15 (release only). — McGugaan and Coppel, 1962. petiolata (Viereck). Ont.

Zaplatystoma petiolatum Viereck, 1925; 1926. Canad. Ent. 57 (7): 181 (key); 58 (2): 31. ♂.
pikonemae Walley. N. S., N. B., Que., Ont., n. Minn., s.e. B. C. Host: *Pikonema alaskensis* (Roh.), *P. dimmockii* (Cr.).

Olesicampe pikonemae Walley, 1942. Canad. Ent. 74: 193. ♂, ♀.

pteroniidae (Rohwer). Northern Va. Host: *Nematus erythrogaster* Nort.

Homalomma pteroniidae Rohwer, 1915. U. S. Natl. Mus., Proc. 49: 219. ♂.

ruficornis (Provancher), revised status. Que.

Limneria ruficornis Provancher, 1875. Nat. Canad. 7: 147. ♀. My notes on the holotype of *ruficornis* indicate that it is not conspecific with the holotype of *O. dentata* (see discussion of *dentata*); *ruficornis* had been suppressed as synonym of *dentata* by Provancher (1879); the holotype of *ruficornis* was found by Barron (1975).

Taxonomy: Provancher, 1879. Nat. Canad. 11: 181. —Barron, 1975. Nat. Canad. 102: 538.

typica (Viereck). Que., N. Y.

Zaplatystoma typicum Viereck, 1925; 1926. Canad. Ent. 57 (7): 181 (key); 58 (1): 7. ♂, ♀.
virginensis (Viereck). N. Y., n. Va.

Holocremnus virginensis Viereck, 1921. Psyche 28: 76. ♀.

Genus LEMOPHAGUS Townes

Lemophagus Townes, 1965. Polskie Pismo Ent. 35: 415.

Type-species: *Lemophagus curtus* Townes. Monotypic and orig. desig.

Species so far referred to this small genus are native to Japan, Europe, and northern Africa and are parasites of Chrysomelidae. The egg is laid in the larva of the host which is killed after it has constructed its pupal cell.

curtus Townes. N. Y., w. Pa., w. W. Va., Ohio, s. Mich., n. Ind.; Europe. Introduced. Host: *Oulema melanopus* (L.). The host cited was the target species for releases of *L. curtus* in North America. Data on recoveries and establishment of *L. curtus* was furnished by Mr. T. L. Burger. Establishment in W. Va. may still be uncertain, but in other states the species has been recovered in Counties other than those in which it was released; recoveries have been made at distances as great as 68 miles from any known release point.

Lemophagus curtus Townes, 1965. Polskie Pismo Ent. 35: 415. ♂, ♀.

Taxonomy: Montgomery and DeWitt, 1975. Ent. Soc. Amer., Ann. 68: 574-578 (egg and larva).

Biology: Stehr, Gage, Burger, and Montgomery, 1974. Environmental Ent. 3: 453-454 (initial recoveries).

Genus HYPOSOTER Foerster

Rhytmonotus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 151, 220. The variant spelling "Rhytmonotus" appeared on p. 220.

Type-species: *Rhytmonotus singularis* Schmeideknecht. By subsequent monotypy from inclusion by Schmiedeknecht, 1909.

Hyposoter Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 152.

Type-species: *Limnerius (Hyposoter) parorgyiae* Viereck. Monotypically included and desig. by Viereck, 1910.

Ischnoscopus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 152.

Type-species: *Ischnoscopus synchlora* Ashmead. By subsequent monotypy from inclusion by Ashmead, 1898.

Ameloctonus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 157.

Type-species: *Banchus fugitivus* Say. Desig. by Viereck, 1914 from two species included by Ashmead, 1900.

Ebiicha Seyrig, 1935. Paris, Mus. d'Hist. Nat., Mem. 4: 88.

Type-species: *Ebiicha crocata* Seyrig. Monotypic and orig. desig.

Neozachresta Blanchard, 1949. In Havrylenko and Winterhalter, Insectos del Parque Nac. Nahuel Huapi, Buenos Aires, p. 46. Nomen nudum (fig. only).

This very large genus is known from all zoogeographic regions. The hosts are larval Lepidoptera, in nearly all cases those which do not conceal themselves when feeding (i.e. predominantly macrolepidoptera). It seems to me that *Hyposoter*, as presently defined, includes as bewildering a diversity of forms as any genus in the family. It would appear that the task of breaking the genus into smaller ones that are more meaningful phylogenetically will require a great deal of research that is not likely to be accomplished soon.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 181-182 (syn.). —Townes and Townes, 1973. Amer. Ent. Inst., Mem. 19: 157 (syn. revised).

affinis (Cresson). Mass., N. Y., Ill.

Mesoleptus affinis Cresson, 1864. Ent. Soc. Phila., Proc. 3: 263. "♂" = ♀. Preocc. by Holmgren, 1856, but not renamed here because of the possibility that a synonym has been described.

annulipes (Cresson). N. S. w. to w. N. W. T. and s. B. C., s. to central Fla., s. Tex., n. Utah, and s. Calif. Host: *Agrotis ipsilon* (Hufn.), *Anicla infecta* (Ochs.), *Autographa precationis* (Gn.), *Catocala* sp., *C. antinympha* (Hbn.), *Ceramica picta* (Harris), *Eupsilia* sp. on oriental cherry, *Heliothis zea* (Bod.)?, *Pseudaletia unipuncta* (Haw.), *Pyrrhia umbra* (Hufn.), *Spodoptera exigua* (Hbn.), *S. frugiperda* (J. E. S.), *S. ornithogalli* (Gn.), *Syngrapha epigaea* (Grt.), *Vanessa atalanta* (L.), geometrid on *Rhododendron*, *Eustixia pupula* Hbn.

Mesoleptus annulipes Cresson, 1864. Ent. Soc. Phila., Proc. 3: 257. ♀.

Hyposoter interjectus Gahan, 1914. U. S. Natl. Mus., Proc. 48: 156. ♀. *H. interjectus* was incorrectly suppressed as a synonym of *nigrolineatus* (Viereck) by Townes (1945); although the name *interjectus* could perhaps be used subspecifically for the *annulipes* population in the southeastern United States, I have decided that this should not be done before the relationship between *annulipes* and *exiguae* (Viereck) is reassessed. It should be noted that specimens similar in coloration to those found in the southeast occasionally are found as far north as Mass. and Mich.; whether or not the holotype of *Campoplex eurythemeae* Viereck is such a specimen remains to be seen (see synonymy for *exiguae*). N. syn.

Campoplex (Ischnoscopus) mitralis Viereck, 1925; 1926. Canad. Ent. 57 (9): 223 (key); 58 (8): 197. ♀.

Campoplex (Ischnoscopus) truncatellus Viereck, 1925; 1926. Canad. Ent. 57 (9): 223 (key); 58 (8): 197. ♀.

Campoplex (Amelocotonus) confusus Viereck, 1925; 1926. Canad. Ent. 57 (9): 224 (key); 58 (11): 277. ♀.

Taxonomy: Townes, 1945, Amer. Ent. Soc., Mem. 11: 663-664, 668-669 (syn.). —Finlayson, 1975. Ent. Soc. Canada, Mem. 94: 73, 74, 127, 128, 137 (final-instar larva).

grahami (Viereck). Que., Conn., Pa., Md., w. N. C., Ala., Tex.

Campoplex (Holocremnus) grahami Viereck, 1925; 1926. Canad. Ent. 57 (8): 203 (key); 58 (7): 182. ♀.

luctus (Davis). N. H., arctic N. W. T. Ecology: In N. H. presumably occurring only in the alpine region of Mt. Washington.

Canidia luctus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 364. ♀.

Zachrestoides intermedia Viereck, 1925; 1926. Canad. Ent. 57 (7): 179 (key); 58 (1): 3. ♂.

nigrolineatus (Viereck). Colo., n.e. N. Mex. Host: *Faronta diffusa* (Wlk.).

Hypothenemus nigrolineatus Viereck, 1912. U. S. Natl. Mus., Proc. 43: 590. ♀.

noctuae (Ashmead). Conn., Va., s. Ont., n. Mich. Host: *Elaphria versicolor* (Grt.).

Limneria noctuae Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 437. ♂. Notes in the U. S. Natl. Museum indicate that the holotype was reared from a larva of *E. versicolor*, a number of which had been found in Va. on birch, walnut, and dead leaves of oak on July 5, 1884; the date "12/7/84" which is on the label of the holotype is indicated in the notes as July 12, 1884, the emergence date of the specimen.

Hyposoter diversicolor Viereck, 1912. U. S. Natl. Mus., Proc. 43: 590. ♀.

Angitia triops Walley, 1929. Canad. Ent. 61: 191. ♂. N. syn.

notatus (Gravenhorst). Interior Alaska; Europe. The specimen upon which the Alaskan record is based is in the collection of the American Entomological Institute; it was identified by Dr. Henry K. Townes. I thank Dr. Townes for allowing me to publish the record.

Campoplex notatus Gravenhorst, 1829. Ichn. Europaea, v. 3, p. 570. ♂, ♀.

occidentali (Viereck). Southeastern Alta. Host: *Oidaematophorus occidentalis* Wlsm.

Campoplex (Hyposoter) occidentali Viereck, 1925; 1926. Canad. Ent. 57 (8): 204 (key); 58 (9): 219. ♀.

parorgyiae (Viereck). Que., Maine, Mass., Ont., Mich., Wis. Host: *Dascychira* sp. on fir, *D.*

obliquata (G. and R.), *D. plagiata* (Wlk.). Finlayson (1966) discussed the intriguing false cocoon which is spun by this species, the true cocoon being situated inside the skin of the host larva.

Limnerium (Hyposoter) parorgyiae Viereck, 1910. U. S. Natl. Mus., Proc. 38: 382. ♂, ♀.

Biology: Finlayson, 1966. Canad. Ent. 98: 139.

Taxonomy: Finlayson, 1975. Ent. Soc. Canada, Mem. 94: 70, 72, 126, 137 (final-instar larva).

pectinatus (Thomson). Eastern Greenland; Europe. Host: *Gynaephora groenlandica* (Hom.).

Anilasta pectinata Thomson, 1887. Opusc. Ent. 11: 1171. ♀.

Limneria Deichmanni Nielsen, 1907. Meddel. om Gronland 29: 386. ♂, ♀.

Taxonomy: Roman, 1930. Ann. and Mag. Nat. Hist. (10) 5: 287.

Biology: Johansen, 1910. Meddel. om Gronland 43: 44, 46. —Nielsen, 1910. Meddel. om Gronland 43: 56.

planatus (Viereck). Northern Idaho, s. B. C.

Campoplex (Diadegma) planata Viereck, 1925; 1926. Canad. Ent. 57 (9): 227 (key); 58 (11): 281. ♀. In the 1926 portion of Viereck's revision as "Campoplex (Ecphora) planata."

plesius (Viereck). Ont.

Campoplex (Hyposoter) plesius Viereck, 1925; 1926. Canad. Ent. 57 (8): 203 (key); 58 (8): 201. ♀.

popofensis (Ashmead). Que. w. to interior and s.w. Alaska, s. to Md., N. Mex., and n. Calif.; Europe. The European record is based upon my identification of a single male from the Netherlands in the U. S. Natl. Museum collection.

Ameloclonus popofensis Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 237. ♀.

Campoplex (Diadegma) ruficurvis Viereck, 1925; 1926. Canad. Ent. 57 (9): 227 (key); 58 (11): 280. ♀.

rivalis (Cresson), n. comb. N. S. w. to Man. and w. Wash., s. to s. Ala., central Tex., s. Ariz., and s. Calif.; Mexico s. to Costa Rica. Host: *Apantesis* sp., *Diacrisia virginica* (F.), *Estigmene acrea* (Drury), *Euchaetis egle* (Drury), *Hyphantria cunea* (Drury), *H. texana* (Harris), *Leptarctia californiae* (Wlk.).

Limneria rivalis Cresson, 1872. Amer. Ent. Soc., Trans. 41: 173. “♂” = ♀ ? (♀ misdet.). I regard Cresson's (1916) statement — type No. 1588, U. S. N. M., “male abdomen gone” as fixing as lectotype that specimen which Cresson regarded as the male of *rivalis* and which has been labeled as such in what appears to be the hand of R. A. Cushman. There is nothing in Cresson's introductory remarks to indicate that it was his intention only to select lectotypes for species having syntypes in the Academy of Natural Sciences, but Cushman (1925) regarded Cresson's statement about the type of *rivalis* as “not to be taken as type selection, for he is here merely quoting from Crawford and Rohwer's statement regarding the condition of the Cresson types in the National Museum.” Cushman found that both syntypes lacked abdomens, but because the female symbol on Cresson's identification label appears to have been put there by Cresson, Cushman had no doubt about which of the two specimens Cresson had referred to as the male, and there are no grounds for his contention that Cresson did not select a lectotype. Therefore, Cushman's selection of Cresson's female as lectotype is invalid. The female is a specimen of *Hyposoter grahami* (Viereck), a species having the ovipositor much longer than typical species of *Hyposoter*. I am undecided about the sex of the *rivalis* lectotype, but Cresson's characterization of the abdomen (apparently of both sexes) as “subcompressed at tip” and his color description of the abdomen of the “male” would appear to indicate that the lectotype is a female.

Limneria pilosula Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 89. ♂, ♀.
N. syn.

Limneria ephestiae Riley, 1890. In Riley and Howard, U. S. Dept. Agr., Insect Life 3: 158. Nomen nudum.

Limneria ephestiae Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 195. ♂, ♀. The type specimens bear labels with Riley's number 239x; the only notes pertaining to number 239x read: “*Campoplex* sp. ... parasitic on something feeding on wax — perhaps *Epeorus zae*.” The discrepancies in the dates cited by Ashmead and by Riley and Howard (1890), would appear to indicate that Riley got his notes mixed up. N. syn.

Amorphota perrivalis Viereck, 1905. Kans. Acad. Sci., Trans. 19: 307. ♂, ♀. N. syn.
Campoplex (Hypothereutes) clarus Viereck, 1925; 1926. Canad. Ent. 57 (8): 204 (key); 58 (9): 224. ♀. N. syn.

Campoplex (Ameloclonus) cuneae Viereck, 1925; 1926. Canad. Ent. 57 (9): 223 (key); 58 (10): 257. ♀. N. syn.

Taxonomy: Cresson, 1916. Amer. Ent. Soc., Mem. 1: 1-2, 51. —Cushman, 1925. Ent. Soc. Wash., Proc. 27: 166.

Biology: Timberlake, 1912. U. S. Dept. Agr., Bur. Ent., Tech. Ser. 19: 72, 90-91. —Dustan, 1921. Ent. Soc. Nova Scotia, Proc. 6: 81-88. —Tothill, 1922. Canada Dept. Agr., Bul. (n. s.) 3: 59-74. —Baerg, 1928. Ark. Agr. Expt. Sta. Bul. 224: 23, 24. —Swain, 1937. Colo.-Wyo. Acad. Sci., Jour. 3 (2 and 3): 43. —Swain, Green, and Portman, 1938. Kans. Ent. Soc., Jour. 11: 7-9. —Davault, 1942. La Foret Quebecoise 4: 398.

rubiginosus Cushman. Mass., Conn. Host: *Dasychira basiflava* (Pack.), *D. obliquata* (G. and R.). The final-instar larva constructs a false cocoon like that of *parorgyiae*; the true cocoon is spun inside the skin of the host larva.

Hyposoter rubiginosus Cushman, 1924. U. S. Natl. Mus., Proc. 64 (4): 11. ♂, ♀.

synchlora (Ashmead). N. H., Mass., N. Y., N. J., Pa., Md., w. N. C., Mich., Ill.? Host:
Synchlora sp., *S. aerta* (F.).

Linneria rufa Riley, 1890. In Riley and Howard, U. S. Dept. Agr., Insect Life 3: 157. Nomen nudum.

Limneria rufa Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 193. ♂. Preocc. by Bridgman, 1882. N. syn. Townes (1945) incorrectly indicated that the syntypes are female and not male. Ashmead stated the type locality is Mo., but Riley and Howard (1890) indicated that the specimens are from South Pass, Ill. Riley's notes indicate that the specimens

were reared from larvae of what is now called *Synchlora aerta* which had been sent by T. A. E. Holcomb of South Pass, Ill. I have not been able to determine that there is or ever was a South Pass in Ill., and the matter merits further research because the syntypes of *rufa* were reared together with those of *Aploides rubivora* Riley, presently a synonym of *Synchlora aerta*.

Ischnoscopterus synchlora Ashmead, 1898. In Dimmock and Ashmead, Ent. Soc. Wash., Proc. 4: 168. ♂.

Limneria Sartheinii Dalla Torre, 1901. Cat. Hym., v. 3, p. 104. N. name for *L. rufa* Ashmead. N. syn.

Taxonomy: Townes, 1945. Amer. Ent. Soc., Mem. 11: 672.

xanthocerus (Viereck). N. H. s. to Va., w. to Mich.

Amelocotonus xanthocerus Viereck, 1921. Psyche 28: 70. ♀.

Genus BENJAMINIA Viereck

Benjaminia Viereck, 1912. U. S. Natl. Mus., Proc. 42: 633.

Type-species: *Charops fuscipennis* Provancher. Monotypic and orig. desig.

Zachrestoides Viereck, 1925. Canad. Ent. 57: 177.

Type-species: *Zachrestoides euphydryadis* Viereck. Orig. desig.

This is a small Holarctic genus. The species *B. funigator* Aubert and *B. polonica* Sawoniewicz were rather recently described from Europe. The North American species which have been reared parasitize Nymphalidae of the genera *Euphydryas* and *Melitaea*. I have seen material that appears to represent three undescribed Nearctic species.

fuscipennis (Provancher). Southwestern Alta.?, w. Nev., n.e. and s. Calif. Host: *Euphydryas chalcedona* (D. and H.).

Charops fuscipennis Provancher, 1888. Addit. Corr. Faune Ent. Canada Hym., p. 365. ♀.
euphydryadis (Viereck). Que., Mass. Host: *Euphydryas phaeton* (Drury), *Melitaea harrisii* Scud.

Zachrestoides euphydryadis Viereck, 1925; 1926. Canad. Ent. 57 (7): 179 (key); 58 (1): 3. ♀.

Genus ECHTHRONOMAS Foerster

Echthronomas Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 151.

Type-species: *Casinaria ochrostoma* Holmgren. By subsequent monotypy from inclusion by Schmiedeknecht, 1908.

This is a small genus of Holarctic and Oriental distribution.

Revision: Walley, 1944. Canad. Ent. 76: 158-159.

ochreofrons lexiphaga Walley. Que. w. to s. B. C., s. to Md., W. Va., and Mich. Host:

Crambidia casta (Pack.), *Tigrioides bicolor* (Grt.).

Echthronomas ochreofrons lexiphaga Walley, 1944. Canad. Ent. 76: 159. ♂, ♀.

Taxonomy: Finlayson, 1975. Ent. Soc. Canada, Mem. 94: 82, 83, 134, 137 (final-instar larva).

ochreofrons ochreofrons Cushman. Md. w. to n.e. Kans., s. to n. Fla.

Echthronomas ochreofrons Cushman, 1924. U. S. Natl. Mus., Proc. 64 (4): 12. ♀.

Genus CAMPOCTONUS Viereck

Campoctonus Viereck, 1912. U. S. Natl. Mus., Proc. 42: 633.

Type-species: *Limneria corrupta* Cresson. Monotypic and orig. desig.

Campoctonoides Viereck, 1925. Canad. Ent. 57: 177.

Type-species: *Campoctonoides currani* Viereck. Orig. desig.

This is a Neotropic and Nearctic genus of small to moderate size. No hosts are known. Mr. G. S. Walley has completed a revision of the Nearctic species which undoubtedly will be published before the appearance of this catalog.

belfragei (Ashmead). R. I. w. to s. Mich., s. to e. N. C. and Tex.

Limneria Belfragei Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 435. ♂.

carinatus (Provancher). Que. w. to n.w. Wis., s. to W. Va. and Mo.

Camponotus carinatus Provancher, 1879. Nat. Canad. 11: 150. ♀.

Campoctonoides beaulnei Viereck, 1925. Canad. Ent. 57 (7): 177 (key); 57 (12): 297. ♀.

corruptus (Cresson). Central Tex., Colo.

Limneria corrupta Cresson, 1872. Amer. Ent. Soc., Trans. 4: 172. ♀.

currani (Viereck). Que., Maine, N. H., N. Y., Pa., Ont., Mich.

Campoctonoides currani Viereck, 1925. Canad. Ent. 57 (7): 177 (key); 57 (12): 296. ♂, ♀.

harringtoni (Viereck). Que., N. H., Vt., Conn., Ont., Mich.

Campoctonoides harringtoni Viereck, 1925. Canad. Ent. 57 (7): 177 (key); 57 (12): 297. ♀.

Genus XANTHOCAMPOPLEX Morley

Xanthocampoplex Morley, 1913. Fauna Brit. India, Hym., v. 3, pt. 1, p. 445.

Type-species: *Xanthocampoplex orientalis* Morley. Monotypic and orig. desig. The type-species is regarded as a synonym of *X. nigromaculatus* (Cameron).

This is a large genus which is distributed throughout the world, but with species most numerous in the tropics. The hosts are lepidopterous caterpillars which do not conceal themselves when feeding.

Revision: Gupta and Gupta, 1971. Oriental Insects 5: 153-164 (Indian spp.).

orbitalis (Walley). Southern Mich., n.e. Kans., s. Sask., Alta.

Nepiera albomaculata Ashmead, 1922. In Crevecoeur, Kans. Acad. Sci., Trans. 30: 387.

Nomen nudum.

Campoctonus orbitalis Walley, 1944. Canad. Ent. 76: 160. ♀.

Taxonomy: Townes, 1970 (1969). Amer. Ent. Inst., Mem. 13: 190 (generic placement).

Genus MICROCHAROPS Roman

Microcharops Roman, 1910. Ent. Tidskr. 31: 178.

Type-species: *Limneria taitica* Holmgren. Monotypic and orig. desig.

Charopsimorpha Viereck, 1912. U. S. Natl. Mus., Proc. 42: 635.

Type-species: *Charops tibialis* Cresson. Orig. desig.

Paracharops Blanchard, 1940. In Kreibohm de la Vega, Tucuman Estac. Expt. Agr., Rev.

Indus. y Agr. 3: 170. Nomen nudum (fig. only).

Paracharops Blanchard, 1942. Soc. Cient. Argentina, An. 134: 107.

Type-species: *Paracharops annulatus* Blanchard. Monotypic and orig. desig.

This is a genus of small to moderate size which is not known with certainty to occur outside of the New World. The occurrence of *M. taitica* (Holmgren) in Tahiti has apparently not been confirmed by the collection of additional specimens, and it may be that the holotype is mislabeled.

bimaculata (Ashmead). Mo., Tex.; West Indies and Mexico s. to Argentina. Host: *Alabama argillacea* (Hbn.), *Plathypena scabra* (F.).

Charops bimaculata Ashmead, 1895. Zool. Soc. London, Proc. 65: 778. ♀.

Charops unicinctus Ashmead, 1900. Ent. Soc. London, Trans. 48: 272. ♀.

Paracharops annulatus Blanchard, 1940. In Kreibohm de la Vega, Tucuman Estac. Expt. Agr., Rev. Indus. y Agr. 3: 170. Nomen nudum (fig. only).

Paracharops annulatus Blanchard, 1942. Soc. Cient. Argentina, An. 134: 107. "♂" = ♀.

Taxonomy: Townes and Townes, 1966. Amer. Ent. Inst., Mem. 8: 155 (syn.).

tibialis (Cresson). Conn., Va., Ga., s. Mich., Ill., n.e. Kans., Tex.; Mexico, Cuba, Costa Rica, Brazil. Host: *Symmerista albifrons* (J. E. S.), *S. canicosta* Franch., *Asterocampa celtis* (B. and L.), *A. clyton* (B. and L.).

Charops tibialis Cresson, 1872. Amer. Ent. Soc., Trans. 4: 173. ♂.

Limneria insolens Cresson, 1874 (1873). Acad. Nat. Sci. Phila., Proc. 25: 386. ♂, ♀.

Charops apaturae Riley, 1890. In Riley and Howard, U. S. Dept. Agr., Insect Life 3: 155.

Nomen nudum.

Charops apaturae Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 193. ♂.

Angitia (Inareolata) brasiliensis Lima, 1935. O Campo (for June, 1935), p. 20. ♂, ♀.

Preocc. in *Microcharops* by Szepilgeti, 1906.

UNPLACED TAXA OF CAMPPOLEGINI

Pyrachmon(!) idahoensis Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 363. ♀. Northern Idaho. Neither of the two syntypes has been found.

SUBFAMILY CREMASTINAE

Members of this subfamily are internal parasites of Lepidoptera and, to a lesser extent, Coleoptera which are concealed while feeding (i.e. leaf rollers, borers, etc.). Dr. Clement Dasch is preparing a revision of the Nearctic species.

Genus XIPHOSOMELLA Szepligeti

Xiphosomella Szepligeti, 1905. In Wytsman, Gen. Ins., Fasc. 34, p. 4.

Type-species: *Xiphosomella brasiliensis* Szepligeti. Monotypic.

Pristomerus subg. *Areolopristomerus* Cushman, 1920. U. S. Natl. Mus., Proc. 58: 274.

Type-species: *Pristomerus (Areolopristomerus) smithi* Cushman. Orig. desig.

This large genus is mostly Neotropical. In addition to the two Nearctic species listed below, I know a third one from Florida which is apparently undescribed.

Revision: Johnson, 1969. Mich. Ent. 2: 27-28.

dubia (Brues). Mass., s.e. Ont., and Mich., s. to Fla. and Tex.

Pristomeridina dubia Brues, 1911. Psyche 18: 24. ♀.

Pristomerus (Areolopristomerus) smithi Cushman, 1920. U. S. Natl. Mus., Proc. 58: 274. ♀. *setoni* Johnson. N. C., Ky., S. C., Fla.

Xiphosomella setoni Johnson, 1969. Mich. Ent. 2: 27. ♂, ♀.

Genus PRISTOMERUS Curtis

Pristomerus Curtis, 1836. Brit. Ent., v. 13, no. 624.

Type-species: *Pachymerus vulnerator* Gravenhorst. Monotypic and orig. desig. The type-species designation is Gravenhorst's identification of *Ichneumon vulnerator* Panzer.

Pristomeridina Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 100.

Type-species: *Porizon agilis* Cresson. Monotypic and orig. desig.

Pristocelus Szepligeti, 1905. In Wytsman, Gen. Ins., fasc. 34, p. 48.

Type-species: *Pristocelus atriceps* Szepligeti. Monotypic.

Neopristomerus Viereck, 1912. U. S. Natl. Mus., Proc. 43: 592.

Type-species: *Pristomerus appalachianus* Viereck. Orig. desig.

Nesanomalon Morley, 1913. Rev. Ichn. Brit. Mus., v. 2, p. 56.

Type-species: *Nesanomalon dimidiatum* Morley. Monotypic.

Revision: Cushman, 1920. U. S. Natl. Mus., Proc. 58: 272-280.

austrinus Townes and Townes. Mass. s. to Ga., w. to Ind. and Tex.; Mexico, Guatemala. Host:

Acrobasis caryivorella Rag., *A. vaccinii* Riley, *Epiblema scudderianum* (Clem.), *Grapholita molesta* (Bsk.), *Gretchenia bolliana* (Sling.), *Gypsonoma haimbachiana* (Kft.), *Laspeyresia pomonella* (L.).

Porizon? agilis Cresson, 1872. Amer. Ent. Soc., Trans. 4: 175. ♀. Preocc. by Holmgren, 1860.

Pristomerus austrinus Townes and Townes, 1951. In Muesebeck et al., U. S. Dept. Agr., Agr. Monog. 2: 386. N. name for *Porizon agilis* Cresson.

Biology: Franklin and Morse, 1914. Mass. Agr. Expt. Sta., Bul. 150: 56. — Franklin, 1915; 1916; 1917. Mass. Agr. Expt. Sta., Bul. 160: 109; 168: 39-40; 180: 229.

baumhoferi Cushman, Ont., S. Dak. w. to Ida., s. to Tex. and Ariz. Host: *Rhyacionia frustrana bushnelli* (Bsk.), *Periploca ceanothiella* (Cosens).

Pristomerus baumhoferi Cushman, 1930 (1929). U. S. Natl. Mus., Proc. 76 (25): 9. ♂, ♀.

euryptychiae Ashmead. N. Y. s. to Alab., w. to Wis., Kans., and Tex. Host: *Ancylis comptana* (Froel.), *Ecdytolopha insiticiana* Zeller, *Epiblema otiosanum* (Clem.), *E. strenuum* (Wlk.), *Grapholita molesta* (Bsk.), *Gypsonoma haimbachiana* (Kft.), *Laspeyresia*

pomonella (L.), *Proteoteras willingana* (Kft.), *Acrobasis caryivorella* Rag., *A. juglandis* (LeB.), *Vanessa atalanta* (L.).

Pristomerus mellaethorax Riley, 1890. In Riley and Howard, U. S. Dept. Agr., Insect Life 3: 156. Nomen nudum.

Pristomerus euryptychiae Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 192. ♀. The type locality is Kirkwood, Mo.; Ashmead erroneously stated that it is D. C.

Pristomerus (*Pristomerus*) *ocellatus* Cushman, 1920. U. S. Natl. Mus., Proc. 58: 277. ♂, ♀.

Biology: Pepper and Driggers, 1934. Ent. Soc. Amer., Ann. 27: 596. —Haden, 1935. Del. Agr. Expt. Sta., Bul. 194: 12-41. —Rice, 1937. Jour. Econ. Ent. 30: 112. —Allen, Holloway, and Haeussler, 1940. U. S. Dept. Agr. Cir. 561: 12, 58.

laticeps Cushman, Conn., N. Y., N. J., Ont., Va.

Pristomerus (*Pristomerus*) *laticeps* Cushman, 1920. U. S. Natl. Mus., Proc. 58: 277. ♀.

Pristomerus (*Pristomerus*) *idei* Viereck, 1925. Canad. Ent. 57: 74. ♀.

minutus Cushman. Calif. Host: *Coleotechnites milleri* (Bsk.).

Pristomerus (*Pristomerus*) *minutus* Cushman, 1920. U. S. Natl. Mus., Proc. 58: 279. ♀.

olamonius Viereck. Mass. s. to D. C., w. to S. Dak. and Kans. Ecology: Occurs on flowers of *Solidago* in late summer and fall.

Pristomerus aciculatus Ashmead, 1900 (1899). In Smith, N. J. State Bd. Agr., Ann. Rpt. 27, Sup., p. 584. Nomen nudum.

Pristomerus olamonius Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey Bul. 22: 274. ♀.

Pristomerus (*Pristomerus*) *fuscipennis* Cushman, 1920. U. S. Natl. Mus., Proc. 58: 275. ♂, ♀.

spinnerator (Fabricius). Mass. s. to Fla., w. to Alta. and Calif.; Mexico, Virgin Islands, Honduras, Guyana?, Brazil; Hawaii. Host: *Acrobasis caryivorella* Rag., *A. vaccinii* Riley, *Canarsia* sp., *Elasmopalpus lignosellus* (Zell.), *Lorostegite sticticalis* (L.), *Heliothis virescens* (F.), *H. zea* (Bod.), *Spodoptera frugiperda* (J. E. S.), *S. praefica* (Grt.), *Trichoplusia ni* (Hbn.), *Phthorimaea operculella* (Zell.), *Colias eurytheme* Bdv.

Opionion spinnerator Fabricius, 1804. Systema Piezatorum, p. 138. ♀. Temporarily preocc. in *Ichneumon* by Fabricius, 1798.

Ichneumon femorator Thunberg, 1822; 1824. Acad. Imp. des Sci. St. Petersburg, Mem. 8: 261; 9: 311. N. name for *O. spinnerator* Fabricius. Preocc. by Kirby, 1802.

Pristomerus pacificus Cresson, 1879 (1878). Acad. Nat. Sci. Phila., Proc. 30: 370. ♀.

Pristomerus appalachianus Viereck, 1905. Kans. Acad. Sci., Trans. 19: 299. ♂, ♀.

Pristomerus coloradensis Brues, 1911. Psyche 18: 23. ♀. N. syn.

Pristomerus (*Neopristomerus*) *melleus* Cushman, 1920. U. S. Natl. Mus., Proc. 58: 279. ♂, ♀. N. syn.

Pristomerus Bollowi Enderlein, 1921. Stettin. Ent. Ztg. 82: 9. ♂. N. syn.

Neopristomerus woodworthi Viereck, 1921. Ent. News 32: 172. ♂, ♀. N. syn.

Taxonomy: Townes and Townes, 1966. Amer. Ent. Inst., Mem. 8: 158 (Syn.).

Biology: Luginbill, 1928. U. S. Dept. Agr., Tech. Bul. 34: 65. —Vickery, 1929. U. S. Dept. Agr., Tech. Bul. 138: 39. —Leuck, 1966. Jour. Econ. Ent. 59: 800.

Genus DIMOPHORA Foerster

Dimophora Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 155.

Type-species: *Dimophora robusta* Brischke. Desig. by Viereck, 1914 from three species included by Brischke, 1880.

Dimophorus Thomson, 1890. Opusc. Ent. 14: 1356. Emend.

Oligotnema Cushman, 1920. U. S. Natl. Mus., Proc. 58: 280.

Type-species: *Oligotnema prima* Cushman. Monotypic and orig. desig.

prima (Cushman). Ont., Colo., Idaho, Utah, Ariz. The type locality is Fort Collins, Colo.

Oligotnema prima Cushman, 1920. U. S. Natl. Mus., Proc. 58: 281. ♀.

Taxonomy: Cushman, 1922. U. S. Natl. Mus., Proc. 60 (21): 22.

Genus EIPHOSOMA Cresson

Eiphosoma Cresson, 1865. Ent. Soc. Phila., Proc. 4: 52.

Type-species: *Eiphosoma annulatum* Cresson. Desig. by Viereck, 1914.

Xiphosoma Marshall, 1892. Soc. Ent. de France, Ann. 61: 65. Emend.

Brachixiphosoma Viereck, 1912. U. S. Natl. Mus., Proc. 42: 147.

Type-species: *Eiphosoma pyralidis* Ashmead. Monotypic and orig. desig.

Chartionedys Enderlein, 1921. Stettin. Ent. Ztg. 82: 3.

Type-species: *Chartionedys compressum* Enderlein. Orig. desig.

Hanauella Enderlein, 1921. Stettin. Ent. Ztg. 82: 6.

Type-species: *Hanauella armillata* Enderlein. Monotypic and orig. desig.

This is a very large genus of the New World, most of the species being Neotropic. Pyraloidea appear to be the principle hosts.

Revision: Cushman, 1920. U. S. Natl. Mus., Proc. 58: 269-272.

dentator (Fabricius). Southern Tex.; West Indies; Mexico s. to Argentina. Host: *Mimorista flavidissimalis* (Grt.), *Ufa rubidinella* (Zell.).

Opinion dentator Fabricius, 1804. Systema Piezatorum, p. 138. [female].

Eiphosoma annulata Cresson, 1865. Ent. Soc. Phila., Proc. 4: 54. ♂, ♀.

Eiphosoma bruesii Cushman, 1920. U. S. Natl. Mus., Proc. 58: 272. ♀. N. syn.

Eiphosoma Saueri Lima, 1953 (1951). [Rio de Janeiro] Mus. Nac., Arq. 42: 188. ♂, ♀.

Taxonomy: Townes and Townes, 1966. Amer. Ent. Inst., Mem. 8: 162 (syn.).

nigrolineatum (Brulle). Fla.; Mexico, Guatemala, French Guiana, Guyana, Peru, Paraguay.

Collyria nigro-lineata Brulle, 1846. In Lepeletier, Hist. Nat. Ins. Hym., v. 4, p. 178. ♀.

Eiphosoma mexicana Cresson, 1874 (1873). Acad. Nat. Sci. Phila., Proc. 25: 380. ♀.

Taxonomy: Townes and Townes, 1966. Amer. Ent. Inst., Mem. 8: 163 (syn.).

pyralidis Ashmead. N. Y. s. to N. C., w. to Kans. Host: Pyralid on *Solidago*.

Eiphosoma pyralidis Riley, 1890. In Riley and Howard, U. S. Dept. Agr., Insect Life 3: 156. Nomen nudum.

Eiphosoma pyralidis Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 191. ♂.

septentrionale Brues. Conn. s. to S. C., w. to Ill. and Ala.

Eiphosoma septentrionale Brues, 1911. Psyche 18: 22. ♀.

texanum Cresson. Tex., Utah, Ariz.; Mexico, Trinidad, Guyana, Brazil.

Eiphosoma texana Cresson, 1872. Amer. Ent. Soc., Trans. 4: 176. ♀.

Genus PSEUDERIPTERNUS Viereck

Casinaria subg. *Pseuderipternus* Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist.

Survey Bul. 22: 269.

Type-species: *Podogaster radiolatus* Provancher. Monotypic.

This genus may occur in both South and North America; a USNM specimen of a large undescribed species was caught by the U. S. Public Health Service aboard an airplane which had arrived at Miami, Fla. from Buenos Aires, Argentina via Lima, Peru and Guayaquil, Ecuador. The species are collected among coarse grasses along lake shores or in salt marshes. Schoenobiine pyralids may be the usual hosts.

Revision: Cushman, 1917. U. S. Natl. Mus., Proc. 53: 505-508.

brevicauda Cushman. N. H., N. Y., Ont., Mich., Ohio. Host: *Schoenobius melinellus* (Clem.).

Pseuderipternus brevicauda Cushman, 1917. U. S. Natl. Mus., Proc. 53: 506. ♂, ♀.

elongatus (Davis). Mass., N. J., Ga. Ecology: Occurs in salt marshes on *Spartina*.

Ateleuti (?) *elongatus* Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 362. ♀.

Pseuderipternus gracilipes Cushman, 1917. U. S. Natl. Mus., Proc. 53: 507. ♂, ♀.

radiolatus (Provancher). Que. s. to Md.

Podogaster radiolatus Provancher, 1875. Nat. Canad. 7: 329. ♀.

Genus TANYCHELA Townes

Tanychela Townes, 1971. Amer. Ent. Inst., Mem. 17: 19.

Type-species: *Tanychela aurea* Townes. Monotypic and orig. desig.

The type-species occurs in southeastern Brazil. An undescribed species occurs in California; it has been reared from a stream-dwelling pyralid, *Argyractis* sp.

Genus CREMASTUS Gravenhorst

Cremastus Gravenhorst, 1829. Ichn. Europaea, v. 3, p. 730.

Type-species: *Cremastus spectator* Gravenhorst. Desig. by Westwood, 1840.

Celor Kokujev, 1901. Soc. Ent. Rossicae, Horae 35: 210.

Type-species: *Celor semenowi* Kokujev. Monotypic.

Pseudocremastus Szepligeti, 1905. In Wytsman, Gen. Ins., fasc. 34, p. 50.

Type-species: *Pseudocremastus radialis* Szepligeti. Monotypic.

Zaleptopygus Viereck, 1911. U. S. Natl. Mus., Proc. 41: 294.

Type-species: *Zaleptopygus obereae* Viereck. Monotypic and orig. desig.

According to Townes (1971) this is a large Holarctic genus for which the usual hosts are coleopterous stem borers or gall makers, although there are also rearings recorded from lepidopterous larvae.

Taxonomy: Townes, 1958. Insects of Micronesia, v. 2, no. 2, p. 65. —Townes, 1971. Amer. Ent. Inst., Mem. 17: 16.

anomalus Cushman. Colo.

Cremastus (*Zaleptopygus*) *anomalus* Cushman, 1917. U. S. Natl. Mus., Proc. 53: 542. ♀.

bilineatus Cushman. N. J., Mich.

Rhythmonotus *bilineatus* Ashmead, 1900 (1899). In Smith, N. J. State Bd. Agr., Ann. Rpt. 27, Sup., p. 581. Nomen nudum.

Cremastus (*Zaleptopygus*) *bilineatus* Cushman, 1917. U. S. Natl. Mus., Proc. 53: 545. ♂, ♀.

californicus (Provancher). Calif. Barron (1975) placed this species in *Cremastus*.

Porizon *Californicum* Provancher, 1888. Addit. Corr. Faune Ent. Canada Hym., p. 364. ♂.

Taxonomy: Barron, 1975. Nat. Canad. 102: 438-439.

champlaini Cushman. N. Y., Pa., Va., Mich., S. Dak. Host: "Elaphidion" sp.

Cremastus (*Zaleptopygus*) *champlaini* Cushman, 1922. U. S. Natl. Mus., Proc. 60 (21): 22. ♂, ♀.

cressoni Kerrich. Colo.

Porizon *albibennis* Cresson, 1865. Ent. Soc. Phila., Proc. 4: 287. ♀. Preocc. by Zetterstedt, 1838.

Cremastus *cressoni* Kerrich, 1959. Ann. and Mag. Nat. Hist. (13) 2: 50. N. name for *P. albipennis* Cresson.

dorcaschemae Cushman. N. Y. Host: *Dorcaschema nigrum* (Say).

Cremastus (*Zaleptopygus*) *dorcaschemae* Cushman, 1920. U. S. Natl. Mus., Proc. 58: 287. ♂, ♀.

fuscipennis (Cresson). Kans., Tex., Colo.

Porizon *fuscipennis* Cresson, 1865. Ent. Soc. Phila., Proc. 4: 287. ♀.

Porizon *audax* Cresson, 1872. Amer. Ent. Soc., Trans. 4: 174. ♂.

gallaecola Cushman. Ont., Va., Tex. Host: *Gnorimoschema gallaesolidaginis* (Riley).

Cremastus (*Zaleptopygus*) *gallaecola* Cushman, 1917. U. S. Natl. Mus., Proc. 53: 546. ♂, ♀.

hyalinipennis (Cresson). N. J. s. to Fla., w. to S. Dak. and Tex.

Porizon *hyalinipennis* Cresson, 1872. Amer. Ent. Soc., Trans. 4: 174. ♂, ♀.

incompletus (Provancher). Que. s. to N. C., w. to Man.

Mesoleptus *incompletus* Provancher, 1875. Nat. Canad. 7 (9): 270. ♂, ♀.

Atractodes *fusiformis* Provancher, 1875. Nat. Canad. 7 (11): 332. ♀.

Morphology: Peck, 1937. Canad. Jour. Res., Sect. D. (Zool. Sci.) 15: 245, 246, 149, 250.

mordellistena (Cushman). Colo. Host: *Mordellistena aemula* LeC., *M. morula* LeC.
Cremastus mordellistena Ashmead, 1895. In Baker, Ent. News 6: 29. Nomen nudum.
Cremastus (Zaleptopygus) mordellistena Cushman, 1917. U. S. Natl. Mus., Proc. 53: 539.
 ♂, ♀.

Taxonomy: Cushman, 1927. U. S. Natl. Mus., Proc. 72 (13): 20-21.

nigriclypealis Cushman. N. Mex.
Cremastus (Zaleptopygus) nigriclypealis Cushman, 1917. U. S. Natl. Mus., Proc. 53: 543.

nordi Townes. Mich. Host: *Oberea shaumii* LeC.
Cremastus nordi Townes, 1965. Mich. Acad. Sci., Arts, and Letters, Papers 50: 105. ♂, ♀.

orbitalis (Cresson). Md., Ala., Tex.

Porizon orbitalis Cresson, 1872. Amer. Ent. Soc., Trans. 4: 174. ♂, ♀.

orbus (Davis). Conn., N. Y., N. J., Pa., Mich., Ill., La. Host: *Oberea tripunctata* Swed.
Leptopygus orbus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 365. ♂, ♀.

Zaleptopygus obereae Viereck, 1911. U. S. Natl. Mus., Proc. 41: 295. ♂, ♀.

Taxonomy: Cushman, 1920. U. S. Natl. Mus., Proc. 58: 284.

quintilis (Viereck). Kans. Walkley (1967) apparently saw no specimens of this species before deciding to place it with a query in *Cremastus* rather than *Trathala*; it may prove to belong in the latter genus.

Thersilochus mimeticus Viereck, 1905. Kans. Acad. Sci., Trans. 19: 300. ♀.

Thersilochus quintilis Viereck, 1905. Kans. Acad. Sci., Trans. 19: 301. ♂.

Taxonomy: Walkley, 1967. In Krombein et al., U. S. Dept. Agr., Agr. Monog. 2, Sup. 2, p. 207.
rohweri Cushman. Pa.

Cremastus (Zaleptopygus) rohweri Cushman, 1917. U. S. Natl. Mus., Proc. 53: 541. ♀.

snowi (Viereck). Kans. Walkley (1967) apparently saw no specimens of this species before deciding to place it with a query in *Cremastus* rather than *Trathala*; it may prove to belong in the latter genus.

Thersilochus snowi Viereck, 1905. Kans. Acad. Sci., Trans. 19: 299. ♀.

Taxonomy: Walkley, 1967. In Krombein et al., U. S. Dept. Agr., Agr. Monog. 2, Sup. 2, p. 207.
vierecki (Cockerell). N. Mex.

Porizon vierecki Cockerell, 1903. Ann. and Mag. Nat. Hist. (7) 12: 200. ♂.

Genus DOLICHOPSELEPHUS Ashmead

Dolichopselephus Ashmead, 1890. Colo. Biol. Assoc., Bul. 1: 23.

Type-species: *Dolichopselephus cockerelli* Ashmead. Monotypic.

cockerelli Ashmead. Sask., Colo.

Dolichopselephus cockerelli Ashmead, 1890. Colo. Biol. Assoc., Bul. 1: 23. ♀.

Genus TRATHALA Cameron

Trathala Cameron, 1899. Manchester Lit. and Phil. Soc., Mem. and Proc. 43: 122.

Type-species: *Trathala striata* Cameron. Monotypic.

Epicremastus Szepligeti, 1905. In Wytsman, Gen. Ins., fasc. 34, p. 51.

Type-species: *Epicremastus concolor* Szepligeti. Monotypic.

Paurolexis Cameron, 1906. Bombay Nat. Hist. Soc., Jour. 17: 282.

Type-species: *Paurolexis flavus* Cameron. Monotypic.

Haristaeus Cameron, 1910 (1909). Amer. Ent. Soc., Trans. 35: 442.

Type-species: *Haristaeus nigrifrons* Cameron. Monotypic.

This large genus is worldwide in distribution.

Taxonomy: Townes, 1958. Insects of Micronesia, v. 2, no. 2, p. 66. —Townes, 1971. Amer. Ent. Inst., Mem. 17: 17-18.

aciculata (Davis). Mass., Conn., Mich., Ga.

Cremastus aciculatus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 364. ♂.

brunneipennis (Walley), n. comb. Ont.

Cremastus (Zaleptopygus) brunneipennis Walley, 1933. Canad. Ent. 65: 253. ♂, ♀.

cleridivora (Cushman). N. C., Ga., Mo., Kans., Idaho. Host: *Enoclerus quadriguttatus* (Oliv.), *E. sphegus* (F.), *Temnochila virescens* (F.).

Cremastus (Zaleptopygus) cleridivorus Cushman, 1917. U. S. Natl. Mus., Proc. 53: 534. ♀.
delicata (Cresson). Tex.

Porizon? delicatus Cresson, 1872. Amer. Ent. Soc., Trans. 4: 176. ♂.

flavoorbitalis (Cameron). Japan s. to Australia, w. to India; Hawaii. Introduced between 1929 and 1933 in Mass., R. I., Conn., N. Y., Ont., and Ohio and in 1935 and 1936 in Va.; recoveries were made in Mass., R. I., Ont., Ohio, and Va., but the species apparently has not persisted anywhere in North America. Host: *Ostrinia nubilalis* (Hbn.), *Grapholita molesta* (Bsk.). The hosts listed were the target species for releases of *T. flavoorbitalis* in North America.

Taryta flavo-orbitalis Cameron, 1907. Bombay Nat. Hist. Soc., Jour. 17: 589. ♀.

Cremastus hymenae Viereck, 1911. U. S. Natl. Mus., Proc. 40: 189. ♂, ♀.

Diaparsis coreanus Uchida, 1928. Hokkaido Imp. Univ., Faculty Agr., Jour. 21: 285. ♂, ♀.

Diaparsis coreanus var. *kondonis* Uchida, 1928. Hokkaido Imp. Univ., Faculty Agr., Jour. 21: 286. ♂, ♀.

Taxonomy: Cushman, 1933. Ent. Soc. Wash., Proc. 35: 73.

Biology: Bradley and Burgess, 1934. U. S. Dept. Agr. Tech. Bul. 441: 1-15.

Morphology: Peck, 1937. Canad. Jour. Res., Sect. D (Zool. Sci.) 15: 245-247.

granulata (Davis). Mich.

Cremastus granulatus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 365. ♂, ♀.

Taxonomy: Cushman, 1920. U. S. Natl. Mus., Proc. 58: 284 (lectotype selection).

hartii (Ashmead). N. J., D. C.?, Ky.?, Ill.

Cremastus hartii Ashmead, 1895. Ill. State Lab. Nat. Hist., Bul. 4: 277. ♂, ♀.

Taxonomy: Hart, 1895. Ill. State Lab. Nat. Hist., Bul. 4: 271 (collecting locality and date).

—Cushman, 1930 (1929). U. S. Natl. Mus., Proc. 76 (25): 11 (discussion of syntypes, excluding those in Ashmead collection).

latithorax (Cushman). Tex.

Cremastus (Zaleptopygus) latithorax Cushman, 1920. U. S. Natl. Mus., Proc. 58: 286. ♀.

nemoralis (Davis). Mass., N. Y., Mich.

Cremastus nemoralis Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 364. ♂, ♀.

Taxonomy: Cushman, 1920. U. S. Natl. Mus., Proc. 58: 284. (discussion of syntypes).

obesa (Cushman). Md.

Cremastus (Zaleptopygus) obesus Cushman, 1920. U. S. Natl. Mus., Proc. 58: 285. ♀.

plesia (Cushman). Mich.

Cremastus (Zaleptopygus) plesius Cushman, 1917. U. S. Natl. Mus., Proc. 53: 535. ♀.

protracta (Cushman), n. comb. Wash. Ecology: The host of the holotype was reared from *Aster eastoni*. Host: *Coleophora* sp.

Cremastus protractus Cushman, 1935. Wash. Acad. Sci., Jour. 25: 563. ♀.

retiniae (Cresson). N. Y., Md.?, D. C.?, Va.? Host: *Rhyacionia rigidana* (Fern.).

Cremastus retiniae Cresson, 1880. In Comstock, U. S. Dept. Agr., Ann. Rpt. for 1879, p.

238. ♂. Notes in the U. S. Natl. Museum indicate that Comstock reared two specimens, one of which was placed in the Cresson collection and may actually be the one upon which Cresson based his description. The notes refer to a letter dated June 9, 1880 which Comstock received from Cresson and a letter dated June 23, 1880 which Comstock sent to Cresson.

Taxonomy: Cushman, 1917. U. S. Natl. Mus., Proc. 53: 537 (discussion of the broken specimen presumed to be the holotype and its comparison with specimens which apparently were not reared from *Rhyacionia rigidana*).

rosae (Cushman). N. J., Va.

Cremastus (Zaleptopygus) rosae Cushman, 1917. U. S. Natl. Mus., Proc. 53: 536. ♀.

rostrata (Cushman). Mass., Conn., N. Y., Pa., Md. Ecology: Occurs on flowers of *Solidago*.

Cremastus (Zaleptopygus) rostratus Cushman, 1917. U. S. Natl. Mus., Proc. 53: 532. ♀.

similis (Cushman). R. I., Conn., N. J., Pa., N. C., Idaho.

Cremastus (Zaleptopygus) similis Cushman, 1917. U. S. Natl. Mus., Proc. 53: 535. ♀.

tetralophae (Cushman). Fla.

Cremastus (Zaleptopygus) tetralophae Cushman, 1917. U. S. Natl. Mus., Proc. 53: 537. ♂.
♀.

Genus NELEOTHYMYUS Foerster

Neleothymus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 200.

Type-species: *Neleothymus (?) rufo-ornatus* Cameron. By subsequent monotypy from inclusion by Cameron, 1905.

According to Townes (1971) only two species are known.

Taxonomy: Townes, 1958. Insects of Micronesia, v. 2, no. 2, p. 68. —Townes, 1971. Amer. Ent. Inst., Mem. 17: 16-17.

attenuatus (Cushman). S. C., Tex. Townes (1971) said that *N. attenuatus* may be only subspecifically distinct from the type-species.

Cremastus (Zaleptopygus) attenuatus Cushman, 1920. U. S. Natl. Mus., Proc. 58: 286. ♂.
♀.

Genus NEOCREMASTUS Cushman

Neocremastus Cushman, 1917. U. S. Natl. Mus., Proc. 53: 509.

Type-species: *Porizon stigmaterus* Cresson. Monotypic and orig. desig.

Townes (1971) said he has seen specimens of five Nearctic species, three of them being undescribed. He also speculated that the genus probably occurs in Eurasia.

Taxonomy: Townes, 1958. Insects of Micronesia, v. 2, no. 2, p. 66. —Townes, 1971. Amer. Ent. Inst., Mem. 17: 18.

mellipes (Provancher). Que., N. Y., N. J.

Atractodes mellipes Provancher, 1875. Nat. Canad. 7: 332. ♀.

stigmaterus (Cresson). Tex.

Porizon stigmaterus Cresson, 1872. Amer. Ent. Soc., Trans. 4: 174. ♂, ♀.

Genus TEMELUCHA Foerster

Temelucha Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 148.

Type-species: *Porizon macer* Cresson. Desig. by Perkins, 1962 from four species included by Ashmead, 1900.

Paracremastus Szepligeti, 1900. Termes. Fuzetek 23: 28.

Type-species: *Paracremastus genalis* Szepligeti. Monotypic.

Tarytia Cameron, 1907. Bombay Nat. Hist. Soc., Jour. 17: 587.

Type-species: *Tarytia basimacula* Cameron. Desig. by Viereck, 1914.

Androna Cameron, 1911. Transvaal Mus., Ann. 2: 185. Syn. uncertain.

Type-species: *Androna fuscicornis* Cameron. Desig. by Viereck, 1914.

Cremastus subg. *Cremastidea* Viereck, 1912. U. S. Natl. Mus., Proc. 43: 587.

Type-species: *Cremastus (Cremastidea) chinensis* Viereck. Monotypic and orig. desig. The type-species is regarded as a synonym of *T. biguttula* (Matsumura).

Neocremastus Meyer, 1930. Rev. Russ. d'Ent. 24: 67. Preocc. by Cushman, 1917; syn. uncertain.

Type-species: *Neocremastus asiaticus* Meyer. Monotypic.

This very large genus is worldwide in distribution. The species typically parasitize lepidopterous larvae which conceal themselves in feeding.

Revision: Cushman, 1917. U. S. Natl. Mus., Proc. 53: 509-532 (as *Cremastus*, subg. *Cremastus*).

Taxonomy: Townes, 1958. Insects of Micronesia, v. 2, no. 2, p. 68.

brevicauda (Cushman). N. Mex.

Cremastus (Cremastus) brevicauda Cushman, 1917. U. S. Natl. Mus., Proc. 53: 528. ♂, ♀.

brevinervis (Cushman). Ariz.

Cremastus (Cremastus) brevinervis Cushman, 1920. U. S. Natl. Mus., Proc. 58: 282. ♀.

brevipetiolus (Cushman). N. Y., N. J., Pa., Md., Va.

Cremastus (Cremastus) brevipetiolus Cushman, 1917. U. S. Natl. Mus., Proc. 53: 525. ♂, ♀.

Temeleucha brevipetiolata (?) Walkley, 1967. In Krombein et al., U. S. Dept. Agr., Agr.

Monog. 2, Sup. 2, p. 208.

bruneiceps (Cushman). D. C.

Cremastus (Cremastus) bruneiceps Cushman, 1920. U. S. Natl. Mus., Proc. 58: 283. ♀.

carpocapsae (Cushman). Ohio. Host: *Grapholitha molesta* (Bsk.), *Laspeyresia pomonella* (L.).

Cremastus carpocapsae Cushman, 1930 (1929). U. S. Natl. Mus., Proc. 76: 11. ♂, ♀.

chilonis (Cushman). Mich., Sask., Alta. Host: *Stenochile forbesellus* (Fern.).

Cremastus chilonis Cushman, 1935. Wash. Acad. Sci., Jour. 25: 562. ♂, ♀.

Biology: Frohne, 1939. Amer. Micros. Soc., Trans. 58: 233, 325, 347.

cookii (Weed). N. Y. w. to Idaho, s. to Va., Kans. and Ariz. Host: *Ancylis comptana* (Froel.).

Cremastus cookii Weed, 1888. Ent. Amer. 4: 150. ♂, ♀.

Cremastus cookii var. *rufus* Weed, 1888. Ent. Amer. 4: 151. ♂.

ferruginea (Davis). Mass., S. Dak., and Idaho, s. to Fla. and N. Mex. Host: *Diatraea cramboidoides* Grt.

Cremastus ferrugineus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 364. ♂, ♀.

Atrometus angitioides Viereck, 1905. Kans. Acad. Sci., Trans. 19: 311. ♀.

Cremastus (Cremastus) graciliventris Cushman, 1917. U. S. Natl. Mus., Proc. 53: 522. ♀.

Taxonomy: Cushman, 1920. U. S. Natl. Mus., Proc. 58: 282.

flaviceps (Cushman). Tex., Colo.

Cremastus (Cremastus) flaviceps Cushman, 1917. U. S. Natl. Mus., Proc. 53: 521. ♂, ♀.

forbesi (Weed). Mass. s. to S. C., w. to S. Dak. and Colo. Host: *Argytaenia velutinana* (Wlk.), *Acleris minuta* (Rob.), *Sparganothis sulfureana* (Clem.), *Epiblema strenuana* (Wlk.), *Episimus argutanus* (Clem.), *Grapholitha molesta* (Bsk.), *Rhopobota naevana* (Hbn.), *Aroga trialbamaculella* (Chamb.), *Filatima persicaeella* (Murtf.), *Coleophora fuscedinella* Zell.

Cremastus forbesi Weed, 1887. Ill. State Lab. Nat. Hist., Bul. 3: 42. ♀.

Cremastus forbesii Dalla Torre, 1901. Cat. Hym., v. 3, p. 34. Emend.

Cremastus (Cremastus) tortricidis Cushman, 1917. U. S. Natl. Mus., Proc. 53: 528. ♀.

Taxonomy: Walkley, 1958. In Krombein et al., U. S. Dept. Agr., Agr. Monog. 2, Sup. 1, p. 61 (syn.).

Biology: Driggers, 1930. N. J. Agr. Expt. Sta. Bul. 510: 17. — Haden, 1935. Del. Agr. Expt. Sta. Bul. 194: 16-35.

gracilipes (Cushman). Ont., Pa., Tex. Host: *Dicymolomia julianalis* (Wlk.), *Epiblema strenuana* (Wlk.).

Cremastus (Cremastus) gracilipes Cushman, 1917. U. S. Natl. Mus., Proc. 53: 520. ♀.

Taxonomy: Cushman, 1930 (1929). U. S. Natl. Mus., Proc. 76 (25): 10.

gracilis (Cushman). N. J., Ky.

Cremastus (Cremastus) gracilis Cushman, 1917. U. S. Natl. Mus., Proc. 53: 519. ♀.

hamiltonensis (Viereck). Kans.

Thersilochus hamiltonensis Viereck, 1905. Kans. Acad. Sci. Trans. 19: 301. ♂.

grapholithae (Cushman). N. J. s. to Fla., w. to Kans. and Tex. Host: *Grapholita molesta* (Bsk.), *Laspeyresia caryana* (Fitch).

Cremastus grapholithae Cushman, 1935. Wash. Acad. Sci., Jour. 25: 561. ♂, ♀.

interruptor (Gravenhorst). Conn., N. Y., N. J., Ont., Mich.; Europe. Ecology: Arthur et al. (1964) have shown that *T. interruptor* is cleptoparasitic upon *Orgilus obscurator* (Nees).

Introduced. Host: *Rhyacionia buoliana* (D. and S.). *R. buoliana* was the target host for introductions in North America; it was not learned until after *T. interruptor* was established that it almost exclusively oviposits into *R. buoliana* larvae which have already been parasitized by *O. obscurator* and develops at the expense of the latter. Therefore it appears that *T. interruptor* is detrimental with respect to control of *R. buoliana* because it limits the effectiveness of *O. obscurator*. Walkley's (1967) Idaho record for this species was based upon a misidentified specimen.

Cremastus interruptor Gravenhorst, 1829. Ichn. Europea, v. 3, p. 736. ♂, ♀.

Cremastus ophthalmicus Holmgren, 1860 (1858). Svenska Vetensk.-Akad., Handl. (n. f.) 2: 108. ♂.

Taxonomy: Walkley, 1967. In Krombein et al., U. S. Dept. Agr., Agr. Monog. 2, Sup. 2, p. 208.

Biology: Thorpe, 1930. Bul. Ent. Res. 21: 390. — Thorpe, 1932. Parasitology 24: 109-110.

— Arthur, Stainer, and Turnbull, 1964. Canad. Ent. 96: 1030-1034.

longigenalis (Cushman). Que., Maine, N. H.

Temelucha scutellata Ashmead, 1900. In Slosson, Ent. News 11: 320. Nomen nudum.

rhyacioniae (Cushman). S. Dak., Mont. Host: *Rhyacionia frustrana bushnelli* (Bsk.).

Cremastus rhyacioniae Cushman, 1930 (1929). U. S. Natl. Mus., Proc. 76 (25): 12. ♂, ♀.

ruficeps (Cushman). Wis.

Cremastus (Cremastus) ruficeps Cushman, 1917. U. S. Natl. Mus., Proc. 53: 518. ♀.

sinuata (Cushman). Tex., Calif. Host: *Cactobrosis strigalis* (B. and McD.), *Rumatha glauacella* (Hulst).
Cremastus (*Cremastus*) *sinuatus* Cushman, 1926. U. S. Natl. Mus., Proc. 67 (23): 12. ♂, ♀.

SUBFAMILY PHRUDINAE

This small subfamily includes ten genera, three of which are represented by Nearctic species. The few species which have been reared are internal larval parasites of Coleoptera.

Genus EAROBIA Townes

Earobia Townes, 1951. In Townes and Townes, Ent. Soc. Wash., Proc. 53: 307.

Type-species: *Earobia minor* Townes. Monotypic and orig. desig.

Echthrolaricobius Perkins, 1953. Entomophaga 3: 146.

Type-species: *Echthrolaricobius paradoxus* Perkins. Monotypic and orig. desig.

This genus is known from two described species, one European and one North American. A specimen from northern Idaho in the U. S. Natl. Museum collection may represent an undescribed species. The European *E. paradoxus* has been reared from a species of *Laricobius*.

Taxonomy: Townes, 1971. Amer. Ent. Inst., Mem. 17: 27-28.

minor Townes. N. Y.

Earobia minor Townes, 1951. In Townes and Townes, Ent. Soc. Wash., Proc. 53: 307. ♂, ♀.

Genus PHRUDUS Foerster

Astrenis Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 148.

Type-species: *Hambergiella sinuata* Roman. Monotypically included and desig. by Perkins, 1962.

Phrudus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 196.

Type-species: *Phrudus monilicornis* Bridgman. By subsequent monotypy from inclusion by Dalla Torre, 1901.

Phrudus Bridgman, 1886. Ent. Soc. London, Trans. 19: 361. Preocc. by Foerster, 1868.

Type-species: *Phrudus monilicornis* Bridgman. Monotypic.

Ktenostilpnus Strobl, 1901. Naturw. Ver. Steiermark, Mitt. 37: 256.

Type-species: *Ktenostilpnus aequearticulatus* Strobl. Monotypic. The type-species is regarded as a synonym of *P. monilicornis* Bridgman.

Orona Cameron, 1905. Invertebrata Pacifica 1: 131. Preocc. by Haeckel, 1887.

Type-species: *Orona petiolaris* Cameron. Monotypic.

Mengersenia Schmiedeknecht, 1907. Hym. Mitteleuropas, p. 606.

Type-species: *Mengersenia paradoxus* Schmiedeknecht. Monotypic.

Hambergiella Roman, 1909. In Hamberg, Naturw. Untersuch. des Sarekgebirges in Schwedisch-Lappland, v. 4, p. 359.

Type-species: *Hambergiella sinuata* Roman. Monotypic.

Vendolius Roman, 1914. Arkiv for Zool. 9 (2): 35.

Type-species: *Vendolius stilpinus* Roman. Monotypic. The type-species is regarded as a synonym of *P. monilicornis* Bridgman.

This is a small Holarctic genus. Townes (1971) said he knew about 15 species, most of which were undescribed.

Taxonomy: Townes, 1971. Amer. Ent. Inst., Mem. 17: 28-29.

dakota Cushman. Western S. Dak.

Phrudus dakota Cushman, 1927. U. S. Natl. Mus., Proc. 72 (13): 17. ♀.

exarealatus Cushman. N. Y.

Phrudus exarealatus Cushman, 1927. U. S. Natl. Mus., Proc. 72 (13): 19. ♀.

petiolaris (Cameron). Mid-coastal Calif.

Orona petiolaris Cameron, 1905. Invertebrata Pacifica 1: 131. ♀.

Genus PEUCOBIUS Townes

Peucobius Townes, 1971. Amer. Ent. Inst., Mem. 17: 29.

Type-species: *Pencobius fulvus* Townes. Orig. desig.

This genus is not known to occur outside the Nearctic Region.

fulvus Townes. Md., w. N. C., Mich. Ecology: The holotype and six paratypes were collected in Md. in late April; they were swept from branches of *Pinus virginiana* bearing staminate cones which had not yet shed their pollen.

Pencobius fulvus Townes, 1971. Amer. Ent. Inst., Mem. 17: 30. ♂, ♀.

piceus Townes. N. Mex., n. Utah, e. Calif. Ecology: Three paratypes from Utah were collected on June 19 at an elevation of 8000 ft.; they were swept from branches of *Pinus contorta* bearing staminate cones which had not shed their pollen. The significance of the latter circumstance seems obscured by the fact that a paratype from Cloudcroft, N. Mex. was collected on August 28, certainly well after the pines there had shed their pollen.

Pencobius piceus Townes, 1971. Amer. Ent. Inst., Mem. 17: 30. ♂, ♀.

SUBFAMILY TERSILOCHINAE

This is a small subfamily including 15 described genera, ten of which are represented by Nearctic species. Most of the species are apparently internal larval parasites of Coleoptera. However, one Nearctic species of an undescribed genus has been reared from the eriocraiid microlepidopteran *Dysericrana griseocapitella* (Wlshm.), and at least several species of the genus *Allophrooides* have been reared from sawflies of the genus *Xyela*. Perhaps the systematic position of the hosts is not so important as the fact that all or most of them construct pupal cells, cases, or cocoons in the soil.

Taxonomy: Townes, 1971. Amer. Ent. Inst., Mem. 17: 33-49 (genera of world).

Genus ALLOPHROOIDES Horstmann

Allophrooides Horstmann, 1971. Zool. Staatssamml. Muenchen, Veroeffentl. 15: 52.

Type-species: *Porizon boops* Gravenhorst. Orig. desig.

This is a Holarctic genus of moderate size. None of the Nearctic species have been described. Labels on specimens in the U. S. Natl. Museum collection and unpublished rearing notes of R. A. Cushman indicate that at least several Nearctic species have been reared from larvae of *Xyela*. Some of these species do not agree very well with the generic redefinition of Townes (1971), particularly with respect to the position of the glymma on the first tergite. Apparently, the limits of the genus will either have to be greatly broadened or significantly restricted.

Genus PROBLES Foerster

Probles Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 147.

Type-species: *Probles melanarius* Szepligeti. By subsequent monotypy from inclusion by Szepligeti, 1899. The type-species is regarded as a synonym of *P. erythrostomus* (Gravenhorst).

This is a moderately large genus; according to Townes (1971) its distribution is worldwide. Horstmann (1971) recognized three subgenera in his treatment of the European species.

Revision: Horstmann, 1971. Zool. Staatssamml. Muenchen, Veroeffentl. 15: 81-97 (European spp.).

Taxonomy: Townes, 1971. Amer. Ent. Inst., Mem. 17: 37-38.

maturus (Provancher). Que., Wyo.

Thersilochus maturus Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 92. ♀.

Taxonomy: Townes, 1971. Amer. Ent. Inst., Mem. 17: 38.

Genus BARYCNEMIS Foerster

Barycnemis Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 147.

Type-species: *Porizon claviventris* Gravenhorst. By subsequent monotypy from inclusion by Brischke, 1880.

Leptopygus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 148.

Type-species: *Ichneumon harpurus* Schrank. Desig. by Viereck, 1914 from two species included by Thomson, 1889.

Cratophion Thomson, 1889. Opusc. Ent. 13: 1363.

Type-species: *Porizon gravipes* Gravenhorst. Desig. by Viereck, 1914.

Cyrtophion Thomson, 1889. Opusc. Ent. 13: 1367.

Type-species: *Porizon dissimilis* Gravenhorst. Desig. by Viereck, 1914.

Zasternalaulax Viereck, 1912. U. S. Natl. Mus., Proc. 42: 647.

Type-species: *Zasternalaulax simplicicornis* Viereck. Monotypic and orig. desig.

Porizonidea Viereck, 1914. U. S. Natl. Mus., Bul. 83: 122, 158. The alternate spelling

"*Parizonidea*" appeared on p. 158.

Type-species: *Ichneumon exhaustator* Fabricius. Monotypic. Article 68 (c) of the International Code of Zoological Nomenclature indicates that *I. exhaustator* is the type-species of *Porizonidea* by monotypy, in spite of Viereck's original designation, which reads: "Type--(*Porizon hostilis* Gravenhorst)= *Porizon exhaustator* (Fabricius)."

This is a Holarctic genus of moderate size.

Taxonomy: Townes, 1971. Amer. Ent. Inst., Mem. 17: 38-40.

bellator (Mueller). N. H., N. Y., Colo.; Greenland; Europe.

Ichneumon bellator Mueller, 1776. Zool. Danicae Prodromus, p. 158. Sex not indicated.

Barycnemis slossonae Ashmead, 1906. In Slosson, Ent. News 17: 324. Nomen nudum.

Barycnemis slossonae Cushman, 1922. U. S. Natl. Mus., Proc. 61 (8): 8. ♀.

Taxonomy: Townes, 1971. Amer. Ent. Inst., Mem. 17: 40

borealis (Provancher). Que.

Porizon boreale Provancher, 1879. Nat. Canad. 11: 206. ♀ = ♂. Preocc. by Zetterstedt, 1838 and Provancher, 1877; not renamed here because of uncertain synonymy. Contrary to the argument of Barron (1975), Townes (1945) was correct in treating this as a description of a new species rather than as a redescription of *Porizon borealis* Provancher, 1877, a synonym of *B. rugosa* (Provancher). Were it not for the fact that Provancher indicated that his 1879 description was that of a new species, Barron's argument might have some validity. According to Barron, Provancher's 1877 and 1879 descriptions are based on different specimens which are not conspecific.

Taxonomy: Townes, 1945. Amer. Ent. Soc., Mem. 11: 704. — Barron, 1975. Nat. Canad. 102: 434.

exhaustator (Fabricius). Maine, N. H., Ont.; Europe.

Ichneumon exhaustator Fabricius, 1798. Sup. Ent. System., p. 226. Sex not indicated.

Porizon hostilis Gravenhorst, 1829. Ichn. Europaea, v. 3, p. 753. ♂, ♀.

Porizon gravipes Gravenhorst, 1829. Ichn. Europaea, v. 3, p. 757. ♀.

Thersilochus errabundus Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 92. ♀. N. syn.

Notopygus americana Harrington, 1892. Canad. Ent. 24: 98. ♀. N. syn.

Taxonomy: Townes, 1971. Amer. Ent. Inst., Mem. 17: 40.

harpura (Schrank). Que., N. Y., S. Dak., Colo., N. Mex., Idaho, s. B. C.; Europe.

Ichneumon harpurus Schrank, 1802. Fauna Boica, v. 2, pt. 2, p. 294. ♀.

Cremastus angularis Provancher, 1874. Nat. Canad. 6: 176. ♂.

Mesoleptus micans Provancher, 1875. Nat. Canad. 7: 114. "♂" = ♂, ♀.

Porizon elongatum Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 91. ♂, ♀.

Atractodes politus Ashmead, 1890. Colo. Biol. Assoc., Bul. 1: 23. ♂, ♀. N. syn. Preocc. in *Atractodes* by Provancher, 1874.

Porizon canaliculatus Viereck, 1903. In Skinner, Amer. Ent. Soc., Trans. 29: 93. ♂. N. syn.

Taxonomy: Townes, 1971. Amer. Ent. Inst., Mem. 17: 39-40.

linearis Ashmead. Del., Ont.

Barycnemis linearis Ashmead, 1895. Ent. Soc. Wash., Proc. 3: 328. ♀.

rugosoma (Provancher). Que., N. H., N. Y.

Porizon borealis Provancher, 1877. Nat. Canad. 9: 14. ♂. Preocc. by Zetterstedt, 1839.

Porizon rugosum Provancher, 1879. Nat. Canad. 11: 206. "♀" = ♂.

Leptopygus monticola Ashmead, 1897. In Slosson, Ent. News 8: 237. Nomen nudum.
simplicicornis (Viereck). Colo., Mont., Wash., Oreg. Host: *Pissodes* sp.
Zasternaulax simplicicornis Viereck, 1912. U. S. Natl. Mus., Proc. 42: 647. ♂.

Genus PECTINOLOCHUS Aubert

Tersilochus subg. *Pectinolochus* Aubert, 1960. Soc. Ent. de Mulhouse, Bul. 16: 65.

Type-species: *Tersilochus (Pectinolochus) unguiculator* Aubert. Monotypic.

Polemolochus Aubert, 1964. Soc. Ent. de Mulhouse, Bul. 20: 39.

Type-species: *Thersilochus ensifer* Brischke. Monotypic and orig. desig.

This is a Holarctic genus. Townes (1971) said he had seen 14 species, most of which were undescribed, but he did not indicate how many of these are Nearctic. Horstmann (1971) treated four European species.

Revision: Horstmann, 1971. Zool. Staatssamml. Muenchen, Veroeffentl. 15: 55-58.

Taxonomy: Townes, 1971. Amer. Ent. Inst., Mem. 17: 41.

Genus TERSILOCHUS Holmgren

Tersilochus Holmgren, 1859 (1858). Svenska Vetensk.-Akad., Ofvers af ... Forhandl. 15: 329.

Type-species: *Porizon jocator* Gravenhorst. Monotypic. The type-species is Gravenhorst's misidentification of *Ichneumon jocator* Fabricius. The correct name for *jocator* in the sense of Gravenhorst is *T. cognatus* Holmgren.

Thersilochus(!) Holmgren, 1860 (1858). Svenska Vetensk.-Akad. Handl. (n. f.) 2: 135.

This is a Holarctic genus of moderate size.

Revision: Horstmann, 1971. Zool. Staatssamml. Muenchen, Veroeffentl. 15: 114-134 (European spp.).

Taxonomy: Horstmann, 1969 (1968). Opusc. Zool. 102: 1-2.

alaskensis (Ashmead). Southwestern Alaska.

Isurgus alaskensis Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 239. ♀.

conotracheli (Riley). Que. s. to w. N. C., w. to Iowa. Host: *Conotrachelus anaglypticus* (Say), *C. nenuphar* (Herbst), *C. retentus* (Say).

Porizon conotracheli Riley, 1871. Mo. State Ent., Ann. Rpt. 3: 28. ♂, ♀.

Biology: Cushman, 1916. Jour. Agr. Res. 6: 847-855.

deficiens (Provancher). Ont.

Stilpnus deficiens Provancher, 1888. Addit. Corr. Faune Ent. Canada Hym., p. 359. ♀.

Genus STETHANTYX Townes

Stethantyx Townes, 1971. Amer. Ent. Inst., Mem. 17: 42.

Type-species: *Stethantyx nearctica* Townes. Monotypic and orig. desig.

This is a Neotropic and Nearctic genus of moderate size.

nearctica Townes. Md., D. C., e. N. C., n.w. S. C.; n. Mexico.

Stethantyx nearctica Townes, 1971. Amer. Ent. Inst., Mem. 17: 43. ♂, ♀.

Genus ALLOPHRYS Foerster

Allophrys Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 147.

Type-species: *Thersilochus oculatus* Ashmead. Desig. by Viereck, 1914 from three species included by Szepligeti, 1905.

This is a small Neotropic, Nearctic, Oriental, and Ethiopian genus. An undescribed species occurs in the southeastern U. S. A.

Genus PHRADIS Foerster

Ischnobatis Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 148.

Phradis Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 148.

Type-species: *Thersilochus (Phradis) brevis* Brischke. By subsequent monotypy from inclusion by Brischke, 1880.

Eutomus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 148.

Type-species: *Isurgus lanceolatus* Szepligeti. Monotypically included and desig. by Viereck, 1914.

Isurgus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 148.

Type-species: *Isurgus lanceolatus* Szepligeti. Desig. by Viereck, 1914 from nine species included by Szepligeti, 1899.

This is a Holarctic genus of moderate size. Horstmann (1971) treated 11 European species, and Townes (1971) said he had seen five Nearctic species, all of which he believed to be undescribed.

Revision: Horstmann, 1971. Zool. Staatssamml. Muenchen, Veroeffentl. 15: 67-77 (European spp.).

Taxonomy: Townes, 1971. Amer. Ent. Inst., Mem. 17: 46.

Genus DIAPARSIS Foerster

Ischnobatis Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 148.

Type-species: *Thersilochus (Ichnobatis[!]) stramineipes* Brischke. By subsequent monotypy from inclusion by Brischke, 1880.

Diaparsis Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 149.

Type-species: *Porizon nutritor* Gravenhorst. Desig. by Perkins, 1962 from 12 species included by Thomson, 1889. The type-species is Gravenhorst's misidentification of *Ophion nutritor* Fabricius. According to Horstmann (1971) *nutritor* in the sense of Gravenhorst is a synonym of *Diaparsis truncata* (Gravenhorst).

Diapsarsus Thomson, 1889. Opusc. Ent. 13: 1369. Emend.

Luchatema Walkley, 1956. Ent. News 67: 154

Type-species: *Luchatema baldufi* Walkley. Monotypic and orig. desig.

According to Townes (1971) this is a large genus of Holarctic, Oriental, and Ethiopian distribution. Horstmann (1971) treated seven European species. Two European species which are parasites of *Oulema melanopus* (L.) have been released in North America; one of these, *D. carinifer* (Thomson), has not become established; the other, a new species soon to be described by Dr. Klaus Horstmann, is established or at least has been recovered in w. N. Y., Pa., w. W. Va., Ohio, s. Mich., and n. Ind. according to unpublished information supplied by T. L. Burger.

Revision: Horstmann, 1971. Zool. Staatssamml. Muenchen, Veroeffentl. 15: 100-107 (European spp.).

Taxonomy: Perkins, 1962. Brit. Mus. (Nat. Hist.) Ent., Bul. 11: 417, 431. — Horstmann, 1969 (1968). Opusc. Zool. 102: 2. — Townes, 1971. Amer. Ent. Inst., Mem. 17: 47-48.

americana (Brues). Mass., R. I., N. Y., Md., W. Va., Colo., N. Mex.? Ecology: Occurs in late summer and fall on flowers of *Solidago*.

Heterocola americana Brues, 1916. Ent. News 27: 331. ♀.

Taxonomy: Townes, 1971. Amer. Ent. Inst., Mem. 17: 48.

baldufi (Walkley). Mass. w. to s. Sask., s. to central Ill., n.e. Kans., and s.w. Wyo. Host:

Rhynchites bicolor (F.).

Luchatema baldufi Walkley, 1956. Ent. News 67: 154. ♂, ♀.

carinifer (Thomson). Europe. Introduced in Michigan in 1967 and a number of times since, without becoming established. Stehr and Haynes (1972) reported the species as established, but the record of establishment applies not to *carinifer* but to *Diapsarsis* n. sp. (see above introductory paragraph on *Diaparsis*).

Thersilochus carinifer Thomson, 1889. Opusc. Ent. 13: 1392. ♀. Bibliographic information published by Laboulbene (1889) indicates that fascicle 13 of Opusc. Ent. was published prior to June 12, 1889.

Thersilochus carinatus Bridgman, 1889. Ent. Soc. London, Trans. 37: 430. ♀. Information published by Wheeler (1912) shows that Bridgman's paper was published on Oct. 28, 1889.

Thersilochus vernalis Szepligeti, 1899. Termes. Fuzetek 22: 228. ♀.

Taxonomy: Laboulbene, 1889. Soc. Ent. de France, Ann. (6) 9: cxxiv in Bul. —Wheeler, 1911. Ent. Soc. London, Trans. 59: 759. —Horstmann, 1971. Zool. Staatssamml. Muenchen, Veroeffentl. 15: 103.

Biology: Stehr and Haynes, 1972. Jour. Econ. Ent. 65: 405-407. —Dysart, Maltby, and Brunson, 1973. Entomophaga 18: 139-142. —Montgomery and Dewitt, 1975. Ent. Soc. Amer., Ann. 68: 574-578 (egg and larval instars).

Genus ANEUCLIS Foerster

Aneuclis Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 147.

Type-species: *Isurgus rufipes* Szepligeti. Desig. by Viereck, 1914 from five species and two synonyms included by Szepligeti, 1905.

This is a small genus of Holarctic, Oriental, and Ethiopian distribution. According to Townes (1971) there is one Nearctic species; apparently, it is undescribed.

Revision: Horstmann, 1971. Zool. Staatssamml. Muenchen, Veroeffentl. 15: 59-63 (European spp.).

Taxonomy: Townes, 1971. Amer. Ent. Inst., Mem. 17: 48-49.

UNPLACED TAXA OF TERSILOCHINAE

According to Townes and Townes (1951), the three native species which here remain unplaced have elongate thyridia. Some of these may prove to belong in *Probles*. The introduced species which I have added to the unplaced category also have elongate thyridia, but do not seem referable to *Probles* because of the shortness of their ovipositors (as long as apical depth of abdomen) combined with the shortness of the "foveate groove" on the mesopleurum.

Taxonomy: Townes and Townes, 1951. In Muesebeck *et al.*, U. S. Dept. Agr., Agr. Monog. 2: 394.

Aneuclis(?) erythrostomus Cameron, 1905. Invertebrata Pacifica 1: 131. ♀. Western Nev. If the species belongs in *Probles* it would be preocc. by *erythrostomus* (Gravenhorst), 1829.

Taxonomy: Townes, 1961. Ent. Soc. Wash., Proc. 63: 103.

Porizon argentinensis Blanchard, 1945. Soc. Ent. Argentina, Rev. 12: 308. ♀. Argentina, Uruguay. Introduced in s. Calif. in 1946, without becoming established. Host: *Listroderes costirostris obliquus* (Klug). See *P. parkeri* Blanchard.

Taxonomy: Kerrich, 1961. Eos 37: 497-503.

Biology: Parker, Berry, and Silveria, 1950. U. S. Dept. Agr., Tech. Bul. 1016: 1-14, 26-28. —Wilson and Wearne, 1962. Austral. Jour. Agr. Res. 13: 253.

Morphology: Short, 1959. U. S. Natl. Mus., Proc. 110: 496 (final-instar larva).

Porizon parkeri Blanchard, 1945. Soc. Ent. Argentina, Rev. 12: 305. ♀. Argentina, Uruguay. Introduced in s. Calif. in 1946; it did not become established, although an undescribed thelytokous species which was identified as the "parthenogenetic strain" of *parkeri* by Kerrich (1961) is widely established in s. Calif. according to Clancy (1969). Host: *Listroderes costirostris obliquus* (Klug). The undescribed thelytokous species which is established in Calif. is more similar in coloration to *P. argentinensis* (which see) than to *P. parkeri* and, therefore, was probably released in Calif. along with the former species. These three species, which have also been released in Australia, appear to represent an undescribed genus.

Taxonomy: Kerrich, 1961. Eos 37: 497-503.

Biology: Parker, Berry, and Silveria, 1950. U. S. Dept. Agr., Tech. Bul. 1016: 1-14, 26-28. —Wilson and Wearne, 1962. Austral. Jour. Agr. Res. 13: 253. —Clancy, 1969. Jour. Econ. Ent. 62: 743-745.

Thersilochus montanus Ashmead, 1890. Colo. Biol. Assoc., Bul. 1: 23. ♂. Western Colo. I have studied the holotype and suppose it may belong in the genus *Probles* as defined by Townes (1971); because placement of the species in *Probles* would preoccupy *Probles (Euporizon) montanus* Horstmann (1971), I leave it unplaced pending both identification of the female and a more precise redefinition of *Probles*.

Taxonomy: Horstmann, 1971. Zool. Staatssamml. Muenchen, Veroeffentl. 15: 91. —Townes, 1971. Amer. Ent. Inst., Mem. 17: 37-38.

Thersilochus pallidipes Dalla Torre, 1901. Cat. Hym., v. 3, p. 43. Emend. of *pallipes* Provancher and syn. of *provancheri* Ashmead (which see).

Thersilochus pallipes Provancher, 1882. Nat. Canad. 13: 367. ♀. Que. Preocc. by Holmgren, 1860; replaced by *provancheri* Ashmead (which see).

Taxonomy: Barron, 1975. Nat. Canad. 102: 526.

Thersilochus Provancheri Ashmead, 1890. Colo. Biol. Assoc., Bul. 1: 24. N. name for *pallipes* Provancher.

Thersilochus provancheri Cushman, 1922. U. S. Natl. Mus., Proc. 61 (8): 30. Unnecessary n. name for *pallipes* Provancher; preocc. by Ashmead, 1890. Cushman was unaware that Ashmead (1890) had validated the name *provancheri*, and thought that it had been published only as a nomen nudum.

SUBFAMILY OPHIONINAE

Townes (1971) divided the subfamily into two tribes, the Ophionini and the Enicospilini. Ophioniniae are internal parasites, and the usual hosts are larvae of Lepidoptera. *Ophion nigrovartius* (Provancher), however, is a larval parasite of *Phyllophaga* (Coleoptera: Scarabaeidae).

Taxonomy: Cushman, 1947. U. S. Natl. Mus., Proc. 96: 417-482 (genera of world). —Townes, 1971. Amer. Ent. Inst., Mem. 17: 49-82 (genera of world).

TRIBE OPHIONINI

Fourteen genera are currently recognized, and seven of these are represented by Nearctic species.

Genus OPHION Fabricius

Ophion Fabricius, 1798. Sup. Ent. System., p. 210, 235.

Type-species: *Ichneumon luteus* Linnaeus. Desig. by Curtis, 1835.

Paniscus Schrank, 1802. Fauna Boica, v. 2, pt. 2, p. 316. See introductory discussion of genus *Netelia*.

Type-species: *Ichneumon luteus* Linnaeus. Monotypic.

Psylonychia Szepeligi, 1905. In Wytzman, Gen. Ins., fasc. 34, p. 21.

Type-species: *Stenophthalmus algirus* Szepeligi. Monotypically included and desig. by Cushman, 1947.

Stenophthalmus Szepeligi, 1905. In Wytzman, Gen. Ins., fasc. 34, p. 23. Preocc. by Becker, 1903.

Type-species: *Stenophthalmus algirus* Szepeligi. Desig. by Viereck, 1914.

Ophion subg. *Pachyprotoma* Kohl, 1906 (1905). In Penther and Zederbauer, Wien. Mus. der Naturgesch., Ann. 20: 223.

Type-species: *Ophion (Pachyprotoma) capitatus* Kohl. Monotypic.

Australophion Morley, 1912. Rev. Ichn. Brit. Mus., v. 1, p. 30.

Type-species: *Ophion peregrinus* Smith. Monotypic.

Neophion Morley, 1912. Rev. Ichn. Brit. Mus., v. 1, p. 30.

Type-species: *Neophion crassus* Morley. Desig. by Viereck, 1914.

Ophion subg. *Platophion* Hellen, 1926. Soc. pro Fauna et Flora Fenn., Acta. 56 (6): 13.

Type-species: *Ophion areolaris* Brauns. Desig. by Cushman, 1947.

Potophion Cushman, 1947. U. S. Natl. Mus., Proc. 96: 442.

Type-species: *Potophion caudatus* Cushman. Monotypic and orig. desig.

This very large genus is worldwide in distribution.

Revision: Hooker, 1912. Amer. Ent. Soc., Trans. 38: 21-50.

bilineatus Say. Ind. The type locality would presumably have been southwestern Ind. The original description gives the length of *bilineatus* as "seven-twentieths of an inch," but because the additional remarks of Say (1836) seem to confirm placement of this species in *Ophion*, that measurement was presumably an error for seven-tenths of an inch. *Ophion bilineatus* Say, 1829. Contrib. Maclurian Lyceum to Arts and Sci. 1: 75. Sex not indicated. No type specimen is known to remain in existence.

Taxonomy: Say, 1836. Boston Jour. Nat. Hist. 1: 239, 240. —Townes and Townes, 1951. In Muesebeck et al., U. S. Dept. Agr., Agr. Monog. 2: 402.

coloradensis (felt). Colo.

Genophion coloradensis Felt, 1904. N. Y. State Mus., Bul. 76: 124. ♀.

crassus (Morley). N. S.

Neophion crassus Morley, 1912. Rev. Ichn. Brit. Mus., v. 1, p. 31. ♂.

elongatus Hooker. Colo., N. Mex., Ariz.

Ophion bilineatus elongatus Hooker, 1912. Amer. Ent. Soc., Trans. 38: 30. ♀.

epallidus Walkley. Southern Colo.

Ophion bilineatus var. *pallida* Cockerell, 1889. Sci. Gossip 25: 92. Sex not indicated.

Preocc. by Taschenberg, 1875.

Ophion epallidus Walkley, 1958. In Krombein et al., U. S. Dept. Agr., Agr. Monog. 2, Sup. 1, p. 62. N. name for *pallida* Cockerell.

flavidus Brulle. N. Y. s. to Fla., w. to n.e. Kans. and s. Tex.; West Indies, Costa Rica,

Guatamala, Brazil, Paraguay, Uruguay, Argentina. Host: *Agrotis ipsilon* (Hufn.),

Heliothis zea (Bod.), *Peridroma saucia* (Hbn.), *Spodoptera eridania* (Cram.).

Ophion flavidus Brulle, 1846. In Lepeletier, Hist. Nat. Ins. Hym., v. 4, p. 143. [female].

Ophion biangularis Taschenberg, 1875. Ztschr. f. Naturw. 46: 432. ♀.

Ophion aencyloneura Cameron, 1886. Biol. Cent.-Amer., Hym., v. 1, p. 294. ♀.

Ophion diversus Szeppligeti, 1906. Mus. Natl. Hungarici, Ann. 4: 131. ♂, ♀.

Ophion concolor Szeppligeti, 1906. Mus. Natl. Hungarici, Ann. 4: 131. ♂. Preocc. by Cresson, 1865.

Ophion politor Morley, 1912. Rev. Ichn. Brit. Mus., v. 1, p. 56. ♀.

Taxonomy: Townes and Townes, 1966. Amer. Ent. Inst., Mem. 8: 168-169 (syn.).

Morphology: Cushman, 1947. U. S. Natl. Mus., Proc., v. 96, pl. 52, fig. 43 (metathorax and propodeum).

idoneus Viereck. Mass. w. to s. Man., s. to n. Va., Tenn., and n.e. Kans. Host: *Sunira bicolorago* (Gn.).

Ophion idoneum Viereck, 1905. Kans. Acad. Sci., Trans. 19: 312. ♂.

Morphology: Cushman, 1947. U. S. Natl. Mus., Proc., v. 96, pl. 49, fig. 3 (final-instar larva).

magniceps Hooker. Mont.?, Calif.

Ophion abnormis magniceps Hooker, 1912. Amer. Ent. Soc., Trans. 38: 36. ♀ (♂ misdet?).

nigrovarius Provancher. N. S. s. to n. Va., w. to Minn., Colo., and Tex. Host: *Phyllophaga fusca* (Frol.). The name *bifoveolatus* Brulle was for many years incorrectly applied to this species; see *Eucospilus bifoveolatus* (Brulle).

Ophion nigrovarius Provancher, 1874. Nat. Canad. 6: 104. ♂, ♀.

Eurycampus nova-scotiae Morley, 1912. Rev. Ichn. Brit. Mus., v. 1, p. 29. ♀.

Taxonomy: Townes, 1961. Ent. Soc. Wash., Proc. 63: 106, 111. —Barron, 1975. Nat. Canad. 102: 519.

slossonae Davis. N. H. w. to w. S. Dak., s. to n. Ga. and s. Tex. Host: *Acronicta americana* (Harris).

Ophion slossonae Davis, 1893. Ent. News 4: 135. ♂.

Ophion ferruginipennis Felt, 1904. N. Y. State Mus., Bul. 76: 122. ♀.

tityri Packard. Mass., N. Y., N. J., Mich. Host: *Epargyreus clarus* (Cram.).

Ophion tityri Packard, 1881. Boston Soc. Nat. Hist., Proc. 21: 19. ♂.

Genus CLISTORAPHA Cushman

Clistorapha Cushman, 1947. U. S. Natl. Mus., Proc. 96: 450.

Type-species: *Ophion subfuliginosus* Ashmead. Monotypic and orig. desig.

This is a small Holarctic genus.

subfuliginosa (Ashmead). Ariz.; n.w. Mexico.

Ophion subfuliginosus Ashmead, 1894. Calif. Acad. Sci., Proc. (2) 4: 126. ♂, ♀.

Genus BOETHONEURA Cushman

Boethoneura Cushman, 1947. U. S. Natl. Mus., Proc. 96: 451.

Type-species: *Boethoneura arida* Cushman. Monotypic and orig. desig.

This is a small Nearctic and Neotropic genus.

arida Cushman. Ariz., Nev.: n.w. Mexico.

Boethoneura arida Cushman, 1947. U. S. Natl. Mus., Proc. 96: 452. ♀.

Genus TROPHOPHION Cushman

Trophophion Cushman, 1947. U. S. Natl. Mus., Proc. 96: 447.

Type-species: *Trophophion tenuiceps* Cushman. Monotypic and orig. desig.

Only one species is known.

tenuiceps Cushman. Ariz., s. Calif.

Trophophion tenuiceps Cushman, 1947. U. S. Natl. Mus., Proc. 96: 449. ♂, ♀.

Genus APATOPHION Shestakov

Apatophion Shestakov, 1926. Konowia 5: 262.

Type-species: *Apatophion mirsa* Shestakov. Monotypic and orig. desig.

This is a small Holarctic genus. According to Townes (1971) there are two undescribed species in the central United States.

Taxonomy: Townes, 1971. Amer. Ent. Inst., Mem. 17: 59-60.

Genus GENOPHION Felt

Genophion Felt, 1904. N. Y. State Mus., Bul. 76: 123.

Type-species: *Genophion gilletti* Felt. Orig. desig.

Chilophion Cushman, 1947. U. S. Natl. Mus., Proc. 96: 454.

Type-species: *Ophion abnormus* Felt. Monotypic and orig. desig.

This is a small Nearctic genus, a number of species being undescribed.

Taxonomy: Townes, 1971. Amer. Ent. Inst., Mem. 17: 61-62 (syn.).

abnormus (Felt). Southwestern S. Dak., s.w. Kans., s.e. Wyo., Colo.

Ophion abnormum Felt, 1904. N. Y. State Mus., Bul. 76: 121. ♀.

Eremotylus feli Viereck, 1905. Kans. Acad. Sci., Trans. 19: 312. ♀.

Ophion abnormis Hooker, 1912. Amer. Ent. Soc., Trans. 38: 47. Emend.

costalis (Cresson). Colo., s. Idaho, s. Oreg.

Ophion costale Cresson, 1879 (1878). Acad. Nat. Sci. Phila., Proc. 30: 366. ♀. Cresson cited the type locality as "Klamath Co., California," but there has never been a Klamath Co. anywhere except in Oreg.

Genophion gilletti Felt, 1904. N. Y. State Mus., Bul. 76: 123. ♀.

TRIBE ENICOSPILINI

Only four of the 20 genera currently recognized genera have Nearctic species, the species of Enicosplinini being most numerous in the tropics.

Genus RHYNCHOPHION Enderlein

Rhyynchophion Enderlein, 1912. Zool. Anz. 39: 630.

Type-species: *Rhyynchophion odontandroplax* Enderlein. Monotypic and orig. desig.

This is a small Neotropic and Nearctic genus.

flammipennis (Ashmead). Southeastern Ariz.; Mexico, Nicaragua, Ecuador.

Thyreodon flammipennis Ashmead, 1894. Calif. Acad. Sci., Proc. (2) 4: 125. ♀.

Genus THYREODON Brulle

Thyreodon Brulle, 1846. In Lepeletier, Hist. Nat. Ins. Hym., v. 4, p. 150.

Type-species: *Thyreodon cyaneus* Brulle. Desig. by Hooker, 1912.

Athyreodon Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 87.

Type-species: *Athyreodon thoracicus* Ashmead. Monotypic and orig. desig. The type-species is regarded as a synonym of *T. atriventris atriventris* (Cresson).

Tipulophion Kriechbaumer, 1901. Ztschr. System. Hym. Dipt. 1: 75.

Type-species: *Tipulophion gigas* Kriechbaumer. Monotypic. The type-species is regarded as a subspecies of *T. atriventris* (Cresson).

Macrophiion Szeppligeti, 1905. In Wytsman, Gen. Ins., fasc. 34, p. 32.

Type-species: *Macrophiion ornatus* Szeppligeti. Desig. by Viereck, 1912. The type-species is regarded as a synonym of *T. atriventris atriventris* (Cresson).

Oleter Shestakov, 1926. Konowia 5: 259.

Type-species: *Oleter selenactus* Shestakov. Monotypic and orig. desig. The type-species is regarded as a synonym of *T. laticinctus* Cresson.

This is a large genus of Neotropic and Nearctic distribution, the majority of the species being Neotropic.

atricolor atricolor (Olivier). Que. w. to s. Man., s. to Fla. and e. Tex. Host: *Lapara coniferarum* (J. E. S.), *L. bombycoides* Wlk., *Paonias excaecatus* (J. E. S.).

Ophion atricolor Olivier, 1812 (1811). In Olivier and Latreille, Encycl. Meth., Dict. Ins., v. 8, p. 511. ♀.

Thyreodon brullei Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey Bul. 22: 287. ♂, ♀. Validated as a "new name" for "*T. morio* Authors, not Fabricius." Viereck gave a few descriptive remarks, gave data for two specimens he had seen from Conn., and referred to the figure of Howard (1902). The specimen in the U. S. National Museum upon which Howard's figure is based is here selected as lectotype; it is a female collected at Nyack, N. Y. by J. L. Zabriskie in 1883.

Taxonomy: Howard, 1902. The Insect Book, pl. 10, fig. 15.

atricolor flavicornis (Say). Kans., Colo., N. Mex., s.e. Idaho, Utah, Ariz.

Anomalon flavicornis Say, 1823. West. Quart. Rptr. 2: 73. Sex not indicated.

Thyreodon snowi Viereck, 1905. Kans. Acad. Sci., Trans. 19: 313. ♀.

Thyreodon morio transitionalis Viereck, 1906. Amer. Ent. Soc., Trans. 32: 225. ♀.

fernaldi Hooker. Colo., Ariz.; n. Mexico.

Thyreodon fernaldi Hooker, 1912. Amer. Ent. Soc., Trans. 38: 131. ♂, ♀.

ornatipennis Cresson. N. Mex.; n. Mexico.

Thyreodon ornatipennis Cresson, 1874 (1873). Acad. Nat. Sci. Phila., Proc. 25: 376. ♀.

Genus SIMOPHION Cushman

Simophion Cushman, 1947. U. S. Natl. Mus., Proc. 96: 446.

Type-species: *Simophion excarinatus* Cushman. Monotypic and orig. desig.

A single species is known to the author. Cushman said he had seen four undescribed species, and it is likely that at least some of them were only color variants of *excarinatus*. It is apparently not known if the Palearctic species *S. calvus* Viktorov and *S. victorovi* Malyavin really belong in *Simophion*.

excarinatus Cushman. Southwestern Tex., s. N. Mex., s. Ariz., s.e. Calif.

Simophion excarinatus Cushman, 1947. U. S. Natl. Mus., Proc. 96: 447. ♀.

Genus ENICOSPILUS Stephens

Enicospilus Stephens, 1829. System. Cat. Brit. Ins., p. 352. Nomen nudum.

Enicospilus Stephens, 1835. Illus. Brit. Ent., v. 7, p. 126.

Type-species: *Enicospilus merdarius* Stephens. By subsequent monotypy from inclusion by Stephens, 1845. *E. merdarius* Stephens is preocc. in *Enicospilus* by *merdarius* (Gravenhorst); *merdarius* Stephens is a synonym of *Enicospilus ramidulus* (Linnaeus) (n. syn.). The details of the excellent discussion by Hooker (1912) appear to be correct except that Stephens (1845) did not cite any author for the name *Enicospilus merdarius*, and Stephens (1846) indicated that the figure to which the combination *Enicospilus merdarius* referred was *E. combustus* (Gravenhorst), presently a synonym of *E. ramidulus* (Linnaeus), and he distinguished *E. combustus* from *E. merdarius* (Gravenhorst).

Henicospilus Agassiz, 1846. Nomencl. Zool. Index Univ., p. 138. Emend.

Allocampitus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 150.

Type-species: *Ophion undulatus* Gravenhorst. By subsequent monotypy from inclusion by Thomson, 1888.

Ophion subg. *Dispilus* Kriechbaumer, 1894. Berlin. Ent. Ztschr. 39: 309.

Type-species: *Ophion (Dispilus) natalensis* Kriechbaumer. Monotypic.

Pleuroneurophion Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 86.

Type-species: *Pleuroneurophion hawaiiensis* Ashmead. Monotypic and orig. desig.

Cymatoneura Kriechbaumer, 1901 (Jan.). Ztschr. System. Hym. Dipt. 1 (1): 22.

Type-species: *Ophion undulatus* Gravenhorst. Desig. by Viereck, 1912 from four species included by Kriechbaumer, 1901 (Mar.).

Pterospilus Kriechbaumer, 1901. Ztschr. System. Hym. Dipt. 1 (3): 156. Preocc. by Rondani, 1856.

Type-species: *Ophion (Enicospilus) dubius* Tosquinet. Desig. by Viereck, 1914.

Trispilus Kriechbaumer, 1901. Ztschr. System. Hym. Dipt. 1 (3): 156.

Type-species: *Ophion (Enicospilus) trimaculatus* Tosquinet. Monotypic.

Abanchogastra Perkins, 1902. Ent. Soc. London, Trans. 50: 141.

Type-species: *Abanchogastra debilis* Perkins. Monotypic.

Metophion Szepligeti, 1905. In Wytsman, Gen. Ins., fasc. 34, p. 28.

Type-species: *Metophion bicolor* Szepligeti. Desig. by Viereck, 1914.

Ceratospilus Szepligeti, 1905. In Wytsman, Gen. Ins., fasc. 34, p. 28.

Type-species: *Ceratospilus biroi* Szepligeti. Monotypic.

Atoponeura Szepligeti, 1905. In Wytsman, Gen. Ins., fasc. 34, p. 34.

Type-species: *Atoponeura concolor* Szepligeti. Monotypic. The type-species is a synonym of *E. atoponeurus* Cushman.

Ophiomorpha Szepligeti, 1905. In Wytsman, Gen. Ins., fasc. 34, p. 34. Preocc. by Nilsson, 1836.

Type-species: *Ophion curvinervis* Cameron. Desig. by Hooker, 1912. The type-species is a synonym of *E. cameronii* (Dalla Torre).

Cryptocampitus Brethes, 1909. Buenos Aires, Mus. Nac. de Hist. Nat., An. 19: 230. This name was proposed as a "new name" for *Allocampitus* "Thomson," which, according to present rules of nomenclature, Brethes incorrectly regarded as being a misidentification of *Allocampitus* Foerster.

Type-species: *Ophion undulatus* Gravenhorst. Monotypic.

Amesospilus Enderlein, 1914. In Michaelson, Beitr. z. Kenntnis d. Land-u.

Suesswasserfauna Deut.-Suedwestafrikas, v. 1, p. 222.

Type-species: *Ophion unicallosus* Snellen van Vollenhoven. Orig. desig.

Eremotyloides Perkins, 1915. Ent. Soc. London, Trans. 62: 530.

Type-species: *Eremotylus orbitalis* Ashmead. Monotypic.

Schizospilus Seyrig, 1935 (1936). Paris, Mus. d'Hist. Nat., Mem. (n. s.) 4: 79.

Type-species: *Schizospilus divisus* Seyrig. Orig. desig.

Townes (1971) stated that *Enicospilus* is probably the largest genus of Ichneumonidae and estimated the number of species to be well over a thousand. Species occur throughout the world but are most numerous in tropical regions.

Revision: Hooker, 1912. Amer. Ent. Soc., Trans. 38: 52, 92, 135-158.

Taxonomy: Stephens, 1845. Illus. Brit. Ent., v. 7, list of plates (follows p. 310). —Stephens, 1846. Illus. Brit. Ent., Sup., p. 3. —Townes, 1971. Amer. Ent. Inst., Mem. 17: 78-79.

americanus (Christ). N. S. w. to Minn., s. to Fla., s. Tex., and mid-coastal Calif.; Mexico, Costa Rica, Guatemala, Brazil?, Argentina. Host: *Actias luna* (L.), *Antheraea polyphemus* (Cram.), *Automeris io* (F.), *Callosamia promethea* (Drury), *Hyalophora cecropia* (L.), *H. columbia* (Sm.), *H. euryalus* (Bdv.), *Rothschildia orizaba* (West.), *Samia cynthia* (Drury). Before World War II, the name *macrurus* (Linnaeus) was erroneously applied to this species, usually in combination with the generic names *Eremotylus* or *Ophion*. *Ichneumon luteus americanus* Christ, 1791. Naturgesch. Class. Nomencl. Ins., p. 358, pl. 37, fig. 5. ♀.

Ophion rugosus Brulle, 1846. In Lepeletier, Hist. Nat. Ins. Hym., v. 4, p. 138. Sex not indicated.

Ophion cecropiae Scudder, 1963. Boston Soc. Nat. Hist., Proc. 9: 188-189. Nomen nudum. *Ophion cecropiae* Sanborn, 1863. Sec. Mass. Bd. Agr., Ann. Rpt. 10: 169. Sex not indicated.

Ophion mexicanus Cresson, 1874 (1873). Acad. Nat. Sci. Phila., Proc. 25: 374. ♀. *Eremotylus Druryi* Kriechbaumer, 1901. Ztschr. System. Hym. Dipt. 1: 152. ♂, ♀.

Taxonomy: Townes, 1961. Ent. Soc. Wash., Proc. 63: 111 (syn.).

Biology: Riley, 1870. Amer. Ent. 2: 100-101. —Riley, 1872. Mo. State Ent., Ann. Rpt. 4: 107-108. —Smith, 1908. Jour. Econ. Ent. 1: 294-297.

appendiculatus (Felt). N. J., N. C., S. C., Ala., Fla.; West Indies, Mexico, Brazil.

Ophion (Eniscopilus [!]) appendiculatus Felt, 1902. Psyche 9: 308. [female].

arcuatus (felt). Mass. w. to Ill., s. to Ga. and Miss.; Puerto Rico, Mexico, Argentina. Host: *Scoliopteryx libatrix* (L.), *Heterocampa guttivitta* (Wlk.), *Schizura concinna* (J. E. S.). *Ophion (Eniscopilus [!]) arcuatus* Felt, 1902. Psyche 9: 308. ♀. Preocc. by Brulle, 1846; not renamed here because of uncertain synonymy.

bifoveolatus (Brulle). Pa. Townes (1961) said "this is an uncommon species ... that occurs mostly in the southeastern United States." The name *bifoveolatus* was for years incorrectly applied to *Ophion nigrovarius* Provancher.

Ophion bifoveolatus Brulle, 1846. In Lepeletier, Hist. Nat. Ins. Hym., v. 4, p. 138. [male].

Ophion stramineus Taschenberg, 1875. Ztschr. f. die Gesam. Naturw. [Halle] 46: 431. ♀.

Ophion volubilis Holmgren, 1869 (1868). Eug. Resa, pt. 2, sec. 1, p. 410. ♂, ♀.

Taxonomy: Townes and Townes, 1966. Amer. Ent. Inst., Mem. 8: 181-182 (syn.).

texanus (Ashmead). N. Y., s.w. Va., Ohio, Tex., s.e. Wash., n.e. Calif.

Thyreodon texanus Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 422. ♂.

SUBFAMILY MESOCHORINAE

It is certain that most of the members of this subfamily are hyperparasitic, and I speculate that those Mesochorinae which may eventually be proven not to be hyperparasitic will be shown to be cleptoparasitic. Some species of Mesochorinae parasitize other Ichneumonidae, but a greater number parasitize Braconidae. At least four Nearctic species of *Mesochorus* have been reared from Tachinidae. The hosts of Mesochorinae are internal parasites of various insects, most of the latter being phytophagous. Mesochorinae have been reared from parasites of Lepidoptera, Symphyta, Coleoptera, Miridae, and, according to Dr. C. C. Loan (personal communication, 1975), even Psocoptera. Mesochorines insert the ovipositor into the secondary host and in turn locate the early-instar larva or even the egg of a primary parasite and oviposit inside the latter.

Dasch (1971) said that "considerable evidence seems to indicate that many species [of Mesochorinae] are primary parasites of lepidopterous and coleopterous larvae," but this statement appears to be inaccurate. For Mesochorinae to be primary parasites of these hosts, they would have to spin their own cocoons or emerge from lepidopterous pupae. I do not know of any case in which a mesochorine specimen is mounted with a lepidopterous pupa from which it emerged or is otherwise known with certainty to have emerged from a lepidopterous pupa. In substantiated cases of emergence from lepidopterous pupae, proof of primary parasitism could be made only through dissection of the host remains, because mesochorines may be able to parasitize primary parasites which oviposit into lepidopterous larvae and emerge from the pupae (such as Anomaloniinae [Dasch (1971) cited a published record of a *Trichionotus* sp. as a host], Metopiinae Ichneumoninae, certain Campopleginae, or meteorideine Braconidae). In any case, the majority of mesochorine specimens labeled as being reared from Coleoptera or Lepidoptera have emerged from cocoons, and when these specimens are mounted together with the cocoons from which they have emerged, the cocoons prove to be those of Braconidae or other Ichneumonidae. The only possible exception that I am aware of is *Plectochorus iwatensis* (Uchida), a Eurasian species which apparently spins a cocoon of its own and thus appears to be a primary parasite of *Grapholitha molesta* (Bsk.) (cf. Haeussler, 1940). It is remotely possible that some of the species of Mesochorinae which have been reared from cocoons of sawflies could be primary parasites, but this could not be established without dissecting the contents of the cocoons and determining that they do not include the larval remains of an additional ichneumonid or an ichneutine braconid.

Revision: Dasch, 1971. Amer. Ent. Inst., Mem. 16: 1-376 (Nearctic spp.). —Dasch, 1974. Amer. Ent. Inst., Mem. 22: 1-509 (Neotropic spp.).

Biology: Haeussler, 1940. U. S. Dept. Agr., Tech. Bul. 728: 24-25 (*Plectochorus iwatensis* [Uchida]).

Genus CIDAPHUS Foerster

Cidaphus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 149.

Type-species: *Cidaphus thuringiacus* Brauns. Desig. by Viereck, 1914 from two species included by Brauns, 1890. Perkins (1962) regarded the type-species as a synonym of *C. alarius* (Gravenhorst).

Plesiophthalmus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 170. Preocc. by Motschulsky, 1858.

Type-species: *Mesochorus alarius* Gravenhorst. By subsequent monotypy from inclusion by Brischke, 1871.

Mater Schulz, 1911. Zool. Ann. 4: 22. N. name for *Plesiophthalmus* Foerster.

Tetragonalys Morley, 1913. Rev. Ichn. Brit. Mus., v. 2, p. 132.

Type-species: *Tetragonalys barbarica* Morley. Desig. by Morley, 1913.

Plesiophthalmidea Viereck, 1914. U. S. Natl. Mus., Bul. 83: 119.

Type-species: *Plesiophthalmus panisoides* Ashmead. Monotypic and orig. desig. *Ophthalmochorus* Roman, 1925 (1924). Arkiv for Zool. 17 A (4): 29. N. name for

Plesiophthalmus Foerster.

This is a moderate sized genus of practically worldwide distribution.

Revision: Cushman, 1924. U. S. Natl. Mus., Proc. 64 (20): 4-6.

Taxonomy: Perkins, 1962. Brit. Mus. (Nat. Hist.) Ent., Bul. 11: 414.

australis Cushman. Que., Ont., n. Minn., and B. C., s. to Va., Ala., Idaho, and Wash.

Cidaphus australis Cushman, 1924. U. S. Natl. Mus., Proc. 64 (20): 6. ♀.

Cidaphus melleus Walley, 1935. Canad. Ent. 67: 112. ♂, ♀.

occidentalis Cushman. Newfoundland (Labrador and insular) w. to Alaska, s. to N. H., Ohio, Colo., Ariz., and Wash.

Cidaphus occidentalis Cushman, 1924. U. S. Natl. Mus., Proc. 64 (20): 5. ♀.

panisoides (Ashmead). Maine, Ont., and Mich., s. to n.w. S. C., w. Ky., and N. Mex. Ecology: Can be presumed to have been reared from a parasite of *Heterocampa manteo* (Dblly.).

Plesiophthalmus panisoides Ashmead, 1892. Ent. News 3: 107. ♂.

sinuosus Dasch. Ariz.; Mexico.

Cidaphus sinuosus Dasch, 1971. Amer. Ent. Inst., Mem. 16: 13. ♂, ♀.

Genus ASTIPHROMMA Foerster

Astiphromma Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 170.

Type-species: *Mesochorus scutellatus* Gravenhorst. Desig. by Morley, 1913 from six species included by Brischke, 1880.

Astiphrommus Thomson, 1886. Soc. Ent. de France, Ann. (6) 5: 327. Emend.

Dolichochorus Strobl, 1904 (1903). Naturw. Ver. f. Steiermark, Mitt. 40: 108.

Type-species: *Dolichochorus longiceps* Strobl. Monotypic.

Mesochorella Szepligeti, 1911. In Wytsman, Gen. Ins., fasc. 114, p. 48.

Type-species: *Mesochorus nigriceps* Brischke. Monotypic.

Pseudoacoenitus Kiss, 1924. Siebenbürg. Ver. Naturw., Verh. u. Mitt. 72-74: 96.

Type-species: *Pseudoacoenitus transsylvaniaicus* Kiss. Monotypic.

Demophorellus Hedwig, 1955. Bombus 1: 379.

Type-species: *Demophorellus mimulus* Hedwig. Monotypic.

This is a moderately large Holarctic genus.

Revision: Nakanishi, 1969. Sieboldia 4: 50-74 (Japanese spp., except those without smooth scutellum).

alsium Dasch. Alta., interior Alaska, n. B. C., w. Wash.

Astiphromma alsium Dasch, 1971. Amer. Ent. Inst., Mem. 16: 35. ♂, ♀.

aquilonare Dasch. Northern Que. and N. W. T., s. to s. Que., Alta., and B. C. Ecology: Can be presumed to have been reared from parasites of *Pikonema alaskensis* (Roh.) and *P. dimmockii* (Cr.).

Astiphromma aquilonare Dasch, 1971. Amer. Ent. Inst., Mem. 16: 44. ♂, ♀.

calvum Dasch. Ariz.

Astiphromma calvum Dasch, 1971. Amer. Ent. Inst., Mem. 16: 43. ♂, ♀.

cordatum Dasch. Northern Mich., Alta.

Astiphromma cordatum Dasch, 1971. Amer. Ent. Inst., Mem. 16: 24. ♀.

coronale Dasch. N. Y., Pa., Md., Ont., Ohio, Mich.

Astiphromma coronale Dasch, 1971. Amer. Ent. Inst., Mem. 16: 30. ♂, ♀.

euryops Dasch. Ohio, w. N. C., e. Tenn.

Astiphromma euryops Dasch, 1971. Amer. Ent. Inst., Mem. 16: 32. ♂, ♀.

eximium Dasch. Pa., Mich., n. B. C.

Astiphromma eximium Dasch, 1971. Amer. Ent. Inst., Mem. 16: 25. ♀.

exitiale Dasch. Newfoundland (insular), n. Que., w. N. W. T., and interior Alaska, s. to Md., w. N. C., Colo., and Idaho.

Astiphromma exitiale Dasch, 1971. Amer. Ent. Inst., Mem. 16: 33. ♂, ♀.

gilvirus Dasch. N. Y., Mich., s.e. Minn.

Astiphromma gilvirus Dasch, 1971. Amer. Ent. Inst., Mem. 16: 21. ♂, ♀.

leucogrammum (Holmgren). Northern Que. w. to n. Alaska, s. to s. Que., Man., Colo., and w. Wash.; n. Eurasia. Ecology: Reared or presumed to have been reared from parasites of the following Tenthredinidae-- *Hemimichroa crocea* (Geoff.), *Pikonema alaskensis* (Roh.), and *Nematus* sp. Host: *Lamachus angularius* (Davis).

Mesochorus leucogrammus Holmgren, 1860 (1858). Svenska Vetensk.-Akad. Handl. (n. f.) 2 (8): 121. ♀.

luculentum Dasch. Colo., B. C., e. Wash. Ecology: One paratype can be presumed to have been reared from a parasite of a tenthredinid, and two others were collected at elevations of 9800 ft. and 10300 ft. on Mt. Evans in Colo.

Astiphromma luculentum Dasch, 1971. Amer. Ent. Inst., Mem. 16: 40. ♂, ♀.

nitidum Dasch. Western Alta. Ecology: The unique holotype can be presumed to have been reared from a parasite of the geometrid, *Lycia ursaria* Wlk.

Astiphromma nitidum Dasch, 1971. Amer. Ent. Inst., Mem. 16: 39. ♂.

pectorale Ashmead. Que. s. to Tenn., w. to Wis., e. Kans., and Tex. Ecology: Can be presumed to have been reared from parasites of the geometrids, *Alsophila pometaria* (Harris) and *Erannis tiliaria* (Harris).

Astiphromma pectoralis Ashmead, 1892. Ent. News 3: 107. ♂.

perditum Dasch. Que. w. to s. Man., s. to n.w. S. C. and s. Ill.

Astiphromma perditum Dasch, 1971. Amer. Ent. Inst., Mem. 16: 41. ♂, ♀.

psychron Dasch. Northern Que.

Astiphromma psychron Dasch, 1971. Amer. Ent. Inst., Mem. 16: 46. ♀.

rutilum Dasch. N. Y., w. N. C., n.w. S. C., Ohio, s.e. Mich., e. Kans., Tex.

Astiphromma rutilum Dasch, 1971. Amer. Ent. Inst., Mem. 16: 22. ♂, ♀.

simile Dasch. Conn., N. J., n.w. S. C., Ohio, Mich., Ky.

Astiphromma simile Dasch, 1971. Amer. Ent. Inst., Mem. 16: 37. ♂, ♀.

splenum (Curtis). Que. w. to Alaska, s. to Md., w. N. C., Colo., and n. Calif.; Eurasia. Ecology:

Reared or presumed to have been reared from parasites of the following-- *Caripeta divisata* Wlk., *Cladara limitaria* (Wlk.), *C. nigroangulata* (Stkr.), *Dysstroma citrata* (L.), *Eupithecia placidata* Taylor, *E. unicolor* Hulst, *Lambdina fiscellaria fiscellaria* (Gn.), *L. f. lugubrosa* (Hulst), *Melanolophia imitata* (Wlk.), *Nepytia canosaria* (Wlk.), *Dasychira grisefacta* (Dyar)?, *Leucoma salicis* (L.), *Malacosoma disstria* (Hbn.), *Enargia decolor* (Wlk.), and tenthredinid. Host: *Meteorus hyphantriae* Riley?, *Zemioetes reticulatus* (Mues.), *Phobocampe geometrae* (Ash.).

Mesochorus sericans Curtis, 1833. Brit. Ent., v. 10, pl. 424. "♂" = ♀. Described from Ireland (presumably Belfast). Examination of material which the U. S. Natl. Museum acquired from A. W. Stelfox leads me to believe that *sericans*, as illustrated by Curtis, is quite probably an abnormally melanic specimen of *splenum*. N. syn. (uncertain).

Mesochorus Splenium Curtis, 1833. Brit. Ent., v. 10, pl. 424. ♂. Dr. H. K. Townes informed me (personal commun., 1977) that he saw notes which Dr. J. F. Perkins made in studying what is now the lectotype (see Fitton, 1976) which indicated that *M. strenuus* Holmgren is a synonym of *splenum*, and Dr. Townes suggested that I consult the original description of *splenum* to see if it agreed with what Dr. Perkins had concluded. Having done so, I see no reason to doubt that Dr. Perkins was correct.

- Mesochorus strenuus* Holmgren, 1860 (1858). Svenska Vetensk.-Akad. Handl. (n. f.) 2 (8): 119. ♂, ♀. N. syn.
- Plectiscus pleuralis* Provancher, 1875. Nat. Canad. 7: 330. “♀” = ♂. N. syn.
- Plectiscus provanckeri* Dalla Torre, 1901. Cat. Hym., v. 3, p. 24. Unnecessary n. name for *P. pleuralis* Provancher; preocc. secondarily only by virtue of a bibliographic error which led Dalla Torre to erroneously place *Tryphon pleuralis* Cresson, 1864, in *Plectiscus*. N. syn.
- Mesochorus orcae* Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 239. ♂. N. syn.
- Astiphromma kiotense* Uchida, 1933. Insecta Matsumurana 8: 57. ♂, ♀. N. syn.
- Astiphromma sachalinense* Uchida, 1933. Insecta Matsumurana 8: 57. ♀. N. syn.
- Taxonomy: Townes, 1939. Canad. Ent. 71: 96. — Townes, Momoi, and Townes, 1965. Amer. Ent. Inst., Mem. 5: 341 (syn.). — Fitton, 1976. Brit. Mus. (Nat. Hist.) Ent., Bul. 32: 323 (lectotypes selected for Curtis names).
- Genus MESOCHORUS Gravenhorst**
- Mesochorus* Gravenhorst, 1829. Ichn. Europaea, v. 2, p. 960.
- Type-species: *Mesochorus splendidulus* Gravenhorst. Desig. by Curtis, 1833.
- Edrisa* Cameron, 1907. Tijdschr. v. Ent. 50: 111.
- Type-species: *Edrisa pilicornis* Cameron. Monotypic.
- Zamesochorus* Viereck, 1912. U. S. Natl. Mus., Proc. 42: 152.
- Type-species: *Zamesochorus orientalis* Viereck. Monotypic and orig. desig.
- Cryptochorus* Aubert, 1965. Soc. Ent. de Mulhouse, Bul. 21: 22.
- Type-species: *Cryptochorus obliterator* Aubert. Monotypic and orig. desig.
- This very large genus is worldwide in distribution.
- acuminatus* Thomson. N. B. w. to w. Ont., s. to Md. and Ill. Ecology: Reared or presumed to have been reared from parasites of the following— *Sphingidae* (*Cressonia juglandis* [Smith], *Darapsa versicolor* [Harris], *Manduca* sp., *Sphinx kalmiae* [J. E. S.]) and *Notodontidae* (*Heterocampa guttivitta* [Wlk.], *Pheosia rimosa* Pack.). Host: *Apanteles* sp., *Microplitis* sp.
- Mesochorus acuminatus* Thomson, 1885. Soc. Ent. de France, Ann. (6) 5: 343. ♂.
- agilis* Cresson. Newfoundland (Labrador) w. to Alaska, s. to N. Y., Mich., N. Mex., Ariz., and n.e. Calif.; Greenland; Europe; n. Mexico. Ecology: Reared from larval parasites of *Coleoptera* (Curculionidae) and presumed to have been reared from a parasite of *Crambida casta* (Pack.) (Lepidoptera, Arctiidae). Host: *Bathyplectes curculionis* (Thom.), *Dinophora* sp.
- Mesochorus agilis* Cresson, 1865. Ent. Soc. Phila., Proc. 4: 266. ♀.
- Mesochorus nigriceps* Thomson, 1885 Soc. Ent. de France, Ann. (6) 5: 334. ♂, ♀. Preocc. by Brischke, 1880.
- Mesochorus punctipleurus* Thomson, 1885. Soc. Ent. de France, Ann. (6) 5: 334. ♂, ♀.
- Mesochorus Thomsonii* Dalla Torre, 1901. Cat. Hym., v. 3, p. 59. N. name for *nigriceps* Thomson.
- alaskensis* Dasch. Southwestern Alaska.
- Mesochorus alaskensis* Dasch, 1971. Amer. Ent. Inst., Mem. 16: 109. ♀.
- americanus* Cresson. Newfoundland (insular) and n. Que. w. to s.w. Alaska, s. to Fla., s. Tex., Ariz., and Oreg.; n.e. Asia, Europe. Ecology: Reared or presumed to have been reared from parasites of the following Lepidoptera— *Thecla* sp., *Colias philodice* Godt., *Acronicta oblinita* (J. E. S.)?, *Amathes c-nigrum* (L.), *Autographa californica* (Spey.), *Eurois* sp., *Peridroma saucia* (Hbn.), *Pseudaletia unipuncta* (Haw.), *Spodoptera ornithogalli* (Gn.), *Hemaris* sp., *Manduca* sp., *M. quinquemaculata* (Haw.), *M. sexta* (Joh.), *Ctenucha virginica* (Charp.), *Euchaetis egle* (Drury), *Caripeta divisata* Wlk., *Seniothisa "granitata"* auct., *S. sexmaculata* (Pack.), *Bucculatrix canadensisella* Cham. Host: *Apanteles* sp., *A. congregatus* (Say), *A. glomeratus* (L.), *A. laeviceps* Ash., *A. rufocozalis* Riley, *A. scitulus* Riley, *A. xylinus* (Say), *Meteorus* sp.
- Mesochorus americanus* Cresson, 1872. Canad. Ent. 4: 23. ♀.
- Mesochorus scitulus* Cresson, 1872. Canad. Ent. 4: 24. ♂, ♀.

- Mesochorus apolinus* Riley, 1890. In Riley and Howard, U. S. Dept. Agr., Insect Life 3: 156. Nomen nudum.
Mesochorus apolinus Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 195. ♀. The syntype referred to as the "type" by Dasch (1971) is apparently from D. C., not from "Lafayette, Indiana" as Dasch stated.
Mesochorus frontalis Ashmead, 1899 (1898). In Jordan, Fur Seals and Fur-Seal Isls. N. Pacific, v. 4, p. 336. ♂. The type locality is Ostrov Bering (i.e. Bering Isl.), U. S. S. R.

Taxonomy: Dasch, 1971. Amer. Ent. Inst., Mem. 16: 258-262.

- apantelis* Dasch. Que. s. to Fla., w. to Mich., Mo., and Tex. Ecology: Reared or presumed to have been reared from parasites of the following- "*Vanessa*" sp., *Hymenia recurvalis* (F.), *Cosmopteryx* sp. on morning glory, *Bedellia minor* Bsk., and a leaf miner on *Vitus*. Host: *Apanteles* sp. ex "*Vanessa*" sp.

Mesochorus apantelis Dasch, 1971. Amer. Ent. Inst., Mem. 16: 266. ♂, ♀.

- applanatus* Dasch. Northern Que. w. to w. N. W. T., s. to Md., n. Ga., Colo., and Oreg. Ecology: Presumed to have been reared from parasites of the following Lepidoptera and Symphyta-- *Semiothisa seznaculata* (Pack.), *Empria multicolor* (Nort.), *Macremphytus testaceus* (Nort.), and *Monophadnoidea geniculatus* (Htg.).

Mesochorus applanatus Dasch, 1971. Amer. Ent. Inst., Mem. 16: 154. ♂, ♀.

- arcticus* Dasch. Subarctic Alaska.

Mesochorus arcticus Dasch, 1971. Amer. Ent. Inst., Mem. 16: 175. ♀.

- areolatus* Provancher. N. S., Que., N. Y., w. N. C., n. Ga., Ont., Mich., Sask., Alta., Alaska, B. C., Wash. Ecology: Presumed to have been reared from a parasite of *Semiothisa "granitala"* auct.

Mesochorus areolatus Provancher, 1883. Nat. Canad. 14: 5. ♀.

- asperifrons* Dasch. Western N. C., n.w. S. C., Ohio, s. Mich., Ky., s. Ala., Ill., e. Kans., Ariz. *Mesochorus asperifrons* Dasch, 1971. Amer. Ent. Inst., Mem. 16: 268. ♂, ♀.

- balteatus* Dasch. Que., N. H., N. Y., N. J., Md., w. N. C., Ont., Ohio, Ala.

Mesochorus balteatus Dasch, 1971. Amer. Ent. Inst., Mem. 16: 162. ♂, ♀.

- bellus* Dasch. Minn., s. Man.

Mesochorus bellus Dasch, 1971. Amer. Ent. Inst., Mem. 16: 208. ♀.

- bucculentus* Dasch. Northern Mich., B. C., Wash., n.e. Calif.

Mesochorus bucculentus Dasch, 1971. Amer. Ent. Inst., Mem. 16: 223. ♂, ♀.

- calais* Viereck. N. H., Ont., Sask., and Alta., s. to Va., Ohio, and Mich.

Mesochorus calais Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Survey Bul. 22: 280. ♀.

- carolinensis* Dasch. Western N. C., n.w. S. C., n. Fla., s. Ont., s. Mich., e. Tenn.

Mesochorus carolinensis Dasch, 1971. Amer. Ent. Inst., Mem. 16: 133. ♀.

- coronatus* Dasch. Que. w. to n. Yukon and Alaska, s. to N. J., s.e. Iowa, S. Dak., Colo., and n.e. Calif.

Mesochorus coronatus Dasch, 1971. Amer. Ent. Inst., Mem. 16: 230. ♂, ♀.

- cupreatus* Dasch. P. E. I. s. to w. N. C., w. to n. Alta. and Wash. Host: *Dimophora* sp.

Mesochorus cupreatus Dasch, 1971. Amer. Ent. Inst., Mem. 16: 106. ♀.

- curvulus* Thomson. Northern Que., N. W. T., and Alaska, s. to n.w. S. C., e. Kans., Ariz., and n.e. Calif.; Europe. Ecology: Reared from parasites of Miridae (*Dicyphus* sp., *Halticus intermedius* Uhler, *Lopidea marginalis* Reut., *Lygus lineolaris* [Beauv.], *Phytocoris* sp., *Plagiognathus conicola* Knight, *P. politus* Uhler, *Slaterocoris stygicus* [Say]) and adult Chrysomelidae (*Phyllotreta striolata* [F.]); apparently also reared from parasites of Lepidoptera (*Melanolophia imitata* [Wlk.] and *Autographa* sp.). Host: *Leiophron* spp., *L.* sp. near *maculipennis* (Ash.), *Peristenus* sp. near *pallipes* (Curt.), *P. plagiognathi* (Loan), *Microctonus vittatae* Mues.

Mesochorus curvulus Thomson, 1885. Soc. Ent de France, Ann. (6) 5: 343. ♂, ♀.

Mesochorus kincaidi Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 238. ♀.

Mesochorus phyllotretae Jourdheuil, 1957. Soc. Ent. de France, Bul. 62: 42. ♂, ♀.

- deletus* Dasch. Alta., interior Alaska, n. B. C., Wash.

Mesochorus deletus Dasch, 1971. Amer. Ent. Inst., Mem. 16: 170. ♂, ♀.

dentatus Dasch. N. Y., Ky., Minn., Colo., Alta., s.e. B. C., n. Idaho. Ecology: Presumed to have been reared from a parasite of *Arge pectoralis* (Leach).

Mesochorus dentatus Dasch, 1971. Amer. Ent. Inst., Mem. 16: 125. ♂, ♀.

discitergus (Say). Newfoundland (insular) w. to interior Alaska, s. to Fla., Tex., Ariz., and Wash.; West Indies and Mexico s. to Brazil and Peru; Eurasia; South Africa? Ecology: Reared or presumed to have been reared from parasites of the following—Papilionidae (*Papilio polyxenes asterius* Stoll.), Pieridae (*Colias eurytheme* Bdv.), Geometridae (*Anthelia hyperborea* Hulst, *Biston betularia cognataria* [Gn.], *Caripeta* sp., *C. angustiorata* Wlk.?), *Ectropis* sp., *Enypia packardata* Tay., *Epirrita autumnata* henshawi [Swett], *Eupithecia* sp., *Lambdina fiscellaria* *fiscellaria* [Gn.], *L. f. lugubrosa* [Hulst], *Lobophora nivigerata* Wlk., *Melanolophia imitata* [Wlk.], *Nepytia canosaria* [Wlk.], *N. phantasmaria* [Stkr.], *Pleuroprucha insularia* [Gn.], *Semiothisa granitata* auct., *S. oveni* [Swett]), Limacodidae (*Prolimacodes badia* [Hbn.], Noctuidae (*Caenurgina erechtea* [Cramer], *Celama triquetra* [Fitch], *Ceramica picta* [Harris], *Feralia jocosa* [Gn.], *Heliothis zea* [Bod.], *Panthea portlandia* Grt., *Peridroma saucia* [Hbn.], *Pseudaletia unipuncta* [Haw.], *Spodoptera frugiperda* [J. E. S.]), Sphingidae (*Manduca sexta* [Joh.]), Arctiidae (*Euchaetis egle* [Drury], *Halysidota* s. *H. carya* [Harris], *H. maculata* [Harris], *H. tessellaris* [J. E. S.], *Tyria jacobaea* [L.]) Lymantriidae (*Dasychira plagiata* [Wlk.], *D. vagana* [B. and McD.]), Notodontidae (*Notodontis* sp.), Zygaenidae (*Harrisina americana* [Gn.]), Lyonetiidae (*Bedellia minor* Bsk.), sp. of Pterophoridae, and Tenthredinidae (*Anoplonyx* sp.). Host: *Apaneles* sp., *A. glomeratus* (L.), *A. lunatus* (Pack), *A. militaris* (Walsh), *A. paleacritae* Riley, *Meteorus communis* (Cr.), *Microplitis melianae* Vier?

Cryptus discitergus Say, 1836. Boston Jour. Nat. Hist. 1: 231. ♀.

Mesochorus vitreus Walsh, 1861. Ill. State Agr. Soc., Trans. 4: fig. 4; p. 364, p. 368. ♂, ♀.

Synonymy uncertain because in revising the concept of *discitergus* Dasch (1971) erroneously selected as "lectotypes" of *vitreus* two female specimens which are not Walsh type material and bear no label in the handwriting of Walsh. The alternate spelling "vitrens" appeared in the legend for Walsh's figure 4.

Mesochorus obliquus Cresson, 1872. Canad. Ent. 4: 24. ♀.

Mesochorus facialis Bridgman, 1884. Ent. Soc. London, Trans. 32: 431. ♂, ♀.

Mesochorus pulchellus Cook and Davis, 1891. Mich. Agr. Expt. Sta. Bul. 73: 10. ♀.

Mesochorus infernalis Viereck, 1911. U. S. Natl. Mus., Proc. 40: 192. ♂, ♀.

Mesochorus nigrisignus Viereck, 1911. U. S. Natl. Mus., Proc. 40: 192. ♀.

Mesochorus concinnatus Wilkinson, 1929. Bul. Ent. Res. 20: 105. ♂, ♀. Uncertain syn.; placed as a synonym of *discitergus* by Dasch (1971); placed instead as a synonym of *M. ornatus* Wilkinson (an Ethiopian species) by Townes and Townes (1973) who erroneously stated that "*ornatus* is listed erroneously [by Dasch] as a synonym [of *discitergus*] and the record from South Africa is based on a misdetermined specimen of *ornatus*."

Mesochorus narangae Uchida, 1930. Insecta Matsumurana 4: 129. ♂, ♀.

Mesochorus facialis var. *nigristemmatus* Uchida, 1931. Insecta Matsumurana 5: 158. ♀.

Mesochorus havrolenkoi Blanchard, 1949. In Havrolenko and Winterhalter, Insectos del Parque Nac. Nuhuel Huapi, Buenos Aires, p. 48. Nomen nudum (figure only).

Taxonomy: Dasch, 1971. Amer. Ent. Inst., Mem. 16: 252-257. —Townes and Townes, 1973.

Amer. Ent. Inst., Mem. 19: 186. —Dasch, 1974. Amer. Ent. Inst., Mem. 22: 250-254.

distantus Dasch. Eastern Wash.

Mesochorus distantus Dasch, 1971. Amer. Ent. Inst., Mem. 16: 236. ♂.

divaricatus Dasch. Colo.

Mesochorus divaricatus Dasch, 1971. Amer. Ent. Inst., Mem. 16: 225. ♂, ♀.

dreisbachi Dasch. Que. w. to Alaska, s. to Ky., e. Kans., Utah, and n. Calif.

Mesochorus dreisbachi Dasch, 1971. Amer. Ent. Inst., Mem. 16: 99. ♂, ♀.

ejuncidus Dasch. Western N. C., Colo., Ariz., B. C., Wash., Oreg.

Mesochorus ejuncidus Dasch, 1971. Amer. Ent. Inst., Mem. 16: 182. ♂, ♀.

elongatus Dasch. Central and s.e. Ariz.

Mesochorus elongatus Dasch, 1971. Amer. Ent. Inst., Mem. 16: 83. ♂, ♀.

- erythraeus** Dasch. Alta., s.e. B. C. Ecology: Reared or presumed to have been reared from parasites of the following-- *Eupithecia placidata* Tay., *Neoalcis californiaria* f. *latifaciaria* (Pack.), *Semiothisa "granitata"* auct., and *Anomogyna* sp. Host: *Hyposoter* sp.
- Mesochorus erythraeus** Dasch, 1971. Amer. Ent. Inst., Mem. 16: 191. ♂, ♀.
- exsertus** Dasch. N. S. w. to Yukon and Alaska, s. to Md., n.w. S. C., e. S. Dak., Colo., Ariz., and Oreg. Ecology: Reared or presumed to have been reared from parasites of the following-- *Semiothisa "granitata"* auct., *Neodiprion* sp., *Cimbex americana* Leach, and *Trichiosoma triangulum* Kby. Host: *Encyrtus merdarius* (Gravenhorst).
- Mesochorus exsertus** Dasch, 1971. Amer. Ent. Inst., Mem. 16: 156. ♂, ♀.
- flavidus** Dasch. Pa., w. N. C., Ohio, Tenn., e. Kans.
- Mesochorus flavidus** Dasch, 1971. Amer. Ent. Inst., Mem. 16: 123. ♂, ♀.
- foersteri** Dasch. N. S., n. Man. and s.w. Yukon, s. to Pa., Mich., Colo., w. Mont., and s. B. C.
- Mesochorus foersteri** Dasch, 1971. Amer. Ent. Inst., Mem. 16: 107. ♀.
- fuliginatus** Dasch. Newfoundland (Labrador) w. to n. B. C., s. to Maine, Mich., N. Mex., Utah, and n.e. Calif. Ecology: One specimen can be presumed to have been reared from a parasite of the chrysomelid, *Pyrhalta decora carbo* (LeC.).
- Mesochorus fuliginatus** Dasch, 1971. Amer. Ent. Inst., Mem. 16: 90. ♂, ♀.
- gelidus coriaceus** Dasch. Northern Que., n.e. N. W. T., n. Yukon.
- Mesochorus gelidus coriaceus** Dasch, 1971. Amer. Ent. Inst., Mem. 16: 204. ♂, ♀.
- gelidus gelidus** Dasch. Colo. Ecology: The four type specimens were collected on Mt. Evans, Colo. at elevations between 9800 ft. and 13200 ft.
- Mesochorus gelidus gelidus** Dasch, 1971. Amer. Ent. Inst., Mem. 16: 204. ♂, ♀.
- gemmatus** Dasch. Que., N. Y., Pa., Md., Ohio, s. Mich.
- Mesochorus gemmatus** Dasch, 1971. Amer. Ent. Inst., Mem. 16: 111. ♂, ♀.
- globulator** (Thunberg). Southern Man., w. N. W. T., Alta.; Europe. Host: *Mesoleius tenthredinis* Morl., *Olesicampe benefactor* Hinz.
- Ichneumon globulator* Thunberg, 1822; 1824. Acad. Imp. des Sci. St. Petersbug, Mem. 8: 266; 9: 322. [female].
- Mesochorus dimidiatus** Holmgren, 1860 (1858). Svenska Vetensk.-Akad. Handl. (n. f.) 2 (8): 118. ♂.
- Mesochorus crassimanus** Holmgren, 1860 (1858). Svenska Vetensk.-Akad. Handl. (n. f.) 2 (8): 125. ♀.
- Taxonomy: Roman, 1912. Ent. Tidskr. 33: 67 (syn.). —Roman, 1912. Zool. Bidr. Uppsala 1: 258 (syn.).
- grandisops** Dasch. Southern B. C., Wash., Calif.; n. Mexico. Ecology: Reared or presumed to have been reared from parasites of the following-- *Lambdina fiscellaria lugubrosa* (Hulst), *Melanophila initata* (Wlk.), *Nepytia canosaria* (Wlk.), and *Semiothisa "granitata"* Host: *Meteorus hyphantriae* Riley.
- Mesochorus grandisops** Dasch, 1971. Amer. Ent. Inst., Mem. 16: 189. ♂, ♀.
- hamatus** Townes. Que. s. to Md., w. to n.w. Mich. and e. Kans.
- Mesochorus basalis** Cresson, 1872. Canad. Ent. 4: 22. ♀. Preocc. by Curtis, 1833.
- Mesochorus hamatus** Townes, 1945. Amer. Ent. Soc., Mem. 11: 753. N. name for *basalis* Cresson.
- hesperus** Dasch. Southern Alta., s.w. Yukon.
- Mesochorus hesperus** Dasch, 1971. Amer. Ent. Inst., Mem. 16: 211. ♂.
- hirticoleus** Dasch. Northwestern S. C., n. Fla., Iowa, s. La.
- Mesochorus hirticoleus** Dasch, 1971. Amer. Ent. Inst., Mem. 16: 137. ♂, ♀.
- holmgreni** Dasch. Maine, R. I., w. Va., n. Fla., Ohio, n. Wis. Ecology: One of the paratypes can be presumed to have been reared from a parasite of *Heterarthrus nemoratus* (Fall.), but the holotype was collected at light in northern Fla.
- Mesochorus holmgreni** Dasch, 1971. Amer. Ent. Inst., Mem. 16: 84. ♂, ♀.
- imitatus** Dasch. R. I., N. Y., Pa., W. Va., n.w. S. C., Ohio, Mich.
- Mesochorus imitatus** Dasch, 1971. Amer. Ent. Inst., Mem. 16: 152. ♂, ♀.

inaequidens Dasch. N. S., Que., Mass., Ont., w. Wyo., Colo., Alta., w. Nev., s. B. C., Wash., and n. Calif.

Mesochorus inaequidens Dasch, 1971. Amer. Ent. Inst., Mem. 16: 116. ♂, ♀.

incultus Dasch. N. B. w. to B. C., s. to n.w. S. C., s. Ariz., and n. Calif. Ecology: Paratypes should be presumed to have been reared from parasites of the following-- Geometridae (*Caripeta* sp. *C. divisata* Wlk.), *Erannis tiliaria* [Harris], *Lambdina fiscellaria lugubrosa* [Hulst], *Melanolophia imitata* [Wlk.], *Nepytia canosaria* [Wlk.], *Pero behrensarius* [Pack.?], *Semiothisa* sp., *S. sexmaculata* [Pack.], *Synazis pallulata* [Hulst?], Arctiidae (*Halisidota* sp.), Noctuidae (*Feralia comstocki* [Grt.], *F. jocosa* [Gn.], *Lithophane petulca* Grt., *Zale* sp., *Z. duplicata* [Beth.], *Z. minerea norda* [Smith]), Gracillariidae (*Marmara arbutella* Bsk.), and Tenthredinoidea ("green bracken sawfly"). Host: *Microplitis* sp. ex *Melanolophia imitata* (Wlk.).

Mesochorus incultus Dasch, 1971. Amer. Ent. Inst., Mem. 16: 101. ♂, ♀.

inflatus Dasch. Ohio. Known only from the holotype.

Mesochorus inflatus Dasch, 1971. Amer. Ent. Inst., Mem. 16: 161. ♀.

infuscatus Dasch. N. S., Que., Md., Ohio.

Mesochorus infuscatus Dasch, 1971. Amer. Ent. Inst., Mem. 16: 159. ♂, ♀.

inobseptus Dasch. Northern Alaska. Host: Tachinid ex larva of *Chrysolina subsulcata* (Mann.). *Mesochorus inobseptus* Dasch, 1971. Amer. Ent. Inst., Mem. 16: 128. ♂, ♀.

intonsus Dasch. N. S. s. to e. N. C. and n.w. S. C., w. to Wis. and e. Kans. Ecology: One of the paratypes can be presumed to have been reared from a parasite of *Macremphytus tarsatus* (Say).

Mesochorus intonsus Dasch, 1971. Amer. Ent. Inst., Mem. 16: 114. ♂, ♀.

iridescens Cresson. Northern Calif.

Mesochorus iridescens Cresson, 1879 (1878). Acad. Nat. Sci. Phila., Proc. 30: 369. ♀.

jucundus Provancher. Que. w. to Wash., s. to Fla., s.e. Tex., Utah, and Oreg.

Mesochorus jucundus Provancher, 1883. Nat. Canad. 14: 5. ♀.

kamouraskae Dasch. Northern Que. w. to n.w. Alta., s. to Pa., Ont., Mich., and s.w. Alta.

Ecology: One of the paratypes should be presumed to have been reared from a parasite of *Caripeta angustiorata* Wlk.

Mesochorus kamouraskae Dasch, 1971. Amer. Ent. Inst., Mem. 16: 168. ♂, ♀.

kansensis Dasch. Southern Kans. Known only from the holotype.

Mesochorus kansensis Dasch, 1971. Amer. Ent. Inst., Mem. 16: 132. ♀.

kentuckiensis Dasch. Ont., w. Ky.

Mesochorus kentuckiensis Dasch, 1971. Amer. Ent. Inst., Mem. 16: 127. ♂, ♀.

longiscutatus Dasch. Que. w. to n. Yukon and Alaska, s. to w. N. C., n. Mich., Colo., and s. B. C. Ecology: Two paratypes can be presumed to have been reared from parasites of the following microlepidoptera-- *Cerostoma dorsimaculella* Kft. (Yponomeutidae) and a gelechiid.

Mesochorus longiscutatus Dasch, 1971. Amer. Ent. Inst., Mem. 16: 173. ♂, ♀.

luteipes Cresson. R. I., N. J., Pa., n. Ga., n. Fla., Tex.; w. Mexico.

Mesochorus luteipes Cresson, 1872. Canad. Ent. 4: 22. ♀.

maleficus Dasch. N. Y., Ont., n. Mich., Colo., Alta. Ecology: One of the paratypes can be presumed to have been reared form a parasite of a tenthredinid.

Mesochorus maleficus Dasch, 1971. Amer. Ent. Inst., Mem. 16: 149. ♀.

marylandicus Dasch. Md., n. Va., n. Ala.

Mesochorus marylandicus Dasch, 1971. Amer. Ent. Inst., Mem. 16: 89. ♂, ♀.

masoni Dasch. Newfoundland (insular), w. to s. coastal Alaska, s. to Maine, Ont., n. Minn., Colo., and Oreg. Ecology: Reared or presumed to have been reared from parasites of the following-- *Pikonemu alaskensis* (Roh.), *P. dimmockii* (Cr.), *Neodiprion* sp., *N. abietis* (Harris), *N. pratti banksiana* Roh., *N. pratti pratti* (Dyar), *N. tsugae* Midd., *N. virginiana* Roh. Host: *Lamachus angularius* (Davis).

Mesochorus masoni Dasch, 1971. Amer. Ent. Inst., Mem. 16: 120. ♂, ♀.

melleus Cresson. R. I., N. Y., Pa., n.w. S. C., Ohio.

Mesochorus melleus Cresson, 1872. Canad. Ent. 4: 24. ♂.

- moabae** Dasch. Southeastern Utah. Ecology: The only two specimens known were collected at an elevation of 9200 ft.
- Mesochorus moabae* Dasch, 1971. Amer. Ent. Inst., Mem. 16: 147. ♀.
- naknekensis** Dasch. Northern Que. w. to w. N. W. T. and Alaska, s. to N. H., Colo., and n.e. Calif. Ecology: One of the paratypes should be presumed to have been reared from a parasite of *Spargania magnoliata* Gn. (Geometridae).
- Mesochorus naknekensis* Dasch, 1971. Amer. Ent. Inst., Mem. 16: 63, 177. ♂, ♀. The misspelling "naknensis" appeared on p. 63.
- nigripes** Ratzeburg. Western Colo. The overwhelming evidence is that this species was unintentionally introduced along with *Bathyplectes stenostigma* (Thomson) in 1969. Host: *Bathyplectes curculionis* (Thom.), *B. stenostigma* (Thom.). The fact that only females of *M. nigripes* are known from Colo. suggest the possibility that two morphologically similar species may be confused under the name *nigripes* in Europe.
- Mesochorus nigripes* Ratzeburg, 1852. Ichn. d. Forstins., v. 3, p. 119. ♂.
- Mesochorus gibbulus* Holmgren, 1856 (1854). Svenska Vetensk.-Akad. Handl. 75: 60. ♀.
- noctivagus** Viereck. Northwestern S. C., e. Kans.
- Mesochorus noctivagus* Viereck, 1905. Kans. Acad. Sci. Trans. 19: 303. ♀.
- obliteratus** Dasch. Pa., Mich., n. Man., e. Wash. Host: *Grisdalemyia* sp. ex *Chrysomela* sp.
- Mesochorus oblitteratus* Dasch, 1971. Amer. Ent. Inst., Mem. 16: 206. ♂, ♀.
- obsoletus** Dasch. Western B. C.
- Mesochorus obsoletus* Dasch, 1971. Amer. Ent. Inst., Mem. 16: 241. ♂.
- ontariensis** Dasch. Md., Ont., Mich.
- Mesochorus ontariensis* Dasch, 1971. Amer. Ent. Inst., Mem. 16: 80. ♂, ♀.
- ottawaensis** (Harrington). N. S. w. to n. Alta. and Oreg., s. to N. H., n. Mich., e. N. Dak., Colo., and n. Utah.
- Ischyrocnemis ottawaensis* Harrington, 1892. Canad. Ent. 24: 98. ♀.
- parallelus** Dasch. Western Va.
- Mesochorus parallelus* Dasch, 1971. Amer. Ent. Inst., Mem. 16: 82. ♀.
- parvus** Dasch. Maine, N. H., Mass., N. Y., s.e. Fla., Ont., n. Mich. Ecology: Two of the paratypes can be presumed to have been reared from parasites of *Bucculatrix canadensisella* Chamb. and *Heterarthrus nemoratus* (Fall.).
- Mesochorus parvus* Dasch, 1971. Amer. Ent. Inst., Mem. 16: 248. ♂, ♀.
- paulus** Dasch. N. Y. Known only from the holotype.
- Mesochorus paulus* Dasch, 1971. Amer. Ent. Inst., Mem. 16: 250. ♂.
- peltatus** Dasch. Western Mich., Alta., interior Alaska, s.w. B. C., Wash.
- Mesochorus peltatus* Dasch, 1971. Amer. Ent. Inst., Mem. 16: 104. ♂, ♀.
- perniciosus** Viereck. Southwestern Ont. s. to Iowa and Kans., w. to Alta., w. Mont., e. Idaho, n.e. Utah, and N. Mex. Ecology: Reared from parasites of *Loxostege sticticalis* (L.) and *Cyclophora serulata* (Pack.). Host: *Apanteles laeviceps* Ash., *Cremnops vulgaris* (Cr.).
- Mesochorus perniciosus* Viereck, 1911. U. S. Natl. Mus., Proc. 39: 407. ♀.
- personatus** Dasch. Que., n. Ont., Alta., and s. B. C., s. to Maine, Mich., and Oreg. Ecology: One of the paratypes can be presumed to have been reared from a parasite of *Eupithecia luteata* Pack.
- Mesochorus personatus* Dasch, 1971. Amer. Ent. Inst., Mem. 16: 166. ♂, ♀.
- pictilis** Holmgren. N. S. w. to s. B. C., s. to n.w. S. C., e. Ill., Idaho, and s.w. Oreg. Ecology: Can be presumed to have been reared from parasites of the following-- Geometridae (*Aethalura anticaria* [Wlk.], *Biston betularia cognataria* [Gn.], *Campaea perlata* [Gn.], *Deilinea* sp., *Ectropis crepuscularia* [D. and S.], *Iridopsis emasculata* [Dyar], *Semiothisa "granitata"* auct.), Noctuidae (*Bomolocha albatiensis* [Wlk.], *Lithophane* sp.) and Pyralidae (*Promylea lunigerella* Rag.).
- Mesochorus pictilis* Holmgren, 1860 (1858). Svenska Vetensk.-Akad. Handl. (n. f.) 2 (8): 131. ♂, ♀.
- platygorytos** Dasch. Que. Ecology: The unique holotype should be presumed to have been reared from a parasite of *Psilocorsis* sp.
- Mesochorus platygorytos* Dasch, 1971. Amer. Ent. Inst., Mem. 16: 86. ♀.

- plumosus** Dasch. N. Y., Ont., Ohio, Mich., Colo., Idaho, e. Wash. Ecology: Oviposits into adult Chrysomelidae (*Phyllotreta armoraciae* [Koch], *P. striolata* [F.]) which have been parasitized by euphorine Braconidae. Host: *Microctonus vittatae* Mues. The paratype of *Mesochorus plumosus* from D. C. was reared together with seven paratypes of *Microctonus vittatae* Mues.
- Mesochorus plumosus* Dasch, 1971. Amer. Ent. Inst., Mem. 16: 246. ♂, ♀.
- prolatus** Dasch. Que., w. N. W. T., Alta., interior Alaska, w. B. C.
Mesochorus prolatus Dasch, 1971. Amer. ent. Inst., Mem. 16: 180. ♂, ♀.
- punctifrons** Dasch. Western N. C., Ohio, s. Ill., s. B. C. Ecology: The holotype was collected at an elevation between 4800 ft. and 5300ft. on Mt. Pisgah, N. C. Host: *Leiopron sp.* ex *Plagiognathus* sp. on *Solidago*.
- Mesochorus punctifrons* Dasch, 1971. Amer. Ent. Inst., Mem. 16: 212. ♂, ♀.
- recurvatus** Dasch. Southwestern B. C. Known only from the holotype.
Mesochorus recurvatus Dasch, 1971. Amer. Ent. Inst., Mem. 16: 172. ♀.
- restrictus** Dasch. Que., s.e. Ont., n.e. Alta., s.e. Utah, s. B. C., n. Calif.
Mesochorus restrictus Dasch, 1971. Amer. Ent. Inst., Mem. 16: 113. ♂, ♀.
- sabulosus** Dasch. Southern Colo., Utah. Ecology: The holotype was collected at Great Sand Dunes, Alamosa Co., Colo.
Mesochorus sabulosus Dasch, 1971. Amer. Ent. Inst., Mem. 16: 129. ♂, ♀.
- scabrosus** Dasch. Northeastern Pa. Known only from the holotype.
Mesochorus scabrosus Dasch, 1971. Amer. Ent. Inst., Mem. 16: 209. ♀.
- solidus** Dasch. R. I., s.w. Mich., Colo., s. B. C.
Mesochorus solidus Dasch, 1971. Amer. Ent. Inst., Mem. 16: 220. ♂, ♀.
- spinosus** Dasch. Ariz.
Mesochorus spinosus Dasch, 1971. Amer. Ent. Inst., Mem. 16: 75. ♂.
- sulcatus** Dasch. Western Va. Ecology: The only three specimens known were collected at Mountain Lake, Va.
Mesochorus sulcatus Dasch, 1971. Amer. Ent. Inst., Mem. 16: 74. ♀.
- sylvarum** Curtis. Newfoundland (n. Labrador) w. to n. Yukon and Alaska, s. to n.w. S. C., Mo., Colo., and n. Calif.; n. Eurasia; n. Mexico. Ecology: Reared or presumed to have been reared from parasites of the following-- Tortricidae (*Acleris chalybeana* [Fern.], *A. variiana* [Fern.], *Archips* sp., *Choristoneura conflictana* [Wlk.], *C. fumiferana* [Clem.], *C. rosaceana* [Harris], *Sparganothis pectinana* [Rob.]), Olethreutidae (*Epinotia* sp., *E. solandriana* [L.], *Grapholita molesta* [Bsk.], *Pseudexentera* sp., *Zeiraphera* sp., *Z. canadensis* M. and F.), Gelechiidae (*Anacampsis incocella* [Zell.], *A. niveopulverella* [Chamb.]), Noctuidae (*Feralia* sp.), and Notodontidae (*Cerura borealis* [Bdv.]). Host: *Meteorus* sp.?, *Microgaster* peroneae Wly., *Enyrtus eureka* Ash., *Glypta fumiferanae* (Vier.), *G. inversa* Cr., *Actia diffidens* Curran.
- Mesochorus sylvarum* Curtis, 1833. Brit. Ent., v. 10, pl. 464. ♀.
- Mesochorus atriventris* Cresson, 1872. Canad. Ent. 4: 21. ♂.
- Mesochorus politus* Provancher, 1883. Nat. Canad. 14: 4. ♀. Preocc. by Gravenhorst, 1829.
- Mesochorus provancheri* Dalla Torre, 1901. Cat. Hym., v. 3, p. 57. N. name for *politus* Provancher.
- Mesochorus silvarum* Dalla Torre, 1901. Cat. Hym., v. 3, p. 57. Emendation.
- tachinae** Ashmead. N. S. w. to B. C., s. to e. N. C., n. Ga., Ill., Colo., and n. Calif. Ecology: Reared or presumed to have been reared from parasites of the following-- Geometridae (*Aethalura anticaria* [Wlk.], *Caripeta divisata* Wlk., *Cladara limitaria* [Wlk.], *C. nigroangulata* [Strkr.], *Cyclophora pendulinaria* [Gn.], *Deilinea* sp., *Ectropis crepuscularia* [D. and S.], *Enypia packardata* Tay.?, *Erannis tiliaria* [Harris], *Eupithecia* sp., *E. luteata bifasciata* [Dyar], *E. transcanadata* MacKay, *Hydriomena renunciata columbiata* Tay., *Hyperetis amicaria* [H.-S.], *Iridopsis emasculata* [Dyar]?, *Lambdina fiscellaria lugubrose* [Hulst], *Nematocampa filamentaria* Gn., *Neptilia phantasmaria* [Strkr.], *Semiothisa* sp., *S. "granitata" auct.*, Noctuidae (*Feralia* sp., *F. jocosa* [Gn.], *Hypena humuli* [Harris], *Zale minerea norda* [Smith]), Diptidae (*Phryganidea* sp.), Tortricidae (*Acleris variana* [Fern.] and tortricid), and Oecophoridae

(*Psilocorsis* sp.). Host: *Actia interrupta* Curran, *Chaetophlepsis orbitalis* Web., *C. semiostisae* Brooks, *Ictericophyto tibialis* (Curran), tachinids, dipterous parasites.

Mesochorus tachinae Ashmead, 1898. In Dimmock and Ashmead, Ent. Soc. Wash., Proc. 4: 168. ♀.

tachypus Holmgren. Newfoundland (Labrador), w. N. W. T., and Alaska, s. to P. E. I., s. Que., Ont., N. Mex., and n.w. Calif.; Europe. Ecology: Reared or presumed to have been reared from parasites of the following-- Olethreutidae (*Epinotia solandriana* [L.], *Pseudexentera improbana oregonana* [Wlk.], *Zeiraphera* sp.), Tortricidae (*Acleris variana* [Fern.], *Choristoneura occidentalis* Free.), Gelechiidae (*Anacampsis niveopulvella* [Cham.], *Coleotechnites starki* [Free.]), Geometridae (*Alsophilina pometaria* [Harris], *Operophtera* sp.), Lasiocampidae (*Malacosoma disstria* Hbn.), and sp. of Noctuidae. Host: *Apanteles fumiferanae* Vier., *Microgaster peroneae* Wly.

Mesochorus tachypus Holmgren, 1860 (1858). Svenska Vetensk.-Akad. Handl. (n. f.) 2 (8): 130. ♂, ♀.

Mesochorus diversicolor Viereck, 1912. U. S. Natl. Mus., Proc. 42: 149. ♂, ♀.

tantillus Dasch. N. B., n. and s. Que., N. H., Ont., n. Mich., Sask., s.e. B. C. Ecology: Paratypes should be presumed to have been reared from parasites of the following-- Tenthredinidae (*Anoplonyx luteipes* [Cr.]) and Geometridae (*Semiothisa dispuncta* [Wlk.], *S. granitata* auct.).

Mesochorus tantillus Dasch, 1971. Amer. Ent. Inst., Mem. 16: 164. ♂, ♀.

totonacus Cresson. Ohio, s. Mich., n.e. Kans.; n. and s. Mexico. The type locality is in southern Mexico.

Mesochorus totonus Cresson, 1872. Canad. Ent. 4: 23. "♀" = ♂.

Mesochorus totonus Cresson, 1874 (1873). Acad. Nat. Sci., Proc. 25: 388. "♀" = ♂. The holotype is the same specimen as that of *totonacus*.

transversus Dasch. Northern Que., N. H.

Mesochorus transversus Dasch, 1971. Amer. Ent. Inst., Mem. 16: 269. ♂.

tumidifrons Dasch. Northern Va., n.e. Kans. Ecology: The single paratype can be presumed to have been reared from a parasite of a sawfly larva.

Mesochorus tumidifrons Dasch, 1971. Amer. Ent. Inst., Mem. 16: 214. ♀.

tundracolus Dasch. Southwestern Alaska. Ecology: The three specimens known were collected on tundra at Naknek, Alaska.

Mesochorus tundracolus Dasch, 1971. Amer. Ent. Inst., Mem. 16: 179. ♂, ♀.

ukiahensis Dasch. Northwestern Calif. Known only from the holotype.

Mesochorus ukiahensis Dasch, 1971. Amer. Ent. Inst., Mem. 16: 227. ♀.

unicarinatus Dasch. Que. w. to n. Yukon, s. to Md., n. Ga., Tex., and n.w. Oreg. Host:

Chaetophlepsis orbitalis Web. ex *Lambdina fiscellaria lugubrosa* (Hulst).

Mesochorus uncarinatus Dasch, 1971. Amer. Ent. Inst., Mem. 16: 87. ♂, ♀.

uniformis Cresson. N. S. w. to w. Yukon, s. to Ga., Tex., s. N. Mex., s. Ariz., and s. Calif.; Mexico. Ecology: Reared or presumed to have been reared from parasites of the following-- Sphingidae (*Ceratomia amyntor* [Geyer]), Lymantriidae *Lymantria dispar* [L.], *Orgyia* sp., *O. pseudotsugata* [McD.], Noctuidae (*Xylomyges perlubens* Grt.), Geometridae (*Caripeta* sp., *C. angustirota* Wlk., *C. divisata* Wlk., *Ectropis crepuscularia* [D. and S.], *Eufidonia notataria* [Wlk.], *Eupithecia annulata* [Hulst], *Glena nigricaria* [B. and McD.], *Lambdina fiscellaria lugubrosa* [Hulst], *Melanolophia imitata* [Wlk.], *Semiothisa* sp., *S. sp. on Larix*, *S. dispuncta* [Wlk.], *S. oweni* [Swett], *S. setonana* [McD.], *sexmaculata* [Pack.], *Stenoporpia* sp.), Tortricidae (*Acleris variana* [Fern.], *Choristoneura fumiferana* [Clem.]), Oecophoridae (*Semioscopis inornata* Wlshm.), and Diprionidae (*Neodiprion abietis* [Harris], *N. pinetum* [Nort.]). Host: *Casinaria limenitidis* (How.), *Phobocampe pallipes* (Prov.), *P. unicincta* (Grav.), *Apanteles melanoscelus* (Ratz.).

Mesochorus uniformis Cresson, 1872. Amer. Ent. Soc., Trans. 4: 171. "♀" = ♀ and misdet. ♂.

Paniscus rufulus Provancher, 1876. Nat. Canad. 8: 328. ♀.

Astiphromma mexicanus Ashmead, 1894. Calif. Acad. Sci., Proc. 4: 129. ♀.

validus Dasch. Mass. and s.e. Alta., s. to e. N. C., n.w. S. C., n. La., Okla., s. Ariz. and central Calif.

Mesochorus validus Dasch, 1971. Amer. Ent. Inst., Mem. 16: 130. ♂, ♀.
varianus Dasch. Newfoundland (insular) w. to central Alta. and s.w. B. C., s. to n.w. S. C., s. Wis., Minn., and n.w. Oreg. Host: *Lamachus angularius* (Davis).

Mesochorus varianus Dasch, 1971. Amer. Ent. Inst., Mem. 16: 150. ♂, ♀.
vittator (Zetterstedt). Newfoundland (Labrador) w. to n.w. Alaska, s. to Ala., w. Tex., Ariz., and s. Calif.; Eurasia; Mexico, Costa Rica. Ecology: Reared or presumed to have been reared from parasites of two species of Tenthredinidae and many species of Lepidoptera (too numerous to list) of diverse habits. Host: *Diadegma insulare* (Cr.), *Dimorphora* sp., "Hyposoter annulipes" (Cresson)" ex *Lambdina fiscellaria lugubrosa* (Hulst) and *Neptynia umbrosaria nigrovenaria* (Pack.), *Phobocampe* n. sp., *P. flavipes* (Prov.), *Apanteles glomeratus* (L.)?, *A. medicaginis* Mues.?, *Microgaster peroneae* Wly. *M. vittator* is apparently by far the most frequently collected species of *Mesochorus* in North America.

Tryphon vittator Zetterstedt, 1838. Ins. Lapponica Descr., Hym., p. 387. ♀.
Mesochorus brunneus Brischke, 1880. Naturf. Gesell. Danzig, Schr. (n. f.) 4: 184. ♂.
Campoplex pieridicola Packard, 1881. Boston Soc. Nat. Hist., Proc. 21: 20. "♀" = ♂.

yosemitae Dasch. Colo., s. Idaho, n.e. Calif.

Mesochorus yosemitae Dasch, 1971. Amer. Ent. Inst., Mem. 16: 196. ♀.

Genus STICTOPISTHUS Thomson

Stictopisthus Thomson, 1886. Soc. Ent. de France, Ann. (6) 5: 327, 344.

Type-species: *Stictopisthus bilineatus* Thomson. Desig. by Viereck, 1914.

This is a moderate sized genus of worldwide distribution.

argaleus Dasch. Que., s. Sask., and w. Yukon, s. to Md., w. N. C., and n.w. Ark. Ecology: Should be presumed as having been reared from parasites of the following—Tortricidae (*Archips argyrospilus* [Wlk.], *Choristoneura pinus* Free., *C. rosaceana* [Harris], and a "tortricid sp."), Pyralidae (*Desmia funeralis* [Hbn.], *Nephopteryx subcaesiella* [Clem.]), Yponomeutidae (*Zelleria haimbachii* Bsk.), Gracillariidae (*Lithocolletis robbiniella* Clem.), and a leaf miner on *Robinia pseudoacacia*. The paratypes in the U. S. Natl. Museum collection show considerably more variation than is allowed for in either Dasch's key to *Stictopisthus* females or in his description of *argaleus* (the key and description also disagree with each other in respect to the dimensions of the ovipositor sheath), and two species may be confused under the name *argaleus*.

Stictopisthus argaleus Dasch, 1971. Amer. Ent. Inst., Mem. 16: 277. ♂, ♀.

artus Dasch. N. Y., s. Ind., w. Mont.

Stictopisthus artus Dasch, 1971. Amer. Ent. Inst., Mem. 16: 283. ♂, ♀.
bilineatus Thomson. Southern Sask. s. to w. Tex., w. to s. Alta., Wash., and s. Calif.; s. Mexico; Europe. Ecology: Can be presumed to have been reared from parasites of the following microlepidoptera—*Seythris* sp. and *Plutella xylostella* (L.).

Stictopisthus bilineatus Thomson, 1886. Soc. Ent. de France, Ann. (6) 5: 344. [male, female].

crenatus Dasch. Newfoundland (Labrador), w. N. W. T., and s.w. Alaska, s. to N. J., Mich. and n. Idaho. Ecology: Can be presumed to have been reared from parasites of the following microlepidoptera—*Gracilaria burgessiella* Zell., *Lithocolletis* sp., *Acleris* sp., and *Choristoneura pinus* Free.

Stictopisthus crenatus Dasch, 1971. Amer. Ent. Inst., Mem. 16: 281. ♂, ♀.
electilis (Cresson). Eastern N. C., n.w. S. C., Kans., Okla., Tex., s.e. Ariz.; Mexico.

Mesochorus electilis Cresson, 1872. Amer. Ent. Soc., Trans. 4: 171. ♀.

exilis Dasch. Central Utah. Known only from the holotype.

Stictopisthus exilis Dasch, 1971. Amer. Ent. Inst., Mem. 16: 287. ♂.

flaviceps (Provancher). Que. w. to w. N. W. T., s. to Md., n.w. S. C., Mo., Colo., and n. Calif. Ecology: Can be presumed to have been reared from parasites of the following—Tortricidae (*Archips argyrospilus* [Wlk.], *Choristoneura fumiferana* [Clem.], *C. pinus*

Free.), Olethreutidae (*Ancylis comptana* [Froel.]), and Yponomeutidae (*Zelleria haimbachii* Bsk.).

Mesochorus flaviceps Provancher, 1879. Nat. Canad. 11: 210. ♀.

floridanus Dasch. Northern Fla. Ecology: The single paratype can be presumed to have been reared from a parasite of the "spotted leaf tyer on oak."

Stictopisthus floridanus Dasch, 1971. Amer. Ent. Inst., Mem. 16: 288. ♂, ♀.

lanceolatus Dasch. N. B. w. to central Alta. and s. B. C., s. to Pa., Ohio, and Wis. Ecology: Can be presumed to have been reared from parasites of the following microlepidoptera--
Choristoneura fumiferana (Clem.), *Sparganothis pettitana* (Rob.), *Anacampsis niveopulvella* (Cham.).

Stictopisthus lanceolatus Dasch, 1971. Amer. Ent. Inst., Mem. 16: 279. ♂, ♀.

SUBFAMILY DIPLAZONTINAE

The members of this medium sized subfamily are internal parasites of Diptera larvae. The eggs are deposited in the early-instar larvae or eggs of the host, and the adults emerge from the host puparia. The usual hosts are aphidophagous Syrphidae, although phytophagous Syrphidae and even Diptera of other families are sometimes parasitized.

Revision: Davis, 1895. Amer. Ent. Soc., Trans. 22: 25-27. — Dasch, 1964. Amer. Ent. Inst., Mem. 3: 1-304 (Nearctic spp.). — Dasch, 1964. Amer. Ent. Inst., Contrib. 1 (1): 1-77 (Neotropic spp.).

Taxonomy: Townes, 1971. Amer. Ent. Inst., Mem. 17: 216-232 (genera of world).

Genus SYRPHOCTONUS Foerster

Syrphoconus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 15: 162.

Type-species: *Bassus exsultans* Gravenhorst. By subsequent monotypy from inclusion by Woldstedt, 1877.

Homotropus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 162.

Type-species: *Bassus elegans* Gravenhorst. Desig. by Walkley, 1958 from 29 species included by Thomson, 1890. Walkley (1958) considered the type-species as having been designated by Viereck (1914) when the latter author designated *B. elegans* as the type-species of *Homocidus* Morley (Viereck's [1914] designation of *B. bicapillaris* Walsh as the type-species of *Homotropus* has no validity because *B. bicapillaris* was not placed in *Homotropus* until 1895). The fact that *Homocidus* (which see) has no standing in nomenclature (and therefore has no type-species), prevents Viereck's (1912) designation of *B. elegans* as the "type-species" of *Homocidus* from being the valid designation for *Homotropus* by isogenerity.

Homoporus(!) Thomson, 1890. Opusc. Ent. 14: 1488. There is no doubt that *Homoporus* is a lapsus for *Homotropus* because Thomson used the name *Homotropus* in his conspectus generum on page 1465 of the same paper. Twelve years earlier Thomson had given the name *Homoporus* to a genus of Chaleidoidea, which makes it easy to explain how he could have made the error of introducing the name *Homoporus* in his manuscript which dealt with *Homotropus*.

Homocidus Morley, 1911. Brit. Ichn., v. 4, p. 87. N. name for *Homoporus* Thomson, 1890.

This large Neotropic, Holarctic, Oriental and Ethiopian genus was called *Homotropus* in the most recent works on Diplazontinae. Suppression of *Homotropus* as a synonym of *Syrphoconus* is necessitated by the first revisor decision of Benoit (1955) and by the following facts. Viereck (1914) designated *Bassus biguttatus* Gravenhorst as the type-species of *Syrphoconus*, believing that this species was eligible for designation by virtue of Woldstedt's (1877b) placement of it in *Syrphoconus* along with three other species, including *B. exsultans* Gravenhorst. However, Woldstedt (1877a) had monotypically included *B. exsultans*, which makes it the type-species of *Syrphoconus*. *Syrphoconus* of recent authors is herein called *Woldstedtius* (which see).

Taxonomy: Woldstedt, 1877a (1876). Acad. Imp. des Sci. St. Petersburg, Bul. 22: 391.

—Woldstedt, 1877b. Acad. Imp. des Sci. St. Petersburg, Bul. 23: 441. —Viereck, 1912. Ent. Soc. Wash., Proc. 14: 175. —Viereck, 1914. U. S. Natl. Mus., Bul. 83: 72, 142.

- alaskensis* (Ashmead). Que., s. Maine, s.e. Yukon, Alaska. Males are unknown.
Homotropus alaskensis Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 226. ♀.
- albopictus* (Davis). Northern Que. w. to n. Yukon and Alaska, s. to n. Va., w. N. C., Minn., n. N. Mex., and n. Calif. The two "subspecies" recognized by Dasch (1964) had broadly overlapping ranges.
Homotropus bicapillaris var. *albopictus* Davis, 1895. Amer. Ent. Soc., Trans. 22: 28. ♀.
Homotropus albopictus ithacae Dasch, 1964. Amer. Ent. Inst., Mem. 3: 103. ♂, ♀. N. syn.
- aquilonius* (Dasch), n. comb. Greenland.
Homotropus aquilonius Dasch, 1964. Amer. Ent. Inst., Mem. 3: 135. ♀.
- arizonensis* (Dasch), n. comb. Northern Colo., Ariz., e. Calif. Ecology: Occurs at higher altitudes.
Homotropus arizonensis Dasch, 1964. Amer. Ent. Inst., Mem. 3: 114. ♂, ♀.
- badius* (Dasch), n. comb. Central Calif.
Homotropus badius Dasch, 1964. Amer. Ent. Inst., Mem. 3: 170. ♂, ♀.
- belangerii* (Provancher). Que. s. to Md. and w. N. C., w. to Wis. and n. Ill. Host: Syrphid.
Bassus Belangerii Provancher, 1874. Nat. Canad. 6 (1): 31 (key); 6 (2): 56. ♀.
- columbiensis* (Dasch), n. comb. Southwestern Alta. and B. C. s. to Colo., Utah, and n. Calif. Host: Syrphid.
Homotropus columbiensis Dasch, 1964. Amer. Ent. Inst., Mem. 3: 123. ♂, ♀.
- compactus* (Dasch), n. comb. Northwestern Mich., Colo., w. N. W. T., w. Wash., s.w. Oreg.
Homotropus compactus Dasch, 1964. Amer. Ent. Inst., Mem. 3: 119. ♂, ♀.
- confertus* (Dasch), n. comb. Que., n. N. Mex., w. B. C.
Homotropus confertus Dasch, 1964. Amer. Ent. Inst., Mem. 3: 142. ♂, ♀.
- costalis* (Provancher), n. comb. Que. This name is transferred from synonymy with *Promethes sulcator* (Gravenhorst) because there appear to be no valid grounds for rejecting the lectotype of Gahan and Rohwer (1917) as Townes (1939) and Barron (1975) have done. Because Provancher stated that he had two specimens, lack of agreement with the original description alone is not proof that the Gahan and Rohwer lectotype was not an original syntype.
Bassus costalis Provancher, 1874. Nat. Canad. 6 (1): 31 (key); 6 (2): 58. ♀.
- Taxonomy: Gahan and Rohwer, 1917. Canad. Ent. 49: 332. —Townes, 1939. Canad. Ent. 71: 93. —Barron, 1975. Nat. Canad. 102: 455.
- cressonii* Davis. Nev. Known only from the holotype.
Syrphoctonus cressoni Davis, 1895. Amer. Ent. Soc., Trans. 22: 27. ♀.
- cultiformis* (Davis). Colo., Alaska.
Otoblastus cultiformis Davis, 1897. Amer. Ent. Soc., Trans. 24: 273. ♀.
Otoblastus cultriformis(!) Dalla Torre, 1901. Cat. Hym., v. 3, p. 311.
Homotropus cultriformis Dasch, 1964. Amer. Ent. Inst., Mem. 3: 179. Unjustified emend.
- decoratus* (Cresson). Colo., n. Utah, s.e. Ariz., s. B. C., Wash., Oreg., Calif.; n.w. Mexico. Host: Syrphid spp.
Bassus decoratus Cresson, 1879 (1878). Acad. Nat. Sci. Phila., Proc. 30: 375. ♂.
- elegans* (Gravenhorst). Que., e. N. W. T., Ont.; Europe.
Bassus elegans Gravenhorst, 1829. Ichn. Europaea, v. 3, p. 313. ♂.
Bassus rufonotatus Holmgren, 1858 (1856). Svenska Vetensk.-Akad. Handl. (n. f.) 1: 369. ♂, ♀.
- fossatus* (Dasch), n. comb. Newfoundland (Labrador) w. to n. Yukon and Alaska, s. to Mass., n. Mich., n. Colo., and n.w. Oreg. The ranges of the two "subspecies" described by Dasch (1964) were largely overlapping.
Homotropus fossatus *fossatus* Dasch, 1964. Amer. Ent. Inst., Mem. 3: 159. ♂, ♀.
Homotropus fossatus *aureopectus* Dasch, 1964. Amer. Ent. Inst., Mem. 3: 160. ♂, ♀. N. syn.
- fraudulentus* *fraudulentus* (Dasch), n. comb. Colo., s. Alta., n. Idaho, interior Alaska, s. Yukon, s. B. C.
Homotropus fraudulentus *fraudulentus* Dasch, 1964. Amer. Ent. Inst., Mem. 3: 151. ♂, ♀.

- fraudulentus recurvatus** (Dasch), n. comb. Northwestern Wash., n.e. Calif.
Homotropus fraudulentus recurvatus Dasch, 1964. Amer. Ent. Inst., Mem. 3: 152. ♂, ♀.
- imperfectus** (Dasch), n. comb. Newfoundland (Labrador), n.w. Mich., s. B. C., Wash., n.w. Oreg.
 Host: Syrphid.
Homotropus imperfectus Dasch, 1964. Amer. Ent. Inst., Mem. 3: 155. ♂, ♀.
- labadorensis** (Dasch), n. comb. Newfoundland (n. Labrador), Colo., s.w. Alta.
Homotropus labadorensis Dasch, 1964. Amer. Ent. Inst., Mem. 3: 136. ♂, ♀.
- laevis** Brues. Maine w. to interior Alaska, s. to S. C., s. Ill., N. Mex., and Wash. Host: Syrphid
 on *Populus*.
Syrphoconus laevis Brues, 1908. Wis. Nat. Hist. Soc., Bul. 6: 53. ♀.
- maculifrons** (Cresson). Minn. w. to central Alta. and s. B. C., s. to n.w. Iowa, n. N. Mex., n.
 Ariz., and s. Calif.; n.w. Mexico; Hawaii. Host: *Eupeodes volucris* O. S., *Metasyrphus*
perplexus (Osb.), *Scaeva pyrastri* (L.).
Bassus maculifrons Cresson, 1865. Ent. Soc. Phila., Proc. 4: 272. ♀.
Bassus semifasciatus Walsh, 1873. Acad. Sci. St. Louis, Trans. 3: 87. ♂. This synonymy is
 dubious because the lost type of *B. semifasciatus* is thought to have been collected in
 Ill.
- melanogaster** (Holmgren). Northern Que., N. W. T., interior Alaska, w. Wash.; Greenland.
Bassus melanogaster Holmgren, 1872. Svenska Vetensk.-Akad., Ofvers. af ... Forh. 29 (6):
 98. ♂.
- minimus** (Cresson). Que. s. to n. Fla., w. to Minn., e. Kans., and Ark.

Genus XESTOPELTA Dasch

Xestopelta Dasch, 1964. Amer. Ent. Inst., Mem. 3: 208.

Type-species: *Syphocontonus vertebratus* Cushman. Orig. desig.

This is a very small genus of Holarctic and Ethiopian (one Madagascan sp.) distribution.

vertebrata (Cushman). N. H., Vt., N. W. T., B. C., w. Wash.

Syphoconus bilineatus Ashmead, 1900. In Slosson, Ent. News 11: 320. Nomen nudum.

Himertosoma quinquecinctum Ashmead, 1902. In Slosson, Ent. News 13: 320. Nomen nudum.

Syphoconus vertebratus Cushman, 1922. U. S. Natl. Mus., Proc. 61 (8): 29. ♂.

Genus ENIZEMUM Foerster

Enizemum Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 162.

Type-species: *Bassus tibialis* Cresson. By subsequent monotypy from inclusion by Davis, 1895.

This is a small Holarctic, Oriental, and Ethiopian genus.

huronense Dasch. Northern Mich. Known only from two specimens.

Enizemum huronense Dasch, 1964. Amer. Ent. Inst., Mem. 3: 199. ♂.

imitatum Dasch. Ariz., n.e. Calif. Known only from two specimens.

Enizemum imitatum Dasch, 1964. Amer. Ent. Inst., Mem. 3: 196. ♂.

insidiosum Dasch. Coastal Calif. The only specimen known was collected at Carmel, Calif.

Enizemum insidiosum Dasch, 1964. Amer. Ent. Inst., Mem. 3: 197. ♀.

matanuskae Dasch. Southern Yukon, Alaska. Known only from the holotype and one paratype.

Enizemum matanuskae Dasch, 1964. Amer. Ent. Inst., Mem. 3: 191. ♀.

ornatum (Gravenhorst). N. S., Sask., Colo., N. Mex., Alta., Alaska, s. Yukon, B. C.; Eurasia.

Host: *Metasyrphus lapponicus* (Zett.).

Bassus deplanatus Gravenhorst, 1829. Ichn. Europaea, v. 3, p. 341. ♂.

Bassus ornatus Gravenhorst, 1829. Ichn. Europaea, v. 3, p. 340. ♂, ♀.

Bassus carinulatus Ruthe, 1859. Stettin. Ent. Ztg. 20: 373. ♂, ♀.

Enizemum neonexicanum Brues, 1908. Wis. Nat. Hist. Soc., Bul. 6: 54. ♀.

petiolatum (Say). N. B. w. to s.e. Alta., s. to e. N. C., s. Ala., n.e. Kans., and s. Colo. Host:

Metasyrphus americanus (Wied.).

Pimpla? petiolatus Say, 1836. Boston Jour. Nat. Hist. 1: 224. ♂.

Bassus tibialis Cresson, 1868. Amer. Ent. Soc., Trans. 2: 110. ♀.

Bassus bicapillaris Walsh, 1873. Acad. Sci. St. Louis, Trans. 3: 88. "♂" = ♀.

Pimpla parvialba Viereck, 1906. Amer. Ent. Soc., Trans. 32: 182. "♂" = ♀.

scorteum Dasch. Northern Que., N. W. T., n. Colo., s.e. B. C.

Enizemum scorteum Dasch, 1964. Amer. Ent. Inst., Mem. 3: 194. ♂, ♀.

tridentatum Dasch. Northern Colo., s.w. Alta., interior Alaska.

Enizemum tridentatum Dasch, 1964. Amer. Ent. Inst., Mem. 3: 189. ♂, ♀.

Genus WOLDSTEDTIUS Carlson, n. genus

Syphoconus Foerster sensu Dasch, 1964. Amer. Ent. Inst., Mem. 3: 200-208.

The type-species of this new genus is *Bassus biguttatus* Gravenhorst, which was formerly regarded as the type-species of *Syphoconus* Foerster (which see). The genus is rather small, and its species occur in the Neotropic, Holarctic, and Oriental regions.

Taxonomy: Dasch, 1964. Amer. Ent. Inst., Mem. 3: 200-208 (Nearctic spp.). —Dasch, 1964.

Amer. Ent. Inst., Contrib. 1 (1): 45-63 (Neotropic spp.).

citropectoralis (Schmiedeknecht), n. comb. N. Y., Pa., e. Ohio, n. Mich., interior Alaska, s.e. B. C.; Europe.

Homocidus citropectoralis Schmiedeknecht, 1926. Opusc. Ichn., v. 5, p. 3412. ♂.

flavolineatus (Gravenhorst), n. comb. N. S. w. to n. Yukon and Alaska, s. to e. S. C., s. Ala., n.w. Ark., s. Colo., and n. Calif.; Mexico, Ecuador; Eurasia. Host: *Allotrapta obliqua* (Say), *Metasyrphus americanus* (Wied.), *M. lapponicus* (Zett.), *Ocyptamus clavatus* (F.), *O. fascipennis* (Wied.).

Bassus flavolineatus Gravenhorst, 1829. Ichn. Europaea, v. 3, p. 337. ♀.

Bassus bimaculatus Holmgren, 1858 (1856). Svenska Vetensk.-Akad. Handl. (n. f.) 1: 360. ♂.

Bassus agilis Cresson, 1868. Amer. Ent. Soc., Trans. 2: 111. ♂.

Bassus frontalis Cresson, 1868. Amer. Ent. Soc., Trans. 2: 111. ♀. Preocc. by Zetterstedt, 1838.

Bassus junctus Provancher, 1883. Nat. Canad. 14: 10. "♂" = ♀.

patei (Dasch), n. comb. Northern Colo., Alaska.

Syrphoctonus patei Dasch, 1964. Amer. Ent. Inst., Mem. 3: 207. ♀.

Genus CAMPOCRASPEDON Uchida

Campocraspedon Uchida, 1957. Hokkaido Imp. Univ., Faculty Agr., Jour. 50: 237.

Type-species: *Campocraspedon satoi* Uchida. Monotypic and orig. desig.

This is a small Holarctic genus.

foutsii (Cushman). Maine, Mass., N. Y., Md., D. C., e. N. C., s.e. Ont., Ohio, e. Ill.

Syrphoctonus foutsii Cushman, 1927. U. S. Natl. Mus., Proc. 72 (13): 12. ♂, ♀.

truncatus Dasch. Northern Colo., Alaska, s.e. B. C., n. Idaho.

Campocraspedon truncatus Dasch, 1964. Amer. Ent. Inst., Mem. 3: 214. ♂, ♀.

Genus PHTHORIMA Foerster

Phtorima Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 162.

Type-species: *Bassus compressus* Desvignes. By subsequent monotypy from inclusion by Thomson, 1890.

Phtorimus Thomson, 1890. Opusc. Ent. 14: 1474. Emend.

This is a small Holarctic genus.

bidens (Davis). N. B. s. to Md., w. to s.w. Ont. and n. Colo. Host: *Neocnemodon coxalis* (Curran), syrphid on hickory bark.

Otoblastus bidens Davis, 1897. Amer. Ent. Soc., Trans. 24: 273. ♂.

Phtorima sulcifrons Cushman, 1920. U. S. Natl. Mus., Proc. 58: 265. ♀.

compressa (Desvignes). Colo., s. Alta., interior Alaska, n. Yukon, B. C.

Bassus compressus Desvignes, 1856. Cat. Brit. Ichn. in Brit. Mus., p. 91. ♀.

Bassus ibaloides Kriechbaumer, 1878. Ent. Nachr. 4: 211. ♀.

Homoporus niger Morley, 1906 (1905). Ent. Soc. London, Trans. 53: 422. ♂.

extensor Cushman. N. S. w. to s.e. B. C., s. to D. C., s.e. Tenn., and n.w. Colo.

Phtorima extensor Cushman, 1920. U. S. Natl. Mus., Proc. 58: 264. ♀.

rufipleurum Dasch. N. H., Mass., Conn., N. Y., Md., Ont., Ohio, Mich., w. N. W. T.

Phtorima rufipleurum Dasch, 1964. Amer. Ent. Inst., Mem. 3: 221. ♂, ♀.

townesi Dasch. Mass., N. Y., n. W. Va., Ont., Ohio, Mich., Iowa.

Phtorima townesi Dasch, 1964. Amer. Ent. Inst., Mem. 3: 224. ♂, ♀.

sulcigena Dasch. Southeastern B. C. Known only from the holotype.

Phtorima sulcigena Dasch, 1964. Amer. Ent. Inst., Mem. 3: 228. ♂.

Genus SYRPHOPHILUS Dasch

Syrphophilus Dasch, 1964. Amer. Ent. Inst., Mem. 3: 59.

Type-species: *Bassus bizonarius* Gravenhorst. Orig. desig.

This is a small Holarctic genus.

asperatus Dasch. Interior Alaska.

Syrphophilus asperatus Dasch, 1964. Amer. Ent. Inst., Mem. 3: 71. ♀.

bizonarius (Gravenhorst). Newfoundland (insular) w. to interior Alaska, s. to w. N. C., N. Mex., and n. Calif.; Eurasia. Host: Syrphids.

Bassus bizonarius Gravenhorst, 1829. Ichn. Europaea, v. 3, p. 350. ♂.

Bassus cingulatus Holmgren, 1858 (1856). Svenska Vetensk.-Akad. Handl. (n. f.) 1: 369. ♂.

Bassus frontalis Brischke, 1871. Phys.-Oekonom. Gesell. Koenigsberg, Schr. 11: 104. ♂.

Preocc. by Zetterstedt, 1838 and Cresson, 1868.

Bassus saginatus Provancher, 1879. Nat. Canad. 11: 277. "♀" = ♂.

Zootrepes maudae Davis, 1895. Amer. Ent. Soc., Trans. 22: 22. ♂, ♀. This name appeared in Davis' key and applies to the same lectotype as does *Z. inconstans* Davis.
Zootrepes inconstans Davis, 1895. Amer. Ent. Soc., Trans. 22: 23, 29. ♂, ♀. This name applies to the same lectotype as does *Z. maudae* Davis (above).
Homocidus iwawensis Uchida, 1930. Hokkaido Imp. Univ., Faculty Agr., Jour. 25: 257. ♀.
Homocidus satoi Uchida, 1930. Hokkaido Imp. Univ., Faculty Agr., Jour. 25: 257. ♂, ♀.

ichneumonoides (Provancher). Newfoundland (insular) w. to Alaska, s. to Mass., n. Mich., N. Mex., n. Idaho, and w. Wash.

Bassus ichneumonoides Provancher, 1874. Nat. Canad. 6 (1): 31 (key); 6 (2): 57. ♂, ♀.

Bassus cingulatus Provancher, 1883. Nat. Canad. 14: 11. ♀. Preocc. by Holmgren, 1858.
Zootrepes similis Brues, 1908. Wis. Nat. Hist. Soc., Bul. 6: 52. ♀.

tricinctarius (Thunberg). Northern Que. w. to Alaska, s. to n.w. S. C., s.w. Mo., N. Mex., and n.e. Calif.; Eurasia. Host: Syrphids.

Ichneumon tricinctarius Thunberg, 1822; 1824. Acad. Imp. des Sci. St. Petersburg, Mem. 8: 278; 9: 357. [male].

Bassus cinctus Gravenhorst, 1829. Ichn. Europaea, v. 3, p. 327. ♂.

Bassus lateralis Gravenhorst, 1829. Ichn. Europaea, v. 3, p. 342. "♂" = ♀.

Bassus scabriculus Holmgren, 1858 (1856). Svenska Vetensk.-Akad. Handl. (n. f.) 1: 357. ♂,
 ♀.

Bassus albicinctus Desvignes, 1862. Ent. Soc. London, Trans. 10: 218. ♂.

Bassus hyperboreus Marshall, 1877. Ent. Monthly Mag. 13: 241. ♂.

Bassus scapulatus Provancher, 1883. Nat. Canad. 14: 11. ♀.

Homocidus takaozanus Uchida, 1930. Hokkaido Imp. Univ., Faculty Agr., Jour. 25: 259. ♂.

Syrphophilus tricinctarius niveus Dasch, 1964. Amer. Ent. Inst., Mem. 3: 70. ♂, ♀. N. syn.; range almost completely overlapped by what Dasch considered to be the nominate subspecies.

tricinctus (Ashmead). Northern Que. w. to Alaska, s. to Colo., s.w. Alta., and w. Wash.

Bioblapsis tricincta Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 224. ♂. The type locality is Berg Bay, Glacier Bay Natl. Monument, Alaska.

Genus TYMMOPHORUS Schmiedeknecht

Tymmophorus Schmiedeknecht, 1913. Opusc. Ichn. 34: 2714.

Type-species: *Tymmophorus lacustris* Schmiedeknecht. Monotypic.

This small genus is Holarctic and apparently Neotropic (Mexico).

fasciventris Dasch. Northern Colo., Alaska, and Yukon.

Tymmophorus fasciventris Dasch, 1964. Amer. Ent. Inst., Mem. 3: 85. ♂, ♀.

gelidus Dasch. Arctic and subarctic N. W. T.; arctic Greenland.

Tymmophorus gelidus Dasch, 1964. Amer. Ent. Inst., Mem. 3: 87. ♂, ♀.

gillettii (Davis). Colo. Known only from the holotype.

Syrophotonus gillettii Davis, 1895. Amer. Ent. Soc., Trans. 22: 26. ♀.

obscuripes (Holmgren). Northern Que. w. to n. Yukon and Alaska, s. to n. Colo., n.w. Wyo., and n.e. Calif.; Europe. In Dasch's (1964) revision of the North American *Diplazonitinae* the name *graculus* (Gravenhorst) is incorrectly applied to this species. Pfankuch (1910) studied the now lost holotype (presumably destroyed in World War II) of *Bassus graculus* Gravenhorst; he found that *B. graculus* is a species of *Hemitelini* and noted that Thomson's (1890) suppression of *B. obscuripes* Holmgren as a synonym of *graculus* is incorrect. If specimens in the U. S. Natl. Museum collection are correctly identified, *B. graculus* Gravenhorst represents an undescribed European genus of *Phygadeuontina*.

Bassus obscuripes Holmgren, 1858 (1856). Svenska Vetensk.-Akad. Handl. (n. f.) 1: 369. ♂, ♀.

Bassus rufocinctus Desvignes, 1862. Ent. Soc. London, Trans. 10: 215. ♂, ♀.

Tymmophorus graculus nigrofemoratus Dasch, 1964. Amer. Ent. Inst., Mem. 3: 79. ♂, ♀.

N. syn.; range completely overlapped by what Dasch treated as the nominate subspecies.

Taxonomy: Thomson, 1890. Opusc. Ent. 14: 1494-1495. —Pfankuch, 1910. Deut. Ent. Ztschr. (for 1910), p. 275-276.

rufiventris (Gravenhorst). Newfoundland and n. Que. w. to N. W. T. and Alaska, s. to Conn., w. N. C., s. Iowa, n. Idaho, and n.w. Oreg.; Europe.

Bassus rufiventris Gravenhorst, 1829. Ichn. Europaea, v. 3, p. 312. ♂.

Bassus suspiciosus Brischke, 1871. Phys.-Oekonom. Gesell. Koenigsberg, Schr. 11: 106. ♀.

Zootrephes antennatus Davis, 1895. Amer. Ent. Soc., Trans. 22: 23. ♂, ♀.

Tymnophorus lacustris Schmiedeknecht, 1913. Opuse. Ichn., v. 5, p. 2714. ♀.

thunbergi Dasch. Que., N. H., Mass., Ont., n. Man., Alaska, B. C. The occurrence of this species at Nome, Alaska (on the Seward Peninsula) makes it highly probable that it will prove to be Holarctic.

Tymnophorus thunbergi Dasch, 1964. Amer. Ent. Inst., Mem. 3: 79. ♂, ♀.

Genus DIPLAZON Viereck

Bassus auct., nec Fabricius. Although no species of Diplazontinae were placed in *Bassus* by Fabricius, the name was for many years applied to to Diplazontinae, in later years more particularly to species of *Diplazon*.

Diplazon Nees ab Esenbeck, 1819 (1818). In Gravenhorst, Nova Acta Leopoldina 9: 292. Nomen nudum. *Diplazon* Nees ab Esenbeck is cited as a synonym of *Bassus* Fabricius in this paper by Gravenhorst. In his discussion of *Bassus*, Gravenhorst referred to a footnote consisting of a quotation from a letter he had received from Nees ab Esenbeck on Dec. 25, 1818 wherein Nees ab Esenbeck mentioned the name *Diplazon*. Nothing in the footnote makes the name available. Gravenhorst did nothing to validate *Diplazon* because he did not associate it with a valid specific name (even when names of genera described without included species are placed in synonymy, species are not thereby placed in them).

Diplazon Viereck, 1914. U. S. Natl. Mus., Bul. 83: 46.

Type-species: *Ichneumon laetatorius* Fabricius. Monotypic and orig. desig.

This is a moderate sized genus of worldwide distribution.

albotibialis Dasch. Northern Que., Alaska.

Diplazon albotibialis Dasch, 1964. Amer. Ent. Inst., Mem. 3: 53. ♂, ♀.

algidus Dasch. Newfoundland (n. Labrador) w. to n. Yukon and Alaska, s. to n. Man., Colo., s.w. Alta., and B. C.; n.e. Greenland; Norwegian Lapland.

Diplazon algidus Dasch, 1964. Amer. Ent. Inst., Mem. 3: 51. ♂, ♀.

angustus Dasch, P. E. I., n. Man., w. N. W. T., n. Yukon, interior Alaska, n.e. Calif.

Diplazon angustus Dasch, 1964. Amer. Ent. Inst., Mem. 3: 46. ♂, ♀.

bradleyi Dasch. Que., s. Man., n. Colo., w. N. W. T., Alaska, B. C., w. Wash.

Diplazon bradleyi Dasch, 1964. Amer. Ent. Inst., Mem. 3: 37. ♂, ♀.

cascadensis Dasch. Southwestern Alta., n.w. Wash. The type locality is Cascade Mt., Banff Natl. Park, Alta. (not "Banff, at 7,000-8,000 ft. in the Cascade Mts.").

Diplazon cascadensis Dasch, 1964. Amer. Ent. Inst., Mem. 3: 49. ♂, ♀.

constrictus Dasch. Colo., n.e. Calif.

Diplazon constrictus Dasch, 1964. Amer. Ent. Inst., Mem. 3: 47. ♂, ♀.

deletus Thomson. Northern Que. w. to Alaska, s. to Conn., w. N. C., Colo., n. Utah, and n.w. Oreg.; Europe. The subspecific classification of Dasch (1964) is difficult to reconcile zoogeographically, particularly in view of the fact that nothing is known about populations of *deletus* which presumably exist in northeastern Asia; therefore, no subspecies of *deletus* are recognized here.

Bassus deletus Thomson, 1890. Opusc. Ent. 14: 1471. ♂, ♀.

Diplazon deletus fuscifemoratus Dasch, 1964. Amer. Ent. Inst., Mem. 3: 43. ♂, ♀. N. syn.

flavifrons Dasch. Southwestern B. C., w. Wash., n.w. Calif.

Diplazon flavifrons Dasch, 1964. Amer. Ent. Inst., Mem. 3: 39. ♂, ♀.

galenensis Dasch. Southern Idaho. Known from two specimens collected at an elevation of 8600 ft. on Galena Summit, Blaine Co., Idaho.

Diplazon galenensis Dasch, 1964. Amer. Ent. Inst., Mem. 3: 45. ♂, ♀.

insulcatus Dasch. Southwestern Alta., w. Wash.

Diplazon insulcatus Dasch, 1964. Amer. Ent. Inst., Mem. 3: 58. ♂, ♀.

laetatorius (Fabricius). Newfoundland (insular) w. to B. C., s. to Fla., s. Tex., and s. Calif.; Mexico, West Indies, Brazil, Peru, Argentina, Chile; most of Old World. Host: *Allograptia obliqua* (Say), *Metasyrphus americanus* (Wied.), *M. perplexus* (Osb.), *M. vinelandi* (Curran), *Paragus (Pandasyopthalmus) tibialis* (Fall.), *Pseudodoros clavatus* (F.), *Sphaerophoria contigua* Macq., *Syrphus rectus* O. S., *S. vittatifrons* Shan. This is probably the most frequently collected species of Ichneumonidae; it is certainly the most widely distributed one. It usually reproduces thelytokously. Males occur sporadically in the U. S.; Dasch (1964) studied males from 19 states from coast to coast. He said that males are not known to occur outside the Nearctic Region.

Ichneumon laetatorius Fabricius, 1781. Species Insectorum, v. 1, p. 424. ♀.

Ichneumon dichrous Schrank, 1781. Enum. Ins. Austriae, p. 352. "♂" = ♀.

Anomalon attractus Say, 1826. Boston Jour. Nat. Hist. 1: 241. ♀.

Bassus albovarius Wollaston, 1858. Ann. and Mag. Nat. Hist. (3) 1: 23. "♂" = ♀ ?

Bassus sycophanta Cresson, 1868. Amer. Ent. Soc., Trans. 2: 112. ♂, ♀.

Diplazon tetragram rufigaster Dasch, 1964. Amer. Ent. Inst., Mem. 3: 28. ♂, ♀. N. syn.; range totally overlapped by what Dasch treated as the nominate subspecies.

Taxonomy: Roman, 1912. Zool. Bidr. Uppsala 1: 259, 282, 287.

- tibiatorius occidentalis* Dasch. Colo., Alta., Ariz., s. Yukon, B. C., w. Wash., s.e. Oreg., n.e. Calif. *D. tibiatorius tibiatorius* (Thunberg) is Eurasian. The paratype of *D. t. occidentalis* from "Valence" is a misidentified French specimen of the nominate subspecies.
Diplazon tibiatorius occidentalis Dasch, 1964. Amer. Ent. Inst., Mem. 3: 34. ♂, ♀.
walleyi Dasch. Northern Man., arctic and subarctic w. N. W. T., s. Yukon.
Diplazon walleyi Dasch, 1964. Amer. Ent. Inst., Mem. 3: 23. ♂, ♀.

Genus PROMETHES Foerster

Prometheus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 162.

Type-species: *Bassus sulcator* Gravenhorst. By subsequent monotypy from inclusion by Woldstedt, 1877.

Liopsis Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 162.

Type-species: *Bassus sulcator* Gravenhorst. Monotypically included and desig. by Viereck, 1912.

Promethus Thomson, 1890. Opusc. Ent. 14: 1465, 1475. Emend.

This small genus is Neotropic, Holarctic, and Oriental.

gravenhorsti Dasch. Newfoundland (insular), N. B., Mass., n. N. Y., n. Mich., Alta., interior Alaska, B. C., n.w. Wash., Japan? Host: Syrphids.

Prometheus gravenhorsti Dasch, 1964. Amer. Ent. Inst., Mem. 3: 236. ♂, ♀.

nomininguis Dasch. Southern Que.

striatus Dasch. Western Pa., e. Ohio, n. Colo., n.w. Alta.

Prometheus striatus Dasch, 1964. Amer. Ent. Inst., Mem. 3: 238. ♂, ♀.

sulcator (Gravenhorst). Newfoundland (insular) and n. Que. w. to n. Yukon and Alaska, s. to Pa., n. Ill., e. S. Dak., Colo., Ariz., and n.w. Calif.; Eurasia.

Bassus sulcator Gravenhorst, 1829. Ichn. Europaea, v. 3, p. 320. ♂, ♀.

Bassus areolatus Holmgren, 1856 (1854). Svenska Vetensk.-Akad. Handl. 75: 85. ♂, ♀.

Bassus longicornis Provancher, 1883. Nat. Canad. 14: 12. ♀.

Bassus aciculatus Provancher, 1888. Addit. Corr. Faune Ent. Canada Hym., p. 368. ♀. Preocc. by Ruthe, 1859.

Bassus auriculatus Provancher, 1888. Addit. Corr. Faune Ent. Canada Hym., p. 429. ♀.

Prometes sulcator splendidus Dasch, 1964. Amer. Ent. Inst., Mem. 3: 236. ♂, ♀. N. syn.; range completely overlapped by what Dasch treated as the nominate subspecies.

Genus SUSSABA Cameron

Sussaba Cameron, 1909. Bombay Nat. Hist. Soc., Jour. 19: 728.

Type-species: *Sussaba bicarinata* Cameron. Monotypic.

This is a moderate sized genus of Neotropic, Holarctic, and Oriental distribution.

cognata faceta Dasch. N. S., Que., Maine, N. H., Vt., Mass., N. Y., w. N. C., n. Ga., Ont. n. Mich., e. Tenn., Alaska, s. B. C., w. Wash., w. Oreg., n.w. Calif. Two more or less

sympatric Eurasian "subspecies" were recognized by Dasch (1964) and by Townes, Momoi, and Townes (1965). They are *S. cognata cognata* (Holmgren), which was described from southern Lapland, and *S. cognata albicoxa* (Thomson), which was described from southern Sweden, Germany, and France.

Promethes albicorix Ashmead, 1906. In Slosson, Ent. News 17: 324. Nomen nudum or lapsus for and misidentification of *P. albicoxa* Thomson.

Sussaba cognata faceta Dasch, 1964. Amer. Ent. Inst., Mem. 3: 265. ♂, ♀.

Taxonomy: Townes, Momoi, and Townes, 1965. Amer. Ent. Inst., Mem. 5: 414.

coloradensis Dasch. Northern Colo. Known only from the holotype which was collected four miles west of Cameron Pass, Colo. on July 23, 1894 by C. F. Baker.

Sussaba coloradensis Dasch, 1964. Amer. Ent. Inst., Mem. 3: 270. ♀.

dorsalis cultriformis (Ashmead). N. S. w. to s.e. Alta, s. to N. J., s.w. Va., and Nebr. Host:

Platycheirus erraticus Curran, *Sphaerophoria philantus* (Meig.), syrphid on cabbage, syrphid on reed canary grass. Single specimens apparently not otherwise separable from *d. cultriformis* were recorded by Dasch from s.e. B. C., s. Yukon, and s.w. Alaska, well within the range of the nominate subspecies.

Trematopygus? cultriformis Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 441. ♀.

dorsalis dorsalis (Holmgren). Newfoundland (Labrador) w. to n. Yukon and Alaska, s. to insular Newfoundland, s. central Que., n. Colo., and n. Calif.; Eurasia.

Bassus dorsalis Holmgren, 1858 (1856). Svenska Vetensk.-Akad. Handl. (n. f.) 1: 367. ♂, ♀.

Bassus maculatus Desvignes, 1862. Ent. Soc. London, Trans. 10: 216. ♂, ♀.

elongata (Provancher). Newfoundland (n. Labrador) w. to n. Yukon and Alaska, s. to Vt., n. Mich., Tex., N. Mex., n. Utah, and n. Calif.; Eurasia.

Bassus elongatus Provancher, 1874. Nat. Canad. 6 (1): 31 (key); 6 (2): 57. ♂, ♀.

Bassus monticola Snellen van Vollenhoven, 1875. Pinacographia, p. 4 and pl. 1, fig. 9. ♂.

Promethes laticarpus Thomson, 1890. Opusc. Ent. 14: 1481. ♂, ♀.

Otoblastus erodens Davis, 1897. Amer. Ent. Soc., Trans. 24: 273. ♂, ♀.

Promethes unicinctus Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 224. ♀. Townes (1945) stated that the holotype is a composite specimen, but I do not think he was correct; therefore, his selection of the thorax as "lectotype" is of doubtful significance. Dasch (1964) incorrectly stated that the type locality is "Berg Bay, Alaska;" it is Kukak Bay, Alaska.

Promethes laticarpus watanabei Uchida, 1957. Hokkaido Imp. Univ., Faculty Agr., Jour. 50: 248. ♂, ♀. Syn.? Dasch (1964) stated that he believed *watanabei* (described from Hokkaido) to be a subspecies of *elongatus*, but he did not use either of the trinomials *S. elongatus watanabei* or *S. elongatus elongatus*. Moreover, Dasch apparently also studied typical specimens of *elongata* from Japan (see his p. 253).

Taxonomy: Townes, 1945. Amer. Ent. Soc., Mem. 11: 560. —Dasch, 1964. Amer. Ent. Inst., Mem. 3: 242, 250-254.

nigrithorax Dasch. Northern Que., n.e. N. W. T., Colo., Alaska. The Baker notebook indicates that the female paratype cited by Dasch as "Colorado, C. Baker (Washington)" was collected at an elevation of 9500 ft. at Chambers Lake, Colo. on July 18, 1895 by C. F. and N. E. Baker. A male for which the same data apply is labeled by Dasch as a paratype of *nigrithorax* but is evidently the specimen he cited as a paratype of *pulchella coriacea* Dasch from "Colorado (no locality)." In addition, a specimen from "Camp 334, Alaska" (a place at the east end of Mt. McKinley Natl. Park and now known as Carlo) which Dasch labeled as a paratype of *nigrithorax* is cited in his revision as a paratype of *pulchella coriacea*. If *nigrithorax* is a valid species and if the one paratype of *nigrithorax* and two "paratypes" of *pulchella coriacea* discussed above are correctly identified as *nigrithorax* they are apparently the only known specimens of this species which were not collected above or beyond timberline.

Sussaba nigrithorax Dasch, 1964. Amer. Ent. Inst., Mem. 3: 249. ♂, ♀.

placita Dasch. Southeastern B. C., n. Calif.

Sussaba placita Dasch, 1964. Amer. Ent. Inst., Mem. 3: 269. ♂, ♀.

pulchella coriacea Dasch. P. E. I. s. to w. N. C., w. to n.w. Mich. and s.e. Minn. Dasch said "S. pulchella coriacea is most closely related to *nigrithorax* ..."; *nigrithorax* has a range which overlaps that known for *S. pulchella pulchella* (Holmgren) in North America (see foregoing discussion of *nigrithorax*).

Sussaba pulchella coriacea Dasch, 1964. Amer. Ent. Inst., Mem. 3: 247. ♂, ♀.

pulchella pulchella (Holmgren). Northern Que., N. W. T.; Europe; n. India.

Bassus pulchellus Holmgren, 1858 (1856). Svenska Vetensk.-Akad. Handl. (n. f.) 1: 366. ♂, ♀.

Bassus aciculatus Ruthe, 1859. Stettin. Ent. Ztg. 20: 373. ♀.

Sussaba bicarinata Cameron, 1909. Bombay Nat. Hist. Soc., Jour. 19: 728. ♀.

punctiventris (Thomson). Boreal Que. w. to s. Yukon, s. to Mass., n. Mich., Colo., Ariz., and Oreg.; Europe.

Homotropus punctiventris Thomson, 1890. Opusc. Ent. 14: 1500. ♀.

rohweri (Brues). Southeastern Sask., s. Yukon, and Alaska, s. to N. Mex., Ariz., and n. Calif.;

Mexico. Host: *Metasyrphus perplexus* (Osb.). The occurrence of this species at Nome, Alaska (on the Seward Peninsula) makes it highly probable that it will prove to be Holartic.

Promethes rohweri Brues, 1908. Wis. Nat. Hist. Soc., Bul. 6: 51. ♂, ♀.

rugipleuris ellesmerae Dasch. Northern N. W. T. Known from a series of 67 specimens collected at one locality on the eastern side of Ellesmere Island. It seems unlikely that this taxon could represent anything more than the end of a cline.

Sussaba rugipleuris ellesmerae Dasch, 1964. Amer. Ent. Inst., Mem. 3: 263. ♂, ♀.

rugipleuris rugipleuris Dasch. N. W. T., s.e. Wyo., n. Yukon, Alaska.

Sussaba rugipleuris rugipleuris Dasch, 1964. Amer. Ent. Inst., Mem. 3: 262. ♂, ♀.

SUBFAMILY OXYTORINAE

The subfamily Oxytorinae (=Microleptinae) includes a number of genera about which so little is known that their phyletic relationships with other ichneumonid genera are particularly in doubt. Hence, their position in the classification of the family is somewhat a matter of speculation. *Oxytorus* and *Microleptes* are two of these genera of doubtful affinities. Of the 24 genera of Oxytorinae recognized by Townes (1971), 19 have Nearctic species. Species of some genera have been reared from Mycetophilidae, but for most of the genera no hosts are known.

Taxonomy: Townes, 1971. Amer. Ent. Inst., Mem. 17: 179-206 (genera of world).

Genus MICROLEPTES Gravenhorst

Microleptes Gravenhorst, 1829. Ichn. Europaea, v. 1, p. 679.

Type-species: *Microleptes splendidulus* Gravenhorst. Monotypic.

Miomeris Foerster, 1868. Naturh. Ver. Reinlande, Verh. 25: 171.

Type-species: *Miomeris aquisgranensis* Foerster. Monotypically included and desig. by Foerster, 1871.

Mionomeria Schulz, 1906. Spolia Hym., p. 94. Emend.

Gnathoniella Schmiedeknecht, 1924. Ent. Monthly Mag. 60: 47.

Type-species: *Gnathoniella egregia* Schmiedeknecht. Monotypic.

Microleptes Walkley, 1967. In Krombein et al., U. S. Dept. Agr., Agr. Monog. 2, Sup. 2, p. 180. Unjustified emend. Mr. George Steyskal is of the opinion (personal commun., 1976) that Hopper (1959) was correct in asserting that Gravenhorst's name *Microleptes* was a lapsus in light of the Latin definition (meaning stealer of little things) which Gravenhorst gave for the Greek words from which he derived *Microleptes*. However, Steyskal feels that it is not provable that Gravenhorst's Greek word which transliterates as *leptes* was a lapsus for *cleptes* rather than *lestes* (the latter meaning the same thing). Therefore, the ichneumonid name *Microleptes* must be treated as an unjustified emendation and, therefore, does not date from Gravenhorst (1829) and is preoccupied by Newman, 1840; Stal, 1866; and Simpson, 1928, instead of preoccupying them.

This is a small Holarctic genus. Townes (1971) said that "the relationships of *Microleptes* are uncertain," and that "it may, or may not belong to the present subfamily."

Revision: Stelfox, 1961. Ent. Monthly Mag. 97: 181-182 (British spp.).

Taxonomy: Hopper, 1959. Ent. Soc. Wash., Proc. 61: 166 (derivation of *Microleptes*).

—Townes, 1971. Amer. Ent. Inst., Mem. 17: 183-184 (syn., etc.).

splendidulus Gravenhorst. Eastern Que., s. Mich.

Microleptes splendidulus Gravenhorst, 1829. Ichn. Europaea, v. 1, p. 679. ♀.

Miomeris glabriventris Thomson, 1888. Opusc. Ent. 12: 1317. ♂, ♀.

Taxonomy: Stelfox, 1961. Ent. Monthly Mag. 97: 181-182.

Genus OXYTORUS Foerster

Delolytus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 189. It should be noted that v. 25 of Naturh. Ver. Rheinlande, Verh. was published in two halves; *Delolytus* appeared in the first half and *Oxytorus* and *Callidiotes* appeared in the second half. If it is subsequently shown that the first half was published before either the second half or the authors separates the entire paper, *Delolytus* could no longer be suppressed by *Oxytorus* or *Callidiotes*.

Type-species: *Mesoleptus cozator* Gravenhorst. By subsequent monotypy from inclusion by Foerster, 1876. The type-species is regarded as a synonym of *O. luridator* (Gravenhorst).

Callidiotes Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 199.

Type-species: *Mesoleptus cozator* Gravenhorst. By subsequent monotypy from inclusion by Foerster, 1876.

Oxytorus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 199.

Type-species: *Oxytorus armatus* Thomson. By subsequent monotypy from inclusion by Thomson, 1883.

Pantoporthus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 209.

Type-species: *Ichneumon luridator* Gravenhorst. Monotypically included and desig. by Perkins, 1962.

Mesatractodes Morley, 1907. Brit. Ichn., v. 2, p. 257.

Type-species: *Atractodes proparator* Haliday. Monotypic. The type-species is regarded as a synonym of *O. luridator* (Gravenhorst).

Paracanidia Viereck, 1912. U. S. Natl. Mus., Proc. 42: 642.

Type-species: *Paracanidia elyi* Viereck. Monotypic and orig. desig.

Prosmoridea Cushman, 1915. Ent. Soc. Wash., Proc. 17: 141.

Type-species: *Prosmorus elongatus* Davis. Monotypic and orig. desig. This is a Holarctic genus of moderate size.

albopleuralis (Provancher). Que. s. to S. C. and n. Ga., w. to Mich.

Mesoleptus albopleuralis Provancher, 1879. Nat. Canad. 11: 224. ♂.

Atractodes nitens Provancher, 1882. Nat. Canad. 13: 368. ♂, ♀.

Prosmosus(!) punctifrons Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 309. "♂" = ♀.

antennatus (Cresson). Que. s. to s. Ga., w. to Wis. and La.

Mesoleptus antennatus Cresson, 1864. Ent. Soc. Phila., Proc. 3: 272. ♂.

Mesoleptus facetus Cresson, 1868. Amer. Ent. Soc., Trans. 2: 100. ♂.

Mesoleptus rufomixtus Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 97. "♀" = ♂ (♂ misdet.).

Mesoleptus filiformis Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 98. ♀.

Formerly preocc. in *Cryptus* by Fonscolombe, 1850, and Rudow, 1886.

Erylytus concamerus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 356. ♀.

Cryptus Genelini Dalla Torre, 1902. Cat. Hym., v. 3, p. 573. N. name for *M. filiformis* Provancher.

Paracanidia elyi Viereck, 1912. U. S. Natl. Mus., Proc. 42: 643. ♀.

elongatus (Davis). Southern Va., N. C., Tex.

Prosmosus(!) elongatus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 310. ♀.

Genus HYPERACMUS Holmgren

Hyperacmus Holmgren, 1858 (1856). Svenska Vetensk. Akad. Handl. (n. f.) 1: 322.

Type-species: *Exochus crassicornis* Gravenhorst. Monotypic.

Nothaima Cameron, 1902. Bombay Nat. Hist. Soc., Jour. 14: 429.

Type-species: *Nothaima bicarinata* Cameron. Monotypic.

This is a small Holarctic and Oriental genus.

crassicornis (Gravenhorst). N. Y., Alaska; Eurasia. Host: *Yponomeuta malinella* Zell. The foregoing is a European host record of Meyer (1927); it needs confirmation.

Exochus crassicornis Gravenhorst, 1829. Ichn. Europaea, v. 2, p. 347. ♀.

Biology: Meyer, 1927. [Leningrad] Gosud. Inst. Opytn. Agron. (State Inst. Expt. Agron.), Otd. Prikl. Ent. (Bur. Appl. Ent.), Izv. (Rpts.), Trudy po Prikl. Ent. (Works on Appl. Ent.). 3: 89.

Genus ENTYPOMA Foerster

Entypoma Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 171.

Type-species: *Entypoma robustum* Foerster. Monotypically included and desig. by Foerster, 1871.

Entelechia Foerster, 1871. Naturh. Ver. Rheinlande, Verh. 28: 110. Preocc. by Gistel, 1848.

Type-species: *Entelechia suspicosa* Foerster. Monotypic.

Entypomus Thomson, 1888. Opusc. Ent. 12: 1289. Emend.

Entelechius Thomson, 1888. Opusc. Ent. 12: 1290. Emend.

This is a small Holarctic genus. According to Townes (1971), an undescribed species occurs in Arctic and Arctic-Alpine North America."

Taxonomy: Townes, 1971. Amer. Ent. Inst., Mem. 17: 189-190.

Genus ALLOMACRUS Foerster

Allomacrus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 177.

Type-species: *Allomacrus pimplarius* Thomson. By subsequent monotypy from inclusion by Thomson, 1888.

Sibiriakoffia Holmgren, 1881 (1880). Novas Species Ins. Cura et Labore A. E.

Nordenskioldii e Novaia Semlia Coactorum, p. 13.

Type-species: *Sibiriakoffia arctica* Holmgren. Monotypic.

Two species are known, one being Holarctic and the other Japanese.

arcticus (Holmgren). Colo., interior Alaska, B. C., Wash.; n. Eurasia.

Sibiriakoffia arctica Holmgren, 1881 (1880). Novas Species Ins. Cura et Labore A. E.

Nordenskioldii e Novaia Semlia Coactorum, p. 14. ♂, ♀.

Allomacrus pimplarius Thomson, 1888. Opusc. Ent. 12: 1282. ♂, ♀.

Taxonomy: Townes, 1971. Amer. Ent. Inst., Mem. 17: 190-191 (syn., distribution).

Genus APOCLIMA Foerster

Apoclima Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 171.

Type-species: *Apoclima signaticorne* Foerster. Monotypically included and desig. by Foerster, 1871.

This is a small Neotropic, Holarctic, and Oriental genus. Apparently one or more unidentified or undescribed species occur in the Nearctic region.

Taxonomy: Townes, 1971. Amer. Ent. Inst., Mem. 17: 191-192.

Genus CYLLOCERIA Schiodte

Cylloceria Schiodte, 1839 (1838). Rev. et Mag. Zool. 1: 140.

Type-species: *Phytodietus caligatus* Gravenhorst. Desig. by Viereck, 1914.

Chalinocerus Ratzeburg, 1852. Ichn. d. Forstins., v. 3, p. 130.

Type-species: *Chalinocerus longicornis* Ratzeburg. Monotypic. The type-species is regarded as a synonym of *C. melancholica* (Gravenhorst).

Asphragis Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 166.

Type-species: *Lissonota occupator* Gravenhorst. Desig. by Viereck, 1914, from four species included by Schmiedeknecht, 1888.

Chalinoceras(!) Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 166, 209.

This is a moderately large Holarctic and Neotropic genus.

lugubris (Cresson). Colo., N. Mex., s.w. Alta., interior Alaska, B. C.

Lampronota? lugubris Cresson, 1879 (1878). Acad. Nat. Sci. Phila., Proc. 30: 379. ♀.

Cylloceria fuscolina Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 371. ♂.

nodosa Walley. Northern Man, interior Alaska.

Cylloceria nodosa Walley, 1941. Canad. Ent. 73: 166. ♂, ♀.

sexlineata (Say). Maine w. to s. B. C., s. to n. Fla., n.e. Kans., Colo., and Wash. Townes and Townes (1951) believed that two or more species were confused under this name.

Anomalon sexlineata Say, 1829. Contrib. Maclurian Lyceum to Arts and Sci. 1: 74. ♀.

Cylloceria occidentalis Cresson, 1870. Amer. Ent. Soc., Trans. 3: 160. ♂, ♀. Formerly preocc. in *Lampronota* by Cresson, 1870, p. 161.

Lampronota sexcarinata Davis, 1895. Amer. Ent. Soc., Trans. 22: 30. ♀.

Lampronota errans Dalla Torre, 1901. Cat. Hym., v. 3, p. 515. N. name for *C. occidentalis* Cresson.

Lampronota aciculata Cameron, 1905. Invertebrata Pacifica 1: 129. ♀.

Taxonomy: Cushman and Gahan, 1921. Ent. Soc. Wash., Proc. 23: 157. —Townes and Townes, 1951. In Muesebeck et al., U. S. Dept. Agr., Agr. Monog. 2: 342.

Genus ANISERES Foerster

Aniseres Foerster, 1871. Naturh. Ver. Rheinlande, Verh. 28: 92.

Type-species: *Aniseres pallipes* Foerster. Desig. by Viereck, 1914.

This is a small Holarctic genus.

lubricus Foerster. Greenland; Europe.

Aniseres lubricus Foerster, 1871. Naturh. Ver. Rheinlande, Verh. 28: 93. ♂.

spectabilis (Foerster). Nearctic Region; Europe.

Aniseres pallipes Foerster, 1871. Naturh. Ver. Rheinlande, Verh. 28: 93. ♂.

Proctitus spectabilis Foerster, 1871. Naturh. Ver. Rheinlande, Verh. 28: 116. ♀.

Taxonomy: Thomson, 1888. Opusc. Ent. 7: 1304 (syn.). —Townes, 1971. Amer. Ent. Inst., Mem. 17: 193 (distribution).

Genus PANTISARTHrus Foerster

Pantisarthrus Foerster, 1871. Naturh. Ver. Rheinlande, Verh. 28: 109.

Type-species: *Pantisarthrus inaequalis* Foerster. Desig. by Viereck, 1914.

This is a small Neotropic, Holarctic, and Oriental genus.

inaequalis Foerster. Que.? N. Y., Ont.? Host: *Mycetophilid*.

Pantisarthrus inaequalis Foerster, 1871. Naturh. Ver. Rheinlande, Verh. 28: 110. ♀.

Bassus dorsalis Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 112. ♀.

Preocc. by Holmgren, 1858. Described from either Que. or Ont.

Taxonomy: Townes, 1971. Amer. Ent. Inst., Mem. 17: 194.

Genus PROCLITUS Foerster

Clepticus Haliday, 1838. Ann. Nat. Hist. 2: 116. Preocc. by Cuvier, 1829.

Type-species: *Clepticus praetor* Haliday. Desig. by Westwood, 1840.

Proclitus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 172.

Type-species: *Proclitus grandis* Foerster. Desig. by Viereck, 1914.

Aclastoneura Kriechbaumer, 1896. Ent. Nachr. 22: 359.

Type-species: *Aclastoneura tricolor* Kriechbaumer. Monotypic.
Mischoroides Ashmead, 1900 Canad. Ent. 32: 368. N. name for *Clepticus* Haliday.

This is a large genus; it is apparently known from all zoogeographic regions including the Australian Region (one Samoan sp.).

longicaudus (Provancher). Que., Maine, N. H., N. Y., N. J., N. C., Ga., Ala.

Cremastus longicaudus Provancher, 1882. Nat. Canad. 13: 367. ♂, ♀.

royi (Provancher). Que. s. to s. Ga.

Cremastus Royi Provancher, 1882. Nat. Canad. 13: 366. ♂, ♀.

Genus DIALIPSIS Foerster

Dialipsis Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 171.

Type-species: *Dialipsis exilis* Foerster. Desig. by Viereck, 1914, from seven species included by Foerster, 1871.

Parentypoma Strobl, 1901 (1900). Siebenbuerg. Ver. f. Naturw., Hermannstadt, Verh. u. Mitt. 50: 71.

Type-species: *Parentypoma femoratum* Strobl. Monotypic. The type-species is regarded as a synonym of *exilis* Foerster.

According to Townes (1971) this is a Holarctic genus of moderate size. Presumably there are one or more unidentified or undescribed Nearctic species.

Taxonomy: Townes, 1971. Amer. Ent. Inst., Mem. 17: 195-196.

Genus PLECTISCIDEA Viereck

Plectiscidea Viereck, 1914. U. S. Natl. Mus., Bul. 83: 118.

Type-species: *Plectiscus collaris* Gravenhorst. Orig. desig.

This is a very large genus of Neotropic, Holarctic, Oriental, and Ethiopian distribution.

arctica (Roman). Greenland.

Plectiscus arcticus Roman, 1930. Ann. and Mag. Nat. Hist. (10) 5: 284. ♀.

carinata (Provancher). Que., N. Y.

Orthocentrus carinatus Provancher, 1879. Nat. Canad. 11: 281. ♂.

collaris (Gravenhorst). Greenland; Eurasia.

Plectiscus collaris Gravenhorst, 1829. Ichn. Europaea, v. 2, p. 287. ♀.

glabrifrons (Davis). Northern Ill.

Catastenus glabrifrons Davis, 1897. Amer. Ent. Soc., Trans. 24: 342. ♂.

humeralis (Provancher). Que., B. C., w. Wash.

Mesochorus humeralis Provancher, 1883. Nat. Canad. 14: 4. ♀.

hyperborea (Holmgren). Greenland; Eurasia.

Plectiscus hyperboreus Holmgren, 1869. Svenska Vetensk.-Akad. Handl. (n. f.) 8 (pt. 5): 21. ♂, ♀.

Plectiscus bistriatus Thomson, 1888. Opusc. Ent. 12: 1299. ♂, ♀.

Taxonomy: Roman, 1916. Archiv for Zool. 10 (22): 9.

lurida (Foerster). Greenland; Europe.

Pantisarthrus luridus Foerster, 1871. Naturh. Ver. Rheinlande, Verh. 28: 100. ♀.

nasoni (Davis). N. Y., n. Ill.

Miomeris nasoni Davis, 1897. Amer. Ent. Soc., Trans. 24: 244. ♀.

Miomeris nasonii Dalla Torre, 1901. Cat. Hym., v. 3, p. 20. Emend.

nigra (Provancher). Que.

Plectiscus niger Provancher, 1883. Nat. Canad. 14: 6. ♂, ♀.

orcae (Ashmead). N. H., N. Y., Alaska.

Plectiscus orcae Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 240. ♀.

parva (Cushman). N. H.

Aperilaptus(!) parvus Ashmead, 1897. In Slosson, Ent. News 8: 237. Nomen nudum.

Plectiscus parvus Cushman, 1922. U. S. Natl. Mus., Proc. 61 (8): 22. ♀.

patula (Viereck). N. H., N. Mex., Wash.

Mesochorus areolatus Viereck, 1903. In Skinner, Amer. Ent. Soc., Trans. 29: 92. ♀. Preocc. by Provancher, 1883.

Mesochorus patulus Viereck, 1911. U. S. Natl. Mus., Proc. 40: 192. N. name for *M. areolatus* Viereck.

Genus APERILEPTUS Foerster

Aperileptus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 170.

Type-species: *Plectiscus albipalpus* Gravenhorst. Included and desig. by Foerster, 1871.

This is a moderately large genus, apparently of Neotropic, Holarctic, Oriental, and Ethiopian distribution.

gracilis (Provancher). Que., Maine, N. H., N. Y.

Phydotietus gracilis Provancher, 1875. Nat. Canad. 7: 331. ♀.

Proedrus delicatus Ashmead, 1897. In Slosson, Ent. News 8: 237. Nomen nudum.

Aperileptus clypeatus Ashmead, 1902. In Slosson, Ent. News 13: 6. Nomen nudum.

Aperileptus(!) clypeatus Cushman, 1922. U. S. Natl. Mus., Proc. 61 (8): 4. ♀.

Aperileptus delicatus Cushman, 1922. U. S. Natl. Mus., Proc. 61 (8): 5. ♀.

valerius (Davis). N. Y., n. Ill.

Catastenus valerius Davis, 1897. Amer. Ent. Soc., Trans. 24: 243. ♀.

Genus BLAPTICUS Foerster

Gnathochoris Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 152.

Type-species: *Gnathochoris flavipes* Foerster. Monotypically included and desig. by Foerster, 1871.

Blapticus Foerster, 1868. Naturh. Ver. Reinlande, Verh. 25: 171.

Type-species: *Blapticus leucostomus* Foerster. Monotypically included and desig. by Foerster, 1871.

Laepsurus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 205.

Type-species: *Blapticus crassulus* Thomson. Included and desig. by Perkins, 1962.

Acroblapticus Schmiedeknecht, 1911. Opusc. Ichn., v. 4, p. 2173.

Type-species: *Blapticus dentifer* Thomson. Desig. by Viereck, 1914.

Townes (1971) said that this is a large genus, which is known from all regions except the Australian. According to Townes and Townes (1951) undescribed Nearctic species of this genus are transcontinental in the Canadian and Transitional Zones.

Taxonomy: Townes and Townes, 1951. In Muesebeck et al., U. S. Dept. Agr., Agr. Monog. 2: 342. —Perkins, 1962. Brit. Mus. (Nat. Hist.) Ent., Bul. 11: 410, 425, 434 (syn.). —Townes, 1971. Amer. Ent. Inst., Mem. 17: 200-201.

Genus SYMPLECTIS Foerster

Symplecis Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 151.

Type-species: *Symplecis alpicola* Foerster. Desig. by Viereck, 1914, from three species included by Foerster, 1871.

This is a large genus, apparently of Neotropic, Holarctic, Oriental, and Ethiopian distribution.

cipeator (Lundbeck). Greenland.

Hemiteles cipeator Lundbeck, 1897 (1896). Dansk Naturhist. For. (Kjobenhavn), Vidensk. Meddel. (for 1896), p. 228. ♂.

Taxonomy: Townes, 1961. Ent. Soc. Wash., Proc. 63: 106.

sitkensis (Ashmead). N. H., Alaska, B. C., Wash.

Stiboscopus sitkensis Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 172. ♂.

Genus CATASTENUS Foerster

Catastenus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 170

Type-species: *Catastenus femoralis* Foerster. Monotypically included and desig. by Foerster, 1871.

Townes (1971) indicated that *Catastenus* could be regarded as an aberrant section (a species group?) of *Sympliccis*; he maintained its generic status pending further development of the classification of the subfamily.

This is a small Holarctic and Ethiopian genus. Townes and Townes (1951) said that "undescribed Nearctic species of this genus are transcontinental in the Transitional Zone." However, Townes (1971) said that it is an unresolved question whether there are in the Holarctic Region a number of closely related species or just a single variable one.

Taxonomy: Townes and Townes, 1951. In Muesebeck et al., U. S. Dept. Agr., Agr. Monog. 2: 342. — Townes, 1971. Amer. Ent. Inst., Mem. 17: 202.

Genus EUSTERINX Foerster

Holomeristus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 171.

Type-species: *Holomeristus tenuicinctus* Foerster. Monotypically included and desig. by Foerster, 1871.

Eusterinx Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 172.

Type-species: *Eusterinx oligomera* Foerster. Desig. by Viereck, 1914 from nineteen species included by Foerster, 1871.

Trestis Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 174.

Type-species: *Trestis tricincta* Ashmead. By subsequent monotypy from inclusion by Ashmead, 1902.

Ischyracis Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 175. Apparently, Horstmann (1974) regarded *Ischyracis* as distinct from *Eusterinx*.

Type-species: *Catonicrus alpigenus* Strobl. Monotypically included and desig. by Perkins, 1962. The type-species is regarded as a synonym of *Eusterinx bispinosa* (Strobl), n. comb.

Catonicrus Thomson, 1888. Opusc. Ent. 12: 1291.

Type-species: *Catonicrus trichops* Thomson. Monotypic. The type-species is regarded as a synonym of *E. pusilla* (Zetterstedt).

Dallatorrea Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 205.

Type-species: *Dallatorrea armata* Ashmead. Monotypic.

Strobilia Schmiedeknecht, 1911. Opusc. Ichn., v. 4, p. 2182. Preocc. by Pokorny, 1893.

Type-species: *Catonicrus alpigenus* Strobl. Monotypic.

Acanthostrobilia Roman, 1925. Arkiv for Zool. 17A (4): 21. N. name for *Strobilia* Schmiedeknecht.

Cymodusoides Viereck, 1925. Canad. Ent. 57: 74.

Type-species: *Cymodusoides gracilis* Viereck. Orig. desig.

This is a large genus apparently known from the Neotropic, Holarctic, Oriental, and Ethiopian Regions.

armata (Ashmead). N. Y., N. C., Ont., Alaska, Wash., Oreg., Calif.

Dallatorrea armata Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 205. ♂.

Cymodusoides plesius Viereck, 1925. Canad. Ent. 57: 74. ♀.

gracilis (Viereck). Que.

Cymodusoides gracilis Viereck, 1925. Canad. Ent. 57: 74. ♀.

oligomera Foerster. N. H., N. Y., Pa.; Europe.

Eusterinx oligomera Foerster, 1871. Naturh. Ver. Rheinlande, Verh. 28: 109. ♂, ♀.

Diatorra compressa Ashmead, 1902. In Slosson, Ent. News 13: 320. Nomen nudum.

Polyaulon compressum Cushman, 1922. U. S. Natl. Mus., Proc. 61 (8): 24. ♀.

Taxonomy: Townes, 1971. Amer. Ent. Inst., Mem. 17: 204 (syn.).

rufula (Provancher). Que., N. H., N. Y., N. J.

Phygadeuon rufulum Provancher, 1879. Nat. Canad. 11: 76. ♀. Possibly preocc. secondarily in *Phygadeuon* by Gmelin, 1790.

tenuicincta (Foerster). Que., N. H., Vt., N. Y., Ohio, n. Mich.; Europe.

Holomeristus tenuicinctus Foerster, 1871. Naturh. Ver. Rheinlande, Verh. 28: 81. ♀.

Mesoleptus fungicola Ashmead, 1894. In Webster, Cincinnati Soc. Nat. Hist., Jour. 17: 50.
♂.

Taxonomy: Townes, 1971. Amer. Ent. Inst., Mem. 17: 204 (syn.).
trifasciata (Ashmead). Alaska; e. U. S. S. R.

Catastenus trifasciatus Ashmead, 1899 (1898). In Jordan, Fur Seals and Fur-Seal Isls. No. Pacific, v. 4, p. 336. ♀. The type locality is Ostrov Medny (= Copper Isl.), Commander Isls., U. S. S. R.

Thesitis(!) tricincta Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 187. ♀.

Catastenus alaskensis Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 240. ♂, ♀.

Genus HELICTES Haliday

Helictes Haliday, 1837. In Curtis, Guide Arrang. Brit. Ins., ed. 2, p. 106.

Type-species: *Ichneumon erythrostoma* Gmelin. Desig. by Westwood, 1840.

Myriarthrus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 172, 218. Unnecessarily proposed n. name for *Helictes* Haliday.

Paipila Cameron, 1905. Amer. Ent. Soc., Trans. 30: 358.

Type-species: *Paipila longipes* Cameron. Monotypic.

This is a large genus; it is Holarctic and Neotropic, the majority of the species occurring in Chile and the Andes Mts.

ruficornis Davis, N. Y., n. Ill.

Helictes ruficornis Davis, 1897. Amer. Ent. Soc., Trans. 24: 245. "♂" = ♀.

Genus MEGASTYLUS Schiodte

Megastylus Schiodte, 1839 (1838). Rev. et Mag. Zool. 1: 139.

Type-species: *Megastylus cruentator* Schiodte. Desig. by Foerster, 1871.

Idioxenus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 171.

Type-species: *Megastylus mediator* Schiodte. Included and desig. by Foerster, 1871.

The type-species is regarded as a synonym of *M. cruentator* Schiodte.

Diculus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 171.

Type-species: *Diculus insectator* Foerster. Desig. by Viereck, 1914, from four species included by Foerster, 1871. The type-species is regarded as a synonym of *M. impressus* Schiodte.

Megalostylus Schulz, 1906. Spolia Hym., p. 94. Emend.

Letosha Cameron, 1909. Bombay Nat. Hist. Soc., Jour. 19: 724.

Type-species: *Letosha longicoxis* Cameron. Monotypic.

Myriarthridae Viereck, 1914. U. S. Natl. Mus., Bul. 83: 97.

Type-species: *Myriarthrus cingulator* Foerster. Orig. desig.

Miomerooides Kiss, 1924. Siebenbürg. Ver. f. Naturw., Hermannstadt, Verh. u. Mitt. 72-74: 113.

Type-species: *Miomerooides transsylvaniaicus* Kiss. Monotypic. This is a very large genus of Neotropic, Holarctic, Oriental, and Ethiopian distribution. The largest concentration of species is said to occur in the Neotropic Region.

caseyi (Ashmead). N. Y., N. J., Pa., Del., Va., e. N. C., n.e. Ga. Host: *Orfelia inops* (Coq.).

Spanotecus caseyi Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 196. ♂.

flavopictus (Gravenhorst). Que., N. H., Ont., Wis., n. Ill., Minn., n. Utah., s. Calif.; Europe.

Plectiscus flavopictus Gravenhorst, 1829. Ichn. Europaea, v. 2, p. 983. [male].

Megastylus lineator Schiodte, 1839 (1838). Rev. et Mag. Zool. 1: 139. "♀" = ♂.

Myriarthrus Cingulator Foerster, 1871. Naturh. Ver. Rheinlande, Verh. 28: 103. ♂, ♀.

Mesoleptus (*Megastylus*?) *albocollaris* Cresson, 1868. Amer. Ent. Soc., Trans. 2: 100. ♀. N. syn.

Orthocentrus albofasciatus Provancher, 1883. Nat. Canad. 14: 13. ♀. N. syn.

Aperileptus pleuralis Ashmead, 1902. In Slosson, Ent. News 13: 321. Nomen nudum.

Megastylus ashmeadi Cushman, 1922. U. S. Natl. Mus., Proc. 61 (8): 18. ♀. N. syn.

Taxonomy: Davis, 1897. Amer. Ent. Soc., Trans. 24: 246. —Townes, 1945. Amer. Ent. Soc., Mem. 11: 540 (syn.). —Townes and Townes, 1951. In Muesebeck et al., U. S. Dept. Agr., Agr. Monog. 2: 343. —Rossem, 1974. Tijdschr. v. Ent. 117: 278-279 (syn.).

SUBFAMILY ORTHOCENTRINAE

The size of this subfamily is moderate; although only seven genera are currently recognized, three of them are large and two are moderately large. According to Townes (1971) most of the species occurring outside the Holarctic Region are undescribed. Some of the species synonymy indicated in the unpublished revision of Smith (1958) was published by Smith (1965); in cases where they appear reliable unpublished species synonymies and changes in species nomenclature indicated by Smith in her dissertation are published here (the majority of which involve types in the U. S. Natl. Museum collection). Mycetophilidae are apparently the usual hosts.

Revision: Davis, 1897. Amer. Ent. Soc., Trans. 24: 219-226. —Smith, 1958. Rev. Subfam. Orthocentrinae Amer. No. of Mexico; unpublished Ph. D. dissertation, Univ. of Wis., 373 pp., 8 pl. (261 figs.).

Taxonomy: Smith, 1965. In Townes, Momoi, and Townes, Amer. Ent. Inst., Mem. 5: 398, 399, 400, 401, 402, 403. —Townes, 1971. Amer. Ent. Inst., Mem. 17: 208-216 (genera of world).

Genus ORTHOCENTRUS Gravenhorst

Orthocentrus Gravenhorst, 1829. Ichn. Europaea, v. 3, p. 358.

Type-species: *Orthocentrus fulvipes* Gravenhorst. Desig. by Westwood, 1840.

Tapinops Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 160.

Type-species: *Orthocentrus californicus* Ashmead. By subsequent monotypy from inclusion by Ashmead, 1896.

Atmetus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 160.

Type-species: *Atmetus tetrazonatus* Ashmead. Desig. by Viereck, 1914, from three species included by Ashmead, 1896.

Phaenosemus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 160.

Type-species: *Phaenosemus sitkensis* Ashmead. By subsequent monotypy from inclusion by Ashmead, 1902.

Exochiscus Walsh, 1873. Acad. Sci. St. Louis, Trans. 3: 96.

Type-species: *Exochiscus pusillus* Walsh. Monotypic.

Pachyonyx Walsh, 1873. Acad. Sci. St. Louis, Trans. 3: 100. Nomen nudum (published in synonymy).

Pachyonyx Viereck, 1914. U. S. Natl. Mus., Bul. 83: 108. Preocc. by Schoenherr, 1837.

Type-species: *Orthocentrus trifasciatus* Walsh. Monotypic and orig. desig.

Orthocentrellus Benoit, 1954. Rev. de Zool. et de Bot. Africaines 50: 1.

Type-species: *Orthocentrellus elongaticornis* Benoit. Monotypic and orig. desig.

This large genus is worldwide in distribution. According to Townes (1971) it includes most of the larger species of the subfamily.

Taxonomy: Townes, 1971. Amer. Ent. Inst., Mem. 17: 211-212.

asper (Gravenhorst). Que. w. to Yukon and Alaska, s. to S. C., Kans., Colo., Ariz., and Calif.; Europe.

Exochus asper Gravenhorst, 1829. Ichn. Europaea, v. 1, p. 694. [female].

Orthocentrus discolor Holmgren, 1858 (1856). Svenska Vetensk.-Akad. Handl. (n. f.) 1: 332. ♂, ♀.

Phaenosemus sitkensis Ashmead, 1902. Wash. Acad. Sci. Proc. 4: 231. ♂.

Taxonomy: Pfankuch, 1913. Deut. Ent. Ztschr. (for 1913), p. 180 (syn.). —Townes, 1971.

Amer. Ent. Inst., Mem. 17: 209 (syn.).

cupulatus Smith. N. W. T., Alaska; e. U. S. S. R.

Atmetus insularis Ashmead, 1899 (1898). In Jordan, Fur Seals and Fur-Seal Isls. No. Pacific, v. 4, p. 337. ♂. Preocc. in *Orthocentrus* by Ashmead, 1894. The type locality is Ostrov Medny (=Copper Isl.), Commander Isls., U. S. S. R.

Orthocentrus cupulatus Smith, 1965. In Townes, Momoi, and Townes, Amer. Ent. Inst., Mem. 5: 399. N. name for *A. insularis* Ashmead.

Taxonomy: Roman, 1909. In Hamberg, Naturw. Untersuch. Sarekgebirges Swedish-Lappland, v. 4, p. 352 (syn.). —Smith, 1958. Rev. Subfam. Orthocentrinae Amer. No. of Mexico; unpublished Ph. D. dissertation, Univ. of Wis., p. 153, 157-158.

decoratus Townes. Calif.

Atmetus californicus Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 204. ♀. Preocc. in *Orthocentrus* by Ashmead, 1890.

Orthocentrus decoratus Townes, 1945. Amer. Ent. Soc., Mem. 11: 546. N. name for *A. californicus* Ashmead.

frontator (Zetterstedt). N. S. w. to Yukon and Alaska, s. to Ga., Kans., Colo., and n.e. Calif.; Eurasia.

Tryphon frontator Zetterstedt, 1838. Insecta Lapponica Hym., p. 389. [female].

Erochiscus pusillus Walsh, 1873. Acad. Sci. St. Louis, Trans. 3: 97. “♂” = ♀.

Alomya abdominalis Provancher, 1875. Nat. Canad. 7 (4): 121. ♂, ♀. N. syn.

Orthocentrus Canadensis Provancher, 1875. Nat. Canad. 7 (5): 142. ♂. N. syn.

Orthocentrus californicus Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 442. ♀. N. syn.

Orthocentrus medialis Davis, 1897. Amer. Ent. Soc., Trans. 24: 224. ♀. N. syn.

Camerotops(?) asperus Davis, 1897. Amer. Ent. Soc., Trans. 24: 226. ♀. N. syn.

Atmetus pectoralis Ashmead, 1906. In Slosson, Ent. News 17: 324. Nomen nudum.

Taxonomy: Townes, 1971. Amer. Ent. Inst., Mem. 17: 209 (syn.).

fulvipes Gravenhorst. Nearctic Region; Eurasia. Nearctic localities were not indicated by Townes (1971).

Orthocentrus fulvipes Gravenhorst, 1829. Ichn. Europaea, v. 3, p. 363. ♂.

Orthocentrus carinatus Uchida, 1932. Hokkaido Imp. Univ., Faculty Agr., Jour. 33: 211. ♂.

Preocc. by Provancher, 1879.

Orthocentrus badifrons Uchida, 1942. Insecta Matsumurana 16: 125. ♂, ♀.

Taxonomy: Smith, 1965. In Townes, Momoi, and Townes, 1965. Amer. Ent. Inst., Mem. 5: 399 (syn.). —Townes, 1971. Amer. Ent. Inst., Mem. 17: 209 (syn.).

repentinus Holmgren. Greenland; Europe.

Orthocentrus repentinus Holmgren, 1858 (1856). Svenska Vetensk.-Akad. Handl. (n. f.) 1: 327. ♂, ♀.

Taxonomy: Roman, 1930. Ann. and Mag. Nat. Hist. (10) 5: 284.

rugulosus (Provancher). Que.

Glypta rugulosa Provancher, 1883. Nat. Canad. 14: 14. “♂” = ♀? Smith (1958) said that the sex of the lectotype was uncertain, but more likely to be female than male.

Taxonomy: Smith, 1958. Rev. Subfam. Orthocentrinae Amer. No. of Mexico; unpublished Ph. D. dissertation, Univ. of Wis., p. 92-94, 357.

spurius Gravenhorst. N. S. w. to N. W. T. and Alaska, s. to Maine, Mich., Colo., and Calif.; Eurasia.

Orthocentrus spurius Gravenhorst, 1829. Ichn. Europaea, v. 3, p. 362. ♀.

Orthocentrus protuberans Holmgren, 1858 (1856). Svenska Vetensk.-Akad. Handl. (n. f.) 1: 333. ♂, ♀.

Taxonomy: Smith, 1965. In Townes, Momoi, and Townes, Amer. Ent. Inst., Mem. 5: 400 (syn.).

stigmaticus Holmgren. Newfoundland (Labrador) w. to Alaska, s. to S. C., La., Colo., Ariz., and Calif.; Eurasia.

Orthocentrus stigmaticus Holmgren, 1858 (1856). Svenska Vetensk.-Akad. Handl. (n. F.) 1: 325. ♂, ♀.

Orthocentrus stigmaticus Walsh, 1873. Acad. Sci. St. Louis, Trans. 3: 101. “♀” = ♂.

Orthocentrus stigmaticus f. *borealis* Roman, 1915. In Spengel, Zool. Jahrb., Abt. f. System., Geog., u. Biol. Tiere 39: 92. ♂, ♀. Syn.?

Taxonomy: Roman, 1925. Ent. Meddel. 14: 425. —Townes, 1971. Amer. Ent. Inst., Mem. 17: 209 (syn.).

tetrazonatus (Ashmead). N. S. w. to Alaska, s. to S. C., Ala., Colo., Utah, and Calif.

Atmetus tetrazonatus Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 204. ♀.

trifasciatus Walsh. Ill.?*Orthocentrus trifasciatus* Walsh, 1873. Acad. Sci. St. Louis, Trans. 3: 100. ♂, ♀.

Genus PICROSTIGEUS Foerster

Picrostigeus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 159.Type-species: *Orthocentrus setiger* Brischke. Desig. by Viereck, 1912, from three species included by Thomson, 1897.

This is a small Holarctic genus. Smith (1958) indicated that there are four undescribed Nearctic species.

Taxonomy: Smith, 1958. Rev. Subfam. Orthocentrinae Amer. No. of Mexico; unpublished Ph. D. dissertation, Univ. of Wis., p. 181-192.

Genus STENOMACRUS Foerster

Synoplus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 159.Type-species: *Synoplus brevipennis* Ashmead. Desig. by Viereck, 1902, from two species included by Ashmead, 1902.*Mnesidacus* Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 159.Type-species: *Mnesidacus apicalis* Ashmead. By subsequent monotypy from inclusion by Ashmead, 1896.*Hypoleptus* Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 159.Type-species: *Hypoleptus columbianus* Ashmead. By subsequent monotypy from inclusion by Ashmead, 1896.*Deleter* Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 160.Type-species: *Deleter obscurus* Davis. Desig. by Viereck, 1914, from three species included by Davis, 1897.*Stenomacrus* Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 160.Type-species: *Orthocentrus silvaticus* Holmgren. Desig. by Viereck, 1912, from 37 species included by Thomson, 1898.*Camaratops* Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 160.Type-species: *Neurateles ulmica* Ashmead. Desig. by Viereck, 1914, from four species included by Davis, 1897.

This is a large genus of worldwide distribution.

Taxonomy: Townes, 1971. Amer. Ent. Inst., Mem. 17: 212-213 (syn.).

americanus (Ashmead). Newfoundland (Labrador) w. to B. C., s. to Md., Ill., Kans., Colo., and Calif.*Neuratelus americanus* Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 203. ♀.*Deleter obscurus* Davis, 1897. Amer. Ent. Soc., Trans. 24: 221. ♂.*brevipennis* (Ashmead). Alaska. Ecology: Smith (1958) studied 35 females collected on flowers of *Senecio*.*Synoplus brevipennis* Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 226. ♀.*Synoplus pleuralis* Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 227. ♀.*Hypoleptus glacialis* Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 228. "♂, ♀" = ♂. N. syn.Ashmead said: "Type. —Cat. No. 5673, ...Muir Inlet [Alaska], June 12." The only specimens to be found in the U. S. Natl. Museum collection bearing type no. 5673 are two conspecific males from St. Paul Isl., Alaska; one of these bears Ashmead's label identifying it as a male of *Hypoleptus glacialis*. No specimens from Muir Inlet match the original description and none bear an Ashmead label identifying them as *H. glacialis*.

Biology: Smith, 1958. Rev. Subfam. Orthocentrinae Amer. No. of Mexico; unpublished Ph. D. dissertation, Univ. of Wis., p. 308.

californicus (Ashmead). Newfoundland (Labrador) w. to B. C., s. to Md., Kans., Colo., Ariz., and Calif. Host: "*Cecidomyia* on *Salix scouleriana* var. *flavescens*."*Brephoconus californicus* Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 202. ♂.

Genus LEIPAULUS Townes

Leipaulus Townes, 1945. Amer. Ent. Soc., Mem. 11: 552.

Type-species: *Deleter suffuscus* Davis. Monotypic and orig. desig.

This is a genus of moderate size; Townes (1971) had seen 20 species. The genus is known from the Holarctic, Oriental, Australian, and Ethiopian Regions. There is at least one undescribed Nearctic species.

Taxonomy: Townes, 1958. Ent. Soc. Wash., Proc. 60: 221 (syn.). —Townes, 1971. Amer. Ent. Inst., Mem. 17: 215 (name resurrected).

ridibundus (Gravenhorst). Nearctic Region; Europe.

Orthocentrus ridibundus Gravenhorst, 1829. Ichn. Europaea, v. 3, p. 366. ♂.

Taxonomy: Townes, 1971. Amer. Ent. Inst., Mem. 17: 215 (distribution).

suffuscus (Davis). N. S. w. to B. C., s. to S. C., La., Colo., Ariz., and Calif.

Deleter suffuscus Davis, 1897. Amer. Ent. Soc., Trans. 24: 221. ♂.

Genus PLECTISCUS Gravenhorst

Plectiscus Gravenhorst, 1829. Ichn. Europaea, v. 2, p. 978.

Type-species: *Plectiscus impurator* Gravenhorst. Desig. by Westwood, 1840.

Brephoconus Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 159.

Type-species: *Plectiscus impurator* Gravenhorst. Monotypically included and desig. by Foerster, 1871.

According to Townes (1971) this genus is Neotropic, Holarctic, and Oriental; 15 species were known to him, 14 of them being either undescribed or unidentified.

Taxonomy: Townes, 1958. Ent. Soc. Wash., Proc. 60: 221. —Townes, 1971. Amer. Ent. Inst., Mem. 17: 215-216.

Genus NEURATELES Ratzeburg

Neurateles Ratzeburg, 1848. Ichn. d. Forstins, v. 2, p. 86.

Type-species: *Neurateles papyraceus* Ratzeburg. Monotypic.

Neuratelus(!) Foerster, 1868. Naturh. Ver. Rheinlande, Verh. 25: 159, 218.

This is a Neotropic and Holarctic genus of moderate size.

alaskensis (Ashmead), n. comb. N. H., N. W. T., Colo., Alta., Alaska.

Hypoileptus alaskensis Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 227. ♀ (♂ misdet.). A female in the U. S. Natl. Museum collection is here selected as lectotype. It is labeled "8-22, [18]97, St. Paul Isl., Alaska, Type No. 5672, *Hypoileptus alaskensis* Ashm. [written by Ashmead], Lectotype, *Hypoileptus alaskensis* Ashmead, Revision L. K. Smith [written by Lois K. Smith]."

Taxonomy: Townes, 1945. Amer. Ent. Soc., Mem. 11: 549 (identification apparently based on a specimen which was then a syntype). —Smith, 1958. Rev. Subfam. Orthocentrinae Amer. No. of Mexico; unpublished Ph. D. dissertation, Univ. of Wis., p. 350-352.

leucopsis (Ashmead). Colo.

Orthocentrus leucopsis Ashmead, 1890. Colo. Biol. Assoc., Bul. 1: 24. ♂.

UNPLACED TAXA OF ICHNEUMONIDAE

Anomalon laterale Brulle, 1846. In Lepeletier, Hist. Nat. Ins. Hym., v. 4, p. 175. ♀.

"L'Amérique sept.; Bastard."

Taxonomy: Townes, 1961. Ent. Soc. Wash., Proc. 63: 104.

Asympnictus nigrofrons Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 325. ♀. "Agricultural College, Michigan."

Atractodes provancheri Dalla Torre, 1902. Cat. Hym., v. 3, p. 723. N. name for *A. singularis* Provancher (which see).

Atractodes rufipes Provancher, 1874. Nat. Canad. 6: 151. ♂, ♀. Que.

Taxonomy: Barron, 1975. Nat. Canad. 102: 551.

Atractodes singularis Provancher, 1876. Nat. Canad. 8: 328. ♂. Que. Preocc. by Foerster, 1876; replaced by *A. provancheri* Dalla Torre (which see).

Taxonomy: Barron, 1975. Nat. Canad. 102: 568.

Bassus areolatus Provancher, 1874. Nat. Canad. 6 (1): 31 (key); 6 (2): 58. ♀. Preocc. by Holmgren, 1856.

Taxonomy: Barron, 1975. Nat. Canad. 102: 428-429.

Campoplex? Arcticus Curtis, 1853. In Ross, Narrative of Second Voyage in Search of a No.-W. Passage 1829-33, App., p. lxii. sex not indicated. Arctic America.

Taxonomy: Townes, 1961. Ent. Soc. Wash., Proc. 63: 105.

Cratichneumon Davisi Bradley, 1904. Ztschr. System. Hym. Dipt. 4: 107. ♀. Colo.

Cremastus piceus Cresson, 1872. Amer. Ent. Soc., Trans. 4: 176. ♀. Bosque Co., Tex. The holotype was presumably to have been deposited in the U. S. Natl. Museum collection, but has not been found.

Taxonomy: Cresson, 1916. Amer. Ent. Soc., Mem. 1: 49.

Habronyx? flavistigma Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 362. ♂. N. Y.

Hemiteles cincticornis Ashmead, 1890. Colo. Biol. Assoc., Bul. 1: 21. ♀. Colo. Host: *Apaneles laeviceps* Ash. The type locality was stated to be Cusack Ranch, but the type specimens of *Apanteles laeviceps* (described by Ashmead in the same paper) are labeled: West Cliff, Colo.

Hemiteles texanus Ashmead, 1890 (1889). U. S. Natl. Mus., Proc. 12: 404. ♀. Tex. No type specimen can be found; the species was entered by Ashmead in the U. S. Natl. Museum type catalog under no. 2011, and may have been so labeled by Ashmead, because in his manuscript for his 1900 work on the classification of Ichneumonoidea Ashmead recorded the name of the species and its type catalog number.

Ichneumon paradoxus Provancher, 1882. Nat. Canad. 13 (no. 154): 306 (key); 13 (no. 155): 325. ♀. Que.

Family STEPHANIDAE

BY ROBERT W. CARLSON

This small family is worldwide in distribution, but with species apparently most numerous in the tropic and subtropic parts of the world. They are parasites of coleopterous and hymenopterous wood borers.

Revision: Elliot, 1922. Zool. Soc. London, Proc. 92: 705-831 (spp. of world, largely from literature). —Townes, 1949. U. S. Natl. Mus., Proc. 99: 361-370.

Genus SCHLETTERERIUS Ashmead

Schlettererius Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 150.

Type-species: *Stephanus cinctipes* Cresson. Monotypic and orig. desig.

Only a single species is known.

cinctipes (Cresson). Southwestern S. Dak., n. Idaho, and s. B. C. s. to s.e. Ariz. and s. Calif.; Australia (Tasmania). Ecology: Kirk (1975) reared the species from *Pinus ponderosa*, *Picea engelmanni*, and *Abies concolor* infested by species of *Sirex*, *Urocerus*, and *Xeris*. The species has also emerged from *Pseudotsuga menziesii*. Host: *Sirex noctilio* F.

Siricidae. Taylor (1967) developed a laboratory culture in Tasmania on *Sirex noctilio* from field collected *cinctipes* adults shipped from Calif. Additional material was imported from Ariz. and N. Mex., and *cinctipes* has been released and established in Tasmania as a parasite of *Sirex noctilio* (Taylor, 1977, p. 430). *S. noctilio* does not occur within the natural range of *Schlettererius cinctipes*.

Stephanus cinctipes Cresson, 1880. Amer. Ent. Soc., Trans. 8: xviii in Proc. ♀.

Biology: Taylor, 1967. Austral. Ent. Soc., Jour. 6: 13-19 (life history, behavior, egg, larva).

—Kirk, 1975. Pan-Pacific Ent. 51: 58-59. —Taylor, 1977 (1976). Entomophaga 21: 429-440 (introduction and establishment of various parasitic Hym. on *Sirex noctilio*).

Genus MEGISCHUS Brulle

Megischus Brulle, 1846. In Lepeletier, Hist. Nat. Ins. Hym., v. 4, p. 537.

Type-species: *Megischus annulator* Brulle. Desig. by Viereck, 1914. The

type-species is regarded as a synonym of *M. furcatus* (Lepeletier and Serville).

Bothrioceros Sichel, 1860. Soc. Ent. de France, Ann. (3) 8: 759.

Type-species: *Bothrioceros europoeus* Sichel. Desig. by Viereck, 1914.

Hemistephanus Enderlein, 1906. Stettin. Ent. Ztg. 67: 301.

Type-species: *Stephanus macrurus* Schletterer. Orig. desig.

According to Townes (1949, stephanid revision, p. 363) *Megischus* is a genus of about 40 valid species and is pantropic in distribution.

arizonicus Townes. Southeastern Ariz.; n.w. Mexico.

Megischus arizonicus Townes, 1949. U. S. Natl. Mus., Proc. 99: 368. ♂, ♀.

bicolor (Westwood). Mass. w. to s. Ont., n. Iowa, and e. Utah, s. to s. Fla., s. Tex., s. Ariz., and s. Calif. Ecology: Specimens are recorded as having emerged from *Quercus*, *Carya*, *Cercidium*, and *Pinus*. Host: Buprestid in *Cercidium torreyanum*.

Stephanus bicolor Westwood, 1841. Ann. Nat. Hist. 7: 538. ♀.

Stephanus Sickmanni Schletterer, 1889. Berlin. Ent. Ztschr. 33: 152. ♀. N. syn.

Megischus floridanus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 349. ♂, ♀.

Megischus canadensis Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 349. ♀. N. syn.

Stephanus Sickmannii Dalla Torre, 1901. Cat. Hym., v. 3, p. 9. Emend.

Biology: Townes, 1949. U. S. Natl. Mus., Proc. 99: 367 (behavior and ecology).

brunneus (Cresson). Southern Fla.; Cuba.

Megischus brunneus Cresson, 1865. Ent. Soc. Phila., Proc. 4: 84. ♂, ♀.

Stephanus brunneus Dalla Torre, 1901. Cat. Hym., v. 3, p. 6. Emend.

californicus Townes. Northern Calif. s. to s. Calif.

Megischus californicus Townes, 1949. U. S. Natl. Mus., Proc. 99: 364. ♂, ♀.

texanus Cresson. Southwestern Okla., s. Tex., Ariz., s. Calif.; n.w. Mexico.

Megischus texanus Cresson, 1872. Amer. Ent. Soc., Trans. 4: 190. ♀.

Superfamily CHALCIDOIDEA

By GORDON GORDH

The Chalcidoidea are among the most difficult groups of Hymenoptera to identify because of their small size and the lack of adequate keys to the North American species. Several species vie for the distinction of being the smallest insect (about 0.2 mm long), and most species are less than 3-4 mm long. The characters used to distinguish chalcidoids from other Hymenoptera include the presence of a prepectus, failure of the pronotum to meet the tegula, 13 or fewer segments comprising the geniculate antenna, and drastically reduced wing venation.

Ashmead (1904) recognized 14 families and provided the first comprehensive modern classification of the Chalcidoidea. Despite its many errors, this was a prodigious work and remarkable considering the primitive optical equipment and state of knowledge about the Chalcidoidea at that time. Nikol'skaya (1952) elevated the number of families to 24, and Boucek and Hoffer (1957) (subsequently translated by Peck, 1964) recognized 18 families. In this catalog Burks has reduced the number of families to eleven. Casual thought may lead one to wonder why there is so much inconsistency among workers regarding higher classification of chalcidoids. These classifications are based on external morphology, and the chalcidoids are exceedingly plastic morphologically. This plasticity generates differences of opinion over the limits of higher taxa because workers weight characters differently.

Chalcidoids are found in all zoogeographical regions, in all terrestrial habitats, and all families are found in each zoogeographic region. Despite their omnipresence, chalcidoids remain one of the poorest known superfamilies. Taxonomically, the western Palearctic fauna is best known, followed by the Nearctic. The remainder of the zoogeographical regions (Neotropical, Ethiopian, Australian, and Oriental) are almost completely unknown with respect to their endemic faunas. Much of our knowledge of chalcidoids stems from species which are associated with agriculture.

The body size and searching habits of chalcidoids make them suitable for fossilization in resinous amber, but fossil records of the Chalcidoidea are incomplete. Fewer than 50 species are known, and these belong to less than half of the chalcidoid families. The most comprehensive accounts of fossil chalcidoids are by Brues (1910), Doutt (1973), and Yoshimoto (1975). The last study provides a summary of knowledge about fossil chalcidoids. Yoshimoto (1975) reports that mymarids, trichogrammatids, and tetracampids are referable to the Cretaceous Period (70-90 million years before present).

Owing to the paucity of knowledge about fossil chalcidoids and their morphological plasticity, the relationship of this superfamily to other parasitic Hymenoptera has not been conclusively established. We are not certain that the Chalcidoidea are monophyletic in the Hennigian sense, although some investigators have that opinion. An interpretation of chalcidoid phylogeny based on the known fossil record is provided by Yoshimoto (1975).

The actual numerical dimension of the Chalcidoidea can only be speculated. The ichneumonid specialist Henry Townes (1969) has estimated that there are 60,000 species of Ichneumonidae.

DeBach (1974) has estimated that somewhere between 70-90 percent of the parasitic Hymenoptera remain to be described. I believe that the Chalcidoidea will ultimately be recognized as larger than the Ichneumonidae. There are some who would disagree with this estimate, but their estimates are based on impressions developed from examining species that repeatedly have been submitted for identification. These species mostly are associated with the agroecosystem and represent only a portion of the total chalcidoid fauna. My primary interest in making these assertions is to stimulate research on the Chalcidoidea because they are a fertile area for investigations in biology, behavior, ecology, and systematics.

Chalcidoids have diverse and frequently specialized feeding habits. Most species of chalcidoids are parasitic, but phytophagy probably has evolved several times in the Chalcidoidea because it is found in several distantly related taxa and many unrelated species of plants serve as hosts. Phytophagy is found most frequently in association with gall-forming habits, but the evolutionary significance of this observation remains unknown.

Agaonids demonstrate the most intimate expression of phytophagy in the Chalcidoidea. This group is poorly represented in North America because all agaonids develop in fig seeds (*Ficus* spp.), and these plants occur naturally only in tropical and subtropical climates. All figs are dependent on agaonids for pollination, and agaonids can only develop within the receptacles of *Ficus*. Host specificity seems to be the trend in agaonids with each species of fig having its own agaonid for pollination (Ramirez, 1970 a,b; Grandi, 1961). Numerous other chalcidoids are associated with *Ficus* as inquilines (Hill, 1967 a,b).

Other taxa of chalcidoids with phytophagous species include the Eurytomidae, Torymidae, brachyscelidiphagine Pteromalidae, and Tanaostigmatidae.

Some ecologists prefer to use the term parasitoid to characterize parasitic insects. Protean parasite is a phrase often used to distinguish between typical parasites and insects that are parasitic in the larval stage only (Askev, 1971).

One definition of parasitism for all parasitic organisms is impractical because animal species are parasitic in many different ways. The parasitological definition of parasitism in the sense of parasitic worms and protozoa is unsuitable in the present context because parasitic chalcidoids do not behave in a manner consistent with that definition. Therefore it seems more appropriate to list some of the biological attributes of parasitic chalcidoids. Parasitic chalcidoids are characterized as follows: (1) they are obligate parasites in the larval stage only; (2) they require only one host to complete development; (3) they attack related taxa (other arthropods and usually insects); (4) if the parasite completes development, the host invariably dies; (5) the ratio of size between the parasite and host approximates unity (except in some cases where the parasitic larvae are gregarious or polyembryonic development occurs).

Adults of some species host feed, but the significance of this behavior is not always clear. Host feeding may provide nutrients necessary for ovary or egg development, or it may be a convenient source of nutrients necessary for sustaining life (Flanders, 1953; Doutt, 1964; Quezada *et al.*, 1973).

Parasitism by insects reaches its most elaborate development in the Chalcidoidea. Primary parasitism (larval development on a phytophagous host) is the most common type of parasitism by chalcidoids. Hyperparasitism (a parasite attacking another species of parasite) is found almost exclusively in the Hymenoptera, and reaches its most extensive development in the Chalcidoidea as indicated by the fact that most families have hyperparasitic species. Further evidence of the extensiveness of hyperparasitism in this superfamily is found in the fact that several types of hyperparasitism have evolved in the group. These include secondary (a parasite attacking a primary parasite), tertiary (a parasite attacking a secondary parasite) and quaternary (a parasite attacking a tertiary parasite). Hyperparasitism probably evolves out of primary parasitism in situations involving strong interspecific competition.

An unusual type of hyperparasitism occurs in *Coccophagooides utilis* Doutt and various related genera such as *Coccophagus*, *Encarsia*, and *Prospaltella*. Female larvae develop as primary parasites of armored-scale insects, and the male larvae develop as hyperparasites of their own females (Brodryk and Doutt, 1966). This phenomenon is called adelphoparasitism or autoparasitism and appears restricted to the aphelinines (Zinna, 1961; Flanders, 1959, 1967).

Parasitic chalcidoids can be categorized on the basis of where the egg is deposited and how the larva feeds. Most species attack the host directly, but adult female eucharitids and perilampine pteromalids oviposit on vegetation and the first-instar larva (planidium) searches for the host (Smith, 1912; Clausen, 1940 a,b). Species in which the adult female directly attacks the host

lay their eggs on the host's body and the larvae develop externally, or deposit their eggs inside the host's body and the larvae develop internally. There is a tendency for parasites that attack exposed hosts to develop internally (exception: elachertine Eulophidae), and parasites that attack concealed hosts to develop externally.

The intra- and interspecific relationships among parasitic chalcidoids vary. Some species are solitary (one parasite per host), and others are gregarious (several parasites per host). When more than one parasite species develops on a host simultaneously, the condition is termed multiple parasitism. When more eggs of one parasite species are laid on a host than can develop to maturity, the condition is termed superparasitism. Supernumerary individuals are eliminated through larval combat or physiological suppression (Salt, 1961).

The distinction between parasitism and predation sometimes fails, and some chalcidoids could be called predators. A prime distinction between parasites and predators is that predators frequently consume several prey, but parasites consume only one host per individual. The eutonine pteromalids and some mymarids could be regarded as egg predators because their larvae feed externally on scale-insect eggs in the "brood chamber" after they are oviposited by the female scale-insect (Clausen, 1940 a).

Parasitic species that attack many species of hosts are called polyphagous; parasitic species that attack only a few species of hosts are called stenophagous; and parasitic species that attack only one species of host are monophagous. Complete host specificity is difficult to establish because it is based essentially on negative evidence. The fact that a parasite will not attack a host under some conditions does not constitute proof that it will not parasitize that species. Nevertheless, there is a tendency towards specialization in the Chalcidoidea, and this is reflected by: (1) repeated recovery of a parasite from a host species over a large area, but not from related host species that occur sympatrically; (2) demonstrated preference for a host species when a choice is available; (3) superior reproductive capability on a host species; and (4) physical limitations that prevent a parasite from attacking a potential host.

Some polyphagous chalcidoids appear to prefer habitats rather than a taxonomically cohesive group of hosts. For example, *Zagrammosoma* species parasitize leaf-mining insects whether they are Lepidoptera, Diptera, or perhaps Hymenoptera. In contrast, related *Diglyphus* species parasitize only leaf-mining agromyzid Diptera. Other chalcidoids are extremely polyphagous. *Dibrachys cavus* (Walker) is an example. This species, like several others, has an exceedingly long host list that includes representatives of several orders. It usually develops as a primary parasite, but frequently also acts as a facultative hyperparasite (Graham, 1969). No explanation has been provided as to why one species should be so polyphagous and a closely related, morphologically similar species should be stenophagous or even monophagous.

Likewise, there are associations between host stage attacked and the taxonomic assignment of the parasite. For instance, the Trichogrammatidae and Mymaridae exclusively develop on the egg stage of other insects and the spalangine pteromalids are pupal parasites (Annecke and Doutt, 1961; Boucek, 1963; Doutt and Viggiani, 1968).

Chalcidoids parasitize more hosts in more different taxonomic categories than any other group of parasitic insects. This spectrum extends from spider eggs (*Desantisca*) to aculeate Hymenoptera (*Melittobia*, *Leucospidae*). A detailed account of the biology of chalcidoids requires more space than is available here. However, a short summary of some interesting host relationships is provided.

A bizarre host association is found in *Ixodiphagus* and *Hunterellus* (Encyrtidae) whose species are primary, internal parasites of tick larvae and nymphs. These genera are cosmopolitan and may prove to be beneficial insects in tick control (Cooley and Kohls, 1934; Cole, 1965; Doube and Heath, 1975).

The mymarid *Caraphractus cinctus* Walker is unusual in that it parasitizes dytiscid beetle eggs that are submerged beneath the surface of the water. The female parasite swims in the water by vibrating her wings and oviposits in the host's eggs. Females have considerable discriminative ability, and can detect eggs that have been parasitized (Jackson, 1958, 1966).

The Eucharitidae are parasitic on Formicidae. The association apparently is an old one, and eucharitids oviposit on vegetation visited by worker ants. The eggs hatch, and the triungulin larvae are phoretically transported to the ant nest. Inside the nest the triungulin larvae eventually move into the brood chamber where they parasitize immature ants (Clausen, 1923; 1940 b,c).

Other information about host association of chalcidoids is limited by a lack of knowledge about the immature stages of many groups of potential hosts. However, the higher taxonomic catego-

ries that include the most host species for chalcidoids include Lepidoptera, Homoptera, Diptera, Coleoptera, and Hymenoptera. Chalcidoids generally have failed to adapt to the nymphal stage of paurometabolous insects. The host spectrum of chalcidoids is being expanded constantly by more comprehensive biological studies of other insects. Given the diversity of habits, host associations, and stages attacked, it seems reasonable to conclude that any insect potentially includes several niches where a chalcidoid can develop.

All known Hymenoptera develop parthenogenetically and chalcidoids demonstrate three types: arrenotoky, thelytoky, and deuterotoky. Arrhenotoky is the most common type of parthenogenesis among chalcidoids. Uninseminated arrhenotokous females deposit haploid eggs that develop into hemizygous males. Inseminated arrhenotokous females produce female offspring from fertilized eggs and males from unfertilized eggs. Arrhenotoky is a mechanism whereby lethal and deleterious genes can be relatively rapidly eliminated from a population and superior genotypes can be relatively rapidly selected.

Thelytoky is parthenogenesis in which males are unknown or rare and females produce females by various asexual mechanisms. Cytologically, diploidy is maintained by apomixis and automixis. Apomixis (ameiotic thelytoky) is characterized by an absence of meiosis, and chromosome number is not reduced. Automixis (meiotic thelytoky) has reduction divisions, and diploidy is maintained in several ways. Rossler and DeBach (1973) review the methods of maintaining a constant chromosome number.

Thelytoky is common among parasitic Hymenoptera, but the extent of thelytoky in the Chalcidoidea is not known because our knowledge of their biology is limited. Many species are known from the original description only, and many species have been described from the female sex only. Thelytoky may be more common than now realized. In the rather well known genus *Aphytis*, DeBach (1969) records that about 30% of the species are thelytokous.

The evolutionary significance of thelytoky is an issue of debate. Traditional views hold that thelytoky is an "evolutionary blind alley". However, Rossler and DeBach (1972) have shown that at least one species of thelytokous chalcidoid has females that are capable of sexual reproduction.

Deuterotoky is parthenogenesis in which unfertilized eggs develop into both sexes. The cytological mechanism of deuterotoky has not been examined in chalcidoids. This form of parthenogenesis is common in some other animals, and has been reported in some species of chalcidoids (Doutt, 1959).

The cytogenetics of the Hymenoptera have been reviewed by Crozier (1975). That paper points to a lack of knowledge developed about chalcidoid karyotypes and cytological phenomena.

Hymenoptera are haplodiploid and this has been confused with sex determination. The correlation between males being haploid and females being diploid is positive and strong, but haploidy and diploidy in themselves do not determine sex. Diploid males are known to occur (Whiting, 1945). Several theories have been advanced to explain sex determination in the Hymenoptera, but in no instance has one theory proven adequate to explain determination in all groups (Whiting, 1940, 1943; daCunha and Kerr, 1957; Slobodchikoff and Daly, 1971). Crozier (1975) suggests that any general theory should accommodate the multiple allele case with as little modification as possible.

Polyembryony is a cytological phenomenon in which a single egg develops into many individual progeny. Among Hymenoptera the process occurs in the Platygastriidae (Proctotrupoidea) and copidosomatine Encyrtidae (Silvestri, 1906; Leiby, 1922, 1926).

Sex ratio in many species of animals approximates unity. In arrhenotokous chalcidoids the sex ratio usually is female biased and fluctuates between 60 and 80 percent female. Numerous factors have been implicated in the determination of sex ratio including size, stage, or species of host (Abdelrahman, 1974 a,b; Avidov and Podoler, 1968; Clausen, 1940 a), rate of oviposition (Abdelrahman, 1974 b), egg orientation (King, 1961), genetic factors (Wilkes, 1964), differential mortality (Roberts, 1933; Flanders, 1937; Abdelrahman, 1974 a), density fluctuations (Flanders, 1956), nutrition (Flanders, 1965; Moran *et al.*, 1969), and many others. This list could be lengthened substantially and its only limitation now is lack of research.

Mayr (1969) defines sibling species as "pairs or groups of closely related species which are reproductively isolated but morphologically identical or nearly so." Recent studies of chalcidoids have demonstrated that this group has many sibling species complexes (Hafez and Doutt, 1954; Claridge and Askew, 1960; DeBach, 1959, 1960, 1969; Khasimuddin and DeBach, 1976, a,b,c; Rao and DeBach, 1969 a,b,c). These complexes suggest that chalcidoids are in an active state of

evolution and speciating rapidly. Factors of chalcidoid biology that promote rapid speciation include: (1) short generation time; (2) several generations per season; (3) intensive inbreeding via sib mating; (4) microgeographic isolation; and (5) host preference.

Chalcidoidea are the most important group in applied biological control. Other taxa (Tachinidae, Ichneumonidae, Braconidae, Proctotrupoidea) are used extensively in biological control, but species-for-species chalcidooids have been used more successfully. DeBach (1964) lists 25 pest species with which complete biological control was achieved. Chalcidooids are responsible for control in 13 of these programs, a number far greater than any other taxonomic group. Agricultural pests in these control programs include many Homoptera, but some Coleoptera have also been controlled by chalcidooids (Taylor, 1937; Tooke, 1953; Williams *et al.*, 1951).

It is a pleasure to acknowledge the comments and suggestions on the preceding account made by the following individuals: Kenneth Cooper, Paul DeBach, Eric Grissell, Peter Price, and David Rosen.

Family TORYMIDAE

By E. E. GRISSELL

This family, represented in every zoogeographical region, contains in excess of 70 genera and 600 species. Members of the subfamily Agaoninae are exclusively phytophagous. Most members of the Megastigminae are phytophagous, but a few parasitic species are known in Europe. The other subfamilies of Torymidae are largely parasitic, frequently on gall-forming insects. Hosts are reported in the Coleoptera, Diptera, Hymenoptera, Lepidoptera and Orthoptera.

SUBFAMILY AGAONINAE

By B. D. BURKS

The members of this subfamily develop as gall makers within the fruits of figs, *Ficus* spp. As Hill (1967) has stated, "Pollination of fig flowers is effected through a unique symbiotic association with chalcid wasps. No other means of pollination is available to the plant, and in their turn the wasps cannot develop anywhere except in the gall flowers of the figs."

Eisenia Ashmead, 1904. Carnegie Mus., Mem. 1: 233. Preocc. by Malm, 1877, and Vaillant, 1889.

Type-species: *Eisenia mexicana* Ashmead. Orig. desig.

Eiseniella Ashmead, 1906. Ent. Soc. Wash., Proc. 8: 31. N. name. Preocc. by Michaelsen, 1900.

Secundeisenia Schulz, 1906. Spolia Hym., p. 146. N. name for *Eisenia* Ashmead.

Pegoscapus Cameron, 1906. Estac. Centr. Agron. Cuba, Prim. Informe, An., p. 275. Type-species: *Pegoscapus longiceps* Cameron. Monotypic.

Allopoda Strand, 1911. Arch. f. Naturgesch. 77: 210. N. name for *Eisenia* Ashmead.

Blastophaga subg. *Valentinella* Grandi, 1919. Lab. Zool. Gen. e Agr. Portici, Bol. 13: 18, 25.

Type-species: *Valentinella estherae* Grandi, Desig. by Gahan and Fagan, 1923.

Blastophaga subg. *Valentiniella* Grandi, 1928. R. Ist. Super. Agr., Lab. di Ent., Bol. 1: 69. Emend.

Taxonomy: Hill, 1967. Figs of Hong Kong, Hong Kong Univ. Press, p. 91.

mexicana (Ashmead). Fla.; West Indies, Mexico. Host: *Ficus aurea*, *F. laevigata*.

Eisenia mexicana Ashmead, 1904. Carnegie Mus., Mem. 1: 233. ♀.

Taxonomy: Gahan and Peck, 1946. Wash. Acad. Sci., Jour. 36: 315.

Biology: Butcher, 1964. Fla. Ent. 47: 235-238.

SUBFAMILY IDARNINAE

By E. E. GRISSELL

Members of this subfamily are not well known taxonomically or biologically. All have been reared from the receptacles of *Ficus*, but little exact biological information is available. Known biologies indicate these wasps are parasitic upon pollinating Agaoninae.

Genus COLYOSTICHUS Mayr

Colyostichus Mayr, 1885. Zool.-Bot. Gesell. Wien, Verh. 35: 157-158, 237.

Type-species: *Colyostichus longicauda* Mayr. Desig. by Ashmead, 1904.

brevicaudis Mayr. Fla. Host: *Ficus altissima*.

Colyostichus brevicaudis Mayr, 1885. Zool.-Bot. Gesell. Wien, Verh. 35: 239. ♀.

Taxonomy: Butcher, 1964. Fla. Ent. 47: 237 (in key).

Genus NEOSYCOPHILA Grandi

Neosycophila Grandi, 1923. Genova Mus. Civ. Stor. Nat., Ann. 51: 106.
Type-species: *Neosycophila omeomorpha* Grandi. Orig. desig.

Taxonomy: Burks, 1967. In Krombein, et al., U. S. Dept. Agr., Agr. Monog. 2, Sup. 2: 249.
—Burks, 1969. Fla. Ent. 52: 119-120.

bicolor (Ashmead). Fla.; W. Indies. Host: *Ficus citrifolia*.

Sycophila bicolor Ashmead, 1900. Ent. Soc. London, Trans. pp. 252, 335. ♀, ♂.

Taxonomy: Butcher, 1964. Fla. Ent. 47: 237 (in key).

incerta (Ashmead). Fla.; W. Indies. Host: *Ficus citrifolia*.

Sycophila incerta Ashmead, 1900. Ent. Soc. London, Trans., pp. 253, 335. ♀.

Genus IDARNES Walker

Idarnes Walker, 1843. Ann. and Mag. Nat. Hist. 12: 47.

Type-species: *Idarnes carme* Walker. Monotypic.

Tetragonaspis Mayr, 1885. Zool.-Bot. Gesell. Wien, Verh. 35: 205.

Type-species: *Tetragonaspis gracilicornis* Mayr. Desig. by Gahan and Fagan, 1923.

Ganosoma Mayr, 1885. Zool.-Bot. Gesell. Wien, Verh. 35: 204.

Type-species: *Ganosoma robustum* Mayr. Desig. by Gahan and Fagan, 1923.

Taxonomy: Butcher, 1964. Fla. Ent. 47: 237 (In key). —Gordh, 1975. Kans. Univ. Sci. Bul. 50: 389-455 (external morph., biol., key to Neotropical spp.).

carme Walker. Fla.; W. Indies, Puerto Rico, Brazil. Host: *Ficus aurea*.

Idarnes carme Walker, 1843. Ann. and Mag. Nat. Hist. 12: 47. ♀.

SUBFAMILY TORYMINAE

By E. E. GRISSELL

Revision: Crawford, 1914. Ent. Soc. Wash., Proc. 16: 122-126. —Hoffmeyer, 1930. Ent. Meddel. 17: 232-285.

Taxonomy: Breland, 1938. N. Y. Ent. Soc., Jour. 46: 355-399 (phylogeny).

Genus ALLOTORMYUS Huber

Allotormus Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 104.

Type-species: *Syntomaspis splendens* Provancher. Orig. desig.

splendens (Provancher). Ont., Colo., B. C.

Syntomaspis splendens Provancher, 1887. Addit. Corr. Faune Ent. Canada Hym., p. 196. ♀, ♂.

Taxonomy: Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 105 (female, male). —Burks, 1964 (1963). Canad. Ent. 95: 1262.

Genus TORYMUS Dalman

Callimome Spinola, 1811. Paris Mus. d'Hist. Nat., Ann. 17: 146-148. Suppressed by Internat. Comn. Zool. Nomencl., 1944, Opinion 155, pp. 227-238.

Type-species: *Ichneumon bedeguaris* Linnaeus. Desig. by Curtis, 1835.

Misocampe Latreille, 1818. Nouv. Dict. Hist. Nat., ed. 2, p. 213. Suppressed by Internat. Comn. Zool. Nomencl., 1944, Opinion 155, pp. 227-238.

Type-species: *Ichneumon bedeguaris* Linnaeus. Desig. by Gahan and Fagan, 1923.

Torymus Dalman, 1820. Svenska Vetensk. Akad., Handl. 41: 135, 178.

Type-species: *Ichneumon bedeguaris* Linnaeus. Desig. by Ashmead, 1904.

Syntocampus Stephens, 1829. Cat. Brit. Ins., v. 1, p. 395. Emend.

Syntomaspis Foerster, 1856. Hym. Stud. 2: 43-44.

Type-species: *Torymus eurytonus* Foerster. Desig. by Gahan and Fagan, 1923. The type-species is considered a synonym of *Torymus cyaneus* Boheman.

Lioterphus Thomson, 1875. Skand. Hym. v. 4, pp. 60, 99.

Type-species: *Torymus pallidicornis* Boheman. Desig. by Ashmead, 1904.

Hemitorymus Ashmead, 1904. Carnegie Mus., Mem. 1: 243.

Type-species: *Hemitorymus thoracicus* Ashmead. Orig. desig.

Members of this genus exhibit a diverse range of habits. A few species are phytophagous, but the majority are parasitic on gall-forming Hymenoptera and Diptera. A few parasitize gall-forming Psyllidae. Several species are known to develop on the host larva as well as phytophagously in surrounding plant tissue.

Revision: Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 1-114. —Grissell, 1976. Univ. Calif. Publ. Ent. 79: 1-120.

Taxonomy: Hobbs, 1948. Pan-Pacific Ent. 24: 95-96. —Goodpasture and Grissell, 1975. Canad. Jour. Genet. and Cytol. 17: 413-422.

advenus (Osten Sacken). Conn., N. J., N. Y., D. C., N. C., Fla., La. Host: *Asphondylia rudbeckiae conspicua* O. S.; cecidomyiid gall in blossom of *Vernonia noveboracensis*; *Procecidochares atra* (Loew); *Andricus quercuspetiolicola* (O. S.)?; *Callirhytis quercusventricosa* (Bass.)?; *Diastrophus nebulosus* (O. S.)?

Callimome advena Osten Sacken, 1870. Amer. Ent. Soc., Trans. 3: 59-60. ♂, ♀.

aea (Walker). N. Y., N. J., Pa., W. Va., Minn., Utah, Calif. Ecology: From seeds of *Amelanchier canadensis*. Host: *Megastigmus amelanchieris* CUSH.

Callimome aea Walker, 1843. Ann. and Mag. Nat. Hist. 12: 104. ♂.

Syntomaspis amelanchieris Cushman, 1917. Ent. Soc. Wash., Proc. 19: 82-83. ♀, ♂.

Taxonomy: Burks, 1975. Brit. Mus. (Nat. Hist.) Ent., Bul. 32 (4): 151.

Biology: Cushman, 1917. Ent. Soc. Wash., Proc. 19: 84. —Milliron, 1949. Amer. Midland Nat. 41: 393-395.

aeneoscapus (Huber). Wyo., Idaho, Utah, Ariz., Oreg., Nev., Calif. Ecology: From gall on *Chrysothamnus*. Host: *Diarhronomyia artemisiae* Felt, *Rhopalomyia salviae* Felt.

Callimome aeneoscapus Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 35. ♀.

aereus (Huber). D. C., Va., Fla., Mo., Tex., Ariz. Ecology: From galls on *Quercus laurifolia*, *Q. macrocarpa*?, *Q. schneckii*. Host: *Dryocosmus imbricariae* (Ashm.).

Callimome aereum Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 71. ♀, ♂.

alaskensis (Huber). Alaska.

Callimome alaskensis Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 31-32. ♀.

anthomyiae Ashmead. Ga., Fla. Host: *Chalcodermus inaequicollis* Horn; muscid leaf miner (probably *Pegomya* sp.) of cultivated plant.

Torymus anthomyiae Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 189. ♀.

asteridis (Huber). N. H., Conn. Ecology: From cecidomyiid gall on aster.

Callimome asteridis Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 43. ♀, ♂.

atheatus Grissell. Tex., N. Mex., Idaho, Utah, Ariz., Oreg., Nev., Calif. Ecology: From fruits of *Sphaeralcea*.

Torymus atheatus Grissell, 1976. Univ. Calif. Publ. Ent. 79: 63. ♀, ♂.

atriplicis (Huber). Ariz., Calif. Host: *Asphondylia neomexicana* (Ckll.).

Callimome atriplicis Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 44. ♀.

aucupariae (Rodzianko). Minn. Host: Probably *Megastigmus aucupariae* Ratz.

Syntomaspis aucupariae Rodzianko, 1908. Soc. Imp. Nat. Moscou, Bul. (n. s.) 21: 602. ♀, ♂.

axillaris Ashmead. Va., W. Va.

Torymus axillaris Ashmead, 1894. Amer. Ent. Soc., Trans. 21: 333. ♀.

azureus Boheman. Mont., N. Mex.; Holarctic. Ecology: From *Picea engelmanni* cones (N. Amer. record). Host: *Perrisia strobi* Winn.; *Laspeyresia strobilella* (L.) (Palearctic region).

Torymus azureus Boheman, 1834. Svenska Vetensk. Akad., Handl. 54: 369-370. ♀.

baccharidis (Huber). Calif. Host: *Rhopalomyia californica* Felt on *Baccharis*.

Callimome baccharidis Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 46-47. ♀, ♂.

Callimome pilularidis Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 45-46. ♀, ♂.

Biology: Doutt, 1961. Ent. Soc. Amer., Ann. 54: 51 (*baccharicidis*). — Burks, 1965. Ent. News 65: 74-76 (host). — Force, 1970. Ent. Soc. Amer., Ann. 63: 1675-1688 (*baccharicidis*). — Force, 1974. Science 184: 624-632.

bedeguaris (Linnaeus). Que., Ont., Ill., Iowa, Nebr., Alta., Utah, Ariz., Wash., Oreg., Nev., Calif.; Europe. Host: *Diplolepis bicolor* (Harris), *D. ignota* (O. S.), *D. polita* (Ashm.), *D. rosae* (L.), *D. tuberculatrix* (Ckll.), *D. variabilis* (Bass.).

Ichneumon Bedeguaris Linnaeus, 1758. Syst. Nat., ed. 10, p. 567. ♀.

Torymus elegans Boheman, 1834. Svenska Vetensk. Akad., Handl. 54: 352. ♀, ♂.

Callimome divisus Walker, 1871. Notes on Chalcid., pt. 2, p. 34. ♀.

Callimome druparum Mayr, 1874. Zool.-Bot. Gesell. Wien, Verh. 24: 103. Misident. of *druparum* Boheman.

Callimome chrysochlora Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 37-39. Misident., in part, of *chrysochlora* Osten Sacken.

Taxonomy: Mayr, 1874. Zool.-Bot. Gesell. Wien, Verh. 24: 103 (misdet. of *druparum* Boheman). — Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 37-39. (misdet., in part, of *chrysochlora* Osten Sacken).

Biology: Judd, 1959. Canad. Ent. 91: 728-730.

bicoloratus (Huber). N. Mex., Idaho, Ariz., Wash., Oreg., Calif. Host: *Amphibolips trizonata* Ashm., *Callirhytis quercuspomiformis* (Bass.), *Diplolepis bicolor* (Harris)?, gall on *Quercus chrysolepis*.

Callimome bicoloratum Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 73. ♀, ♂.

boharti Grissell. N. Mex., Ariz., Nev., Calif.

Torymus boharti Grissell, 1976. Univ. Calif. Pubs. Ent. 79: 65. ♀, ♂.

brodiei (Ashmead). Ont., Ill. Host: *Acraspis erinacei* (Beut.), *A. pezomachoides* (O. S.)?; *Mayetiola rigida* (O. S.).

Syntomaspis Brodiei Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 187. ♀, ♂.

californicus (Ashmead). Oreg., Calif. Ecology: From pimply gall on *Quercus douglasii*, ?strawberry gall on *Quercus dumosa*. Host: *Andricus chrysolepidicola* (Ashm.), *A. lasius* (Ashm.), *A. quercusalifornicus* (Bass.), *Disholcaspis corallina* (Bass.), *D. chrysolepidis* (Beut.), *D. plumbeola* Kinsey, *D. simulata* Kinsey, *D. truceensis* (Ashm.), *D. sp.* on *Quercus douglasii*, *Besbus mirabilis* Kinsey, *B. conspicuus* (Kinsey), *Callirhytis quercusagrifoliae* (Bass.), *C. quercuspomiformis* (Bass.), *C. sp.* on *Quercus chrysolepis*, *Heteroecus pacificus* (Ashm.), *Trichoteras vacciniifoliae* (Ashm.).

Syntomaspis californica Ashmead, 1886. Amer. Ent. Soc., Trans. 13: 127. ♀.

callimomea *albitarsis* (Huber). Ill., Kans., Tex., Colo., N. Mex., Idaho, Utah, Ariz., Nev., Calif. Ecology: From stem gall on *Ambrosia*, seed-pod gall on *Mimosa biuncifera*, gall on *Solidago rigida*. Host: *Asphondylia helianthiglobulus* O. S., cecidomyiid flower gall on *Ratibida columnaris*, *Lasioptera* sp. on *Aster*, tephritid gall on *Chrysothamnus*; *Desmodium fulvum* (Lec.).

Callimome albitarsis Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 80. ♀.

Biology: Breland, 1939. Ent. Soc. Amer., Ann. 32: 719, 724.

capillaceus *capillaceus* (Huber). Tex., N. Mex., Ariz., Calif.; Mexico (Baja California Norte, San Luis Potosi, Sonora, Veracruz). Ecology: From gall on *Hymenoclea*; seed pods of *Prosopis*. Host: *Asphondylia neomexicana* (Ckll.), *websteri* Felt, *A. sp.* bud galls on *Larrea divaricata*, *Mayetiola rigida* (O. S.), cecidomyiid galls on *Rhus copallina lanceolata* (buds) and *Artemisia*? leaves.

Callimome capillaceum Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 74-75. ♀.

Syntomaspis medicaginis Gahan, 1919. Ent. Soc. Amer., Ann. 12: 162. ♀, ♂. Preocc. by Mayr, 1874.

Callimome sativae Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 77. N. name.

capite (Huber). D. C., Wis., Utah, Nev. Ecology: From mine on *Solidago*. Host: *Lasioptera* sp. *Callimome capite* Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 32-33. ♀, ♂.

cecidomyiae (Walker). Que., Ont., N. Y., Ohio, Kans., Wash., Calif. Host: *Cecidomyia communis* (nomen nudum), *C. spongivora* Walk., *Rhabdophaga strobilooides* (O. S.).

Callimome Cecidomyiae Walker, 1844. Ann. and Mag. Nat. Hist. 14: 15. ♀.

Callimome strobilooides Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 40. ♀.

Taxonomy: Burks, 1975. Brit. Mus. (Nat. Hist.) Ent., bul. 32 (4): 151-152.

chryschlorus (Osten Sacken). Conn.?, Colo., Alta., Idaho, Wash. Host: *Diplolepis bicolor* (Harris), *D. dichloceras* (Harris), *D. fusiformans* (Ashm.), *D. lens* Weld, *D. polita* (Ashm.). Previous records for this species (Peck, 1963, Canad. Ent., Sup. 30, p. 538) mostly apply to *T. bedeguaris* and *T. solitarius*. Records given here are only for those specimens which I have examined.

Callimome chryschloris Osten Sacken, 1870. Amer. Ent. Soc., Trans. 3: 63-64. ♀, ♂.

citripes (Huber). Colo., N. Mex., Idaho, Utah, Ariz., B. C., Wash., Oreg., Calif. Ecology: From stem gall on *Helianthus leucomelas*. Host: *Euaresta bullans* (Wied.), *Gymnocarena tricolor* (Doane), *Eutreta diana* (O. S.).

Callimome citripes Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 48. ♀, ♂.

coccineus (Huber). Maine, Mass., Conn., Va. Host: *Amphibolips confluenta* (Harris), *A. querucusspongifera* (O. S.).

Callimome coccineum Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 68-69. ♀.

coeruleus (Ashmead). Fla. Ecology: From gall on *Rubus* sp. Host: *Amphibolips confluenta* (Harris).

Callimome coerulea Ashmead, 1881. Amer. Ent. Soc., Trans. 9: Proc. p. xxxiii. ♀, ♂.

coloradensis (Huber). Kans. (?), Colo., Idaho, Utah, Wash. Host: Cecidomyiid gall on *Artemisia*, *Dasineura?* sp. on *Helianthus*.

Callimome coloradensis Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 49. ♀, ♂.

cruentatus (Huber). Conn. Host: Cynipid leaf gall on *Quercus virginiana*.

Callimome cruentatum Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 50-51. ♀, ♂.

dasyneurae (Huber). Ohio, Tex., Wyo., N. Mex., Utah, Ariz., Nev., Calif. Host: *Dasineura ulmea* Felt, *Walshomyia cupressi* Gagne, W. sp. nr. *juniperina* Felt.

Callimome dasyneurae Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 56-57. ♀, ♂.

dennoi Grissell. Calif. Host: *Walshomyia* sp. nr. *juniperina* Felt.

Torymus dennoi Grissell, 1976. Univ. Calif. Pubs. Ent. 79: 26. ♀, ♂.

denticulatus (Breland). Utah, Ariz., Calif.; Mexico (Chihuahua). Ecology: From staminate flw. gall on *Quercus argrifolia*, leaf gall on *Q. utahensis* and *Q. turbinella*. Host: *Andricus crystallinus* Bass., *A. kingi* Bass., *A. tostus* (Kinsey), *Antren clavuloides* (Kinsey), *A. quercusechinus* (O. S.) bisex. gen., *Callirhytis uvellae* Weld, *Dros pedicellatum* (Kinsey), *Dryocosmus dubiosus* (Full.) bisex. gen., *Sphaeroteres trimaculosum* (Mck. and Eg.). The host *Andricus tostus* is known only from Mexico.

Callimome denticulata Breland, 1939. Brooklyn Ent. Soc., Bul. 34: 85-86. ♀, ♂.

diabolus Moser, N. Y. Host: *Phytophaga* sp. on *Celtis occidentalis*.

Torymus diabolus Moser, 1965. N. Y. State Mus., Sci. Ser., Bul. 402: 26-27. ♀.

dryophantae (Ashmead). Fla. Host: *Bassettia quercuscatesbaei* (Ashm.).

Syntomaspi dryophantae Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 187. ♀.

dubiosus (Huber). D. C. Ecology: From leaf gall on *Carya*.

Callimome dubiosum Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 24-25. ♀.

duplicatus (Huber). Que., south to Fla., west to Nebr. Host: *Diastrophus cuscataeformis* O. S. *Callimome duplicatum* Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 27-28. ♀, ♂.

durus (Osten Sacken). Conn., D. C. Host: *Diplosis caryaef* O. S.

Callimome dura Osten Sacken, 1870. Amer. Ent. Soc., Trans. 3: 59. ♂.

ebrius (Osten Sacken). Conn., N. J., D. C., Va., Ohio, Tex. Host: *Lasioptera vitis* O. S.

Callimome ebria Osten Sacken, 1870. Amer. Ent. Soc., Trans. 3: 58-59. ♀, ♂.

elegantissimus (Ashmead). Ont.?, Fla. Host: *Disholcaspis quercusvirens* (Ashm.); *Xanthoteras quercusforticorne* (Walsh)?

Callimome elegantissima Ashmead, 1881. Amer. Ent. Soc., Trans. 9: Proc. p. xxxiv. ♀.

fagopirum (Provancher). Eastern seaboard to Fla., northern U. S., southern Canada. Host: *Dasineura rosarum* (Hardy), *D. serrulatae* (O. S.), *Rhabdophaga salicifolia* Felt;

- Diastrophus cuscuteformis* O. S., *D. kincaidii* Gill., *D. nebulosus* (O. S.), *D. turgidus* Bass., *Disholcaspis quercusvirens* (Ashm.).
- Callinome brevicauda* Osten Sacken, 1870. Amer. Ent. Soc., Trans. 3: 62. ♀, ♂. Preocc. by Walker, 1833.
- Callimone(!) fagopirum* Provancher, 1881 (Aug.). Nat. Canad. 12: 291. ♀, ♂.
- Callimome Sackenii* Ashmead, 1881 (Oct.). Amer. Ent. Soc., Trans. 9: Proc. p. xxxii. N. name.
- Callimome brevissimicauda* Ashmead, 1881. Amer. Ent. Soc., Trans. 9: Proc. p. xxxiii. ♀.
- Callimome virentis* Ashmead, 1881. Amer. Ent. Soc., Trans. 9: Proc. p. xxxiv. ♀.
- Callimome fagopyrum* Provancher, 1883. Petite Faune Ent. Canada Hym., p. 820. Misspelling, in index only.
- Torymus ostensackenii* Dalla Torre, 1898. Cat. Hym. v. 5, p. 311. N. name for *brevicauda* O. S.
- Callimome alamedensis* Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 28-29. ♀, ♂.
- ferrugineipes* (Huber). N. Mex., Ariz., Calif.
- Callimome ferrugineipes* Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 33. ♀, ♂.
- festivus* Hobbs. Alaska, N. W. T., Oreg. Host: *Dasineura* sp. in seeds of *Thuja* and *Chamaecyparis*.
- Torymus festivus* Hobbs, 1950. Pan-Pacific Ent. 26: 173-174. ♀, ♂.
- flavicoxa* (Osten Sacken). Que., Maine, N. H., Mass., Conn., Ont., N. J., Va., B. C., Oreg., Calif. Host: *Belonocnema treatae* Mayr, *Diastrophus nebulosus* (O. S.), *Diplolepis radicum* (O. S.), *D. terrigena* Weld, *Liposthenes glechomae* (L.).
- Callimome flavicoza* Osten Sacken, 1870. Amer. Ent. Soc., Trans. 3: 61. ♀.
- Cleonymus superbus* Provancher, 1888. Nat. Canad. 17: 407. ♀.
- Taxonomy: Burks, 1964 (1963). Canad. Ent. 95: 1257.
- flaviventris* Ashmead. Conn.?, Kans.
- Torymus flaviventris* Ashmead, 1888. Kans. Agr. Expt. Sta., Bul. 3: App. p. iv. ♀.
- floridensis* Peck. Fla. Ecology: From gall on *Quercus phellos* or *Q. laurifolia*. Host:
- Amphibolips quercusfuliginosa* (Ashm.).
- Callimome robustum* Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 72. ♀. Preocc. by Ratzburg, 1852.
- Torymus floridensis* Peck, 1951. In Muesebeck et al., U. S. Dept. Agr., Agr. Monog. 2: 523. N. name.
- frankiei* Grissell. Calif. Host: *Walshomyia cupressi* Gagne.
- Torymus frankiei* Grissell, 1973. Pan-Pacific Ent. 49: 236. ♀, ♂.
- fullawayi* (Huber). Ariz., Oreg., Calif.; Mexico (Michoacan). Host: *Andricus quercusalifornicus* (Bass.), *A. tibialis* (Kinsey), *Callirhytis quercusagrifoliae* (Bass.), *C. quercuspomiformis* (Bass.), *Disholcaspis plumbella* Kinsey, *Dryocosmus dubiosus* (Full.) unisex. and bisex. gen., *Heteroecus pacificus* (Ashm.).
- Syntomaspis caerulea* Fullaway, 1912. N. Y. Ent. Soc., Jour. 20: 275. ♀. Preocc. by Ashmead, 1881.
- Callimome fullawayi* Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 19. N. name.
- Taxonomy: Breland, 1939. Brooklyn Ent. Soc., Bul. 34: 87.
- fulvus* (Huber). Md., Iowa, Nebr.
- Callimome fulvum* Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 26-27. ♀.
- hainesi* Ashmead. Tex., N. Mex., Ariz., Calif.; Mexico to El Salvador. Host:
- Asphondylia websteri* Felt.
- Torymus hainesi* Ashmead, 1893. Ent. News 4: 278. ♀.
- Callimome asphondyliae* Gahan, 1919. Ent. Soc. Amer., Ann. 12: 161-162. ♂, ♀. Preocc. by Kieffer and Jorgensen, 1910.
- helianthi* Brodie. Ont., Tex., Utah. Host: *Trishormonyia helianthi* (Brodie).
- Torymus helianthi* Brodie, 1894. Biol. Rev. Ontario 1: 45-46. ♀.
- Torymus brevis* Breland, 1948. Ent. Soc. Wash., Proc. 50: 57. ♀, ♂.
- Taxonomy: Breland, 1948. Ent. Soc. Wash., Proc. 50: 58.
- Biology: Breland and Schmitt, 1948. Ent. News 59: 230.

hircinus Ashmead. Va. (? lapsus for w. Va.), W. Va. Ecology: From twig gall on willow.

Torymus hircinus Ashmead, 1894. Amer. Ent. Soc., Trans. 21: 333. ♀, ♂.

hirsutus (Huber). Ariz. Host: *Tanaostigmodes* stem gall on *Acacia greggii*.

Callimome hirsutum Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 74. ♀, ♂.

huberi (Hoffmeyer). Tex. Host: Cecidomyiid? gall on *Celtis* sp.

Callimome tarsale Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 76. ♂, ♀. Preocc. by Walker, 1833.

Callimome huberi Hoffmeyer, 1929. Ent. Meddel. 16: 333. N. name.

kinseyi (Huber). Mont., Idaho, Utah, Nev., Calif. Host: *Diarthonomyia artemisiae* Felt, cecidomyiid galls on *Chrysothamnus* and *Erigeron*, *Trypetia* sp. on *Chrysothamnus viscidiflorus*.

Callimome kinseyi Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 44. ♀, ♂.

koebelei (Huber). Tex., Mont., Wyo., N. Mex., Idaho, Utah, Ariz., Wash., Nev., Calif.; Mexico (Nuevo Leon). Host: *Rhopalomyia californica* Felt.

Callimome koebelei Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 52. ♀, ♂.

Biology: Doutt, 1961. Ent. Soc. Amer., Ann. 54: 51. —Force, 1970. Ent. Soc. Amer., Ann. 63: 1675-1688. —Force, 1974. Science 184: 624-632.

larreae Grissell. Tex., N. Mex., Ariz., Calif.

Torymus larreae Grissell, 1976. Univ. Calif. Pubs. Ent. 79: 76. ♀, ♂.

lissus (Walker) Fla., Ill. Ecology: From leaf gall on *Quercus laurifolia*. Host: *Belonocnema treatae* Mayr, *Disholcaspis quercusomnivora* (Ashm.), *D. quercusvirens* (Ashm.).

Callimome lissus Walker, 1843. Soc. Ent. de France, Ann. 1: 150. ♂.

Callimome aenea Ashmead, 1881. Amer. Ent. Soc., Trans. 9: Proc. p. xxxiii. ♀, ♂.

Callimome dryorhizoxeni Ashmead, 1885. Amer. Ent. Soc., Trans. 12: Proc. p. xiii. ♀.

Torymus omnivora Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 188. ♂, ♀.

Taxonomy: Burks, 1975. Brit. Mus. (Nat. Hist.) Ent., Bul. 32 (4): 152.

lividus (Ashmead). Fla., La.

Callimome lividus Ashmead, 1885. Amer. Ent. Soc., Trans. 12: Proc. p. xiii. ♀.

longicauda (Provancher). Que., Ont.

Callimone(!) *longicauda* Provancher, 1883. Nat. Canad. 14: 34. ♀.

Taxonomy: Burks, 1964 (1963). Canad. Ent. 95: 1256.

longior Brodie. Ont., N. Dak., Tex., Ariz., Calif. Host: *Trishoromomyia helianthi* (Brodie).

Torymus longior Brodie, 1894. Biol. Rev. Ontario 1: 45-46. ♀.

longiscapus Grissell. Calif. Host: *Callirhytis agrifoliae* (Ashm.).

Torymus longiscapus Grissell, 1976. Univ. Calif. Pubs. Ent. 79: 78. ♀, ♂.

longistigmus (Huber). Idaho, Wash., Calif. Host: Woody cecidomyiid gall on willow.

Callimome longistigmum Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 47. ♀, ♂.

magnificus (Osten Sacken). N. H., Conn., N. Y., N. J., D. C., Fla., Kans., Colo., Utah. Host: *Diplolepis radicum* (O. S.).

Callimome magnifica Osten Sacken, 1870. Amer. Ent. Soc., Trans. 3: 62. ♀, ♂.

mellipes (Huber). Mass., Conn. Host: Cecidomyiid gall on *Populus* sp.

Callimome mellipes Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 23. ♀, ♂.

memnonius Grissell. Tex. Host: *Disholcaspis cinerosa* (Bass.).

Torymus memnonius Grissell, 1973. Pan-Pacific Ent. 49: 237-238. ♀, ♂.

mexicanus Ashmead. Ariz.; Mexico (Guanajuato, Durango). Host: *Andricus championi* Ashm.

Torymus Mexicanus Ashmead, 1899. Ent. News 10: 195. ♀, ♂.

missouriensis (Huber). N. C., Ind., Mo. Host: Cecidomyiid stem gall on *Rubus*; cynipid gall.

Callimome missouriensis Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 42. ♀, ♂.

multicolor (Huber). Calif. Host: Cecidomyiid gall on *Ephedra* sp.

Callimome multicolor Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 51-52. ♀.

neuroterus Ashmead. Fla. Host: *Neuroterus quercusminutissimus* (Ashm.).

Torymus neuroterus Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 188. ♂.

- nitidulus** Walker. Maine, Mont.; Europe, Asia. Host: *Oligotrophus betulae* Winn. The host was recorded in Europe.
- Callimome nitidulus* Walker, 1833. Ent. Mag. 1: 138. ♂.
Torymus pallidicornis Boheman, 1834 (1833). Svensk. Vetensk. Akad., Handl. 56: 363. ♀.
- Taxonomy: Eady, 1958. Ent. Monthly Mag. 94: 260.
- obscurus** (Breland). Ind., Ky., Tenn., Ala., Miss., Ill., Mo., Tex., Ariz., Calif.; Mexico (Nuevo Leon). Host: *Lasioglossum murtfeldtiana* Felt.
Callimome obscura Breland, 1939. Ent. Soc. Amer., Ann. 32: 721. ♀, ♂.
- Biology: Satterthwait, 1948. Jour. Econ. Ent. 41: 729-730.
- occidentalis** (Huber). Oreg., Nev., Calif. Host: Cecidomyiid galls on *Juniperus occidentalis*.
Callimome occidentale Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 79. ♀, ♂.
- ochreatus** Say. Ind. Ecology: In *Liatris* receptacle. Type material destroyed.
Torymus ochreatus Say, 1836. Boston Jour. Nat. Hist. 1: 275. ♀, ♂.
- osborni** (Huber). Wyo. Host: Cynipid on *Rosa* sp.
Callimome osborni Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 93. ♀, ♂.
- oviperditor** (Gahan). Kans., Idaho. Host: *Cicadetta calliope* (Wlk.), *Tibicen aurifera* Say.
Syntomaspis oviperditor Gahan, 1927. Ent. Soc. Wash., Proc. 29: 99-100. ♀, ♂.
- pachypsyllae** (Ashmead). Ohio, Kans., Tex., N. Mex., Idaho. Host: *Pachypsylla venusta* O. S., *P. celtidisamma* Riley, *P. celtidisvesicula* Riley.
Monoditomoterus pachypsyllae Ashmead, 1888. Kans. Agr. Expt. Sta., Bul. 3: App. p. III. ♀, ♂.
- Taxonomy: Moser, 1965. N. Y. State Mus., Sci. Ser., Bul. 402: 22, 33-34.
- pavidus** Say. Ind. Type material destroyed.
Torymus pavidus Say, 1836. Boston Jour. Nat. Hist. 1: 275. ♂.
- perplexus** (Huber). Oreg. Host: *Besbicus mirabilis* (Kinsey).
Callimome perplexum Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 49. ♀.
- persimilis** Ashmead. Va. (? lapsus for W. Va.), W. Va. Host: Cecidomyiid gall on willow.
Torymus persimilis Ashmead, 1894. Amer. Ent. Soc., Trans. 21: 334. ♀.
- potamius** Grissell. Idaho, Utah, Ariz., Nev., Calif. Host: *Pontania* sp. galls.
Torymus potamius Grissell, 1976. Univ. Calif. Pubs. Ent. 79: 34-35. ♀, ♂.
- prunicola** (Huber). N. Mex., Ariz.
Callimome prunicola Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 91. ♀.
- racemariae** (Ashmead). N. Y. to Fla., Ala., w. to Ill., Colo., Tex. Host: *Amphibolips confluenta* (Harr.), *A. gainesi* Bass, *A. quercusfuliginosa* (Ashm.), *A. quercusinanis* (O. S.), *A. quercusjuglans* (O. S.), *A. quercusracemaria* (Ashm.), *Disholcaspis cinerosa* (Bass.), *D. quercusglobulus* (Fitch), *D. quercusmamma* (Walsh), *D. terrestris* Weld, *Dryocosmus imbricariae* (Ashm.).
Callimome recemariae Ashmead, 1881. Amer. Ent. Soc., Trans. 9: Proc. p. xxxiii. ♀, ♂.
Syntomaspis racemariae Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 187. Emend.
- Biology: Balduf, 1926. Canad. Ent. 58: 137-143, 163.
- Morphology: Snodgrass, 1910. U. S. Natl. Mus., Proc. 39: 65.
- rhoditidis** (Huber). Mass. Host: *Diplolepis* sp. on *Rosa*.
Callimome rhoditidis Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 34. ♀, ♂.
- rudbeckiae** Ashmead. Ont., Colo. Ecology: From gall on *Rudbeckia* sp. Host: Cecidomyiid on *Desmodium grandiflorum*.
Torymus rudbeckiae Ashmead, 1890. Colo. Biol. Assoc., Bul. 1: 26, 45. ♀, ♂.
- rugglesi** Milliron. Del., Md., Va. Ecology: From *Ilex opaca* seeds.
Torymus rugglesi Milliron, 1959. Ent. Soc. Amer., Ann. 52: 52. ♀, ♂.
- scalaris** (Huber). Fla., Wis., Kans., Tex., Ariz., Calif. Host: *Pachypsylla celtidisgemma* Riley.
Callimome scalaris Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 21. ♀, ♂.
- solidaginis** (Huber). Conn., N. Y., N. C. Host: Cecidomyiid.
Callimome solidaginis Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 92. ♀, ♂.

- solitarius* (Osten Sacken). Colo., Alta., Idaho, Utah, Ariz., Wash., Nev., Calif. Host: *Diastrophus kincaidii* Gill., *Diplolepis bicolor* (Harris), *D. spinosa* (Ashm.), *D. tuberculatrix* (Chlk.).
- Callimome solitaria* Osten Sacken, 1870. Amer. Ent. Soc., Trans. 3: 64. ♀.
- Callimome rosae* Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 35-36. ♀.
- Callimome tubularis* Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 39-40. ♀, ♂.
- Taxonomy: Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 37-39 (misdet., in part, of *chrysochlora* Osten Sacken).
- splendidulus* Dalla Torre. Ont. Host: *Mayetiola rigidae* (O. S.).
- Callimome splendidus* Walker, 1844. Ann. and Mag. Nat. Hist. 14: 14. Preocc. by Foerster, 1841.
- Torymus splendidulus* Dalla Torre, 1898. Cat. Hym., v. 5, p. 313. N. name.
- Taxonomy: Burks, 1975. Brit. Mus. (Nat. Hist.) Ent., Bul. 32 (4): 152-153.
- subcalifornicus* Grissell. Oreg., Calif. Host: *Trichoteras vaccinifoliae* (Ashm.).
- Torymus subcalifornicus* Grissell, 1976. Univ. Calif. Publs. Ent. 79: 44. ♀, ♂.
- sulcatus* (Huber). Oreg., Calif. Host: *Disholcaspis truceensis* (Ashm.), *Heteroecus flavens* (McC. and Egb.).
- Callimome sulcatum* Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 22. ♀.
- texanus* (Hoffmeyer). Tex., Ariz.; Mexico (Monterey). Host: *Amphibolips globulus* Beut., *A. trizonata* Ashm., *Atrusca aggregata* (Weld), *A. bella* (Bass.), *A. congesta* (Kinsey), *A. simulatrix* (Kinsey), *Discholcaspis cinerosa* (Bass.).
- Callimome texanum* Hoffmeyer, 1930. Ent. Meddel. 17: 213. ♀, ♂.
- Taxonomy: Breland, 1939. Brooklyn Ent. Soc., Bul. 34: 87.
- thalassinus* (Crosby). Conn., N. Y., Ohio, Minn., Wyo., N. Mex., Idaho, Utah, Ariz., Wash., Oreg., Nev., Calif. Host: *Harmolita* sp. from *Bouteloua* sp., *Elymus* sp., *Dactylis glomerata*, *Lolium multiflorum*, *L. temulentum*, *Muhlenbergia* sp., *Phleum* sp. *Syntomaspis thalassinus* Crosby, 1908. Canad. Ent. 40: 43. ♀, ♂.
- Callimome rohweri* Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 58. ♀, ♂.
- theon* (Walker). Fla.
- Callimome theon* Walker, 1843. Soc. Ent. de France, Ann. 1: 149. ♀.
- Taxonomy: Burks, 1975. Brit. Mus. (Nat. Hist.) Ent., Bul. 32 (4): 153.

vesiculi Moser. N. Y., s. to Ga, w. to Idaho and Ariz. Host: *Pachypsylla celtidisamma* Riley, *P. celtidisvesicula* Riley.

Torymus vesiculi Moser, 1956. Kans. Ent. Soc., Jour. 29: 58. ♀, ♂.

Taxonomy: Moser, 1956. N. Y. State Mus., Bul. 402: 21-22, 33-34.

warreni (Cockerell). N. Y., N. C., Tex., Colo., N. Mex., Utah, Ariz., Calif.; Mexico (Baja California Norte). Host: *Amphibolips globulus* Beut., *Antron dumosae* (Kinsey), *Disholcaspis cinerosa* (Bass), *D. colorado* (Gill.), *D. edura* Weld, *D. pruiniformis* Kinsey, *D. quercusglobulus* (Fitch), *D. quercusmamma* (Walsh), *D. rubens* (Gill.), *D. spongiosa* (Karsch).

Syntomaspis warreni Cockerell, 1911. Ent. News 22: 82. ♀.

Callimome cinerosum Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 84-85. ♀.

xanthopus (Schulz). Kans. Host: Cecidomyiid on cedar.

Megastigmus flavipes Ashmead, 1888. Kans. Agr. Expt. Sta., Bul. 3: App. p. III. ♂.

Preocc. by Walker, 1833.

Megalostigmus xanthopus Schulz, 1906. Spolia Hym., p. 147. N. name.

Torymus abortus Crosby, 1914. Ent. News 25: 27. N. name.

Genus DIOMORUS Walker

Diomorus Walker, 1834. Ent. Mag. 2: 159.

Type-species: *Diomorus nobilis* Walker. Monotypic.

Dihomerus Schulz, 1906. Spolia Hym., p. 148. Emend.

viridis (Provancher). Que.

Haltichella viridis Provancher, 1887. Addit. Corr. Faune Ent. Canada Hym., p. 192. ♀.

Taxonomy: Burks, 1964 (1963). Canad. Ent. 95: 1259 (prob. = *zabriskiei* Cresson).

zabriskiei Cresson. N. Y., N. J., W. Va., Kans., B. C., Calif. Host: *Crossocerus fergusoni* Pate, *C. insolens* (Fox), *Ectemnius lapidarius* (Panz.), *E. stirpicola* (Pack.), *E. (Hypocrabro) paucimaculatus* (Pack.), *E. (H.) spiniferus* (Fox), *Eupllis* (*Corynopus*) *arapaho* Pate, *E. (C.) rufigaster* (Pack.), *Ceratina dupla* Say.

Diomorus zabriskii (?) Cresson, 1878. Psyche 2: 189. ♀.

Diomorus zabriskiei Peck, 1951. In Muesebeck, et. al., U. S. Dept. Agr., Agr. Monog. 2: 527. Valid emend.

Biology: Krombein, 1960. Ent. News 71: 32, 67. — Krombein, 1964. Biol. Soc. Wash., Proc. 77: 102-103.

Genus PHYSOTHORAX Mayr

Physothorax Mayr, 1885. Zool.-Bot. Gesell. Wien, Verh. 35: 159, 196.

Type-species: *Physothorax disciger* Mayr. Desig. by Gahan and Fagan, 1923.

Members of this genus have been reared from the receptacles of figs. As with Idarninae, the exact relationship of wasp to host is not known.

Revision: Burks, 1969. Fla. Ent. 52: 115-119 (Nearctic spp.).

bidentulus Burks. Fla. Host: *Ficus altissima?*, *F. aurea*, *F. citrifolia*.

Physothorax bidentulus Burks, 1969. Fla. Ent. 52: 118-119. ♀, ♂.

pallidus Ashmead. Fla.; W. Indies. Host: *Ficus aurea*, *F. citrifolia*.

Physothorax pallidus Ashmead, 1900. Ent. Soc. London, Trans., p. 254. ♀, ♂.

russelli Crawford. Fla. Host: *Ficus aurea*.

Physothorax russelli Crawford, 1910 (1909). Ent. Soc. Wash., Proc. 11: 204. ♀.

Taxonomy: Butcher, 1964. Fla. Ent. 47: 237 (fig associates).

SUBFAMILY ERIMERINAE

By E. E. GRISSELL

Members of this subfamily are parasites of insects in grass stems.

Taxonomy: Breland, 1938. N. Y. Ent. Soc., Jour. 46: 357 (phylogeny).

Genus ERIMERUS Crawford

Erimerus Crawford, 1914. Ent. Soc. Wash., Proc. 16: 123.

Type-species: *Torymus wickhami* Ashmead. Orig. desig.

wickhami (Ashmead). Utah. Ecology: From galls on *Hilaria* (*Harmolita*)?.

Torymus wickhami Ashmead, 1904. Ent. News 15: 302. ♀.

Taxonomy: Crawford, 1914. Ent. Soc. Wash., Proc. 16: 123.

Genus PSEUDERIMERUS Gahan

Pseuderimerus Gahan, 1919. U. S. Natl. Mus., Proc. 55: 124.

Type-species: *Pseuderimerus mayetiola* Gahan. Orig. desig.

Taxonomy: Peck, et al., 1964. Ent. Soc. Canad., Mem. 34: 21 (placed as Monodontomerinae).

femoratus Gahan. Calif. Host: *Mayetiola destructor* (Say).

Pseuderimerus femoratus Gahan, 1934 (1933). U. S. Dept. Agr., Misc. Pub. 174: 32-33. ♀.

mayetiola Gahan. Calif. Host: *Mayetiola destructor* (Say).

Pseuderimerus mayetiola Gahan, 1919. U. S. Natl. Mus., Proc. 55: 125. ♀, ♂.

Taxonomy: Hill and Pinckney, 1940. U. S. Dept. Agr., Tech. Bul. 715: 10-13.

Biology: Packard, 1928. U. S. Dept. Agr., Tech. Bul. 81: 14. — Gahan, 1934 (1933). U. S. Dept. Agr., Misc. Pub. 174: 30-32.

semiflavus Gahan. Calif. Host: *Mayetiola destructor* (Say).

Pseuderimerus semiflavus Gahan, 1934 (1933). U. S. Dept. Agr., Misc. Pub. 174: 33. ♀.

SUBFAMILY MONODONTOMERINAЕ

By E. E. GRISSELL

The Monodontomerinae are a loose assemblage of taxa not particularly well defined morphologically or biologically. All species are parasitic, with hosts in the Diptera, Hymenoptera, Lepidoptera, and Coleoptera.

Revision: Crawford, 1914. Ent. Soc. Wash., Proc. 16: 123-124 (key to genera). —Szelényi, 1957. Mus. Nat. Hungarici, Ann. Hist.-Nat., n. s., 8: 381-388 (key to genera). —Szelényi, 1960. Acad. Sci. Hungarici, Acta Zool. 5: 141-146 (rev. key to genera).

Genus LIODONTOMERUS Gahan

Lochites Foerster, 1856. Hym. Stud., v. 2, pp. 43, 44, 120. Preocc. by *Lochites* Gistl, 1848 (Protozoa).

Type-species: *Lochites papaveris* Foerster. Monotypic.

Liodontomerus Gahan, 1914. U. S. Natl. Mus., Proc. 48: 159.

Type-species: *Liodontomerus perplexus* Gahan. Orig. desig.

Lochitisa Ghesquiere, 1946. Rev. de Zool. et de Bot. Africaines 34: 368. N. name for *Lochites* Foerster.

Members of this genus are parasitic upon *Bruchophagus* in leguminous seeds.

Taxonomy: Nikol'skaya, 1952. Chalcid fauna of the U. S. S. R. 44: 135 (Holarctic. Eng. transl. 1963). —Burks, in Butler and Hansen, 1958. Pan-Pacific Ent. 34: 224.

Biology: Neunzig and Gyriseo, 1959. Jour. Econ. Ent. 52: 899-901.

insuetus Gahan. Nebr., Kans., Okla., N. Mex., Utah, Ariz., Calif.; Holarctic. Host: *Bruchophagus gibbus* (Boh.)?, *B. platyptera* (Walk.), *B. roddi* (Guss.).

Liodontomerus insuetus Gahan, 1917. U. S. Natl. Mus., Proc. 53: 208. ♀.

Biology: Butler, *et al.*, 1968. Ariz. Univ. Agr. Exp. Sta., Tech. Bul. 185: 7.

longfellowi (Girault). N. Y., Md., Va., W. Va., Ohio, Mich., Minn., Iowa, S. Dak., Utah, Idaho, Oreg.; Holarctic. Host: *Bruchophagus gibbus* (Boh.), *B. platyptera* (Walk.) complex. *Idiomacromerus longfellowi* Girault, 1917 (May 14). Descr. Hym. Chalcidoid. Variorum cum Observ. III, p. 8. ♀, ♂.

Liodontomerus secundus Gahan, 1917 (May 26). U. S. Natl. Mus., Proc. 53: 208. ♀, ♂.

Biology: Urbahns, 1919. Jour. Agr. Res. 16: 169-170. —Butler and Hansen, 1958. Pan-Pacific Ent. 34: 227.

perplexus Gahan. Iowa, S. Dak., Utah, Ariz., Calif.; Holarctic. Host: *Bruchophagus platyptera* (Walk.) complex.

Liodontomerus perplexus Gahan, 1914. U. S. Natl. Mus., Proc. 48: 159. ♀, ♂.

Biology: Urbahns, 1920. U. S. Dept. Agr., Bul. 812: 17-18. —Sorenson, 1930. Utah Agr. Expt. Sta., Bul. 218: 27-32. —Butler, *et al.*, 1968. Ariz. Univ. Agr. Exp. Sta., Tech. Bul. 185: 7-9.

Genus IDIOMACROMERUS Crawford

Idiomacromerus Crawford, 1914. Ent. Soc. Wash., Proc. 16: 124.

Type-species: *Idiomacromerus bimaculipennis* Crawford. Orig. desig.

bimaculipennis Crawford, Kans., Utah, Calif. Host: *Eurytoma compressa* Bugbee, *E. seminis* Bugbee.

Idiomacromerus bimaculipennis Crawford, 1914. Ent. Soc. Wash., Proc. 16: 124. ♀.

Genus PLATYKULA Huber

Platykula Huber, 1927. U. S. Natl. Mus., Proc. 70 (14): 106.

Type-species: *Syntomaspis albihirta* Ashmead. Orig. desig.

albihirta (Ashmead). Fla.

Syntomaspis albihirta Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 187. ♀.

Genus DIMEROMICRUS Crawford

Dimeromicrus Crawford, 1910. U. S. Natl. Mus., Proc. 38: 127.

Type-species: *Dimeromicrus ashmeadi* Crawford. Orig. desig.

cecidomyiae (Ashmead). Fla., Tex. Host: Cecidomyiid on *Baccharis halimifolia*.

Megastigma(!) *cecidomyiae* Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 185. ♀, ♂.

Lochites auriceps Ashmead, 1894. Linn. Soc. London, Jour., Zool. 25: 153. ♀, ♂.

Taxonomy: Milliron, 1949. Amer. Midland Nat. 41: 347.

smithi (Schread). Conn. Host: *Caryomyia* sp. gall.

Lochites smithi Schread, 1937. Brooklyn Ent. Soc., Bul. 32: 102. ♀, ♂.

Genus MONODONTOMERUS Westwood

Monodontomerus Westwood, 1833. London, Edinb. and Dublin Phil. Mag. and Jour. (3) 2: 443.

Type-species: *Monodontomerus obscurus* Westwood. Monotypic.

Paroligosthenus Cameron, 1913 (1912). Indian Forest Rec. 4: 94.

Type-species: *Paroligosthenus trichoptthalmus* Cameron. Monotypic.

Revision: Gahan, 1941. U. S. Natl. Mus., Proc. 90: 461-482 (Nearctic spp.). —Steffan, 1952. Paris Mus. d' Hist. Nat., Bul. 24: 288-290 (Europe, N. Africa). —Nikol'skaya, 1952. Chalcid fauna of the U. S. S. R. 44: 137-140 (Palaearctic Eng. transl. 1963).

aereus Walker. N. B. ?, New England; India; Holarctic. Host: *Archips argyrospilus* (Walk.), *Malacosoma americanum* (F.), *Nygma phaeorrhoea* (Donov.), *Orgyia leucostigma* (J. E. Smith), *Porthetria dispar* (L.); *Blepharipa scutellata* (R. D.), *Carcelia laxifrons* Vill., *Compilura concinnata* (Meig.), *Exorista larvarum* (L.), *Townsendlomyia nidicola* (Tns.); *Apanteles lacteicolor* Vier., *A. melanoscelus* (Ratz.), *Iseropus coelebs* (Walsh), *Meteorus versicolor* (Wesm.), *Phobocampe unicincta* (Grav.).

Monodontomerus aereus Walker, 1834. Ent. Mag. 2: 158. ♀.

Taxonomy: Muesebeck, 1931. Jour. Agr. Res. 43: 445-460.

Biology: Howard and Fiske, 1911. U. S. Dept. Agr., Bur. Ent. Bul. 91: 86-308. —Muesebeck and Dohanian, 1927. U. S. Dept. Agr., Bul. 1487: 19-20. —Burgess and Crossman, 1929. U. S. Dept. Agr., Tech. Bul. 86: 77-80. —Proper, 1934. Jour. Agr. Res. 48: 361-376. —Clausen, 1956. U. S. Dept. Agr., Tech. Bul. 1139: 114-116. —Wilbert, 1960. Entomophaga 5: 203. —Blunck and Wilbert, 1962. Ztschr. f. Angew. Ent. 50: 203.

bakeri Gahan. Colo.

Monodontomerus bakeri Gahan, 1941. U. S. Natl. Mus., Proc. 90: 475. ♀.

elementi Grissell. Wyo. Host: *Dianthidium heterulkei* Schwarz.

Monodontomerus elementi Grissell, 1973. Pan-Pacific Ent. 49: 235. ♀, ♂.

dentipes (Dalman). Que., Maine, Conn., Ont., N. Y., N. J., Pa., Ohio, Mich., Wis., Idaho.; Holarctic. Host: *Orgyia pseudotsugata* (McD.); Tachinidae; *Diprion similis* (Htg.), *Gilpinia hercyniae* (Htg.), *Rogas unicolor* (Wesm.).

Torymus dentipes Dalman, 1820. Svenska Vetensk. Akad., Handl. 41: 173, 178. ♂, ♀.

Monodontomerus viridaeneus Provancher, 1881. Nat. Canad. 12: 290. ♀.

Taxonomy: Finlayson, 1960. Canad. Ent. 92: 37, 39, 44 (immature stages).

Biology: Morris, Cameron, and Jepson, 1937. Bul. Ent. Res. 28: 377-380, 389, 391. —Finlayson and Finlayson, 1958. Canad. Ent. 90: 558-559. —Drooz and Fedde, 1972. Environ. Ent. 1: 522-523.

Morphology: Bucher, 1948. Canad. Jour. Res. 26D: 230-281.

dianthidii Gahan. Calif. Host: *Dianthidium* sp.

Monodontomerus dianthidii Gahan, 1941. U. S. Natl. Mus., Proc. 90: 464. ♀, ♂.

emarginatus Gahan. Colo. Host: *Megachile?* sp.

Monodontomerus emarginatus Gahan, 1941. U. S. Natl. Mus., Proc. 90: 476. ♀.

indiscretus Gahan. Maine. Host: *Heterarthrus nemoratus* (Fall.).

Monodontomerus indiscretus Gahan, 1941. U. S. Natl. Mus., Proc. 90: 469. ♀.

mandibularis Gahan. N. Y., D. C., Ohio, Ill., Mo., La. Host: *Anthophora abrupta* Say, *A. bomboides* Kirby, *Melitoma taurea* (Say), *Osmia cordata* Robt.

Monodontomerus mandibularis Gahan, 1941. U. S. Natl. Mus., Proc. 90: 474. ♀, ♂.

Biology: Rau, 1947. Ent. Soc. Amer., Ann. 40: 221-226.

mexicanus Gahan. Ind., Calif.; Mexico. Host: *Trypoxyylon* (*Trypargilum*) *mexicanum* Sauss., *Parancistrocerus vagus* (Sauss.), *Ancylotarsus armata* Smith.

Monodontomerus mexicanus Gahan, 1941. U. S. Natl. Mus., Proc. 90: 468. ♀, ♂.

Biology: Torchio, 1974. Kans. Ent. Soc., Jour. 47: 58.

minor (Ratzeburg). Conn., N. Y., south to Va., west to Calif.; Europe. Host: *Thyridopteryx ephemeraeformis* (Haw.), *Phryganidia californica* Pack., *Samia cynthia* (Drury), *Malacosoma americana* (F.). *Grapholitha molesta* (Busck), *Choristoneura fumiferana* (Clem.)?; *Gambrus extrematis* (Cress.). Recorded as hyperparasite of Lepidoptera in European literature.

Torymus minor Ratzeburg, 1848. Ichn. d. Forstins., v. 2, p. 178. ♀, ♂.

Monodontomerus suboboletus Gahan, 1941. U. S. Natl. Mus., Proc. 90: 480. ♀, ♂.

Taxonomy: Grissell, 1973. Pan-Pacific Ent. 49: 233-234 (figs.).

Biology: Allen, 1962. U. S. Dept. Agr., Tech. Bul. 1265: 102.

montivagus Ashmead. Ont., Del., Ill., Mo., Mont., Colo., N. Mex., Utah, B. C., Calif. Host:

Choristoneura fumiferana (Clem.); *Anthidium emarginatum* (Say), *Megachile pacifica* (Panzer), *Dianthidium pudicum* (Cress.), *D. pudicum consimile* (Ashm.), *D. curvatum sayi* Ckll., *Osmia cordata* Robertson, *O. texana* Cress.; *Anthophora abrupta* Say, *A. linsleyi* Timb., *A. bombooides neomexicana* Ckll., *A. occidentalis* Cress., *Melissodes?* sp.; *Xylocopa tabaniformis orpifex* Smith; *Bombus morrisoni* Cress.; *Ancistrocerus tuberculocephalus* (Sauss.).

Monodontomerus montivagus Ashmead, 1890. Colo. Biol. Assoc. Bul. 1: 25, 45. ♀.

Monodontomerus americanus Girault, 1917. Descr. Stellarum Nov., p. 11. ♀.

Taxonomy: Grissell, 1973. Pan-Pacific Ent. 49: 236.

Biology: Linsley and McSwain, 1942. Amer. Midland Nat. 27: 403, 409-412.

obscurus Westwood. N. Y., Md., Pa., D. C., W. Va., Ga., Mo., Iowa, Idaho; Holarctic. Host: *Osmia cordata* Robt., *O. lignaria* Say, *Megachile pacifica* (Panzer).

Monodontomerus obscurus Westwood, 1833. London, Edinb. and Dublin Phil. Mag. and Jour. Sci. (3) 2: 443. ♀.

Taxonomy: Steffan, 1952. Paris Mus. d'Hist. Nat., Bul. (2) 24: 289-290. — Eady, 1958. Ent. Monthly Mag. 94: 269.

Biology: Eves, 1970. Melanderia (Wash. State Ent. Soc.) 4: 1-18. — Hobbs and Krunic, 1971. Canad. Ent. 103: 674-685.

Morphology: Radu and Botoc, 1968. Stud. Univ. Babes, Bolyai Ser. Biol. 13: 71-76 (female genitalia).

saltuosus Grissell. N. Mex., Calif. Host: *Orgyia pseudotsugata* (McD.).

Monodontomerus saltuosus Grissell, 1973. Pan-Pacific Ent. 49: 232-233. ♀, ♂.

Genus ZAGLYPTONOTUS Crawford

Zaglyptonotus Crawford, 1914. Ent. Soc. Wash., Proc. 16: 124-125.

Type-species: *Zaglyptonotus schwarzi* Crawford. Orig. desig.

mississippiensis Breland. Ala., Miss. Host: *Neotephritis finalis* (Loew).

Zaglyptonotus mississippiensis Breland, 1938. Ent. Soc. Amer., Ann. 31: 205. ♀, ♂.

schwarzi Crawford. Fla., Kans., Tex., Colo., Idaho. Host: *Desmoris fulvus* (Lec.)?; *Isophrictis similiella* (Chamb.); tephritid seed maggot from ironweed.

Zaglyptonotus schwarzi Crawford, 1914. Ent. Soc. Wash., Proc. 16: 126. ♀.

Biology: Brandhorst, 1943. Kans. Acad. Sci., Trans. 46: 168. — Needham, 1948. Ecol. Monog. 18: 446.

Genus GLYPHOMERUS Foerster

Glyphomerus Foerster, 1856. Hym. Stud., v. 2, pp. 43, 44, 145.

Type-species: *Ichneumon stigma* Fabricius. Orig. desig.

Oligosthenus Foerster, 1856. Hym. Stud., v. 2, p. 145. Unnecessary n. name.

Taxonomy: Boucek, 1970. R. Lab. Ent. Agr. Portici, Bol. 27: 28-32 (Palearctic spp.).

stigma (Fabricius). Que. to Fla., Oreg., Calif.; Europe, Japan. Host: *Diplolepis rosae* (L.); *Melitoma taurea* (Say).

Ichneumon stigma Fabricius, 1793. Ent. System. v. 2, p. 188.

Oligosthenus bimaculatus Provancher, 1887. Addit. Corr. Faune Ent. Canada Hym., p. 196.

♀.

Taxonomy: Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 186.

Genus ERIDONTOMERUS Crawford

Eridontomerus Crawford, 1907. N. Y. Ent. Soc., Jour. 15: 178-179.

Type-species: *Eridontomerus primus* Crawford. Orig. desig.

isosomatis (Riley). N. Y. and Mich. to Tenn., Utah, Ariz. Host: *Mayetiola destructor* (Say);

Harmolita albomaculata (Ashm.), *H. linearis* (Walk.), *H. longula* (Dalm.), *H. festucae* P. and E., *H. grandis* (Riley), *H. hordei* (Harris), *H. maculata* (How.), *H. secale* (Fitch), *H. tritici* (Fitch), *H. vaginicola* (Doane), *H. websteri* (How.).

Stictonotus isosomatis Riley, 1882. U. S. Dept. Agr., Ann. Rpt. for 1881-1882, p. 186. ♀, ♂.
Eridontomerus primus Crawford, 1907. N. Y. Ent. Soc., Jour. 15: 179. ♀, ♂.

Taxonomy: Gahan, 1921 (1920). Ent. Soc. Wash., Proc. 22: 235.

Biology: Phillips and Poos, 1927. Jour. Agr. Res. 34: 483-488. —Knowlton and Janes, 1933.

Utah Agr. Expt. Sta., Bul. 243: 11-12.

Genus PSEUDOTORYMUS Masi

Holaspis Mayr, 1874. Zool.-Bot. Gesell. Wien, Verh. 24: 83. Preocc. by Lankester, 1873 (Pisces).

Type-species: *Torymus militaris* Boheman. Desig. by Ashmead, 1904.

Pseudotorymus Masi, 1922. Genova Mus. Civ. Stor. Nat., Ann. 49: 235. N. name for *Holaspis* Mayr.

lazulellus (Ashmead). N. B., Que., Conn., w. to Colo. Ecology: From clover heads; oak galls.

Host: *Harmolita* sp. in rye stems, *H.* sp. in timothy stems.

Syntomaspis lazulella Ashmead, 1890. Colo. Biol. Assoc., Bul. 1: 26, 45. ♀.

Biology: Webster, 1906 (1905). Ent. Soc. Wash., Proc. 7: 116.

Genus CRYPTOPRISTUS Foerster

Cryptopristus Foerster, 1856. Hym. Stud., v. 2, pp. 43, 44.

Type-species: *Torymus caliginosus* Walker. Monotypic.

Websterellus Ashmead, 1893. Ohio Agr. Exp. Sta., Tech. Ser., Bul. 1 (3): 164.

Type-species: *Websterellus tritici* Ashmead. Monotypic.

harrisi (Fitch). N. Y., Va., Ohio, Ky., Kans. Host: *Harmolita grandis* (Riley), *H. hordei* (Harris)?, *H. tritici* (Fitch).

Torymus Harrisii Fitch, 1862 (1861). N. Y. State Agr. Soc., Trans. 21: 152. ♀, ♂.

Websterellus tritici Ashmead, 1893. Ohio Agr. Expt. Sta., Tech. Ser., Bul. 1 (3): 164. ♀, ♂.

Cryptopristus americanus Girault, 1917. Descr. Stellarum Nov., p. 8. ♀.

Biology: Webster, 1893. U. S. Dept. Agr., Insect Life 6: 151. —Gahan, 1921 (1920). Ent. Soc. Wash., Proc. 22: 237.

Genus DITROPINOTUS Crawford

Ditropinotus Crawford, 1907. N. Y. Ent. Soc., Jour. 15: 178.

Type-species: *Ditropinotus aureoviridis* Crawford. Orig. desig.

aureoviridis Crawford. N. Y. to Ala. and Kans. Utah, Oreg. Host: *Mayetiola destructor* (Say);

Eurytoma parva Phillips, *Harmolita linearis* (Wlkr.), *H. elymicola* P. and E., *H. grandis* (Riley), *H. secale* (Fitch), *H. tritici* (Fitch), *H. vaginicola* (Doane), *Eurytoma* spp., *Merisoporus chalcidiphagus* (W. and R.).

Ditropinotus aureoviridis Crawford, 1907. N. Y. Ent. Soc., Jour. 15: 178. ♀, ♂.

Ditropinotus flavicorpus Gahan, 1912. Ent. Soc. Wash., Proc. 14: 5. ♀, ♂.

Taxonomy: Gahan, 1934 (1933). U. S. Dept. Agr., Misc. Pub. 174: 25-30.

Biology: Hill, Pinckney, and Udine, 1939. U. S. Dept. Agr., Tech. Bul. 689: 5, 10, 13.

—Chamberlain, 1941. U. S. Dept. Agr., Tech. Bul. 784: 25-28, 35-38.

Morphology: Hill and Pinckney, 1940. U. S. Dept. Agr., Tech. Bul. 715: 6, 11-13.

Genus ANTISTROPHOPLEX Crawford

Antistrophoplex Crawford, 1914. Ent. Soc. Wash., Proc. 16: 122-125.

Type-species: *Antistrophoplex bicoloripes* Crawford. Orig. desig.

bicoloripes Crawford. Iowa, Kans. Host: *Antistrophus lygodesmiaepisum* Walsh on *Lygodesmia*.

Antistrophoplex bicoloripes Crawford, 1914. Ent. Soc. Wash., Proc. 16: 125. ♀.

Biology: Brandhorst, 1964. Ent. Soc. Amer., Ann. 57: 74-77.

Genus MICRODONTOMERUS Crawford

Microdontomerus Crawford, 1907. N. Y. Ent. Soc., Jour. 15: 178, 179.

Type-species: *Torymus anthonomi* Crawford. Orig. desig.

anthidii (Ashmead). Calif. Host: *Dianthidium pudicum consimile* (Ashm.).

Torymus anthidii Ashmead, 1896. Ent. News 7: 24. ♀.

anthonomi (Crawford). N. J., Va., S. C., Mo., La., Tex., Utah, Idaho, Wash., Oreg. Host:

Acanthoscelides horni (Pic), *Bruchus brachialis* Fahr., *B. pisorum* (L.), *Brachytarsoides alternatus* (Say), *Anthonomus grandis* Boh.; *Ancylis comptana fragariae* (W. and R.), *Coleophora malivorella* Riley; *Bracon mellitor* Say, *Leptochilus* sp.

Torymus anthonomi Crawford, 1907. Canad. Ent. 39: 133. ♀, ♂.

Taxonomy: Pierce, Cushman, and Hood, 1912. U. S. Dept. Agr. Bur. Ent., Bul. 100: 1, 31, 49, 57-62.

fumipennis Crawford. Wyo., s. to N. Mex., w. to Pacific Coast. Host: *Malacosoma californicum* (Pack.), *M. fragile* Stretch, *Choristoneura rosaceana* (Harr.).

Microdontomerus fumipennis Crawford, 1917 (1916). Insecutor Inscitiae Menstruus 4: 141-142. ♀, ♂.

Biology: Langston, 1957. Calif. Univ. Pubs., Ent. 14: 29-30.

Genus ROPTROCERUS Ratzeburg

Pachyceras Ratzeburg, 1844. Ichn. d. Forstins., v. 1, p. 217. Suppressed by Internat. Comm. Zool. Nomencl., 1957, Opinion 437, pp. 25-40.

Type-species: *Pachyceras xylophagorum* Ratzeburg. Autobasic.

Roptrocerus Ratzeburg, 1848. Ichn. d. Forstins., v. 2, p. 209. Unnecessary n. name for *Pachyceras* thought to be preocc. by *Pachycerus* Gyllenhal, 1826. Validated by Internat. Comm. Zool. Nomencl., 1957 (Opinion 437).

Type-species: *Pachyceras xylophagorum* Ratzeburg. Desig. by Ashmead, 1904. *Rhoptrcerus* Dalla Torre, 1898. Cat. Hym., v. 5, p. 98. Emend.

Taxonomy: Hedqvist, 1963. Studia Forest. Suecica 11: 61-70 (Palearctic spp.).

xylophagorum (Ratzeburg). Que. and N. H. to N. C. and La., w. to B. C., Wash., and Ariz.

Host: *Orthotomicus caelatus* (Eichh.), *Phloeosinus dentatus* (Say)?, *Polygraphus rufipennis* (Kby.), *Scolytus rugulosus* (Ratz.), *Dendroctonus frontalis* Zimm., *D. monticolae* Hopk., *D. pseudotsugae* Hopk., *Ips calligraphus* (Germ.), *I. grandicollis* (Eich.)?, *I. pini* (Say).

Pachyceras Xylophagorum Ratzeburg, 1844. Ichn. d. Forstins., v. 1, p. 218. ♀.

Pachyceras Eccoptogastri Ratzeburg, 1844. Ichn. d. Forstins., v. 1, p. 218. ♀.

Roptrocerus rectus Provancher, 1887. Addit. Corr. Faune Ent. Canada. Hym., p. 202. ♀. *Platygerrhus(?) scolyti* Ashmead, 1894. Amer. Ent. Soc., Trans. 21: 335. "♀" = ♂.

Taxonomy: Hedqvist, 1963. Studia. Forest. Suecica 11: 66-70. —Burks, 1964 (1963). Canad. Ent. 95: 1261.

Biology: Evenden, 1943. U. S. Dept. Agr., Cir. 664: 17. —Reid, 1957. Canad. Ent. 89: 6-7. —Berisford et al., 1970. Canad. Ent. 102: 489.

SUBFAMILY MEGASTIGMINAE

By E. E. GRISSELL

Genus MEGASTIGMUS Dalman

Megastigmus Dalman, 1820. Svenska Vetensk. Akad., Handl. 41: 178.Type-species: *Pteromalus bipunctatus* Swederus. Desig. by Crosby, 1913.*Trogocarpus* Rondani, 1877. Soc. Ent. Ital., Bol. 9: 204.Type-species: *Torymus ballestreri* Rondani. Monotypic.*Megalostigmus* Schulz, 1906. Spolia Hym., p. 147. Emend.*Xanthosomooides* Girault, 1913. Canad. Ent. 45: 220.Type-species: *Xanthosomooides maculatipennis* Girault. Orig. desig.*Epimegastigmus* Girault, 1915. Queensland Mus., Mem. 4: 297, 307.Type-species: *Xanthosomooides fulvipes* Girault. Orig. desig.

Nearctic species of this genus are phytophagous in rosaceous and coniferous seeds. Some European species are reported to be parasitic on Cynipidae.

Revision: Milliron, 1949. Amer. Midland Nat. 41: 257-420 (Nearctic spp.). —Boucek, 1970. Ent. Gaz. 21: 265-275 (west European spp.).

Biology: Lessmann, 1962. Ztschr. f. Angew. Ent. 49: 363-371 (immature stages). —Lessmann, 1962. Ztschr. f. Angew. Ent. 50: 233-241 (host plants).

aculeatus *aculeatus* (Swederus). Mass., N. Y., N. C., Ohio, Ill.; Europe, Iran, Japan, China.

Host: *Rosa canina*, *R. eglanteria*, *R. virginiana*, *R. palustris*?*Pteromalus Aculeatus* Swederus, 1795. Svenska Vetensk. Akad., Handl. 16: 221-222. ♀.

Taxonomy: Balduf, 1957. Ent. Soc. Amer., Ann. 50: 479-483. —Balduf, 1959. Ill. Biol. Monog. 26: 124-130 (also biology).

aculeatus nigroflavus Hoffmeyer. N. J. and Pa., south to Va., west to Ill.; Japan, Russia. Host: *Rosa eglanteria*, *R. gallica*, *R. multiflora*, *R. virginiana*.

Megastigmus aculeatus var. *nigroflavus* Hoffmeyer, 1931. Ent. Meddel. 16: 324-326. ♀, ♂.

Biology: Balduf, 1969. Ill. Biol. Monog. 26: 124-126.

albifrons Walker. Ariz., Calif. Host: *Pinus ponderosa*.*Megastigmus albifrons* Walker, 1869. Roy. Ent. Soc. London, Trans., p. 314. ♂.

Taxonomy: Burks, 1975. Brit. Mus. (Nat. Hist.) Ent., Bul. 32 (4): 151.

Biology: Keen, 1958. U. S. Dept. Agr., Tech. Bul. 1169: 102-105.

amelanchieris Cushman. N. H., Vt., N. Y., Pa., W. Va., Minn. Host: *Amelanchier canadensis*, *A. laevis* X *humilis*, *A. sanguinea*, *Sorbus aucuparia*.

Megastigmus amelanchieris Cushman, 1918 (1917). Ent. Soc. Wash., Proc. 19: 81. ♀, ♂.

Biology: Milliron, 1949. Amer. Midland Nat. 41: 363.

americanus Milliron. N. H., Ont., N. Y. Host: *Sorbus aucuparia*?*Megastigmus slossonae* Crosby, 1913. Ent. Soc. Amer., Ann. 6: 157. ♀. Nomen nudum.*Megastigmus americanus* Milliron, 1949. Amer. Midland Nat. 41: 285, 347, 349, 365. ♀, ♂.

Taxonomy: Gahan, 1951. Canad. Ent. 83: 172.

atedius atedius Walker. Ont., Colo., Calif., Europe. Host: *Picea engelmannii*?, *P. pungens*, *P. sitchensis*; *Abies arizonica*?. Introduced into Europe from No. America.

Megastigmus Atedius Walker, 1851. Ann. and Mag. Nat. Hist. 7: 214. ♀.*Megastigmus piceae* Rohwer, 1915. Canad. Ent. 47: 97-98. ♀, ♂.*Megastigmus zwolferi* Scheffer-Immell, 1957. Ztschr. f. Angew. Ent. 41: 52-57. ♀, ♂.

Taxonomy: Boucek, 1970. Ent. Gaz. 21: 265-267 (synonymy).

Biology: Keen, 1958. U. S. Dept. Agr., Tech. Bul. 1169: 106. —Hedlin, 1973. Canad. Ent. 105: 118.

atedius montana Milliron. Mont. Host: *Picea engelmannii*.*Megastigmus piceae* var. *montana* Milliron, 1949. Amer. Midland Nat. 41: 305, 347, 352. ♀, ♂.

- Biology: Keen, 1958. U. S. Dept. Agr., Tech. Bul. 1169: 106.
brevicaudis Ratzeburg. Minn. Host: *Sorbus aucuparia*.
Megastigmus brevicaudis Ratzeburg, 1852. Ichn. d. Forstins., v. 3, p. 225. ♀.
- Biology: Milliron, 1949. Amer. Midland Nat. 41: 363-365, 393, 402.
caperatus Milliron. Ont. Host: *Picea*? sp.
Megastigmus caperatus Milliron, 1949. Amer. Midland Nat. 41: 306, 347, 350. ♀.
flavipes Ashmead. Fla.
Megastigmus flavipes Ashmead, 1886. Amer. Ent. Soc., Trans. 13: 128. ♂.
floridanus Milliron. Fla.
Megastigmus floridanus Milliron, 1949. Amer. Midland Nat. 41: 342, 348, 350. ♀.
formosus Milliron. Que., Ont. Host: *Crataegus*? sp., *Rosa*? sp.
Megastigmus formosus Milliron, 1949. Amer. Midland Nat. 41: 339, 348, 350. ♀.
gahani Milliron. Minn., Mo., Colo. Host: *Physocarpus opulifolius* var. *intermedius*, *P. opulifolius* var. *luteus*?
Megastigmus gahani Milliron, 1949. Amer. Midland Nat. 41: 275, 347, 351, 365. ♀, ♂.
hoffmeyeri Walley. Que., Ont., N. Y. Host: *Abies amabilis*?; *Tsuga canadensis*.
Megastigmus spermotrophus var. *canadensis* Hoffmeyer, 1930. Ent. Meddel. 17: 218. ♀, ♂.
 Preocc. by Ashmead, 1887.
Megastigmus spermotrophus var. *hoffmeyeri* Walley, 1932. Canad. Ent. 64: 188. N. name.
laricis Marcovitch. N. Y. Host: *Larix laricina*.
Megastigmus laricis Marcovitch, 1914. Canad. Ent. 46: 435. ♀, ♂.
lasiocarpae Crosby. Colo., Alta., B. C., Wash. Host: *Abies amabilis*, *A. lasiocarpa*.
Megastigmus lasiocarpae Crosby, 1913. Ent. Soc. Amer., Ann. 6: 163. ♀, ♂.
Biology: Keen, 1958. U. S. Dept. Agr., Tech. Bul. 1169: 105.
melanus Milliron. Mich.?
Megastigmus melanus Milliron, 1949. Amer. Midland Nat. 41: 302, 347, 351. ♀.
milleri Milliron. B. C., Calif. Host: *Abies grandis*, *A. magnifica* var. *shastensis*.
Megastigmus milleri Milliron, 1949. Amer. Midland Nat. 41: 323, 344, 347, 352. ♀, ♂.
Taxonomy: Hussey and Klingler, 1954. Ent. Monthly Mag. 90: 198-201.
Biology: Keen, 1958. U. S. Dept. Agr., Tech. Bul. 1169: 106.
nigrovariegatus Ashmead. N. S. to Va., w. to Alaska, Calif. Host: *Rosa acicularis*, *R. acicularis* var. *engelmannii*, *R. arkansana*, *R. blanda*, *R. californica*, *R. canina*, *R. carolina*, *R. eglanteria*, *R. lunellii*, *R. macounii*, *R. palustris*, *R. pyrifera*, *R. rugosa*, *R. setigera*, *R. spaldingii*, *R. spinosissima*, *R. suffulta*, *R. ultramontana*, *R. virginiana*, *R. woodsii*, *R. xanthina*.
Megastigmus nigrovariegatus Ashmead, 1890. Colo. Biol. Assoc., Bul. 1: 26, 45. ♀.
Taxonomy: Balduf, 1945. Ent. Soc. Wash., Proc. 47: 185-198. —Milliron, 1949. Amer. Midland Nat. 41: 373-390. —Balduf, 1957. Ent. Soc. Amer., Ann. 50: 478-483. —Balduf, 1959. Ill. Biol. Monog. 26: 130-145. —Boucek, 1971. Ent. Gaz. 22: 43-46.
physocarpae Crosby. Que., Ont., Mich., Ind., Minn., Mo., Idaho. Host: *Physocarpus opulifolius*, *P. opulifolius* var. *intermedius*.
Megastigmus physocarpi Crosby, 1913. Ent. Soc. Amer., Ann. 6: 158. ♀, ♂.
Biology: Milliron, 1949. Amer. Midland Nat. 41: 365-366.
pinus marginatus Hoffmeyer. Oreg. Host: *Abies grandis*.
Megastigmus pinus var. *marginatus* Hoffmeyer, 1930. Ent. Meddel. 17: 216. ♂.
pinus pinus Parfitt. Conn., Colo., Wash., Oreg., Nev., Calif.; Scotland. Host: *Abies amabilis*, *A. concolor*, *A. grandis*, *A. lasiocarpa*, *A. magnifica*, *A. magnifica* var. *shastensis*, *A. nobilis*, *A. venusta*, *Picea sitchensis*?; *Thuja plicata*?
Megastigmus Pinus Parfitt, 1857. Zoologist 15: 5543. ♀.

Biology: Laidlaw, 1931. Scot. Forestry Jour. 45: 179-184. —Hussey and Klingler, 1954. Ent. Monthly Mag. 90: 198-201 (*pinus* Parfitt and var. *crosbyi* Hoffmeyer). —Keen, 1958. U. S. Dept. Agr., Tech. Bul. 1169: 106-108. —Hussey, 1959. Ent. Monthly Mag. 95: 237.

rafni Hoffmeyer. Colo., N. Mex., Idaho, B. C., Oreg., Calif. Host: *Abies concolor*, *A. grandis*, *A. magnifica*, *A. magnifica* var. *shastensis*, *Pseudotsuga taxifolia*?
Megastigmus rafni Hoffmeyer, 1928. Ent. Meddel. 16: 331. ♀.

Taxonomy: Hoffmeyer, 1930. Ent. Meddel. 17: 216-217.

Biology: Keen, 1958. U. S. Dept. Agr., Tech. Bul. 1169: 108-110.

specularis Walley. N. B., N. H., Mass?, Conn?, Minn., Man., Sask. Host: *Abies balsamea*.

Megastigmus specularis Walley, 1932. Canad. Ent. 64: 187. ♀, ♂.

Megastigmus groenblomi Kangas, 1945. Ann. Ent. Fenn. 11: 177-183. ♀, ♂.

Taxonomy: Boucek, 1970. Ent. Gaz. 21: 267-268 (synonymy).

Biology: Hedlin, 1957 (1956). Canad. Ent. 88: 691-697. —Annala, 1970. Ann. Ent. Fenn. 36: 186-190 (European hosts).

spermotrophus nigrodorsatus Milliron. Calif. Host: *Pseudotsuga macrocarpa*.

Megastigmus spermotrophus var. *nigrodorsatus* Milliron, 1949. Amer. Midland Nat. 41: 316, 346, 353. ♀, ♂.

Biology: Keen, 1958. U. S. Dept. Agr., Tech. Bul. 1169: 111.

spermotrophus spermotrophus Wachtl. Colo., N. Mex., B. C., Wash., Oreg., Calif.; Scotland, Germany, New Zeal. Host: *Pseudotsuga taxifolia*, *P. menziesii*; *Abies*? spp.

Megastigmus spermotrophus Wachtl, 1893. Wien. Ent. Ztg. 12: 25. ♀, ♂.

Megastigmus spermatocephalus Dalla Torre, 1898. Cat. Hym., v. 5, p. 287. Emend.

Biology: Crosby, 1909. N. Y. (Cornell) Agr. Expt. Sta., Bul. 265: 379-380. —Miller, 1916. Jour. Agr. Res. 6: 65-68. —Milliron, 1949. Amer. Midland Nat. 41: 367-368, 390-391. —Hussey, 1955. Roy. Ent. Soc. London, Trans. 106: 133-151. —Hedlin, 1958. Ent. Soc. B. C., Proc. 55: 37. —Keen, 1958. U. S. Dept. Agr., Tech. Bul. 1169: 110-111. —Hussey, 1959. Ent. Monthly Mag. 95: 237.

tsugae heterophyllae Milliron. B. C. Host: *Tsuga heterophylla*.

Megastigmus tsugae var. *heterophyllae* Milliron, 1949. Amer. Midland Nat. 41: 309, 347, 353. ♀, ♂.

Biology: Keen, 1958. U. S. Dept. Agr., Tech. Bul. 1169: 111.

tsugae tsugae Crosby. Western U. S. Host: *Abies amabilis*?; *Tsuga mertensiana*.

Megastigmus tsugae Crosby, 1913. Ent. Soc. Amer., Ann. 6: 162. ♀.

Biology: Keen, 1958. U. S. Dept. Agr., Tech. Bul. 1169: 111.

Genus EUMEGASTIGMUS Hussey

Eumegastigmus Hussey, 1956. Roy. Ent. Soc. London, Proc., Ser. B: Taxonomy 25: 157.
 Type-species: *Eumegastigmus hypogea* Hussey. Orig. desig.

transvaalensis Hussey. Calif.; S. Africa, Canary Isls. Host: *Schinus molle* seeds.

Eumegastigmus transvaalensis Hussey, 1956. Roy. Ent. Soc. London, Proc., Ser. B:
 Taxonomy 25: 161. ♀, ♂.

Biology: Harper and Lockwood, 1961. Calif. Dept. Agr., Bul. 50: 129.

SUBFAMILY PODAGRIONINAE

By E. E. GRISSELL

Members of this subfamily are parasitic in mantid egg cases.

Taxonomy: Ferriere, 1955. Soc. Roy. Ent. de Belg., Mem. 27: 207. —Burks, 1958. In
 Krombein, et al., U. S. Dept. Agr., Agr. Monog. 2, Sup. 1: 82. —Habu, 1962. Faun. Jap.,
 Chalcid., Leucospid., Podagrionid., p. 178.

Genus PODAGRION Spinola

Podagrion Spinola, 1811. Paris Mus. d'Hist. Nat., Ann. 17: 147.

Type-species: *Podagrion splendens* Spinola. Monotypic.

Palmon Dalman, 1825. Svenska Vetensk. Akad., Handl. 56: 388.

Type-species: *Palmon bellator* Dalman. Desig. by Gahan and Fagan, 1923.

Priomerus Walker, 1833. Ent. Mag. 1: 116, 118.

Type-species: *Priomerus pachymerus* Walker. Monotypic.

Pachytomus Westwood, 1847. Ent. Soc. London, Trans. 4: 260.

Type-species: *Pachytomus klugianus* Westwood. Monotypic.

Notopodium Dahlbom, 1857. Ofvers. Svenska Vetensk. Akad., Forh. 14: 295.

Type-species: *Podagrion splendens* Spinola. Desig. by Gahan and Fagan, 1923.

Bactyrischion Costa, 1857. Accad. della Sci. Fis. e Mat. Napoli, Mem. (A) 2: 223.

Type-species: *Bactyrischion bicoloratum* Costa. Monotypic.

Blephonira Holmgren, 1868. Eug. Resa, Zool., 6, Ins. 1: 438.

Type-species: *Blephonira fulvipes* Holmgren. Monotypic.

Cyanostola Saussure, 1890. In Grandpidier, Hist. Madagascar 20, Hym. 1, pl. 15, fig. 30.

Type-species: *Cyanostola coerulea* Saussure. Monotypic.

Notopodium Schulz, 1906. Spolia Hym., p. 144. Emend.

Podagrion Schulz, 1906. Spolia Hym., p. 150. Emend.

Podagrionella Girault, 1913. Arch. f. Naturgesch. 79 (A) pt. 6: 96.

Type-species: *Podagrionella bella* Girault. Monotypic.

Pachytomoidella Girault, 1913. Wis. Nat. Hist. Soc., Bul. 11: 40.

Type-species: *Pachytomoidella magniclavus* Girault. Orig. desig.

Propodagrion Girault, 1915. Queensland Mus., Mem. 4: 287.

Type-species: *Propodagrion worcesteri* Girault. Orig. desig.

Propachytomoides Girault, 1917. Insecutor Inscitiae Menstruus 5: 152.

Type-species: *Propachytomoides semialbiclavus* Girault. Orig. desig.

Taxonomy: Ferriere, 1955. Soc. Roy. Ent. de Belg., Mem. 27: 216.

brasiliense Howard. Fla.; W. Indies. Host: Mantid egg mass.

Podagrion brasiliensis Howard, 1894. Linn. Soc. London, Jour., Zool. 25: 83. ♀.

Taxonomy: Gahan, 1951. Canad. Ent. 83: 176.

crassiclava Gahan, Fla., Tex., Ariz.; Mexico. Host: *Mantis* sp., *Stagmomantis limbata* (Hahn).

Podagrion crassiclava Gahan, 1922. U. S. Natl. Mus., Proc. 61 (24): 6. ♀, ♂.

mantidiphagum Girault. Ariz.; Mexico, W. Indies. Host: Egg mass of undet. mantid.

Podagrion mantidiphagum Girault, 9117. Entomologist 50: 37. ♀, ♂.

mantis Ashmead. N. J. to Fla., w. to Mo., La., Kans., Tex., Ariz., Calif.; Mexico, Hawaii. Host: *Stagmomantis carolina* (Johan.), *S. limbata* (Hahn)?, *Tenodera angustipennis* Sauss., *T. aridifolia sinensis* Sauss.

Podagrion mantis Ashmead, 1886. Canad. Ent. 18: 57. ♀.

Biology: Breland, 1941. Ent. Soc. Amer., Ann. 34: 99-133. —Gurney, 1959. Ent. Soc. Wash.,

Proc. 61: 23.

UNPLACED TAXA OF TORYMINAE

By E. E. GRISSELL

Diomorus biorhizae Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 186. ♀. Ont. Host: *Xanthoteras quercusforticorne* (Walsh).

Taxonomy: Burks, 1967. In Krombein, et al., U. S. Dept. Agr., Agr. Monog. 2, Sup. 2: 250

(Probably a species of *Torymus*; type apparently lost).

Lochites punctata Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 185. ♂. Fla.

Family PTEROMALIDAE

By B. D. BURKS

This is the largest and most difficult family of the Chalcidoidea. Almost all species are parasitic, but a very few are gall formers, a few are phytophagous, and some others should be considered to be predaceous. The latter feed, as larvae, on a succession of eggs or larvae of their prey, while enclosed within stems of grasses or other herbaceous plants.

Revision: Kurdjumov, 1913. Ent. Obozr. 13: 1-24 (genera). —Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 1-908 (British and North Western European species, with numerous North American forms considered).

Taxonomy: Ashmead, 1904. Carnegie Mus., Mem. 1: 270-285, 311-334. —Girault, 1913-1915. Queensland Mus., Mem. 2: 303-334; 3: 313-346; 4: 185-202. —Boucek, 1957. In Kratochvil, Klíč, Zvireny CSR, v. 2, pp. 220-242 (Eng. transl., 1964.. Ent. Soc. Canada, Mem. 34: 26-58). —Riek, 1970. In CSIRO, Ins. Australia, pp. 920-923.

SUBFAMILY ORMYRINAE

Genus MONOBAEUS Foerster

Monobaeus Foerster, 1860. Naturh. Ver. Rheinlande, Verh. 17: 95.

Type-species: *Monobaeus cingulatus* Foerster. Desig. by Ashmead, 1904.

hegeli Girault. Mich.

Monobaeus hegeli Girault, 1917. Ent. News 28: 106. ♀.

Genus ORMYRUS Westwood

Ormyrus Westwood, 1832. London, Edinb. and Dublin Phil. Mag. and Jour. Sci. (3) 1: 127.

Type-species: *Ormyrus punctiger* Westwood. Monotypic.

Periglypus Boheman, 1833. Svenska Vetensk. Akad., Handl. 54: 378.

Type-species: *Periglypus gastris* Boheman. Monotypic.

Siphonura Nees, 1834. Hym. Ichn. Aff. Monog., v. 2, p. 81.

Type-species: *Siphonura variolosa* Nees. Desig. by Gahan and Fagan, 1923.

Cyrtosoma Perris, 1840. Soc. Ent. de France, Ann. 9: 96.

Type-species: *Cyrtosoma papaveris* Perris. Monotypic.

Wania Risbec, 1951. Inst. Franc. d'Afr. Noire, Mem. 13: 294.

Type-species: *Wania ornata* Risbec. Monotypic.

brunneipes Provancher. Que., Ont., s. to Fla., w. to Mich. and Ill. Ecology: Emerges from bud galls of *Acraspis erinacei* (Beut.) on *Quercus alba*; from twig galls of *Callirhytis quercusventricosa* (Bass.), *Disholcaspis bassetti* (Gil.), and *D. quercusmamma* (Walsh) on *Quercus* spp.; from stem galls of *Aulacidea podagrae* (Bass.) on *Lactuca* sp.; from stem galls of *Diastrophus nebulosus* (O. S.) on *Rubus* sp.

Ormyrus brunneipes Provancher, 1887 (May). Addit. Corr. Faune Ent. Canada Hym., p. 198. ♀.

Ormyrus ventricosus Ashmead, 1887 (Nov.). Amer. Ent. Soc., Trans. 14: 189. ♂.

Taxonomy: Burks, 1964 (1963). Canad. Ent. 95: 1259 (syn.).

Biology: Triggerson, 1914. Ent. Soc. Amer., Ann. 7: 8-9.

distinctus Fullaway. Calif. Ecology: Emerges from twig or stem gall made by *Disholcaspis simulata* Kins. on *Quercus dumosa*.

Ormyrus distinctus Fullaway, 1912. N. Y. Ent. Soc., Jour. 20: 276. ♀.

dryorhizoxeni Ashmead. Fla. Ecology: Emerges from fig-shaped root gall of *Belonocnema treatae* Mayr on *Quercus virginiana*.

Ormyrus dryorhizoxeni Ashmead, 1885. Amer. Ent. Soc., Trans. 12: Proc. p. xiv. ♀.

labotus Walker. Fla. Ecology: Emerges from twig galls made by *Callirhytis difficilis* (Ashm.) and *Disholcaspis quercusvirens* (Ashm.) on *Quercus*.

Ormyrus labotus Walker, 1843. Soc. Ent. de France, Ann. (2) 1: 148. ♀, ♂.

Ormyrus andricus Ashmead, 1886. Amer. Ent. Soc., Trans. 13: 128. ♀.

Taxonomy: Burks, 1975. Brit. Mus. (Nat. Hist.) Ent., Bul. 32: 153 (syn.; lectotype designated).

minutus Ashmead. N. J., Fla., Mich. Ecology: Emerges from leaf petiole gall of *Neuroterus noxiosus* (Bass.) on *Quercus* spp.

Ormyrus minutus Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 189. ♀, ♂.

quercipilulae (Fitch). Maine, N. Y., N. J. Ecology: Emerges from oak leaf gall of *Acraspis pezomachoides* (O. S.).

Pteromalus Querci-pilulae Fitch, 1859 (1858). N. Y. State Agr. Soc., Trans. 18: 819.

quercus Ashmead. Fla. Ecology: Emerges from twig gall of *Callirhytis quercusbataoides* (Ashm.) on *Quercus virginiana*.

Ormyrus quercus Ashmead, 1886. Amer. Ent. Soc., Trans. 14: 128. ♀, ♂.

rosae Ashmead. N. J., s. to Fla., w. to Kans., and Colo. Ecology: Emerges from leaf gall of *Diplolepis ignota* (O. S.) on *Rosa*.

Ormyrus rosae Ashmead, 1885. Amer. Ent. Soc., Trans. 12: Proc. p. xiv. ♀.

thymus Girault. Calif.

Ormyrus thymus Girault, 1917. Brooklyn Ent. Soc., Bul. 12: 87. ♀.

unifasciatipennis Girault. Calif.

Ormyrus unifasciatipennis(!) Girault, 1917. Brooklyn Ent. Soc., Bul. 12: 87. ♀.

unimaculatipennis Girault. La.

Ormyrus unimaculatipennis Girault, 1916. Canad. Ent. 48: 342. ♀.

vacciniicola Ashmead. Maine, Ont., s. to N. C. Ecology: Emerges from stem gall of *Hemadas nubilipennis* (Ashm.) on *Vaccinium*.

Ormyrus vacciniicola Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 189. ♀.

Biology: Driggers, 1927. N. Y. Ent. Soc., Jour. 35: 254-258. —McAlister and Anderson, 1932. Jour. Econ. Ent. 25: 1165-1169. —Judd, 1959. Amer. Micros. Soc., Trans. 78: 213-214.

SUBFAMILY PERILAMPINAE

Taxonomy: Riek, 1966. Austral. Jour. Zool. 14: 1207-1236 (subfam. of Pteromalidae).

Genus SUPERILAMPUS Walker

Euperilampus Walker, 1871. Notes on Chalcid., pt. 4, p. 67.

Type-species: *Perilampus gloriae* Walker. Orig. desig.

Taxonomy: Burks, 1969. Ent. Soc. Wash., Proc. 71: 78-79.

krombeini Burks. N. Mex., Ariz. Superficially looks much like a chrysitid.

Euperilampus krombeini Burks, 1969. Ent. Soc. Wash., Proc. 71: 79. ♀, ♂.

triangularis (Say). Que., Maine, s. to Fla., w. to Kans., Colo.

Perilampus triangularis Say, 1828. Contrib. Maclur. Lyc. Phila. 1: 78.

Taxonomy: Glover, 1878. U. S. Dept. Agr., Ann. Rpt. for 1877, p. 101. —Crawford, 1914. Ent. Soc. Wash., Proc. 16: 69.

Morphology: Burks, 1938. Ent. Soc. Amer., Ann. 31: 161 (venation).

Genus PERILAMPUS Latreille

Perilampus Latreille, 1809. Gen. Crust. Ins., v. 4, p. 30.

Type-species: *Diplolepis violacea* Fabricius. Desig. by Latreille, 1810.

Cinipsillum Lamarck, 1817. Hist. Nat. Anim. sans Vert., v. 4, p. 156.

Type-species: *Chalcis violacea* Panzer. Desig. by Gahan and Fagan, 1923.

Cynipsillum Agassiz, 1845. Nomencl. Zool., Index Univ., p. 325. Emend.

The species described as *Perilampus alexinus* Walker is Chalcididae, genus *Brachymeria* Westwood (Burks, 1975, Brit. Mus. (Nat. Hist.) Ent., Bul. 32: 164).

Revision: Smulyan, 1936. U. S. Natl. Mus., Proc. 83: 369-412. —Steffan, 1952. Soc. Ent. de France, Bul. 57: 68-74 (Palearctic spp.).

anomocerus Crawford. N. C., Colo., Idaho.

Perilampus anomocerus Crawford, 1914. Ent. Soc. Wash., Proc. 16: 72. ♀, ♂.

canadensis Crawford. Que., Ont., N. Y., Pa., Md., Va., Minn., La. Host: *Ectemnius (Hypocrabro) continuus* (F.), *E. (H.) stirpicola* (Pack.), *E. (H.) paucimaculatus* (Pack.), *Eupililis* sp.

Perilampus canadensis Crawford, 1914. Ent. Soc. Wash., Proc. 16: 74. ♀, ♂.

Biology: Krombein, 1960. Ent. News 71: 32, 66. —Harman and Kulman, 1962. Jour. Econ. Ent. 55: 1007. —Krombein, 1964. Biol. Soc. Wash., Proc. 77: 101-102.

carinifrons Crawford. Wis., Tex.

Perilampus carinifrons Crawford, 1914. Ent. Soc. Wash., Proc. 16: 71. ♀, ♂.

carolinensis Smulyan. Vt., Conn., N. Y., N. J., Va., N. C.

Perilampus carolinensis Smulyan, 1936. U. S. Natl. Mus., Proc. 83: 376. ♀, ♂.

chrysopae Crawford. Que., Ont., s. to Fla., w. to Wash., Oreg., Calif.; Mexico. Host: *Chrysopa* sp., *C. californica* Coq., *C. oculata* Say, *C. rufilabris* Burm., *Synpherobius angustus* (Banks). May also parasitize ichneumonid primary parasites of Chrysopidae.

Perilampus chrysopae Crawford, 1914. Ent. Soc. Wash., Proc. 16: 73. ♀, ♂.

Perilampus chrysopae var. *laeviceps* Crawford, 1917 (1916). Insecutor Inscitiae Menstruus 4: 144. ♀, ♂.

Taxonomy: Kerrich, 1958. Opusc. Ent. 23: 82 (difficult to separate from Palearctic sp.).

Biology: Smith, 1917. Psyche 24: 66-68. — Parker, 1924. Soc. Ent. de France, Ann. 93: 275.

— Clancy, 1946. Univ. Calif. Pubs., Ent. 7: 440-448.

crawfordi Smulyan. N. Y., N. J., Pa., Md., Va.

Perilampus crawfordi Smulyan, 1936. U. S. Natl. Mus., Proc. 83: 384. ♀, ♂.

fulvicornis Ashmead. Que., s. to Fla., w. to B. C. and Calif. Host: *Zenillia* sp.; *Agathis acrobasisidis* (Cush.), *A. pini* Mues., *Apanteles* sp., *A. cacoeciae* Riley, *A. epinotiae* Vier., *Ascogaster* sp., *A. quadridentata* Wesm., *Bracon variabilis* (Prov.), *Calliphialtes grapholithae* (Cress.), *Macrocentrus pallisteri* DeG., *Meteorus* sp., *M. trachynotus* Vier., *Orgilus maculiventris* (Cress.), *Parasierola punctaticeps* Kief., *Phanerotoma fasciata* Prov., *P. tibialis* (Hald.), *Pimplopterus inconstans* (Cush.), *Temelucha cooki* (Weed).

Perilampus(!) fulvicornis Ashmead, 1886. Amer. Ent. Soc., Trans. 13: 126. ♂.

Taxonomy: Peck, 1963. Canad. Ent., Sup. 30: 517. — Finlayson, 1967. Canad. Ent. 99: 1261 (larva).

Biology: Nickels et al., 1950. U. S. Dept. Agr., Tech. Bul. 1011: 20-21. — Judd, 1952. Nova Scotia Inst. Sci., Proc. 22: 2. — Raizenne, 1952. Canad. Div. Forest Biol., Forest Lep. South. Ont. and Par., p. 170. — Miller, 1953. Ohio Jour. Sci. 53: 62-63. — Miller, 1955. Ohio Jour. Sci. 55: 317-319. — Miller and Neiswander, 1956. Ohio Agr. Expt. Sta., Res. Bul. 779: 19. — Schaffner, 1959. U. S. Dept. Agr., Misc. Pub. 767: 87. — Beique, 1960. Canad. Ent. 92: 859. — Bennett, 1961. Tenn. Acad. Sci., Jour. 36: 353. — Harman and Kulman, 1962. Jour. Econ. Ent. 55: 1007. — Guajardo and Ortiz, 1966. Soc. Nuevoleon Hist. Nat., Bol. 1: 45.

gahani Smulyan. Colo., N. Mex.

Perilampus gahani Smulyan, 1936. U. S. Natl. Mus., Proc. 83: 401. ♂.

granulosus Crawford. N. J., s. to Ala., w. to Kans. and Tex. Host: *Ancylis comptana fragariae* W. and R., *Gnorimoschema operculella* (Zell.). Almost certainly a secondary parasite of these hosts.

Perilampus granulosus Crawford, 1914. Ent. Soc. Wash., Proc. 16: 73. ♀, ♂.

hyalinus Say. Que., Ont., s. to Fla., w. to B. C., and Calif. Host: *Acemyia tibialis* Coq.,

Acridomyia canadensis Snyder, *Blaeoxipha atlantis* (Ald.), *B. hunteri* (Hough), *B. kellyi* (Ald.), *B. reversa* (Ald.), *Blepharipa scutellata* (R.-D.), *Compsilura concinnata* (Meig.), *Diplostichus lophyri* (Towns.), *Helicobia rapax* (Walk.), *Lespesia euchaetiae* (Web.), *L. frenchii* (Will.), *L. melalophae* (Allen), *Mericia aldrichi* (Towns.), *M. ampela* (Walk.), *Sarcophaga* sp., *Senotainia trilineata* (V. d. W.), *Servaisia coloradensis* (Ald.); *Apanteles hyphantriae* Riley, *A. melanoscelus* (Ratz.), *Campoplex* sp., *C. validus* (Cress.), *Diprion* sp., *Hyposoter fugitivus* Say, *H. pilosulus* (Prov.), *Meteorus hyphantriae* Riley, *Microplitis croceipes* (Cress.), *Monocetus fulvus* (Nort.), *Neodiprion abbotii* (Leach), *N. lecontei* (Fitch), *N. pinetum* (Nort.), *N. pratti banksianae* Roh., *N. pratti* (Dyar), *N. swainei* Midd., *N. virginiana* Roh., *Phobocampe pallipes* (Prov.). This may be a species complex, rather than a single species; careful rearings have produced specimens, at present indistinguishable, that are either primary or secondary parasites.

Perilampus hyalinus Say, 1828. Contrib. Maclur. Lyc. Phila. 1: 79.

Perilampus Entellus Walker, 1843. Ann. and Mag. Nat. Hist. (1) 12: 103. ♀, ♂.

Perilampus cyaneus Brulle, 1846. In Lepeletier, Hist. Nat. Ins. Hym., v. 4, p. 573.

Perilampus aciculatus Provancher, 1887. Addit. Corr. Faune Ent. Canada Hym., p. 199. ♀.

- Taxonomy: Finlayson, 1963. Canad. Ent. 95: 499-501 (larvae). — Burks, 1964 (1963). Canad. Ent. 95: 1259-1260 (*aciculatus* Prov.). — Burks, 1975. Brit. Mus. (Nat. Hist.) Ent., Bul. 32: 150 (*entellus*; syn., lectotype).

- Biology: Simmonds, 1947. Bul. Ent. Res. 38: 145, 378.

stygius Provancher, Que., Maine, s. to Va., w. to Kans., La. Host: *Macrocentrus* sp.
Perilampus stygius Provancher, 1888. Addit. Corr. Faune Ent. Canada Hym., p. 406. ♀.

Taxonomy: Burks, 1964 (1963). Canad. Ent. 95: 1260.

subcarinatus Crawford, N. Y., Ala., Tex., Nebr., Colo., Idaho, Calif.

Perilampus subcarinatus Crawford, 1914. Ent. Soc. Wash., Proc. 16: 70. ♀.

Perilampus bakeri Crawford, 1914. Ent. Soc. Wash., Proc. 16: 72. ♀, ♂.

Taxonomy: Girault, 1916. Jour. Ent. and Zool. 8: 121 (syn.).

tristis Mayr. N. Y., s. to Va., w. to Mich. and Ky.; Europe. Host: *Ascogaster quadridentata*

Wesm., *Cremastus* sp.

Perilampus tristis Mayr, 1905. Zool.-Bot. Gesell. Wien, Verh. 55: 564. ♀, ♂.

Perilampus batavus van Burgst, 1919 (1918). Tijdschr. v. Ent. 61: 146.

Perilampus capitatus Smulyan, 1936. U. S. Natl. Mus., Proc. 83: 397. ♀, ♂.

Taxonomy: Ruschka, 1924. Deut. Ent. Ztschr. 1: 93 (syn.). — Steffan, 1952. Soc. Ent. de France, Bul. 57: 69, 72 (syn.).

Biology: Bergold and Ripper, 1937. Ztschr. f. Parasitenk. 9: 394-417. — Simmonds, 1944. Sci. Agr. 25: 1-30. — Jaynes and Marucci, 1947. Jour. Econ. Ent. 40: 11-12. — Geier, 1957. Rev. Suisse de Zool. 64: 514. — Zech, 1959. Ztschr. f. Angew. Ent. 44: 214. — Zwölfer, 1963. Ztschr. f. Angew. Ent. 51: 352. — Balduf, 1966. Ent. Soc. Amer., Ann. 59: 1046-1049. — Gothilf, 1969. Entomophaga 14: 199.

Morphology: Parker, 1924. Soc. Ent. de France, Ann. 93: 265, 275 (larva). — Domenichini, 1953. Univ. Milano, Bol. Zool. e Bach. 19: 229 (gaster).

Genus CHRYSOLAMPUS Spinola

Chrysolampus Spinola, 1811. Paris Mus. d'Hist. Nat., Ann. 17: 147.

Type-species: *Diplolepis splendida* Spinola. Monotypic.

Elatus Walker, 1848. List Hym. Brit. Mus., Chalcid., v. 2, pp. 104, 153.

Type-species: *Elatus thenae* Walker. Monotypic.

Lamprostylus Foerster, 1856. Hym. Stud., v. 2, p. 42 (no species).

Type-species: *Lamprostylus punctatus* Foerster. Included by Foerster, 1859.

Parelatus Girault, 1916. Queensland Mus., Mem. 5: 226.

Type-species: *Elatus ater* Girault. Orig. desig.

Revision: Crawford, 1914. Ent. Soc. Wash., Proc. 16: 74.

Taxonomy: Boucek, 1956. Mus. Natl. Pragae, Acta Ent. 1: 87-88. — Kerrich, 1958. Opusc. Ent. 33: 82.

anobii Burks. Va. Ecology: Reared from wood infested with anobiid beetles.

Chrysolampus anobii Burks, 1969. Ent. Soc. Wash., Proc. 71: 80. ♀, ♂.

lycti Crawford. W. Va. Host: *Lyctus striatus* Melsh.

Chrysolampus lycti Crawford, 1914. Ent. Soc. Wash., Proc. 16: 75. ♀, ♂.

parcipunctatus Crawford. Calif.

Chrysolampus parcipunctatus Crawford, 1914. Ent. Soc. Wash., Proc. 16: 75. ♀.

schorazi Crawford. Utah.

Chrysolampus schorazi Crawford, 1914. Ent. Soc. Wash., Proc. 16: 76. ♀.

sisymbrii (Ashmead). N. Mex.

Elatus sisymbrii Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 218. ♂.

SUBFAMILY BRACHYSCELIDIPHAGINAE

This subfamily, with numerous members in South America and Australia, has only one species in North America, and none in the Palearctic region.

Taxonomy: Gahan and Ferriere, 1947. Ent. Soc. Amer., Ann. 40: 271-302. — Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 95.

Genus HEMADAS Crawford

Hemadas Crawford, 1909. Canad. Ent. 41: 98.

Type-species: *Megorismus nubilipennis* Ashmead. Orig. desig.

Parhabritis Girault, 1917. Descr. Hym. Chalcidoïd. Variorum cum Observ. V, p. 2.

Type-species: *Megorismus nubilipennis* Ashmead. Orig. desig.

Revision: Gahan and Ferriere, 1947. Ent. Soc. Amer., Ann. 40: 292.

nubilipennis (Ashmead). Maine, Ont., Conn., N. J., Va., Fla., Ohio, Ind. Ecology: Produces stem galls on *Vaccinium* spp.

Megorismus nubilipennis Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 192. ♀.

Biology: Driggers, 1927. N. Y. Ent. Soc., Jour. 35: 253-259. — McAlister and Anderson, 1932. Jour. Econ. Ent. 25: 1164-1169. — Judd, 1959. Amer. Micros. Soc., Trans. 78: 212-214.

Morphology: Snodgrass, 1910. U. S. Natl. Mus., Proc. 39: 65.

SUBFAMILY EUTRICHOSOMATINAE

Genus EUTRICHOSOMA Ashmead

Eutrichosoma Ashmead, 1899. Ent. Soc. Wash., Proc. 4: 204 (no species).

Type-species: *Eutrichosoma mirabile* Ashmead. Desig. by Ashmead, 1904.

mirabile Ashmead. Md., D. C., Ga., Kans., Okla., Tex., N. Mex., Mont., Idaho. Host: *Auleutes tenuipes* (Lec.), *Smicronyx tychooides* (Lec.).

Eutrichosoma mirabile Ashmead, 1904. Carnegie Mus., Mem. 1: 291. ♀.

Eutrichosoma albipes Crawford, 1908 (1907). Ent. Soc. Wash., Proc. 9: 158. ♀, ♂.

Taxonomy: Gahan and Peck, 1946. Wash. Acad. Sci., Jour. 36: 315.

Biology: Pierce, 1910. Jour. Econ. Ent. 3: 453. — Pierce *et al.*, 1912. U. S. Dept. Agr., Bur. Ent. Bul. 100: 75, 79.

SUBFAMILY CLEONYMINAE

Revision: Kerrich and Graham, 1957. Soc. Brit. Ent., Trans. 12: 265-311 (British and Swedish spp., with some Nearctic spp.). — Boucek, 1959 (1958). Mus. Natl. Pragae, Acta Ent. 32: 353-386 (genera of the world). — Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 35-42 (Western European spp.).

TRIBE CLEONYMINI

Genus HEYDENIA Foerster

Heydenia Foerster, 1856. Hym. Stud., v. 2, pp. 46, 48, 49.

Type-species: *Heydenia pretiosa* Foerster. Monotypic.

Revision: Hedqvist, 1957. Opusc. Ent. 22: 39-48 (world fauna).

unica Cook and Davis. Md., Va., N. C., Ga., Ala., W. Va., Mich., Tex., Mont., Ariz., Calif. Host: *Dendroctonus* sp., *D. frontalis* Zimm., *Ips* sp., *Phloeosinus* sp., *Pityophthorus* sp., *Polygraphus* sp., *Scolytus rugulosus* (Ratz.).

Heydenia unica Cook and Davis, 1891. Mich. Agr. Expt. Sta., Bul. 73: 15. ♀, ♂.

Biology: De Leon, 1934. Canad. Ent. 66: 60 (under name *hubbardi*, nom. nud.). — Franklin, 1969. Ga. Ent. Soc., Jour. 4: 121.

Genus CLEONYMUS Latreille

Cleonymus Latreille, 1809. Gen. Crust. Ins., v. 4, p. 29.

Type-species: *Diplolepis depressa* Fabricius. Desig. by Latreille, 1810.

californicus Girault. Calif.

Cleonymus californicus Girault, 1917. Jour. Ent. and Zool. 9: 11. ♀.

nigriclavus Girault, Fla.

Cleonus nigriclavus Girault, 1917. Descr. Hym. Chalcidoid. Variorum cum Observ. III, p. 6. ♀.

TRIBE CHALCEDECTINI

Taxonomy: Steffan, 1968. Entomophaga 13: 209-211. —Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 36.

Genus CHALCEDECTUS Walker

Chalcedectus Walker, 1852. Ann. and Mag. Nat. Hist. (2): 10: 47.

Type-species: *Chalcedectus maculicornis* Walker. Monotypic.

Chalcolectus Dalla Torre, 1898. Cat. Hym., v. 5, pp. 186, 569. Emend.

Chaleedectes Ashmead, 1899. Ent. Soc. Wash., Proc. 4: 201. Emend.

Episystole Girault, 1927. So. Austral. Mus., Rec. 3: 317.

Type-species: *Episystole poetica* Girault. Orig. desig.

Neochalcolectus Masi, 1936. Soc. Ent. Ital., Bol. 68: 68.

Type-species: *Neochalcolectus sinaiticus* Masi. Monotypic.

Taxonomy: Boucek, 1959. Mus. Natl. Pragae, Acta Ent. 33: 568.

texanus Brues, Tex.

Chalcedectes texanus Brues, 1907. Wis. Nat. Hist. Soc., Bul. 5: 106. ♂.

Genus EUCHRYSSIA Westwood

Euchryssia Westwood, 1874. Thesaurus Ent. Oxon., p. 139.

Type-species: *Euchryssia cleptidea* Westwood. Desig. by Ashmead, 1904.

Revision: Girault, 1917. Brooklyn Ent. Soc., Bul. 12: 14-15.

hyalinipennis Ashmead. N. C., Fla., Mo., Tex., N. Mex., Ariz., Calif. Host: *Chrysobothris deleta* Lec., *C. mali* Horn, *Oncideres rhodosticta* Bates.

Euchryssia hyalinipennis Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 231. ♀.

maculipennis Ashmead. Calif.

Euchryssia maculipennis Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 232. ♂.

similis Girault. Kans.

Euchryssia similis Girault, 1917. Brooklyn Ent. Soc., Bul. 12: 15. ♀.

TRIBE TRIGONODERINI

Taxonomy: Hedqvist, 1968. Ent. Tidskr. 89: 35-63. —Graham, 1969. Brit. Mus. (Nat. Hist.)

Ent., Bul. Sup. 16: 98-123.

Genus EPISTENIA Westwood

Epistenia Westwood, 1832. In Griffith, Cuvier's Animal Kingdom, v. 15 (Insecta, v. 2), p. 432.

Type-species: *Epistenia coeruleata* Westwood. Monotypic.

Dasyglenes Ashmead, 1888. Canad. Ent. 20: 173, 174.

Type-species: *Dasyglenes osmiae* Ashmead. Monotypic.

Idiobia Brethes, 1927. Ent. Mitt. 16: 330.

Type-species: *Idiobia schmidti* Brethes. Monotypic.

Revision: Hedqvist, 1968. U. S. Natl. Mus., Proc. 124: 1-8.

Taxonomy: Boucek, 1959 (1958). Mus. Natl. Pragae, Acta Ent. 32: 381 (syn.).

burksi Hedqvist. Ind., Tex. Ecology: Reared from nest of twig-inhabiting aculeate.

Epistenia burksi Hedqvist, 1968. U. S. Natl. Mus., Proc. 124: 3. ♀, ♂.

coeruleata Westwood. N. Y., N. J., Va., Ga., Fla., Mo., Tex., Ariz., Nev., Calif. Host: *Ceratina* sp., *Ectemnius* sp., *Isodontia elegans* (Smith), *Leptochilus republicanus* *zendalooides*

(Robt.), *Osmia* sp., *Trypargilum* sp., *T. collinum rubrocinctum* (Pack.), *T. tridentatum* (Pack.).

Epistenia coeruleata Westwood, 1832. In Griffith, Cuvier's Animal Kingdom, v. 15 (Insecta, v. 2), p. 432.

Dasyglenes osmiae Ashmead, 1888. Canad. Ent. 20: 174. ♀.

Biology: Krombein, 1959. Ent. News 70: 19.

media Hedqvist. N. Y., Tex., Nev., Calif.

Epistenia media Hedqvist, 1968. U. S. Natl. Mus., Proc. 124: 5. ♀, ♂.

odyneri Ashmead. Ga., Mich., N. Mex., Ariz., Calif. Host: *Leptochilus rufobasilaris* (Ashm.).

Epistenia odyneri Ashmead, 1896. In Davidson, Psyche 7: 336. ♀.

polita (Say). D. C., V.a, N. C., Ga., Fla.

Spalangius! *politus* Say, 1828. Contrib. Maclur. Lyc. Phila. 1: 79. ♀.

Taxonomy: Gahan, 1951. Canad. Ent. 83: 174 (reasons for placing in *Epistenia*).

regalis Cockerell. Colo. Ecology: Reared from nest of *Odynerus*. This is probably a synonym of *coeruleata* Westwood.

Epistenia regalis Cockerell, 1934. Psyche 41: 228. ♀.

Genus PTINOBIUS Ashmead

Ptinobius Ashmead, 1896. Ent. Soc. Wash., Proc. 4: 11.

Type-species: *Charitopus magnificus* Ashmead. Monotypic.

Megormyrus Cockerell, 1926. Psyche 33: 36.

Type-species: *Megormyrus amabilis* Cockerell. Monotypic.

Revision: Rohwer, 1919. Ent. Soc. Wash., Proc. 21: 4-6.

Taxonomy: Boucek, 1959 (1958). Mus. Natl. Pragae, Acta Ent. 32: 363.

agrili Rohwer. Calif. Host: *Agrilus angelicus* Horn.

Ptinobius agrili Rohwer, 1919. Ent. Soc. Wash., Proc. 21: 5. ♀, ♂.

amabilis (Cockerell). Colo. Host: *Hoplitis producta* (Cress.), *Stelis* sp., *S. sexmaculata* Ashm.

Megormyrus amabilis Cockerell, 1926. Psyche 33: 37. ♀.

californicus Crawford. Calif.

Ptinobius californicus Crawford, 1917 (1916). Insecutor Inscitiae Menstruus 4: 142. ♀.

magnificus (Ashmead). Que., N. J., W. Va., Va., Kans., Tex. Host: *Agrilus ruficollis* (F.).

Amphicerus bicaudatus (Say), *Lixus scrobicollis* Boh., *Tessaropa tenuipes* (Hald.).

Charitopus magnificus Ashmead, 1888. Kans. Agr. Expt. Sta., Bul. 3: App. p. IV. ♀.

Ptinobius dysphagae Girault, 1915. Ent. News 26: 130. ♂.

Taxonomy: Girault, 1917 (1916). Insecutor Inscitiae Menstruus 4: 142, 144.

Biology: Hopkins, 1891. W. Va. Agr. Expt. Sta., Bul. 15: 84.

texanus Crawford. Tex. Host: *Araceerus fasciculatus* (Deg.).

Ptinobius texanus Crawford, 1917 (1916). Insecutor Inscitiae Menstruus 4: 142. ♀, ♂.

Genus PLATYGERRHUS Thomson

Platygerrhus Thomson, 1878. Hym. Scand., v. 5, pp. 4, 13.

Type-species: *Platygerrhus gracilis* Thomson. Monotypic.

Taxonomy: Kerrich and Graham, 1957. Soc. Brit. Ent., Trans. 12: 300-303. —Hedqvist, 1968.

Ent. Tidskr. 89: 36-39. —Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 108-122.

algonquina (Girault). Que., N. H., Conn., Ill.

Trigonoderus algonquina Girault, 1917. Ent. News 28: 396. ♀.

americanus Hedqvist. Ariz., Alaska, Calif.

Platygerrhus americanus Hedqvist, 1968. Ent. Tidskr. 89: 38. ♀.

Genus PLUTOOTHRIX Foerster

Plutothrix Foerster, 1856. Hym. Stud., v. 2, pp. 46, 49. No species.

Type-species: *Plutothrix foersteri* Mayr. Desig. by Mayr, 1904 by subsequent reference.

Anoglyphis Foerster, 1878. Naturh. Ver. Rheinlande, Verh. 35: 49.

Type-species: *Anoglyphis nubilosa* Foerster. Orig. desig.

unguttus (Girault). Que., Ont., N. H., Conn., N. Y., N. J., Md., D. C., Va., Ga., Ill., Mo., Nebr., Tex. Ecology: Parasitizes Coleoptera living in shelf fungi. Host: *Diaperis* sp., *Euparius marmoreus* Oliv., *Thymalus* sp.

Trigonoderus unguttus Girault, 1917. Ent. News 28: 396. ♀.

Taxonomy: Hedqvist, 1968. Ent. Tidskr. 89: 42.

Biology: Graves, 1960. Ent. Soc. Amer., Ann. 53: 74.

Genus TRIGONODERUS Westwood

Trigonoderus Westwood, 1832. London, Edinb., and Dublin Phil. Mag. and Jour. Sci. (3) 1: 127.

Type-species: *Trigonoderus princeps* Westwood. Monotypic.

Pterolyicus Ratzeburg, 1848. Ichn. d. Forstins., v. 2, p. 208.

Type-species: *Pteromalus (Pterolyicus) brandtii* Ratzeburg. Desig. by Gahan and Fagan, 1923.

Revision: Girault, 1917. Ent. News 28: 396-397.

aegeriae Ashmead. Fla.

Trigonoderus aegeriae Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 192. ♀.

Taxonomy: Hedqvist, 1968. Ent. Tidskr. 89: 46 (may belong in *Habrocytus*).

irvingi Girault. Colo.

Trigonoderus irvingi Girault, 1917. Deser. Hym. Chalcidoid. Variorum cum Observ. V, p. 15. ♀.

nonstylatus Girault. Calif.

Trigonoderus nonstylatus Girault, 1917. Ent. News 28: 396. ♀.

Taxonomy: Hedqvist, 1968. Ent. Tidskr. 89: 44 (prob. belongs elsewhere).

Genus OGLOBLINISCA Hedqvist

Ogloblinisca Hedqvist, 1968. Ent. Tidskr. 89: 50.

Type-species: *Ogloblinisca maculata* Hedqvist. Orig. desig.

americana Hedqvist. Ont., Maine, Mass., Md., N. C., S. C.

Ogloblinisca americana Hedqvist, 1968. Ent. Tidskr. 89: 54. ♀, ♂.

Genus JANSSONIELLA Kerrich

Janssoniella Kerrich, 1957. In Kerrich and Graham, Soc. Brit. Ent., Trans. 12: 303.

Type-species: *Janssoniella caudata* Kerrich. Orig. desig.

caudata Kerrich. N. J., Idaho, B. C., Calif., Europe. Ecology: Reared from bracket fungi infested with Coleoptera. Host: *Cis* sp.

Janssoniella caudata Kerrich, 1957. In Kerrich and Graham, Soc. Brit. Ent., Trans. 12: 304. ♀.

intermedia Hedqvist. B. C.; Europe.

Janssoniella intermedia Hedqvist, 1968. Ent. Tidskr. 89: 57, 58. ♀.

Genus GASTRACANTHUS Westwood

Gastracanthus Westwood, 1833. Mag. Nat. Hist. 6: 121.

Type-species: *Gastracanthus pulcherrimus* Westwood. Monotypic.

Hetrozys Westwood, 1833. Mag. Nat. Hist. 6: 495. N. name, unnecessarily proposed.

Etrozys Foerster, 1956. Hym. Stud., v. 2, pp. 66, 71. Emend.

Aetrozys Walker, 1872. Notes on Chalcid., p. 110. Emend.

Photismus Thomson, 1878. Hym. Scand., v. 5, pp. 4, 15.

Type-species: *Photismus nubilosus* Thomson. Monotypic.

Heteroxys Dalla Torre, 1898. Cat. Hym., v. 5, p. 101. Emend.
conicus (Girault). Que., Ont., Maine, N. Y., N. J., Md., Ind., B. C.
Trigonoderus conicus Girault, 1917. Ent. News 28: 396. ♀.
 Taxonomy: Kerrich and Graham, 1957. Soc. Brit. Ent., Trans. 12: 283-284. — Boucek, 1959
 (1958). Mus. Natl. Pragae, Acta Ent. 32: 365.

SUBFAMILY COLOTRECHNINAE

Taxonomy: Boucek, 1957. In Kratochvil, Klic Zvireny CSR 2: 232 (tribe). — Boucek, 1964.
 Canad. Ent., Mem. 34: 41 (subfamily). — Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul.
 Sup. 16: 850.

Genus COLOTRECHNUS Thomson

Genus COLOTRECHNUS Subgenus COLOTRECHNUS Thomson

Colotrechnus Thomson, 1878. Hym. Scand., v. 5, p. 46.

Type-species: *Colotrechnus subcoeruleus* Thomson. Monotypic.

The typical subgenus does not occur in North America.

Genus COLOTRECHNUS Subgenus ZANONIA Masi

Zanonia Masi, 1921. Genova Mus. Civ. Stor. Nat., Ann. (3) 9: 184.

Type-species: *Zanonia viridis* Masi. Monotypic.

Taxonomy: Masi, 1922. Soc. Ent. Ital. Bol. 54: 111 (closely rel. to *Colotrechnus* Thomson). — Delucchi, 1956. Ztschr. f. Angew. Ent. 39: 233 (syn. of *Colotrechnus* Thomson). — Burks, 1958. Fla. Ent. 41: 13 (subg. of *Colotrechnus* Thomson).

ignotus Burks. N. C., Fla., Okla., Tex., Ariz., Calif. Ecology: Reared from heads of *Bidens* and other Compositae.

Colotrechnus (Zanonia) ignotus Burks, 1958. Fla. Ent. 41: 14. ♀, ♂.

SUBFAMILY MACROMESINAЕ

Taxonomy: Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 42.

Genus MACROMESUS Walker

Macromesus Walker, 1848. List Hym. Brit. Mus., Chalcid., pt. 2, pp. 106, 161.

Type-species: *Macromesus amphiretus* Walker. Monotypic.

Wesenbergia Kryger, 1943. Ent. Meddel. 22: 360.

Type-species: *Wesenbergia ocellata* Kryger. Orig. desig.

Taxonomy: Graham, 1959. Ent. Monthly Mag. 95: 73-78 (Macromesinae of Pteromalidae). — Hedqvist, 1960. Ent. Tidskr. 81: 140. — Boucek, 1961. Mus. Natl. Pragae, Acta Ent. 34: 57 (near Tridymini). — Hedqvist, 1963. Stud. Forest. Suecica II, pp. 57-58 (Cheiropachinae).

americanus Hedqvist. Ariz., Oreg., Calif. Host: *Cylindrocopturus longulus* (Lec.), *C. eatoni ventralis* Lec.

Macromesus americanus Hedqvist, 1960. Ent. Tidskr. 81: 140. ♀, ♂.

SUBFAMILY SPALANGIINAE

Revision: Boucek, 1963. Mus. Natl. Pragae, Acta Ent. 35: 429-512 (world fauna). — Boucek, 1965. Mus. Natl. Pragae, Acta Ent. 36: 593-602 (Ethiopian and Nearctic faunas).

Genus SPALANGIA Latreille

Spalangia Latreille, 1805. Hist. Nat. Crust. Ins., v. 13, p. 227.

Type-species: *Spalangia nigra* Latreille. Monotypic.

Prospalangia Brethes, 1915. Soc. Cient. Argentina, An. 79: 316.

Type-species: *Prospalangia platensis* Brethes. Orig. desig.

Taxonomy: Ashmead, 1894. Ent. Soc. Wash., Proc. 3: 27-37. — Richardson, 1913. Jour. Morph. 24: 515. — Masi, 1917. Novitates Zool. 24: 188-189. — Burks, 1969. Smithsn. Contrib. Zool., 2: 1-7. (types in USNM).

attae Burks. Tex.; El Salvador. **Ecology:** Occurs in debris of nests of *Atta mexicana* (Smith) and *A. texana* (Buckley).

Spalangia attae Burks, 1969. Smithsn. Contrib. Zool., 2: 1. ♀.

cameroni Perkins, N. H., Miss., La., Tex., Ariz., Calif.; Cosmopolitan. **Host:** *Anastrepha suspensa* (Loew), *Fannia femoralis* (Stein), *Haematobia irritans* (L.), *Hippelates collusor* (Towns.), *Musca domestica* (L.), *Muscina* sp., *Ophyra* sp., *Phaenicia* sp., *Stomoxys calcitrans* (L.).

Spalangia cameroni Perkins, 1910. Fauna Hawaii., Hym. Sup. 2: 656. ♀, ♂.

Spalangia muscidarum var. *terrensis* Girault, 1920. U. S. Natl. Mus., Proc. 58: 213. ♂.

Spalangia melanogaster Masi, 1940. R. Lab. Ent. Agr. Portici, Bol. 3: 295. ♂.

Spalangia atherigona Risbec, 1951. Inst. Frane. d'Afr. Noire, Mem. 13: 361. ♀, ♂.

Biology: Timberlake, 1924. Hawaii. Ent. Soc., Proc. 5: 426. — Simmonds, 1929. Agr. Jour. Fiji 2: 35. — Lever, 1934. Trop. Agr. 11: 36-37. — Sychevskaya 1963. Zool. Zhur. 42: 860. — Legner et al., 1966. Calif. Agr. 20: 11. — Legner, 1966. Jour. Econ. Ent. 59: 99. — Legner et al., 1967. Ent. Soc. Amer., Ann. 60: 462-468. — Legner and Gerling, 1967. Ent. Soc. Amer., Ann. 60: 678-691. — Legner and Olton, 1968. Ent. Soc. Amer., Ann. 61: 1306-1314. — Gerling and Legner, 1968. Ent. Soc. Amer., Ann. 61: 1436-1443. — Legner, 1969. Ent. Soc. Amer., Ann. 62: 220-226. — Wylie, 1971. Canad. Ent. 103: 1537-1544. — Wylie, 1972. Canad. Ent. 104: 209-214 (oviposition).

drosophilae Ashmead. Que. and Ont., s. to Fla., w. to B. C., s. to Calif. **Host:** *Drosophila* sp., *D. melanogaster* Meig., *Hippelates collusor* (Towns.), *Meromyza americana* Fitch, *Oscinella carbonaria* (Loew), *O. frit* (L.), *O. minor* (Ad.), *O. soror* (Macq.), *Pseudogaurax anchora* (Loew).

Spalangia drosophilae Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 199. ♀.

Biology: Lindquist, 1936. Jour. Econ. Ent. 29: 1154-1158. — Simmonds, 1944. Bul. Ent. Res. 35: 222. — Simmonds, 1946. Bul. Ent. Res. 37: 95-97. — Simmonds, 1952. Bul. Ent. Res. 43: 533-540. — Simmonds, 1953. Bul. Ent. Res. 44: 387-393, 773-778. — Simmonds, 1954. Bul. Ent. Res. 45: 527-537 (oviposition). — Simmonds, 1956. Bul. Ent. Res. 47: 361-376. — Legner et al., 1966. Ent. Soc. Amer., Ann. 59: 977-984. — Legner, 1969. Ent. Soc. Amer., Ann. 62: 220-226.

endius Walker. Ont., N. Y., N. J., Md., N. C., S. C., Fla., Nebr., Calif.; Cosmopolitan. **Host:** *Ceratitis capitata* (Wied.), *Dacus dorsalis* Hendel, *Fannia leucosticta* (Meig.), *F. scalaris* (F.), *Haematobia irritans* (L.), *Musca domestica* L., *Muscina* sp., *Ophyra* sp., *Stomoxys calcitrans* (L.), *Sarcophaga* sp.

Spalangia endius Walker, 1839. Monog. Chalcid., v. 2, p. 96. ♂.

Spalangia muscidarum var. *stomoxyiae* Girault, 1916. Soc. Ent. 31: 57. ♀.

Spalangia philippensis Fullaway, 1917. Hawaii. Ent. Soc., Proc. 3: 292. ♀, ♂.

Spalangia orientalis Graham, 1932. In Handschin, Austral. Council. Sci. and Indus. Res., Pam. 31: 21.

Biology: Lindquist, 1936. Jour. Econ. Ent. 29: 1154-1158 (*stomoxyiae*). — Legner and Brydon, 1966. Ent. Soc. Amer., Ann. 59: 638-651. — Legner and Olton, 1968. Ent. Soc. Amer., Ann. 61: 1306-1314.

erythromera Foerster. N. H., Conn., Ont., Sask.; Europe.

Spalangia erythromera Foerster, 1850. Naturh. Ver. Rheinlande, Verh. 7: 512. ♀.

Spalangia Umbellatarum Foerster, 1850. Naturh. Ver. Rheinlande, Verh. 7: 513. ♀, ♂.

Spalangia spuria Foerster, 1850. Naturh. Ver. Rheinlande, Verh. 7: 515. ♀.

Taxonomy: Boucek, 1963. Mus. Natl. Pragae, Acta Ent. 35: 466 (syn.).

haematobiae Ashmead. Ont., s. to Va., w. to Alta. and Calif.; Mexico, West Indies. **Host:**

Haematobia irritans (L.).

Spalangia haematobiae Ashmead, 1894. Ent. Soc. Wash., Proc. 3: 37. ♀.

Taxonomy: Boucek, 1963. Mus. Natl. Pragae., Acta Ent. 35: 475 (*S. impuncta* Howard, Neotropical species, a possible syn.).

nigra Latreille. N. Y., N. J., Md., Va., N. C., S. C., Ohio, Mich., Ill., Miss., Nebr., Tex., Colo., Calif.; Cosmopolitan. Host: *Haematobia irritans* (L.), *Hylemya antiqua* (Meig.), *Musca domestica* L., *Rhagoletis completa* Cress., *Stomoxys calcitrans* (L.).
Spalangia nigra Latreille 1805. Hist. Nat. Crust. Ins., v. 13, p. 288.
Spalangia hirta Haliday, 1833. Ent. Mag. 1: 334. ♀.
Spalangia rugosicollis Ashmead, 1894. Ent. Soc. Wash., Proc. 3: 36. ♀.
Spalangia museae Howard, 1911. The House Fly, p. 90. Inadvertently descr.; attrib. to Girault.

Taxonomy: Boucek, 1963. Mus. Natl. Pragae, Acta Ent. 35: 443 (syn.). —Burks, 1969. Smithson. Contrib. Zool. 2: 5 (types in USNM).

Biology: Parker and Thompson, 1928. Soc. Ent. de France, Ann. 97: 437-439. —Legner, 1969. Ent. Soc. Amer., Ann. 62: 220-226.

Morphology: Parker, 1924. Soc. Ent. de France, Ann. 93: 310-311 (larva).

nigripes Curtis. N. Y., Ill., Ark., Colo.; Cosmopolitan. Host: *Fannia leucosticta* (Meig.), *F. scalaris* (F.), *Lucilia* sp.; *Musca domestica* L.
Spalangia nigripes Curtis, 1839. Brit. Ent., v. 16, fol. 740. ♀.
Spalangia hyaloptera Foerster, 1850. Naturh. Ver. Rheinlande, Verh. 7: 509. ♀, ♂.
Spalangia formicaria Kieffer, 1905. Berlin. Ent. Ztschr. 50: 1. ♀.
Spalangia muscarum Girault, 1920. U. S. Natl. Mus., Proc. 58: 213. ♀.

Taxonomy: Boucek, 1963. Mus. Natl. Pragae, Acta Ent. 35: 461 (syn.).

nigroaenea Curtis. N. B. and Ont., s. to Va., w. to B. C. and Calif.; Cosmopolitan. Host: *Fannia* sp., *Musca domestica* L., *Muscina* sp., *Ophyra* sp., *Stomoxys calcitrans* (L.).
Spalangia nigroaenea Curtis, 1839. Brit. Ent., v. 16, fol. 740. ♂.
Spalangia homalaspis Foerster, 1850. Naturh. Ver. Rheinlande, Verh. 7: 505. ♀, ♂.
Spalangia astuta Foerster, 1851. Naturh. Ver. Rheinlande, Verh. 8: 1. ♀.
Spalangia muscidarum Richardson, 1913. Psyche 20: 38. ♀, ♂.
Spalangia sundaica Graham, 1932. In Handschin, Austral. Council Sci. and Indus. Res., Pam. 31: 22, 24. ♀, ♂.

Taxonomy: Boucek, 1963. Mus. Natl. Pragae, Acta Ent. 35: 448 (syn.). —Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 52 (syn.).

Biology: Pinkus, 1913. Psyche 20: 148-158 (*muscidarum*). —Richardson, 1913. Jour. Morph. 24: 513-549 (*muscidarum*). —Roberts, 1935. Jour. Agr. Res. 50: 493 (*muscidarum*). —Legner et al., 1967. Ent. Soc. Amer., Ann. 60: 462-468. —Legner and Olton, 1968. Ent. Soc. Amer., Ann. 61: 1306-1314.

Morphology: Burks, 1938. Ent. Soc. Amer., Ann. 31: 161 (*muscidarum*, forewing).

SUBFAMILY CEROCEPHALINAE

Revision: Gahan, 1946. U. S. Natl. Mus., Proc. 96: 349-376.

Taxonomy: Hedqvist, 1969. Ent. Soc. Wash., Proc. 71: 449-466 (key to genera).

Genus CHOETOSPILA Westwood

Choetospila Westwood, 1874. Thesaurus Ent. Oxon., p. 137, pl. 25.

Type-species: *Choetospila elegans* Westwood. Monotypic.

Chaetospila Dalla Torre, 1898. Cat. Hym., v. 5, p. 207. Emend.

Spalangiomorpha Girault, 1913. Queensland Mus., Mem. 2: 333.

Type-species: *Spalangiomorpha fasciatipennis* Girault. Orig. desig.

elegans Westwood. Que., s. to Fla., w. to B. C., s. to Calif.; Cosmopolitan. Host: *Callosobruchus chinensis* (L.), *C. maculatus* (F.), *Caulophilus oryzae* (Gyll.), *Lasiocerma serricornis* (F.), *Rhyzopertha dominica* (F.), *Sitophilus granarius* (L.), *S. linearis* (Herbst), *S. oryzae* (L.), *Stegobium paniceum* (L.). This is one of the commonest chalcidoids in the entire world; it has both winged and wingless forms, often mixed in the same lot.

Choetospila elegans Westwood, 1874. Thesaurus Ent. Oxon., p. 137. ♀.

Spalangiomorpha fasciatipennis Girault, 1913. Queensland Mus., Mem. 2: 333. ♀.

Spalangia metallica Fullaway, 1913. Hawaii. Ent. Soc., Proc. 2: 286. ♀.

Spalangia rhizopertha Risbec, 1951. Inst. Franc. d'Afr. Noire, Mem. 13: 365. ♀, ♂.

Cerocephala oryzae Risbec, 1951. Inst. Franc. d'Afr. Noire, Mem. 13: 366. ♀, ♂.

Taxonomy: Boucek, 1963. Mus. Natl. Pragae, Acta Ent. 35: 505 (syn.). —Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 61 (syn.). —Hedqvist, 1969. Ent. Soc. Wash., Proc. 71: 451 (syn.).

Biology: Bare, 1942. Jour. Econ. Ent. 35: 186. —Williams and Floyd, 1971. Jour. Econ. Ent. 64: 1407-1408.

Genus CHOETOSPILISCA Hedqvist

Choetospilisca Hedqvist, 1969. Ent. Soc. Wash., Proc. 71: 452.

Type-species: *Choetospilisca tabidooides* Hedqvist. Orig. desig.

tabida (Gahan). Md. Ecology: Thought to parasitize a cassonine beetle living in a dead tree branch.

Choetospila tabida Gahan, 1946. U. S. Natl. Mus., Proc. 96: 354. ♀, ♂.

Genus CEROCEPHALA Westwood

Cerocephala Westwood, 1832. Mag. Zool. 2: Cl. ix, pl. 4.

Type-species: *Cerocephala cornigera* Westwood. Monotypic.

Epimacrus Walker, 1833. Ent. Mag. 1: 368.

Type-species: *Epimacrus rufus* Walker. Monotypic.

Sciathera Ratzeburg, 1848. Ichn. d. Forstins., v. 2, p. 209.

Type-species: *Sciatheras trichotus* Ratzeburg. Monotypic.

Cerocephala subg. *Parasciatheras* Masi, 1917. Novitates Zool. 24: 189.

Type-species: *Cerocephala (Parasciatheras) caelebs* Masi. Monotypic.

Proamotura Girault, 1920. Insecutor Insectiae Menstruus 8: 143.

Type-species: *Proamotura aquila* Girault. Monotypic.

Taxonomy: Hedqvist, 1969. Ent. Soc. Wash., Proc. 71: 459.

dubarae Wallace. Pa. Host: *Hadrobregmus carinatus* (Say).

Cerocephala dubarae Wallace, 1959. Brooklyn Ent. Soc., Bul. 54: 84. ♀, ♂.

rufa (Walker). Ohio, Mich., Colo.; Europe. Ecology: A secondary parasite of Scolytidae. Host: *Dendrosoter* sp., *Spathius* sp.

Epimacrus rufus Walker, 1833. Ent. Mag. 1: 369. ♀.

Genus ACEROCEPHALA Gahan

Acrocephala Gahan, 1946. U. S. Natl. Mus., Proc. 96: 369.

Type-species: *Cerocephala atroviridescens* Crawford. Orig. desig.

aenigma Gahan. Calif., Oreg.

Acrocephala aenigma Gahan, 1946. U. S. Natl. Mus., Proc. 96: 371. ♀, ♂.

atroviridescens (Crawford). Colo., N. Mex., Ariz., Calif. Host: *Conophthorus edulis* Hopk., *C. flexilis* Hopk., *Cylindrocopturus* sp.

Cerocephala(!) *atroviridescens* Crawford, 1913. U. S. Natl. Mus., Proc. 45: 315. ♀.

Biology: Keen, 1958. U. S. Dept. Agr., Tech. Bul. 1169: 49, 98.

Genus THEOCOLAXIA Girault

Theocolaxia Girault, 1924. Lese Majeste, New Insecta and Robbery, p. 1.

Type-species: *Theocolaxia lessingii* Girault. Orig. desig.

pityophthori (Ashmead). N. C., Fla. Host: *Pityophthorus consimilis* Lee., *Thysanoes fimbicornis* Lec.

Cerocephala pityophthori Ashmead, 1894. Ent. Soc. Wash., Proc. 3: 32. ♀.

scolytivora (Ashmead). Fla. Host: *Loganius ficus* Schwarz.

Cerocephala scolytivora Ashmead, 1894. Ent. Soc. Wash., Proc. 3: 33. ♀, ♂.

SUBFAMILY DIPARINAE

In this subfamily the females usually are wingless, or with rudimentary wings, and the males are fully winged; the sexes also have quite different antennae. Consequently the males and females of the same species often have been placed in different subfamilies, or even superfamilies.

Taxonomy: Gahan, 1946. U. S. Natl. Mus., Proc. 96: 375 (Lelapinae). — Boucek, 1954. Mus. Natl. Pragae, Acta Ent. 29: 54 (Diparinae). — Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 63-66.

Genus DIPARA Walker

Dipara Walker, 1833. Ent. Mag. 1: 371, 373.

Type-species: *Dipara petiolata* Walker. Monotypic.

Tricoryphus Foerster, 1856. Hym. Stud., v. 2, p. 46. No species.

Type-species: *Tricoryphus fasciatus* Thomson. Desig. by Thomson, 1876, by subsequent reference.

Apteroelaeps Ashmead, 1901. Fauna Hawaii, v. 1, p. 312.

Type-species: *Apteroelaeps nigriceps* Ashmead. Orig. desig.

Apteroelaeps Schulz, 1906. Spolia Hym., p. 144. Emend.

Apteroelaeps Girault, 1916. Canad. Ent. 48: 264. Preocc. by Schulz, 1906.

Type-species: *Apteroelaeps nigricutum* Girault. Monotypic.

Hispanoelaeps Mercet, 1927. Eos 3: 60.

Type-species: *Hispanoelaeps coxalis* Mercet. Orig. desig.

Afrolelaps Hedqvist, 1963. Cult. Co. Diam. Angola, Publ. 63: 47.

Type-species: *Afrolelaps maculata* Hedqvist. Orig. desig.

The female of this genus is wingless, commonly taken in Berlese samples; the male is winged and looks entirely different.

Taxonomy: Boucek, 1954. Mus. Natl. Pragae, Acta Ent. 29: 52-54 (syn.). — Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 64-65 (syn.).

latipennis Ashmead. Colo.

Dipara latipennis Ashmead, 1890. Colo. Biol. Assoc., Bul. 1: 26, 45. ♂.

nigriceps (Ashmead). W. Va.

Apteroelaeps nigriceps Ashmead, 1901. Fauna Hawaii, v. 1, p. 312. ♀.

Apteroelaeps nigricutum Girault, 1916. Canad. Ent. 48: 264. ♀.

Taxonomy: Gahan and Fagan, 1923. U. S. Natl. Mus., Bul. 124: 16 (type of each species the same specimen).

Genus SPALANGIOLAELAPS Girault

Spalangiolaelaps Girault, 1917. Ent. News 28: 22.

Type-species: *Spalangiolaelaps argenticoxa* Girault. Orig. desig.

argenticoxa Girault. Md.

Spalangiolaelaps argenticoxa Girault, 1917. Ent. News 28: 23. ♀.

Genus TRIMICROPS Kieffer

Trimicrops Kieffer, 1906. Soc. Sci. de Bruxelles, Ann. 30: 142.

Type-species: *Trimicrops claviger* Kieffer. Monotypic.

Genus originally placed in the Ceraphronidae. There is an undescribed Nearctic species.

SUBFAMILY EUNOTINAЕ

Revision: Masi, 1931. Eos 7: 411-459.

Taxonomy: Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 67-68.

Genus MORANILA Cameron

Tomocera Howard, 1881. In Comstock, U. S. Dept. Agr., Ann. Rpt. for 1880, p. 368. Preocc. by Desmarest, 1858.

Type-species: *Tomocera californica* Howard. Monotypic.

Moranila Cameron, 1883. Ent. Soc. London, Trans. 1883: 188.

Type-species: *Moranila testaceiceps* Cameron. Monotypic.

Dilophogaster Howard, 1886. Ent. Amer. 2: 98. N. name for *Tomocera*.

Eunotomyia Masi, 1917. Novitates Zool. 24: 297.

Type-species: *Eunotomyia festiva* Masi. Monotypic.

Revision: Mercet, 1924. Real Soc. Espan. Hist. Nat., Bol. 24: 422-426.

californica (Howard). Calif.; Mexico, Hawaii, South Sea Isls., Australia; Africa, Eurasia.

Ecology: The larva of this species preys on the eggs within the body of the female scales; rarely it attacks larvae of other primaries. Host: *Antonina bambusae* Mask., *Asterolecanium* sp., *Ceroplastes* sp., *Coccus hesperidum* L., *Saissetia coffeeae* (Walk.), *S. nigra* (Niet.), *S. oleae* (Bern.); *Microterys flavus* (How.).

Tomocera californica Howard, 1881. In Comstock, U. S. Dept. Agr., Ann. Rpt. for 1880, pp. 252, 368. ♀, ♂.

Moranila testaceiceps Cameron, 1883. Ent. Soc. London, Trans. 1883: 188.

Tomocera ceroplastis Perkins, 1906. Hawaii. Ent. Soc., Proc. 1: 75. ♀.

Tomocera glabriventris Girault, 1915. Queensland Mus., Mem. 4: 207. ♀.

Tomocera flaviceps Girault, 1915. Queensland Mus., Mem. 4: 208. ♀.

Taxonomy: Timberlake, 1924. Hawaii. Ent. Soc., Proc. 5: 425.

Biology: Craw, 1891. Calif. State Bd. Hort., Bul. 57: 7. — Riley, 1891. U. S. Dept. Agr., Ann. Rpt. for 1890, p. 251. — Coquillett, 1892. U. S. Dept. Agr., Div. Ent. Bul. 26: 31. — Craw, 1902. Calif. State Bd. Hort., Rpt. for 1901-1902, p. 200. — Quayle and Rust, 1911. Calif. Agr. Expt. Sta., Bul. 223: 189. — Essig, 1913. Calif. State Comm. Hort., Monthly Bul. 2: 272-273. — Smith and Compere, 1928. Univ. Calif. Publs., Ent. 4: 241-245, 317-321. — Essig, 1931. Hist. of Ent., pp. 139-143, 334-335, 336, 387. — Smith, 1933. Ent. Soc. Amer., Ann. 26: 524. — Hawkins, 1942. Ann. and Mag. Nat. Hist. (11) 9: 884. — Smith, 1944. Hilgardia 16: 282. — Flanders, 1953 (1952). Ent. Soc. Amer., Ann. 45: 546-547. — Clausen, 1956. U. S. Dept. Agr., Tech. Bul. 1139: 26. — Flanders, 1958. Jour. Econ. Ent. 51: 247.

Genus EUNOTUS Walker

Eunotus Walker, 1834. Ent. Mag. 2: 297.

Type-species: *Eunotus cretaceus* Walker. Monotypic.

Tritypus Ratzeburg, 1852. Ichn. d. Forstins., v. 3, p. 237.

Type-species: *Tritypus areolatus* Ratzeburg. Monotypic.

Megapeltis Foerster, 1856. Hym. Stud., v. 2, p. 63. N. name unnecessarily proposed for *Eunotus*, preocc. in Botany.

americanus Girault. Maine, N. Dak., Okla., Mont. Host: *Eriopeltis festucae* Fonse.

Eunotus americanus Girault, 1915. Ent. Soc. Amer., Ann. 8: 273. ♀, ♂.

cretaceus Walker. N. H., N. Y.; Europe. Host: *Eriopeltis festucae* Fonse.

Eunotus cretaceus Walker, 1834. Ent. Mag. 2: 298. “♂” = ♀.

Eunotus festucae Masi, 1928. Soc. Ent. Ital., Bol. 60: 128. ♀, ♂.

Biology: Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 72.

lividus Ashmead. Que., Ont., N. Y., N. J., Ohio, N. C., Ga., Fla., Kans., Colo. Host: *Lecanium corni* Bouche, *L. nigrofasciatum* Perg., *Pulvinaria vitis* (L.).

Eunotus lividus Ashmead, 1892. Ent. Soc. Wash., Proc. 2: 288. ♀.

Biology: Smith, 1906. N. J. Agr. Expt. Sta., Ann. Rpt. 26: 606-607. — Johnson, 1906. Colo. Agr. Expt. Sta., Bul. 116: 11. — Essig, 1938. Ins. West. N. Amer., p. 840.

Genus MESOPELTITA Ghesquiere

Mesopeltis Masi, 1917. Novitates Zool. 24: 197. Preocc. by Cope, 1867.

Type-species: *Mesopeltis atrocyanea* Masi. Monotypic.

Mesopeltita Ghesquiere, 1946. Rev. de Zool. et de Bot. Africaines 39: 370. N. name.
atrocyanaea (Masi). Tex.; Cent. and So. Amer., West Indies, East Indies. Host: *Saissetia* sp.
Mesopeltis atrocyanaea Masi, 1917. Novitates Zool. 24: 197. ♀, ♂.

Taxonomy: Waterston, 1917. Bul. Ent. Res. 7: 252-257.

Biology: Compere, 1940. Hilgardia 13: 414-415.

Genus SCUTELLISTA Motschulsky

Scutellista Motschulsky, 1859. Etudes Ent. 8: 172, 177.

Type-species: *Scutellista cyanea* Motschulsky. Monotypic.

Aspidocoris Costa, 1863. Accad. Aspiranti Nat. Napoli, Ann. (3) 3: 25.

Type-species: *Aspidocoris cyaneus* Costa. Monotypic.

Enargopeltis Foerster, 1878. Naturh. Ver. Rheinlande, Verh. 35: 62.

Type-species: *Enargopeltis obscura* Foerster. Monotypic.

cyanea Motschulsky. Del. s. to Fla., w. to Calif.; Cosmopolitan. Living material imported from Italy in 1895, cultured in D. C., and liberated in La. in 1898. Another introduction from South Africa into Calif. was carried out in 1901. Both were successful, and *cyanea* is now so common in North America it is often assumed to be native. Host: *Ceroplastes cirripediformis* Comst., *C. floridensis* Comst., *Coccus hesperidum* L., *Lecanium corni* Bch., *Phenacoccus artemisiae* Ehrh., *Saissetia coffeae* (Walk.), *S. nigra* (Nietn.), *S. oleae* (Bern.).

Encyrtus caeruleus Fonsecolombe, 1832. Ann. Sci. Nat., Zool. (1) 26: 304.

Scutellista cyanea Motschulsky, 1859. Etudes Ent. 8: 172. ♀, ♂. Although *caeruleus* Fonsecolombe has priority, Graham, 1969 (Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 76), intends to submit an application to the International Commission to have it suppressed, in view of the very large volume of literature there is that uses the name *cyanea* Motschulsky.

Biology: Marlatt, 1901. U. S. Dept. Agr., Yearbook for 1900, pp. 274-275. — Howard, 1903. U. S. Dept. Agr., Ann. Rpt., for 1902, pp. 228-229. — Marlatt, 1904. U. S. Dept. Agr., Div. Ent. Bul. Genus BAIRAMLIA Waterston

Bairamlia Waterston, 1929. Parasitology 21: 103.

Type-species: *Bairamlia fuscipes* Waterston. Orig. desig.

marylandensis (Girault). Md.

Pirene marylandensis Girault, 1916. Brooklyn Ent. Soc., Bul. 11: 88. ♀.

Taxonomy: Waterston, 1929. Parasitology 21: 103.

Genus HYPERIMERUS Girault

Hyperimerus Girault, 1917. Descr. Hym. Chalcidoid. Variorum cum Observ. III, p. 5.

Type-species: *Hyperimerus corvus* Girault. Orig. desig.

Mespilon Graham, 1957. Ent. Monthly Mag. 92: 406.

Type-species: *Mespilon exiguum* Graham. Orig. desig.

Taxonomy: Burks, 1967. In Krombein and Burks, U. S. Dept. Agr., Agr. Monog. 2, Sup. 2: 251, 255 (Torymidae). — Boucek, 1965. Mus. Natl. Pragae, Acta Ent. 36: 549 (syn.).

— Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 78, 83 (Pteromalidae).

corvus Girault. Calif.; Mexico. Host: *Chrysopa* sp., *Hemerobius* sp., *Sympnerobius* sp. Closely associated with *Pseudococcus* in its native environment.

Hyperimerus corvus Girault, 1917. Descr. Hym. Chalcidoid. Variorum Cum. Observ. III, p. 5. ♀.

SUBFAMILY PANSTENONINAE

Taxonomy: Erdos, 1955. Mus. Natl. Hung., Ann. Hist. Nat. (n. s.) 6: 296. — Graham, 1969.

Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 92.

Genus PANSTENON Walker

Panstenon Walker, 1846. List Hym. Brit. Mus. Chalcid. v. 1, p. 29.

Type-species: *Miscogaster oxylus* Walker. Monotypic.

Caudonia Walker, 1850. Ann. and Mag. Nat. Hist. (2) 5: 125.

Type-species: *Caudonia agylla* Walker. Monotypic.

Taxonomy: Graham, 1957. In Kerrich and Graham, Soc. Brit. Ent., Trans. 12: 276 (syn.).

columbianum Ashmead. D. C.

Panstenon columbiana Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 231. ♀.

Genus BRACHYCAUDONIA Ashmead

Brachycaudonia Ashmead, 1904. Carnegie Mus., Mem. 1: 283, 285.

Type-species: *Brachycaudonia californica* Ashmead. Orig. desig.

californica Ashmead. Calif.

Brachycaudonia californica Ashmead, 1904. Carnegie Mus., Mem. 1: 282, 368. ♀.

Taxonomy: Gahan and Peck, 1946. Wash. Acad. Sci., Jour. 36: 315.

SUBFAMILY MISCOGASTERINAE

TRIBE SPHEGIGASTERINI

Genus SPHEGIGASTER Spinola

Sphegigaster Spinola, 1811. Paris Mus. d'Hist. Nat., Ann. 17: 149.

Type-species: *Diplolepis pallicornis* Spinola. Desig. by Ashmead, 1904.

Trigonogastra Ashmead, 1904. Carnegie Mus., Mem. 1: 330, 331.

Type-species: *Trigonogastra aurata* Ashmead. Orig. desig.

Taxonomy: Delucchi, 1958. Bol. Zool. Agr. e di Bach. (2) 1: 56 (syn.).

aurata (Ashmead). Mich., Mont.

Trigonogastra aurata Ashmead, 1904. Carnegie Mus., Mem. 1: 330. ♀.

Taxonomy: Gahan and Peck, 1946. Wash. Acad. Sci., Jour. 36: 317 (type).

flavicornis (Walker). B. C.; Europe. Introduced from England into B. C. in mid 1930's; recovered 1939. Host: *Phytomyza ilicis* Curtis.

Merismus flavicornis Walker, 1833. Ent. Mag. 1: 377. ♂.

Taxonomy: Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 136 (*Diplolepis pallicornis* Spinola, 1808, might prove to be the same).

Biology: Cameron, 1939. Bul. Ent. Res. 30: 178-180, 192-197. — McLeod, 1954. Ent. Soc. Brit. Columbia, Proc. 50: 22.

Genus SYNTOMOPUS Walker

Syntomopus Walker, 1833. Ent. Mag. 1: 371, 372.

Type-species: *Syntomopus thoracicus* Walker. Desig. by Westwood, 1840.

affinis Ashmead. D. C., Ill.

Syntomopus affinis Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 228. ♀.

americanus Ashmead. Conn., N. Y., s. to Fla., w. to Oreg., Calif.; Mexico, Cent. Amer. Host:

Melanagromyza angelicae (Frost), *M. virens* (Loew).

Syntomopus americanus Ashmead, 1894. Cincinnati Soc. Nat. Hist., Jour. 17: 51. ♀, ♂.

Biology: Lange, 1944. Jour. Econ. Ent. 37: 394-395.

Genus CYRTOGASTER Walker

Cyrtogaster Walker, 1833. Ent. Mag. 1: 317, 381.

Type-species: *Cyrtogaster rufipes* Walker. Desig. by Westwood, 1840.

Dicormus Foerster, 1841. Beitr. Monog. Pteromalinen, p. 38.

Type-species: *Dicormus aquisgranensis* Foerster. Monotypic.

Taxonomy: Foerster, 1856. Hym. Stud., v. 2, p. 55 (syn.).

trypherus (Walker). Del., s. to Fla., w. to Calif. Ecology: Common in alfalfa fields. Host:

Brachydeutera argentata (Walk.), *Drosophila* sp.

Lamprotatus trypherus Walker, 1843. Soc. Ent. de France, Ann. (2) 1: 158. "♀" = ♂.

Cyrtogaster glasgowi Crawford, 1914. Insector Insectiae Menstruus 2: 36. ♀, ♂.

Taxonomy: Burks, 1975. Brit. Mus. (Nat. Hist.) Ent., Bul. 32: 161 (syn.).

vulgaris Walker. B. C., Wash.; Europe. Ecology: Commonly intercepted in quarantine in living herbaceous vegetation from England, Scotland, and Continental Europe. Introduced from England into B. C. in mid-1930's and recovered. Host: *Phytomyza* sp., *P. ilicis* Curtis, *P. nigra* Meig.

Cyrtogaster vulgaris Walker, 1833. Ent. Mag. 1: 382. ♀, ♂.

Cyrtogaster thoracica Walker, 1833. Ent. Mag. 1: 382. ♀.

Cyrtogaster rufipes Walker, 1833. Ent. Mag. 1: 383. ♀, ♂.

Cyrtogaster tenuis Walker, 1833. Ent. Mag. 1: 384. ♀.

Cyrtogaster cingulipes Walker, 1833. Ent. Mag. 1: 384. ♀.

Dicormus aquisgranensis Foerster, 1841. Beitr. Monog. Pteromalinen, p. 38. ♂.

Lamprotatus Acarnas Walker, 1848. List Hym. Brit. Mus., Chalcid., v. 2, pp. 111, 168. ♀.

Cyrtogaster biglobus Foerster, 1861. Progr. Realsch. Aachen 1860-1861, p. 33. ♂.

Sphegigaster degener Walker, 1872. Notes on Chalcid., p. 117. ♀.

Taxonomy: Delucchi, 1955. Soc. Roy. Ent. de Belg., Mem. 27: 174-175 (syn.). — Askew, 1965. Entomophaga 10: 180-181 (syn.). — Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 142-143 (syn.; types).

Biology: Cameron, 1939. Bul. Ent. Res. 30: 178-180, 197-199. — Askew, 1965. Entomophaga 10: 185-186 (hosts in Europe). — Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 143 (hosts in England).

Genus LOPHOCOMODIA Ashmead

Lophocomodia Ashmead, 1888. Kans. Agr. Expt. Sta., Bul. 3: App. p. VI.

Type-species: *Lophocomodia americana* Ashmead. Monotypic.

americana Ashmead. Kans.

Lophocomodia americana Ashmead, 1888. Kans. Agr. Expt. Sta., Bul. 3: App. p. VI. ♂.

TRIBE MISCOGASTERINI

Taxonomy: Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 149-150 (approx. equal to Lamprotatini of older classifications).

Genus HALTICOPTERA Spinola

Halticoptera Spinola, 1811. Paris Mus. d'Hist. Nat., Ann. 17: 148.

Type-species: *Diplolepis flavicornis* Spinola. Desig. by Ashmead, 1904.

Pachylarthus Westwood, 1832. London, Edinb. and Dublin Phil. Mag. and Jour. Sci. (3) 1: 127.

Type-species: *Pachylarthus insignis* Westwood. Monotypic.

Phagonia Curtis, 1832. Brit. Ent., v. 9, folio 427.

Type-species: *Diplolepis flavicornis* Spinola. Orig. desig.

Dicyclus Walker, 1833. Ent. Mag. 1: 371, 455.

Type-species: *Dicyclus aeneus* Walker. Desig. by Westwood, 1840.

Phacostomus Nees, 1834. Hym. Ichn. Aff. Monogr., v. 2, p. 121.

Type-species: *Diplolepis patellana* Dalman. Monotypic.

Megorismus Walker, 1846. List Hym. Brit. Mus. Chalcid., v. 1, p. 29.

Type-species: *Miscogaster daiphron* Walker. Monotypic.

Tityros Walker, 1848. List Hym. Brit. Mus. Chalcid., v. 2, pp. 108, 164.

Type-species: *Tityros poreia* Walker. Monotypic.

Megalorismus Schulz, 1906. Spolia Hym., v. 147. Emend. of *Megorismus*.

Taxonomy: Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 155-159 (syn.; key to European spp.).

brodiei Ashmead. Ont. Ecology: Emerged from twig or leaf midrib galls of *Xanthoteras quercusforticorne* (Walsh). This sp. may not be *Halticoptera*; types not located.

Halticoptera brodiei Ashmead, 1896. Amer. Ent. Soc., Trans. 14: 192. ♀.

circulus (Walker). Que. and Maine, s. to Fla., w. to B. C., Wash., Oreg., Calif.; Mexico, Europe. Host: *Agromyza parvicornis* Loew, *Cerodontha dorsalis* (Loew), *Liriomyza melampygia* (Loew), *L. langei* Frick, *L. pictella* (Thoms.), *Mayetiola destructor* (Say), *Melanagromyza virens* (Loew), *Meromyza americana* Fitch, *Oscinella sp.*, *O. frit* (L.), *Phytobia angulata* (Loew), *P. clara* (Melandier), *P. lateralis* (Macq.), *Phytomyza delphiniae* Frost. This species has used the name *aenea* (Walker) or *patellana* (Dalman) in all North American literature since 1933.

Dicyclus circulus Walker, 1833. Ent. Mag. 1: 456. ♀.

Dicyclus fuscicornis Walker, 1833. Ent. Mag. 1: 456. ♀.

Pteromalus palpigerus Zetterstedt, 1838. Ins. Lap. Descr., Hym., p. 425.

Pteromalus brevicornis Zetterstedt, 1838. Ins. Lap. Descr., Hym., p. 426. Preocc. by Walker, 1835.

Miscogaster Daiphron Walker, 1839. Monog. Chalcid., v. 1, p. 198. ♀.

Miscogaster Crius Walker, 1839. Monog. Chalcid., v. 1, p. 201. ♀.

Miscogaster Sullius Walker, 1839. Monog. Chalcid., v. 1, p. 202. "♀" = ♂.

Cyrtogaster liqueatus Ashmead, 1894. Amer. Ent. Soc., Trans. 21: 336. ♂.

Cyrtogaster occidentalis Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 230. ♀, ♂.

Cyrtogaster citripes Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 230. ♂.

Polycyrtus(!) floridanus Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 230. ♂.

Pteromalus lapponicus Dalla Torre, 1898. Cat. Hym., v. 5, p. 131. N. name for *brevicornis* Zetterstedt.

Polycystus foersteri Crawford, 1913. U. S. Natl. Mus., Proc. 45: 313. ♀, ♂.

Taxonomy: Gahan, 1934 (1933). U. S. Dept. Agr., Misc. Pub. 174: 116 (*aenea*). —Ferriere, 1952. Soc. Venez. Stor. Nat., Bol. 6: 172 (*patellana*). —Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 163-164 (syn.; *circulus*).

Biology: Lange, 1944. Jour. Econ. Ent. 37: 394-395. —Hills and Taylor, 1951. Jour. Econ. Ent. 44: 760-762. —Morrill and Kieckhefer, 1971. Jour. Econ. Ent. 64: 1129-1131.

goodi Crawford. N. S., Que., Wash.

Halticoptera goodi Crawford, 1915. Insecutor Inscitiae Menstruus 3: 107. ♀, ♂.

rosae Burks. Maine, Ont., R. I., Wis., Minn., Sask., Utah, Alaska. Host: *Rhagoletis basiola* (O. S.).

Halticoptera rosae Burks. 1955. Ent. Soc. Wash., Proc. 57: 81. ♀, ♂.

Biology: Balduf, 1959. Ill. Biol. Monog. 26: 41-50, 170-173.

stella Girault. Ariz., Calif. Host: *Aciurina maculata* (Cole).

Halticoptera stella Girault, 1917 (May). Descr. Hym. Chalcidoid. Variorum cum Observ.

III, p. 1. ♀.

Megorismus poloni Girault, 1917 (June). Psyche 24: 97. ♀.

Genus MERISMUS Walker

Merismus Walker, 1833. Ent. Mag. 1: 371, 375.

Type-species: *Merismus rufipes* Walker. Desig. by Westwood, 1840.

rufipes Walker. Va.; Europe. Probably an adventive.

Merismus rufipes Walker, 1833. Ent. Mag. 1: 378. ♀.

Genus SELADERMA Walker

Seladerma Walker, 1834. Ent. Mag. 2: 288.

Type-species: *Seladerma laetum* Walker. Desig. by Westwood, 1840.

diaeus (Walker). Ont. Ecology: Host probably an agromyzid.

Lamprotatus Diaeus Walker, 1844. Ann. and Mag. Nat. Hist. (1) 14: 16. ♀.

Taxonomy: Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 203 (*Seladerma*).

—Burks, 1975. Brit. Mus. (Nat. Hist.) Ent., Bul. 32: 156.

Biology: Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 203 (type labeled, "Bred from pupa of *Vanessa cardui*," but that is erroneous and refers to next species in Walker's publication, *Pteromalus puparum* (L.); true host of *diaeus* probably an agromyzid).

Genus BUBEKIA Dalla Torre

Brachycrepis Ashmead, 1888. Canad. Ent. 20: 174, 176. Preocc. by Leconte, 1854.

Type-species: *Brachycrepis tricarinatus* Ashmead. Monotypic.

Bubeckia Dalla Torre, 1897. Wien. Ent. Ztg. 16: 84. N. name.

Bubeckia Dalla Torre, 1898. Cat. Hym., v. 5, p. 568. Misspelling.

Revision: Gahan, 1934 (1933). U. S. Dept. Agr., Misc. Pub. 174: 114.

carolinensis (Ashmead). N. C.

Acroclisis carolinensis Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 228. ♂.

fallax Gahan. Ind., Tenn., Iowa, Kans., Okla. Host: *Mayetiola destructor* (Say), *Meromyza americana* Fitch.

Bubeckia fallax Gahan, 1934 (1933). U. S. Dept. Agr., Misc. Pub. 174: 114-116. ♀, ♂.

Biology: Morrill and Kieckhefer, 1971. Jour. Econ. Ent. 64: 1129-1131.

lasiopterae (Ashmead). Ohio. Host: *Asteromyia agrostis* (O. S.).

Megorismus lasiopterae Ashmead, 1893. Ohio Agr. Expt. Sta., Tech. Ser., Bul. 1: 160. ♂.

tricarinata (Ashmead). Kans.

Brachycrepis tricarinatus Ashmead, 1888. Canad. Ent. 20: 176. ♀.

Genus PARACAROTOMUS Ashmead

Paracarotomus Ashmead, 1894. Amer. Ent. Soc., Trans. 21: 335.

Type-species: *Paracarotomus cephalotes* Ashmead. Monotypic.

cephalotes Ashmead. Va.

Paracarotomus cephalotes Ashmead, 1894. Amer. Ent. Soc., Trans. 21: 336. ♂.

Genus MISCOGASTER Walker

Miscogaster Walker, 1833. Ent. Mag. 1: 371, 458.

Type-species: *Halticoptera hortensis* Walker. Desig. by Ashmead, 1904.

Mischogaster Thomson, 1876. Hym. Scand., v. 4, pp. 220, 239. Emend.

Taxonomy: Delucchi, 1955. Lunds Univ., Arsskr. (n. s.) 50 (20): 6-10, 55-56.

abnormicolor Girault. Fla.

Miscogaster abnormicolor Girault, 1917. Descr. Hym. Chalcidoid. Variorum cum Observ. III, p. 8. ♀.

aurata (Ashmead). Wis., Ill.

Stictomischus auratus Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 221. ♀.

bifasciata Girault. Fla.

Miscogaster bifasciata Girault, 1917. Psyche 24: 97. ♀, ♂.

discoloripes Girault. Fla.

Miscogaster discoloripes Girault, 1917. Descr. Hym. Chalcidoid. Variorum cum Observ. III, p. 9. ♀.

flora Girault. Fla.

Miscogaster flora Girault, 1917. Psyche 24: 96. ♀.

keatsi Girault. Md.

Miscogaster keatsi Girault, 1917. Chalcidoidea Nova Marilandensis III, p. 5. ♀.

marilandica Girault. Md., Fla.

Miscogaster marilandica Girault, 1916. Brooklyn Ent. Soc., Bul. 11: 87. ♀.

ungutta Girault. Md.

Miscogaster unguitta Girault, 1917. Ent. News 28: 23. ♀.

Genus LAMPROTATUS Westwood

Lamprotatus Westwood, 1833. Mag. Nat. Hist. 6: 121.

Type-species: *Lamprotatus splendens* Westwood. Monotypic.

Lampretatus Walker, 1843. Soc. Ent. de France, Ann. (2) 1: 155. Misspelling.

Lamprostatus Girault, 1917. Psyche 24: 96. Misspelling.

There are several published references to *Lamprotatus pilicornis* Thomson, 1876 (Hym. Scand., v. 4, p. 229) from Greenland, as well as Sweden. After those records were published Graham, 1969 (Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 201-202) found that the type series of *pilicornis* is mixed. He has designated a lectotype for the species, placing it in synonymy under *Seladerus tarsale* (Walker). The Greenland records of *pilicornis* need to be re-examined.

canadensis Girault. Alta.

Lamprostatus canadensis Girault, 1917. Psyche 24: 96. ♀.

conicus Girault. Alaska.

Lamprostatus conicus Girault, 1917. Descr. Hym. Chalcidoid. Variorum cum Observ. V, p. 11. ♀.

salemus (Walker). Fla.

Lamptretatus salemus Walker, 1843. Soc. Ent. de France, Ann. (2) 1: 156. ♀.

Taxonomy: Burks, 1975. Brit. Mus. (Nat. Hist.) Ent., Bul. 32: 161 (type fragmentary, sp. cannot be placed; better material may be found later).

TRIBE ORMOCERINI

Taxonomy: Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 250-252 (approx. equal to Tridymini of older classifications; key to European genera).

Genus ELACHERTODOMYIA Girault

Elachertodomia Girault, 1917. Canad. Ent. 49: 110.

Type-species: *Secodes phloeotribi* Ashmead. Orig. desig.

This very strange appearing chalcid is probably misplaced in this tribe and may, in fact, be misplaced in the Pteromalidae. Unfortunately the material of it that is now available is in fragmentary condition. The genus *Secodes* Foerster is Eulophidae, but Girault felt that this genus, based on an Ashmead species described in *Secodes*, belonged in Pteromalidae.

Taxonomy: Girault, 1917. Canad. Ent. 49: 110.

phloeotribi (Ashmead). Conn., N. J., Va. Host: *Chramesus hectoriae* Lec., *Lixus musculus* Say,
Phloeotribus frontalis (Oliv.), *Pseudopityophthorus minutissimus* (Zimm.).
Secodes phloeotribi Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 233. ♀, ♂.

Biology: Chittenden, 1898. Ent. Soc. Wash., Proc. 4: 78.

Genus ORMOCERUS Walker

Ormocerus Walker, 1834. Ent. Mag. 2: 168.

Type-species: *Ormocerus vernalis* Walker. Desig. by Westwood, 1840.

Hormocerus Foerster, 1856. Hym. Stud., v. 2, pp. 59, 60. Emend.

Terobia Foerster, 1878. Naturh. Ver. Rheinlande, Verh. 35: 64.

Type-species: *Terobia dispila* Foerster. Orig. desig.

Taxonomy: Delucchi, 1955. Soc. Roy. Ent. de Belg., Mem. 27: 175 (syn.). —Peck, 1963. Canad. Ent., Sup. 30: 903 (N. Amer. spp. unplaced).

flora Girault. Fla.

Terobia flora Girault, 1920. U. S. Natl. Mus., Proc. 58: 216. ♀, ♂.

vulgaris Ashmead. Alaska.

Terobia vulgaris Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 144. ♀, ♂.

Genus PARASYNTOMOCERA Girault

Parasyntomocera Girault, 1917. Chalcidoidea Nova Marilandensis II, p. 2.

Type-species: *Parasyntomocera hillmeadia* Girault. Orig. desig.

hillmeadia Girault. Md.

Parasyntomocera hillmeadia Girault, 1917. Chalcidoidea Nova Marilandensis II, p. 2. ♀.

Genus ERIXESTUS Crawford

Erixestus Crawford, 1910. U. S. Natl. Mus., Proc. 38: 87.

Type-species: *Erixestus winnemana* Crawford. Monotypic.

winnemana Crawford. Que., Md., Va. Ecology: An egg parasite. Host: *Calligrapha bigsbyana* (Kby.), *C. scalaris* (Lec.).

Erixestus winnemana Crawford, 1910. U. S. Natl. Mus., Proc. 38: 88. ♀, ♂.

Biology: Daviault, 1941. Nat. Canad. 68: 106-107.

Genus SYSTASIS Walker

Systasis Walker, 1834. Ent. Mag. 2: 228, 296.

Type-species: *Systasis encyrtoides* Walker. Desig. by Westwood, 1840.

Syntasis Ashmead, 1904. Carnegie Mus., Mem. 1: 274, 275. Misspelling.

diplosidis Eckel. Mass., Fla., Miss., Ohio, Mich., Wis., Calif. Host: *Cecidomyia resinicola* (O. S.), *C. resinicoloidea* Will.

Syntasis diplosidis Eckel, 1903. Ent. News 14: 283. ♀.

Biology: Williams, 1909. Ent. News 20: 7 (*Syntasis*).

Morphology: Eckel, 1902. Ent. News 14: 283, pl. xiv (larva, adult).

encyrtoides Walker. Wis., Alaska, Oreg.; Europe. Host: *Contarinia* sp. Numerous dipterous hosts recorded in Palearctic literature.

Systasis encyrtoides Walker, 1834. Ent. Mag. 2: 296. ♀, ♂.

Tridymus punctatus Ratzeburg, 1852. Ichn. d. Forstins., v. 3, p. 227.

Hormocerus impletus Walker, 1872. Notes on Chalcid. pt. 6, p. 96. ♀.

Systasis longicornis Thomson, 1878. Hym. Scand., v. 5, p. 204. ♀.

Taxonomy: Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 261 (syn.; types).

Biology: Parnell, 1963. Roy. Ent. Soc. London, Trans. 115: 271-272. —Ferron, 1964. Ann. des Epiphyt. (C) 15: 277. —Kralovic, 1964. Biologia Bratislava 19: 265.

Morphology: Solinas, 1965. Entomologica [Bari] 1: 248 (immature stages).

Genus *GASTRANCISTRUS* Westwood

Gastrancistrus Westwood, 1833. London, Edinb. and Dublin Phil. Mag. and Jour. Sci. (3) 2: 444.

Type-species: *Gastrancistrus vagans* Westwood. Monotypic.

Glyphe Walker, 1834. Ent. Mag. 2: 168, 170.

Type-species: *Glyphe autumnalis* Walker. Monotypic.

Tridymus Ratzeburg, 1848. Ichn. d. Forstins., v. 2, p. 183.

Type-species: *Tridymus aphidum* Ratzeburg. Desig. by Ashmead, 1904, p. 273.

Ashmead, 1904, p. 392, Desig. *Pteromalus salicis* Nees, but designation on p. 273 has priority.

Tripedias Foerster, 1856. Hym. Stud., v. 2, p. 60. No species.

Type-species: *Gastrancistrus tripedias* Boucek. Desig. by Boucek, 1964.

Trydymus Girault, 1917. Psyche 24: 98. Misspelling, often used.

Revision: Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 270-327. (*Tridymus aphidum* Ratzeburg an unfortunate choice for type-species of *Tridymus*; *Pteromalus salicis* Nees might be more satisfactory; application may be made to Internat. Comm. to change type-species).

Taxonomy: Walker, 1846. List Hym. Brit. Mus., Chalcid., v. 1, p. 25 (syn.). —Boucek, 1964. Ceskoslov. Spolec. Ent. Casopis 61: 259 (syn.).

aeneicornis (Girault), n. comb. N. Y. Ecology: Associated with plum tree.

Trydymus aeneicornis Girault, 1917. Psyche 24: 98. ♀.

americensis (Girault). N. comb. Mich. Ecology: Reared from cecidomyiid stem gall on *Salix*.

Trydymus americensis Girault, 1917. Descr. Hym. Chalcidoid. Variorum cum Observ. III, p. 8. ♀.

aphidis (Girault), n. comb. Conn., N. Y., Ark. Ecology: Reared from leaf or tendril galls on grape. Host: *Lasioptera vitis* O. S.

Trydymus aphidis Girault, 1917. U. S. Natl. Mus., Proc. 53: 450. ♀.

aureipes (Girault), n. comb. Fla.

Trydymus aureipes Girault, 1917. U. S. Natl. Mus., Proc. 53: 449. ♀.

biguttatipennis (Girault), n. comb. Conn., Fla.

Trydymus biguttatipennis Girault, 1917. U. S. Natl. Mus., Proc. 53: 449. ♀.

clavicornis (Girault), n. comb. Sask.

Trydymus clavicornis Girault, 1917. Descr. Hym. Chalcidoid. Variorum cum Observ. V, p. 15. ♀.

Taxonomy: Girault, 1920. U. S. Natl. Mus., Proc. 58: 214 (redescription as "N. sp." on same specimens used in 1917).

gargantua (Girault), n. comb. N. H., Conn., N. Y., Mich., Minn. Ecology: Reared from gall on *Salix*.

Trydymus gargantua Girault, 1917. Psyche 24: 98. ♀.

metallicus (Ashmead), n. comb. N. Y., N. J., Kans. Ecology: Reared from twig galls of basket willow, *Salix purpurea*. Host: *Rhabdophaga salicis* Schr. This sp. may be a synonym of *Gastrancistrus salicis* (Nees).

Trydymus metallicus Ashmead, 1888. Kans. Agr. Expt. Sta., Bul. 3: App. p. V. ♀, ♂.

nigriclavus (Girault), n. comb. Md.

Trydymus nigriclavus Girault, 1917. Chalcidoidea Nova Marilandensis II, p. 2. ♀.

oblongus (Provancher), n. comb. Que.

Semiotellus oblongus Provancher, 1881. Nat. Canad. 12: 295. ♀.

Taxonomy: Burks, 1964 (1963). Canad. Ent. 95: 1262 (type).

poloni (Girault), n. comb. N. H.

Trydymus poloni Girault, 1917. Psyche 24: 98. ♀.

robiniaecola (Ashmead), n. comb. Va., W. Va.

Trydymus robiniaecola Ashmead, 1894. Amer. Ent. Soc., Trans. 21: 334. ♀, ♂.

salicis (Nees). N. Y.; Europe. Ecology: Reared from galls on *Salix*. Host: *Rhabdophaga salicis* Schr. Species identified by Ashmead, reared in N. Y. from galls on *Salix*, the plants possibly of European origin.
Pteromalus salicis Nees, 1834. Hym. Ichn. Aff. Monog., v. 2, pp. 105, 424. ♀, ♂.
Seladerma Capreae Walker, 1848. List Hym. Brit. Mus., Chalcid., v. 2, p. 112. Preocc. by Linnaeus, 1761.

Taxonomy: Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 303 (syn., types).

Biology: Felt, 1902. N. Y. State Mus., Bul. 53: 744.

TRIBE PIRENINI

Taxonomy: Ferriere, 1934. Schweiz. Ent. Gesell., Mitt. 16: 83-92 (key to genera). —Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 329-330 (revised key to European genera).

Genus PIRENE Haliday

Macroglenes Westwood, 1832. London, Edinb. and Dublin Phil. Mag. and Jour. Sci. (3) 1: 127.

Type-species: *Macroglenes oculatus* Westwood. Monotypic.

Pirene Haliday, 1833. Ent. Mag. 1: 336.

Type-species: *Pirene varicornis* Haliday. Desig. by Westwood, 1840.

Corynocere Nees, 1834. Hym. Ichn. Aff. Monog., v. 2, p. 123.

Type-species: *Corynocere deplanata* Nees. Desig. by Gahan and Fagan, 1923.

Phocion Girault, 1925. Insectorum Inscitiae Menstruus 13: 91.

Type-species: *Phocion ipswichi* Girault. Orig. desig.

Pirenica Ghesquiere, 1946. Rev. de Zool. et de Bot. Africaines 34: 369. N. name, unnecessarily proposed for *Pirene*.

Taxonomy: Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 334-335 (syn.);

Macroglenes has priority, but *Pirene* more often used; application being made to Internat. Comm. for retention of *Pirene*).

marylandica Girault. Md. Type fragmentary; placement of this sp. in *Pirene* may be erroneous.

Pirene marylandica Girault, 1916. Canad. Ent. 48: 116. ♀.

penetrans (Kirby). N. J., Ont., Mich., Oreg.; Europe. Host: *Contarinia tritici* (Kirby), *Sitodiplosis mosellana* (Gehin).

Ichneumon penetrans Kirby, 1800. Linn. Soc. London, Trans. 5: 109. ♀, ♂.

Macroglenes oculatus Westwood, 1832. London, Edinb. and Dublin Phil. Mag. and Jour. Sci. (3) 1: 127. ♂.

Macroglenes brevicornis Thomson, 1878. Hym. Scand., v. 5, p. 189. ♀.

Taxonomy: Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 341 (syn.).

Biology: Johansson, 1936. Stat. Vaxtskyd., Med. 15: 4-6, 13-18.

Genus SPATHOPUS Ashmead

Spathopus Ashmead, 1904. Carnegie Mus., Mem. 1: 272.

Type-species: *Spathopus anomalipes* Ashmead. Orig. desig.

Taxonomy: Boucek, 1964. Ceskoslov. Spolec. Ent., Casopis 61: 255-257 (redescription).

anomalipes Ashmead. Fla.

Spathopus anomalipes Ashmead, 1904. Carnegie Mus., Mem. 1: 272. "♀" = ♂.

Taxonomy: Gahan and Peck, 1946. Wash. Acad. Sci., Jour. 36: 316 (type).

Genus HERBERTIA Howard

Herbertia Howard, 1894. Linn. Soc. London, Jour., Zool. 25: 98.

Type-species: *Herbertia lucens* Howard. Monotypic.

Revision: Burks, 1959. Ent. Soc. Wash., Proc. 61: 249-255.

Taxonomy: Ferriere, 1934. Schweiz. Ent. Gesell., Mitt. 16: 84-93.
wallacei Burks. Pa., Md., Va., Ohio, Tex.; Mexico. Host: *Phytomyza ilicicola* Loew.
Herbertia wallacei Burks, 1959. Ent. Soc. Wash., Proc. 61: 254. ♀, ♂.

Genus DIPACHYSTIGMA Crawford

Dipachystigma Crawford, 1911. U. S. Natl. Mus., Proc. 39: 618.
 Type-species: *Dipachystigma cushmani* Crawford. Monotypic.
cushmani Crawford. La. Host: *Stephanoderes* sp.
Dipachystigma cushmani Crawford, 1911. U. S. Natl. Mus., Proc. 39: 619. ♀.
secundum Girault. D. C.
Dipachystigma secunda Girault, 1917. Descr. Stellarum Nov., p. 15. ♀.

Genus MORODORA Gahan

Morodora Gahan, 1933. Canad. Ent. 65: 31.
 Type-species: *Morodora armata* Gahan. Monotypic.
armata Gahan. Mont., B. C. Host: *Protocalliphora asiovora* S. and D., *P. avium* S. and D.
Morodora armata Gahan, 1933. Canad. Ent. 65: 32. ♀, ♂.

Genus PARECRIZOTES Girault

Parecrizotes Girault, 1916. Ent. Soc. Amer., Ann. 9: 304.
 Type-species: *Parecrizotes marylandensis* Girault. Orig. desig.
marylandensis Girault. N. Y., Pa., Md., D. C., Va.
Parecrizotes marylandensis Girault, 1916. Ent. Soc. Amer., Ann. 9: 305. ♂.

Genus STIGMATOCREPIS Ashmead

Stigmatocrepis Ashmead, 1904. Carnegie Mus., Mem. 1: 273, 274.
 Type-species: *Stigmatocrepis americana* Ashmead. Orig. desig.
americana Ashmead. Fla.
Stigmatocrepis americana Ashmead, 1904. Carnegie Mus., Mem. 1: 273. ♀, ♂.
 Taxonomy: Gahan and Peck, 1946. Wash. Acad. Sci., Jour. 36: 316 (types).

SUBFAMILY PTEROMALINAE

TRIBE CRATOMINI

Genus CRATOMUS Dalman

Cratomus Dalman, 1820. Svenska Vetensk. Akad., Handl. 41: 173, 177.
 Type-species: *Cynips megacephalus* Fabricius. Monotypic.
Caratomus Dalman, 1822. Svenska Vetensk. Akad., Handl. 43: 403. Emend.
cancellatus Cockerell. Colo.
Cratomus cancellatus Cockerell, 1916. Ent. News 27: 417. ♂.
leucophthalmus Ashmead. Ont., Pa., D. C.
Caratomus leucophthalmus Ashmead, 1888. Canad. Ent. 20: 55. ♂.
megacephalus (Fabricius). N. Y., N. J., D. C., Ill.
Cynips megacephala Fabricius, 1793. Ent. System., v. 2, p. 103.
Caratomus megalcephalus Schulz, 1906. Spolia Hym., p. 144. Emend.

TRIBE PACHYNEURINI

Genus CORUNA Walker

Coruna Walker, 1833. Ent. Mag. 1: 371, 379.
 Type-species: *Coruna clavata* Walker. Monotypic.
Coryna Foerster, 1856. Hym. Stud., v. 2, p. 59. Emend.; preocc. by Bosc, 1802.

Pachycrepis Foerster, 1856. Hym. Stud., v. 2, pp. 51, 54, 59. N. name unnecessarily proposed for *Coruna* Walker, preocc. in Botany.

clavata Walker. N. B., Maine, N. J., Wash., Calif.; Europe. Host: *Aphidius* sp., *Praon* sp. *Coruna clavata* Walker, 1833. Ent. Mag. 1: 380. ♀, ♂.

Chrysolampus legenarius Nees, 1834. Hym. Ichn. Aff. Monog., v. 2, p. 132. ♂.

Pteromalus aphidivorus Foerster, 1841. Beitr. Monog. Pteromalinen, p. 28. ♂.

Pteromalus segmentarius Foerster, 1841. Beitr. Monog. Pteromalinen, p. 28. ♂.

Gastrancistrus Hierocles Walker, 1848. List Hym. Brit. Mus., Chalcid., v. 2, pp. 105, 158. ♂.

Coryna dubia Buckton, 1879. Monog. Brit. Aphides, v. 2, p. 86.

Taxonomy: Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 845 (syn.).

Biology: Haviland, 1922. Quart. Jour. Micros. Sci. 66: 321-338. —Ferriere and Voukassovitch, 1928. Soc. Ent. de France, Bul. 1928: 28. —Dunn, 1949. Bul. Ent. Res. 40: 103, 117.

—MacGillivray and Spicer, 1953. Canad. Ent. 85: 426-430. —Shands et al., 1955. Ent. Soc. Wash., Proc. 57: 132-135. —Stary, 1962. Zool. Listy 11: 267.

Genus EUNEURA Walker

Euneura Walker, 1844. Ann. and Mag. Nat. Hist. (1) 14: 331.

Type-species: *Euneura augurus* Walker. Monotypic.

Eunevra Agassiz, 1846. Nomencl. Zool., p. 427. Emend.

Hypsicamara Foerster, 1856. Hym. Stud., v. 2, pp. 52, 54. No species.

Type-species: *Hypsicamara ratzeburgi* Reinhard. Desig. by Reinhard, 1859, by subsequent reference.

Hypsicamera Dalla Torre, 1898. Cat. Hym., v. 5, p. 168. Emend.

Morphological characters to distinguish this genus from *Pachyneuron* are extremely vague and weak, but the species of *Euneura* are ecologically distinct in that they are known to be only secondary parasites of aphids on pines and other gymnosperms.

lachni (Ashmead). N. B., Maine, s. to Fla., w. to Utah, Idaho, B. C., Calif. Host: *Pausia* sp., *P. californica* (Ashm.), *P. ponderosae* (Mues.).

Pachycrepis lachni Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 193. ♀.

Taxonomy: Gahan, 1942. U. S. Natl. Mus., Proc. 92: 46.

Genus PACHYNEURON Walker

Pachyneuron Walker, 1833. Ent. Mag. 1: 371, 380.

Type-species: *Pachyneuron formosum* Walker. Monotypic.

Pachynevron Blanchard, 1840. Hist. Nat. Anim. Artic., Ins., v. 3, pp. 260, 266. Emend.

Pachynevrum Agassiz, 1846. Nomencl. Zool. p. 778. Emend.

Serimus Brethes, 1913. Buenos Aires Mus. Nac. de Hist. Nat., An. 24: 90.

Type-species: *Serimus argentinus* Brethes. Orig. desig.

Propachyneurona Girault, 1917. Psyche 24: 102.

Type-species: *Encyrtus siphonophorae* Ashmead. Monotypic.

Neopachyneuron Girault, 1917. Descr. Hym. Chalcidoid. Variorum cum Observ. V, p. 9.

Type-species: *Pachyneuron eros* Girault. Monotypic.

Atrichoptilus Delucchi, 1956 (1955). Ztschr. f. Angew. Ent. 38: 141.

Type-species: *Pachyneuron aeneum* Masi. Orig. desig.

Revision: Delucchi, 1956 (1955). Ztschr. f. Angew. Ent. 38: 122-139 (European spp.).

Taxonomy: De Santis, 1957. Univ. Nac. de La Plata, Notas del Mus. 19: 118 (syn.). —Peck, 1963. Canad. Ent., Sup. 30: 612 (syn.). —Boucek, 1965. Mus. Natl. Pragae, Acta Ent. 11: 16-18 (syn.).

albutius (Walker). Va., s. to Fla., w. to B. C. and Calif.; Mexico. Host: *Allograptia exotica* (Wied.), *A. obliqua* (Say), *Baccha clavata* (F.), *B. fuscipennis* Say, *Eupeodes volucris* O. S., *Mesograptia polita* (Say), *Metasyrphus americanus* (Wied.), *M. confertus* Fluke, *Parargus tibialis* (Fall.), *Scaeva pyrastri* (L.), *Sphaerophoria cylindrica* (Say), *Syrphus opinator* O. S., *S. philadelphicus* Macq., *S. rectus* O. S., *S. ribesii* (L.), *S. torvus* O. S.

Pachynevron albutius Walker, 1843. Soc. Ent. de France, Ann. (2) 1: 158. ♀.

- Spalangia ? syrphi* Ashmead, 1881. Canad. Ent. 13: 171. ♀, ♂. Preocc. by Ratzeburg, 1848.
- Pachyneuron allograptae* Ashmead, 1887. U. S. Dept. Agr., Div. Ent. Bul. 14: 15. ♀, ♂.
- Taxonomy: Burks, 1975. Brit. Mus. (Nat. Hist.) Ent., Bul. 32: 154 (syn.).
- Biology: Kamal, 1926. Jour. Econ. Ent. 19: 725-727. — Kamal, 1939. Egypt Min. Agr., Tech. and Sci. Serv., Bul. Ent. Sect. 207: 36, 46-47. — Knight, 1944. Jour. Econ. Ent. 37: 101. — Bean, 1950. Jour. Econ. Ent. 43: 109-110. — Weems, 1954. Ohio Jour. Sci. 54: 51. — Brown and Clark, 1960. Canad. Ent. 92: 808. — Harper, 1963. Canad. Ent. 95: 871.
- altiscutum** Cook. N. B., Ont., Maine and N. H., s. to S. C., w. to Mich., Colo., Calif. Host: *Cremifanias nigrocellulata* Czerny, *Leucopis* sp., *L. americana* Mall., *L. obscura* Hal., *L. pinicola* Mall. Numerous other host records have been published, from Lepidoptera, Coccoidea, Pseudococcidae, and other Chalcidoidea, but these need to be restudied.
- Pachyneuron altiscuta* Cook, 1885 (1884). Mich. State Hort. Soc., Ann. Rpt. 14: 91. ♀, ♂.
- Biology: Clancy, 1944. Jour. Econ. Ent. 37: 450-451. — Judd, 1950 (1949). Ent. Soc. Amer., Ann. 42: 461-464. — Brown and Clark, 1957 (1956). Canad. Ent. 88: 679-682. — Clark and Brown, 1957. Canad. Ent. 89: 408-409. — Clark and Brown, 1962. Canad. Ent. 94: 1174. — Peterson, 1962. Canad. Ent. 94: 740.
- anthomyiae** Howard. Fla.; Hawaii. Host: *Leucopis* sp.
- Pachyneuron anthomyiae* Howard, 1885. In Hubbard, Insects Affecting the Orange, p. 217. ♀, ♂.
- Biology: Swezey, 1921. Jour. Econ. Ent. 14: 256.
- californicum** Girault. B. C., Wash., Oreg., Calif.; Mexico. Host: *Chrysopa californica* Coq., *C. majuscula* Banks.
- Pachyneuron californicum* Girault, 1917. Psyche 24: 90. ♀, ♂.
- Biology: Clancy, 1946. Univ. Calif. Publ., Ent. 7: 454-456.
- eros** Girault. Utah, B. C., Wash., Oreg., Calif.; Hawaii. Host: *Leucopis* sp., *L. bella* Loew.
- Pachyneuron eros* Girault, 1917. Descr. Hym. Chalcidoid. Variorum cum Observ. V, p. 1. ♀.
- Biology: Timberlake, 1926. Hawaii. Ent. Soc., Proc. 6: 308.
- groenlandicum** (Holmgren). Greenland. Ecology: Reared from syrphid.
- Pteromalus groenlandicus* Holmgren, 1872. Ofvers. Kongl. Vetensk.-Akad., Forh. 29: 100. ♀, ♂.
- Taxonomy: Hendriksen and Lundbeck, 1917. Meddel. Gruenland 22: 550-551.
- hammari** Crawford. N. Mex., Ariz.
- Pachyneuron hammari* Crawford, 1914. Insecutor Inscitiae Menstruus 2: 36. ♀, ♂.
- mucronatum** Girault. Kans., Tex., Ariz., Calif.; Mexico. Ecology: Associated with coccids on *Opuntia*. Host: *Leucopis* sp.
- Pachyneuron mucronatum* Girault, 1917 (1916). Insecutor Inscitiae Menstruus 4: 116. ♀.
- Biology: Brandhorst, 1943. Kans. Acad. Sci., Trans. 46: 168.
- siphonophorae** (Ashmead). Que., Maine, s. to Fla., w. to B. C., Wash., Oreg., Calif.; Hawaii, Mexico, West Indies, Cent. and So. Amer. Host: *Aphidius* sp., *Diaeretiella* sp., *D. rapae* (M'Int.), *Lysiphlebus* sp., *L. testaceipes* (Cress.), *Praon* sp., *Trioxys* sp. Numerous records have been published of this species as a primary parasite of a long list of species of aphids; rearings show, however, that this is a secondary parasite.
- Encyrtus siphonophorae* Ashmead, 1886. Amer. Ent. Soc., Trans. 13: 131. ♀.
- Pachyneuron aphidivora* Ashmead, 1887. U. S. Dept. Agr., Div. Ent. Bul. 14: 14. ♀.
- Pachyneuron maidaphis* Ashmead, 1888. Fla. Agr. Expt. Sta., Bul. 2: 23. ♀.
- Pachyneuron micans* Howard, 1890. U. S. Dept. Agr., Insect Life 2: 246. ♀, ♂.
- Taxonomy: Gahan, 1924 (1923). Ent. Soc. Wash., Proc. 25: 187 (syn.).
- Biology: Cole, 1925. Jour. Econ. Ent. 18: 222. — Horsfall, 1926. Iowa Univ., Nat. Hist. 11: 51. — Spencer, 1926. Ent. Soc. Amer., Ann. 19: 147. — Folsom and Bondy, 1930. U. S. Dept. Agr., Cir. 116: 8. — MacGillivray and Spicer, 1953. Canad. Ent. 85: 427. — Shands *et al.*, 1955. Ent. Soc. Wash., Proc. 57: 132-135. — van den Bosch *et al.*, 1962. Jour. Econ. Ent. 55: 861. — Jackson *et al.*, 1971. Jour. Econ. Ent. 64: 1435.

syrphicola Ashmead. Fla. Host: *Baccha clavata* (F.), *B. fuscipennis* Say, *Metasyrphus americanus* (Wied.).

Pachyneuron syrphi Ashmead, 1886. Amer. Ent. Soc., Trans. 13: 131. ♀, ♂. Preocc. by Ratzeburg, 1848 and Ashmead, 1881.

Pachyneuron syrphicola Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 193. N. name.

Biology: Miller, 1929. Fla. Agr. Expt. Sta., Bul. 203: 459-461.

texanum Girault. Ohio, La., Tex., N. Mex. Ecology: Reared from syrphid.

Pachyneuron texanum Girault, 1917. Psyche 24: 90. ♀.

validum Waterston. Calif. Host: *Euphyllura arbuti* Schwarz.

Pachyneuron validum Waterston, 1923. Bul. Ent. Res. 14: 110. ♀, ♂.

virginicum Girault. Maine, Va., Ill. Host: *Aphidius* sp.

Pachyneuron virginicum Girault, 1917. Psyche 24: 89. ♀, ♂.

Biology: Wage *et al.*, 1965. U. S. Dept. Agr., Tech. Bul. 1338: 29.

Genus PACHYCREPOIDEUS Ashmead

Pachycrepoideus Ashmead, 1904. Carnegie Mus., Mem. 1: 329.

Type-species: *Pachycrepoideus dubius* Ashmead. Orig. desig.

Anisopteromalia Boucek, 1954. Mus. Natl. Pragae, Acta Ent. 29: 57.

Type-species: *Anisopteromalia crassinervis* Boucek. Orig. desig.

Taxonomy: Boucek, 1957 (1956). Ceskoslov. Spolec. Ent., Casopis 53: 165 (syn.).

vindemiae (Rondani). Ont., s. to Fla., w. to B. C., Calif.; Cosmopolitan. Host: *Anastrepha* sp., *Calliphora* sp., *Ceratitis capitata* (Wied.), *Drosophila melanogaster* Meig., *Fannia canicularis* (L.), *F. scalaris* (F.), *Haematobia irritans* (L.), *Hylemya brassicae* (Bouche), *Lucilia illustris* (Meig.), *Musca domestica* L., *Phaenicia sericata* (Meig.), *Phormia regina* (Meig.), *Piophila casei* (L.), *Rhagoletis* sp., *R. fausta* (O. S.), *Stomoxys calcitrans* (L.).

Encyrtus vindemiae Rondani, 1875. Com. Agr. Parmense, Bol. 8: 145.

Encyrtus vindemiae Rondani, 1876. Soc. Ent. Ital., Bol. 8: 84. Emed.

Pachycrepoideus dubius Ashmead, 1904. Carnegie Mus., Mem. 1: 329. ♀.

Anisopteromalia crassinervis Boucek, 1954. Mus. Natl. Pragae, Acta Ent. 29: 57. ♀.

Pachycrepoideus elongata Delucchi, 1956 (1955). Ztschr. f. Angew. Ent. 38: 141. ♀.

Taxonomy: Delucchi, 1956 (1955). Ztschr. f. Angew. Ent. 38: 139-141 (syn.). —Graham, 1969.

Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 846-847 (syn.).

Biology: Girault and Sanders, 1910. Psyche 17: 108-117. —Martelli, 1910 (1909). Lab. Zool. Gen. e Agr. Portici, Bol. 4: 169-172. —Silvestri, 1917. Lab. Zool. Gen. e Agr. Portici, Bol. 12: 143-145. —Pemberton and Willard, 1918. Jour. Agr. Res. 15: 461-463. —Roberts, 1935. Jour. Agr. Res. 50: 493. —Crandall, 1939. Ent. Soc. Amer., Ann. 32: 632-654. —Nostvik, 1954. Oikos 5: 195-204. —Steve, 1959. Jour. Econ. Ent. 52: 530-531. —Azab *et al.*, 1964 (1963). Soc. Ent. d'Egypte, Bul. 47: 280. —Sychevskaia, 1963. Zool. Zhur. 42: 858. —Legner *et al.*, 1965. Puerto Rico Univ., Jour. Agr. 49: 372.

Morphology: Parker, 1924. Soc. Ent. de France, Ann. 93: 309 (larva).

TRIBE RHAPHITELINI

Genus RHAPHITELUS Walker

Rhaphitelus Walker, 1834. Ent. Mag. 2: 168, 178.

Type-species: *Rhaphitelus maculatus* Walker. Monotypic.

Styloceras Ratzeburg, 1844. Ichn. d. Forstins., v. 1, p. 207.

Type-species: *Styloceras ladenbergii* Ratzeburg. Desig. by Gahan and Fagan, 1923.

Rhaphidotelus Agassiz, 1846. Nomencl. Zool., p. 932. Emend.

Storthycerous Ratzeburg, 1848. Ichn. d. Forstins., v. 2, p. 208. N. name for *Styloceras*, thought to be inappropriate.

Eucerchysius Brethes, 1913. Buenos Aires, Mus. Nac. de Hist. Nat., An. 24: 103.

Type-species: *Eucerchysius scolyti* Brethes. Monotypic.

Evidently it is difficult to spell this generic name. Thomson, 1878 (Hym. Scand., v. 5, p. 37) spelled it *Raphitelus* and Kurdjumov, 1913 (Ent. Obozr. 13: 4) spelled it *Raphiteles*. Gahan and Fagan, 1923 (U. S. Natl. Mus., Bul. 124: 138) spelled its synonym *Styloceras* as *Stylocerus*.

Revision: Boucek, 1957. Mus. Natl. Pragae, Acta Ent. 2: 76-78 (European fauna).

Taxonomy: De Santis, 1952. Soc. Ent. Argentina, Rev. 15: 270 (syn.). — Hedqvist, 1963. Stud. Forest. Suecica 11: 93-94.

maculatus Walker. Que., s. to N. C., w. to Wash., Oreg., Calif.; Europe. Host: *Hylesinus* sp., *Magdalis* sp., *M. armicollis* (Say), *M. barbita* (Say), *Pissodes strobi* (Peck), *Phloeosinus punctatus* Lec., *Phloeotribus* sp., *Scolytus multistriatus* (Marsham), *S. rugulosus* (Ratz.).

Raphitelus maculatus Walker, 1934. Ent. Mag. 2: 179. "♂" = ♀.

Pteromalus Hecato Walker, 1839. Monog. Chalcid., v. 1, p. 271. ♂.

Pteromalus subulifer Foerster, 1841. Beitr. Monog. Pteromalinen, p. 30. ♀.

Taxonomy: Masi, 1919. Genova, Mus. Civ. Stor. Nat., Ann. (3) 8: 160-161. — Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 420-421 (syn., types).

Biology: Smith, 1899. Ent. Amer. 5: 216. — Russo, 1938. R. Lab. Ent. Agr. Portici, Bol. 2: 216-225. — Ferriere, 1948. Schweiz. Ent. Gesell. Mitt. 21: 527-528. — Leuchs, 1955. Ztschr. Pflanzenkrankh. u. Pflanzensch. 62: 550. — Jamnický, 1959. Biologia, Bratislava 14: 817. — Szczepanski, 1960. Polskie Pismo Ent. 30: 409. — Chararas, 1962. Encyc. Ent. 38: 452.

Morphology: Domenichini, 1953. Bol. Zool. Agr. e di Bach 19: 251 (gaster).

Genus METACOLUS Foerster

Metacolus Foerster, 1856. Hym. Stud., v. 2, pp. 65, 70.

Type-species: *Metacolus unifasciatus* Foerster. Monotypic.

Pterosema Foerster, 1878. Naturh. Ver. Rheinlande, Verh. 35: 44.

Type-species: *Pterosema varicolor* Foerster. Orig. desig.

Revision: Burks, 1965. Ent. Soc. Wash., Proc. 67: 116-119.

Taxonomy: Boucek, 1957. Mus. Natl. Pragae, Acta Ent. 2: 76 (syn.). — Hedqvist, 1963. Stud. Forest. Suecica 11: 97.

fasciatus Girault. N. Dak., s. to N. Mex., w. to Wash., Oreg., Calif. Ecology: Probably a primary parasite of scolytid beetles in gymnospermous trees, but usually reared in association with several other parasites. Its exact host relationships are difficult to establish.

Metacolus fasciatus Girault, 1917. Descr. Stellarum Nov., p. 14. ♀.

Metacolus bifasciatus Girault, 1917. Descr. Stellarum Nov., p. 14. ♀, ♂.

Taxonomy: Burks, 1953. Ent. Soc. Wash., Proc. 55: 44 (syn.).

keeni Burks. N. Mex., Calif. Ecology: Probably a primary parasite of scolytid beetles in pines. *Metacolus keeni* Burks, 1965. Ent. Soc. Wash., Proc. 67: 118. ♀, ♂.

TRIBE PTEROMALINI

Genus DINOTISCUS Ghesquiere

Dinotus Foerster, 1856. Hym. Stud., v. 2, pp. 66, 70. No species. Preocc. by Guettard, 1770.

Type-species: *Dinotus bidentulus* Thomson. Desig. by Ashmead, 1904.

Dinotiscus Ghesquiere, 1946. Rev. de Zool. et de Bot. Africaines 34: 370. N. name.

Revision: Crawford, 1912. U. S. Natl. Mus., Proc. 43: 169 (*Cecidostiba* Thomson). — Hedqvist, 1963. Stud. Forest. Suecica 11: 83-93 (Palearctic spp., *Dinotiscus*).

Taxonomy: Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 568 (Nearctic spp. placed in *Cecidostiba* belong in *Dinotiscus*).

acutus (Provancher). N. S. and Que., s. to Va. and W. Va., w. to B. C., Wash., Oreg., Calif.

Host: *Dendroctonus monticolae* Hopk., *Polygraphus rufipennis* (Kby.).

Dinotus acutus Provancher, 1887. Addit. Corr. Faune Ent. Canada Hym., p. 201. ♀.

Cecidostiba ashmeadi Crawford, 1912. U. S. Natl. Mus., Proc. 43: 170. ♀.

Taxonomy: Peck, 1951. In Muesebeck, et al., U. S. Dept. Agr., Agr. Monog. 2: 557 (syn.).
burkei (Crawford). Colo., N. Mex., Idaho, Utah, Ariz., Wash., Oreg., Calif. Host: *Dendroctonus brevicomis* Lec., *D. engelmanni* Hopk., *D. obesus* (Mann.).
Cecidostiba burkei Crawford, 1912. U. S. Natl. Mus., Proc. 43: 170. ♀.

Biology: Massey and Wygant, 1954. U. S. Dept. Agr., Cir. 944: 22, 26.
dendrotoni (Ashmead). Va., W. Va., N. C., Ga., Wis., Mont., Idaho, B. C., Wash., Calif. Host:
Cylindrocopturus furnissi Buch., *Dendroctonus frontalis* Zimm., *D. monticolae* Hopk.,
D. pseudosuga Hopk., *Ips grandicollis* (Eichh.), *Polygraphus rufipennis* (Kby.).
Cecidostiba dendrotoni Ashmead, 1894. Amer. Ent. Soc., Trans. 21: 337. ♀.

Biology: Furniss, 1942. Jour. Econ. Ent. 35: 859. —Evenden et al., 1943. U. S. Dept. Agr., Cir. 664: 17. —Fronk, 1947. Va. Agr. Expt. Sta., Tech. Bul. 108: 10. —Franklin, 1969. Ga. Ent. Soc., Jour. 4: 121.

elongatus (Ashmead). Fla.

Dinotus elongatus Ashmead, 1888. Canad. Ent. 20: 175. ♀.

polygraphi (Ashmead). Maine, Va., W. Va. Host: *Polygraphus rufipennis* (Kby.).
Cecidostiba polygraphi Ashmead, 1894. Amer. Ent. Soc., Trans. 21: 338. ♀, ♂.

thomsoni (Crawford). Wyo., Mont., Wash., Oreg., Calif. Host: *Pissodes* sp., *Scolytus ventralis* Lee.

Cecidostiba thomsoni Crawford, 1912. U. S. Natl. Mus., Proc. 43: 171. ♀, ♂.

Genus RHOPALICUS Foerster

Rhopalicus Foerster, 1856. Hym. Stud., v. 2, pp. 66, 70.

Type-species: *Cleonus maculifer* Foerster. Monotypic.

pulchripennis (Crawford). Que., and Maine, s. to Md. and Miss., w. to B. C., Wash., Oreg., Calif. Host: *Cylindrocopturus eatoni* Buch., *C. furnissi* Buch., *Dendroctonus brevicomis* Lec., *D. monticolae* Hopk., *D. murrayanae* Hopk., *D. ponderosae* Hopk., *Pissodes* sp., *P. proximatus* Hopk., *P. strobi* (Peck), *P. terminalis* Hopk., *Pseudohylesinus nebulosus* (Lec.), *Scolytus unispinosus* Lec.

Spintherus pulchripennis Crawford, 1912. U. S. Natl. Mus., Proc. 43: 168. ♀.

Rhopalicus americanus Girault, 1916. Ent. Soc. Amer., Ann. 9: 296. ♀.

Taxonomy: Gahan, 1924. U. S. Natl. Mus., Proc. 65 (4): 16 (syn.).

Biology: Taylor, 1929. Ent. Amer. (n. s.) 10: 17-22, 66-67. —DeLeon, 1934. Canad. Ent. 66: 61. —Furniss, 1942. Jour. Econ. Ent. 35: 859. —Reid, 1957. Canad. Ent. 89: 7. —Keen, 1958. U. S. Dept. Agr., Tech. Bul. 1169: 21, 100. —Stark and Wood, 1964. Canad. Ent. 96: 1217.

tutela (Walker). Que., Ont., Maine, N. H., Conn., N. Y., Pa., Mich., Wis.; Europe. Introduced from Europe into Ont. and Que. in mid 1930's, but known to be established in New England in 1920. Host: *Ips pini* (Say), *Pissodes strobi* (Peck).

Cheiropachus tutela Walker, 1836. Ent. Mag. 4: 14. ♀, ♂.

Cleonus maculifer Foerster, 1840. Beitr. Monog. Pteromalinen, p. 34. ♀.

Pteromalus suspensus Ratzeburg, 1844. Ichn. d. Forstins., v. 1, p. 189.

Pteromalus Spinolae Ratzeburg, 1844. Ichn. d. Forstins., v. 1, p. 189. ♀, ♂. Preocc. by Foerster, 1841.

Pteromalus immaculatus Ratzeburg, 1844. Ichn. d. Forstins., v. 1, pp. 189, 205.

Pteromalus lunula Ratzeburg, 1848. Ichn. d. Forstins., v. 2, p. 193. ♀.

Pteromalus multicolor Ratzeburg, 1848. Ichn. d. Forstins., v. 2, p. 193. N. name for *spinolae* Ratzeburg.

Pteromalus aemulus Ratzeburg, 1848. Ichn. d. Forstins., v. 2, p. 203.

Rhopalicus Anellus Thomson, 1878. Hym. Scand., v. 5, p. 42. ♀, ♂.

Taxonomy: Kurdjumov, 1913. Ent. obozr. 13: 10 (syn.). —Ferriere, 1948. Schweiz. Ent. Gesell. Mitt. 21: 520 (syn.). —Hedqvist, 1963. Stud. Forest. Suecica 11: 71-79 (characters). —Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 413 (types).

Biology: Hanson, 1937. Bul. Ent. Res. 28: 206. —Nuorteva, 1956. Acta Ent. Fenn. 13: 64. —Chararas, 1959. Soc. Ent. de France, Bul. 64: 11. —Chararas, 1962. Encyc. Ent. 38: 450.

—Titova, 1966. Ent. Obozr. 45: 58.

Genus CHEIROPACHUS Westwood

Cheiropachus Westwood, 1828. Zool. Jour. 4: 23.

Type-species: *Diplolepis quadrum* Fabricius. Orig. desig.

Cheiropachys Haliday, 1833. Ent. Mag. 1: 268. Emend.

Pachyphirus Agassiz, 1846. Nomencl. Zool., p. 777. N. name, unnecessarily proposed for *Cheiropachus*, thought to be preocc.

Chiropachys Vollenhoven, 1871. Schetsen Hym., v. 3, pl. 10. Emend.

Tropidogastra Ashmead, 1904. Carnegie Mus., Mem. 1: 323.

Type-species: *Tropidogastra arizonensis* Ashmead. Orig. desig.

Revision: Gahan, 1938. Ent. Soc. Wash., Proc. 40: 219-220.

arizonensis (Ashmead). La., Tex., N. Mex., Idaho, Ariz., Wash., Oreg., Calif. Host: *Phloeosinus* sp.

Tropidogastra arizonensis Ashmead, 1904. Carnegie Mus., Mem. 1: 323. ♀.

Dinarmus arizonicus Girault, 1917 (1916). Insectorum Inscitiae Menstruus 4: 109. ♀.

Taxonomy: Gahan, 1938. Ent. Soc. Wash., Proc. 40: 220 (type of each sp. the same specimen).

brunneri Crawford. Mont., Wyo., Wash., Oreg., Calif. Host: *Phloeosinus* sp., *Pissodes* sp.,

Pseudohylesinus nebulosus (Lec.), *Scolytus unispinosus* Lec., *S. ventralis* Lec.

Cheiropachys brunneri Crawford, 1912. U. S. Natl. Mus., Proc. 43: 165. ♀, ♂.

Biology: Bushing and Bright, 1965. Canad. Ent. 97: 201.

obscuripes Brues. Ont., N. Y., s. to N. C., w. to Ill. Host: *Phloeotribus liminaris* (Harr.).

Scolytus sp.

Cheiropachys obscuripes Brues, 1910. Wis. Nat. Hist. Soc., Bul. 8: 80. ♀.

quadrum (Fabricius). Que., Ont., N. H., s. to N. C. and Ala., w. to B. C., Wash., Oreg., Calif.; Europe. Host: *Magdalia aeneascens* Lec., *Phloeosinus canadensis* Swaine, *P. punctatus* Lec., *Scolytus multistriatus* (Marsham), *S. rugulosus* (Ratz.). For almost 100 years this sp. has been called *colon* Linnaeus, following Thomson, 1878 (Hym. Scand., v. 4, p. 33); however, Graham, 1969 (Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 417) saw Linnaeus's and Fabricius's types and established that *quadrum* Fabricius is the correct name for this species. *Sphecodes colon* Linnaeus belongs in *Dinotiscus* Ghesquiere.

Ichneumon quadrum Fabricius, 1787. Mantissa Insectorum, v. 1, p. 270.

Pteromalus bimaculatus Swederus, 1795. Svenska Vetensk. Akad., Handl. 16: 222.

Cleonymus maculipeurus Curtis, 1827. Brit. Ent., v. 4, fol. 194. ♂.

Pteromalus bicolorinus Ratzeburg, 1844. Ichn. d. Forstins., v. 1, p. 190. ♂.

Pteromalus binaevius Ratzeburg, 1844. Ichn. d. Forstins., v. 1, p. 190. ♂.

Pteromalus Fraxini Ratzeburg, 1844. Ichn. d. Forstins., v. 1, p. 191. ♀.

Pteromalus binimbatus Ratzeburg, 1844. Ichn. d. Forstins., v. 1, p. 191. ♀.

Pteromalus binubeculatus Ratzeburg, 1844. Ichn. d. Forstins., v. 1, p. 191. ♀.

Pachyphirus intermedius Foerster, 1856. Hym. Stud., v. 2, p. 70.

Taxonomy: Kurdjumov, 1913. Ent. Obozr. 13: 22-23 (syn.). —Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 416-417 (syn.).

Biology: Johnson, 1899. Ent. Soc. Wash., Proc. 4: 343. —Russo, 1938. R. Lab. Ent. Agr.

Portici, Bol. 2: 181-195. —Ferrière, 1948. Schweiz. Ent. Gesell., Mitt. 21: 522-523.

Morphology: Snodgrass, 1941. Smithson. Misc. Coll. 99: 36-37 (male genitalia).

Genus HABRITYS Thomson

Dimachus subg. *Habritys* Thomson, 1878. Hym. Scand., v. 5, pp. 50, 54.

Type-species: *Pteromalus brevicornis* Ratzeburg. Monotypic.

Habritus Ashmead, 1904. Carnegie Mus., Mem. 1: 276. Error.

Habritys Nikol'skaya, 1952. Keys to Fauna USSR 44: 233. Error.

brevicornis (Ratzeburg). Md., Mich., Ind., Idaho, Calif.; Europe. Host: *Crabro* sp., *Crossocerus* sp., *Ectemnius* sp.

Pteromalus brevicornis Ratzeburg, 1844. Ichn. d. Forstins., v. 1, p. 201.

Pteromalus (Schizonus) Pannewitzii Ratzeburg, 1852. Ichn. d. Forstins., v. 3, p. 230. ♀.

Taxonomy: Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 427 (syn.).

Biology: Saunt, 1925. Ent. Monthly Mag. 61: 257-258 — Hallet, 1927. Cardiff Nat. Soc., Trans. 60: 54. — Callan, 1936. Soc. Brit. Ent., Jour. 1: 128. — Valkeila, 1959. Hyont. Aikak., Suom. 25: 180-181. — Askew, 1962. Entomologist 95: 126.

latro Wallace, Que., N. Y., Va., Mich., Wis. Host: *Ceratina dupla* Say, *Ectemnius stirpicola* (Pack.), *Euplilis* sp.

Habritys latrus Wallace, 1954. Carnegie Mus., Ann. 33: 199. ♀.

Habritys latro Krombein, 1960. Ent. News 71: 32. Emend.

Biology: Krombein, 1960. Ent. News 71: 32, 67. — Krombein, 1964. Biol. Soc. Wash., Proc. 77: 103.

Genus ACAENACIS Girault

Acaenacis Girault, 1917. New Chalcid Flies, p. 1a.

Type-species: *Semiotellus sicigerae* Ashmead. Orig. desig.

lausus (Walker). Pa., Fla., Ark. Ecology: Emerges from galls of *Disholcaspis quercusvirens* (Ashmead) on twigs of live oak.

Pteromalus Lausus Walker, 1847. Ann. and Mag. Nat. Hist. (1) 19: 392. ♀.

Pteromalus Dipsas Walker, 1847. Ann. and Mag. Nat. Hist. (1) 19: 394. ♂.

Semiotellus sicigerae Ashmead, 1885. Amer. Ent. Soc., Trans. 12: Proc. p. xvii. ♀, ♂.

Taxonomy: Burks, 1975. Brit. Mus. (Nat. Hist.) Ent., Bul. 32: 159 (syn.; lectotypes of *lausus* and *dipsas*).

Genus MEGATRYDYMUS Girault

Megatrydymus Girault, 1917. New Chalcid Flies, p. 1a.

Type-species: *Megatrydymus taciti* Girault. Orig. desig.

agrili (Rohwer). Oreg., Calif. Host: *Agrilus angelicus* Horn.

Dinotus agrili Rohwer, 1919. Ent. Soc. Wash., Proc. 21:6. ♀.

Taxonomy: Burks, 1967. In Krombein and Burks, U.S. Dept. Agr., Agr. Monog. 2, Sup. 2, p. 269.

taciti Girault. N. J., Ark., Colo., Oreg., Calif. Ecology: Rared from cynipid galls on oak.

Megatrydymus taciti Girault, 1917. New Chalcid Flies, p. 1a. ♂.

Genus PERNIPHORA Ruschka

Perniphora Ruschka, 1923. Ent. Mitt. 12: 198.

Type-species: *Perniphora robusta* Ruschka. Monotypic.

americana Miller. N. B., Maine, N. H., N. Y., Mont., Wash. Ecology: Probably parasitic on species of *Trypodendron* developing in logs of birch and conifers.

Perniphora americana Miller, 1965. Canad. Ent. 97: 78. ♀, ♂.

Genus OXYSYCHUS Delucchi

Oxysyphus Delucchi, 1956. Ztschr. f. Angew. Ent. 39: 240, 246.

Type-species: *Dinarmus silvestrii* Masi. Orig. desig.

acanthocini (Ashmead). Que., W. Va., Fla. Host: *Acanthocinus obsoletus* (Oliv.).

Metastenus (?) *acanthocini* Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 198. ♀, ♂.

Biology: Hopkins, 1893. W. Va. Agr. Expt. Sta., Bul. 32: 226. — Beaulne, 1953 (1951). Que. Soc. Prot. Pl., Ann. Rpt. 32-33: 197.

callidii (Ashmead). N. J., Va. Host: *Callidium antennatum* Newm.

Aetroyx callidii Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 223. ♀.

facialis (Provancher). Que., Ont., Pa.

Charitopus facialis Provancher, 1887. Addit. Corr. Faune Ent. Canada Hym., p. 203. ♂.

Taxonomy: Burks, 1964 (1963). Canad. Ent. 95: 1256.

Genus ANISOPTEROMALUS Ruschka

Anisopteromalus Ruschka, 1912. Zool.-Bot. Gesell. Wien, Verh. 42: 243.

Type-species: *Anisopteromalus mollis* Ruschka. Monotypic.

Aplastomorpha Crawford, 1913. U. S. Natl. Mus., Proc. 45: 252.

Type-species: *Aplastomorpha pratti* Crawford. Monotypic.

calandrae (Howard). N. Y., s. to Fla., w. to Oreg., Calif.; Cosmopolitan. Host: *Ephestia elutella* (Hbn.); *Callosobruchus chinensis* (L.), *C. maculatus* (F.), *C. phaseoli* (Gyll.).

Caulophilus oryzae (Gyll.), *Lasioderma serricornе* (F.), *Sitophilus granarius* (L.), *S. oryzae* (L.), *S. zeamais* Mots., *Stator pruininus* (Horn), *Stegobium paniceum* (L.).

Pteromalus calandrae Howard, 1881. U. S. Dept. Agr., Ann. Rpt. for 1880, p. 273. ♂.

Meraporus Vandinei Tucker, 1910. Canad. Ent. 42: 342. ♀, ♂.

Anisopteromalus mollis Ruschka, 1912. Zool.-Bot. Gesell. Wien, Verh. 42: 243. ♀, ♂.

Aplastomorpha pratti Crawford, 1913. U. S. Natl. Mus., Proc. 45: 252. ♀, ♂.

Neocatolaccus mamezophagus Ishii and Nagasawa, 1942. Kontyu 16: 67. ♀, ♂.

Taxonomy: Gahan, 1923. Ent. Soc. Wash., Proc. 25: 188 (type of *calandrae* destroyed).

—Ferriere, 1939. Bul. Ent. Res. 30: 165-166 (possible syn.). —Tachikawa, 1966. Jap. Jour. Appl. Ent. Zool. 10: 99 (syn.).

Biology: Runner, 1919. U. S. Dept. Agr., Bul. 737: 36. —Waterston, 1921. Roy. Soc., Rpt.

Grain Pests Com. 9: 10-21. —Cotton, 1923. Jour. Agr. Res. 23: 549-556. —Back and Cotton, 1938. U. S. Dept. Agr., Farmers' Bul. 1260: 41-42. —Back, 1939. Jour. Econ. Ent. 32: 747.

Agr., Cir. 635: 12. —Cotton, 1942. Amer. Miller 71: 60. —Whiting, 1947. Jour. Hered. 38: 150. —Chatterji, 1955. Zool. Soc. India, Proc. 8: 11-23. —Ghani and Sweetman, 1955. Biologia, Lahore 1: 115-139. —Beratlief, 1966. Prot. Pl., Bucharest 4: 253. —Gothilf, 1969. Entomophaga 14: 199.

Morphology: Cabal Concha, 1956. Rev. Fac. Nac. Agron. Colombia 18: 61-72 (immature stages).

Genus DINARMUS Thomson

Dimachus subg. *Dinarmus* Thomson, 1878. Hym. Scand., v. 5, pp. 50, 56.

Type-species: *Dinarmus acutus* Thomson. Desig. by Ashmead, 1904.

Bruchobius Ashmead, 1904. Carnegie Mus., Mem. 1: 314, 315.

Type-species: *Bruchobius laticeps* Ashmead. Orig. desig.

Sphaerakis Masi, 1924. Genova, Mus. Civ. Stor. Nat., Ann. 51: 156.

Type-species: *Sphaerakis mayri* Masi. Monotypic.

Taxonomy: Delucchi, 1956. Ztschr. f. Angew. Ent. 39: 240. —Ferriere and Delucchi, 1957. Entomophaga 2: 121.

acutus (Thomson). N. J., Pa., N. C., Mich., Ky., Tenn., Minn., Nebr., Wash., Oreg.; Europe. Host: *Bruchidius ater* (Marsham), *Bruchus brachialis* Fahr.

Dimachus (*Dinarmus*) *acutus* Thomson, 1878. Hym. Scand., v. 5, p. 56. ♀.

Sphaerakis mayri Masi, 1924. Genova, Mus. Civ. Stor. Nat., Ann. 51: 157. ♀, ♂.

Taxonomy: Mani, 1939. Indian Jour. Ent. 1: 76. —Delucchi, 1956. Ztschr. f. Angew. Ent. 39: 243 (syn.). —Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 434-435 (*Pteromalus robustus* Walker, 1847. Ann. and Mag. Nat. Hist. 19: 230, described from a single male, may be the same as *acutus*).

Biology: Delucchi, 1962. Awamia 2: 123.

Morphology: Domenichini, 1953. Bol. Zool. Agr. e di Bach. 19: 218 (gaster).

laticeps (Ashmead). D. C., s. to Fla., w. to Calif.; Cosmopolitan. Host: *Acanthoscelides obtectus* (Say), *Bruchus pisorum* (L.), *Callosobruchus maculatus* (F.).

Bruchobius laticeps Ashmead, 1904. Carnegie Mus., Mem. 1: xi, 313. ♀.

Taxonomy: Waterston, 1921. Roy. Soc., Rpt. Grain Pests Com. 9: 14-16. —Delucchi, 1956. Ztschr. f. Angew. Ent. 39: 243-246.

Biology: Paddock and Reinhard, 1919. Tex. Agr. Expt. Sta., Bul. 256: 80-81. —Masi, 1924. Genova, Mus. Civ. Stor. Nat., Ann. 51: 152. —Chatterji, 1954. Indian Jour. Ent. 16: 77. —Cheema and Misra, 1962. Current Sci. 31: 21. —Luca, 1964. Inst. Franc. d'Afr. Noire, Bul. (A) 26: 1201.

Genus NORBANUS Walker

Norbanus Walker, 1843. Soc. Ent. de France, Ann. (2) 1: 159.

Type-species: *Norbanus dysaules* Walker. Desig. by Ashmead, 1904.

Arthrolysis Foerster, 1856. Hym. Stud., v. 2, p. 52. No species.

Type-species: *Pteromalus scabriculus* Nees. Desig. by Ashmead, 1904.

Picroscytus Thomson, 1878. Hym. Scand., v. 5, pp. 50, 58.

Type-species: *Pteromalus scabriculus* Nees. Monotypic.

Stylophorella Ashmead, 1904. Carnegie Mus. Mem. 1: 275.

Type-species: *Stylophorella perplexa* Ashmead. Orig. desig.

dysaules Walker. Fla.

Norbanus dysaules Walker, 1843. Soc. Ent. de France, Ann. (2) 1: 158. ♀, ♂.

Taxonomy: Burks, 1975. Brit. Mus. (Nat. Hist.) Ent., Bul. 32: 157 (Lectotype designated).

perplexus (Ashmead). N. J., Del., Tenn., Kans., Tex.

Stylophorella perplexa Ashmead, 1904. Carnegie Mus., Mem. 1: 275. ♀.

Taxonomy: Gahan and Peck, 1946. Wash. Acad. Sci., Jour. 36: 316.

pisius Walker. Fla. Host: *Euscepes porcellus* Boh.

Norbanus pisius Walker, 1843. Soc. Ent. de France, Ann. (2) 1: 160. ♀.

Pteromalus Hybreas Walker, 1847. Ann. and Mag. Nat. Hist. (1) 19: 397. ♀.

Taxonomy: Burks, 1975. Brit. Mus. (Nat. Hist.) Ent., Bul. 32: 160 (syn.).

Genus HOMOPORUS Thomson

Merisus subg. *Homoporus* Thomson, 1878. Hym. Scand., v. 5, pp. 60, 64.

Type-species: *Pteromalus fulviventris* Walker. Desig. by Ashmead, 1904.

Phaenacra Foerster, 1878. Naturh. Ver. Rheinlande, Verh. 35: 51.

Type-species: *Phaenacra nubigera* Foerster. Monotypic.

Parapteromalus Ashmead, 1904. Carnegie Mus., Mem. 1: 320.

Type-species: *Parapteromalus isosomatis* Ashmead. Orig. desig.

Merisoporus Masi, 1926. Genova, Mus. Civ. Stor. Nat., Ann. 50: 226.

Type-species: *Pteromalus luniger* Nees. Orig. desig.

Pseudomeris Erdos and Novicky, 1953. In Erdos, Acta Biol. Hung. 4: 236.

Type-species: *Pseudomeris stipae* Erdos and Novicky, Orig. desig.

This genus corresponds to *Merisus* as used in all North American literature published after about 1900. Following the publication by Delucchi, 1956 (Ztschr. f. Angew. Ent. 39: 229-233) the genus *Merisus* Walker has been limited to Palearctic species, and all North American species are placed in *Homoporus* Thomson.

Taxonomy: Delucchi, 1957. Ztschr. f. Angew. Ent. 40: 418-419 (syn.). —Graham, 1969. Brit.

Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 444-458 (syn.; key to British, and some other European, spp.; types).

atriscapus (Gahan), n. comb. N. Dak. Ecology: Reared from stems of *Stipa comata*.

Merisus atriscapus Gahan, 1927. U. S. Natl. Mus., Proc. 71 (4): 4. ♀, ♂.

chalcidiphagus (Walsh and Riley). Ont., N. Y., s. to S. C., w. to Oreg. and Calif.; Europe. Host: *Ditropinotus aureoviridis* (Cwf.), *Eurytoma parva* Phil., *Harmolita* sp., *H.*

albomaculata (Ashm.), *H. elymicola* P. and E., *H. grandis* (Riley), *H. hordei* (Harr.), *H. linearis* (Walk.), *H. secale* (Fitch), *H. tritici* (Fitch), *H. vaginicola* (Doane).

Pteromalus Nypsius Walker, 1839. Ann. and Mag. Nat. Hist. (1) 4: 274. ♀.

Semiotellus chalcidiphagus Walsh and Riley, 1869. Amer. Ent. 1: 152. ♀, ♂.

Homoporus crassinervis Thomson, 1878. Hym. Scand., v. 5, p. 68. ♀.

Taxonomy: Erdos, 1953. Acad. Sci. Hung., Acta Biol. 4: 239 (placed in *Phaenacra*).

—Delucchi, 1957. Ztschr. f. Angew. Ent. 40: 417-418 (placed in *Homoporus*). —Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 449 (types; *nypsius* Walker, 1839, has priority over *chalcidiphagus* Walsh and Riley, 1869, but the latter is well known and generally accepted).

Biology: Riley, 1887. U. S. Dept. Agr., Ann. Rpt. for 1886, pp. 540-542. —Webster, 1893. U. S. Dept. Agr., Insect Life 6: 151. —Webster, 1909. U. S. Dept. Agr., Bur. Ent. Cir. 106: 8-9.

—Phillips, 1918. U. S. Dept. Agr., Farmers' Bul. 1006: 11, 13. —Phillips and Poos, 1921. Jour. Agr. Res. 21: 405-406. —Phillips and Poos, 1923. U. S. Dept. Agr., Farmers' Bul.

1323: 8. —Gahan, 1934 (1933). U. S. Dept. Agr., Misc. Pub. 174: 104-109. —Cannon, 1963. Canad. Ent. 95: 34.

cognatus (Gahan), n. comb. Calif. Host: *Mayetiola destructor* (Say).

Merisus cognatus Gahan, 1934 (1933). U. S. Dept. Agr., Misc. Pub. 174: 102. ♀.

destructor (Say). P. E. I., Que., Ont., Vt., N. Y., s. to S. C., w. to Wash., Oreg., Calif.; Europe. Host: *Mayetiola destructor* (Say); *Platygaster zosine* Walk.

Ceraphron destructor Say, 1817. Acad. Nat. Sci. Phila., Jour. (1) 1: 47-48, 63.

Merisus intermedius Lindeman, 1887. Soc. Imp. Nat. Moscou, Bul. (2) 1: 179-183, 192. ♀, ♂.

Taxonomy: Gahan, 1934 (1933). U. S. Dept. Agr., Misc. Pub. 174: 89-95 (syn.). —Szelenyi, 1956. Mus. Nat. Hung., Ann. Hist. Nat. (n. s.) 7: 171-172. (*Homoporus*). —Delucchi, 1957. Ztschr. f. Angew. Ent. 40: 418-419 (*Homoporus* subg. *Phaenacra*).

Biology: Fitch, 1862 (1861). N. Y. State Agr. Soc. Trans. 21: 827-829, 843. —Howard, 1884.

Psyche 4: 206. —Forbes, 1885. Ill. State Ent., Rpt. 14: 44-49. —Riley, 1885. U. S. Natl. Mus., Proc. 8: 413-416. —Osborn, 1898. U. S. Dept. Agr., Div. Ent., Bul. (n. s.) 16: 28-31.

—Washburn, 1902. Minn. Agr. Expt. Sta., Bul. 77: 6-7. —Packard, 1916. Jour. Agr. Res. 6: 373-377. —McCulloch, 1923. Kans. Agr. Expt. Sta., Tech. Bul. 11: 64. —Hill and Smith, 1928. Jour. Agr. Res. 36: 153-155. —Hill et al., 1939. U. S. Dept. Agr., Tech. Bul. 689: 4-15. —Lapina, 1948. Zool. Zhur. 27: 331. —Hill, 1953. U. S. Dept. Agr., Cir. 923: 2-15.

Morphology: Hill and Pinckney, 1940. U. S. Dept. Agr., Tech. Bul. 715: 8, 13 (immature stages).

febriculosus (Girault), P. E. I., Que., Vt., s. to S. C., w. to Sask., N. Dak., Nebr., Kans., Okla.; Europe. Host: *Mayetiola destructor* (Say); *Bracon cephi* (Gah.), *Eupelmus allynnii* (French), *Harmolita* sp., *H. albomaculata* (Ashm.), *H. grandis* (Riley), *H. hordei* (Harr.), *H. tritici* (Fitch), *H. vaginicola* (Doane), *Platygaster zosine* Walk.

Merisus febriculosus Girault, 1917. Descr. Stellarum Nov., p. 17. ♀.

Homoporus filicornis Erdos, 1953. Mus. Nat. Hung., Ann. Hist. Nat. (n. s.) 6: 241. ♀.

Taxonomy: Gahan, 1921 (1920). Ent. Soc. Wash., Proc. 22: 238-239. (*febriculosus* misdet. as *isosomatis* Ashm.). —Gahan, 1934 (1933). U. S. Dept. Agr., Misc. Pub. 174: 95-99 (descr., bibliog.; occurs in Europe). —Szelenyi, 1956. Mus. Nat. Hung., Ann. Hist. Nat. (n. s.) 7: 168 (*Homoporus*). —Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 453 (some doubts of syn. of *febriculosus* and *filicornis*).

Biology: Phillips and Poos, 1923. U. S. Dept. Agr., Farmers' Bul. 1323: 8. —Hill and Smith, 1928. Jour. Agr. Res. 36: 153-154. —Hill et al., 1939. U. S. Dept. Agr., Tech. Bul. 689: 4-7, 11-15. —Cannon, 1963. Canad. Ent. 95: 34.

Morphology: Hill and Pinckney, 1940. U. S. Dept. Agr., Tech. Bul. 715: 8-13 (larvae).

flaviventris (Girault), n. comb. Md.

Merisus flaviventris Girault, 1915. Ent. Soc. Amer., Ann. 8: 282. ♀.

harmolitae (Gahan), n. comb. Calif.

Merisus harmolitae Gahan, 1928. U. S. Natl. Mus., Proc. 71 (4): 2. ♀, ♂.

isosomatis (Ashmead), n. comb. Ind., Ill. Host: *Harmolita* sp.

Parapteromalus isosomatis Ashmead, 1904. Carnegie Mus., Mem. 1: 320, 384. ♀.

Merisus carinatus Girault, 1916. Soc. Ent. 31: 57. ♀, ♂.

Taxonomy: Gahan and Peck, 1946. Wash. Acad. Sci., Jour. 36: 316 (syn.).

Biology: Webster, 1903 (1902). Ind. Acad. Sci., Proc. for 1902, p. 103 (Nomen nudum).

mordellisteneae (Crawford), n. comb. Pa., Md., D. C., Va., w. to Kans., Tex., Calif. Host:

Mordellistena pustulata (Melsh.); *Mayetiola destructor* (Say); *Harmolita* sp.

Merisus mordellisteneae Crawford, 1910. Ent. Soc. Wash., Proc. 12: 145. ♀.

Taxonomy: Gahan, 1934 (1933). U. S. Dept. Agr., Misc. Pub. 174: 99-102.

Morphology: Hill and Pinckney, 1940. U. S. Dept. Agr., Tech. Bul. 715: 9, 11-13 (larvae).

octoguttatus (Girault), n. comb. Md.

Merisus octoguttata Girault, 1915. N. Y. Ent. Soc., Jour. 23: 166. ♀.

semilongifasciatus (Girault), n. comb. Md.

Merisus semilongifasciatus Girault, 1915. Ent. Soc. Amer., Ann. 8: 282. ♀.

texensis (Girault), n. comb. Tex.

Merisus texensis Girault, 1917. Descr. Stellarum Nov., p. 17. ♀.

Genus CALLITULA Spinola

Callitula Spinola, 1811. Paris Mus. d'Hist. Nat., Ann. 17: 151.

Type-species: *Callitula bicolor* Spinola. Monotypic.

Micromelus Walker, 1833. Ent. Mag. 1: 371, 464.

Type-species: *Micromelus rufomaculatus* Walker. Desig. by Westwood, 1840.

Baeotomus Foerster, 1856. Hym. Stud. v. 2, p. 145. N. name, unnecessarily proposed for *Micromelus*, thought to be preoccupied in Botany.

Taxonomy: Gahan, 1934 (1933). U. S. Dept. Agr., Misc. Pub. 174: 111-113. — Szelenyi, 1956. Mus. Nat. Hung., Ann. Hist. Nat. (n. s.) 7: 167-170.

bicolor Spinola. N. Y., s. to Va., w. to N. Dak. and Kans.; Europe. Host: *Mayetiola destructor* (Say), *Meromyza americana* Fitch, *Oscinella frit* (L.); *Platygaster zosine* Walk.

Callitula bicolor Spinola, 1811. Paris Mus. d'Hist. Nat. Ann. 17: 151.

Micromelus rufo-maculatus Walker, 1833. Ent. Mag. 1: 465. ♀, ♂.

Pteromalus plagiatus Nees, 1834. Hym. Ichn. Aff. Monog., v. 2, p. 115. ♀.

Taxonomy: Nees, 1834. Hym. Ichn. Aff. Monog., v. 2, p. 115 (syn.). — Gahan, 1934 (1933). U. S. Dept. Agr., Misc. Pub. 174: 109-114 (syn.). — Boucek, 1964. Entomophaga 9: 10. — Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 461 (types).

Biology: Hill and Smith, 1928. Jour. Agr. Res. 36: 153-155. — Hill *et al.*, 1939. U. S. Dept. Agr., Tech. Bul. 689: 13. — Lapina, 1948. Zool. Zhur. 27: 331. — Simmonds, 1952. Bul. Ent. Res. 43: 513, 528-533, 539-540. — Simmonds, 1953. Bul. Ent. Res. 44: 386-393. — Hemer, 1959. Ztschr. f. Angew. Ent. 44: 339.

Morphology: Hill and Pinckney, 1940. U. S. Dept. Agr., Tech. Bul. 715: 5, 11-13 (larvae).

cyrinus (Walker). Md., s. to Fla., w. to Ill. Host: *Mayetiola destructor* (Say).

Lampretatus cyrinus Walker, 1843. Soc. Ent. de France, Ann. (2) 1: 157.

Cryptoprymnus illinoensis Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 228. ♀.

Taxonomy: Burks, 1975. Brit. Mus. (Nat. Hist.) Ent., Bul. 32: 155 (syn.).

Genus PSILOCERA Walker

Psilocera Walker, 1833. Ent. Mag. 1: 371, 373.

Type-species: *Psilocera obscura* Walker. Monotypic.

Metopon Walker, 1834. Ent. Mag. 2: 302.

Type-species: *Metopon atrum* Walker. Monotypic.

Eupsilocera Westwood, 1839. Introd. Mod. Class. Ins., v. 2, Synopsis, p. 69. N. name, unnecessarily proposed for *Psilocera*.

Metopum Agassiz, 1846. Nomencl. Zool., p. 670. Emend.

Dichalysis Foerster, 1856. Hym. Stud., v. 2, pp. 52, 56. N. name, unnecessarily proposed for *Psilocera*.

Psilocera was twice renamed by authors who thought the name was preoccupied by *Psilocerus* Ruthe, 1831. Graham, 1969 (Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 463) is not sure the North American species referred to *Psilocera* really belong to it.

californica (Ashmead). Ga., Kans., Calif.

Metapon(!) californicum Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 229. ♀, ♂.

rufipes (Ashmead). N. H., N. J., D. C., Ga., Fla., S. Dak., Kans. Host: *Chlamisus plicatus* (F.).

Metapon(!) rufipes Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 229. ♀, ♂.

Genus CATOLACCUS Thomson

Pteromalus subg. *Catolaccus* Thomson, 1878. Hym. Scand., v. 5, pp. 146, 152.

Type-species: *Catolaccus cavigena* Thomson. Monotypic.

Merisoides Masi, 1911. Lab. Zool. Gen. e Agr. Portici, Bol. 5: 141.

Type-species: *Merisoides crassiceps* Masi. Monotypic.

The European species *cavigena* Thomson and *crassiceps* Masi are generally accepted to be synonyms of *ater* Ratzeburg. Graham, 1969 (Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 467) is not, however, entirely satisfied that this is true.

Revision: Crawford, 1908 (1907). Ent. Soc. Wash., Proc. 9: 160. —Burks, 1954. U. S. Dept. Agr., Tech. Bul. 1093: 4-8.

Taxonomy: Delucchi, 1956. Ztschr. f. Angew. Ent. 39: 230 (syn.).

aeneoviridis (Girault). Que., Ont., Mass., s. to Fla., w. to B. C. and Calif.; Mexico, West Indies.

Ecology: An obligate secondary parasite. Host: *Apanteles* sp., *A. aristoteliae* Vier., *A. congregatus* (Say), *A. flaviconchae* Riley, *A. marginiventris* (Cress.), *A. medicaginis* Mues., *A. militaris* (Walsh), *Bathyplectes* sp., *B. curculionis* (Thoms.), *Camptolepis argenteifrons* (Cress.), *Casinaria limenitidis* (How.), *Goniozus platynotae* Ashm., *Hormius basalis* (Prov.), *Hyposoter pilosulus* (Prov.), *Macrocentrus* sp., *Meteorus* sp., *M. acronyctae* Mues., *Rogas laphygnae* Vier.

Arthrolytus aeneoviridis Girault, 1911. Canad. Ent. 43: 351, 372. ♀, ♂.

Dibrachys meteorii Gahan, 1913. U. S. Natl. Mus., Proc. 46: 436. ♀, ♂.

Taxonomy: Girault, 1920. U. S. Natl. Mus., Proc. 58: 212.

Biology: Vickery, 1929. U. S. Dept. Agr., Tech. Bul. 138: 21, 32-35, 38, 53-54. —Atkins et al., 1957. Ent. Soc. Amer., Ann. 50: 257. —Allen and Smith, 1958. Hilgardia 25: 29.

cyanoideus Burks. Maine, Mass., Ohio, Mich., Ill., Minn., Iowa, Nebr., Wyo. Host: *Apanteles* sp., *Hyposoter* sp., *H. fugitivus* (Say).

Catolaccus cyanoideus Burks, 1954. U. S. Dept. Agr., Tech. Bul. 1093: 7. ♀, ♂.

fragariae Rohwer. Del., Ga., Tenn. Host: *Anthonomus signatus* Say, *Apion decoloratum* Smith.

Catolaccus fragariae Rohwer, 1934. Ent. Soc. Wash., Proc. 36: 44. ♀, ♂.

Biology: Bissell, 1938. Jour. Econ. Ent. 31: 536.

grandis (Burks), n. comb. Tex., Ariz.; Mexico, Cent. Amer. Introduced into Texas and Arizona from Mexico, but may not be established. Host: *Anthonomus grandis* Boh.

Heterolaccus grandis Burks, 1954. U. S. Dept. Agr., Tech. Bul. 1093: 9. ♀, ♂.

Taxonomy: Delucchi, 1958. Bol. Zool. Agr. e di Bach. (2) 1: 53-54 (Nearctic spp. placed in *Heterolaccus* belong elsewhere).

Biology: Cross and Mitchell, 1969. Ent. Soc. Amer., Ann. 62: 235-236.

hunteri Crawford. Del., Va., N. C., S. C., Ga., Ala., Miss., Ark., Tex., Ariz., Calif.; Mexico, Guatemala, Hawaii. Host: *Acanthoscelides bisignatus* (Horn.), *A. compressicornis* (Schaeff.), *Anthonomus aeneolus* Dietz, *A. albopilosus* Dietz, *A. disjunctus* Lec., *A. eugenii* Cano, *A. grandis* Boh., *A. heterothecae* Pierce, *A. nebulosus* Lec., *A. nigrinus* Boh., *A. squamosus* Lec., *A. thurberiae* Pierce, *Gerstaeckeria nobilis* (Lec.), *Prionomerus calceatus* Say, *Rynchaenus pallicornis* (Say), *Smicralax tuberculatus*

Pierce, *Tachypterus quadrigibbus* (Say), *Zygobasis xanthoxyli* Pierce. Introduced from Guatemala into Hawaii for control of *Anthonomus eugenii* Cano.

Catolaccus hunteri Crawford, 1908 (1907). Ent. Soc. Wash., Proc. 9: 160. ♀, ♂.

Biology: Pierce et al., 1912. U. S. Dept. Agr., Bur. Ent. Bul. 100: 42, 51, 54-66. —Pierce and Cushman, 1915. Ent. Soc. Wash., Proc. 17: 166.

kansensis (Girault). N. C., S. C., Wis., Ill., Miss., Iowa, La., Kans., Idaho, Ariz., Calif. Host: *Chrysopa* sp.

Habrocytus kansensis Girault, 1917. Descr. Hym. Chalcidoid. Variorum cum Observ., V, p. 3. ♀.

Archolytus kansensis Girault, 1920. U. S. Natl. Mus., Proc. 58: 211. ♀. Redescription, based on same specimens as *Habrocytus kansensis*; both a synonym and homonym.

victoria Burks. Tex., Idaho, Utah, Ariz., Calif. Host: *Apanteles* sp.

Catolaccus victoria Burks, 1954. U. S. Dept. Agr., Tech. Bul. 1093: 6. ♀, ♂.

Genus ENDOMYCHOBIUS Ashmead

Endomychobius Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 227.

Type-species: *Endomychobius flavipes* Ashmead. Orig. desig.

flavipes Ashmead. D. C. Host: *Endomychus biguttatus* Say.

Endomychobius flavipes Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 227. ♀, ♂.

Taxonomy: Girault, 1920. U. S. Natl. Mus., Proc. 58: 212.

Genus PSYCHOPHAGUS Mayr

Pteromalus subg. *Diglochis* Thomson, 1878. Hym. Scand., v. 5, pp. 147, 156. Preocc. by Foerster, 1856.

Type-species: *Pteromalus omnivorus* Walker. Monotypic.

Psychophagus Mayr, 1904. Zool.-Bot. Gesell. Wien, Verh. 54: 598. N. name.

omnivorus (Walker). Que., Ont., s. to Del., w. to Wis. and Colo.; Europe. Ecology: Both a primary and secondary parasite. A common European species, introduced and first recovered in Massachusetts in 1894. Host: *Achatodes zeae* (Harr.), *Archippus packardianus* (Fern.), *Catocala* sp., *Choristoneura fumiferana* (Clem.), *Cnidocampa flavescens* (Walk.), *Datana ministra* (Drury), *Diacrisia virginica* (F.), *Estigmene acrea* (Drury), *Grapholita molesta* (Busek), *G. packardi* (Zell), *Ichthyura inclusa* Hbn., *Macronoctua onusta* Grote, *Malacosoma americanum* (F.), *M. disstria* Hbn., *Nygma phaeorrhoea* (Donov.), *Orgya leucostigma* (Smith), *Platysamia cecropia* (L.), *Porthetria dispar* (L.), *Stilpnoptila salicis* (L.), *Utetheisa bella* (L.), *Vanessa atalanta* (L.); *Compsilura concinnata* (Meig.); *Cephalcia marginata* Middk., *Gilpinia hercyniae* (Htg.), *Itolectis conquisitor* (Say), *Macrocentrus peroneae* Mues., *Neodiprion* sp., *N. lecontei* (Fitch), *Pristiphora geniculata* (Htg.).

Pteromalus omnivorus Walker, 1835. Ent. Mag. 3: 204. ♀, ♂.

Pteromalus Processioneae Ratzeburg, 1844. Ichn. d. Forstins., v. 1, p. 194. ♀.

Pteromalus rotundatus Ratzeburg, 1844. Ichn. d. Forstins., v. 1, p. 194, footnote. Preocc. by Fonscolombe, 1832.

Pteromalus Antorides Walker, 1845. Linn. Soc. London, Proc., Zool. 1: 262. ♂.

Pteromalus Coeruleocephala Ratzeburg, 1852. Ichn. d. Forstins., v. 3, p. 237.

Pteromalus chrysorrhoeae Dalla Torre, 1898. Cat. Hym., v. 5, p. 117. N. name for *rotundatus* Ratzeburg.

Taxonomy: Kurdjumov, 1913. Ent. Obozr. 13: 16 (syn.). —Bakkendorf, 1955. Ent. Meddel. 27: 137-143. —Boucek, 1961. Mus. Natl. Pragae, Acta Ent. 34: 83-84 (syn.). —Graham, 1969. Brit. Mus. (Nat. Hist.) Rec. and Jour. Var.* 76: 166.

Morphology: Finlayson, 1963. *Canad. Ent.* 95: 499, 501-502 (immature stages).

tortricis (Brues). Que., Ont., Maine, N. H., Mass., N. Y., Wis., Minn., Wyo. Host: *Choristoneura conflictana* (Walk.), *C. fumiferana* (Clem.), *C. pinus* Freem.; *Apechthis ontario* (Cress.), *Itoplectis conquisitor* (Say).

Nasonia tortricis Brues, 1910. *Canad. Ent.* 42: 259. ♀, ♂.

Taxonomy: Gahan, 1932. *Ent. Soc. Amer., Ann.* 25: 738 (tr. to genus *Amblymerus*). —Peck, 1951. In Muesebeck *et al.*, U. S. Dept. Agr., Agr. Monog. 2: 557 (tr. to genus *Psychophagus*). —Peck, 1963. *Canad. Ent. Sup.* 30: 698 (lectotype).

Biology: Dowden *et al.*, 1948. *Jour. Econ. Ent.* 41: 459, 461. —Daviault, 1950. *Que. Soc. Prot. Pl., Ann. Rpt.* 31: 41. —Dowden and Carolin, 1950. *Jour. Econ. Ent.* 43: 779. —McGugan and Blais, 1959. *Canad. Ent.* 91: 766, 770-776, 779. —Dixon and Benjamin, 1963. *Jour. Econ. Ent.* 56: 267.

Genus CAPELLIA Delucchi

Capellia Delucchi, 1958. *Bol. Zool. Agr. e di Bach.* (2) 1: 59.

Type-species: *Eurydinota rufiventris* Girault. Orig. desig.

Hylocomus Graham, 1959. *Soc. Brit. Ent., Trans.* 13: 107.

Type-species: *Metopon (Dirhicienus) magnicornis* Thomson. Orig. desig.

Taxonomy: Delucchi, 1958. *Bol. Zool. Agr. e di Bach.* (2) 1: 57-60. —Boucek, 1965. *Mus. Natl. Pragae, Acta Ent.* 36: 550 (syn.).

cyrne (Walker). Fla.

Micromelus cyrene Walker, 1843. *Soc. Ent. de France, Ann.* 2: 154. ♀.

Taxonomy: Burks, 1975. *Brit. Mus. (Nat. Hist.) Ent., Bul.* 32: 155.

rufiventris (Girault). Ga., Miss., Minn., Calif. Ecology: Parasitizes midge larvae developing in pine resin. Host: *Retinodiplosis* sp.

Eurydinota rufiventris Girault, 1920. U. S. Natl. Mus., Proc. 58: 212. ♀.

Genus SCEPTROTHELYS Graham

Sceptrothelys Graham, 1956. *Ent. Monthly Mag.* 92: 89.

Type-species: *Pteromalus grandiclava* Walker. Orig. desig.

deione (Walker). Maine, s. to N. C., w. to B. C., Wash., Oreg., Calif., Europe. Host: *Coleophora fuscedinella* Zell., *C. laricella* (Hbn.), *C. malivorella* Riley, *C. pruniella* Clem., *C. sacramento* Hein.

Miscogaster Deione Walker, 1839. *Monog. Chalcid.* v. 1, p. 199. ♀.

Pteromalus Charops Walker, 1839. *Monog. Chalcid.* v. 1, p. 242. ♂.

Pteromalus Aecus Walker, 1848. *List Hym. Brit. Mus., Chalcid.* pt. 2, p. 211. ♀.

Metopon punctatum Thomson, 1878. *Hym. Scand.*, v. 4, p. 169. ♀.

Metopon aeneiscapus Thomson, 1878. *Hym. Scand.*, v. 4, p. 169. ♀.

Eurydinota lividicornis Girault, 1917. *Brooklyn Ent. Soc., Bul.* 12: 86. ♀, ♂.

Taxonomy: Graham, 1969. *Brit. Mus. (Nat. Hist.) Ent., Bul. Sup.* 16: 485 (syn.).

Biology: Anon., 1934. *Wis. Agr. Expt. Sta., Bul.* 428: 101. —Doner, 1936. *Ent. Soc. Amer., Ann.* 29: 227-231. —Beacher, 1947. *Ent. Soc. Amer., Ann.* 40: 532-544. —Schaffner, 1959. U. S. Dept. Agr., Misc. Pub. 767: 88.

grandiclava (Walker). Ind., Nebr., Wyo., Colo.; Europe. Introduced from Europe along with its host, but when or how is unknown. Host: *Bathyplectes* sp.

Pteromalus grandiclava Walker, 1835. *Ent. Mag.* 3: 193. ♀.

Pteromalus claviger Foerster, 1841. *Beitr. Monog. Pteromalinen*, p. 24. ♀.

Taxonomy: Graham, 1969. *Brit. Mus. (Nat. Hist.) Ent., Bul. Sup.* 16: 486 (syn.).

intermedia Graham. W. Va., Tenn., Wyo., Colo.; Europe. Introduced from Europe along with its host, but how or when is unknown. Host: *Bathyplectes* sp.

Sceptrothelys intermedia Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 486. ♀, ♂.

Genus PTEROMALUS Swederus

Pteromalus Swederus, 1795. Svenska Vetensk. Akad., Handl. 16: 201.

Type-species: *Ichneumon puparum* Linnaeus. Desig. by Westwood, 1840.

Many authors believe that this genus and *Habrocytus* Thomson are essentially inseparable.

cassotis Walker. Maine, s. to Fla., w. to Mich., Tex., and Calif. Host: *Chlosyne lacinia* Geyer, *Danaus plexippus* (L.), *Limenitis archippus* (Cramer), *L. arthemis astyanax* (F.), *Papilio cresphontes* Cramer, *P. polyxenes asterius* Stoll.

Pteromalus Cassotis Walker, 1847. Ann. and Mag. Nat. Hist. (1) 19: 393. ♀.

Pteromalus archippi Howard, 1889. In Scudder, Butterflies of Eastern U. S. and Canada, pp. 1872, 1891. ♀.

Taxonomy: Burks, 1975. Brit. Mus. (Nat. Hist.) Ent., Bul. 32: 154 (lectotype; syn.).

Biology: Scudder, 1889. Butterflies of Eastern U. S. and Canada, p. 747. —Schaffner and Griswold, 1934. U. S. Dept. Agr., Misc. Pub. 188: 6, 153. —Drummond *et al.*, 1970. Lep. Soc. Jour. 24: 140.

coeruleiventris (Ashmead). Mass., N. Y., D. C., Ill., Kans. Host: *Orgyia leucostigma* (Smith).

Sphegigaster coeruleiventris Ashmead, 1888. Kans. Agr. Expt. Sta., Bul. 3: App. p. VI. ♀.
Pteromalus cuproideus Howard, 1897. U. S. Dept. Agr., Div. Ent., Tech. Ser. 5: 28, 55. ♀, ♂.

Biology: Girault, 1908. Psyche 15: 89-96.

doryssus Walker. Fla.

Pteromalus Doryssus Walker, 1847. Ann. and Mag. Nat. Hist. (1) 19: 395. ♀, ♂. Types lost.

Taxonomy: Burks, 1975. Brit. Mus. (Nat. Hist.) Ent., Bul. 32: 157.

eryx Walker. Fla.

Pteromalus Eryx Walker, 1847. Ann. and Mag. Nat. Hist. (1) 19: 397. ♂. Type fragmentary.

Taxonomy: Burks, 1975. Brit. Mus. (Nat. Hist.) Ent., Bul. 32: 158.

eurymi Gahan. Tenn., Kans., Utah, Ariz., Calif. Host: *Colias eurytheme* Bdv.

Pteromalus eurymi Gahan, 1914. U. S. Natl. Mus., Proc. 46: 435. ♀, ♂.

Biology: Wildermuth, 1914. U. S. Dept. Agr., Bul. 124: 21-23. —Wildermuth, 1920. U. S. Dept. Agr., Farmers' Bul. 1094: 9.

euthymus Walker. Fla. Type lost.

Pteromalus Euthymus Walker, 1847. Ann. and Mag. Nat. Hist. (1) 19: 393. ♂.

Taxonomy: Burks, 1975. Brit. Mus. (Nat. Hist.) Ent., Bul. 32: 158.

fuscipes (Provancher). Que.

Semiotellus fuscipes Provancher, 1881. Nat. Canad. 12: 295. ♀.

Taxonomy: Burks, 1964 (1963). Canad. Ent. 95: 1262 (may be the same as *Pteromalus vanessae* Howard, but poor condition of Provancher's type prevents a certain decision).

hemileucae Gahan. N. Mex.; Mexico. Host: *Hemileuca oliviae* Ckll.

Pteromalus hemileucae Gahan, 1917. U. S. Natl. Mus., Proc. 53: 210. ♀.

puparum (Linnaeus). Newfoundland, Que. and Ont., s. to Fla., w. to B. C. and Calif.;

Cosmopolitan. Accidentally introduced from Europe about a century ago. Host: *Agraulis vanillae* (L.), *Colias philodice* (Godart), *Cynthia cardui* (L.), *C. carye* (Hbn.), *Epargyreus tyrrhus* (F.), *Eurema lisa* (Bdv. and LeC.), *Argyrotaea velutinana* (Walk.), *Lambdina fiscellaria* (Guenee), *Limenitis archippus* (Cramer), *Malacosoma americanum* (F.), *Nymphalis antiopa* (L.), *Papilio polyxenes asterius* Stoll, *Pieris protodice* (Bdv. and LeC.), *P. rapae* (L.), *Polygonia satyrus* (Edw.), *Thyridopteryx*

- ephemeraeformis* (Haw.), *Vanessa atalanta* (L.), *V. virginensis* (Drury). Other hosts reported in the world literature.
- Ichneumon puparum* Linnaeus, 1758. Syst. Nat., ed. 10, v. 1, p. 567.
Pteromalus latifrons Walker, 1835. Ent. Mag. 2: 501. ♀.
Pteromalus cephalotes Walker, 1836. Ent. Mag. 3: 481. ♀.
Pteromalus comes Walker, 1836. Ent. Mag. 3: 492. ♀.
Pteromalus Ornytus Walker, 1839. Monog. Chalcid., v. 1, p. 238. ♂.
Pteromalus Brassicae Curtis, 1842. Roy. Agr. Soc. Jour. 3: 311. ♀.
Pteromalus Pontiae Curtis, 1842. Roy. Agr. Soc. Jour. 3: 312. ♂.
Pteromalus Orinus Walker, 1845. Linn. Soc. London Proc. Zool. 1: 263. ♀.
Pteromalus nigricans Walker, 1872. Notes on Chalcid., p. 121. ♀. Preocc. by Foerster, 1841.
Pteromalus brassicae Packard, 1877. In Hayden, U. S. Geol. and Geog. Survey, Rpt. 9: 747. ♀. Preocc. by Curtis, 1842.
Pteromalus pieridis Provancher, 1881. Nat. Canad. 12: 296. ♀, ♂.
Pteromalus nigritulus Dalla Torre, 1898. Cat. Hym., v. 5, p. 137. N. name for *nigricans* Walker.

Taxonomy: Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 489 (syn.).

Biology: Packard, 1877. In Hayden, U. S. Geol. and Geog. Survey, Rpt. 9: 748-749.

Genus HABROCYTUS Thomson

Colas Curtis, 1827. Brit. Ent., v. 4, fol. 166.

Type-species: *Colas dispar* Curtis. Orig. desig.

Colax Curtis, 1829. Guide to Brit. Ins., p. 6. Emend. Preocc. by Huebner, 1816.

Gnatho Curtis, 1829. Guide to Brit. Ins., p. 118. N. name.

Metopachia Westwood, 1839. Introd. Mod. Class. Ins., v. 2, Synopsis, p. 71.

Type-species: *Colas dispar* Curtis. Orig. desig.

Etroxys subg. *Habrocytus* Thomson, 1878. Hym. Scand., v. 5, pp. 88, 109.

Type-species: *Pteromalus albipennis* Walker. Desig. by Ashmead, 1904.

Metopopachia Dalla Torre, 1898. Cat. Hym., v. 5, p. 159. Emend.

The status of this genus is anything but clear. Many authors consider it and *Pteromalus* Swederus to intergrade. In addition there is the problem of the name *Colas* Curtis, its isogenotypic synonym *Metopachia* Westwood, and the emended or new names *Gnatho* Curtis, *Colax* Curtis, and *Metopopachia* Dalla Torre. All of these are based on the distinctive European species *dispar*. All but *Metopopachia* have priority over *Habrocytus* Thomson. Graham, 1969 (Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 495) does not think it advisable to use the name *Colas* for this genus because of the widespread usage of the name *Habrocytus*. There is also a great possibility that the species-group *dispar* will eventually be recognized as a distinct genus, in which case the name *Colas* will be available for it. In the meantime, priority is not recognized. Disregard of priority occurs elsewhere in the Chalcidoidea.

Revision: Girault, 1917. Canad. Ent. 49: 178-181. —Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 494-561 (British and some European with a few N. Amer. spp.).

acutiventris Peck. Que.

Pteromalus acutus Provancher, 1881. Nat. Canad. 12: 297. ♀. Preocc. by Fonscolombe, 1832.

Pteromalus canadensis Dalla Torre, 1898. Cat. Hym., v. 5, p. 115. N. name. Preocc. by Ashmead, 1887.

Habrocytus acutiventris Peck, 1951. In Muesebeck, et. al., U. S. Dept. Agr., Agr. Monog. 2: 561. N. name.

Taxonomy: Burks, 1964 (1963). Canad. Ent. 95: 1260.

americanus Girault. N. Amer.

Habrocytus americanus Girault, 1917. Descr. Hym. Chalcidoid. Variorum cum Observ. V, p. 3. ♀.

analis (Ashmead). Nev., Calif. Host: *Hylaeus varifrons* (Cress.), *Omalus* sp., *Pemphredon grinnelli* (Roh.).

Etryxys analis Ashmead, 1895. In Davidson, Psyche 7: 316. ♀, ♂.

Biology: Parker and Bohart, 1966. Pan-Pacific Ent. 42: 94.

anthonomi (Ashmead). Ont., Conn., N. J., D. C., Va., N. C., Ky., Wis., Tex., N. Mex. Host: *Anthonomus musculus* Say, *A. nigritinus* Boh., *A. signatus* Say.

Catolaccus anthonomi Ashmead, 1893. In Chittenden, U. S. Dept. Agr., Insect Life 5: 185. ♀, ♂.

arkansensis Girault. Ill., Minn., Mo., Ark.

Habrocytus arkansensis Girault, 1917. Canad. Ent. 49: 180, 182. ♀, ♂.

aulacis Girault. Conn., Pa., Md., Ohio, Mich. Ecology: Emerges from stem gall of *Aulacidea* sp. on wild lettuce.

Habrocytus aulacis Girault, 1917. Canad. Ent. 49: 180, 181. ♀.

bedeguaris (Thomson). Maine, Ont., Colo., Idaho, B. C.; Europe. Host: *Diplolepis rosae* (L.).

Etryxys (*Habrocytus*) *Bedeguaris* Thomson, 1878. Hym. Scand., v. 5, p. 123. ♀, ♂.

Taxonomy: Callan, 1944. Roy. Ent. Soc. London, Proc. (B) 13: 90.

Biology: Voukassovitch, 1931. C. R. Soc. Biol. 106: 698. —Blair, 1945. Roy. Ent. Soc. London, Proc. (A) 20: 26. —Judd, 1959. Canad. Ent. 91: 728-730. —Gijswijt, 1962. Ent. Ber. 22: 250.

borrowi Girault. Conn., Nebr., Colo., Idaho, Wash., Calif.

Habrocytus borrowi Girault, 1917. Canad. Ent. 49: 178, 179, 182. ♀.

Biology: Caltagirone, 1964. Ent. Soc. Amer., Ann. 57: 287.
britannicus Girault. B. C.

Habrocytus britannicus(!) Girault, 1926. Insecutor Inscitiae Menstruus 14: 132. ♀.
canadensis (Ashmead). N. H., Ont., N. J. Ecology: Emerges from gall of *Xanthoteras quercusforticorne* (Walsh).

Megastigma(!) *canadensis* Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 186. ♂.

Taxonomy: Crosby, 1913. Ent. Soc. Amer., Ann. 6: 168 (male pteromalid).
cerealellae (Ashmead). N. B. and Que., s. to Fla., w. to Alaska and Calif.; Cosmopolitan. Host:
Sitotroga cerealella (Oliv.).

Catolaccus cerealellae Ashmead, 1902. Psyche 9: 345. ♀, ♂.

Taxonomy: Crawford, 1908 (1907). Ent. Soc. Wash., Proc. 9: 160.

Biology: Noble, 1932. Calif. Univ. Pubs., Ent. 5: 311-354. —Fulton, 1933. Ent. Soc. Amer., Ann. 26: 536-553. —Fulton, 1937. In Galtsoff, Culture Methods for Invertebrate Animals, pp. 497-498.

coloradensis (Ashmead). Colo., Idaho.

Rhopalicus coloradensis Ashmead, 1890. Colo. Biol. Assoc., Bul. 1: 27, 45. ♀.

damo (Walker). Fla.

Pteromalus Damo Walker, 1847. Ann. and Mag. Nat. Hist. (1) 19: 395. ♀.

Taxonomy: Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 561. —Burks, 1975. Brit. Mus. (Nat. Hist.) Ent., Bul. 32: 156.

epicles (Walker). Fla.

Pteromalus Epicles Walker, 1847. Ann. and Mag. Nat. Hist. (1) 19: 394. ♀.

Taxonomy: Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 561. —Burks, 1975. Brit. Mus. (Nat. Hist.) Ent., Bul. 32: 157.

franciscanus Girault. Calif.

Habrocytus franciscanus Girault, 1917. Canad. Ent. 49: 180, 181. ♀.

languria Ashmead. Conn., N. J., N. Y., Pa., Del., D. C., Va., Ill., Mo., La., Kans., Ariz., Alaska, Calif. Host: *Dirabius rectirostris* (Lec.), *Languria angustata* (Beauv.), *L. mozardi* (Latr.); *Janus integer* (Nort.).

Habrocytus languriae Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 220. ♀, ♂.

Taxonomy: Gahan, 1919. U. S. Natl. Mus., Proc. 55: 127.

Biology: Wildermuth and Gates, 1920. U. S. Dept. Agr., Bul. 889: 19.

lividus Gahan. Colo. Host: *Tachypteryx consors cerasi* List.

Habrocytus lividus Gahan, 1931. Wash. Acad. Sci., Jour. 21: 37. ♀, ♂.

Biology: List, 1932. Colo. Agr. Expt. Sta., Bul. 385: 63.

medicaginis Gahan. Ont., Conn., N. Y., s. to Va., w. to Man., Oreg. and Calif.; Hawaii, Europe, Asia, Africa, Australia. Host: *Bruchophagus* sp.

Habrocytus medicaginis Gahan, 1914. U. S. Natl. Mus., Proc. 48: 163. ♀.

Biology: Urbahns, 1916. Jour. Agr. Res. 7: 147-153. —Williamson, 1918. Minn. State Ent., Ann. Rpt. 17:106-109. —Urbahns, 1920. U. S. Dept. Agr., Bul. 812: 18. —Sorenson, 1930. Utah Agr. Expt. Genus LONCHETRON Graham

Lonchetron Graham, 1956. Ann. Ent. Fenn. 22: 80.

- Type-species: *Lonchetron fennicum* Graham. Orig. desig.
giraulti (Peck). Ont.
Habrocytus canadensis Girault, 1917. Canad. Ent. 49: 179, 181, 182. ♀. Preocc. by
 Ashmead, 1887.
Habrocytus giraulti Peck, 1951. In Muesebeck, et al., U. S. Dept. Agr., Agr. Monog. 2: 562.
 N. name.

Genus BELONURA Ashmead

- Belonura* Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 224.
 Type-species: *Belonura singularis* Ashmead. Orig. desig.
singularis Ashmead. Maine, Mass., Conn., Va., Ga., Fla., La. Host: *Cirrula gigantea* Cress.,
Dimecoenia spinosa (Loew).
Belonura singularis Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 225. ♀.

Genus CAENACIS Foerster

- Caenacis* Foerster, 1856. Hym. Stud., v. 2, p. 64. No species.
 Type-species: *Caenacis grandiclava* Thomson. Desig. by Ashmead, 1904.
asinus Girault. Calif.
Caenacis asinus Girault, 1917. New Chalcid Flies, p. 3. ♀.
cupraeus (Provancher). Que., Ont. Host: *Megachile albifarsis* Cress., *M. centruncularis* (L.).
Semiotellus cupraeus Provancher, 1881. Nat. Canad. 12: 295. ♂.
Semiotellus cupreus Dalla Torre, 1898. Cat. Hym., v. 5, p. 211. Emend.
 Taxonomy: Burks, 1964 (1963). Canad. Ent. 95: 1261.

Genus PSILONOTUS Walker

- Psilonotus* Walker, 1834. Ent. Mag. 2: 168, 179.
 Type-species: *Psilonotus adamas* Walker. Monotypic.
Janvartsoria Nikol'skaya 1954. Zool. Inst. Leningrad, Trudy 16: 412.
 Type-species: *Janvartsoria betulae* Nikolskaja. Orig. desig.
 Taxonomy: Graham, 1958. Ent. Monthly Mag. 94: 120 (syn.).
achaetus Walker. Ont.; Europe. Ecology: Associated with *Betula*.
Psilonotus Achaetus Walker, 1848. Ent. Mag. 2: 105, 161. ♀.
Pteromalus Cyamon Walker, 1848. Ent. Mag. 2: 123, 176. ♂.
Psilonotus viridulus Thomson, 1878. Hym. Scand., v. 5, p. 83. ♀.
 Taxonomy: Graham, 1957. Ent. Monthly Mag. 93: 231 (syn.). —Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. sup. 16: 627 (types).

Genus KARPINSKIELLA Boucek

- Karpinskiella* Boucek, 1955 (1954). Roczniki Nauk Lesnych 11: 86.
 Type-species: *Karpinskiella pityophthori* Boucek. Orig. desig.
 The adults of these parasites emerge from adult scolytid hosts.
 Taxonomy: Hedqvist, 1963. Stud. Forest. Suecica 11: 115.
paratomicobia Hagen and Caltagirone. Utah, Ariz., Calif. Host: *Dendroctonus pseudotsugae* Hopk.
Karpinskiella paratomicobia Hagen and Caltagirone, 1968. Pan-Pacific Ent. 44: 241. ♀, ♂.
 Biology: Furniss, 1968. Ent. Soc. Amer., Ann. 61: 1384 (life hist.).

Genus MESOPOLOBUS Westwood

- Mesopolobus* Westwood, 1833. London, Edinb. and Dublin Phil. Mag. and Jour. Sci. (3) 2:
 443.
 Type-species: *Mesopolobus fasciiventris* Westwood. Monotypic.
Platymesopus Westwood, 1833. London, Edinb. and Dublin Phil. Mag. and Jour. Sci. (3) 2:
 444.

- Type-species: *Platymesopus tibialis* Westwood. Monotypic.
Platyterma Walker, 1834. Ent. Mag. 2: 303.
 Type-species: *Platyterna nobile* Walker. Desig. by Westwood, 1839.
Amblymerus Walker, 1834. Ent. Mag. 2: 303, 306.
 Type-species: *Amblymerus amaeenus* Walker. Desig. by Westwood, 1839.
Eutelus Walker, 1834. Ent. mag. 2: 351, 356.
 Type-species: *Eutelus dilectus* Walker. Desig. by Westwood, 1839.
Xenocrepis Foerster. 1856. Hym. Stud., v. 2, p. 64. No species.
 Type-species: *Xenocrepis pura* Mayr. Included by Mayr, 1904.
Asemantus Foerster, 1878. Naturh. Ver. Rheinlande, Verh. 35: 51.
 Type-species: *Asemantus amphibolus* Foerster. Orig. desig.
Syntomocera Foerster, 1878. Naturh. Ver. Rheinlande, Verh. 35: 52. Preocc. by Schiner, 1861.
 Type-species: *Syntomocera clavicornis* Foerster. Orig. desig.
Disema Foerster, 1878. Naturh. Ver. Rheinlande, Verh. 35 54. Preocc. by Maeklin, 1875.
 Type-species: *Disema pallipes* Foerster. Orig. desig.
Eutelus subg. *Platytermus* Thomson, 1878. Hym. Scand., v. 5, p. 75. Emend.
Zacalochlora Crawford, 1913. U. S. Natl. Mus., Proc. 45: 251.
 Type-species: *Zacalochlora milleri* Crawford. Monotypic.
Baeoponerus Masi, 1924. Genova, Mus. Civ. Stor. Nat., Ann. 50: 222.
 Type-species: *Baeoponerus aeneus* Masi. Monotypic.
Euamblymerus Hincks, 1944. Roy. Ent. Soc. London, Proc. (B) 13: 37. N. name for part of *Amblymerus*.
Syntomocerella Ghesquiere, 1946. Rev. de Zool. et de Bot. Africaines 34: 369. N. name for *Syntomocera* Foerster.
Disemisca Ghesquiere, 1946. Rev. de Zool. et de Bot. Africaines 34: 369. N. name for *Disema* Foerster.
Ahlbergiella von Rosen, 1955. Ent. Tidskr. 76: 88.
 Type-species: *Eutelus aequus* Walker. Orig. desig.

As presently defined, this genus is a rather amorphous one, with no non-integrating characters and an extremely lengthy generic synonymy. It is likely that future workers will divide it into subgenera or into several genera, for all of which there will be available names.

Taxonomy: Graham, 1957. Ent. Monthly Mag. 93: 220-230 (syn.). —von Rosen, 1958. Opusc. Ent. 23: 203-240. —von Rosen, 1959. Ent. Tidskr. 79: 131-146. —von Rosen, 1959. Ent. - ### Genus MERAPORUS Walker
- Meraporus* Walker, 1834. Ent. Mag. 2: 298.
 Type-species: *Meraporus graminicola* Walker. Desig. by Westwood, 1839.
Parmicromelus Girault, 1917. Descr. Hym. Chalcidoid. Variorum cum Observ. V, p. 4.
 Type-species: *Parmicromelus europaeus* Girault. Orig. desig.
- Taxonomy: Waterston, 1921. Roy. Soc., Rpt. Grain Pests Com. 9: 11. —Graham, 1957. Ent. Monthly Mag. 93: 217.
- requisitus** Tucker. S. C., La. Host: *Sitophilus oryzae* (L.).
Meraporus requisitus Tucker, 1910. Canad. Ent. 42: 344. ♂.
- Taxonomy: Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 681 (*requisitus* unlikely to be a true *Meraporus*).

Genus PSEUDOCATOLACCUS Masi

Pseudocatolaccus Masi, 1908. Lab. Zool. Gen. e Agr. Portici, Bol. 3: 138.

Type-species: *Pseudocatolaccus asphondyliae* Masi. Monotypic.

Taxonomy: Burks, 1954. U. S. Dept. Agr., Tech. Bul. 1093: 14-15.

americanus Gahan. Tex., N. Mex., Idaho, Utah, Ariz. Ecology: Develops in galls on alfalfa, *Bidens*, *Larrea*, possibly other plants. Host: *Asphondylia* sp., *A. websteri* Felt.

Pseudocatolaccus Americanus Gahan, 1919. Ent. Soc. Amer., Ann. 12: 164. ♀, ♂.

Taxonomy: Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 695 (might be the same as the European *asphondyliae* Masi).

Genus PERIDESMIA Foerster

Peridesmia Foerster, 1856. Hym. Stud., v. 2, p. 65. No species.

Type-species: *Isocyrtus (Trichomalus) aquisgranensis* Mayr. Desig. by Gahan, 1923.

Taxonomy: Delucchi, 1956 (1955). Ztschr. f. Angew. Ent. 38: 147-150.

discus (Walker). Ga.; Europe. Ecology: Larva consumes eggs of *Hypera* inside alfalfa stems. Introduced from Europe into Calif. and Atlantic Coast states; known to be established only in Ga. Host: *Hypera postica* (Gyll.).

Pteromalus discus Walker, 1835. Ent. Mag. 2: 482. ♀.

Pteromalus subquadratus Walker, 1836. Ent. Mag. 3: 478. "♀" = ♂.

Pteromalus Phyllus Walker, 1839. Monog. Chalcid., v. 1, p. 272. ♀.

Peridesmia phytonomi Gahan, 1923. Wash. Acad. Sci., Jour. 13: 410. ♀, ♂.

Taxonomy: Graham, 1956. Ent. Monthly Mag. 92: 246 (syn.). — Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 701-702.

Biology: Chamberlin, 1924. Jour. Econ. Ent. 17: 625. — Flanders, 1935. Ent. Soc. Amer., Ann. 28: 438-444. — Strong, 1935. U. S. Dept. Agr., Bur. Ent. Plant Quar., Ann. Rpt. for 1935, p. 59. — Flanders, 1942. Ent. Soc. Amer., Ann. 35: 253 (eggs and ovaries). — Flanders, 1944. Jour. Econ. Ent. 37: 410 (diapause). — Coles and Puttler, 1963. Jour. Econ. Ent. 56: 611.

Morphology: Parker, 1924. Soc. Ent. de France, Ann. 93: 316 (larvae). — Miller, 1972. Ent. Soc. Amer., Ann. 65: 1119-1124 (antennae).

Genus SPANIOPUS Walker

Spaniopus Walker, 1833. Ent. Mag. 1: 371, 466.

Type-species: *Spaniopus dissimilis* Walker. Monotypic.

Polycelis Thomson, 1878. Hym. Scand., v. 4, pp. 131, 143. Preocc. by Ehrenberg, 1831.

Type-species: *Pteromalus conspersus* Walker. Desig. by Ashmead, 1904.

Polycelis Ashmead, 1894. Cincinnati Soc. Nat. Hist., Jour. 17: 52. Emend. Preocc. by Girard, 1850.

Neopolycelis Hincks, 1944. Roy. Ent. Soc. London, Proc. (B) 13: 38. N. name for *Polycelis* Thomson.

Taxonomy: Gahan, 1922. U. S. Natl. Mus., Proc. 61(24): 10-12. — Graham, 1956. Ent. Monthly Mag. 92: 250.

dissimilis (Walker). Ont., Pa., Md., Va., Ill.; Europe. Ecology: Either a primary or secondary parasite of hosts developing in grass stems. Host: *Mayetiola destructor* (Say); *Platygaster zosiae* Walk.

Spaniopus dissimilis Walker, 1833. Ent. Mag. 1: 466. ♂.

Polycelis modestus Gahan, 1922. U. S. Natl. Mus., Proc. 61 (24): 11. ♀, ♂.

Taxonomy: Gahan, 1934 (1933). U. S. Dept. Agr., Misc. Pub. 174: 67-70 (*modestus*).

Biology: Myers, 1925 (1924). Jour. Agr. Res. 29: 289-295. — Hill and Smith, 1928. Jour. Agr. Res. 36: 153-155. — Hill and Smith, 1931. Ent. Soc. Wash., Proc. 33: 182-183. — Gahan, 1934 (1933). U. S. Dept. Agr., Misc. Pub. 174: 67-70. — Hill *et al.*, 1939. U. S. Dept. Agr., Tech. Bul. 689: 12-13. — Hill and Pinckney, 1940. U. S. Dept. Agr., Tech. Bul. 715: 9-13.

Morphology: Hill and Smith, 1931. Ent. Soc. Wash., Proc. 33: 183-185 (immature stages).

websteri (Ashmead). Md., Ind. Ecology: Emerges from stem gall on *Lactuca canadensis*; possibly parasitic on gall-making cynipid or its *Enrytoma* parasite.

Polyscelis Websteri Ashmead, 1894. Cincinnati Soc. Nat. Hist., Jour. 17: 52. ♀, ♂.

Taxonomy: Gahan, 1922. U. S. Natl. Mus., Proc. 61 (24): 11.

Biology: Webster, 1894. Cincinnati Soc. Nat. Hist., Jour. 17: 36.

Genus TRICHOMALUS Thomson

Isocyrthus subg. *Trichomalus* Thomson, 1878. Hym. Scand., v. 5, pp. 131, 134.

Type-species: *Trichomalus punctinucha* Thomson. Desig. by Ashmead, 1904.

Lanceosoma Erdos, 1953. Acta. Biol. Hung. 4: 234.

Type-species: *Lanceosoma althaeae* Erdos. Orig. desig.

Revision: Delucchi and Graham, 1956. Beitr. z. Ent. 6: 543-576. —Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 707-737.

Taxonomy: Graham, 1956. Ent. Monthly Mag. 92: 247-250 (syn.; types).

deiphon (Walker). Fla.

Metopon deiphon Walker, 1843. Soc. Ent. de France, Ann. (2) 1: 161. ♀.

Taxonomy: Burks, 1975. Brit. Mus. (Nat. Hist.) Ent., Bul. 32: 156.

euryon (Walker). Fla.

Pteromalus eurypon Walker, 1847. Ann. and Mag. Nat. Hist. (1) 19: 398. ♀.

Taxonomy: Burks, 1975. Brit. Mus. (Nat. Hist.) Ent., Bul. 32: 158.

habis (Walker). Fla.

Lampretatus habis walker, 1843. Soc. Ent. de France, Ann. (2) 1: 155. ♀.

Taxonomy: Burks, 1975. Brit. Mus. (Nat. Hist.) Ent., Bul. 32: 158.

inscitus (Walker). N. Y. Ohio; Europe. Host: *Rhynchaenus pallicornis* Say. Other carculionid hosts recorded in Palearctic literature.

Pteromalus inscitus Walker, 1835. Ent. Mag. 2: 499. ♀.

Pteromalus affinis Walker, 1835. Ent. Mag. 2: 492. ♀.

Pteromalus tristis Walker, 1835. Ent. Mag. 2: 500. ♀.

Pteromalus microcerus Walker, 1835. Ent. Mag. 2: 500. ♀.

Pteromalus Deiochus Walker, 1839. Monog. Chalcid., v. 1, p. 240. ♂.

Pteromalus reconditus Foerster, 1841. Beitr. Monog. Pteromalinen, p. 13. ♀.

Pteromalus Diachymatis Ratzeburg, 1844. Ichn. d. Forstins., v. 1, p. 203. ♂.

Pteromalus Orchestis Ratzeburg, 1844. Ichn. d. Forstins., v. 1, p. 205. ♀.

Pteromalus Lampe Walker, 1848. List. Hym. Brit. Mus., Chalcid., v. 2, pp. 125, 192. ♀.

Isocyrthus (Trichomalus) subnudus Thomson, 1878. Hym. Scand., v. 5, p. 140. ♀, ♂.

Taxonomy: Graham, 1956. Ent. Monthly Mag. 92:248-250 (syn.; types). —Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 728-729 (syn.; types).

Biology: Mundinger, 1951. Jour. Econ. Ent. 44: 30.

perfectus (Walker). Idaho, B. C., Wash., Oreg., Calif.; Europe. Host: *Ceutorhynchus assimilis* (Payk.). Almost all North American literature about this species used the name *fasciatus* Thomson, a misidentification.

Pteromalus perfectus Walker, 1835. Ent. Mag. 2: 488. ♀.

Pteromalus decorus Walker, 1835. Ent. Mag. 2: 496. ♀.

Pteromalus decisus Walker, 1835. Ent. Mag. 3: 185. ♀.

Pteromalus opulentus Foerster, 1841. Beitr. Monog. Pteromalinen, p. 26. ♀.

Isocyrthus (Trichomalus) laevinucha Thomson, 1878. Hym. Scand., v. 5, p. 140. ♀, ♂.

Taxonomy: Graham, 1956 Ent. Monthly Mag. 92: 250 (syn.; types). —Delucchi and Graham, 1956. Beitr. z. Ent. 8: 551, 571-572 (descr.; syn.). —Peck, 1963. Canad. Ent. Sup. 30: 669 (correction of ident. of N. Amer. specimens). —Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 729 (types).

Sta., Bul. 498: 14. — McLeod, 1953. Ent. Soc. Brit. Columbia, Proc. 49: 12-17. — Walz, 1957. Ent. Soc. Amer., Ann. 50: 219. — Jourdheuil, 1960. Ann. des Epiphyt. 11: 462.

status (Foerster). Va.; Europe. Host: *Oscinella frit* (L.).

Pteromalus statutus Foerster, 1841. Beitr. Monog. Pteromalinen, p. 20. ♀.

Pteromalus fertilis Foerster, 1841. Beitr. Monog. Pteromalinen, p. 20. ♀.

Taxonomy: Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 719 (syn.; characters of gaster).

Genus EUPTEROMALUS Kurdjumov

Eupteromalus Kurdjumov, 1913. Ent. Obozr. 13: 12.

Type-species: *Pteromalus nidulans* Thomson. Orig. desig. Type-species originally cited by Kurdjumov as *nidulans* Foerster, but, although a Foerster type exists in Vienna, Foerster did not describe it; Thomson described it and cited Foerster as author.

Nemicromelus Girault, 1917. Deser. Hym. Chalcidoid. Variorum cum Observ. V, p. 4.

Type-species: *Merisus subapterus* Riley. Orig. desig.

The genus *Trichomalopsis* Crawford, described 2 months before *Eupteromalus* Kurdjumov, and up to now considered to be exclusively Oriental, might prove to be inseparable from *Eupteromalus*.

Revision: Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 737-777 (Europe and N. Amer.).

Taxonomy: Gahan, 1921 (1920). Ent. Soc. Wash., Proc. 22: 240-241. — Gahan, 1934 (1933). U. S. Dept. Agr., Misc. Pub. 174: 80 (syn.).

albopilosus Graham. Wyo., Colo.; Europe. Host: *Bathyplectes curculionis* (Thomson).

Eupteromalus albopilosus Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 753. ♀, ♂.

americanus Gahan. Mich., Wis., Iowa, N. Dak., Wyo., Colo., Wash., Oreg., Calif. Host: *Mayetiola destructor* (Say).

Eupteromalus americanus Gahan, 1934 (1933). U. S. Dept. Agr., Misc. Pub. 174: 82. ♀, ♂.

Biology: Hill, 1953. U. S. Dept. Agr., Cir. 923: 3.

cognatus Gahan. Ohio. Host: *Epeira foliata* (Fourc.), *E. undata* (Oliv.), *Philodromus aureolus* (Oliv.).

Eupteromalus cognatus Gahan, 1924. U. S. Natl. Mus., Proc. 65 (4): 16. ♀, ♂.

Biology: Auten, 1925. Ent. Soc. Amer., Ann. 18: 242.

dubius (Ashmead). D. C., Ohio, Ind., Wis., Ill., Minn., Iowa, Nebr. Ecology: Secondary parasite.

Host: *Lissonota* sp., *Microplitis gortynae* Riley; *Lydella radicis* (Townsend), *L. thompsoni* Herting, *Pyraustomyia penitalis* (Coq.).

Meraporus dubius Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 219. ♀, ♂.

Biology: Breakey, 1930. Ent. Soc. Amer., Ann. 23: 186. — Blickenstaff *et al.*, 1953. Iowa State Col., Jour. Sci. 27: 374-375.

leguminis Gahan. Wyo., Idaho, Utah, Nev., Oreg. Host: *Bruchus pisorum* (L.), *Hypera postica* (Gyll.); *Bathyplectes* sp.

Eupteromalus leguminis Gahan, 1937. Ent. Soc. Wash., Proc. 39: 63. ♀, ♂.

peregrinus Graham. Que., Ont., Maine and Mass., s. to Del.; B. C., Wash., Oreg.; Europe.

Introduced from Europe beginning in 1906, first recovered in 1908 in Mass.; colonized in Washington State beginning in 1931 and recovered in 1935. Host: *Nygma phaeorrhoea* (Donov.), *Porthezia dispar* (L.), *Stilpnobia salicis* (L.); *Lydella* sp.; *Apanteles lacteicolor* Vier., *A. melanoscelus* (Ratz.), *Meteorus versicolor* (Wesm.), *Rogas unicolor* (Wesm.). When first introduced into North America from Europe this species was cited in North American literature under the name *nidulans* Thomson (or incorrectly as *nidulans* Foerster). This name was changed quickly to *egregius* Foerster (now considered a

misidentification). Usage in North American literature reverted to *nidulans* about 1920 and remained there until 1956. That year Graham placed *nidulans* Thomson in synonymy under *apicalis* Walker and *hemipterus* Walker. The first of these being preoccupied, usage of *hemipterus* was followed. However, in 1969, in his revision of the European and North American species of *Eupteromalus*, Graham stated that there are no undoubted North American records of *hemipterus*. He described *peregrinus* for the European species that has been commonly known here as *egregius* or *nidulans* in a very large amount of literature.

Eupteromalus peregrinus Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 764. ♀, ♂.

Taxonomy: Howard, 1908. U. S. Dept. Agr., Ann. Rpt. for 1907, pp. 454-455. —Kurdjumov, 1912. Ent. Obozr. 12: 228-229. —Kurdjumov, 1913. Ent. Obozr. 13: 19. —Gahan, 1914. U. S. Natl. Mus., Proc. 48: 163. —Viereck, 1917 (1916). Conn. State Geol. and Nat. Hist. Surv., Bul. 22: 773. —Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 764-765.

Genus SISYRIDIVORA Gahan

Sisyridivora Gahan, 1951. Ent. Soc. Amer., Ann. 44: 100.

Type-species: *Sisyridivora cavigena* Gahan. Orig. desig.

Taxonomy: Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 778.

cavigena Gahan. Ohio. Host: *Climacia areolaris* (Hagen).

Sisyridivora cavigena Gahan, 1951. Ent. Soc. Amer., Ann. 44: 102. ♀, ♂.

Biology: Brown, 1951. Ent. Soc. Amer., Ann. 44: 103-110.

Genus NASONIA Ashmead

Nasonia Ashmead, 1904. Carnegie Mus., Mem. 1: 317, 318.

Type-species: *Nasonia brevicornis* Ashmead. Orig. desig.

Mormoniella Ashmead, 1904. Carnegie Mus., Mem. 1: 316, 317.

Type-species: *Mormoniella brevicornis* Ashmead. Orig. desig.

Ashmead placed *Nasonia* and *Mormoniella* in different tribes, but the same specimens were type material of both type-species. A very large amount of literature has been published about this genus, about half of it using the name *Mormoniella*, which has page priority. However, Brues revised the genus, and as first reviser, he selected the name *Nasonia*.

Revision: Brues, 1910. Canad. Ent. 42: 260.

Taxonomy: Kurdjumov, 1913. Ent. Obozr. 13: 5 (*Mormoniella*). — Gahan, 1927. U. S. Natl. Mus., Proc. 71 (4): 5 (*Mormoniella*). — Gahan and Peck, 1946. Wash. Acad. Sci., Jour. 36: 316 (type-species). — Peck, 1951. In Muesebeck, *et al.*, U. S. Dept. Agr., Agr. Monog. 2: 559 (*Nasonia*). — Edwards, 1952. Ent. Monthly Mag. 88: 1056 (*Mormoniella*). — Hedqvist, 1963. Stud. Forest. Suecica 11: 125 (*Nasonia*).

vitripennis (Walker). Que., s. to Fla., w. to B. C. and Calif.; Cosmopolitan. Host: *Calliphora* sp., *C. vicina* R.-D., *Cochliomyia hominivorax* (Coq.), *C. macellaria* (F.), *Fannia* sp., *F. canicularis* (L.), *F. femorata* (Stein), *F. scalaris* (F.), *Hubneria estigmensis* (Sellers), *Hypoderma* sp., *Lucilia* sp., *L. illustris* (Meig.), *Musca* sp., *M. domestica* L., *Omotoma funiferanae* (Tothill), *Ophyra aenescens* (Wied.), *O. leucostoma* (Wied.), *Phaenicia eximia* (Wied.), *P. mexicana* (Macq.), *P. sericata* (Meig.), *Phormia regina* (Meig.), *Piophila casei* (L.), *Poliates lardaria* (F.), *Protocalliphora avium* S. and D., *P. metallica* (Towns.), *P. sialia* S. and D., *Sarcophaga* sp., *Synthesionymia nudiseta* (Wulp.).

Genus UROLEPIS Walker

Urolepis Walker, 1846. List Hym. Brit. Mus., Chalcid., v. 1, p. 26.

Type-species: *Ormocerus maritimus* Walker. Monotypic.

Halizoa Foerster, 1856. Hym. Stud., v. 2, p. 145. N. name, unnecessarily proposed for *Urolepis* thought to be preoccupied.

Pteromalus subg. *Halizous* Thomson, 1878. Hym. Scand., v. 5, pp. 146, 147. Emend.

rufipes (Ashmead). N. Y., Minn., Nebr., Kans., Tex., Utah, Oreg., Calif. Host: *Hydropsyrus hians* (Say), *Setaceria pacifica* (Cress.).

Halizoz rufipes Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 225. ♀, ♂.

Genus DIGLOCHIS Foerster

Diglochis Foerster, 1856. Hym. Stud., v. 2, p. 65. No species.

Type-species: *Pteromalus complanatus* Ratzeburg. By subsequent ref. by Mayr, 1904.

Pteromalus subg. *Trichoglenus* Thomson, 1878. Hym. Scand., v. 5, pp. 146, 149.

Type-species: *Pteromalus complanatus* Ratzeburg. Monotypic.

Trichoglenes Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 225. Emend.

Taxonomy: Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul Sup. 16: 782-783 (identity of *complanatus* Ratzeburg questionable; application to Internat. Comm. may be necessary). *occidentalis* (Ashmead). Conn., Wis., Minn., Man., Sask., Alta., B. C., Wash., Oreg. Host:

Chrysops sp., *C. aestuans* Wulp, *C. excitans* Walk., *C. frigidus* O. S., *C. fureatus* Walk., *C. mitus* O. S., *C. nigripes* Zett., *Hybomitra affinis* (Kby.), *H. frontalis* (Walk.), *Tabanus* sp.

Trichoglenes occidentalis Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 225. ♀.

Biology: Philip, 1931. Minn. Agr. Expt. Sta., Tech. Bul. 80: 68. — Miller, 1951 Canad. Jour. Zool. 29: 261. — James, 1952. Ent. Soc. Ont., Ann. 82: 70-74. — James, 1964 (1963). Canad. Ent. 95: 1229-1231 (life hist.).

Genus TOMICOBIA Ashmead

Tomicobia Ashmead, 1899. Ent. Soc. Wash., Proc. 4: 203. No species.

Type-species: *Tomicobia tibialis* Ashmead. Desig. by Ashmead, 1904.

Ipocoelius Ruschka, 1924. Ent. Tidskr. 45: 6.

Type-species: *Ipocoelius seitneri* Ruschka. Orig. desig.

The adults of these parasites emerge from the adults of their scolytid hosts.

Revision: Hedqvist, 1959. Opusc. Ent. 24: 177-184. — Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 784-787.

Taxonomy: Gahan, 1938. Ent. Soc. Wash., Proc. 40: 221-222 (syn.).
peratripes (Girault). N. C.

Nasonia peratripes Girault, 1917. Descr. Hym. Chalcidoid. Variorum cum Observ. III, p. 1. ♀.

Taxonomy: Hedqvist, 1959. Opusc. Ent. 24: 184. — Whiting, 1967. Quart. Rev. Biol. 42: 336. *tibialis* Ashmead. Maine, s. to N. C., w. to Idaho and Calif. Host: *Ips* sp., *I. calligraphus* (Germ.), *I. confusus* (Lec.), *I. grandicollis* (Eich.), *I. oregoni* (Eich.), *I. pini* (Say), *Orthotomicus caelatus* (Eich.), *Pityophthorus* sp.

Tomicobia tibialis Ashmead, 1904. Carnegie Mus., Mem. 1: 283. ♀.

Biology: Hopkins, 1914 (1913). Ent. Soc. Wash., Proc. 15: 160. — Reid, 1957. Canad. Ent. 89: 7-8. — Ruckes, 1963. Pan-Pacific Ent. 39: 45. — Bedard, 1965. Boyce Thompson Inst. Plant Res., Contrib. 23: 77-81. — Rice, 1969. Boyce Thompson Inst. Plant Res., Contrib. 24: 189-194. — Rice, 1971. Pan-Pacific Ent. 47: 1-8 (flight).

Genus ARTHROLYTUS Thomson

Pteromalus subg. *Arthrolitus* Thomson, 1878. Hym. Scand., v. 5, pp. 147, 158.

Type-species: *Arthrolitus punctatus* Thomson. Desig. by Ashmead, 1904.

Taxonomy: Burks, 1969. Ent. Soc. Wash., Proc. 71: 298-300.

fasciatus (Provancher). Que., N. H., Mass., Pa.

Semiotellus fasciatus Provancher, 1881. Nat. Canad. 12: 294. ♀, ♂.

Taxonomy: Burks, 1964 (1963). Canad. Ent. 95: 1261-1262.

muesebecki Burks. Calif. Ecology: Emerges from galls of *Andricus brunneus* Fullaway on leaves of *Quercus douglasii* and *Callirhytis quercusagrifoliae* (Bassett) on leaf axils of several species of *Quercus*.

Arthrolitus muesebecki Burks, 1969. Ent. Soc. Wash., Proc. 71: 302. ♀, ♂.

Genus CYCLOGASTRELLA Bukovskij

Cyclogastrella Bukovskij, 1938. Ent. Obozr. 27: 153.

Type-species: *Cyclogastrella quercina* Bukovskij. Monotypic.

Taxonomy: Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 796-797

(*Pseudomicromelus* Gahan and Fagan, name formerly used for this genus in the Holarctic region, is generically different and is Australian).

deplanata (Nees). Calif.; Europe. Ecology: Adults often swarm in buildings, congregating on windows. Host: *Anarsia lineatella* Zell. Other lepidopterous hosts recorded in Palearctic literature.

Pteromalus deplanatus Nees, 1934. Hym. Ichn. Aff. Monog., v. 2, p. 110. ♀, ♂.

Ormocerus simplex Walker, 1834. Ent. Mag. 2: 169. ♂.

Pteromalus domesticus Walker, 1835. Ent. Mag. 2: 481. ♀.

Pteromalus Artemon Walker 1839. Monog. Chalcid., v. 1, p. 218. ♂.

Pteromalus Merope Walker, 1839. Monog. Chalcid., v. 1, p. 219. ♂.

Pteromalus Phasis Walker, 1848. List Hym. Brit. Mus., Chalcid., pt. 2, pp. 123, 175. ♂.

Pteromalus Acco Walker, 1848. List Hym. Brit. Mus., Chalcid., pt. 2, pp. 124, 177. ♀.

Pteromalus Audrobius Walker, 1848. List Hym. Brit. Mus., Chalcid., pt. 2, pp. 126, 200. ♀.

Cyclogastrella quercina Bukovskij, 1938. Ent. Obozr. 27: 154. ♀, ♂.

Taxonomy: Walker, 1845. Zoologist 3: 1142 (syn.). —Gahan, 1938. Ent. Soc. Wash., Proc. 40: 226. —Graham, 1956. Ent. Monthly Mag. 92: 258. —Boucek, 1965. Mus. Natl. Pragae, Acta Ent. 11: 26-27. —Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 796 (syn.).

Biology: Scott, 1919. Ent. Monthly Mag. 55: 13-16. —Scott, 1922. Ent. Monthly Mag. 58: 56-60. —Gahan, 1933. Ent. Soc. Wash., Proc. 35: 44.

Genus EPIPTEROMALUS Ashmead

Epipteronalus Ashmead, 1904. Carnegie Mus., Mem. 1: 319.

Type-species: *Epipteronalus algonquinensis* Ashmead. Orig. desig.

Taxonomy: Kurdjumov, 1913. Ent. Obozr. 13: 4 (syn. of *Trichomalus* Thomson).

algonquinensis Ashmead. Ill.

Epipteronalus algonquinensis Ashmead, 1904. Carnegie Mus., Mem. 1: 319. ♀.

Polycystus gibbus Girault, 1920. U. S. Natl. Mus., Proc. 58: 212. ♀.

Taxonomy: Gahan and Peck, 1946. Wash. Acad. Sci. Jour. 36: 315 (syn.; both species described from same specimens).

Genus TRITNEPTIS Girault

Tritneptis Girault, 1908. Psyche 15: 92.

Type-species: *Tritneptis hemerocampae* Girault. Orig. desig.

Revision: Gahan, 1938. Ent. Soc. Wash., Proc. 40: 213-214. —Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 800-804 (European fauna). —Burks, 1971. Biol. Soc. Wash., Proc. 84: 1-6.

Taxonomy: Girault, 1924. Insecutor Inscitiae Menstruus 12: 174. (syn. of *Dibrachys*).

diprionis Gahan. Que., Ont., Maine, Mass., Minn.; Europe. Host: *Diprion similis* (Htg.),

Gilpinia frutetorum (F.), *G. hercyniae* (Htg.), *Neodiprion lecontei* (Fitch), *N. pinetum* (Nort.), *N. pratti* (Dyar), *N. sertifer* (Four.), *Pikonema alaskensis* (Roh.), *P. dimmockii* (Cress.), *Pristiphora geniculata* (Htg.).

Tritneptis diprionis Gahan, 1938. Ent. Soc. Wash., Proc. 40: 217. ♀, ♂.

Taxonomy: Finlayson, 1963. Canad. Ent. 95: 479, 482, 483, 500 (immature stages).

Biology: Forbes and Daviault, 1964. Canad. Ent. 96: 1128.

doris Burks. Wyo., Utah. Host: *Coloradia doris* Barnes, *Hemileuca* sp.

Tritneptis doris Burks, 1971. Biol. Soc. Wash., Proc. 84: 3. ♀, ♂.

hemerocampae Viereck, N. S., N. B., P. E. I., Que., s. to Va., w. to B. C., Wash., Oreg., Calif.

Host: *Argyrotaenia velutinana* (Walk.), *Coleophora malivorella* Riley, *Diacrisia virginica* (F.), *Estigmene acrea* (Dru.), *Grapholitha molesta* (Busck), *Orgyia leucostigma* (J. E. Smith), *Laspeyresia pomonella* (L.), *Papilio polyxenes asterius* Stoll, *Platyprepia guttata* (Bdvl.), *Stilpnota salicis* (L.).

Tritneptis hemerocampae Girault, 1908. Psyche 15: 90, 92. ♀, ♂.

Coelopisthia diacrisiae Crawford, 1910. Ent. Soc. Wash., Proc. 12: 145. ♀.

Amblymerus lipardis Viereck, 1924. Canad. Ent. 56: 69. ♀, ♂.

Taxonomy: Girault, 1924. *Insecutor Inscitiae Menstruus* 12: 174 (syn. of *boucheanus* Ratzeburg). —Gahan, 1938. Ent. Soc. Wash., Proc. 40: 217 (Girault's syn. incorrect).

Biology: Glendenning, 1924. Canada Dept. Agr., Pam. (n. s.) 50: 13 (*lippardis*). —Schaffner and Griswold, 1934. U. S. Dept. Agr., Misc. Pub. 188: 6, 153. —Jaynes and Marucci, 1947. Jour. Econ. Ent. 40: 11. —Brunson, 1957. Jour. Econ. Ent. 50: 375. —Allen, 1962. U. S. Dept. Agr., Tech. Bul. 1265: 102. —McNay, 1963. Canad. Ins. Pest Rev. 41: 20.

klugii (Ratzeburg). Que., Ont., Maine, Mich., Wis., Minn., Man., Sask., Mont., B. C., Wash., Oreg., Calif.; Europe. Possibly introduced from Europe along with its sawfly hosts; records have not been found. Host: *Gilpinia hercyniae* (Htg.), *Mesoleius tenthredinis* Morley, *Neodiprion pratti banksianae* Roh., *N. serifer* (Four.), *N. tsugae* Midd., *Pristiphora erichsonii* (Htg.). North American literature about this species before 1935 is mostly under the name *nematicida* Packard; type of Packard's species has not been found, but it is most likely a syn of *Dibrachys cavus* (Walker).

Pteromalus klugii Ratzeburg, 1844. Ichn. d. Forstins., v. 1, p. 198. ♀.

Biology: Hewitt, 1911. Canad. Ent. 43: 297. —Hewitt, 1912. Canada Dept. Agr., Div. Ent. Bul. 5: 28-31. —Swaine, 1912. Ent. Soc. Ont., Ann. Rpt. 43: 87. —Finlayson and Reeks, 1936. Canad. Ent. 68: 163. —Finlayson, 1939 (1938). Ent. Soc. Ont., Ann. Rpt. 69: 34-35. —Furniss and Dowden, 1941. Jour. Econ. Ent. 34: 49-51. —Hopping et al., 1943. Sci. Agr. 24: 54-61. —Lejeune and Hildahl, 1954. Canad. Ent. 86: 337-344. —Graham, 1956. Forest Sci. 2: 152-153. —Struble, 1957. Forest Sci. 3: 312. —Griffiths, 1959. Canad. Ent. 91: 508. —Schneiderman and Horwitz, 1958. Jour. Expt. Biol. 35: 520-551. —Drooz, 1960. U. S. Dept. Agr., Tech. Bul. 1212: 33. —Ohnesorge, 1962. Ztschr. f. Angew. Ent. 49: 142. —Gauss, 1964. Ztschr. f. Angew. Ent. 54: 226.

Morphology: Finlayson, 1963. Canad. Ent. 95: 483, 500 (immature stages).

koebelei Gahan. Calif. Possibly a parasite of *Caliroa cerasi* (L.).

Tritneptis koebelei Gahan, 1938. Ent. Soc. Wash., Proc. 40: 218. ♀, ♂.

scutellata (Muesebeck). N. H., Mass., Conn. Host: *Apanteles melanoscelus* (Ratz.).

Coelopisthia scutellata Muesebeck, 1927. Jour. Agr. Res. 34: 331. ♀, ♂.

Biology: Muesebeck and Dohanian, 1927. U. S. Dept. Agr., Bul. 1487: 27.

Genus DIBRACHYS Foerster

Revision: Boucek, 1965. Mus. Natl. Pragae, Acta Ent. 11: (Central European fauna).

—Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 804-814 (European fauna).

Genus DIBRACHYS Subgenus ALLODIBRACHYS Boucek

Dibrachys subg. *Allodibrachys* Boucek, 1965. Mus. Natl. Pragae, Acta Ent. 11: 30.

Type-species: *Dibrachys hians* Boucek. Orig. desig.

No Nearctic species at present referred to this subgenus.

Genus DIBRACHYS Subgenus DIBRACHYS Foerster

Dibrachys Foerster, 1856. Hym. Stud., v. 2, p. 65. No species.

Type-species: *Pteromalus boucheanus* Ratzeburg. Desig. by Thomson, 1878.

Coelopisthoidea Gahan, 1913. Canad. Ent. 45: 179.

Type-species: *Coleopisthoidea cladiæ* Gahan. Orig. desig.

Taxonomy: Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 804 (Ratzeburg described no species of *Dibrachys*, but fragmentary remains of a specimen in Vienna identified by him as *Dibrachys* look like a *Colotrechus*).

cavus (Walker). Newfoundland, Que., N. S., N. B., Maine, s. to Fla., w. to Alaska, B. C. and Calif.; worldwide. Ecology: This is the most polyphagous of chalcids; if all known host records are correct, it may be a primary, secondary, or tertiary parasite, attacking many orders of insects, plus spiders. Host: *Epeira* sp., *E. foliata* (Fourc.), *Philodromus aureolus* (Oliv.); *Forficula auricularia* L.; *Chrysopa* sp., *C. californica* Coq., *C. lateralis* Guer., *C. majuscula* Banks, *C. oculata* Say, *C. rufilabris* Burm., *Sympherobius*

californicus Banks; *Bruchus brachialis* Fahr., *Coleomegilla maculata* (Deg.), *Hypera postica* (Gyll.), *Sitophilus granarius* (L.), *S. oryzae* (L.), *Stegobium paniceum* (L.); *Acronicta clarescens* Guen., *A. lepusculina* Guen., *Actebia fennica* (Tausch.), *Actias luna* (L.), *Amathes c-nigrum* (L.), *A. collaris* (G. and R.), *Anarsia lineatella* Zell., *Anthophila pariana* (Clerck), *Archips cerasivoranus* (Fitch), *A. servidanus* (Clem.), *A. semiferanus* (Walk.), *Archippus packardianus* (Fern.), *Argyrotaenia citrana* (Fern.), *A. velutinana* (Walk.), *Barbara colfaxiana* (Kearf.), *Choristoneura pinus* (Freem.), *C. rosaceana* (Harr.), *Coleophora malivorella* Riley, *Dichomeris marginella* (F.), *Dicymolomia pegasalis* (Walk.), *Dioryctria disclusa* Hein., *Erionomos subsignarius* (Hbn.), *Epiblema scudderianum* (Clem.), *Epizeuxis aemula* (Hbn.), *Eurukuttarus confederata* (Grote), *Fumaria casta* (Pallas), *Galleria mellonella* (L.), *Gnorimoschema gallaesolidaginis* (Riley), *Grapholitha molesta* (Busck), *Halisidota argentata* Pack., *Orgyia pseudotsugata* (McD.), *Hyphantria cunea* (Dru.), *Lambdina fiscellaria* (Guen.), *Laspeyresia pomonella* (L.), *Malacosoma americanum* (F.), *M. californicum* (Pack.), *M. constrictum* (Hy. Genus PARADIBRACHYS Girault

Paradibrachys Girault, 1917. Descr. Hym. Chacidoid. Variorum cum Observ. V, p. 1.

Type-species: *Paradibrachys guizoti* Girault. Orig. desig.

guizoti Girault. Calif.

Paradibrachys guizoti Girault, 1917. Descr. Hym. Chalcidoid. Variorum cum Observ. V, p. 1. ♀.

Genus NEOCATOLACCUS Ashmead

Neocatolaccus Ashmead, 1904. Carnegie Mus., Mem. 1: 320, 322.

Type-species: *Catolaccus tylodermae* Ashmead. Orig. desig.

cratylus (Walker). Fla.

Pteromalus Cratylus Walker, 1847. Ann. and Mag. Nat. Hist. (1) 19: 392. ♀.

Taxonomy: Burks, 1975. Brit. Mus. (Nat. Hist.) Ent., Bul. 32: 155.

moneilemae Gahan. Tex. Host: *Moneilema ulkei* Horn.

Neocatolaccus moneilemae Gahan, 1936. U. S. Natl. Mus., Proc. 83: 484. ♀, ♂.

tylodermae (Ashmead). N. H., s. to Fla., w. to Mich., Ill., Kans., Ariz. Host: *Ampeloglypter sesostris* (Lec.), *Cylindrocopturus longulus* (Lec.), *Lixus musculus* Say, *L. parcus* Lec., *L. scrobicollis* Boh., *Microlarinus lypriformis* (Woll.), *M. lareynii* (du V.), *Onychobaris subtensa* Lec., *Trichobaris texana* Lec., *Tyloderma foveolatum* Say.

Catolaccus tylodermae Ashmead, 1893. Ohio Agr. Expt. Sta., Tech. Ser., Bul. 1: 161. ♀, ♂.

Biology: Wester, 1956. Ent. Soc. Wash., Proc. 58: 286. —Goeden and Ricker, 1970. Jour. Econ. Ent. 63: 827-831.

Genus HYPOPTEROMALUS Ashmead

Hypopteromalus Ashmead, 1900. In Smith, Ins. of N.J., Sup., p. 559.

Type-species: *Pteromalus tabacum* Fitch. Monotypic.

inimicus Muesebeck. N. B., Que., Ont., s. to Va., w. to N. Dak. and Kans. Host: *Apanteles* sp., *A. lacteicolor* Vier., *A. melanoscelus* (Ratz.), *Hyposoter fugitivus* (Say).

Hypopteromalus inimicus Muesebeck, 1927. Jour. Agr. Res. 34: 332. ♀, ♂.

Biology: Muesebeck and Dohanian, 1927. U. S. Dept. Agr., Bul. 1487: 28. —Proper, 1934. Jour. Agr. Res. 48: 361.—Doner, 1936. Ent. Soc. Amer., Ann. 29: 226.—Raizenne, 1952. Canada

- Div. Forest Biol., Forest Lep. South. Ont. and Par., p. 258. —Hill and Hough, 1957. Va. Agr. Expt. Sta., Tech. Bul. 130: 16. —Dixon and Benjamin, 1963. Jour. Econ. Ent. 56: 267.
- percussor** Girault. Colo., N. Mex., Ariz., Nev., Wash., Oreg., Calif. Host: *Apanteles* sp., *A. polychrosidis* Vier., *A. smerinthii* Riley, *Bracon politiventris* (Cush.), *Diadegma eureka* (Ashm.), *D. pterophorae* (Ashm.), *Heterospilus atriceps* (Ashm.), *Hyposoter* sp., *Itoplectis quadricingulatus* (Prov.).
- Hypopteronalus percussor* Girault, 1917. Brooklyn Ent. Soc., Bul. 12: 118. ♀. Emend. to *persursor* by Essig, 1926 (Ins. West. No. Amer., p. 823).
- Biology: Waddell, 1952. Ent. Soc. Brit. Columbia, Proc. 48: 87-88.
- tabacum** (Fitch). N. B., Que., s. to Fla., w. to Minn., Iowa, Kans., Tex. Host: *Apanteles* sp., *A. congregatus* (Say), *A. melanoscelus* (Ratz.), *Microplitis ceratomiae* Riley. Often misdet. as *viridescens* Walsh, in old literature.
- Pteromalus Tabacum* Fitch, 1864. N. Y. State Agr. Soc., Trans. 23: 792. ♀.

Taxonomy: Gahan, 1921 (1920). Ent. Soc. Wash., Proc. 22: 241.

Biology: Webster, 1912. Iowa Acad. Sci., Proc. 19: 209-213 (*viridescens*). —Muesebeck and Dohanian, 1927. U. S. Dept. Agr., Bul. 1487: 12, 28. —Fulton, 1940. Ent. Soc. Amer., Ann. 32: 231-244. —Raizenne, 1952. Canada Div. Forest Biol., Forest Lep. South. Ont. and Par., p. 10. —Lawson, 1959. Ent. Soc. Amer., Ann. 52: 743.

Genus HETEROSCHEMA Gahan

Heteroschema Gahan, 1919. U. S. Natl. Mus., Proc. 55: 126.

Type-species: *Heteroschema prima* Gahan. Monotypic.

Taxonomy: Gahan, 1938. Ent. Soc. Wash., Proc. 40: 222-224.

aeneiventris (Ashmead). Kans.

Sphigigaster aeneiventris Ashmead, 1888. Kans. Agr. Expt. Sta., Bul. 3: App. p. VI. ♂.
punctata (Ashmead). Fla., Miss., Mo., Ariz.; West Indies. Host: *Dioxyina piciccola* (Bigot), *Melanagromyza virens* (Loew).

Glyphe punctata Ashmead, 1894. Linn. Soc. London, Jour., Zool. 25: 162. ♀.

rugosopunctata (Ashmead). Tex., Ariz.; West Indies. Host: *Melanagromyza gibsoni* (Mall.).
Pteromalus rugosopunctatus Ashmead, 1894. Linn. Soc. London, Jour., Zool. 25: 165. ♀, ♂.
Heteroschema prima Gahan, 1919. U. S. Natl. Mus., Proc. 55: 126. ♀, ♂.

Biology: Gahan, 1938. Ent. Soc. Wash., Proc. 40: 223.

Genus SCHIZONOTUS Ratzeburg

Pteromalus subg. *Schizonotus* Ratzeburg, 1852. Ichn. d. Forstins., v. 3, p. 230.

Type-species: *Schizonotus sieboldi* Ratzeburg. Desig. by Ashmead, 1904.

Revision: Boucek, 1958. Mus. Natl. Pragae, Acta Ent. 32: 395-404 (European spp.).

Taxonomy: Masi, 1921. Genova, Mus. Civ. Stor. Nat., Ann. (3) 9: 236. —Graham, 1956. Ent. Monthly Mag. 92: 255. —Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 818.

latus (Walker). Maine, s. to Fla., w. to Minn., Wyo., Idaho; Europe. Host: *Chrysomela alnicola* Brown, *C. interrupta* (F.), *C. knabi* Brown, *C. scripta* (F.), *Plagiodera versicolora* (Laich.). Much of the literature published in North America used the name *sieboldi* Ratzeburg, a Palearctic species that apparently does not occur here.

Pteromalus latus Walker, 1835. Ent. Mag. 2: 481. ♀.

Arthrolytus incongruens Masi, 1907. Lab. Zool. Gen. e Agr. Portici, Bol. 1: 252. ♀, ♂.

Coelopisthia smithii Gahan, 1913. Canad. Ent. 45:179.

Biology: Cushman, 1918 (1917). Ent. Soc. Wash., Proc. 19: 128. —Dowden, 1939. Jour. Agr. Res. 58: 581-592. —Craighead, 1950. U. S. Dept. Agr., Misc. Pub. 657: 616.

rotundiventris (Girault). N. J., Md., Va. Host: *Plagiodera versicolora* (Laich.).

Coelopisthia rotundiventris Girault, 1917(1916). Insecutor Inscitiae Menstruus 4: 113. ♀.

Genus COELOPISTHIA Foerster

Coelopisthia Foerster, 1856. Hym. Stud., v. 2, p. 65. No species.

Type-species: *Pteromalus cephalotes* Walker. Desig. by Ashmead, 1904.

Pteromalus subg. *Coelopisthus* Thomson, 1878. Hym. Scand., v. 5, p. 162. Emend.

Kranophorus Graham, 1956. Ent. Monthly Mag. 92: 257. N. name, unnecessarily proposed.

Type-species: *Pteromalus extensus* Walker. Orig. desig.

Taxonomy: Graham, 1956. Ent. Monthly Mag. 92: 257 (Ashmead's designation of *cephalotes* as type-species of *Coelopisthia* based on a misidentification of that species by Thomson). —Peck, 1963. Canad. Ent. Sup. 30: 665 (use of *Coelopisthia* in conventional sense should be retained and the matter referred to the Internat. Comn.).

bicarinata Girault. N. H., Md., D. C. Ind. Ecology: Emerges from nest of *Vespa* sp.
Coelopisthia bicarinata Girault, 1916. Soc. Ent. 31: 57. ♀, ♂.

forbesii (Dalla Torre). N. Y., N. J., Ill., La. Host: *Apantesis nais* (Drury), *Catocala* sp.
Pteromalus pallipes Forbes, 1885. Ill. State Dept. Agr., Trans. 22: App., pp. 46, 49. Preocc.
by Spinola, 1808.
Pteromalus Forbesii Dalla Torre, 1898. Cat. Hym., v. 5, p. 125. N. name.

Taxonomy: Gahan, 1934 (1933). U. S. Dept. Agr., Misc. Pub. 174: 145-146.

fumosipennis Gahan. Md. Ecology: Emerges from lepidopterous pupa.
Coelopisthia fumosipennis Gahan, 1909. Canad. Ent. 41: 431. ♀.

intermedia Girault. D. C.

Coelopisthia intermedia Girault, 1916. Soc. Ent. 31: 57. ♀.

suborbicularis (Provancher). Que., N. H., Md., Ill.
Semiotellus suborbicularis Provancher, 1881. Nat. Canad. 12: 296. ♀.

Taxonomy: Burks, 1964 (1963). Canad. Ent. 95: 1262.

Biology: Fiske, 1903. N. H. Agr. Expt. Sta., Tech. Bul. 6: 182, 197, 228. —McAtee, 1927. Ent. Soc. Wash., Proc. 29: 182. —Langston, 1957. Calif. Univ. Pubs., Ent. 14: 37, 40.

Genus MUSCIDIFURAX Girault and Sanders

Muscidifurax Girault and Sanders, 1910. Psyche 17: 146.

Type-species: *Muscidifurax raptor* Girault and Sanders. Orig. desig.

Muscidivorax Kurdjumov, 1913. Ent. Obozr. 13: 5. Misspelling.

Revision: Kogan ad Legner, 1970. Canad. Ent. 102: 1268-1290.

raptor Girault and Sanders. Md., s. to Fla., w. to Calif.; cosmopolitan. Host: *Cochliomyia macellaria* (F.), *Fannia canicularis* (L.), *Musca domestica* L., *Phormia regina* (Meig.), *Stomoxyx calcitrans* (L.).

Muscidifurax raptor Girault and Sanders, 1910. Psyche 17: 145. ♀, ♂.

Biology: Crandall, 1939. Ent. Soc. Amer., Ann. 32: 652. —DeBach and Smith, 1941. Jour. Econ. Ent. 34: 741-745. —DeBach, 1943. Pan-Pacific Ent. 19: 112-118. —Legner *et al.*, 1965. Puerto Rico Univ., Jour. Agr. 49: 372. —Wylie, 1967. Canad. Ent. 99: 742-748. —Legner, 1969. Ent. Soc. Amer., Ann. 62: 382-385. —Sharma, 1971. Madras Agr. Jour. 58: 442. —Wylie, 1971. Canad. Ent. 103: 1537-1544. —Chabora and Chabora, 1971. Ent. Soc. Amer., Ann. 64: 558-562. —Legner, 1972. Ent. Soc. Amer., Ann. 65: 254-263.

Morphology: Sanger and King, 1971. Entomologist 104: 137-149 (male genitalia).

zaraptor Kogan and Legner. Kans., N. Mex., Utah, Ariz., Calif. Host: *Musca domestica* Linn.
Muscidifurax zaraptor Kogan and Legner, 1970. Canad. Ent. 102: 1279-1285. ♀, ♂.

Biology: Wylie, 1971. Canad. Ent. 103: 1537-1544 (oviposition).

Genus LARIOPHAGUS Crawford

Lariophagus Crawford, 1909. Ent. Soc. Wash., Proc. 11: 52.

Type-species: *Lariophagus texanus* Crawford. Monotypic.

Revision: Gahan, 1927. U. S. Natl. Mus., Proc. 71 (4): 7.

Taxonomy: Kurdjumov, 1913. Ent. Obozr. 13: 15-16. —Graham, 1957. Ent. Monthly Mag. 93: 217. —Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 823.

distinguendus (Foerster). Ont. s. to Fla. w. to B. C. and Calif.; Cosmopolitan. Ecology: Almost always taken as a parasite of Coleoptera infesting stored products, but occasionally collected in open country, usually in the Tropics. Host: *Bruchus brachialis* Fahr., *Lasioderma serricorne* (F.), *Rhyzopertha dominica* (F.), *Stegobium paniceum* (L.), *Sitophilus granarius* (L.), *S. oryzae* (L.), *S. zeamaize* Mots. *Pteromalus distinguendus* Foerster, 1840. Beitr. Monog. Pteromalinen, p. 17. ♂. *Pteromalus Calamis* Walker 1849. Ann. and Mag. Nat. Hist. (2) 3: 207. ♀, ♂. *Pteromalus oryzinus* Rondani, 1874. Soc. Ent. Ital., Bol. 6: 131. *Meraporus utibilis* Tucker, 1910. Canad. Ent. 42: 341. ♀.

Taxonomy: Gahan, 1921 (1920). Ent. Soc. Wash., Proc. 22: 239 (syn.). —Waterston, 1921. Roy. Soc., Rept. Grain Pests Com. 9: 9, 13-15 (syn.). —Ruschka, 1921. Ztschr. f. Angew. Ent. 7: 463-465 (syn.). —Graham, 1969. Brit. Mus. (Nat. Hist.) Ent., Bul. Sup. 16: 824 (syn.).

Family EURYTOMIDAE

By B. D. BURKS

Although phytophagous chalcidooids are to be found scattered among several families, there is a higher proportion of phytophagous species in the Eurytomidae than in any other chalcidoid family. Many of the eurytomids develop in seeds, and others are gall formers. Many others, however, are parasites and some are both parasitic and phytophagous in their development. These latter begin development as parasites and then complete it as phytophagous feeders. Malyshev, 1968 (Genesis of the Hymenoptera, English translation, London, pp. 35, 53, 67), considers the Eurytomidae the most primitive family of the Chalcidoidea, and he discusses types of larval development in this family. There are very few other workers in Hymenoptera that agree with Malyshev that the Eurytomidae is the most primitive family of the Chalcidoidea; the prevailing opinion, based on both habits and morphology, is that the Torymidae is the most primitive.

Revision: Burks, 1971. Amer. Ent. Soc., Trans. 97: 1-89 (World genera).

mellea Ashmead. Fla. Ecology: Reared from leaf galls on *Eugenia*.

Rileya mellea Ashmead, 1894. Amer. Ent. Soc., Trans. 21: 321. ♀.

opuntiae Gahan. Tex. Ecology: Reared from galls on cactus. Host: *Asphondylia opuntiae* Felt.

Rileya opuntiae Gahan, 1936. U. S. Natl. Mus., Proc. 83: 482. ♀.

piercei Crawford. Fla., Ariz.

Rileya piercei Crawford, 1914. Ent. Soc. Wash., Proc. 16: 29. ♂.

similaris Gahan. Tex. Ecology: Reared from galls on leguminous trees, prob. *Mimosa* or

Leucaena. Host: *Asphondylia* sp.

Rileya similaris Gahan, 1918. Ent. Soc. Wash., Proc. 20: 148. ♀, ♂.

SUBFAMILY HARMOLITINAE

Genus HARMOLITA Motschulsky

Isosoma Walker, 1832. Ent. Mag. 1: 13-14. Preocc. by Billberg, 1820.

Type-species: *Eurytoma longula* Dalman. Desig. by Westwood, 1840.

Harmolita Motschulsky, 1863. Soc. Imp. Nat. Moscou, Bul. 36: 58.

Type-species: *Harmolita longicornis* Motschulsky. Monotypic.

Philachyra Walker, 1871. Notes on Chalcid., p. 7.

Type-species: *Philachyra ips* Walker. Monotypic.

Xanthosoma Ashmead, 1888. Ent. Amer. 4: 42-43. No species. —Ashmead, 1894. Amer.

Ent. Soc., Trans. 21: 320. One species.

Type-species: *Xanthosoma nigricornis* Ashmead. Desig. by Ashmead, 1894.

Isosomocharis Ashmead, 1888. Ent. Amer. 4: 42-43. No species. —Ashmead, 1894. Amer.

Ent. Soc., Trans. 21: 331. One species.

Type-species: *Isosomocharis sulcata* Ashmead. Desig. by Ashmead, 1894.

Harmolyta Dalla Torre, 1898. Cat. Hym., v. 5, p. 154. Emend.

Urios Girault, 1911. N. Y. Ent. Soc., Jour. 19: 175.

Type-species: *Urios vestali* Girault. Orig. desig.

Exanthosoma Girault, 1915. Queensland Mus., Mem. 4: 265.

Type-species: *Exanthosoma funeralis* Girault. Monotypic.

Isthmosoma Hedicke, 1921. Arch. f. Naturgesch. 86, A, 11: 165. N. name for *Isosoma* Walker.

Ahtola Claridge, 1961. Soc. Brit. Ent., Trans. 14: 174.

Type-species: *Isosoma atrum* Walker. Orig. desig.

The members of this genus are commonly called jointworms. The larvae make galls in the stems of cereal grains and grasses.

Revision: Phillips and Emery, 1919. U. S. Natl. Mus., Proc. 55: 433-471 (Nearctic spp.). —Hedicke, 1921. Arch. f. Naturgesch. 86, A, 11: 1-167 (Palearctic spp.). —Phillips, 1936. U. S. Dept. Agr., Tech. Bul. 518: 1-25 (Nearctic spp.).

Taxonomy: Gahan, 1922. U. S. Natl. Mus., Proc. 61 (24): 7-8 (generic characters). —Gahan, 1922. Ent. Soc. Wash., Proc. 24: 33-58 (world host data). —Gahan, 1957. Brooklyn Ent. Soc., Bul. 52: 82-83 (*Harmolita* type-species). —Claridge, 1958. Ent. Monthly Mag. 94: 81-85 (*Tetramesa*). —Claridge, 1961. Roy. Ent. Soc. London, Trans. 113: 175-216 (Holarctic spp.). —Burks, 1971. Amer. Ent. Soc., Trans. 97: 51-54, 82-86.

agropyrocola Phillips and Emery. N. Dak., Utah. Host: *Agropyron* spp.

Harmolita agropyrocola Phillips and Emery, 1919. U. S. Natl. Mus., Proc. 55: 458. ♀.

agrostidis (Howard). Calif. Host: *Agrostis* sp.

Isosoma agrostidis Howard, 1896. U. S. Dept. Agr., Div. Ent., Tech. Ser. 2: 12. ♀.

ainsliei Phillips. S. Dak. Host: *Elymus* sp.

Harmolita ainsliei Phillips, 1936. U. S. Dept. Agr., Tech. Bul. 518: 4, 10. ♀, ♂.

albomaculata (Ashmead). N. H., Vt., s. to Va., w. to N. Dak., Nebr., Kans.; Europe, Asia. Host: *Phleum pratense*.

Isosoma albomaculatum Ashmead, 1894. Amer. Ent. Soc. Trans. 21: 329. ♀, ♂.

Taxonomy: Claridge, 1961. Roy. Ent. Soc. London, Trans. 113: 211.

Biology: Phillips, 1920. U. S. Dept. Agr., Bul. 808: 15-16. —Phillips and Poos, 1921. Jour. Agr. Res. 21: 421. —Phillips and Poos, 1927. Jour. Agr. Res. 34: 475, 483.

bambusae Phillips. Ga., Ala.; S. Russia, China, Japan. Host: Bamboo. Grasses of the tribe Bambuseae.

Harmolita bambusae Phillips, 1936. U. S. Dept. Agr., Tech. Bul. 518: 20. ♀.

Biology: Agekian, 1966. Zool. Zhur. 45: 1724.

bromicola (Howard). Conn., Calif. Host: *Bromus ciliatus*.

Isosoma bromicola Howard, 1896. U. S. Dept. Agr., Div. Ent., Tech. Ser. 2: 17. ♀, ♂.

californica (Howard). Calif. Ecology: Develops in the stems of wild grasses.

Isosoma californicum Howard, 1896. U. S. Dept. Agr., Div. Ent., Tech. Ser. 2: 10. ♀, ♂.

captiva (Lintner). N. Y., Ind., Ill. Said to have been reared from wheat.

Isosoma captivum Lintner, 1888. N. Y. State Mus., Nat. Hist., Rpt. 41: 34. ♀, ♂.

Taxonomy: Phillips, 1920. U. S. Dept. Agr., Bul. 808: 16.

cinnae Phillips and Poos. Ohio. Host: *Cinna arundinacea*.

Harmolita cinnae Phillips and Poos, 1922. Kans. Univ., Sci. Bul. 14: 352. ♀, ♂.

comatae Phillips. N. Dak. Host: *Stipa comata*.

Harmolita comatae Phillips, 1936. U. S. Dept. Agr., Tech. Bul. 518: 9. ♀.

cornuta (Walker). N. Y., Pa., Va., Ohio, Mich., Ind., Kans.; Europe. Host: *Agropyron repens*.

Isosoma cornutum Walker, 1832. Ent. Mag. 1: 19. ♂.

Harmolita agropyrophila Phillips and Emery, 1919. U. S. Natl. Mus., Proc. 55: 450. ♂, ♀.

Taxonomy: Claridge, 1961. Roy. Ent. Soc. London, Trans. 113: 212 (syn.).

Biology: Phillips, 1920. U. S. Dept. Agr., Bul. 808: 20 (*agropyrophila*).

dakota Phillips. N. Dak. Host: *Elymus*.

Harmolita dakota Phillips, 1936. U. S. Dept. Agr., Tech. Bul. 518: 14. ♀, ♂.

danthoniae Phillips. Mich. Host: *Danthonia spicata*.

Harmolita danthoniae Phillips, 1936. U. S. Dept. Agr., Tech. Bul. 518: 18. ♀.

elymi (French). Maine, s. to Fla., w. to Wash., Oreg., Calif. Host: *Elymus canadensis*, *E. glaucus*, *E. virginicus*.

Isosoma Elymi French, 1882. Canad. Ent. 14: 10. ♀.

Biology: Phillips, 1920. U. S. Dept. Agr., Bul. 808: 20. —Phillips and Poos, 1927. Jour. Agr. Res. 34: 475.

- elymicola Phillips and Emery. N. Y., Va., Ohio, Mich., Ill., Mo. Host: *Elymus* spp.
Harmolita elymicola Phillips and Emery, 1919. U. S. Natl. Mus., Proc. 55: 460. ♀, ♂.
- Biology: Phillips, 1920. U. S. Dept. Agr., Bul. 808: 21. —Phillips and Poos, 1921. Jour. Agr. Res. 21: 409, 416, 421.
- elymivora Phillips and Emery. Va., Ohio, Ind., Ill., Ark., Kans. Host: *Elymus* spp.
Harmolita elymivora Phillips and Emery, 1919. U. S. Natl. Mus., Proc. 55: 464. ♀, ♂.
- Biology: Phillips, 1920. U. S. Dept. Agr., Bul. 808: 21. —Phillips and Poos, 1921. Jour. Agr. Res. 21: 421.
- elymophaga Phillips and Emery. Wash., Calif. Host: *Elymus condensatus*, *E. triticoides*.
Harmolita elymophaga Phillips, 1927. Ent. Soc. Wash., Proc. 29: 127. ♀, ♂.
- elymophila Phillips and Emery. Calif. Host: *Elymus* spp.
Harmolita elymophila Phillips and Emery, 1919. U. S. Natl. Mus., Proc. 55: 462. ♀, ♂.
- elymophthora Phillips and Emery. N. Dak., Nebr. Host: *Elymus* spp.
Harmolita elymophthora Phillips and Emery, 1919. U. S. Natl. Mus., Proc. 55: 465. ♀, ♂.
- Biology: Phillips, 1920. U. S. Dept. Agr., Bul. 808: 22-23.
- elymoxena Phillips and Emery. Calif. Host: *Elymus glaucus*.
Harmolita elymoxena Phillips and Emery, 1919. U. S. Natl. Mus., Proc. 55: 459. ♀, ♂.
- festucae Phillips and Emery. N. Y., N. J., Pa., Va., Ohio. Host: *Festuca* sp., *F. elatior*. This may be a synonym of the European *Harmolita giraudi* von Schlechtdal.
Harmolita festucae Phillips and Emery, 1919. U. S. Natl. Mus., Proc. 55: 454. ♀, ♂.
- Taxonomy: Claridge, 1961. Roy. Ent. Soc. London, Trans. 113: 194.
- Biology: Phillips, 1920. U. S. Dept. Agr., Bul. 808: 18-19. —Phillips and Poos, 1927. Jour. Agr. Res. 34: 475, 483.
- flavicoxa Phillips. N. Mex. Host: *Elymus* sp.
Harmolita flavicoxa Phillips, 1936. U. S. Dept. Agr., Tech. Bul. 518: 13. ♀, ♂.
- gahani Phillips. S. Dak. Host: *Elymus* sp.
Harmolita gahani Phillips, 1936. U. S. Dept. Agr., Tech. Bul. 518: 18. ♀.
- gillettei Phillips and Emery. Colo.
Harmolita gillettei Phillips and Emery, 1919. U. S. Natl. Mus., Proc. 55: 467. ♀.
- grandis (Riley). Ont., N. Y., s. to N. C., w. to Wash., Oreg., Calif. Ecology: This species has two generations per year, an apterous early spring generation (form *minuta*) and a late spring or early summer winged generation (form *grandis*). Host: *Triticum* spp., cereal wheats. This may be a synonym of the European *Harmolita aptera* (Portschinsky). Wheat strawworm.
Isosoma tritici Riley, 1882. Amer. Nat. 16: 247. ♀. Preocc. by Fitch, 1859.
Isosoma grandis Riley, 1884. Brooklyn Ent. Soc., Bul. 7: 111. ♀. Winged gen.
Isosoma grande form *minutum* Howard, 1896. U. S. Dept. Agr., Div. Ent., Tech. Ser. 2: 10. Wingless gen.
- Urios vestali* Girault, 1911. N. Y. Ent. Soc., Jour. 19: 176. ♀.
- Biology: Webster and Reeves, 1909. U. S. Dept. Agr., Bur. Ent. Cir. 106: 1-11. —Gossard, 1911. Ohio Agr. Expt. Sta., Bul. 233: 66. —Doane, 1916. Calif. State Comm. Hort., Monthly Bul. 5: 69-72. —Phillips, 1920. U. S. Dept. Agr., Bul. 808: 6-8. —Phillips and Poos, 1921. Jour. Agr. Res. 21: 409, 421. —Knowlton, 1931. Jour. Econ. Ent. 24: 414-416. —Knowlton, 1932. - minuenda** Phillips. N. Dak. Host: *Elymus* sp.
Harmolita minnenda Phillips, 1936. U. S. Dept. Agr., Tech. Bul. 518: 6. ♀.

montana (Ashmead). Mont., Colo.

Isosoma montanum Ashmead, 1894. Amer. Ent. Soc., Trans. 21: 329. ♀.

neocaptiva Peck. N. Y., Ind., Ill. Host: *Poa pratensis*.

Isosoma captivum Howard, 1896. U. S. Dept. Agr., Div. Ent., Tech. Ser. 2: 13. ♀, ♂.
Preocc. by Lintner, 1888.

Harmolita neocaptiva Peck, 1951. In Muesebeck et al., U. S. Dept. Agr., Agr. Monog. 2: 571. N. name.

Biology: Phillips, 1920. U. S. Dept. Agr., Bul. 808: 16-17, 23.

nigricornis (Ashmead). Fla.

Xanthosoma nigricornis Ashmead, 1894. Amer. Ent. Soc., Trans. 21: 320. ♀.

occidentalis Phillips and Emery. N. Mex. Host: *Agropyron* sp.

Harmolita occidentalis Phillips and Emery, 1919. U. S. Natl. Mus., Proc. 55: 465. ♀, ♂.

Biology: Phillips and Poos, 1921. Jour. Agr. Res. 21: 421.

oregon Phillips. Oreg. Host: *Elymus* sp.

Harmolita oregon Phillips, 1936. U. S. Dept. Agr., Tech. Bul. 518: 14. ♀.

Harmolita oregonensis Peck, 1951. In Muesebeck et al., U. S. Dept. Agr., Agr. Monog. 2: 571. Emend.

ovatella Burks, n. name. Kans. Host: *Elymus* sp.

Harmolita ovata Phillips and Emery, 1919. U. S. Natl. Mus., Proc. 55: 458. ♀, ♂. Preocc. by *Isosoma ovata* Szepliceti, 1901.

Biology: Phillips, 1920. U. S. Dept. Agr., Bul. 808: 22-23.

pacifica Phillips. Calif.

Harmolita pacifica Phillips, 1936. U. S. Dept. Agr., Tech. Bul. 518: 12. ♀, ♂.

panici Phillips and Poos. Va. Host: *Panicum clandestinum*.

Harmolita panici Phillips and Poos, 1922. Kans. Univ., Sci. Bul. 14: 351. ♀, ♂.

Biology: Phillips and Poos, 1921. Jour. Agr. Res. 21: 421 (*Harmolita* sp.).

poacola Gahan. Conn., Ind. Host: *Poa pratensis*.

Harmolita poae Phillips and Emery, 1919. U. S. Natl. Mus., Proc. 55: 445. ♀, ♂. Preocc. by *Isosoma poae* Schlechtendal, 1891.

Harmolita poacola Gahan, 1922. Ent. Soc. Wash., Proc. 24: 46, 52. N. name.

Biology: Phillips, 1920. U. S. Dept. Agr., Bul. 808: 17-18.

poophila Phillips and Emery. Colo. Host: *Poa* sp., *P. lucida*.

Harmolita poophila Phillips and Emery, 1919. U. S. Natl. Mus., Proc. 55: 463. ♀, ♂.

Harmolita poophila Peck, 1951. In Muesebeck et al., U. S. Dept. Agr., Agr. Monog. 2: 572. Emend.

poosi Phillips. Va.

Harmolita poosi Phillips, 1936. U. S. Dept. Agr., Tech. Bul. 518: 10. ♀.

rufipes Phillips and Emery. Ill., Nebr., Kans., N. Mex., Utah. Host: *Elymus* spp.

Harmolita rufipes Phillips and Emery, 1919. U. S. Natl. Mus., Proc. 55: 453. ♀, ♂.

Biology: Phillips, 1920. U. S. Dept. Agr., Bul. 808: 21-23.

sativi Phillips. Ill. Host: *Triticum*, wheat.

Harmolita sativi Phillips, 1936. U. S. Dept. Agr., Tech. Bul. 518: 7. ♀.

secale (Fitch). N. Y., Pa., Va., Ohio, Mich., Ind., Nebr., Kans., Utah, Alta. Host: *Secale*, cultivated rye.

Eurytoma Secale Fitch, 1861. Amer. Agr. 20: 235-236.

Biology: Phillips, 1920. U. S. Dept. Agr., Bul. 808: 13. — Holmes and Blakeley, 1971. Canad. Ent. 103: 277.

stipicola Phillips. N. Dak. Host: *Stipa comata*.

Harmolita stipicola Phillips, 1936. U. S. Dept. Agr., Tech. Bul. 518: 8. ♀.

stipiphaga Phillips. N. Dak. Host: *Stipa comata*.

Harmolita stipiphaga Phillips, 1936. U. S. Dept. Agr., Tech. Bul. 518: 17. ♀.

stipiphila Phillips. N. Dak.

Harmolita stipiphila Phillips, 1936. U. S. Dept. Agr., Tech. Bul. 518: 16. ♀.

sulcata (Ashmead). Fla.

Isosomacharis sulcata Ashmead, 1894. Amer. Ent. Soc., Trans. 21: 331. ♀.

tibialis (Ashmead). S. Dak., Mont., Oreg. Host: *Phalaris* sp., *P. arundinacea*.

Isosomorpha tibialis Ashmead, 1894. Amer. Ent. Soc., Trans. 21: 331. ♀, ♂.

Harmolita phalaricola Phillips and Poos, 1922. Kans. Univ., Sci. Bul. 14: 353. ♀.

tritici (Fitch). Ont., N. Y., s. to N. C., w. to Wash., Oreg., Calif.; Europe, Asia. Host: *Triticum* spp., cereal wheats. Wheat jointworm.

Pteromalus? triticis Fitch, 1859. N. Y. State Agr. Soc., Jour. 10: 115.

Decatoma basilaris Provancher, 1881. Nat. Canad. 12: 290. ♀, ♂.

Isosoma nigrum Cook, 1885. Rural New Yorker 44: 314. ♀, ♂.

Taxonomy: Burks, 1964 (1963). Canad. Ent. 95: 1257 (*basilaris*). —Zerova, 1966. Zool. Zhur. 45: 1513 (key to Ukraine spp.).

utahensis Phillips. Utah. Ecology: Swept from wheat.

Harmolita utahensis Phillips, 1936. U. S. Dept. Agr., Tech. Bul. 518: 11. ♀.

vaginicola (Doane). Que., Ont., s. to Va., w. to Utah, Wash., Oreg.; Europe. Host: *Triticum* spp., cereal wheats.

Isosoma vaginicola Doane, 1916. Jour. Econ. Ent. 9: 399. ♀.

Biology: Knowlton and Janes, 1933. Utah Agr. Expt. Sta., Bul. 243: 9. —Zerova, 1966. Zool. Zhur. 45: 1508.

websteri (Howard). Que., Ont., s. to Va., w. to Utah, Calif. Host: *Secale cereale*, rye.

Isosoma websteri Howard, 1896. U. S. Dept. Agr., Div. Ent., Tech. Ser. 2: 15. ♀.

Isosoma hirtifrons Howard, 1896. U. S. Dept. Agr., Div. Ent., Tech. Ser. 2: 16. ♀.

Isosoma fitchi Howard, 1896. U. S. Dept. Agr., Div. Ent., Tech. Ser. 2: 20. ♀, ♂.

Biology: Phillips and Poos, 1927. Jour. Agr. Res. 34: 483. —Knowlton, 1932. Jour. Econ. Ent. 25: 1171-1172. —Knowlton and Janes, 1933. Utah Agr. Expt. Sta., Bul. 243: 9-10.

Genus GAHANIOLA Erdos

Gahaniola Erdos, 1952. Folia Ent. Hung. (n. s.) 5: 117.

Type-species: *Harmolita phyllostachitis* Gahan. Orig. desig.

phragmitis Erdos. Often introduced in reeds from Europe; may be established in *Phragmites* growing on East Coast. Host: *Phragmites communis*.

Gahaniola phragmitis Erdos, 1952. Folia Ent. Hung. (n. s.) 5: 119. ♀.

Taxonomy: Erdos, 1955. Allat. Kozlem. 45: 37, 46 (male).

phyllostachitis (Gahan). Fla., Ala.; Russia, China, Japan. Ecology: Specimens sometimes emerge from imported bamboo poles at scattered localities in the U. S. Host:

Phyllostachys bambusoides.

Harmolita phyllostachitis Gahan, 1922. Ent. Soc. Wash., Proc. 24: 55. ♀.

Biology: Agekian, 1966. Zool. Zhur. 45: 1724.

Genus CATHILARIA Burks

Cathilaria Burks, 1971. Amer. Ent. Soc., Trans. 97: 34.

Type-species: *Harmolita opuntiae* Muesebeck. Orig. desig.

opuntiae (Muesebeck). Tex., N. Mex., Ariz., Nev., Calif. Host: *Hilaria mutica*. Originally thought to have emerged from *Opuntia*.

Harmolita opuntiae Muesebeck, 1932. Ent. Soc. Wash., Proc. 34: 110. ♀, ♂.

Biology: Muesebeck, 1933 (1932). Ent. Soc. Wash., Proc. 34: 158 (correction of host record).

Genus ISOSOMODES Ashmead

Isosomodes Ashmead, 1888. Ent. Amer. 4: 42-43. No species. —Ashmead, 1894, Amer. Ent. Soc., Trans. 21: 332. One species.

Type-species: *Isosoma gigantea* Ashmead. Desig. by Ashmead, 1894.

giganteus (Ashmead). D. C., Va., Fla.; West Indies.

Isosoma gigantea Ashmead, 1886. Amer. Ent. Soc., Trans. 13: 127. ♂.

Genus SYSTOLE Walker

Systole Walker, 1832. Ent. Mag. 1: 13, 22.

Type-species: *Systole albipennis* Walker. Monotypic.

Taxonomy: Erdos, 1951. Folia Ent. Hung. (n. s.) 4: 57-58 (Palearctic spp.). —Erdos, 1952. Folia Ent. Hung. (n. s.) 5: 121-126 (Palearctic spp.). —Claridge, 1959. Ent. Monthly Mag. 95: 39 (British spp.). —Claridge, 1961. Soc. Brit. Ent., Trans. 14: 171-179 (type-species).

albipennis Walker. Ont.; Europe, Orient. Ecology: Phytophagous in seeds of umbellifers. Host:

Anethum graveolens, *Coriandrum sativum*, *Cuminum cyminum*, *Daucus carota*,
Foeniculum vulgare, *Pimpinella anisum*, *Torilis japonica*.

Systole albipennis Walker, 1832. Ent. Mag. 1: 22. ♀.

Taxonomy: Masi, 1919. Mus. Civ. Stor. Nat. Genova, Ann. (3) 8: 147-148. —Masi, 1933. Soc. Ent. Ital., Bol. 65: 219-220 (male). —Boucek, 1952. Folia Zool. et Ent. 1: 4 (separation of spp.). —Claridge, 1959. Ent. Monthly Mag. 95: 39-40 (description of male and female).

Biology: Marchal, 1900. Soc. Ent. de France, Ann. 69: 111 (*geniculata*). —Batra *et al.*, 1959. Current Sci. [India] 28: 451 (larva). —Wadhi, 1963. Indian Jour. Ent. 25: 384 (hosts).

geniculata Foerster. Colo., Idaho, Calif.; Europe, Orient. Ecology: Phytophagous in seeds of umbellifers. Host: *Coriandrum sativum*, *Daucus carota*, *Foeniculum vulgare*,
Pimpinella anisum.

Systole geniculata Foerster, 1861. Prog. Realsch. Aachen, p. xxxiii.

Biology: Sakimura, 1946. Hawaii. Ent. Soc., Proc. 12: 481 (feeding habits). —Roberts, 1963. Jour. Econ. Ent. 56: 541 (in carrot seeds).

minuta Ashmead. Fla.

Systole minuta Ashmead, 1894. Amer. Ent. Soc., Trans. 21: 319. ♀, ♂.

SUBFAMILY EUDECATOMINAE

Genus EUDECATOMA Ashmead

Eudecatoma Ashmead, 1888. Ent. Amer. 4: 42-43. No species. —Ashmead, 1894, Amer. Ent. Soc., Trans. 21: 319. One species.

Type-species: *Decatoma batatooides* Ashmead. Desig. by Ashmead, 1894.

Decatomidea Ashmead, 1888. Ent. Amer. 4: 42-43. No species. —Ashmead, 1894, Amer. Ent. Soc., Trans. 21: 322. Two species.

Type-species: *Decatomidea xanthochroa* Ashmead. Desig. by Ashmead, 1894.

The world literature on this genus up to 1944 used the name *Decatoma* Spinola, 1811. Then Hincks made the decision that *Decatoma* Spinola was a synonym of *Eurytoma* Illiger, 1807, leaving this genus to take the next available name, *Eudecatoma* Ashmead, 1888. This decision was not based on a study of types, but was based on an entry in Dalla Torre's 1898 Catalogus Hymenopterorum. Since 1944 the literature has employed the name *Eudecatoma*. It is to be hoped that if Spinola's types are ever found a study of them will show this change to have been justified.

Revision: Balduf, 1932. U. S. Natl. Mus., Proc. 79 (28): 1-95 (*Decatoma*).

Taxonomy: Hincks, 1944. Roy. Ent. Soc. London., Proc., Series B: Taxonomy 13: 37 (nomenclature). —Peck, 1963. Canad. Ent., Sup. 30: 833-844 (change subsp. to var.).

arizonica (Balduf). Ariz. Host: *Andricus ruginosus* Bass.

Decatoma foliatae var. *arizonica* Balduf, 1932. U. S. Natl. Mus., Proc. 79 (28): 82. ♀, ♂.

autumnalis (Girault). Calif.

Decatoma autumnalis Girault, 1920. U. S. Natl. Mus., Proc. 58: 209. ♀.

batatoides (Ashmead). N. J., Fla. Host: *Callirhytis quercusbatatoides* (Ashm.).

Decatoma batatoides Ashmead, 1881. Canad. Ent. 13: 136.

bicolor (Ashmead). Fla., La. Host: *Belonocnema treatae* Mayr.

Decatoma bicolor Ashmead, 1881. Amer. Ent. Soc., Trans. 9: Proc. p. xxxii. ♀.

catesbaei (Ashmead). Fla. Host: *Bassettia quercuscatesbaei* (Ashm.).

Decatoma catesbaei Ashmead, 1881. Amer. Ent. Soc., Trans. 9: Proc. p. xxxii. ♀.

Decatoma catesbeii Dalla Torre, 1898. Cat. Hym., v. 5, p. 327. Emend.

compressa (Girault). Calif.

Decatoma compressa Girault, 1920. U. S. Natl. Mus., Proc. 58: 209. ♀.

disholcaspis (Balduf). Tex., Colo., N. Mex., Ariz. Host: *Adleria* sp., *Andricus ruginosus* Bass., *Disholcaspis* sp., *D. cinerosa* (Bass.).

Decatoma disholcaspis Balduf, 1932. U. S. Natl. Mus., Proc. 79 (28): 23. ♀, ♂.

Biology: Judd, 1966. Marcellia 32: 256 (in *Eunura* gall on *Salix*).

dorsalis (Fitch). Mass., N. Y., s. to Fla., w. to Kans., Tex. Host: *Acraspis erinacei* (Beut.), *Andricus aciculatus* Beut., *A. quercusflocci* (Walsh), *A. quercuspertolicola* (Bass.), *Callirhytis tumifica* (O. S.), *Disholcaspis quercusglobulus* (Fitch), *D. quercusmamma* (Walsh), *Neuroterus quercusmajalis* (Bass.), *Xanthoteras quercusforticorne* (Walsh).

Spalangia Querci-lanae var. *dorsalis* Fitch, 1859. N. Y. State Agr. Soc., Trans. 18: 816.

dubia doanei (Fullaway). Colo., Utah, Calif. Host: *Disholcaspis canescens* (Bass.); *D. chrysolepidis* (Beut.), *D. corallina* (Bass.), *D. eldoradensis* (Beut.), *D. plumbella* Kinsey. *Decatoma doanei* Fullaway, 1912. N. Y. Ent. Soc., Jour. 20: 279. ♀.

dubia dubia (Walsh). Mass., Ont., s. to N. C., w. to Utah, Ariz. Host: *Belonocnema quercusvirens* (O. S.), *Callirhytis quercuspunctata* (Bass.), *Disholcaspis quercusglobulus* (Fitch), *D. quercusmamma* (Walsh), *D. spongiosa* (Karsch), *Dryocosmus imbricariae* (Ashm.).

Decatoma varians var. *dubia* Walsh, 1870. Amer. Ent. and Bot. 2: 300. ♀, ♂.

dubia rufosa (Balduf). N. Y., Va., S. C., Ga., Fla., Ala., Ill., Tex. Host: *Belonocnema quercusvirens* (O. S.), *Disholcaspis quercusglobulus* (Fitch), *D. quercusmamma* (Walsh), *D. spongiosa* (Karsch).

Decatoma dubia var. *rufosa* Balduf, 1932. U. S. Natl. Mus., Proc. 79 (28): 41. ♀, ♂.

flamminneiventris (Girault). Tex., Colo., N. Mex. Host: *Prodoxus* sp., *P. quinquepunctellus* (Chamb.), *P. y-inversus* Riley.

Decatoma flamminneiventris Girault, 1920. U. S. Natl. Mus., Proc. 58: 208. ♀, ♂.

flava (Ashmead). Mass., s. to N. C., w. to Mo., Tex., N. Mex. Host: *Acraspis erinacei* (Beut.), *A. macrocarpa* Bass., *A. pezomachoides* (O. S.), *Andricus aciculatus* Beut., *A. murtfeldtae* Ashm., *A. quercuspertolicola* (Bass.), *A. tubularius* Weld, *Callirhytis seminator* (Harr.), *Dryocosmus floridensis* (Beut.), *Loxaulus humilis* (Weld), *Neuroterus noxioides* (Bass.), *N. quercusbattatus* (Fitch).

Decatoma flava Ashmead, 1881. Canad. Ent. 13: 134. ♀, ♂.

Biology: Triggerson, 1914. Ent. Soc. Amer., Ann. 7: 8-9.

flavipes (Balduf). Ariz. Host: *Dryocosmus coxii* (Bass.).

Decatoma flavipes Balduf, 1932. U. S. Natl. Mus., Proc. 79 (28): 52. ♀, ♂.

florida (Girault). Fla. *Andricus quercusflocci* (Walsh) may be the host of this species.

Decatoma florida Girault, 1917. Descr. Hym. Chalcidoid. Variorum cum Observ. V, p. 6. ♀.

Taxonomy: Girault, 1920. U. S. Natl. Mus., Proc. 58: 208 (repetition of privately published original description).

foliatae (Ashmead). Va., Fla., Ill., Mo. Host: *Andricus quercusfoliatus* (Ashm.), *Callirhytis flavipes* (Gill.), *Disholcaspis quercusglobulus* (Fitch), *Dryocosmus imbricariae* (Ashm.).

Decatoma foliatae Ashmead, 1881. Canad. Ent. 13: 136. ♀, ♂.

globuli (Balduf). Ill. Host: *Andricus ruginosus* Bass., *A. tecturnarum* Kinsey, *Disholcaspis eldoradensis* (Beut.), *D. quercusglobulus* (Fitch), *D. spongiosa* (Karsch), *Xanthoteras quercusforticorne* (Walsh).

Decatoma globuli Balduf, 1932. U. S. Natl. Mus., Proc. 79 (28): 47. ♀, ♂.

- gracilis** (Fullaway). Calif. Host: *Andricus quercusalifornicus* (Bass.).
Decatoma gracilis Fullaway, 1912. N. Y. Ent. Soc., Jour. 20: 280. ♂.
- isis** (Girault). Calif. Host: *Andricus chrysolepidicola* (Ashm.), *A. quercusalifornicus* (Bass.), *A. spectabilis* Kinsey, *Callirhytis quercuspomiformis* (Bass.), *C. quercussuttoni* (Bass.).
Decatoma isis Girault, 1917. Descr. Stellarum Nov., p. 10. ♀.
- lanae** (Ashmead). Fla. Host: *Callirhytis quercusturneri* (Ashm.).
Decatoma lanae Ashmead, 1881. Canad. Ent. 13: 135. ♀, ♂.
- lobatae** (Balduf). Calif. Host: *Andricus willzae* Full., *Neuroterus varians* Kinsey.
Decatoma lobatae Balduf, 1932. U. S. Natl. Mus., Proc. 79 (28): 45. ♀.
- marylandica** (Girault). N. S., Md., D. C. Host: *Neuroterus quercusbatalus* (Fitch).
- Decatoma marylandica** Girault, 1916. Brooklyn Ent. Soc., Bul. 11: 112. ♀.
- mellea** (Curtis). P. E. I., Que., N. Y., Oreg.; Holarctic. Host: *Mayetiola destructor* (Say);
Ditropiinus auricoviridis Cwfd., *Eurytoma parva* Phill., *Harmolita hordei* (Harr.), *H. linearis* (Walk.), *H. tritici* (Fitch).
Decatoma mellea Curtis, 1831. Brit. Ent. 8: 345. "♂" = ♀.
Decatoma amsterdamsensis Girault, 1917. Descr. Stellarum Nov., p. 10. ♀, ♂.
- Taxonomy: Gahan, 1934 (1933). U. S. Dept. Agr., Misc. Pub. 174: 38-41 (*amsterdamsensis*).—Claridge, 1959. Soc. Brit. Ent., Trans. 13: 160 (syn.).
- Biology: Chamberlin, 1941. U. S. Dept. Agr., Tech. Bul. 784: 29, 40. —Cannon, 1963. Canad. Ent. 95: 34.
- michiganica** (Girault). Mich.
Decatoma michiganica Girault, 1920. U. S. Natl. Mus., Proc. 58: 209. ♀.
- mimosae** (Balduf). Ariz. Ecology: Reared from gall on *Mimosa biuncifera*. Host:
Tanaostigmodes sp.
Decatoma mimosae Balduf, 1932. U. S. Natl. Mus., Proc. 79 (28): 25. ♀, ♂.
- nigriceps excrucians** (Walsh). Ill. Host: *Callirhytis seminator* (Harr.).
Decatoma nigriceps var. *excrucians* Walsh, 1870. Amer. Ent. and Bot. 2: 301. ♀, ♂.
- nigriceps nigriceps** (Walsh). Mass., Conn., Va., Ill., Mo., Kans. Host: *Callirhytis tumifica* (O. S.), *Disholcaspis quercusmamma* (Walsh), *Xanthoteras quercusforticornis* (Walsh).
Decatoma nigriceps Walsh, 1870. Amer. Ent. and Bot. 2: 300. ♀, ♂.
- novascotiae** (Balduf). N. S., Va. Host: *Callirhytis cornigera* (O. S.); *Neuroterus quercusbatalus* (Fitch).
Decatoma novascotiae Balduf, 1932. U. S. Natl. Mus., Proc. 79 (28): 50. ♀, ♂.
- nubilistigma** (Walsh). Que., Mass., N. Y., N. J., Ill., Kans. Ecology: Reared from *Euura* sp. gall on *Salix discolor*.
Decatoma nubilistigma Walsh, 1870. Amer. Ent. and Bot. 2: 301. ♀, ♂.
- occidentalis flavifrons** (Balduf). Ariz. Ecology: Reared from gall on live oak.
Decatoma occidentalis var. *flavifrons* Balduf, 1932. U. S. Natl. Mus., Proc. 79 (28): 61. ♂.
- occidentalis occidentalis** (Balduf). Conn., Colo., N. Mex., Utah, Ariz., Oreg., Calif. Host:
Adleria weldi (Beut.), *Andricus chrysolepidicola* (Ashm.), *A. lasius* (Ashm.), *A. lasius* var. *areolaris* Kinsey, *A. ruginosus* Bass., *Antron quercusechinus* (O. S.), *Disholcaspis canescens* (Bass.), *D. corallina* (Bass.), *D. eldoradensis* (Beut.), *D. truckeensis* (Ashm.), *Xanthoteras eburneum* (Bass.).
Decatoma occidentalis Balduf, 1932. U. S. Natl. Mus., Proc. 79 (28): 58. ♀, ♂.
- pezomachoides** (Balduf). Ohio. Host: *Acraspis pezomachoides* (O. S.).
Decatoma pezomachoides Balduf, 1932. U. S. Natl. Mus., Proc. 79 (28): 69. ♀.
- pomiformis** (Balduf). Calif. Host: *Callirhytis quercuspomiformis* (Bass.).
Decatoma pomiformis Balduf, 1932. U. S. Natl. Mus., Proc. 79 (28): 70. ♀, ♂.
- querci** (Ashmead). Fla. Ecology: Reared from dipterous galls on *Quercus catesbeiae*.
Decatoma querci Ashmead, 1881. Canad. Ent. 13: 135. ♂.
- quercilanae** (Fitch). Que., Ont., s. to Fla., w. to Tex., Colo., Ariz. Host: *Acraspis inflata* (Kinsey), *Andricus aciculatus* Beut., *A. murfeldtae* Ashm., *A. pattoni* (Bass.), *A. quercusflocci* (Walsh), *A. quercuspeltolicola* (Bass.), *Callirhytis flavipes* (Gill.), *C. quercuscitula* (Bass.), *C. seminator* (Harr.), *C. tumifica* (O. S.), *Disholcaspis*

quercusglobulus (Fitch), *D. quercusmamma* (Walsh), *Neuroterus quercusbatalatus* (Fitch),
N. quercusmajalis (Bass.), *Xanthoteras quercusforticorne* (Walsh).

Spalangia Querci-lanae Fitch, 1850. N. Y. State Agr. Soc., Trans. 18: 816.

Decatoma hyalipennis Walsh, 1870. Amer. Ent. and Bot. 2: 301. ♀, ♂.

Decatoma flavicollis Ashmead, 1885. Amer. Ent. Soc., Trans. 12: Proc. p. xiii. ♀, ♂. Preocc.
 by Walker, 1884.

Decatoma floridana Smith, 1886. Ent. Amer. 2: 19. N. name for *flavicollis* Ashm.

quinquesetae (Balduf). Calif. Host: *Andricus quercuspetiolicola* (Bass.).

Decatoma quinquesetae Balduf, 1932. U. S. Natl. Mus., Proc. 79 (28): 78. ♀, ♂.

simplicistigma (Walsh). Ill., Kans., Colo. Host: *Acraspis erinacei* (Beut.), *Andricus quercuspetiolicola* (Bass.).

Decatoma simplicistigma Walsh, 1870. Amer. Ent. and Bot. 2: 301. ♀, ♂.

subimmaculata (Girault). Calif. Host: *Andricus lasius* (Ashm.), *A. lasius* var. *sublasius*

Kinsey, *A. spectabilis* Kinsey, *Callirhytis quercuspomiformis* (Bass.), *Disholcaspis truceensis* (Ashm.), *Heteroecus pacificus* (Ashm.).

Decatoma subimmaculata Girault, 1917. Jour. Ent. and Zool. 9: 11. ♀.

texana (Balduf). Tex.

Decatoma texana Balduf, 1932. U. S. Natl. Mus., Proc. 79 (28): 22. ♀, ♂.

vacciniicola (Balduf). Ont., Que., s. to Va., w. to Ill., La. Host: *Hemadas nubilipennis* (Ashm.).

Decatoma vacciniicola Balduf, 1932. U. S. Natl. Mus., Proc. 79 (28): 12. ♀, ♂.

Biology: Glick, 1939. U. S. Dept. Agr., Tech. Bul. 673: 45. —Judd, 1959. Amer. Micros. Soc., Trans. 78: 213.

varians (Walsh). Ont., s. to Fla., w. to Tex., Colo., Calif. Host: *Andricus chrysolepidicola*

(Ashm.), *A. chrysolepidicola* var. *pugnus* Kinsey, *Callirhytis frequens* (Gill.), *C. quercusgemmaria* (Ashm.), *C. quercuspunctulata* (Bass.), *Disholcaspis eldoradensis* (Beut.), *D. quercusglobulus* (Fitch), *Dryocosmus imbricariae* (Ashm.), *Sphaeroteras caepuliforme* (Beut.).

Decatoma varians Walsh, 1870. Amer. Ent. and Bot. 2: 300. ♀, ♂.

Decatoma phellos Ashmead, 1881. Canad. Ent. 12: 136. ♂.

Decatoma kelloggi Fullaway, 1912. N. Y. Ent. Soc., Jour. 20: 278. ♀, ♂.

wiltzae (Balduf). Conn., Ariz., Calif. Host: *Andricus wiltzae* Full.

Decatoma wiltzae Balduf, 1932. U. S. Natl. Mus., Proc. 79 (28): 83. ♀, ♂.

xanthochroa (Ashmead). Fla., Tex. Host: *Andricus murtfeldiae* Ashm., *Callirhytis flavigera* (Gill.).

Decatomoides xanthochroa Ashmead, 1894. Amer. Ent. Soc., Trans. 21: 322. ♀.

Decatoma brevilobae Balduf, 1932. U. S. Natl. Mus., Proc. 79 (28): 56. ♀, ♂.

Genus SYCOPHILA Walker

Sycophila Walker, 1871. Notes on Chalcid., p. 63.

Type-species: *Sycophila decatomoides* Walker. Desig. by Ashmead, 1904.

Isanisa Walker, 1875. Entomologist 8: 15.

Type-species: *Isanisa decatomoides* Walker. Monotypic.

Pseudisa Walker, 1875. Entomologist 8: 15.

Type-species: *Pseudisa smicrooides* Walker. Monotypic.

Taxonomy: Burks, 1971. Amer. Ent. Soc., Trans. 97: 72-73.

butcheri Burks. Fla. Host: *Ficus aurea*, *F. laevigata*.

Sycophila butcheri Burks, 1969. Fla. Ent. 52: 120. ♀, ♂.

SUBFAMILY AXIMINAE

Genus AXIMA Walker

Axima Walker, 1862. Ent. Soc. London, Trans. (3) 1: 373.

Type-species: *Axima spinifrons* Walker. Monotypic.

- zabriskieei* Howard. Que., N. Y., N. J., Va., W. Va., Mich., Ind., Mo., Tex., Calif. Host: *Ceratina calcarata* Robt., *C. dupla* Say.
Axima zabriskieei Howard, 1890. U. S. Dept. Agr., Insect Life 2: 365. ♀, ♂.
 Biology: Rau, 1928. Ent. Soc. Amer., Ann. 21: 382. —Krombein, 1960. Ent. News 71: 32, 68.
 Morphology: Burks, 1966. Ent. News 77: 199-202 (immature stages).

Genus BEPHRATOIDES Brues

Bephratooides Brues, 1909 (1908). Wis. Nat. Hist. Soc., Bul. 6: 158.

Type-species: *Bephratooides maculatus* Brues. Orig. desig.

agrili (Ashmead). N. J., Va., W. Va. Host: *Agryllus otiosus* Say.

Eurytoma agrili Ashmead, 1894. Amer. Ent. Soc., Trans. 21: 325. ♀.

maculatus Brues. Tex.; Mexico. Ecology: Bred from mesquite infested with wood-boring Coleoptera.

Bephratooides maculatus Brues, 1909 (1908). Wis. Nat. Hist. Soc., Bul. 6: 158. ♀.

Genus IPIDEURYTOMA Boucek and Novicky

Ipideurytoma Boucek and Novicky 1954. Ent. Tidskr. 75: 267.

Type-species: *Ipideurytoma spessivtsevi* Boucek and Novicky. Orig. desig.

polygraphi (Ashmead). N. Y., W. Va., Colo., B. C. Host: *Polygraphus* sp., *Trypodendron* sp. This and the European species, *spessivtsevi* Boucek and Novicky, are very closely related, and they may be synonyms.

Decatomidea polygraphi Ashmead, 1894. Amer. Ent. Soc., Trans. 21: 322. ♀.

Taxonomy: Bugbee, 1956. Ent. Soc. Amer., Ann. 49: 506.

Genus CHRYSEIDA Spinola

Chryseida Spinola, 1840. Rev. Zool. 3: 18.

Type-species: *Chryseida superciliosa* Spinola. Monotypic.

Revision: Burks, 1956. Brooklyn Ent. Soc., Bul. 51: 109-116.

bennetti Burks. Tex.; Mexico, West Indies. Ecology: Reared from bruchids in the seeds of *Havardia brevifolia*, *Rhynchosia* sp., and *Cajanus cajan*.

Chryseida bennetti Burks, 1956. Brooklyn Ent. Soc., Bul. 51: 115. ♀.

inopinata Brues. Tex.; Mexico. Ecology: Reared from bruchids in leguminous seeds.

Chryseida inopinata Brues, 1907. Wis. Nat. Hist. Soc., Bul. 5: 103. ♀.

SUBFAMILY HEIMBRINAE

Genus HEIMBRA Cameron

Heimbra Cameron, 1910. Amer. Ent. Soc., Trans. 35: 433.

Type-species: *Heimbra acuticollis* Cameron. Monotypic.

Taxonomy: Burks, 1971. Amer. Ent. Soc., Trans. 97: 54-56.

opaca (Ashmead). Kans., Mont., Colo., N. Mex., Utah, Ariz., Calif.

Euperilampus opacus Ashmead, 1894. Amer. Ent. Soc., Trans. 21: 318. ♀.

Taxonomy: Crawford, 1914. Ent. Soc. Wash., Proc. 16: 69 (type abnormal; sp. belongs in *Eurytoma*). —Burks, 1971. Amer. Ent. Soc., Trans. 97: 56 (nomenclature).

SUBFAMILY PRODECATOMINAE

Genus PRODECATOMA Ashmead

Prodecatoma Ashmead, 1904. Carnegie Mus., Mem. 1: 261, 263, 463.

Type-species: *Prodecatoma flavescentis* Ashmead Orig. desig.

cooki (Howard). Conn., N. Y., Md., Va., Fla., Ohio, Mich., Calif. Ecology: Develops in seeds of wild and cultivated grapes and some nearly related Vitaceae. Host: *Parthenocissus quinquefolia*, *Vitis* sp., *V. californica*, *V. labrusca*.

Decatomidae cooki Howard, 1896. U. S. Dept. Agr., Div. Ent., Tech. Ser. 2: 23. ♀, ♂.

Prodecatoma phytophaga Crosby, 1909. Canad. Ent. 41: 50. ♀, ♂.

Taxonomy: Gahan, 1951. Canad. Ent. 83: 173-174 (types).

Biology: Crosby, 1909. N. Y. Agr. Expt. Sta., Bul. 265: 382. — Rohwer, 1913. U. S. Dept. Agr., Bur. Ent., Tech. Ser. 20: 158 (oviposition).

Morphology: Bugbee, 1936. Ent. Amer. 16: 178.

maga (Girault). Calif. Host: *Andricus chrysolepidicola* (Ashm.), *Disholcaspis plumbella* Kinsey.

Eurytoma hegeli var. *maga* Girault, 1920. U. S. Natl. Mus., Proc. 58: 207. ♀, ♂.

Taxonomy: Peck, 1951. In Muesebeck et al., U. S. Dept. Agr., Agr. Monog. 2: 577 (change from var. to sp.).

Genus BEPHRATELLOIDES Girault

Bephratoides Girault, 1913. Arch. f. Naturgesch. 79 A (6): 60. Preocc. by Brues, 1908.

Type-species: *Bephrata paragnayensis* Crawford. Orig. desig.

Bephratelloides Girault, 1913. Ent. News 24: 459. N. name.

This genus has for many years taken the name *Bephrata* Cameron, 1884. A recent study of the type of the the type-species of *Bephrata* showed that the true *Bephrata* is quite different and has been misidentified since the time of Ashmead, 1888.

Taxonomy: Burks, 1971. Amer. Ent. Soc., Trans. 97: 26-27.

cubensis (Ashmead). Fla.; West Indies, Mexico, Cent. and S. Amer. Ecology: Develops in the seeds of Soursop, Cherimoya, Sugar-apple or Sweetshop, and Custard-apple, *Annona* spp. Host: *Annona cherimola*, *A. muricata*, *A. reticulata*, *A. squamosa*.

Bephrata cubensis Ashmead, 1894. Amer. Ent. Soc., Trans. 21: 321. ♀.

Biology: Crawford, 1911. U. S. Natl. Mus., Proc. 41: 274. — Bruner and Acuna, 1923. Estacion Expt. Agron., Santiago, Cuba, pp. 3-12 (life history). — Dozier, 1932. Porto Rico Dept. Agr., Jour. 16: 109-112. — Osorio, 1937. Rev. Agr. Habana 2: 10-19 (reproduction). — Alvorado, 1939. Los ins. daninos ... en Guatemala, pp. 267-270. — Martorell, 1945. Puerto Rico Univ., Jour. Agr. 29: 557.

SUBFAMILY EURYTOMINAE

Genus TENUIPETIOLUS Bugbee

Tenuipetiolus Bugbee, 1951. Kans. Ent. Soc., Jour. 24: 37.

Type-species: *Eurytoma albipes* Ashmead. Orig. desig.

medicaginis (Gahan). Tex., Ariz., Calif.; Mexico. Ecology: Parasitizes dipterous hosts in galled seed pods of alfalfa and *Medicago*. Host: *Asphondylia mentzeliae* Ckll., *A. websteri* Felt.

Eurytoma medicaginis Gahan, 1919. Ent. Soc. Amer., Ann. 12: 159. ♀, ♂.

mentha Bugbee. N. Mex. Ecology: Parasitizes dipterous larvae in pods of *Poliomintha incana*.

Tenuipetiolus mentha Bugbee, 1951. Kans. Ent. Soc., Jour. 24: 38, 44. ♀, ♂.

ruber Bugbee. N. Y., s. to Va., w. to Tenn. and Ariz. Ecology: Parasite of gall makers on Rosaceae. Host: *Diastrophus cuscuteformis* O. S., *D. nebulosus* (O. S.), *Diplolepis rosae* (L.).

Tenuipetiolus rubra Bugbee, 1951. Kans. Ent. Soc., Jour. 24: 39. ♀, ♂.

teredon (Walker). N. Y., Va., N. C., Fla., Miss., Kans., Tex. Ecology: Emerges from cecidomyiid galls on *Ambrosia*, *Helianthus*, *Xanthium*. Host: *Asphondylia helianthiglobulus* O. S.

Eurytoma teredon Walker, 1843. Soc. Ent. de France, Ann. (2) 1: 153. ♀, ♂.

Eurytoma albipes Ashmead, 1881. Amer. Ent. Soc., Trans. 9: Proc. p. xxxi. ♀, ♂.

Taxonomy: Burks, 1975. Brit. Mus. (Nat. Hist.) Ent., Bul. 32 (4): 163 (syn.; lectotype designated).

Genus PHYLLOXEROXENUS Ashmead

Phylloxeroxenus Ashmead, 1888. Ent. Amer. 2: 42-43. No species. — Ashmead, 1894. Amer. Ent. Soc., Trans. 21: 328. One species.

Type-species: *Eurytoma phylloxerae* Ashmead. Desig. by Ashmead, 1894.
phylloxerae (Ashmead). N. Y., Va., Fla., La. Ecology: Reared from *Phylloxera* galls, but probably parasitic on cecidomyiid larvae living in those galls. Recorded from galls of *Phylloxera caryaecanis* Fitch, *P. caryaescissae* Riley, *P. deplanata* Pergande.
Eurytoma phylloxerae Ashmead, 1881. Amer. Ent. Soc., Trans. 9: Proc. p. xxx. ♀.

Genus EURYTOMOCHARIS Ashmead

Eurytomocharis Ashmead, 1888. Ent. Amer. 4: 42-43. No species. — Ashmead, 1894. Amer. Ent. Soc., Trans. 21: 327. One species.

Type-species: *Eurytomocharis minuta* Ashmead. Desig. by Ashmead, 1894.
 Revision: Bugbee, 1966. Amer. Midland Nat. 75: 367-382.

Taxonomy: Bugbee, 1956. Ent. Soc. Amer., Ann. 49: 505-506 (generic characters).
armillata Bugbee. S. Dak. Host: *Spartina* sp.

Eurytomocharis armillata Bugbee, 1966. Amer. Midland Nat. 75: 373. ♀.
ashmeadi (Peck). Fla.

Eurytomocharis minuta Ashmead, 1894. Amer. Ent. Soc., Trans. 21: 327. ♀, ♂. Preocc. by Walker, 1832, when *minuta* Ashmead was transferred to *Eurytoma* in 1951.

Eurytoma ashmeadi Peck, 1951. In Muesebeck et al., U. S. Dept. Agr., Agr. Monog. 2: 575. N. name.

eragrostidis Howard. N. Y., D. C., Ind., Ill., Iowa, N. Mex. Host: *Agropyron* sp., *Agrostis alba*, *Andropogon saccharoides*, *Eragrostis ciliaris*, *E. erosa*, *E. poaoides*, *Muhlenbergia porteri*, *M. wrightii*, *Oryzopsis hymenoides*, *Sporobolus airoides*.
Eurytomocharis eragrostidis Howard, 1896. U. S. Dept. Agr., Div. Ent., Tech. Ser. 2: 21. ♀, ♂.

Taxonomy: Bugbee, 1966. Amer. Midland Nat. 75: 380 (may be a complex).
glyceriae Bugbee. Ind. Host: *Glyceria striata*.

Eurytomocharis glyceriae Bugbee, 1966. Amer. Midland Nat. 75: 374. ♀, ♂.
muhlenbergiae (Howard). Mo. Host: *Muhlenbergia schreberi*.

Isosomomorpha muhlenbergiae Howard, 1896. U. S. Dept. Agr., Div. Ent., Tech. Ser. 2: 20. ♀.

Taxonomy: Bugbee, 1966. Amer. Midland Nat. 75: 378 (may not belong in *Eurytomocharis*).
pascuorum Bugbee. N. Mex. Host: *Bouteloua curtipendula*, *B. gracilis*, *Eragrostis erosa*, *Stipa comata*.

Eurytomocharis pascuorum Bugbee, 1966. Amer. Midland Nat. 75: 376. ♀, ♂.
planitiae Bugbee. Iowa, N. Mex. Host: *Bouteloua curtipendula*, *B. gracilis*.

Eurytomocharis planitiae Bugbee, 1966. Amer. Midland Nat. 75: 376. ♀, ♂.
pythes (Walker). Fla.

Eurytoma pythes Walker, 1843. Soc. Ent. de France, Ann. (2) 1: 154. ♀.

Taxonomy: Burks, 1975. Brit. Mus. (Nat. Hist.) Ent., Bul. 32 (4): 163.
sporoboli Bugbee. N. Mex. Host: *Sporobolus airoides*.

Eurytomocharis sporoboli Bugbee, 1966. Amer. Midland Nat. 75: 373. ♀, ♂.
triodiae Howard. N. Y., D. C., Va., Mich., Ind., Kans. Host: *Triodia flava*.

Eurytomocharis triodiae Howard, 1896. U. S. Dept. Agr., Div. Ent., Tech. Ser. 2: 21. ♀, ♂.

Biology: Bugbee, 1966. Amer. Midland Nat. 75: 378 (life hist.).

Genus EVOXYSOMA Ashmead

Evoxysoma Ashmead, 1888. Ent. Amer. 4: 42-43. No species. —Ashmead, 1894. Amer. Ent. Soc., Trans. 21: 328. One species.

Type-species: *Systole brachyptera* Ashmead. Desig. by Ashmead, 1894.

Euoxysooma Dalla Torre, 1898. Cat. Hym., v. 5, p. 345. Emend.

Enyxsooma Cameron, 1905. Ztschr. Syst. Hym. Dipt. 5: 344. Misspelling.

brachyptera (Ashmead). Fla.

Systole brachyptera Ashmead, 1886. Amer. Ent. Soc., Trans. 13: 126. ♀.

vitis (Saunders). Conn., Ont., N. Y., N. J., N. C., Ohio, Mo. Ecology: Develops in seeds of wild and cultivated grape; its development in the seeds causes grape fruits to wither. Host: *Vitis* sp.

Isosoma vitis Saunders, 1869. Canad. Ent. 2: 25. ♀, ♂.

Taxonomy: Bugbee, 1967. U. S. Natl. Mus., Proc. 118: 516.

Biology: Riley, 1870. Mo. State Bd. Agr., Ann. Rpt. 5: 92-93. —Saunders, 1871. Ont. Fruit Growers Assoc., Ann. Rpt. 1870: 109-111. —Crosby, 1909. N. Y. Agr. Expt. Sta., Bul. 265: 380. —Rohwer, 1913. U. S. Dept. Agr., Bur. Ent., Tech. Ser. 20: 158 (oviposition).

Genus BRUCHOPHAGUS Ashmead

Bruchophagus Ashmead, 1888. Ent. Amer. 4: 42, 43. No species. —Ashmead, 1894. Amer. Ent. Soc., Trans. 21: 328. Three species.

Type-species: *Bruchophagus borealis* Ashmead. Desig. by Ashmead, 1894.

Systolodes Ashmead, 1888. Ent. Amer. 4: 42, 43. No species. —Ashmead, 1894. Amer. Ent. Soc., Trans. 21: 320. One species.

Type-species: *Systolodes brevicornis* Ashmead. Desig. by Ashmead, 1894.

This genus contains the best known species of seed chalcids, most of them developing in leguminous seeds. In 1888, when Ashmead named the genus, he thought that its species parasitized bruchids that developed in leguminous seeds. Even after the phytophagous nature of some of the species had been clearly demonstrated, he refused to accept it. As late as 1904, long after the clover seed chalcids had been shown by competent workers to be phytophagous, he wrote: Dr. A. D. Hopkins claims that *Bruchophagus funebris* is phytophagous and states he has proven it by a series of experiments. I think, however, some mistake has been made and I cannot accept Dr. Hopkins' observation as conclusive. ...I am inclined to think that both Drs. Howard and Hopkins are wrong, and that *Bruchophagus funebris* is a parasite upon some *Bruchus* (Carnegie Mus., Mem. 1: 260).

Taxonomy: Girault, 1916. Canad. Ent. 48: 338-339 (brief review of spp.). —Boucek, 1954. Mus. Natl. Pragae, Acta Ent. 30: 76 (subg. of *Eurytoma*). —Fedoseeva, 1954. Mosk. Univ. Vestnik 9 (5): 113-118. —Fedoseeva, 1958. Zool. Zhur. 37: 1345-1351. —Claridge, 1961. Soc. Brit. Ent., Trans. 14: 178.

Biology: Burks, 1958 (1957). Ent. Soc. Wash., Proc. 59: 273-277 (hosts). —Fedoseeva, 1960. Nauch. Dok. Vyssh. Shkoly. Biol. 3: 14-18 (ecology).

borealis Ashmead. Ont. Originally said to have been bred from a *Bruchus*, but that is almost certainly incorrect.

Bruchophagus borealis Ashmead, 1894. Amer. Ent. Soc., Trans. 21: 328. ♀, ♂.

Taxonomy: Girault, 1916. Canad. Ent. 4: 338.

caraganae (Nikolskaja). Man., N. Dak., Sask.; Europe, Asia. Host: *Caragana arborescens*, *C. frutex*, *C. pygmaea*, *C. sophoraeifolia*.

Eurytoma caraganae Nikol'skaya, 1952. Opred. Faune SSSR 44: 176, 187. ♀, ♂

Taxonomy: Bugbee, 1956. Ent. Soc. Amer., Ann. 49: 505.

Biology: Znoiko, 1952. Ent. Obozr. 32: 49-55 (life history and parasites in Palearctic region). —Hedlin, 1957 (1956). Canad. Ent. 88: 622-625 (in Nearctic region).

gibbus (Bohemian). Cosmopolitan; common throughout North America. Host: *Melilotus* sp., *Trifolium* sp. Clover seed chalcid.

Eurytoma gibba Boheman, 1836 (1835). Svenska Vetensk. Akad., Handl. 56: 244. ♀.

- Eurytoma mucianus* Walker, 1848. List Hym. Ins. Brit. Mus. 2: 152. ♂.

sculptus (Ashmead). Fla.

Eurytoma sculpta Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 195. ♀.

Taxonomy: Bugbee, 1956. Ent. Soc. Amer., Ann. 49: 505.

Genus EURYTOMA Illiger

Eurytoma Illiger, 1807. Mag. f. Insektenkunde 6: 192.

Type-species: *Chalcis abrotani* Panzer. Desig. by Westwood, 1840.

Decatoma Spinola, 1811. Mus. d'Hist. Nat., Ann. 17: 151.

Type-species: *Diplolepis adonidum* Rossi. Desig. by Ashmead, 1894.

Ennetoma Dahlbom, 1857. Öfvers. Svensk. Vet. Akad., Forh. 14: 292.

Type-species: *Chalcis abrotani* Panzer. Desig. by Gahan and Fagan, 1923.

Enneatoma Dalla Torre, 1898. Cat. Hym. 5: 332. Emend.

Bephratella Girault, 1913. Arch. f. Naturgesch. 79(6): 95.

Type-species: *Bephratella nympha* Girault. Orig. desig.

Eurytoma subg. *Dieurytoma* Erdos, 1957. Allat. Kozlem. 46: 61.

Type-species: *Eurytoma amygdali* Enderlein. Orig. desig.

Eurytoma subg. *Hydateurytoma* Erdos, 1957. Allat. Kozlem. 46: 58.

Type-species: *Eurytoma palustris* Erdos. Orig. desig.

Eurytoma subg. *Moneurytoma* Erdos, 1957. Allat. Kozlem. 46: 59.

Type-species: *Eurytoma aquatica* Erdos. Orig. desig.

Some species of *Eurytoma* are phytophagous, others pass part of their larval development as parasites and then complete their growth by feeding on plant tissues, but the bulk of the species are primary or secondary parasites. Many species are placed in *Eurytoma* not because they are greatly like the type-species, but because it has not as yet been possible to place them elsewhere.

Revision: Bugbee, 1967. U. S. Natl. Mus., Proc. 118: 433-552.

Taxonomy: Claridge, 1959. Ent. Monthly Mag. 95: 2 (identity of type-species). — Graham, 1970. Roy. Soc. London, Proc., Series B: Taxonomy 39: 145-152 (Palearctic species).

Eurytoma altifossa Bugbee, 1967. U. S. Natl. Mus., Proc. 118: 487. ♀, ♂.

apiculae Bugbee. Calif. Host: *Ceratina dallatorreana* Friese, *C. nanula* Ckll., *C. punctigena* Ckll., *Ectemnius spiniferus* (Fox).

Eurytoma apiculae Bugbee, 1966. Pan-Pacific Ent. 42: 210. ♀, ♂.

Biology: Daly *et al.*, 1967. Ent. Soc. Amer., Ann. 60: 1279.

appendigaster (Swederus). Ont., N. B., Maine, s. to N. J., w. to N. Y., Pa.; Europe. Probably inadvertently introduced from Europe along with *Apanteles*. Host: *Apanteles melanoscelus* (Ratz.), *Cremastus minor* Cush.; *Compsilura concinuata* (Meig.). *Pteromalus Appendigaster* Swederus, 1795. Svenska Vetensk. Akad. Handl. 16: 217.

Taxonomy: Ferrière, 1950. Schweiz. Ent. Gesell., Mitt. 23: 383 (types). —Claridge, 1959. Ent. Monthly Mag. 95: 4. —Claridge, 1960. Ent. Medd. 29: 248 (*appendigaster* Mayr not Swederus = *verticillata* F.).

Biology: Muesebeck and Dohanian, 1927. U. S. Dept. Agr., Bul. 1487: 20-21. —Worawski, 1934. Wydaw. Szk. Glow. Gospod. Wieg. 1: 5 (secondary parasite of Gypsy moth). —Rosenberg, 1935. Bul. Ent. Res. 25: 244-246 (immature stages). —Allen *et al.*, 1940. U. S. Dept. Agr., Cir. 561: 50. —Haeussler, 1940. U. S. Dept. Agr., Tech. Bul. 728: 34-35, 52-54 (primary and secondary parasite). —Parker, 1951. U. S. Dept. Agr., Tech. Bul. 1036: 19 (immature stages). —Wilbert, 1960. Entomophaga 5: 203. —Allen, 1962. U. S. Dept. Agr., Tech. Bul. 1265: 106-108. —Zelinskaya, 1964. In: Kasianenko, Akad. Nauk Ukraine RSR Inst. Zool., Trudy 20: 199. —Stone, 1965. U. S. Dept. Agr., Tech. Bul. 1321: 24.

atripes Gahan. N. Y., Pa., N. J., Md., Ohio, Tenn., N. Dak., Alta., Wash., Oreg. Host: *Mayetiola destructor* (Say); *Cephus cinctus* Nort.

Eurytoma atripes Gahan, 1934 (1933). U. S. Dept. Agr., Misc. Pub. 174: 36. ♀, ♂.

Biology: Nelson, 1953. Canad. Ent. 85: 249-251.

Morphology: Hill and Pinckney, 1940. U. S. Dept. Agr., Tech. Bul. 715: 8, 11-13 (immature stages).

baccae Bugbee. Md., Kans. Host: *Ancylis comptana fragariae* (W. and R.). This species might also be a secondary parasite, attacking an ichneumonid primary parasite, *Temelucha cooki* (Weed).

Eurytoma baccae Bugbee, 1967. U. S. Natl. Mus., Proc. 118: 497. ♀.

bicolor Walsh. Conn. and Ont., s. to Va., w. to Nebr. Host: *Autistrophus minor* Gill., *A. lygodesmiaepisum* Walsh, *Aulacidea tumida* (Bass.); *Eurosta solidaginis* (Fitch).

Eurytoma bicolor Walsh, 1870. Amer. Ent. and Bot. 2: 298. ♀, ♂.

bigeloviae Ashmead. Colo., Utah, Calif. Host: *Aciurina bigeloviae* (Ckll.).

Eurytoma bigeloviae Ashmead, 1890. Colo. Biol. Assoc., Bul. 1: 25, 45. ♀.

Eurytoma chalcidiformis Girault, 1917. Descr. Hym. Chalcidoid. Variorum cum Observ. V, p. 3. ♀.

Taxonomy: Bugbee, 1956. Ent. Soc. Amer., Ann. 49: 504 (syn.).

bolteri Riley. Vt., s. to N. C., w. to N. Dak., Kans. Host: *Gnorimoschema gallaesolidaginis* (Riley).

Eurytoma Bolteri Riley, 1869. Mo. State Bd. Agr., Ann. Rpt. 4: 177. ♀, ♂.

Biology: Leiby, 1922. N. Y. Ent. Soc., Jour. 30: 93. —Barber, 1938. N. Y. Ent. Soc., Jour. 46: 173-175. —Miller, 1963. Ohio Jour. Sci. 63: 72.

Morphology: Snodgrass, 1910. U. S. Natl. Mus., Proc. 39: 65, fig. 46 (thorax).

brevivena Bugbee. Ariz. Host: *Disholcaspis rubens* (Gill.).

Eurytoma brevivena Bugbee, 1958. Ent. Soc. Amer., Ann. 51: 198. ♀, ♂.

bromi (Howard). N. Y., Ohio, Calif. Host: *Bromus ciliatus*.

Isosoma bromi Howard, 1896. U. S. Dept. Agr., Div. Ent., Tech. Ser. 2: 11. ♀, ♂.

Taxonomy: Bugbee, 1956. Ent. Soc. Amer., Ann. 49: 505.

calcarea calcarea Bugbee. Utah. Host: *Diplolepis variabilis* (Bass.).

Eurytoma calcarea calcarea Bugbee, 1951. Ent. Soc. Amer., Ann. 44: 242. ♀, ♂.

calcarea ignobilis Bugbee. Nebr. Host: *Diplolepis bicolor* (Harr.).

Eurytoma calcarea ignobilis Bugbee, 1951. Ent. Soc. Amer., Ann. 44: 243. ♀, ♂.

calcarea infima Bugbee. Ill. Host: *Diplolepis bicolor* (Harr.).

Eurytoma calcarea infima Bugbee, 1951. Ent. Soc. Amer., Ann. 44: 246. ♀, ♂.

calcarea lucida Bugbee. Ill. Host: *Diplolepis bicolor* (Harr.).

Eurytoma calcarea lucida Bugbee, 1951. Ent. Soc. Amer., Ann. 44: 245. ♀, ♂.

- calcarea mimica** Bugbee. Maine, Mass. Host: *Diplolepis bicolor* (Harr.).
Eurytoma calcarea mimica Bugbee, 1951. Ent. Soc. Amer., Ann. 44: 247. ♀, ♂.
- calcarea singularis** Bugbee. Mass. Host: *Diplolepis nebulosa* (Bass.).
Eurytoma calcarea singularis Bugbee, 1951. Ent. Soc. Amer., Ann. 44: 248. ♀, ♂.
- californica californica** Ashmead. Wash., Oreg., Calif. Host: *Andricus quercusalifornicus* (Bass.), *Callirhytis quercuspomiformis* (Bass.), *Disholcaspis corallina* (Bass.), *D. plumabella* Kinsey, *D. washingtonensis* (Gill.).
Eurytoma californica Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 195. ♀, ♂.
- californica nana** Bugbee. Calif. Host: *Callirhytis quercuspomiformis* (Bass.). Sexual generation, leaf galls.
Eurytoma californica nana Bugbee, 1969. Pan-Pacific Ent. 45: 63. ♀, ♂.
- calycis** Bugbee. Ont. Ecology: Develop in young pine shoots, infested shoots showing distortion and retarded growth. Host: *Pinus banksiana*.
Eurytoma calycis Bugbee, 1961. Canad. Ent. 93: 33. ♀, ♂.
- Biology: Thomas and Herdy, 1961. Canad. Ent. 93: 34-39.
- ceanothi** Bugbee. Ariz. Host: *Ceanothus greggii* seeds.
Eurytoma ceanothi Bugbee, 1971. Kans. Ent. Soc., Jour. 44: 111. ♀, ♂.
- celtigalla** Bugbee. Tex. Ecology: Emerges from leaf or twig galls on *Celtis*. Host: *Mayetiola celtiphyllia* Felt.
Eurytoma celtigalla Bugbee, 1957. Kans. Ent. Soc., Jour. 30: 49. ♀, ♂.
- cleric** Ashmead. Que. and N. Y., s. to N. C., w. to Mont., N. Mex., Calif. Host: *Dendroctonus frontalis* Zimm., *D. monticolar* Hopk., *Ips confusus* (Lec.), *I. oregoni* (Eich.), *Pissodes strobi* (Peck). When originally described thought, incorrectly, to parasitize a clerid beetle.
Eurytoma cleric Ashmead, 1894. Amer. Ent. Soc., Trans. 21: 323. ♀.
- Taxonomy: Bugbee, 1970. Ent. Soc. Amer., Ann. 63: 435.
- conica** Provancher. Que., Ont., s. to N. C., w. to B. C., Oreg., Calif. Host: *Cylindrocopturus longulus* (Lec.), *Dendroctonus brevicornis* Lec., *D. frontalis* Zimm., *Phloeosinus dentatus* Lec., *Pissodes strobi* (Peck).
Eurytoma conica Provancher, 1887. Addit. Corr. Faune Ent. Canada Hym., pp. 192, 438. ♀.
Eurytoma phloeosini Ashmead, 1894. Amer. Ent. Soc., Trans. 21: 327. ♂.
Isosoma abnorme Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 219. ♀.
- Taxonomy: Bugbee, 1956. Ent. Soc. Amer., Ann. 49: 504 (syn.). —Burks, 1964 (1963). Canad. Ent. 95: 1259 (Provancher type).
- contractura** Bugbee. Ont. Host: *Melanagromyza schineri* (Giraud).
Eurytoma contractura Bugbee, 1967. U. S. Natl. Mus., Proc. 118: 471. ♀, ♂.
- crassa** Bugbee. Ohio, Ind., Ill., La., Tex., N. Mex. Host: *Aciurina notata* (Coq.), *Callachna gibba* (Loew).
Eurytoma crassa Bugbee, 1967. U. S. Natl. Mus., Proc. 118: 488. ♀, ♂.
- diastrophi** Walsh. Que., s. to N. C., w. to Colo., N. Mex. Ecology: Should occur wherever blackberry grows. Host: *Diastrophus cuscutaeformis* O. S., *D. nebulosus* (O. S.), *D. niger* Bass.
Eurytoma diastrophi Walsh, 1870. Amer. Ent. and Bot. 2: 299. ♀, ♂.
- discordans** Bugbee. Que., Ont., Maine, Mass., Va., Mich., Ind., Wis., Alta. Host: *Diplolepis variabilis* (Bass.), *Periclistus pirata* (O. S.), *Synophromorpha sylvestris* (O. S.).
Eurytoma discordans Bugbee, 1951. Ent. Soc. Amer., Ann. 44: 218, 220. ♀, ♂.
- dorcaschemae** Ashmead. N. J., N. C., Kans., Sask. Host: *Dorcaschema alternatum* (Say).
Eurytoma dorcaschemae Ashmead, 1888. Kans. Agr. Expt. Sta., Bul. 3: App. p. II.
- extremitatis** Bugbee. Va. Host: *Rhyacionia frustrana* (Comst.).
Eurytoma extremitatis Bugbee, 1968. Kans. Ent. Soc., Jour. 41: 404. ♀, ♂.
- flavicerrena** Bugbee. Oreg. Host: *Diplolepis polita* (Ashm.).
Eurytoma flavicerrena Bugbee, 1951. Ent. Soc. Amer., Ann. 44: 258. ♀.

- flavierus* Bugbee. S. C. Ecology: Reared from undetermined gall on *Nyssa sylvatica*.
Eurytoma flavierus Bugbee, 1967. U. S. Natl. Mus., Proc. 118: 469. ♀, ♂.
- flavifacies* Bugbee. Calif. Host: *Andricus chrysolepidicola* (Ashm.).
Eurytoma flavifacies Bugbee, 1969. Pan-Pacific Ent. 45: 62. ♀, ♂.
- flavovultus* Bugbee. Tex. Host: *Pachypsylia venusta* (O. S.).
Eurytoma flavovultus Bugbee, 1957. Kans. Ent. Soc., Jour. 30: 45. ♀, ♂.
- foligalla* Bugbee. Calif. Host: *Antron douglassii* (Ashm.), *A. quercusechinus* (O. S.), *Besbicus multipunctatus* (Beut.), *Callirhytis quercuspomiformis* (Bass.), *Disholcaspis eldoradensis* (Beut.).
Eurytoma foligalla Bugbee, 1969. Pan-Pacific Ent. 45: 60. ♀, ♂.
- fossae* Bugbee. Calif. Ecology: Bred from willow galls produced by species of *Euura*; may parasitize the gall-maker or inquilines and parasites.
Eurytoma fossae Bugbee, 1967. U. S. Natl. Mus., Proc. 118: 484. ♀, ♂.
- furva* Bugbee. Calif. Host: *Disholcaspis washingtonensis* (Gill.).
Eurytoma furva Bugbee, 1958. Ent. Soc. Amer., Ann. 51: 198. ♀, ♂.
- fusca* Bugbee. N. Y., Kans., Wash. Ecology: Reared from apple curculio material;
Tachypterus quadrifibbus (Say) and other species of *Tachypterus* may be hosts.
Eurytoma fusca Bugbee, 1967. U. S. Natl. Mus., Proc. 118: 502. ♀, ♂.
- gigantea* Walsh. N. B., Que., Ont., s. to Fla., w. to N. W. T., Mont., Kans., Colo. Host: *Eurosta solidaginis* (Fitch).
Eurytoma gigantea Walsh, 1870. Amer. Ent. and Bot. 2: 300. ♀.
Callimome Duckeri Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 194. Nom. nud.
Ormyrus elongatus Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 194. Nom. nud.
Ormyrus prolongatus Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 194. Nom. nud.
- Taxonomy: Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 194-198 (male).
- Biology: Hughes, 1934. Ent. News 45: 119-122. —Uhler, 1951. Cornell Univ. Agr. Expt. Sta., Mem. 300: 41. —Judd, 1953. Canad. Ent. 85: 295. —Miller, 1959. Tenn. State Acad. Sci., Jour. 34: 249.
- gossypii* Bugbee. S. C., Ark., La., Okla., Tex., Ariz.; Mexico. Host: *Anthonomus grandis* Boh.
Eurytoma gossypii Bugbee, 1967. U. S. Natl. Mus., Proc. 118: 493. ♀, ♂.
- hecale* Walker. N. Y., s. to Fla., w. to Ill., Kans. Host: *Acraspis erinacei* (Beut.), *A. pezomachoides* (O. S.), *A. quercushirta* (Bass.), *Amphibolips cooki* Gill., *A. quercusspongifica* (O. S.), *Andricus ignotus* (Bass.), *A. pattoni* (Bass.), *A. quercusflocci* (Walsh), *A. quercusfoliatus* (Ashm.), *Callirhytis lanata* (Gill.), *C. seminator* (Harr.), *Disholcaspis quercusglobulus* (Fitch), *D. quercusmannum* (Walsh), *D. spongiosa* (Karsch), *Dryocosmus imbricariae* (Ashm.), *Sphaeroteras melleum* (Ashm.).
Eurytoma hecale Walker, 1843. Soc. Ent. de France, Ann. (2) 1: 151. ♀.
Eurytoma auriceps Walsh, 1870. Amer. Ent. and Bot. 2: 299. ♀, ♂.
Eurytoma auriceps var. *seminatrix* Walsh, 1870. Amer. Ent. and Bot. 2: 299. ♀, ♂.
Eurytoma vagabunda Ashmead, 1881. Canad. Ent. 13: 134. ♀.
- Taxonomy: Bugbee, 1956. Ent. Soc. Amer., Ann. 49: 503 (syn.). —Burks, 1975. Brit. Mus. (Nat. Hist.) Ent., Bul. 32 (4): 162 (syn.; lectotype designated).
- Biology: Triggerson, 1914. Ent. Soc. Amer., Ann. 7: 9-11 (*auriceps*).
- illinoiensis* Girault. N. S., Que., Ont., Wis., Ill., Iowa, S. Dak., N. Mex. Host: *Harmolita* sp.
Eurytoma illinoiensis Girault, 1920. U. S. Natl. Mus., Proc. 58: 206. ♀.
- imminuta* Bugbee. Utah, Nev., Oreg. Host: *Diplolepis variabilis* (Bass.).
Eurytoma immunita Bugbee, 1951. Ent. Soc. Amer., Ann. 44: 259. ♀, ♂.
- incerta incerta* Fullaway. Sask., Oreg., Calif. Ecology: Reared from *Diplolepis* galls modified by inquilines. Host: *Periclistus piceus* Fullaway, *P. californicus* Ashm.
Eurytoma incerta Fullaway, 1912. N. Y. Ent. Soc., Jour. 20: 277. ♀, ♂.
- Taxonomy: Bugbee, 1951. Ent. Soc. Amer., Ann. 44: 237 (reduced to subsp.).
- incerta varia* Bugbee. Calif. Ecology: Reared from gall of *Diplolepis tuberculatrix* var. *descansonis* K. and A.
Eurytoma incerta varia Bugbee, 1951. Ent. Soc. Amer., Ann. 44: 237. ♀.

iniqua Bugbee. Colo. Host: *Diplolepis neglecta* (Gill.).

Eurytoma iniqua Bugbee, 1951. Ent. Soc. Amer., Ann. 44: 253. ♀, ♂.

inornata Bugbee. Md. Host: *Euphilis (Corynopus) coarctata modesta* (Roh.), *E. (C.) rufigaster* (Pack.), *Trypoxylon* sp.

Eurytoma inornata Bugbee, 1962. Kans. Ent. Soc., Jour. 35: 347. ♀, ♂.

Biology: Krombein, 1964. Biol. Soc. Wash. Proc. 77: 103-104.

juniperina Marcovitch. N. H., Conn., Ont., N. Y., Del., Minn., N. Dak. Ecology: Phytophagous form, developing in seeds of juniper. Host: *Juniperus virginiana*, *J. scopulorum*.

Eurytoma juniperinus Marcovitch, 1915. Ent. Soc. Amer., Ann. 8: 166. ♀, ♂.

Eurytoma juniperinus var. *Crosbyi* Marcovitch, 1915. Ent. Soc. Amer., Ann. 8: 168 ♀. N. syn.

lacunae Bugbee. Md. Ecology: Reared from a cecidomyiid gall on *Baccharis halimifolia*.

Eurytoma lacunae Bugbee, 1967. U. S. Natl. Mus., Proc. 118: 476. ♀, ♂.

levivultus Bugbee. Ohio. Host: *Pachypsylla celtidisgemma* Riley.

Eurytoma levivultus Bugbee, 1957. Kans. Ent. Soc., Jour. 30: 48. ♀, ♂.

levo Bugbee. Va. Ecology: Reared from pine gall made by a xyelid. Host: *Xyela gallicaulis* Smith.

Eurytoma levo Bugbee, 1967. U. S. Natl. Mus., Proc. 118: 499. ♀, ♂.

longavena Bugbee. B. C. Host: *Diplolepis bicolor* (Harr.).

Eurytoma longavena Bugbee, 1951. Ent. Soc. Amer., Ann. 44: 249. ♀, ♂.

lutea Bugbee. Mich. Ecology: Reared from a composite naturalized from Europe, *Inula helenium*.

Eurytoma lutea Bugbee, 1967. U. S. Natl. Mus., Proc. 118: 462. ♀, ♂.

lycti Ashmead. N. J., Md., Va., W. Va., Kans. Host: *Lyctus striatus* Melsh.

Eurytoma lycti Ashmead, 1894. Amer. Ent. Soc., Trans. 21: 325. ♀.

Taxonomy: Bugbee, 1951. Kans. Ent. Soc., Jour. 24: 38 (generic placement).

magdalidis Ashmead. Que., Ont., N. Y. Va., N. C., W. Va., Kans., Colo., Calif. Host: *Anthribus cornutus* Say, *Cylindrocopturus longulus* (Lec.), *Magdalalis arnicollis* (Say), *Oncideres cingulata* (Say).

Eurytoma magdalidis Ashmead, 1894. Amer. Ent. Soc., Trans. 21: 326. ♀.

mali Bugbee. N. Y., Wis., Kans., Wash. Host: *Tachypterellus consors cerasi* List, *T. quadrigibbus magnus* List., *T. q. quadrigibbus* (Say).

Eurytoma mali Bugbee, 1967. U. S. Natl. Mus., Proc. 118: 512. ♀, ♂.

mammæ Bugbee. Va., W. Va., Ind. Ecology: Rearings suggest that host may be the scolytid beetle, *Leperistinus aculeatus* (Say) or the pemphredonine wasp, *Stigmus* sp.

Eurytoma mammæ Bugbee, 1967. U. S. Natl. Mus., Proc. 118: 451. ♀.

minnesota Girault. Minn. Ecology: Reared from quackgrass, *Agropyron repens*.

Eurytoma minnesota Girault, 1916. Canad. Ent. 48: 338. ♀, ♂.

neomexicana Girault. Kans., Sask., Colo., N. Mex., Nev. Ecology: Reared from grasses and from the seeds of *Aplopappus spinulosus*.

Eurytoma neomexicana Girault, 1920. U. S. Natl. Mus., Proc. 58: 205. ♀, ♂.

Biology: Brandhorst, 1943. Kans. Acad. Sci., Trans. 46: 169 (phytophagous).

nigricoxa Provancher. Ont., Man., B. C. Host: *Periclistus* sp.

Eurytoma nigricoxa Provancher, 1887. Addit. Corr. Faune Ent. Canada Hym. p. 192. ♀.

Taxonomy: Burks, 1964 (1963). Canad. Ent. 95: 1259.

obtusa Bugbee. N. J. Possibly introduced from Europe along with its host in 1930. Host:

Bruchus brachialis Fahr.

Eurytoma obtusa Bugbee, 1967. U. S. Natl. Mus., Proc. 118: 507. ♀, ♂.

obtusilobae Ashmead. Mass., s. to Fla., w. to Man., Tex. and Oreg. Host: *Diplolepis radicum* (O. S.).

Eurytoma obtusilobae Ashmead, 1885. Amer. Ent. Soc., Trans. 12: Proc. p. xii. ♀, ♂.

- obtusiventris** Gahan. Mass., Ont., N. Y., Va., Ohio, Ind., Mich., Miss., La., Kans., Okla., Colo., N. Mex.; Mexico. Ecology: This species seems ordinarily to be parthenogenetic. Host: *Eurosta solidaginis* (Fitch), *Neotephritis finalis* (Loew).
- Eurytoma obtusiventris* Gahan, 1934. Ent. News 45: 117. ♀.
- Biology: Hughes, 1934. Ent. News 45: 119-122. —Uhler, 1951. Cornell Univ. Agr. Expt. Sta., Mem. 300: 40. —Miller, 1959. Tenn. Acad. Sci., Jour. 34: 249.
- orchidearum** (Westwood). Que., Ont., Mass., N. Y., N. J., D. C., Fla., Ill., La., Tex., Calif.; Cosmopolitan in Tropical and Subtropical regions. Ecology: North American records from area north of Southern Florida and Southern California are from greenhouses and conservatories. Host: *Cattleya* spp. Also other orchids having pseudobulbs.
- Isosoma Orchidearum* Westwood, 1869. Gard. Chron. p. 1230. ♀, ♂.
- Eurytoma phoenix* Girault, 1917. Deser. Hym. Chalcidoid. Variorum cum Observ. V, p. 11. ♀.
- Taxonomy: Gahan, 1922. Ent. Soc. Wash., Proc. 24: 41 (generic placement). —Bugbee, 1956. Ent. Soc. Amer., Ann. 49: 504 (syn.).
- Biology: Felt, 1916. N. Y. State Mus., Bul. 180: 336. —Moore, 1916. N. J. Agr. Expt. Sta., Bul. 308: 3-12. —Timberlake, 1924. Hawaii. Ent. Soc., Proc. 5: 420. —Aczel, 1936. Roy. Hungarian Hort. Col., Bul. 2: 41-43. —Brandao, 1942. Sítios e Fazendas 7: 73. —Figueiredo, 1942. Biológico 8: 136-138. —Gomes, 1942. Rev. Agron., Porte Alegre 6: 568-569. —Swezey, 1945. Hawaii. Ent. Soc., Proc. 12: 359-360. —Brandao, 1945. Brasil Min. da Agr., Bol. 34: 67-68. —Lepage and Figueiredo, 1947. Círculo Paulista de Orquidófilos, Bol., p. 12. —Bess, 1953. Hawaii. Farm Sci. 1: 3-6 (immature stages). —Look, 1954. Hawaii. Ent. Soc., Proc. 15: 264, 271.
- pachyneuron** Girault. P. E. I., Que., s. to N. C., w. to B. C., Wash., Oreg., Calif. Ecology: This species begins its development as a parasite and completes its larval growth by feeding on plant tissues in grass stems. Host: *Harmolita* spp., *Mayetiola destructor* (Say); *Elymus* spp., *Triticum* spp.
- Eurytoma pachyneuron* Girault, 1916. Canad. Ent. 48: 337. ♀.
- Eurytoma phoebus* Girault, 1920. U. S. Natl. Mus., Proc. 58: 204. ♀.
- Eurytoma pater* Girault, 1920. U. S. Natl. Mus., Proc. 58: 207. ♀.
- Taxonomy: Bugbee, 1956. Ent. Soc. Amer., Ann. 49: 503 (syn.).
- Biology: Phillips, 1917. Jour. Econ. Ent. 10: 145 (*pater*). —Gahan, 1922. Ent. Soc. Wash., Proc. 24: 37 (*pater*). —Gahan, 1934 (1933). U. S. Dept. Agr., Misc. Pub. 174: 33-36 (*phoebus*). —Jones, 1932. Jour. Econ. Ent. 25: 412 (*pachyneuron*). —Hill and Pinckney, 1940. U. S. Dept. Agr., Tech. Bul. 715: 8 (*phoebus*, immature stages). —Chamberlin, 1941. U. S. Dept. Agr., Tech. Bul. 784: 40 (*phoebus*, larva). —Brandhorst, 1943. Kans. Acad. Sci., Trans. 46: 174 (*pater*). —Cannon, 1963. Canad. Ent. 95: 34 (*phoebus*).
- parva** Phillips. N. Y., D. C., Va., Pa., Ohio, Ind., Kans., Sask., Alta. Host: *Cephus cinctus* Nort., *Harmolita tritici* (Fitch).
- Eurytoma bolteri* var. *parva* Phillips, 1918. U. S. Dept. Agr., Farmers' Bul. 1006: 11, 14. ♀.
- Taxonomy: Phillips, 1927. Jour. Agr. Res. 34: 743 (change from var. to sp.).
- Biology: Phillips, 1918. U. S. Dept. Agr., Farmers' Bul. 1006: 11 (life hist.). —Phillips, 1927. Jour. Agr. Res. 34: 743-758 (host relationships). —Phillips and Poos, 1940. U. S. Dept. Agr., Farmers' Bul. 1006 (rev.): 10-11 (life hist.). —Chamberlin, 1941. U. S. Dept. Agr., Tech. Bul. 784: 32-35 (parasites).
- phloeotribi** Ashmead. Que., N. Y., N. J., D. C., Va., W. Va., N. C., Idaho, Oreg., Calif. Host: *Phlocoinus sequiae* Hopk., *Phloeotribus dentifrons* (Blackm.), *P. frontalis* (Oliv.), *Pityophthorus liquidambarus* Blackm., *Pseudopityophthorus minutissimus* (Zimm.), *P. pruinulos* (Eich.), *Scolytus abietis* Blackm., *S. muticus* Say, *Stephanoderes dissimilis* (Zimm.).
- Eurytoma phloeotribi* Ashmead, 1894. Amer. Ent. Soc., Trans. 21: 326. ♀.
- Taxonomy: Bugbee, 1970. Ent. Soc. Amer., Ann. 63: 437.
- Biology: Beal and Massey, 1945. Duke Univ. School Forestry, Bul. 10: 71, 111, 122.

picea Bugbee. B. C., Wash. Host: *Pissodes sitchensis* Hopk.

Eurytoma picea Bugbee, 1967. U. S. Natl. Mus., Proc. 118: 510. ♀, ♂.

pini Bugbee. Que., s. to S. C., w. to Mo., Ark., Man., Nebr. Host: *Dioryctria zimmermani* (Grote), *Eucosma gloriola* Hein., *Rhyacionia buoliana* (Schiff.), *R. frustrana* (Comst.), *R. rigidana* (Fern.).

Eurytoma pini Bugbee, 1958. Kans. Ent. Soc., Jour. 31: 197. ♀, ♂.

Biology: Watson and Arthur, 1959. Canad. Ent. 91: 481 (prob. secondary). —Miller, 1959. Jour. Econ. Ent. 52: 768. —Rennels, 1960. Ill. Univ. Agr. Expt. Sta., Bul. 660: 17. —Arthur, 1961. Canad. Ent. 93: 1-13 (immature stages; cleptoparasitic). —Harman and Kulman, 1962. Jour. Econ. Ent. 55: 1007. —Eikenbary and Fox, 1965. S. C. Agr. Expt. Sta., Tech. Bul. 1017: 6. —Kulman, 1965. Jour. Econ. Ent. 58: 864 (hyperparasitic). —Finlayson, 1967. Canad. Ent. 99: 1265 (immature stages).

pissodis Girault. N. S. Maine, s. to Va., w. to Wash., Oreg., Calif. Host: *Pissodes engelmanni* Hopk., *P. strobi* (Peck), *P. terminalis* Hopk.

Eurytoma pissodis Girault, 1917. Brooklyn Ent. Soc., Bul. 12: 88. ♀, ♂.

Biology: Graham, 1918. Ent. Soc. Amer., Ann. 11: 175-180. —Graham, 1926. Cornell Univ. Agr. Expt. Sta., Bul. 449: 26-29. —Taylor, 1929. Ent. Amer. (n. s.) 9: 228, 10: 60. —Stark and Wood, 1964. Canad. Ent. 96: 1217. —Stevenson, 1967. Canad. Ent. 99: 15-18 (immature stages).

profunda Bugbee. Fla., Tex. Ecology: Has been reared from stems of ragweed and a *Solanum*, as well as from a cynipid gall, but its actual host is unknown; very unlikely to be phytophagous.

Decatoma maculipes Ashmead, 1886. Amer. Ent. Soc., Trans. 13: 126. ♀. Preocc. in *Eurytoma* by Motschulsky, 1863.

Eurytoma profunda Bugbee, 1967. U. S. Natl. Mus., Proc. 118: 454. N. name.

prunicola Walsh. Ont., s. to S. C., w. to Ill., Kans., Tex. Host: *Amphibolips gainesi* Bass., *A. quercusjuglans* (O. S.), *Callirhytes quercusventricosa* (Bass.), *Disholcaspis quercusglobulus* (Fitch).

Eurytoma prunicola Walsh, 1870. Amer. Ent. and Bot. 2: 298. ♀, ♂.

Eurytoma prunicola var. *globulicola* Walsh, 1870. Amer. Ent. and Bot. 2: 299. ♀.

Taxonomy: Bugbee, 1967. U. S. Natl. Mus., Proc. 118: 473 (syn.).

querci Fullaway. Calif. Host: *Audrius lasius* (Ashm.), *Paracraspis guadaloupensis* (Full.).
Eurytoma querci Fullaway, 1912. N. Y. Ent. Soc., Jour. 20: 278. ♀, ♂.

querciglobuli *querciglobuli* (Fitch). N. H. and Ont., s. to Ga., w. to Minn., Tex. Host:
Disholcaspis quercusglobulus (Fitch), *D. quercusmamma* (Walsh).

Macroglenes Querci-globuli Fitch, 1859. N. Y. State Agr. Soc., Trans. 18: 812.
Eurytoma punctiventris Walsh, 1870. Amer. Ent. and Bot. 2: 299. ♀.

Taxonomy: Bugbee, 1958. Ent. Soc. Amer., Ann. 51: 193-196.

Biology: Judd, 1957. Ent. News 68: 195.

querciglobuli *rubra* Bugbee. Fla., Miss. Host: *Disholcaspis quercusvirens* (Ashm.), *D. spongiosa* (Karsch).

Eurytoma querciglobuli rubra Bugbee, 1958. Ent. Soc. Amer., Ann. 51: 196. ♀.

querciglobuli *utahensis* Bugbee. Utah. Host: *Disholcaspis colorado* (Gill.).

Eurytoma querciglobuli utahensis Bugbee, 1958. Ent. Soc. Amer., Ann. 51: 197. ♀.

rhois Crosby. Ont., Conn., N. Y., Pa., D. C., N. C., Fla., Ohio, Mich., Ind., Tenn., Mo., Ark., La., Kans. Ecology: Phytophagous in seeds of sumac. Host: *Rhus copallina*, *R. glabra*, *R. typhina*.

Eurytoma rhois Crosby, 1909. Canad. Ent. 41: 52. ♀, ♂.

Biology: Crosby, 1909. Cornell Univ. Agr. Expt. Sta., Bul. 265: 385-388. —Gahan, 1922. Ent. Soc. Wash., Proc. 24: 42. —Bridwell, 1923. Wash. Acad. Sci., Jour. 13: 262. —Bugbee, 1939. Ent. Soc. Amer., Ann. 32: 418-427. —Bugbee, 1941. Kans. Acad. Sci., Trans. 44: 228-233. —Schread et al., 1942. Conn. Agr. Expt. Sta., Bul. 492: 496. —Neunzig, 1964. Ent. Soc. Wash., Proc. 66: 87. —Wadhi et al., 1967 (1966). Indian Jour. Ent. 28: 498 (introd. into India from Canada).

- rubribacca** Bugbee. Idaho. Ecology: Reared from gall on wild raspberry, *Rubus* sp.
Eurytoma rubribacca Bugbee, 1968. Kans. Ent. Soc., Jour. 41: 406. ♀, ♂.
- rubrigalla** Bugbee. Mich. Ecology: Parasitizes inquilines and parasites of a cynipid gall maker, *Diastrophus nebulosus* (O. S.), on bramble, *Rubus* sp. Host: *Ormyrus* sp., *Synophromorpha sylvestris* (O. S.).
Eurytoma rubrigalla Bugbee, 1968. Kans. Ent. Soc., Jour. 41: 405. ♀, ♂.
- salicigalla** Bugbee. Nev., Calif. Host: *Euura exiguae* Smith, *E. lasiolepis* Smith.
Eurytoma salicigalla Bugbee, 1970. Ent. Soc., Amer., Ann. 63: 434. ♀, ♂.
- Biology: Smith, 1970. Ent. Soc. Amer., Ann. 63: 1781 (initially parasitic, completing development by feeding on plant tissue).
- salicis aquatica** Bugbee. Nev., Calif. Host: *Euura exiguae* Smith, *E. lasiolepis* Smith, *E. lemmoniae* Smith.
Eurytoma salicis aquatica Bugbee, 1970. Ent. Soc. Amer., Ann. 63: 433. ♀, ♂.
- Biology: Smith, 1970. Ent. Soc. Amer., Ann. 63: 1781 (initially parasitic, completing development by feeding on plant tissue).
- sciromatis** Bugbee. N. C., Ga., Fla., La. Ecology: Phytophagous in a fungus causing cankers on pine branches and trunks. Host: *Cronartium fusiforme*.
Eurytoma sciromatis Bugbee, 1962. Kans. Ent. Soc., Jour. 35: 346. ♀, ♂.
- Biology: Coulson and Franklin, 1970. Canad. Ent. 102: 353-357 (not parasitic on *Dioryctria*, but phytophagous).
- semicircula** Bugbee. Tex. Ecology: Reared from cerambycid larvae in fruits of *Sapindus drummondii*, the soapberry. Host: *Leptostylus vogti* Dillon.
Eurytoma semicircula Bugbee, 1967. U. S. Natl. Mus., Proc. 118: 453. ♀.
- seminis** Bugbee. Kans., Okla. Ecology: Phytophagous in sumac seeds. Host: *Rhus trilobata*.
Eurytoma seminis Bugbee, 1941. Kans. Ent. Soc., Jour. 14: 98. ♀, ♂.
- semivenae** Bugbee. N. Y., Ohio, Ark., Kans., Tex. Ecology: Reared from psyllid galls on hackberry. Host: *Pachypsylla celtidismamma* Riley, *P. celtidisvesicula* Riley.
Eurytoma semivenae Bugbee, 1957. Kans. Ent. Soc., Jour. 30: 47. ♀, ♂.
- Biology: Moser, 1965. N. Y. State Mus. and Sci. Serv., Bul. 402: 22 (feeds both on gall maker and gall cell wall).
- solenozopheriae** Ashmead. Que., Maine, Mass., Conn., N. Y., N. J., Pa., D. C. Ecology:
Parasitizes a chalcid gall maker on blueberry. Host: *Hemadas nubilipennis* (Ashm.).
Eurytoma solenozopheriae Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 196. ♀, ♂.
- Biology: Driggers, 1927. N. Y. Ent. Soc., Jour. 35: 254-258 (parasite of chalcid gall maker, not of cynipid gall maker). —McAlister and Anderson, 1932. Jour. Econ. Ent. 25: 1166.
- sphaera** Bugbee. La. Host: *Disholcaspis quercusglobulus* (Fitch), *D. spongiosa* (Karsch).
Eurytoma sphaera Bugbee, 1967. U. S. Natl. Mus., Proc. 118: 458. ♀, ♂.
- spina** Bugbee. Sask., Oreg. Host: *Diplolepis tuberculatrix* (Ckll.).
Eurytoma spina Bugbee, 1951. Ent. Soc. Amer., Ann. 44: 250. ♀, ♂.
- spongiosa curvavena** Bugbee. Minn. Host: *Diplolepis spinosa* (Ashm.).
Eurytoma spongiosa curvavena Bugbee, 1951. Ent. Soc. Amer., Ann. 44: 257. ♀, ♂.
- spongiosa spongiosa** Bugbee. Ont. and Mass., s. to Va., w. to Sask., Utah. Ecology: Reared from spiny rose galls on wild roses. Host: *Diplolepis dichlocera* (Harris), *D. rosae* (L.), *D. tuberculatrix* (Ckll.).
Eurytoma spongiosa Bugbee, 1951. Ent. Soc. Amer., Ann. 44: 254. ♀, ♂.
- squamosa** Bugbee. Idaho, Wash., Calif. Ecology: Phytophagous in seeds of *Ceanothus*. Host: *Ceanothus cordulatus*, *C. divaricatus*, *C. integrifolius*, *C. sanguineus*, *C. thyrsiflorus*, *C. velutinus*.
Eurytoma squamosa Bugbee, 1967. U. S. Natl. Mus., Proc. 118: 495. ♀, ♂.
- stigmi** Ashmead. Nev., Oreg., Calif. Host: *Hoplitis producta gracilis* (Mich.), *Hylaeus (Paraprosopis) polifolii* (Ckll.), *Pemphredon giffardi* (Roh.), *Soliella similis* (Brid.), *Stigmus inordinatus* Fox, *Trypoxyylon scullenii* Sandh.
Eurytoma stigmi Ashmead, 1895. In Davidson, Psyche 7: 271. ♀, ♂.

Biology: Parker and Bohart, 1966. Pan.-Pacific Ent. 42: 94-96 (hosts).

studiosa Say. Que., s. to Fla., w. to B. C., Wash., Oreg., Calif. Ecology: Occurs wherever oaks grow. Host: *Acraspis erinacei* (Beut.), *A. gemula* (Bass.), *A. macrocarpae* Bass., *A. pezomachoides* (O. S.), *A. quercushirta* (Bass.), *A. villosa* Gill., *Andricus ignotus* (Bass.), *A. quercusflocciflora* (Walsh), *A. quercusperticulata* (Bass.), *Callirhytis clavula* (O. S.), *C. elongata* (Kinsey), *C. seminator* (Harr.), *Disholcaspis quercusglobulus* (Fitch), *D. quercussuccinipes* (Ashm.), *D. spongiosa* (Karsch), *D. washingtonensis* (Gill.).

vernonia Bugbee. Pa., Miss., Kans., Okla. Ecology: Parasite of trypetid maggots in seeds of Ironweed, Vernonia, and Sunflower, *Helianthus*. Host: *Neaspilota alba* (Loew), *Neotephritis finalis* (Loew), *Tomoplagia obliqua* (Say).

Eurytoma vernonia Bugbee, 1967. U. S. Natl. Mus., Proc. 118: 481. ♀, ♂.

Biology: Schwitzgebel and Wilbur, 1943. Kans. Ent. Soc., Jour. 16: 7-11 (*Eurytoma* sp.).

UNPLACED SPECIES OF EURYTOMA ILLIGER

Eurytoma abuormicicornis Walsh, 1870. Amer. Ent. and Bot. 2: 299. ♀. Type lost.

Eurytoma albifarsis Ashmead, 1902. In Chittenden, U. S. Dept. Agr., Div. Ent. Bul. 38: 88.

Nom. nud.

Eurytoma aulacis Ashmead, 1892. In Brodie, Canad. Ent. 24: 12. Nom. nud.

Eurytoma cretheis Walker, 1843. Soc. Ent. de France, Ann. 2: 150. ♀. Type fragmentary.

Taxonomy: Burks, 1975. Brit. Mus. (Nat. Hist.) Ent., Bul. 32 (4): 162.

Lamprostylus floridanus Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 193. ♂. Species placed in

Eurytoma by Peck, 1951. In Muesebeck et al., U. S. Dept. Agr., Agr. Monog. 2: 576.

Species cannot be placed from unassociated male.

Eurytoma hegeli Girault, 1921. U. S. Natl. Mus., Proc. 58: 207. *Eurytoma hegeli* var. *maga*

Girault described, but *Eurytoma hegeli* Girault not described.

Isosoma nevadensis Ashmead, 1894. Amer. Ent. Soc., Trans. 21: 330. ♂. Species placed in

Eurytoma by Peck, 1951. In Muesebeck et al., U. S. Dept. Agr., Agr. Monog. 2: 577.

Species cannot be placed from unassociated male.

Eurytoma orbiculata Say, 1836. Boston Jour. Nat. Hist. 1: 272. ♂. Type lost.

Macroglenes quercipisi Fitch, 1859. N. Y. State Agr. Soc., Trans. 18: 818. Species placed in

Eurytoma by Ashmead, 1900. In Smith, N. J. State Bd. Agr., Ann. Rpt. 27, Sup., p. 554.

Fragmentary specimen in U. S. N. M. labeled type does not agree with orig. descr.

Family CHALCIDIDAE

By B. D. BURKS

In 1923 Gahan and Fagan (U. S. Natl. Mus., Bul. 124: 24, 31, 133) changed the application of the well-known names *Chalcis*, *Brachymeria*, *Sinicra* and *Smiera*. These names had been used extensively in the literature for almost a century. The changes very well may have been erroneous, because of the fact that Gahan and Fagan had examined none of the types of the type-species involved. Their conclusions were based entirely on a study of the literature, principally volume 5 of Dalla Torre's Catalogus Hymenopterorum, published in 1898. That work was a bibliographic, not a taxonomic, one. However, these changes in the application of familiar names were accepted by all subsequent workers except for Schmitz, who published a large work on the Ethiopian Chalcididae in 1946. All other works in the world literature followed Gahan and Fagan. An enormous literature that used these names as redefined by Gahan and Fagan has been published in the last 50 years. It would be a mistake at this late date to try to reverse the changes made by Gahan and Fagan, irrespective of their soundness. It should be kept in mind, however, that the application of those names before and after 1923 is quite different.

Taxonomy: Schmitz, 1946. Exploration Parc Natl. Albert, Mission De Witte, fasc. 48: 3-191 (African fauna). — Boucek, 1951. Mus. Natl. Pragae, Acta Ent. 27 (Sup.): 1-108 (European fauna).

— Erdos, 1955. Magyar. Allat. 12 (Hymenoptera 2, pt. 2): 7-11 (key to genera).

— Boucek, 1956. Res. Council Israel, Bul. 5B: 228-250 (Near East fauna). — Nikolskaja,

1960. Fauna SSSR (n. s.) 76: 41-191 (Russian fauna). — Habu, 1962. Fauna Japonica,

Chalcididae, Leucospidae, and Podagrionidae, pp. 2-164 (Japanese fauna).

Biology: Steffan, 1958. Tenth Internat'l. Cong. Ent., Proc. 1: 799-804 (world distrib.).

Morphology: Steffan, 1957. Paris Mus. Natl. d'Hist. Nat., Bul. (2) 19: 315-322 (abdominal petiole).

SUBFAMILY HALTICHELLINAE

The questions that have remained pending for many years concerning the application of the generic names *Haltichella* and *Hockeria* should be referred to the International Commission on Zoological Nomenclature for settlement. Usage of those names here follows the preponderant application of those names in current literature.

Revision: Steffan, 1951-1953. Feuille des Nat. (n. s.) 6: 1-7, 81-85; 8: 7-12, 33-36 (French fauna). — Steffan, 1951. Paris Mus. d'Hist. Nat., Mem. (n. s., A) 4: 51-86 (genera related to *Euchalcidia*). — Steffan, 1957. Soc. Ent. de France, Ann. 126: 139-158 (genera related to *Chiroceria*). — Habu, 1960. Natl. Inst. Agr. Sci. Japan, Bul. (C) 11: 218-296 (Japanese fauna).

Genus HALTICHELLA Spinola

Genus CHALCIS Fabricius

Chalcis Fabricius, 1789 (1787). Mantissa Insectorum, v. 1, p. 272.

Type-species: *Chalcis sisipes* Fabricius. Desig. by Latreille, 1810.

Smiera Spinola, 1811. Paris Mus. d'Hist. Nat., Ann. 17: 147.

Type-species: *Chalcis sisipes* Fabricius. Desig. by Ashmead, 1904.

Smicra Spinola, 1837. Mag. Zool., 7 Cl. IX, explan. pl. 180. Emend.

In the European literature, *Chalcis sisipes* Fabricius is uniformly treated as a synonym of *Chalcis myrifex* (Sulzer). The species of *Chalcis* are parasitic on Stratiomyidae throughout the Holarctic region. The stratiomyid eggs are laid in masses on plants or other objects above the water line in aquatic environments such as cattail bogs. The *Chalcis* adults, despite their relatively large size, oviposit in these eggs. When the stratiomyid eggs hatch the larvae migrate into the water. The *Chalcis* larvae remain inside them until the stratiomyids are fully grown. When the stratiomyids are ready to pupate they migrate to mud banks or other similar sites, above the water line. The *Chalcis* parasites then quickly complete their development and their adults emerge through round holes they cut in the exuviae of the stratiomyids.

Revision: Burks, 1940. U. S. Natl. Mus., Proc. 88: 243-260.

Taxonomy: Gahan and Fagan, 1923. U. S. Natl. Mus., Bul. 124: 31 (*Chalcis* must be used in the sense of *Smicra* and *Smiera*). —Schmitz, 1946. Exploration Parc Natl. Albert, Mission De Witte, fasc. 48: 70-72 (*Smiera* should be used for this genus).

barbara (Cresson). N. H., Conn., Mass., N. J., Fla., Mich., Ill., Iowa, Mo., Ark., N. Dak., Kans., Tex., Wyo., Colo.; Mexico. Host: *Odontomyia* sp., *O. cincta* Olivier, *Stratiomys norma* Wied.

Trismicra Ashmead, 1904. Carnegie Mus., Mem. 1: 252, 254, 456.

Type-species: *Smicra contracta* Walker. Monotypic.

Cameron in 1910 (Amer. Ent. Soc., Trans. 35: 422-425), under the heading *Spilochalcis* Thomson, made a mistake and spelled the generic name for two of his three new species *Spilosmicra*. All authors have accepted this as a *lapsus*. In 1944 Graham (Ent. Soc. Ont., Ann. Rpt. 74: 49) recorded the European species *Spilochalcis xanthostigma* (Dalman) from Ontario (name spelled *xanthostigmata* by error). In 1965 I was able to find and re-examine the specimen on which this record was based; it was *albifrons* (Walsh).

Revision: Burks, 1940. U. S. Natl. Mus., Proc. 88: 243, 263-343.

SPECIES GROUP TRANSITIVA

- delumbis** (Cresson). Que., Ont., s. to Fla., w. to Wash., Oreg., Calif. Host: *Chlamisus plicatus* (F.), *Hypera rumicis* (L.). *Lema nigrovittata* (Guer.), *L. trilineata* (Oliv.).
- Smicra delumbis* Cresson, 1872. Amer. Ent. Soc., Trans. 4: 40. ♀, ♂.
- Taxonomy:** Smith, 1943. Kans. State Bd. Agr., Rpt. 62: 392 (description).
- Biology:** Chamberlin, 1933. Ent. Soc. Wash., Proc. 35: 106-107. — Weaver and Dorsey, 1965. Ent. Soc. Amer., Ann. 58: 934. — Puttler, 1966. Jour. Econ. Ent. 59: 475.
- dema** Burks. Pa., Va., N. C., Ind., Mo., Kans., N. Mex., Ariz., Calif.; Mexico. Host: *Frumenta nundinella* (Zell.).
- Spilochalcis dema* Burks, 1940. U. S. Natl. Mus., Proc. 88: 330. ♀, ♂.
- flavopicta** (Cresson). N. Y., s. to Fla., w. to Ill., Kans., N. Mex., Ariz., Calif.; Mexico, West Indies. Host: *Acrobasis caryivorella* Rag., *Anacampsis fragariella* Busck, *A. innocuella* (Zell.), *Ancylis comptana* (Froel.), *A. comptana fragariae* (W. and R.), *Celama sorghiella* (Riley), *Cryptothela nigrita* (B. and McD.), *Eurukuttarus confederata* (Grote), *Homoeosoma electellum* (Hulst), *Phalonia* sp., *Pieris protodice* (B. and L.), *Rhyacionia frustrana* (Comst.), *Sparganothis sulfureana* (Clem.); *Diadegma insulare* (Cress.), *Meteorus laphygmae* Vier.
- Smicra flavopicta* Cresson, 1865. Ent. Soc. Phila., Proc. 4: 99.
- Smicra delira* Cresson, 1872. Amer. Ent. Soc., Trans. 4: 41. ♂.
- Smicra mendica* Cresson, 1872. Amer. Ent. Soc., Trans. 4: 41. ♂.
- Smicra decem-punctata* Ashmead, 1881. Amer. Ent. Soc., Trans. 9: Proc. p. xxix. ♀.
- Biology:** Reinhard, 1938. Tex. Agr. Expt. Sta., Bul. 559: 31-32. — Underhill, 1943. Va. Agr. Expt. Sta., Bul. 349: 12. — Needham, 1948. Ecol. Monog. 18: 446.
- leptis** Burks. S. C., Ill., Ark., N. Dak., Nebr., Kans., Mont., Colo., N. Mex., Utah, Ariz., Idaho, Nev., Wash., Oreg., Calif. Host: *Ancylis comptana* (Froel.), *Archips argyrospilus* (Walk.), *Cuephasia longana* (Haw.), *Rhyacionia frustrana* (Comst.), *Spilonota ocellana* (D. and S.), *Zelleria haimbachii* Busck.
- Spilochalcis leptis* Burks, 1940. U. S. Natl. Mus., Proc. 88: 340. ♀, ♂.
- Biology:** Eikenbary and Fox, 1965. S. C. Agr. Expt. Sta., Tech. Bul. 1017: 6.
- sanguiniventris** (Cresson). N. J., Va., N. C., Ga., Fla., Ark., Okla., Tex., Ariz., Calif. Host: *Exema conspersa* (Mann.), *Nuzonia pallidula* (Boh.); *Plutella maculipennis* (Curtis); *Meteorus* sp.
- Smicra sanguiniventris* Cresson, 1872. Amer. Ent. Soc., Trans. 4: 36, 43. ♀.

Smicra sanguineiventris Dalla Torre, 1898. Cat. Hym., v. 5, p. 381. Emend.

Biology: Rolston *et al.*, 1965. Kans. Ent. Soc., Jour. 38: 366 (pupal parasite).
 side (Walker). Maine, s. to Fla., w. to Wash., Oreg., Calif., Mexico, West Indies. Ecology: May be either a primary or secondary parasite. Host: *Ceutorhynchus assimilis* (Payk.), *Hypera nigrirostris* (F.), *H. rumicis* (L.), *Rhynchaenus pallicornis* (Say); *Anagasta kuehniella* (Zell.), *Anarsia lineatella* Zell., *Ancylis comptana* (Freol.), *A. comptana fragariae* (W. and R.), *A. divisana* (Walk.), *Argyresthia thuiella* Pack., *Argyrotinia velutinana* (Walk.), *Bucculatrix thurberiella* Busck, *Choreutis silphiella* Grote, *Choristoneura rosaceana* (Har.), *Coleophora fletcherella* Fern., *C. fuscedinella* Zell., *C. laricella* (Hbn.), *C. malivorella* Riley, *C. pruniella* Clem., *Depressaria heracliana* (L.), *Epinotia nanana* (Treit.), *Exoteleia pinifoliella* (Chamb.), *Galleria mellonella* (L.), *Grapholita molesta* (Busck), *Hulstia undulatella* (Clem.), *Spodoptera frugiperda* (A. and S.), *Plutella maculipennis* (Curtis), *Recurvaria piceaella* Kearf.; *Apanteles congregatus* (Say), *A. medicaginis* Mues., *A. melanoscelus* (Ratz.), *A. militaris* (Walsh), *Campoletis argentifrons* (Cress.), *Diadegma insulare* (Cress.), *Meteorus laphygnae* Vier., *M. versicolor* (Wesm.). This sp. is often reared in the laboratory; progeny in laboratory cultures may be much larger and differently proportioned than were their parents from the wild.

Smicra side Walker, 1843. Soc. Ent. de France, Ann. (2) 1: 145. ♀.

Smicra torvina Cresson, 1872. Amer. Ent. Soc., Trans. 4: 40. ♀.

Taxonomy: Burks, 1975. Brit. Mus. (Nat. Hist.) Ent., Bul. 32 (4): 165.

Biology: Vickery, 1929. U. S. Dept. Agr., Tech. Bul. 138: 21, 32-33, 52-53, 58 (*torvina*).—Doner, 1936. Ent. Soc. Amer., Ann. 29: 234 (*torvina*).—Arthur, 1958. Canad. Boyce Thomson Inst., Contrib. 23: 169.

Genus CERATOSMICRA Ashmead

Ceratosmicra Ashmead, 1904. Carnegie Mus., Mem. 1: 251, 253, 369.

Type-species: *Ceratosmicra petiolata* Ashmead. Monotypic.

Mischosmicra Ashmead, 1904. Carnegie Mus., Mem. 1: 251, 253, 381.

Type-species: *Mischosmicra kahlii* Ashmead. Monotypic.

Melanosmicra Ashmead, 1904. Carnegie Mus., Mem. 1: 251, 253, 380, 447.

Type-species: *Melanosmicra immaculata* Ashmead. Orig. desig.

Sayiella Ashmead, 1904. Carnegie Mus., Mem. 1: 251, 253, 388.

Type-species: *Smicra debilis* Say. Orig. desig.

Eusayia Ashmead, 1904. Ent. Soc. Wash., Proc. 6: 126. N. name, unnecessarily proposed for *Sayiella*, thought to be preooc. by *Sayiella* Dall, 1885.

Revision: Burks, 1940. U. S. Natl. Mus., Proc. 88: 343-351. —Burks, 1968. Ent. Soc. Wash., Proc. 70: 170-174.

campoplegicis Burks. Calif. Host: *Apanteles koebelei* Riley, Campoplegini (undet.).

Ceratosmicra campoplegicis Burks, 1968. Ent. Soc. Wash., Proc. 70: 172. ♀.

debilis (Say). R. I., s. to Fla., w. to Minn., Iowa, Kans., Tex., Ariz., Calif.; Mexico, West Indies, Cent. and S. Amer.

Chalcis debilis Say, 1836. Boston Jour. Nat. Hist. 1: 271.

Smicra longipetiola Ashmead, 1885. Amer. Ent. Soc., Trans. 12: Proc. p. x. ♂.

Mischosmicra Kahlii Ashmead, 1904. Carnegie Mus., Mem. 1: 251. ♀.

immaculata (Cresson). Tex.; Mexico, Cent. and S. Amer. Host: *Apanteles* sp., *Campoletis sonorensis* (Cam.), *Meteorus* sp.

Smicra immaculata Cresson, 1865. Ent. Soc. Phila., Proc. 4: 97.

meteori Burks. Mass., s. to N. C., w. to Ill., La., Tex. and Wash.; Mexico. Host: *Apanteles delicatus* How., *A. hyphantriae* Riley, *A. melanoscelus* (Ratz.), *Casinaria limenitidis* (How.), *Meteorus hyphantriae* Riley.

Ceratosmicra meteori Burks, 1940. U. S. Natl. Mus., Proc. 88: 346. ♀, ♂.

paya Burks. Ga., Ill., Mo., Kans., Tex., Calif.

Ceratosmica paya Burks, 1940. U. S. Natl. Mus., Proc. 88: 348. ♀, ♂.

provancheri Burks. Mass., Pa.

Ceratosmica provancheri Burks, 1968. Ent. Soc. Wash., Proc. 70: 171. ♀.

SUBFAMILY BRACHYMERIINAE

Taxonomy: Steffan, 1950. Soc. Ent. de France, Bul. 55: 146-150 (tribal classification).

—Steffan, 1950. Paris Mus. d'Hist. Nat., Bul. (2) 22: 596-602 (tribal classification).

—Steffan, 1956. Soc. Ent. de France, Bul. 61: 238-242 (generic list with synonymy).

—Steffan, 1959. Mus. Natl. Pragae, Acta Ent. 33: 288 (key to tribes). —Habu, 1960. Natl. Inst. Agr. Sci. Japan, Bul. (C) 11: 140-141 (key to tribes).

Genus ACANTHOCHALCIS Cameron

Genus ACANTHOCHALCIS Subgenus ACANTHOCHALCIS Cameron

Acanthochalcis Cameron, 1884. Biol. Cent.-Amer., Hym., v. 1, p. 100.

Type-species: *Acanthochalcis nigricans* Cameron. Monotypic.

Taxonomy: Girault, 1920. U. S. Natl. Mus., Proc. 58: 193-194. —Steffan, 1959. Mus. Natl. Pragae, Acta Ent. 33: 307.

nigricans Cameron. Kans., Okla., Tex., N. Mex., Ariz., Calif.; Mexico.

Acanthochalcis nigricans Cameron, 1884. Biol. Cent.-Amer., Hym., v. 1, p. 100. ♀.

Genus ACANTHOCHALCIS Subgenus BELOCHALCIS Steffan

Acanthochalcis subg. *Belochalcis* Steffan, 1959. Mus. Natl. Pragae, Acta Ent. 33: 308.

Type-species: *Acanthochalcis unispinosa* Girault. Monotypic.

unispinosa Girault. Tex., Ariz., Calif. This species is probably the largest one in the Chalcidoidea.

Acanthochalcis unispinosa Girault, 1917. New Chalcid Flies, p. 5.

Genus PHASGONOPHORA Westwood

Phasgonophora Westwood, 1832. In Griffith, Cuvier's Animal Kingdom 15 (Insecta 2), p. 432, pl. 77, fig. 2.

Type-species: *Phasgonophora sulcata* Westwood. Monotypic.

Phasganophora Sichel, 1865. Soc. Ent. de France, Ann. (4) 5: 347. Emend.

sulcata Westwood. N. B., Maine, N. H., s. to Fla., w. to Oreg., Calif. Host: *Agrilus anxius* Gory, *A. bilineatus* (Weber), *Chrysobothris femorata* (Olivier).

Phasgonophora sulcata Westwood, 1832. In Griffith, Cuvier's Animal Kingdom 15 (Insecta 2), p. 432. ♀.

Smicra gigantea Ashmead, 1881. Canad. Ent. 13: 90. ♀.

Taxonomy: Burks, 1940. U. S. Natl. Mus., Proc. 88: 351 (*gigantea* Ashm.).

Biology: Blackman and Stage, 1924. N. Y. State Col. Forestry, Syracuse Univ., Tech. Pub. 17: 19, 22, 25. —Rhodes, 1924. In Blackman and Stage, N. Y. State Col. Forestry, Syracuse Univ., Tech. Pub. 17: 188. —Hoffman, 1940. Brooklyn Ent. Soc., Bul. 35: 63. —Nash *et al.*, 1951. Maine Forest Serv., Bul. 15: 40. —Barter, 1957. Canad. Ent. 89: 32.

Genus TRIGONURA Sichel

Phasganophora subg. *Trigonura* Sichel, 1865. Soc. Ent. de France, Ann. (4) 5: 347, 358, 376.

Type-species: *Phasganophora (Trigonura) crassicauda* Sichel. Monotypic.

Bactrochalcis Kieffer, 1912 (1911). Soc. Ent. de France, Ann. 80: 463.

Type-species: *Bactrochalcis reticulata* Kieffer. Monotypic.

Centrochalcis Cameron, 1913. Indian Forest Rec. 4: 92. Preocc. by Cameron, 1905.

Type-species: *Centrochalcis ruficaudis* Cameron. Monotypic.

Centrochalcidea Gahan and Fagan, 1923. U. S. Natl. Mus., Bul. 124: 28. N. name for
Centrochalcis Cameron.

Revision: Burks, 1959. Ent. Soc. Amer., Ann. 52: 75-81.

algeri Burks. Tex., N. Mex., Ariz., Calif. Host: *Chrysobothris octocola* Lee., *C. piuta* Wick.

Trigonura algeri Burks, 1959. Ent. Soc. Amer., Ann. 52: 77. ♀, ♂.

californica Rohwer. Utah, Ariz., Oreg., Calif. Host: *Chrysobothris femorata* (Olivier), *C. mali* Horn.

Trigonura californica Rohwer, 1917. U. S. Natl. Mus., Proc. 53: 171. ♀, ♂.

elegans (Provancher). Que., Conn., Ont., N. Y., Pa., W. Va., Ill., Ark. Host: *Chrysobothris femorata* (Olivier), *C. sexsignata* Say, *Magdalitis armicollis* (Say), *M. barbita* (Say), *M. olyro* (Herbst).

Phasgonophora elegans Provancher, 1887. Addit. Corr. Faune Ent. Canada, Hym., p. 191. ♀.

Trigonura hectoriae Rohwer, 1919. Canad. Ent. 51: 160. ♀, ♂.

Biology: Kaston, 1937. Conn. (State) Agr. Expt. Sta., Bul. 396: 357, 358. (*hectoriae*).

insularis (Cresson). Fla.; West Indies.

Phasgonophora insularis Cresson, 1865. Ent. Soc. Phila., Proc. 4: 102. ♀, ♂.

pini Burks. Idaho, B. C., Wash., Oreg., Calif.

Trigonura pini Burks, 1959. Ent. Soc. Amer., Ann. 52: 80. ♀, ♂.

tarsata (Dalla Torre). N. B., Que., N. H., Vt., Mass., Ont., N. Y., Pa., Va., W. Va., N. C., Ohio. Host: *Magdalitis armicollis* (Say), *M. barbita* (Say), *Pissodes strobi* (Peck).

Chalcis tarsalis Ashmead, 1894. Amer. Ent. Soc., Trans. 21: 332. ♂. Preocc. by Motschulsky, 1863.

Chalcis tarsata Dalla Torre, 1898. Cat. Hym., v. 5, p. 393. N. name.

Biology: Hoffman, 1940. Brooklyn Ent. Soc., Bul. 35: 63.

ulmi Burks. Que., Ont., Vt., Conn., N. Y., N. J., Pa., N. C., Mich., Ill., Iowa, N. Dak. Host:

Magdalitis armicollis (Say), *Scolytus* sp., *S. quadrispinosus* Say.

Trigonura ulmi Burks, 1959. Ent. Soc. Amer., Ann. 52: 80. ♀, ♂.

Genus BRACHYMERIA Westwood

Revision: Masi, 1929. Soc. Ent. Ital., Mem. 8: 117-120 (Ethiopian species). — Blanchard, 1935. Soc. Ent. Argentina, Rev. 7: 103-109 (Argentine species). — Burks, 1936. Ill. State Acad. Sci., Trans. 29: 251-254 (Illinois species). — Boucek, 1951. Mus. Natl. Pragae, Acta Ent. 27, Sup., 1: 17-29 (European species). — Erdos, 1955. Fauna Hung. 12 (2): 7-16 (Hungarian species). — Steffan, 1959. Cahiers des Nat. (n. s.) 15: 35-43 (French species). — Burks, 1960. Amer. Ent. Soc., Trans. 86: 255-273 (Nearctic species). — Habu, 1960. Natl. Inst. Agr. Sci. Japan, Bul. (C) 11: 142-212 (Japanese species). — Joseph *et al.*, 1973. Univ. Calicut, Zool. Monog. 1: 5-209 (Oriental species).

Taxonomy: Gahan and Fagan, 1923. U. S. Natl. Mus., Bul. 124: 24, 31 (*Brachymeria* should replace *Chalcis* of authors, not Fabricius). — Schmitz, 1946. Exploration Parc Natl. Albert, Mission De Witte, fasc. 48: 15 (*Chalcis* correct name for this genus). — Ghesquiere, 1946. Rev. Zool. et Bot. Africaines 39: 372 (*Brachymeria* correct name for this genus).

Genus BRACHYMERIA Subgenus BRACHYMERIA Westwood

Brachymeria Westwood, 1829. In Stephens, Nomencl. Brit. Ins., v. 1, p. 36.

Type-species: *Chalcis minuta* Fabricius. Desig. by Westwood, 1840.

Tumidicoxa Girault, 1911. Zool. Jahrb., Abt. f. System. 31: 378.

Type-species: *Tumidicoxa nigra* Girault. Orig. desig.

Ceyzia Girault, 1911. Zool. Jahrb., Abt. f. System. 31: 382.

Type-species: *Ceyzia fumipennis* Girault. Orig. desig.

Brachepitelia Girault, 1913. Canad. Ent. 45: 106.

Type-species: *Brachepitelia rubripes* Girault. Orig. desig.

Pseudepitelia Girault, 1913. Canad. Ent. 45: 104.

Type-species: *Pseudepitelia rubrifemur* Girault. Orig. desig.

Tumidicoxella Girault, 1913. Roy. Soc. So. Austral., Trans. 37: 74.

Type-species: *Tumidicoxella nigricorsa* Girault. Orig. desig.

Tumidicoxoides Girault, 1913. Arch. f. Naturgesch. 79A (6): 86.

Type-species: *Tumidicoxoides kurandaensis* Girault. Monotypic.

Taxonomy: Habu, 1960. Natl. Inst. Agr. Sci. Japan, Bul. (C) 11: 144 (changed from genus to subgenus).

aeca Burks. N. S., Que., Maine, s. to Fla., w. to B. C., N. Mex. Host: *Chaetophlepsis* sp.

Probably parasitize other Tachinidae that parasitize Lepidoptera or Tenthredinidae.

Brachymeria (*Brachymeria*) *aeca* Burks, 1960. Amer. Ent. Soc., Trans. 86: 242. ♀, ♂.

alexinus (Walker). Ga.

Perilampus alexinus Walker, 1846. List. Hym. Brit. Mus., Chalcid., v. 1, p. 89. ♂.

Taxonomy: Burks, 1975. Brit. Mus. (Nat. Hist.) Ent., Bul. 32 (4): 164 (transferred to *Brachymeria*).

belfragei (Crawford). Tex.; Mexico, Cent. Amer.

Chalcis belfragei Crawford, 1910 (1909). Ent. Soc. Wash., Proc. 11: 205. ♀.

coloradensis (Cresson). N. H., Ont., s. to Fla., w. to B. C., Calif.; Holarctic. Ecology: Ovipositor on the wing in grasshoppers containing sarcophagid or tachinid parasites. Host:

Blaesoxipha hunteri (Hough), *B. kellyi* (Ald.), *Ceracia dentata* (Coq.).

Chalcis femorata Dalman, 1820. Svenska Vetensk. Akad., Handl. 41: 143. ♀. Preocc. by Panzer, 1801.

Chalcis coloradensis Cresson, 1872. Amer. Ent. Soc., Trans. 4: 60. ♂.

Chalcis Dalmanni (!) Thomson, 1875. Hym. Scand., v. 4, p. 17. ♂, ♀. N. name for *femorata* Dalman.

Chalcis tachiniae Howard, 1885. U. S. Dept. Agr., Bur. Ent. Bul. 5: 8, 32, 36. ♀.

Biology: Burks, 1941. Ill. State Acad. Sci., Trans. 33: 208. —Smith, 1944. Canad. Ent. 76:

29-32. —Smith, 1957. Canad. Jour. Res. 36: 258. —Spencer, 1958. Tenth Internat. Ent.

Cong., Proc. 4: 497. —Nikolskaja, 1960. Akad. Nauk SSSR, Zool. Inst., Trudy 27: 222.

—Steffan, 1962. Fragmenta Ent. 4: 23. —Smith, 1965. Canad. Jour. Zool. 43: 187.

—Huggans and Blickenstaff, 1966. Mo. Agr. Expt. Sta., Res. Bul. 903: 36.

comitator (Walker). N. Y., N. J., Fla., Tex.; Mexico, s. to Brazil. An adventive species, always brought in in bananas. Host: *Ceramidia* sp., *C. butleri* (Moesch.), *C. viridis* (Druce).

Chalcis comitator Walker, 1862. Ent. Soc. London, Trans. (3) 1: 350. ♂.

Biology: Harrison, 1963. Jour. Econ. Ent. 56: 284 (both primary and secondary parasite).

compsilurae (Crawford). Maine, Ont., s. to N. C., w. to Man., Mont., Colo., N. Mex., B. C., Oreg.

Host: *Blepharipa scutellata* (R.-D.), *Carcelia amplexa* (Coq.), *C. laxifrons* Vill.,

Compsilura concinnata (Meig.), *Euphorocera claripennis* (Macq.), *E. edwardsii* (Will.),

Exorista larvarum (L.), *Lescheraultia fulvipes* (Bigot), *Lespisia aletia* (Riley), *L. frenchii* (Will.), *Parasetigena agilis* (R.-D.), *Pelatachina pellucida* Coq.,

Townsendiellomyia nidicola (Tns.).

Chalcis compsilurae Crawford, 1911. U. S. Natl. Mus. Proc. 41: 272. ♀, ♂.

Biology: Dowden, 1935. Jour. Agr. Res. 50: 495-523. —Salt, 1941. Cambridge Phil. Soc., Biol.

Rev. 16: 253-255. —Flanders, 1944. Jour. Econ. Ent. 37: 409-410. —Kulman and Hodson,

1961. Jour. Econ. Ent. 54: 221. —Dixon and Benjamin, 1963. Jour. Econ. Ent. 56: 267.

fonscolombei (Dufour). N. J., s. to Fla., w. to Ill., Mo., Kans., Colo., Ariz., Calif.; world-wide, in all faunal regions. Host: *Blaesoxipha impar* (Ald.), *B. plinthopyga* (Wied.), *Calliphora coloradensis* Hough, *Cochliomyia macellaria* (F.), *Lucilia illustris* (Meig.), *Orchellia caesarion* (Meig.), *Phaenicia mexicana* (Macq.), *P. sericata* (Meig.), *Phormia regina* (Meig.), *Sarcophaga* sp., *S. haemorrhoidalis* (Fall.), *Synthesiomyia nudiseta* (Wulp).

Chalcis podagraria Fonscolombe, 1832. Ann. des Sci. Nat. 26: 277. Preocc. by Fabricius, 1787.

Chalcis Fonscolombei Dufour, 1841. Soc. Ent. de France, Ann. 10: 12. N. name.

Taxonomy: Burks, 1936. Ill. State Acad. Sci., Trans. 29: 254 (lectotype). —Gahan, 1942. U. S. Natl. Mus., Proc. 92: 49 (redescription).

♂.

laetiliae Burks. N. C., Okla., N. Mex., Ariz., Calif. Host: *Laetilia coccidivora* (Comst.), *L. zamacrella* Dyar.

Brachymeria (Pseudobrachymeria) laetiliae Burks, 1960. Amer. Ent. Soc., Trans. 86: 268.
♀, ♂.

pedalis (Cresson). Fla., Tex., Colo., N. Mex., Ariz., Calif.; Mexico. Ecology: Parasitizes moths living on cactus. Host: *Noctuelia elatinalis* (Grote), *Melitara prodentalis* Walk., *M. dentata* Grote, *Olycella junctolineella* (Hulst), *Ozamia clarefacta* Dyar. The Argentine species *Brachymeria (Pseudobrachymeria) caetoblastidis* Blanchard may be a synonym of this species.

Chalcis pedalis Cresson, 1872. Amer. Ent. Soc., Trans. 4: 60. ♀.

psyche Burks. Fla. Host: *Oiketicus abbotii* Grote.

Brachymeria (Pseudobrachymeria) psyche Burks, 1960. Amer. Ent. Soc., Trans. 86: 267. ♀.

Family LEUCOSPIDIDAE

By B. D. BURKS

All members of the Leucospidae are primary parasites of aculeate Hymenoptera, developing on the fully grown larva or pupae. The adult female drills through the cell wall of the host with her lengthy ovipositor, and also through the cocoon inside the cell if there is one, and deposits her egg inside. This egg is suspended by a slender stalk. When the egg hatches, the active larva searches out its host, attaches to it, and feeds at various places on its body. Later instars are more quiescent. Pupation occurs inside the cell of the host, and the adult uses its mandibles to break an opening to the outside. The adults often are taken by sweeping flowers, because they feed on pollen. They tend to resemble their hosts in body form and color.

Family EUCHARITIDAE

By B. D. BURKS

All members of this family are parasitic on ants. They are, like most parasites of ants, highly modified in structure. Ashmead, 1904 (Carnegie Mus., Mem. 1: 267) characterizes them as being,

"the most singular looking and wonderfully shaped chalcids known, the structure of the thorax, and particularly of the scutellum, being most wonderfully and curiously modified and developed; this development, in connection with the brilliant colors of its members, makes the group the most striking and attractive of any in the superfamily." However, disregarding these adaptive differences, but considering the fundamental structure of the thorax, it is clear that the eucharitids are descended from the same ancestral stem that produced the present-day pteromalids.

viridis Ashmead. N. C., N. Mex., Ariz.; Mexico.

Orasema viridis Ashmead, 1895. Calif. Acad. Sci., Proc. (2) 5: 553.

Biology: Smith, 1912. U. S. Dept. Agr., Bur. Ent. Tech. Ser. 19: 57-59.

Morphology: Parker, 1924. Soc. Ent. de France, Ann. 93: 270 (larva).

wheeleri Wheeler. Tex., Colo. Host: *Pheidole ceres* Whlr., *P. sciophila* Whlr., *P. tepicana*

Pergande.

Orasema wheeleri Wheeler, 1907. Amer. Mus. Nat. Hist., Bul. 23: 14. ♀.

SUBFAMILY EUCHARITINAE

Genus PSEDOCHALCURA Ashmead

Pseudochalcura Ashmead, 1904. Carnegie Mus., Mem. 1: 268, 269, 468.

Type-species: *Eucharis gibbosa* Provancher. Orig. desig.

arizonensis (Crawford). Ariz.

Chalcura arizonensis Crawford, 1914. Ent. Soc. Wash., Proc. 16: 29. ♀.

Biology: Pierce and Morrill, 1914. Ent. Soc. Wash., Proc. 16: 22. — Clausen, 1940. Wash. Acad. Sci., Jour. 30: 505-509.

californica (Ashmead). Oreg., Calif.

Chalcura californica Ashmead, 1892. Ent. Soc. Wash., Proc. 2: 356. ♂.

gibbosa (Provancher). Que., N. H., Mich. Host: *Camponotus novaeboracensis* (Fitch).

Eucharis gibbosa Provancher, 1881. Nat. Canad. 12: 292. ♀.

Taxonomy: Burks, 1964 (1963). Canad. Ent. 95: 1258.

Biology: Wheeler, 1907. Amer. Mus. Nat. Hist., Bul. 23: 16.

Genus STILBULA Spinola

Stilbula Spinola, 1811. Paris Mus. Hist. Nat., Ann. 17: 150.

Type-species: *Ichneumon cyniformis* Rossi. Monotypic.

floridana (Ashmead). Fla.

Lophyrocera floridana Ashmead, 1888. Ent. Amer. 3: 187. ♂.

Taxonomy: Gahan, 1940. U. S. Natl. Mus., Proc. 88: 435-436.

montana Ashmead. Colo.

Stilbula montana Ashmead, 1890. Colo. Biol. Assoc., Bul. 1: 24, 45. ♀.

septentrionalis (Brues). Ariz.

Schizaspidia septentrionalis Brues, 1907. Wis. Nat. Hist. Soc., Bul. 5: 104. ♀.

Genus LOPHYROCERA Cameron

Lophyrocera Cameron, 1884. Biol. Cent.-Amer., Hym. 1, pp. 101, 103.

Type-species: *Lophyrocera stramineipes* Cameron. Desig. by Ashmead, 1904.

apicalis Ashmead. Calif.

Lophyrocera apicalis Ashmead, 1892. Ent. Soc. Wash., Proc. 2: 357. ♀.

nigromaculata Cameron. Ariz.; Cent. Amer.

Lophyrocera nigromaculata Cameron, 1884. Biol. Cent.-Amer., Hym. 1, p. 104.

Genus KAPALA Cameron

Kapala Cameron, 1884. Biol. Cent.-Amer., Hym. 1, p. 102.

Type-species: *Eucharis furcata* Fabricius. Monotypic.

Capala Schulz, 1906. Spolia Hym., p. 150. Emend.

floridana (Ashmead). Fla.

Thoracantha floridana Ashmead, 1885. Ent. Amer. 1: 96. ♂.

Taxonomy: Ashmead, 1885. Amer. Ent. Soc., Trans. 12: Proc. p. xi.

furcata (Fabricius). Ga., Tex.; West Indies, Cent. and South Amer.

Eucharis furcata Fabricius, 1804. *Systema Piezatorum*, p. 158.

Taxonomy: Brues, 1907. *Wis. Nat. Hist. Soc., Bul.* 5: 105.

Genus PSEUDOMETAGEA Ashmead

Pseudometagea Ashmead, 1899. *Ent. Soc. Wash., Proc.* 4: 239, 241. No species — Ashmead, 1904, *Carnegie Mus., Mem.* 1: 267. One species.

Type-species: *Metagea schwarzi* Ashmead. Desig. by Ashmead, 1904.

Revision: Burks, 1961. *Ent. News* 72: 253-257.

bakeri Burks. Iowa, Wyo., Colo.

Pseudometagea bakeri Burks, 1961. *Ent. News* 72: 256. ♀, ♂.

schwarzi (Ashmead). Que. and Ont., s. to Md. and D. C., w. to Wis., Iowa, Nebr. Host: *Lasius neoniger* Emery.

Metagea schwarzi Ashmead, 1892. *Ent. Soc. Wash., Proc.* 2: 356. ♂, ♀.

Pseudometagea hillmeadia Girault, 1916. *Brooklyn Ent. Soc., Bul.* 11: 113. ♀.

Biology: Ayre, 1962. *Canad. Jour. Zool.* 40: 157-164.

Family EUPELMIDAE

By B. D. BURKS

In many classifications the eupelmids are placed in the family Encyrtidae. However, all the eupelmids agree in possessing an array of characters that indicate that they and the encyrtids diverged separately from the evolutionary stem of the chalcidoids at a remote time in the development of the superfamily. Eupelmids may be recognized by having the margin of the prepectus projecting over the margin of the mesepisternum, in having the forecoxae and midcoxae widely separated, and in having the midcoxae so formed that they can be rotated either anteriorly or posteriorly. The encyrtids do not have those characters.

Morphology: Reid, 1941. *Roy. Ent. Soc. London, Trans.* 91: 433-434.

SUBFAMILY TANAOSTIGMATINAE

This group is primarily Neotropical and Australian, with only a very few Nearctic species. All the species of this subfamily, except one, are known to be gall makers. The one exception is *Tanaostigmodes tychii* Ashmead, which was supposed to be parasitic on a seed weevil, *Tychius*, when it was described. This rearing has not been repeated, and the record may be incorrect.

Genus TANAOSTIGMOPES Ashmead

Tanaostigmodes Ashmead, 1896. *Ent. Soc. Wash., Proc.* 4: 9, 18.

Type-species: *Tanaostigmodes howardii* Ashmead. Orig. desig.

Two of the species of *Tanaostigmodes, albiclavus* Girault and *howardii* Ashmead, often have cynipid inquilines in their galls.

Revision: Crawford, 1911. *U. S. Natl. Mus., Proc.* 40: 442.

albiclavus Girault. Ariz. Ecology: Produce large stem galls on *Acacia greggi*, *Mimosa biuncifera*.

Taneostigmodes(?) albiclavus Girault, 1917. *Descr. Stellarum Nov.*, p. 4. ♀.

howardii Ashmead. Ariz., Calif. Ecology: Produce small, spherical bud galls on *Acacia greggi*, *Mimosa biuncifera*, *Prosopis* sp.

Tanaostigmodes howardii Ashmead, 1896. *Ent. Soc. Wash., Proc.* 4: 19. ♀.

slossonae Crawford. Fla. Ecology: Produce seed galls on *Galactia striata*, *G. volubilis*.

Tanaostigmodes slossonae Crawford, 1911. *U. S. Natl. Mus., Proc.* 40: 442. ♀, ♂.

tychii Ashmead. Calif. Host: *Tychius semisquamosus* Lec.

Tanaostigmodes tychii Ashmead, 1896. *Ent. Soc. Wash., Proc.* 4: 19. ♀.

SUBFAMILY CALOSOTINAE

Taxonomy: Boucek, 1958. Mus. Natl. Pragae, Acta Ent. 32: 354-355. — Boucek, 1964. Ent. Soc. Canada, Mem. 34: 60.

Genus CALOSOTA Curtis

Calosota Curtis, 1836. Brit. Ent. 13: 596.

Type-species: *Calosota vernalis* Curtis. Orig. desig.

Calosoter Walker, 1837. Ent. Mag. 4: 358.

Type-species: *Calosoter vernalis* Walker. Desig. by Westwood, 1840.

Taxonomy: Bolivar y Pieltain, 1929. Eos 5: 123. — Hedqvist, 1963. Studia Forest. Suecica 11: 139. — Graham, 1969. Roy. Ent. Soc. Lond., Proc. (B) 38: 89-91 (Identity of type-species).

longiventris (Ashmead). Idaho, Calif.

Calosoter longiventris Ashmead, 1896. Ent. Soc. Wash., Proc. 4: 12. ♀, ♂.

metallica (Gahan). Idaho, Utah, Wash., Oreg., Calif. Ecology: Either a primary or secondary parasite, feeding on other insects that develop in grass stems. Host: *Mayetiola destructor* (Say), *Harmolita grandis* (Riley), *H. tritici* (Fitch) as primary parasites; *Ditropinotus aureoviridis* Crawford, *Eurytoma parva* Phillips as secondary parasites. *Calosoter metallicus* Gahan, 1922. U. S. Natl. Mus., Proc. 61 (24): 16. ♂, ♀.

Biology: Knowlton and Janes, 1933. Utah Agr. Expt. Sta. Bul. 243: 12. — Gahan, 1934 (1933). U. S. Dept. Agr., Misc. Pub. 174: 58-60. — Chamberlain, 1941. U. S. Dept. Agr., Tech. Bul. 784: 38-40. — Nikolskaja, 1952. Opred. Fauna USSR 44: 483. — Phillips and Poos, 1953. U. S. Dept. Agr., Farmers Bul. 1323, p. 5. — Nikolskaja, 1963. Keys Fauna USSR 44: 497 (Eng. transl.).

Genus EUSANDALUM Ratzeburg

Eusandalum Ratzeburg, 1852. Ichn. d. Forstins., v. 3, p. 199.

Type-species: *Eusandalum abbreviatum* Ratzeburg. Desig. by Ashmead, 1904.

Polymoria Foerster, 1856. Hym. Stud., v. 2, p. 31. No included species.

Type-species: *Polymoria coronata* Thomson. First included species, Thomson, 1875.

Ratzeburgia Foerster, 1856. Hym. Stud., v. 2, pp. 31, 145.

Type-species: *Eusandalum abbreviatum* Ratzeburg. Desig. by Gahan and Fagan, 1923.

Meseusandalum Girault, 1915. Queensland Mus., Mem. 4: 34.

Type-species: *Meseusandalum cyaneiventris* Girault. Orig. desig.

Polymoriooides Masi, 1941. Mus. Civ. Stor. Nat. Genova, Ann. 61: 154.

Type-species: *Polymoriooides tessellatus* Masi. Orig. desig.

Revision: Girault, 1917. Jour. Ent. and Zool. 9: 8-10.

Taxonomy: Risbec, 1952. Inst. Sci. Madagascar, Mem. (E) 2: 98 (generic synonymy).

— Boucek, 1967. Acta Ent. Bohemoslov. 64: 261-266 (generic synonymy). — Boucek, 1970. Soc. Ent. Ital., Mem. 49: 78-80 (corrected synonymy).

acmaeoderae Girault. Calif. Host: *Acmaeodera* sp. in *Ceanothus integerrimus*.

Eusandalum acmaeoderae Girault, 1917 (March). Jour. Ent. and Zool. 9: 9.

Eusandalum acmaeoceratae(!) Rohwer, 1917 (June). U. S. Natl. Mus., Proc. 53: 171. ♀.

alpinum Girault. Calif.

Eusandalum alpinum Girault, 1917. Jour. Ent. and Zool. 9: 8. ♀.

amphicerovorum (Ashmead). N. J., Kans. Host: *Amphicerus bicaudatus* (Say).

Ratzeburgia(!) *amphicerovora* Ashmead, 1888. Kans. Agr. Expt. Sta., Bul. 3, App. p. V. "♂" = ♀.

arizona Girault. Ariz.

Eusandalum arizona Girault, 1917. Jour. Ent. and Zool. 9: 9. ♀.

californicum Girault. Calif.

Eusandalum californicum Girault, 1917. Jour. Ent. and Zool. 9: 8. ♀.

coquillettii (Ashmead). Calif. Host: *Oeme gracilis* Lec.

Ratzeburgia coquillettii Ashmead, 1896. Ent. Soc. Wash., Proc. 4: 11. ♀.

cyaneum (Ashmead). Ariz., Calif.

Ratzeburgia cyanea Ashmead, 1896. Ent. Soc. Wash., Proc. 4: 11. ♀.

georgia Girault. D. C., Ga.

Eusandalum georgia Girault, 1917. Jour. Ent. and Zool. 9: 8. ♀.

hubbardii (Ashmead). N. J., D. C., Fla., Mont., Wash. Host: *Leptostylus biustus* Lec.

Ratzeburgia hubbardii Ashmead, 1896. Ent. Soc. Wash., Proc. 4: 12. ♀.

Biology: De Leon, 1934. Canad. Ent. 66: 60.

hyalinipennis (Ashmead). Tex., Calif.

Ratzeburgia hyalinipennis Ashmead, 1896. Ent. Soc. Wash., Proc. 4: 12. ♀.

obscurum Girault. Wash.

Eusandalum obscurum Girault, 1917. Jour. Ent. and Zool. 9: 8. ♀.

SUBFAMILY EUPELMINAE

Taxonomy: Ashmead, 1896. Ent. Soc. Wash., Proc. 4: 4-20. —Ruschka, 1921 (1920). Zool.-Bot. Gesell. Wien., Verhandl. 70: 234-315 (European fauna). —Masi, 1943. Mus. Civ. Stor. Nat., Ann. 61: 153 (key to genera). —Ferriere, 1938. Soc. Ent. France, Ann. 107: 25-26. —Ferriere, 1954. Schweiz. Ent. Gesell., Mitt. 27: 1-21 (brachypterous forms). —Hedqvist, 1963. Studia Forest. Suecica 11: 131-132 (bark-beetle parasites).

Genus METAPELMA Westwood

Metapelma Westwood, 1835. Zool. Soc. London, Proc. 3: 69.

Type-species: *Metapelma spectabilis* Westwood. Monotypic.

Halidea Foerster, 1856. Hym. Stud., v. 2, p. 31. No species. —Foerster, 1860. Naturh. Ver. Rheinlande, Verhandl. 17: 113. Two species.

Type-species: *Halidea insignis* Foerster. Desig. by Gahan and Fagan, 1923.

Halidayella Dalla Torre, 1897. Wien. Ent. Ztg. 16: 85. N. name for *Halidea*, unnecessarily proposed.

Revision: Ferriere, 1938. Soc. Ent. France, Ann. 107: 25-43.

schwarzii (Ashmead). Conn., N. Y., N. J., s. to Fla., w. to Mo., Ark., Oreg., Calif. Host: *Apteromechus ferratus* (Say), *Magdalais armicollis* (Say).

Halidea Schwarzii Ashmead, 1890. Ent. Soc. Wash., Proc. 1: 265. ♀.

spectabile Westwood. Conn., N. Y., N. J., s. to Fla., w. to Kans., Tex. Host: *Agrilus angelicus* Horn, *Chrysobothris femorata* (Olivier), *Cylas elegantulus* (Summers), *Magdalais olyra* (Hbst.), *M. pandura* (Say).

Metapelma spectabilis Westwood, 1835. Zool. Soc. London, Proc. 3: 69. ♀.

cynipidis Ashmead. Fla., La. Host: *Callirhytes quercusbataoides* (Ashm.) gall.

Eupelmus cynipidis Ashmead, 1882. Canad. Ent. 14: 36. ♀.

dryophantae Ashmead. Fla. Host: *Dryocosmus quercuslaurifoliae* (Ashm.) gall.

Eupelmus dryophantae Ashmead, 1886. Amer. Ent. Soc., Trans. 13: 130. ♀, ♂.

ficigerae (Ashmead). Fla. Host: *Andricus femoratus* Ashm., *Disholcaspis quercusvirens* (Ashm.).

Megastigma (!) *ficigerae* Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 185. ♂.

flavovariegatus Ashmead. Kans. Ecology: Emerged from an undet. cynipid gall.

Eupelmus flavovariegatus Ashmead, 1888. Kans. Agr. Expt. Sta., Bul. 3: App. p. IV. ♀, ♂.

floridanus Howard. Fla.

Eupelmus Floridanus Howard, 1880. Canad. Ent. 12: 209. ♂.

fonteia Walker. Fla.

Eupelmus fonteia Walker, 1847. Ann. and Mag. Nat. Hist. (1) 20: 19. ♀.

Taxonomy: Burks, 1975. Brit. Mus. (Nat. Hist.) Ent., Bul. 32: 149 (lectotype designated).

inyoensis Girault. Utah, Calif. Host: *Saissetia oleae* (Bern.); *Asphondylia adenostoma* Felt; *Aphytis lounsburyi* How., *Pimplopterus* sp.

Eupelmus inyoensis Girault, 1916. Ent. News 27: 223. ♀, ♂.

Taxonomy: Smith and Compere, 1928. Calif. Univ. Pubs., Ent. 4: 295-297.

Biology: Compere, 1925. Calif. Univ. Pubs., Ent. 3: 296. — Flanders, 1940. Ent. Soc. Amer., Ann. 33: 252. — Tilden, 1951. Microentomology 16: 164, 173. — Flanders, 1953 (1952). Ent. Soc. Amer., Ann. 45: 544, 547. — Doutt, 1961. Ent. Soc. Amer., Ann. 54: 51.

juglandis Ashmead. N. Y., Va., N. C., Kans. Host: *Scolytus rugulosus* (Ratz.).

Eupelmus juglandis Ashmead, 1894. Amer. Ent. Soc., Trans. 21: 340. ♀.

lamachus Walker. Fla.

Eupelmus Lamachus Walker, 1847. Ann. and Mag. Nat. Hist. (1) 20: 20. ♀.

- Taxonomy: Burks, 1975. Brit. Mus. (Nat. Hist.) Ent., Bul. 32: 150.
- limneriae** Howard. Conn., s. to Fla. Host: *Grapholita molesta* (Busck), *Homaledra sabatella* (Chamb.); *Campoplex validus* (Cress.), *Ceratosniera* sp., *Macrocentrus aenylivorus* Roh.
- Eupelmus limneriae* Howard, 1897. U. S. Dept. Agr., Div. Ent., Tech. Ser. 5: 39, 56. ♀, ♂.
- Biology: Allen, 1962. U. S. Dept. Agr., Tech. Bul. 1265: 93-95.
- macrocarpae** Ashmead. Ill., Kans. Host: *Acraspis erinacei* (Beut.), *A. pezomachoides* (O. S.), *Disholcaspis quercusmamma* (Walsh) galls.
- Eupelmus macrocarpae* Ashmead, 1888. Kans. Agr. Expt. Sta., Bul. 3: App. p. IV. ♀.
- Biology: Balduf, 1926. Canad. Ent. 58: 160-163.
- marylandicus** Girault. Md.
- Eupelmus marylandicus* Girault, 1916. Canad. Ent. 48: 242. ♀.
- momphae** Gahan. Conn., Ga., Ala., Tex. Host: *Mompha brevivittella* (Clem.), *Phalonia cephalanthae* Hein.
- Eupelmus momphae* Gahan, 1910. Canad. Ent. 42: 205. ♀.
- neococcidis** Peck. Md., La., Tex., Ariz. Host: *Stagmomantis carolina* (Johan.), *S. limbata* (Hahn), *Tenodera angustipennis* Sauss.
- Eupelmus brevicanda* Gahan, 1910. Canad. Ent. 42: 205. ♀. Preocc. by Crawford, 1908.
- Eupelmus coccidis* Girault, 1917. Descr. Stellarum Nov., p. 6. N. name. Preocc. by Girault, 1916.
- Eupelmus neococcidis* Peck, 1951. U. S. Dept. Agr., Agr. Monog. 2: 510. N. name.
- Biology: Breland, 1941. Ent. Soc. Amer., Ann. 34: 108. —Gurney, 1959. Ent. Soc. Wash., Proc. 61: 23.
- neomexicanus** Girault. N. Mex.
- Eupelmus neomexicanus* Girault, 1906. Ent. Soc. Amer., Ann. 9: 307. ♀.
- pini** Taylor. N. H., Mass., Conn., N. Y. Host: *Pissodes strobi* (Peck).
- Eupelmus pini* Taylor, 1927. Brooklyn Ent. Soc., Bul. 22: 205. ♀.
- Biology: Taylor, 1929. Ent. Amer. 10: 12-16, 66.
- popa** Girault. Va., s. to Fla., w. to Mo., Okla., Tex.; Hawaii, West Indies, Cent. and So. Amer., Orient, Africa, Australia. Host: *Contarinia sorghicola* (Coq.).
- Eupelmus popa* Girault, 1917. Descr. Hym. Chalcidoid. Variorum cum Observ. V, p. 4. ♀.
- Taxonomy: Gahan, 1922. U. S. Natl. Mus., Proc. 61 (24): 14.
- Biology: Woodruff, 1929. Jour. Econ. Ent. 22: 160-167. —Walter, 1941. U. S. Dept. Agr., Tech. Bul. 778: 18-20. —Passlow, 1958. Queensland Jour. Agr. Sci. 15: 35. —Harris, 1961. Bul. Ent. Res. 52: 134. —Piore and Viggiani, 1965. Lab. Ent. Agr. Bol. 23: 23.
- quercus** Ashmead. Fla. Host: *Disholcaspis quercusvirens* (Ashm.) gall.
- Eupelmus quercus* Ashmead, 1886. Amer. Ent. Soc., Trans. 13: 130. ♀.
- rosae** Ashmead. Fla., La., Kans. Host: *Diplolepis* spp. galls on rose.
- Eupelmus rosae* Ashmead, 1882. Canad. Ent. 14: 36. ♀.
- rubicola** (Ashmead). Fla. Known only from a single male reared from an undet. dipterous larva from the stem of *Rubus*; originally described in the Scelionidae, but the type specimen is *Eupelmus*.
- Xenomerus rubicola* Ashmead, 1887. Ent. Amer. 3: 100. ♂.
- Taxonomy: Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 185 (sp. incorrectly trans. from Scelionidae to Pteromalidae).
- speciosus** Girault. D. C., Tex. Host: *Andricus quercuslaniger* (Ashm.) gall.
- Eupelmus speciosus* Girault, 1916. Canad. Ent. 48: 243. ♀.
- sphaericcephalus** Ashmead. Fla.
- Eupelmus sphaericcephalus* Ashmead, 1886. Amer. Ent. Soc., Trans. 13: 129. ♀.
- spongipartus** Foerster. N. B., Conn., Ont., N. Y., Pa., Md., Ohio, Wis.; Europe. Introduced from Europe. Host: *Grapholita molesta* (Busck); *Apanteles melanoscelus* (Ratz.), *Diprion*

similis (Htg.), *Glypta rufiscutellaris* Cress., *Macrocentrus aencylivorus* Roh., *Meteorus versicolor* (Wesm.).

Eupelmus spongipartus Foerster, 1860. Naturh. Ver. Rheinlande, Verh. 17: 123. ♀, ♂.

Taxonomy: Finlayson, 1962. Canad. Ent. 94: 277-279 (immature stages).

Biology: Muesebeck and Dohanian, 1927. U. S. Dept. Agr., Bul. 1487: 12, 21-23. — Proper, 1934. Jour. Agr. Res. 48: 366. — Brunson, 1948. Jour. Econ. Ent. 41: 119. — Brunson and Allen, 1948. Jour. Econ. Ent. 41: 447. — Reeks and Smith, 1956. Canad. Ent. 88: 572. — Allen, 1962. U. S. Dept. Agr., Tech. Bul. 1265: 95-96.

utahensis Girault. Wyo., Utah. Host: *Metapheritis fenestrata* Foote.

Eupelmus cyaniceps var. *utahensis* Girault, 1916. Canad. Ent. 48: 244. ♀.

Biology: Fronk et al., 1964. Ent. Soc. Amer., Ann. 57: 575.

Genus ARACHNOPHAGA Ashmead

Arachnophaga Ashmead, 1896. Ent. Soc. Wash., Proc. 4: 9, 10, 18.

Type-species: *Eupelmus piceus* Riley. Orig. desig.

Brasemopsis Brethes, 1913. Buenos Aires Mus. Nac. de Hist. Nat., An. 24: 106.

Type-species: *Brasemopsis halysidotae* Brethes. Monotypic.

The name *Arachnophaga* is somewhat unfortunate for this genus. Half the North American species are not parasitic on spiders, but develop at the expense of Lepidoptera or their hymenopterous primary parasites. One species also parasitizes the primary parasites of *Chrysopa*.

Revision: Gahan, 1943. U. S. Natl. Mus., Proc. 94: 339-363.

Taxonomy: De Santis, 1960. Rev. Fac. Agron. La Plata 36: 110 (generic synonymy).

abstrusa Gahan. Tex. Host: *Cyrtarachne* sp. egg sacs.

Arachnophaga abstrusa Gahan, 1943. U. S. Natl. Mus., Proc. 94: 362. ♀, ♂.

aldrichi Gahan. Mass., Pa., N. J., Md., Tenn., Miss., Tex. Host: Undet. spider egg sacs.

Arachnophaga aldrichi Gahan, 1943. U. S. Natl. Mus., Proc. 94: 360. ♀.

aureicorpus (Girault). S. C., Tex.

Anastatus aureicorpus Girault, 1916. Ent. Soc. Amer., Ann. 9: 299. ♀.

costalis Gahan. N. J., Del., Md. Host: *Eurukuttarus confederata* (Grote), *Grapholitha molesta* (Busck), *Zamopsycha commentella* Dyar; *Macrocentrus* sp.

Arachnophaga costalis Gahan, 1943. U. S. Natl. Mus., Proc. 94: 346. ♀.

Biology: Allen, 1962. U. S. Dept. Agr., Tech. Bul. 1265: 100.

ferruginea Gahan. Va., Fla. Host: *Epeira pugnia* Walck., *Gasteracanthus caucriformis* (L.) egg sacs.

Arachnophaga ferruginea Gahan, 1943. U. S. Natl. Mus., Proc. 94: 361. ♀.

frontalis Gahan. Conn., N. J., Va., S. C., Tex., Utah, Ariz. Host: *Anarsia lineatella* Zell.

Grapholitha molesta (Busck), *Gypsonoma* sp., *Thyridopteryx meadi* Edw.; *Macrocentrus aencylivorus* Roh., *Neodiprion pinusrigidae* (Nort.).

Arachnophaga frontalis Gahan, 1943. U. S. Natl. Mus., Proc. 94: 357. ♀, ♂.

Biology: Allen, 1962. U. S. Dept. Agr., Tech. Bul. 1265: 99-100.

longiceps (Brues). Tex. Host: *Papilio* sp.

Anastatus longiceps Brues, 1907. Wis. Natl. Hist. Soc., Bul. 5: 108. ♀.

Biology: Allen, 1962. U. S. Dept. Agr., Tech. Bul. 1265: 100.

nocua Gahan. Tex. Host: *Apanteles* sp. Secondary parasite of *Estigmene acrea* (Drury).

Arachnophaga nocua Gahan, 1943. U. S. Natl. Mus., Proc. 94: 348. ♀, ♂.

picea (Riley). N. J., Ill., Ariz., Calif. Host: *Argiope argentata* (F.), *Diguetia canities* (McCook), *Epeira gibberosa* (Hentz), *Mastophora cornigera* (Hentz), *Phidippus opifex* McCook, *Theridion globosa* (Hentz) egg sacs. Secondary parasite, primary parasite unknown, of *Chrysopa californica* Coq.

Eupelmus piceus Riley, 1892. In Howard, Ent. Soc. Wash., Proc. 2: 296. ♀, ♂.

Taxonomy: Clancy, 1946. Calif. Univ. Pubs., Ent. 7: 459-460.

Biology: Weese, 1925. Ill. Biol. Monog. 9 (4): 19, 46-52. — Weese, 1930. Okla. Acad. Sci., Proc. 10: 18-19. — Clancy, 1946. Calif. Univ. Pubs., Ent. 7: 459-460. — Cazier and Mortenson, 1962. So. Calif. Acad. Sci., Bul. 61: 74.

scutata Gahan. Ill. Host: Undet. spider egg sacs.

Arachnophaga scutata Gahan, 1943. U. S. Natl. Mus., Proc. 94: 353. ♀, ♂.

Genus EUPELMELLA Masi

Macroneura Walker, 1837. Ent. Mag. 4: 353. Preocc. by *Macronevra* Macquart, 1834.

Type-species: *Macroneura maculipes* Walker. Monotypic.

Macronevra Blanchard, 1840. Hist. Nat. Anim. Articulés, v. 3, p. 273. Emend.

Eupelmella Masi, 1919. Mus. Civ. Stor. Nat. Genova, Ann. 48: 306.

Type-species: *Eupelmus degeeri* Dalman. Orig. desig.

Taxonomy: Ferriere, 1954. Schweiz. Ent. Gesell., Mitt. 27: 4. — Hedqvist, 1963. Studia Forest. Suecica 11, p. 132.

dryorhizoxeni (Ashmead). Mass., N. Y., Pa., Md., D. C., Va., Fla., Ala., Ill., Mo., Nebr., Kans.

Host: *Rhabdophaga salicistriticoides* (Walsh); *Belonocnema treatae* Mayr, *Diplolepis dichlocera* (Harris), *D. ignota* (O. S.) galls. This species, having been reliably recorded as reared from a variety of galls, probably does not parasitize the gall makers, but more likely attacks some inquilines or parasites of the gall makers.

Eupelmus dryorhizoxeni Ashmead, 1886. Amer. Ent. Soc., Trans. 13: 129. ♀, ♂.

Eupelmus rhizophelus Brues, 1903. Biol. Bul. 4: 186, 189.

Taxonomy: Burks, 1967. In Krombein and Burks, U. S. Dept. Agr., Agr. Monog. 2, Sup. 2, p. 246 (synonymy).

Biology: Melander and Brues, 1903. Biol. Bul. 5: 21.

epicaste (Walker). Fla., Kans., Tex. Host: *Meteorus* sp., *M. laphygmae* Vier.

Eupelmus Epicaste Walker, 1847. Ann. and Mag. Nat. Hist. (1) 20: 20. ♀.

Taxonomy: Burks, 1975. Brit. Mus. (Nat. Hist.) Ent., Bul. 32: 149 (synonymy).

Eupelminus meteori Gahan, 1913. U. S. Natl. Mus., Proc. 46: 437. ♀.

Biology: Luginbill, 1928. U. S. Dept. Agr., Tech. Bul. 34: 74-75. — Vickery, 1929. U. S. Dept. Agr., Tech. Bul. 138: 21, 32, 55, 58.

melanderi (Brues). Wash. Host: *Diplolepis* sp. galls on rose.

Eupelmus melanderi Brues, 1907. Wis. Nat. Hist. Soc., Bul. 5: 54. ♀.

vesicularis (Retzius). Que., N. B. and Maine, s. to N. C., w. to B. C., s. to Calif.; Europe, N.

Africa, Middle East, Asia Minor. Ecology: This is one of the most polyphagous chalcidoids, having for hosts Orthoptera, Hemiptera, Coleoptera, Lepidoptera, Diptera, and Hymenoptera. The list of names of its hosts reported in the world literature is extremely lengthy, and the list of these hosts that are reliably known for only North America is tiresomely long. *E. vesicularis* is usually a primary parasite, but it may also be secondary. Introduced probably from Europe in straw, and first reported in Pennsylvania in 1915. Host: *Anthonomus signatus* Say, *Bruchus bruchialis* Fahr., *Ceutorhynchus assimilis* (Payk.), *Cylindrocopturus furnissi* Buch., *Gyrinus* sp., *Hypera postica* (Gyll.), *H. rumicis* (L.), *Tachypterellus corsors cerasi* List; *Argyresthia thuiella* (Pack.), *Archippus packardianus* (Fern.), *Coleophora laricella* (Hbn.), *C. pruniella* Clem., *C. salmani* Hein., *Eurukuttarus confederata* (Grote), *Grapholitha molesta* (Busck), *Malacosoma disstria* Hbn., *M. pluviale* (Dyar), *Porthetria dispar* (L.), *Rhyacionia buoliana* (Schiff.), *Stilpnobia salicis* (L.); *Hylemya* sp., *Mayetiola destructor* (Say); *Agathis calcarata* (Cress.), *Apanteles melanoscelus* (Ratz.), *A. laricella* Mason, *Aulacidea podagrae* (Bass.), *A. tumida* (Bass.) galls, *Bathyplectes curculionis* (Thomson), *Bracon cephi* (Gahan), *Bruchophagus* sp., *Cephus cinctus* Nort., *C. pygmaeus* (L.), *Dahlbominus fuscipennis* (Zett.), *Diplolepis* sp. galls, *Ditropinotus aureoviridis* Cwfd., *Eupelmus allynii* (French), *Eurytoma parva* Phillips, *Harmolita albomaculata* (Ashm.), *H. elymi* (French), *H. festucae* P. and E., *H. grandis* (Riley), *H. hordei* (Harr.), *H. linearis* (Walker), *H. longula* (Dalm.), *H. maculata* (How.), *H. tritici*

(Fitch), *H. vaginicolus* (Doane), *Janus integer* (Nort.), *Neodiprion abietis* (Harr.), *N. pratti banksianae* Roh., *N. lecontei* (Fitch), *N. sertifer* (Geof.), *Platygaster zosine* Walker. *Ichneumon vesicularis* Retzius, 1783. Genera et Species Insectorum, p. 70. *Eupelmus degeeri* Dalman, 1820. Svenska Vetensk. Akad., Handl. 41: 379. ♀. *Eupelmus gerri* Nees, 1834. Hym. Ichn. Aff. Monog., v. 2, p. 76. Emend. *Theocolax canadensis* Provancher, 1883. Nat. Canad. 14: 34. ♀. *Eupelmus albifasciatus* Costa, 1883. Accad. Sci. Fis. e Mat. Napoli, Atti 2: 101. ♀. *Euryxapus saltator* Lindeman, 1887. Soc. Imp. Nat. Moscou, Bul. (2) 1: 190. ♀. *Eupelminus coleopterophagus* Girault, 1916. Ent. Soc. Amer., Ann. 9: 306. ♀.

Taxonomy: Gahan, 1934 (1933). U. S. Dept. Agr., Misc. Pub. 174: 52-58. — Hill and Pinckney, 1940. U. S. Dept. Agr., Tech. Bul. 715: 6-7, 11-13. — Finlayson, 1960. Canad. Ent. 92: 37-44 (immature stages.). — Hedqvist, 1963. Studia Forest. Suecica 11, p. 133. — Finlayson, 1963. Canad. Ent. 95: 499 (immature stages.). — Burks, 1964 (1963). Canad. Ent. 95: 1262.

Biology: McConnell, 1918. Jour. Econ. Ent. 11: 168. — Muesebeck and Dohanian, 1927. U. S. Dept. Agr., Bul. 1487: 12, 23-24. — Phillips and Poos, 1927. Jour. Agr. Res. 34: 473-482. — Doner, 1936. Ent. Soc. Amer., Ann. 29: 226-236. — Morris, 1938. Parasitology 30: 20-32. — Hill, Pinckney and Udine, 1939. U. S. Dept. Agr., Tech. Bul. 689: 4-14. — Chamberlain, 1941. U. S. Dept. Agr., Tech. Encyclopedie Ent., v. 38, p. 459. — Gijswijt, 1962. Ent. Ber. 22: 250. — Allen, 1962. U. S. Dept. Agr., Tech. Bul. 1265: 100-101. — Angalet and Andres, 1965. Jour. Econ. Ent. 58: 1167. — Balduf, 1966. Ent. Soc. Amer., Ann. 59: 1048. — Williams, 1969. Ent. Monthly Mag. 105: 124.

Genus MEROSTENUS Walker

Merostenus Walker, 1837. Ent. Mag. 4: 354.

Type-species: *Merostenus phedyna* Walker. Monotypic.

Urocryptus Westwood, 1840. Introd. Mod. Class. Ins., Synopsis p. 72. Preocc. by Temminck, 1838.

Type-species: *Eupelmus excavatus* Dalman. Orig. desig.

Eupelminus Dalla Torre, 1897. Wien. Ent. Ztg. 16: 85. N. name for *Urocryptus*.

excavatus Dalman. Utah? Europe. Introduced, but not known to be established. Host: *Hypera postica* (Gyll.).

Eupelminus excavatus Dalman, 1820. Svenska Vetensk. Akad., Handl. 41: 382. ♀.

Merostenus phedyna Walker, 1837. Ent. Mag. 4: 355. ♂.

Biology: Chamberlin, 1924. U. S. Dept. Agr., Cir. 301: 2-4. — Essig and Michelbacher, 1933. Calif. Agr. Expt. Sta., Bul. 567: 61, 69.

Genus ANASTATUS Motschulsky

Anastatus Motschulsky, 1860 (1859). Etudes Ent. 8: 116.

Type-species: *Anastatus mautoidae* Motschulsky. Monotypic.

Antigaster Walsh and Riley, 1869. Amer. Ent. 1: 156.

Type-species: *Antigaster mirabilis* Walsh and Riley. Monotypic.

Solindenia Cameron, 1883. Roy. Ent. Soc. London, Trans. 1883: 189.

Type-species: *Solindenia picticornis* Cameron. Monotypic.

Paraguaya Girault, 1911. Zool. Jahrb., Abt. f. System. 31: 385.

Type-species: *Paraguaya pulchripennis* Girault. Monotypic.

Ooderelloides Girault, 1913. Roy. Soc. So. Austral., Trans. 37: 6, 9, 10.

Type-species: *Ooderelloides nigripurpurea* Girault. Orig. desig.

Pseudoooderella Brethes, 1922. Soc. Cient. Argentina, An. 93: 127.

Type-species: *Pseudoooderella catamarcensis* Brethes. Monotypic.

Revision: Burks, 1967. Amer. Ent. Soc., Trans. 93: 423-431.

Taxonomy: De Santis, 1960. Rev. Fac. Agron. La Plata (3) 36: 111 (generic synonymy).

disparis Ruschka. Maine, s. to N. J.; Europe, Korea, Japan. Introduced from Russia and Japan; the first recoveries in 1910. Host: *Porthetria dispar* (L.); *Apanteles melanoscelus* (Ratz.). Development as a secondary parasite may occur only in laboratory or insectary cultures. N. Amer. literature before 1929 used the name *bifasciatus*. *Anastatus bifasciatus* var. *disparis* Ruschka, 1920. Zool.-Bot. Gesell. Wien, Verh. 70: 265. ♂, ♀.

Taxonomy: Pieltain, 1934. Eos 10: 286-290. — Tachikawa, 1965. In Yasumatsu et al., Icon. Ins. Jap., v. 3, p. 281 (*disparis* syn. of *japonicus* (Ashmead)). — Hirose et al., 1968. Kyushu Univ. Faculty Agr., Jour. 14: 450, footnote.

Biology: Fiske, 1910. Parasites of Gipsy and Brown-Tail Moths Introduced into Mass. pp. 16-51. — Howard and Fiske, 1911. U. S. Dept. Agr., Bur. Ent. Bul. 91: 75, 168-176. — Muesebeck and Dohanian, 1927. U. S. Dept. Agr., Bul. 1487: 24. — Burgess and Crossman, 1929. U. S. Dept. Agr., Tech. Bul. 86: 23-31. — Felker, 1940. N. H. Dept. Agr., Bienn. Family ENCYRTIDAE

By GORDON GORDH

The higher classification of the Encyrtidae used in this catalog differs drastically from that proposed in the 1951 edition. Some explanation is necessary. Burks has considered the Signiphoridae and Aphelinidae as subfamilies of the Encyrtidae. In the 1951 catalog the aphelinids were considered a subfamily of the Eulophidae and the signiphoridae were treated as a distinct family (Thysanidae). The aphelinids and signiphoridae appear more nearly related to the Encyrtidae than to other families of chalcidooids. In placing the aphelinids under the Encyrtidae, the subfamilies of aphelinids (*sensu* Ferriere, 1965, Faune de l'Europe Bassin Medit., 1: 1-206) have been relegated to tribal status.

Recently Trjapitzin (1973, Ent. Rev. 52 (1): 118-125; Ent. Rev. 52 (2): 287-295) has treated the higher classification of the Encyrtidae (*sensu stricto*) and provided a radical reorganization at the tribal and subfamilial levels. His classification has been adopted in the present treatment of the Encyrtidae. In so doing, however, the placement of several genera remains undecided. These will be treated in a separate publication.

In this section the term "cosmopolitan" means the species is found throughout North America.

I thank D. Miller and M. Stoetzel (Systematic Entomology Laboratory, IIBIII, U. S. Dept. Agr., Beltsville, Maryland) for providing correct names for homopterous hosts. D. P. Annecke (Plant Protect. Res. Inst., Pretoria, South Africa) gave his advice on the placement of several species earlier referred to *Aphytus*.

The hosts cited in this section are only those reported for North America.

SUBFAMILY APHELININAE

Taxonomy: Ferriere, 1965. Faune de l'Europe Bassin Medit. 1: 1-206.—Nikol'skaya and Jashnosh, 1966. Akad. Nauk SSSR 91: 1-294.—Nikol'skaya and Jashnosh, 1968. Akad. Nauk SSSR 52: 3-42.

TRIBE APHELININI

Genus APHELINUS Dalman

Aphelinus Dalman, 1820. Svenska Vetensk. Akad., Handl. 21: 181.

Type-species: *Entedon abdominalis* Dalman. Monotypic.

Agonioneurus Westwood, 1833. Mag. Nat. Hist. 6: 122.

Type-species: *Agonioneurus basalis* Westwood. Monotypic.

Myina Nees, 1834. Hym. Ichn. Aff. Monog., v. 2, p. 189.

Type-species: *Myina abdominalis* Nees. Designated by Gahan and Fagan, 1923.

Eriophilus Haldeman, 1851. Pa. Farm Jour. 1: 130.

Type-species: *Eriophilus mali* Haldeman. Monotypic.

Anozus Foerster, 1856. Hym. Stud., v. 2, p. 84.

Type-species: *Anozus siphonophorae* Ashmead. By subsequent monotypy.

Misina Rondani, 1870. Arch. Zool. Anat. e Fisiol. (2) 2: 11. Erroneous subsequent spelling.

This genus is cosmopolitan and consists of approximately 45 described species which are primarily internal parasites of aphids. Some species are useful in biological control of aphid pests.

Taxonomy: Mercet, 1912. Trab. Mus. Cien. Nat. 10 (1): 1-306. —Kurdjumov, 1913. Rev. Russ. d'Ent. 13 (2): 266-270. —Girault, 1913. Queensland Mus., Mem. 2: 183-184. —Girault, 1915. Genus APHYTIS Howard

Aphytis Howard, 1900. Canad. Ent. 32 (6): 168.

Type-species: *Aphytis Chilensis* Howard. Monotypic.

Prospaphelinus DeGregorio, 1914. Agr. Siciliana, Ann. 3 (4): 406.

Type-species: *Prospaphelinus silvestrii* DeGregorio. Monotypic.

About 90 species of *Aphytis* are known. They are primary external parasites of armored scale insects and some species are important biological control agents of various diaspidine pests.

Taxonomy: Mercet, 1932. Eos 8 (4): 353-365. —De Santis, 1948. La Plata Rev. Mus. Zool. (n. s.) 5: 113-138. —Compere, 1955. Calif. Univ., Pubs. Ent. 10 (4): 271-320. —Quednau, 1964. So. Africa Ent. Genus CENTRODORA Foerster

Centrodora Foerster, 1878. *Naturh. Ver. Rheinlande, Verh.* 35: 66.

Type-species: *Centrodora amoena* Foerster. Monotypic.

Paraphelinus Perkins, 1906. *Hawaii. Sugar Planters' Assoc. Expt. Sta., Div. Ent.*, Bul. 1 (8): 264.

Type-species: *Paraphelinus xiphidii* Perkins. Monotypic.

Proaphelinoides Girault, 1917. *Descr. Stellarum Nov.*, p. 4.

Type-species: *Proaphelinoides elongatiformis* Girault. Orig. desig.

Microeupelmus Otten, 1941. *Arb. Morph. Taxon. Ent.* 8 (4): 259.

Type-species: *Microeupelmus acridiphagus* Otten. Orig. desig.

Pechlaneria Soyka, 1948. *Ent. Nachr.* 2 (7): 46.

Type-species: *Pechlaneria alpina* Soyka. Orig. desig.

Centrodora is a cosmopolitan genus containing approximately 30 species. The species of *Centrodora* attack Orthoptera and Homoptera eggs, but at least one species is purported to parasitize Diptera and other Hymenoptera. A host-parasite catalog of *Centrodora* has been prepared by Hayat, 1974.

Taxonomy: Mercet, 1918. *Soc. Espan. Hist. Nat.*, Bol. 18: 103-109. —Mercet, 1930. *Eos* 6 (4): 287-295. —Annecke, 1965. *So. Africa Agr. Sci., Jour.* 8: 1133-1138. —Valentine, 1966. *New Zeal. Jour. Sci.* 9: 331-335. —Hayat, 1973. *Entomophaga* 18 (1): 41-46. —Hayat, 1974. *Polski Pismo Ent.* 44 (2): 287-298 (host-parasite catalog). —Graham, 1976. *Syst. Ent.* 1 (2): 135-136.

speciosissima (Girault). N. Y. s. to Va., w. to Ky., Ill. Host: *Conocephalus fuscus* (F.). *Conocephalus* sp., *Phytophaga destructor* (Say), *Harmolita tritici* (Fitch), *Platygaster zosine* Walk.

Agonioneurus locustarum Giraud, 1863. *Zool.-Bot. Gesell. Wien, Verhandl.* 13: 1278-1279. ♂, ♀. Questionable synonym.

Paraphelinus speciosissimus Girault, 1911. *N. Y. Ent. Soc., Jour.* 19 (3): 181-182. ♀.

Taxonomy: Gahan, 1934 (1933). U. S. Dept. Agr., Misc. Pub. 174: 124-128. — Erdos, 1958. *Folia Ent. Hungarica* 6: 165-184. — Nikol'skaya and Yashnosh, 1966. Opred. Fauny SSSR 91, pp. 156-161.

Biology: McConnell, 1916. Ent. Soc. Amer., Ann. 9 (1): 97-102. — Hill and Smith, 1928. Jour. Agr. Res. 36 (2): 153-155.

Morphology: Hill and Pinckney, 1940. U. S. Dept. Agr., Tech. Bul. 715: 5, 11-13.

Genus MARIETTA Motschulsky

Marietta Motschulsky, 1863. Soc. Nat. Imp. Moscou, Bul. 36 (2): 51.

Type-species: *Marietta leopardina* Motschulsky. Monotypic.

Perissopterus Howard, 1895. U. S. Dept. Agr., Div. Ent., Tech. Ser. 1: 20.

Type-species: *Aphelinus pulchellus* Howard. Orig. desig.

Pseudaphelinus Brethes, 1918. Soc. Rural Argentina, An. 53: 157.

Type-species: *Pseudaphelinus caridei* Brethes. Monotypic.

Paraphytis Compere, 1925. Amer. Ent. Soc., Trans. 51 (871): 129-130.

Type-species: *Paraphytis vittata* Compere. Orig. desig.

This cosmopolitan genus contains approximately 35 species. Most, if not all, are external hyperparasites associated with scale insects.

Taxonomy: Compere, 1936. Calif. Univ., Pubs. Ent. 6 (12): 277-322. — Nikol'skaya and Jashnosh, 1966. Opred. Fauny SSSR 91: 162-166. — Annecke and Insley, 1972. So. Africa Ent. Soc., Jour. 35 (1): 1-15.

carnesi (Howard). Del. s. to Va., Calif. Host: *Comperiella bifasciata* How. on *Lepidosaphes beckii* (Newm.) and *Quadraspidiotus perniciosus* (Comst.), *Plagiomerus diaspidis* Crawford on *Diaspis echinocacti* (Bouche).

Perissopterus carnisi Howard, 1910. Ent. News 21 (4): 162-163. ♀.

Biology: Azim, 1961. Mushi 35 (14): 107.

graminicola Timberlake. Md. s. to Fla., w. to Tex. Host: *Anagyrus antoninae* Timb. on unknown host.

Marietta graminicola Timberlake, 1925. Hawaii. Ent. Soc., Proc. 6 (1): 180-184. ♂, ♀.

Biology: Dean and Schuster, 1958. Jour. Econ. Ent. 51 (3): 364.

javensis (Howard). Calif.? Adventive, establishment questionable. Host: *Coccophagus lycimnia* (Wlkr.), *Microterys flavus* (Howard).

Perissopterus javensis Howard, 1907. U. S. Dept. Agr., Bur. Ent., Tech. Ser. 12 (4): 87, 88. ♂, ♀.

Biology: Timberlake, 1913. Jour. Econ. Ent. 6 (3): 300.

mexicana (Howard). N. Y. s. to Va., Calif. Host: *Metaphycus lounsburyi* How., *Signiphora merceti* Malen. Also on undetermined parasites of *Coccus hesperidum* L., *Lecanium nigrofasciatum* Perg., *Lepidosaphes ulmi* (L.), *Quadraspidiotus perniciosus* (Comst.). *Perissopterus mexicanus* Howard, 1895. U. S. Dept. Agr., Div. Ent., Tech. Ser. 1: 21-23. ♂, ♀.

Biology: Smith, 1933. Ent. Soc. Amer., Ann. 26 (3): 525. — Essig, 1931. Hist. of Ent., pp. 348, 349, 354. — Flanders, 1940. Ent. Soc. Amer., Ann. 33 (2): 252. — Cox, 1942. Jour. Econ. Ent. 35 (5): 700-701. — DeBach *et al.* 1958. Jour. Econ. Ent. 51 (1): 115.

pulchella (Howard). Cosmopolitan. Ecology: Attacking undetermined parasites on *Chionaspis americana* Johns., *C. pinifoliae* (Fitch), *Lecanodiaspis* sp. on cottonwood and willow, *Pseudaulacaspis pentagona* (Targ.-Tozz.), *Quadraspidiotus forbesi* (Johns.), *Q. juglansregiae* (Comst.), *Q. perniciosus* (Comst.).

Aphelinus pulchellus Howard, 1881. U. S. Dept. Agr., Ann. Rpt. for 1880, p. 356. ♀.

Biology: Felt, 1916. N. Y. State Mus. Bul. 180: 84. — Peterson, 1962. Canad. Ent. 94 (4): 740. — Willoughby and Kosztarab, 1974. Va. Polytech. Inst. St. Univ., Res. Div. Bul. 92: 24.

Genus MARLATTIELLA Howard

Marlattiella Howard, 1907. U. S. Dept. Agr., Bur. Ent., Tech. Ser. 12: 73.

Type-species: *Marlattiella prima* Howard. Orig. desig.

This genus is presently monotypic and widespread. The type-species attacks pear white scale.

Taxonomy: Rosen and DeBach, 1970. *Mushi* 43 (3): 39-44.

prima Howard. Md. Host: *Lopholeucaspis japonica* (Ckll.).

Marlattiella prima Howard, 1907. U. S. Dept. Agr., Bur. Ent. Tech. Ser. 12: 73.

Taxonomy: Tachikawa, 1962. *Shikoku Ent. Soc., Trans.* 7 (3): 74-79. — Nikol'skaya and Jashnosh, 1966. Opred. Fauny SSSR 91: 150.

Biology: Compere, 1936. *Calif. Univ., Pubs. Ent.* 6 (12): 279-281.

Genus MESIDIA Foerster

Mesidia Foerster, 1856. *Hym. Stud.*, v. 2, p. 30. No species included.

Type-species: *Mesidia pumila* Mayr. Subsequent monotypy.

This small Holarctic genus is composed of primary internal aphid parasites.

Foerster (1856) described *Mesidia* in a key but did not include any species. Subsequently, Mayr (1904) described *M. pumila* which was the first and only included species. Mercet (1928) indicated and Nowicki (1929) suggested that *pumila* was a junior synonym of *Myina annulipes* Walker. Graham (1961) was unable to find the type-specimen of *annulipes*, but on the basis of three collections of specimens agreeing with Walker's original description, Nowicki's examination of the type of *pumila*, and Mercet's illustration of the male antenna of the specimen thought to be *annulipes*, Graham concluded the two were synonymous.

Taxonomy: Mercet, 1928. *Soc. Espan. Hist. Nat., Bol.* 28: 507-512. — Nowicki, 1929. *Neue Beitr. Syst. Insektenk.* 4 (13-14): 160. — Graham, 1961. *Ent. Monthly Mag.* 97 (1164-1166): 140-142. — Ferriere, 1962. *Schweiz. Ent. Gesell., Mitt.* 35 (1-2): 139-143. — Ferriere, 1965. *Faune l'Europe Bassin Medit.* 1: 52-56. — Nikol'skaya and Jashnosh, 1966. Opred. Fauny SSSR 91: 153-156. — Graham, 1976. *Syst. Ent.* 1 (2): 143.

gillettei Howard. Ill., Colo. Host: *Brachycolus tritici* Gill.

Mesidia gillettei Howard, 1914. *Ent. Soc. Wash., Proc.* 16 (2): 80. ♀.

Taxonomy: Dozier, 1933. *Ent. Soc. Wash., Proc.* 35 (6): 90-91.

nigra Lagace. Calif. Introduced. Host: *Iziphya punctata* Hille Ris Lamb.

Mesidia nigra Lagace, 1969. *Ent. Soc. Amer., Ann.* 62 (3): 530-531. ♂, ♀.

Biology: Lagace, 1969. *Ent. Soc. Amer., Ann.* 62 (3): 532-536.

Genus TUMIDISCAPUS Girault

Tumidiscapus Girault, 1911. *N. Y. Ent. Soc., Jour.* 19 (3): 182.

Type-species: *Tumidiscapus flavus* Girault. Orig. desig.

Six species of *Tumidiscapus* have been described, with 4 from North America. The North American species attack tettigoniid and cercopid eggs.

Taxonomy: Gahan, 1932. *Ent. Soc. Amer., Ann.* 25 (4): 740-742. — Milliron, 1947. *Ent. Soc. Wash., Proc.* 49 (7): 193-197. — Hayat, 1974. *Polski Pismo Ent.* 44 (2): 294-295 (catalog).

cercopiphagus Milliron. Fla., Mich., Wis. Host: *Aphrophora saratogensis* (Fitch).

Tumidiscapus cercopiphagus Milliron, 1947. *Ent. Soc. Wash., Proc.* 49 (7): 193-195. ♂, ♀.

flavus Girault. Pa. w. to S. Dak., Tenn. Host: *Orchelimum vulgare* Harris, *Phytophaga destructor* (Say), *Lasioptera* sp. on *Muhlenbergia*.

Tumidiscapus flavus Girault, 1911. *N. Y. Ent. Soc., Jour.* 19 (3): 182-183. ♂.

orchelimumsis Gahan. Pa., Va., Ill. Host: *Orchelimum vulgare* Harris.

Tumidiscapus orchelimumsis Gahan, 1932. *Ent. Soc. Amer., Ann.* 25 (4): 741-742. ♂, ♀.

orthopterae Gahan. Fla. Host: Tettigoniid eggs on *Andropogon abbreviatus*.

Tumidiscapus orthopterae Gahan, 1919. *U. S. Natl. Mus., Proc.* 55: 406-407. ♂, ♀.

TRIBE COCCOPHAGINI

Genus ABLERUS Howard

Ablerus Howard, 1894. U. S. Dept. Agr., Insect Life 7 (1): 7-8.

Type-species: *Centrodora clisiocampae* Ashmead. Monotypic.

Ablerus has about 35 species, is predominantly Australian in distribution, and is composed of hyperparasites.

Taxonomy: Girault, 1913. Queensland Mus., Mem. 2: 189-194. —Girault, 1932. New Pests from Australia (priv. pub., no page numbers). —De Santis, 1948. La Plata Mus. Rev. Zool. (n. s.) 5 (32): 198-212 (So. Amer. spp.). —Annecke and Insley, 1970. Bul. Ent. Res. 60 (2): 247-248.

Biology: Comber, 1967. New Zeal. Jour. Sci. 10 (3): 641.

americanus Girault. D. C. Host: *Diaspidiotus uvae* (Comst.).

Ablerus americanus Girault, 1916. Soc. Ent. 31 (8): 44. ♀.

clisiocampae (Ashmead). N. Y. s. to Fla., w. to La., Minn. Host: *Chionaspis furfur* (Fitch), *Melanaspis obscura* Comst., *Pseudaulacaspis pentagona* (Targ.-Tozz.), *Quadraspisidiotus forbesi* (Johns.), *Q. perniciosus* (Comst.).

Centrodora clisiocampae Ashmead, 1894. Ent. Soc. Wash., Proc. 3 (1): 10. ♀.

Biology: Baker, 1933. U. S. Dept. Agr., Cir. 295: 8-9. —Hodson, 1939. Ent. Soc. Amer., Ann. 32 (1): 131-136. —Hughes, 1960. Fla. Ent. 43 (2): 90-92.

perspeciosus Girault. D. C. Host: *Chrysomphalus aonidum* (L.), *Pseudaulacaspis pentagona* (Targ.-Tozz.).

Ablerus perspeciosus Girault, 1916. Ent. Soc. Amer., Ann. 9 (3): 292. ♀.

Azotus silvestrii Compere, 1926. Calif. Univ., Pubs. Ent. 4 (1): 9-11. ♀.

Genus ANERISTUS Howard

Aneristus Howard, 1895. Canad. Ent. 27 (12): 351.

Type-species: *Aneristus ceroplastae* Howard. Monotypic.

Aneristus is a pantropical genus predominantly found in South America and Africa. It is composed of less than 20 species that are internal parasites of soft-scale insects.

Taxonomy: Dozier, 1932. Puerto Rico Dept. Agr., Jour. 16 (2): 94-102. —Compere, 1936. Calif. Univ., Pubs. Ent. 6 (2): 285-288 (key). —Ghesquiere, 1949. Soc. Ent. de Belg., Bul. et Ann. 85 (5-6): 156-167 (catalog).

ceroplastae Howard. La. w. to Calif. Host: *Coccus hesperidum* L., *C. pseudomagnoliarum* (Kuw.), *Saissetia coffeeae* (Walk.).

Aueristus ceroplastae Howard, 1895. Canad. Ent. 27 (2): 351. ♀.

Coccophagus orientalis Howard, 1896. U. S. Natl. Mus., Proc. 18: 633-634. ♀.

Taxonomy: Gahan, 1924. U. S. Natl. Mus., Proc. 64 (4): 13-14.

Biology: Smith and Compere, 1928. Calif. Univ., Pubs. Ent. 4 (9): 242, 246-247.

youngi Girault. La., Tex. Host: *Ceroplastes* sp. on *Chrysanthemum*, *Coccus hesperidum* L., *Saissetia coffeeae* (Walk.).

Anenistus(!) youngi Girault, 1917. Descr. Hym. Chalcidoid. Variorum Cum Observ. V, p. 11.

Genus ASPIDIOTIPHAGUS Howard

Aspidiotiphagus Howard, 1894. U. S. Dept. Agr., Insect Life 6 (3): 230.

Type-species: *Coccophagus citrinus* Craw. Monotypic.

Prospaltoides Brethes, 1914. Nunquam Otiosus, Buenos Aires, p. 12.

Type-species: *Prospaltoides howardi* Brethes. Monotypic. Considered a synonym of *citrinus* Craw.

Aspidiotiphagus is comprised of fewer than 10 species. It is cosmopolitan in distribution, and its members are internal primary parasites of armored-scale insects.

Taxonomy: Paoli, 1926. Soc. Ent. Ital., Bol. 58: 97-105. —Dozier, 1927. Puerto Rico Dept. Agr., Jour. 10 (3-4): 274-277. —Mercet, 1930. Rev. de Biol. y Forest. Limnologia 2 (B): 69-72. —Compere, 1936. Calif. Univ., Pubs. Ent. 6 (12): 294-295. —Alam, 1956. Roy. Ent. Soc. London, Trans. 108 (8): 359-363.

citrinus agilior Berlese. Va., Fla. Host: *Unaspis euonymi* (Comst.).

Aspidiotiphagus citrinus var. *agilior* Berlese, 1916. Redia 12 (1): 5, 7, 10. ♀.

citrinus citrinus (Craw). Cosmopolitan. Host: *Aonidiella aurantii* (Mask.), *A. citrina* (Coq.),

Aspidiota destructor Sign., *A. nerii* Bouche, *Carulaspis visci* (Schrank), *Chionaspis pinifoliae* (Fitch), *Chrysomphalus aonidum* (L.), *C. dictyospermi* (Morg.), *Coccus hesperidum* L., *Diaspidiotus aenylus* (Putn.), *Dynaspidiotus britannicus* (Newst.), *Diaspis bromeliae* (Kern.), *D. echinocacti* (Bouche), *Kuanaspis hikosani* (Kuw.), *Lepidosaphes beckii* (Newm.), *L. ulni* (L.), *Melanaspis tenebricosa* (Comst.), *Nuculaspis californica* (Col.), *Parlatoria oleae* (Colv.), *P. pergandei* Comst., *Pinaspis aspidistrae* (Sign.), *P. strachani* (Cooley), *Pseudoaonidia duplex* (Chlk.), *Pseudaulacaspis pentagona* (Targ.-Tozz.). The morphological form called *citrinus* may consist of sibling species.

Coccophagus citrinus Craw, 1891. Calif. State Bd. Hort., Bul. 57: 5.

Prospathoides howardi Brethes, 1914. Nunquam Otiosus, Buenos Aires, pp. 13-14.

Taxonomy: Howard, 1894. U. S. Dept. Agr., Insect Life 6 (3): 229-230.

Biology: Howard, 1895. U. S. Dept. Agr., Div. Ent., Tech. Ser. 1: 7, 31. —Isaac, 1905. Calif. State Comm. Hort., Bien. Rpt. 1: 95. —Essig, 1931. Hist. of Ent., pp. 341-342, 386. —Benassy, 1958. Morphology: Parker and Thompson, 1925. Ent. Soc. Amer., Ann. 18 (3): 387.

lounsburyi (Berlese and Paoli). Fla. Host: *Aonidiella aurantii* (Mask.), *Chrysomphalus aonidum* (L.), *C. dictyospermi* (Morg.).

Prospaltella lounsburyi Berlese and Paoli, 1916. Redia 11 (1-2): 305.

Taxonomy: Muma, 1959. Jour. Econ. Ent. 52 (4): 579. —Annecke, 1963. So. Africa Ent. Soc., Jour. 26 (1): 206.

Biology: Mathis, 1947. Fla. Ent. 29 (2-3): 33.

Genus AZOTUS Howard

Azotus Howard, 1898. Ent. Soc. Wash., Proc. 4 (2): 138.

Type-species: *Azotus marchali* Howard. Monotypic. Considered a synonym of *Encyrtus atomon* Walker.

Dimacrocerus Brethes, 1914. Nunquam Otiosus, Buenos Aires, p. 4.

Type-species: *Dimacrocerus platensis* Brethes. Orig. desig.

Azotus is a cosmopolitan genus consisting of fewer than 30 species that are usually hyper-parasites of armored-scale insects, whiteflies, and possibly beetles and cicada eggs according to Nikol'skaya (1952).

Taxonomy: Mercet, 1923. Soc. Espan. de Hist. Nat., Bol. 23 (9): 410-413. —Nowicki, 1926.

Polski Pismo Ent. 5 (1-2): 104-113 (Palearctic key). —Ferriere, 1927. Rev. Suisse de Zool. 34 (2): 57-59. —Alam, 1956. Roy. Ent. Soc. London, Trans. 108 (8): 358, 376-379. —Agarwal, 1964. Indian Acad. Sci., Proc. (B) 60: 326-331. —Annecke and Insley, 1970. Bul. Ent. Res. 60 (2): 237-247. —De Santis, 1974. Rev. Chilena Ent. 8 (1): 11-15 (argentinean spp.).

Biology: Nikol'skaya, 1952. Chalcid Fauna of USSR p. 295 (English translation 1963; p. 301).

americanus Dozier. Del. Host: *Lecanium corni* Bouche, *Lepidosaphes ulni* (L.).

Quadraspidiotus perniciosus (Comst.).

Azotus americanus Dozier, 1928. Ent. Soc. Wash., Proc. 30 (2): 36. ♂.

marchali Howard. D. C., Md., Va. Host: *Diaspidiotus uvae* (Comst.).

Azotus marchali Howard, 1898. Ent. Soc. Wash., Proc. 4 (2): 138-139. ♂.

Genus COCCOPHAGOIDES Girault

Coccophagooides Girault, 1915. Queensland Mus., Mem. 4: 58.

Type-species: *Coccophagus abnormicornis* Girault. Orig. desig.

Diaspiniphagus Silvestri, 1927. Lab. Zool. Gen. e Agr. Portici, Bol. 20: 35-36.

Type-species: *Prospalta similis* Masi. Orig. desig.

This genus consists of less than 10 species. One species, *C. utilis* Doutt, acts in concert with *Aphytis maculicornis* (Masi) to achieve biological control of the olive scale, *Parlatoria oleae* (Colv.), in California. This is an excellent example of multiple parasite importation success.

Taxonomy: Mercet, 1928. Soc. Espan. de Hist. Nat., Bol. 28: 511-512. —Nowicki, 1929. Neue Beitr. Syst. Insektenk. 4 (13-14): 158. —Compere, 1936. Calif. Univ., Pubs. Ent. 6 (12): 292-293. —Doutt, 1966. Hilgardia 37 (9): 219-231.

Genus COCCOPHAGUS Westwood

Coccophagus Westwood, 1833. London, Edinb. and Dublin Phil. Mag. and Jour. Sci. 3 (3): 344.

Type-species: *Eutedon scutellaris* Dalman. Desig. by Westwood, 1840.

Paracharitopus Brethes, 1913. Buenos Aires Mus. Nac. de Hist., Nat., An. 24: 105.

Type-species: *Paracharitopus lecanii* Brethes. Monotypic.

Onophilus Brethes, 1918. Soc. Rural Argentina, An. 53: 155.

Type-species: *Onophilus caridei* Brethes. Monotypic.

Parencarsia Mercet, 1930. Eos 6 (2): 198.

Type-species: *Coccophagus krygeri* Mercet. Orig. desig.

Coccophagus contains about 140 species and is worldwide in distribution. Some species have been important in biological control of lecaniine coccids.

- Taxonomy:** Girault, 1915. Queensland Mus., Mem. 4: 55-57. — Mercet, 1928. Soc. Espan. de Hist. Nat., Bol. 28: 509-510. — Mercet, 1930. Rev. de Biol. Forest. y Limnologia Ser. Genus ENCARSIA Foerster

Encarsia Foerster, 1878. Naturh. Ver. Rheinlande, Verh. 35: 65-66.

Type-species: *Encarsia Tricolor* Foerster. Orig. desig.

Doloresia Mercet, 1912. (Madrid) Mus. de Cien. Nat., Trab. 10: 294-295.

Type-species: *Doloresia filicornis* Mercet. Orig. desig.

The genus *Encarsia* is morphologically similar to *Prospaltella*. *Encarsia* consists of about 50 species distributed throughout the world. They are primary internal parasites of whiteflies and armored scale insects. Males of some species are purported to be hyperparasites on females of the same species.

Taxonomy: Howard, 1907. U. S. Dept. Agr., Bur. Ent., Tech. Bul. 12 (4): 76-79. —Nowicki, 1929. Neue Beitr. Syst. Insektenk. 4: 158-160. —Mercet, 1930. Eos 6 (2): 191-193. —Mercet, 1930. Rev. de Biol. quaintancei Howard. D. C. w. to Ill. Host: *Aleyrodes* sp. on *Polygonum*.

Encarsia quaintancei Howard, 1907. U. S. Dept. Agr., Bur. Ent., Tech. Ser. 12 (4): 79. ♀.

Biology: Dysart, 1966. Ent. Soc. Amer., Ann. 59 (1): 28-33.

variegata Howard. Fla. Host: *Paraleyrodes perseae* (Quaint.).

Encarsia variegata Howard, 1908. Ent. Soc. Wash., Proc. 10 (1-2): 64.

Biology: Morrill and Back, 1912. U. S. Dept. Agr., Bur. Ent., Bul. 102: 8.

Genus LOUNSBURYIA Compere and Annecke

Lounsburyia Compere and Annecke, 1961. So. Africa Ent. Soc., Jour. 24 (1): 28-29.

Type-species: *Coccophagus trifasciatus* Compere. Orig. desig.

This African genus of coccophagines consists of only a few species which are similar to *Coccophagus*. The type-species was imported into California for the biological control of the black scale, *Saissetia oleae* (Oliv.).

trifasciata (Compere). Calif. Introduced. Host: *Saissetia oleae* (Oliv.).

Coccophagus trifasciatus Compere, 1925. Calif. Univ., Pubs. Ent. 3 (3): 311-313. ♂, ♀.

Taxonomy: Compere, 1931. U. S. Natl. Mus., Proc. 78 (7): 1-132. —Compere and Annecke, 1961. So. Africa Ent. Soc., Jour. 24 (1): 28-32.

Biology: Cendana, 1937. Calif. Univ., Pubs. Ent. 6 (14): 372-379. —Flanders, 1942. Ecology 23: 120.

Genus PHYSCUS Howard

Physcus Howard. 1895. U. S. Dept. Agr., Div. Ent., Tech. Ser. 1: 43.

Type-species: *Coccophagus varicornis* Howard. Monotypic.

Encyrtophyscus De Santis, 1948. La Plata Mus. Rev., Zool. (n. s.) 5: 192-193.

Type-species: *Physcus flavoflagellatus* De Santis. Orig. desig.

Physcus consists of about 40 species distributed throughout the world. Females are internal parasites of scale insects; males develop as hyperparasites of females of their own species (sometimes called facultative adelphoparasitism) or on other primary parasites (sometimes called heterotrophic arrhenoparasitism).

Taxonomy: Howard, 1914. Ent. Soc. Wash., Proc. 16 (2): 82-84. —Mercet, 1930. Rev. de Biol. Forest. y Limnologia 2 (B): 61-63. —De Santis, 1940. La Plata Univ. Nac., Fac. Agr. Rev. 24 (3): 29-44. —Erdos, 1958. Folia Ent. Hungarica (n. s.) 11 (5): 85. —Compere and Annecke, 1961. So. Africa Ent. Soc., Jour. 24 (1): 20-26. —Agarwal, 1964. Indian Acad. Sci., Proc. (B) 60: 320-324. —Jashnosh, 1968. Ent. Rev. 47 (1): 117-124. —Jashnosh, 1973. Ent. Rev. 52 (4): 578-585. —Graham, 1976. Syst. Ent. 1 (2): 144.

Biology: Jashnosh, 1968. Ent. Rev. 47 (1): 117-124. —Fisher, 1961. Jour. Econ. Ent. 54 (3): 444. —Williams, 1971. Bul. Ent. Res. 61 (3): 463-484.

flaviventris Howard. Tex. Ecology: Associated with *Antonina graminis* (Mask.). Introduced. *Physcus flaviventris* Howard, 1910. Ent. News 21 (4): 162. ♀.

fulvus Compere and Annecke. Calif. Introduced. Host: *Lepidosaphes beckii* (Newm.).

Physcus fulvus Compere and Annecke, 1961. So. Africa Ent. Soc., Jour. 24 (1): 21-23. ♂, ♀.

Biology: Flanders, 1953. Lab. Zool. Gen. e Agr. Portici, Bol. 33: 22 (as *Physcus* "B").

—Clausen, 1956. U. S. Dept. Agr., Tech. Bul. 1139, p. 122 (sp. "B").

howardi Compere. Calif. Host: *Nuculaspis californica* (Col.).

Physcus howardi Compere, 1928. Calif. Univ., Pubs. Ent. 4 (8): 223. ♂, ♀.

stanfordi Howard. Calif. Host: *Stramenaspis kelloggi* (Col.).

Physcus stanfordi Howard, 1914. Ent. Soc. Wash., Proc. 16 (2): 84. ♀.

testaceus Masi. Calif. Introduced, possibly established. Host: *Lepidosaphes ulmi* (L.).

Lepidosaphes sp.

Physcus testaceus Masi, 1909. Lab. Zool. Gen. e. Agr. Portici, Bol. 4: 36-37. ♀.

Biology: Flanders, 1957. Jour. Econ. Ent. 50 (2): 171-172.

varicornis (Howard). Que. s. to Fla., w. to Wis., s. to Neb., Calif. Host: *Chionaspis americana*

Johns., *C. furfura* (Fitch), *C. pinifoliae* (Fitch), *Diaspidiotus acyclus* (Putn.), *D. uwae* (Comst.), *Lecanium nigrofasciatum* Perg., *Melanaspis obscura* (Comst.), *Nuculaspis californica* (Col.), *Quadrapsidiotus jugalnsregiae* (Comst.), *Q. perniciosus* (Comst.).

Coccophagus varicornis Howard, 1881. U. S. Dept. Agr., Ann. Rept. for 1880, p. 360. ♀.

Physcus variicornis Dalla Torre, 1898. Cat. Hym., 5: 226. Unjustified emendation.

Taxonomy: Girault, 1911. N. Y. Ent. Soc., Jour. 19 (3): 183.

Biology: Baker, 1933. U. S. Dept. Agr., Cir. 295: 8-9.

Genus PROSPALTELLA Ashmead

Prospalta Howard, 1894. U. S. Dept. Agr., Insect Life 7 (1): 6. Preoccupied by Walker, 1857.

Type-species: *Prospalta murtfeldiae* Howard. Monotypic.

Prospaltella Ashmead, 1904. Ent. Soc. Wash., Proc. 6 (2): 126. New name.

Mimatomus Cockerell, 1911. Ent. News 22 (10): 464.

Type-species: *Mimatomus peltatus* Cockerell. Monotypic.

The genus *Prospaltella* is cosmopolitan and contains about 40 species. Morphologically it resembles *Aspidiotiphagus* and *Encarsia*. Many species are primary internal parasites of scale insects and whiteflies, but some species have hyperparasitic males.

Taxonomy: Howard, 1908. Ent. Soc. Amer., Ann. 1 (4): 281-284. —Malenotti, 1917. Redia 12: 195-196. —Mercet, 1921. Real Soc. Espan. Hist. Nat. 50: 300, 304-308. —Silvestri, 1930.

TRIBE ERIAPORINI

Genus MYIOCNEMA Ashmead

Myiocnema Ashmead, 1900. Canad. Ent. 32 (11): 349.

Type-species: *Myiocnema Comperei* Ashmead. Monotypic.

Myiocnema is a monotypic genus found in the Oriental and Australian regions. It has been propagated in the laboratory in North America and may have become established here.

comperei Ashmead. Calif. Introduced, possibly established. Host: *Parasaissetia nigra* (Nietn.).

Myiocnema Comperei Ashmead, 1900. Canad. Ent. 32 (11): 349. ♀.

TRIBE PTEROPTRICINI

Genus ARCHENOMUS Howard

Archenomus Howard, 1898. Ent. Soc. Wash., Proc. 4 (2): 136-137.

Type-species: *Archenomus bicolor* Howard. Monotypic.

Pteroptrichoides Fullaway, 1913. Hawaii. Sugar Planters' Assoc. Expt. Sta., Div. Ent., Ann. Rept. 1912, pp. 27-28.

Type-species: *Pteroptrichoides perkinsi* Fullaway. Orig. desig.

Pseudopteroptix Fullaway, 1918. Hawaii. Ent. Soc., Proc. 3 (5): 464.

Type-species: *Pseudopteroptix imitatrix* Fullaway. Monotypic.

Less than 15 species of *Archenomus* are known. They are parasites of armored scale insects.

bicolor Howard. Va. s. to Ga., Ohio, Oreg. Host: *Aspidiotus* sp. on sweet gum,

Pseudaulacaspis pentagona (Targ.-Tozz.).

Archenomus bicolor Howard, 1898. Ent. Soc. Wash., Proc. 4 (2): 137-138. ♂, ♀.

Biology: Sorokina, 1971. Ent. Rev. 50 (3): 310, 315, 316.

imitatrix (Fullaway). Fla. Adventive. Host: *Howardia bioclavis* (Comst.).

Pseudopteroptix imitatrix Fullaway, 1918. Hawaii. Ent. Soc., Proc. 3 (5): 464.

Genus ERETMOCERUS Haldeman

Eretmocerus Haldeman, 1850. Amer. Jour. Sci. Arts (2) 9: 111.

Type-species: *Eretmocerus corni* Haldeman. Monotypic.

Ricinusa Risbec, 1951. Mem. Inst. Fr. Africa Noire 13: 403.

Type-species: *Ricinusa aleurodiphaga* Risbec. Monotypic.

Eretmocerus contains about 25 species which are found throughout the world, but predominantly in the tropics. They are parasites of whiteflies and some have been important in biological control (see DeBach, 1974).

Taxonomy: Howard, 1895. U. S. Dept. Agr., Div. Ent., Tech. Ser. 1: 16. —Mercet, 1931. Eos 7 (4): 395-399. —Dozier, 1932. Ent. Soc. Wash., Proc. 34 (7): 112-118. —Compere, 1936. Calif. Univ., Publ. Ent. 6 (12): 316-321. —Tachikawa, 1962. Shikoku Ent. Soc., Trans. 7 (3): 73. —Yoshimoto, 1965. Pacific Insects 7 (4): 690-691. —Gerling, 1969. Lab. Ent. Agr. Portici, Bol. 27: 79-87. —Gerling, 1970. So. Africa Ent. Soc., Jour. 33 (2): 325-329. —Hayat, 1972. Entomophaga 17 (1): 99-106. —Gerling, 1972. Ent. Ber. 32 (8): 156-161.

Biology: DeBach, 1974. Biol. Control by Nat. Enem., pp. 140-143, 167, 202.

californicus Howard. Calif. Host: *Aleyrodes* sp. on *Quercus agrifolia*.

Eretmocerus californicus Howard, 1895. U. S. Dept. Agr., Div. Ent., Tech. Ser. 1: 16-17. ♂, ♀.

corni Haldeman. N. Y., N. J., Pa. Host: *Trialeurodes packardi* (Morr.).

Eretmocerus corni Haldeman, 1850. Amer. Jour. Sci. Arts (2) 9: 110.

Taxonomy: Howard, 1895. U. S. Dept. Agr., Div. Ent., Tech. Ser. 1: 16.

haldemani Howard. Fla. w. to Calif., Ill. Host: *Aleyrodes* spp. on *Ambrosia*, *Erigonum*, *Hardenbergia*, *Quercus*, and *Solidago*; *Aleuroplatus coronatus* (Quaint), *Aleurothrixus floccosus* (Mask.), *Trialeurodes abutilonea* (Hald.), *T. vaporariorum* (Westw.).
Eretmocerus haldemani Howard, 1908. Ent. Soc. Wash., Proc. 10 (1-2): 65.

Biology: Watson and Berger, 1932. Fla. Agr. Expt. Sta., Ext. Bul. 67: 56-57. —Watson and Berger, 1937. Fla. Agr. Expt. Sta., Ext. Bul. 88: 53-55. —Dysart, 1966. Ent. Soc. Amer., Ann. 59 (1): 28-33. —Gerling, 1967. Ent. Soc. Amer., Ann. 60 (6): 1306-1321.

illinoiensis Dozier. Ill.

Eretmocerus illinoiensis Dozier, 1932. Ent. Soc. Wash., Proc. 34 (7): 115. ♂.

portoricensis Dozier. Fla. Host: *Aleurothrixus floccosus* (Mask.).

Eretmocerus portoricensis Dozier, 1932. Ent. Soc. Wash., Proc. 34 (7): 115-116. ♀.

SUBFAMILY SIGNIPHORINAE

The names Signiphoridae and Thysanidae have been used interchangeably. *Thysanus* Walker is older (1840) and Thysanidae was used in the 1951 edition of the catalog. Signiphorinae is used here because it is the commonly used name. *Signiphora* Ashmead and *Thysanus* have been synonymized. However, Rozanov (1965) and others have shown that the genera are distinct. The Signiphorinae were characterized by Howard (1894).

De Santis (1968) divided the Signiphoridae into the Signiphorinae and Thysaninae. His sub-families have been retained as tribes.

Taxonomy: Howard, 1894. U. S. Dept. Agr., Insect Life 6 (3): 234. —Girault, 1913. U. S. Natl. Mus., Proc. 45: 189-233. —Mercet, 1916. Soc. Espan. de Hist. Nat., Bol. 16: 519-533. —Mercet, 1917. Rev. aleyrodis Ashmead. Pa., Tex., Calif. Host: *Aleuroplatus coronatus* (Quaint.), *Chrysomphalus aonidum* (L.), *C. dictyospermi* (Morgan).

Signiphora aleyrodis Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 409, 412. ♀.

aspidioti Ashmead. Ga.

Signiphora aspidiota Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 410, 412. ♀.

boringensis Quezada, DeBach and Rosen. Calif. Introduced, possibly established. Host:

Aspidiota destructor Sign., *Diaspis echinocacti* (Bouche).

Signiphora boringensis Quezada, DeBach and Rosen, 1973. Hilgardia 41 (18): 549-552. ♂,
♀.

Biology: Quezada *et al.*, 1973. Hilgardia 41 (18): 543-604.

- citrifolii* (Ashmead). Florida. Host: *Aleuroplatus coronatus* (Quaint.), *A. gelatinosus* (Ckll.), *Aleyrodes* sp. on *Quercus agrifolia*.
Signiphora Citrifolii Ashmead, 1880. Orange Insects, p. 66. ♀.
- coquilletti* Ashmead. N. Y. s. to Fla., Calif. Host: *Aleyrodes* sp., *Diaspis boisduvali* Sign.
Signiphora coquilletti Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 409, 412. ♀.
- flava* Girault. Calif. Host: *Aspidiotus spinosus* Comst., *Hemiberlesia rapax* (Comst.).
Signiphora flava Girault, 1913. U. S. Natl. Mus., Proc. 45: 213-214. ♀.
- flavella* Girault. Fla. w. to Tex. Host: *Hemiberlesia lataniae* Sign., *Aspidiotus* sp.
Signiphora flavella Girault, 1913. U. S. Natl. Mus., Proc. 45: 214-215. ♀.
Signiphora basilica Girault, 1913. U. S. Natl. Mus., Proc. 45: 215. ♀.
- flavopalliata* Ashmead. Ga., Fla. w. to La., Calif. Ecology: This species is apparently hyperparasitic. Host: *Aleyrodes* sp., *Aonidiella aurantii* (Mask.), *A. citrina* (Coq.), *Chionaspis* sp. on *Magnolia*, *Chrysomphalus dictyospermi* (Morg.), *Hemiberlesia lataniae* (Sign.), *H. rapax* (Comst.), *Lepidosaphes beckii* (Newm.), *L. gloveri* (Pack.), *Prospaltella* sp., *Pseudoaonidia duplex* (Ckll.).
Signiphora flavopalliatus Ashmead, 1880. Orange Insects, pp. 29, 31. ♀. As *flavo-palliatus* on p. 31.
- Biology: Muma, 1959. Jour. Econ. Ent. 52 (4): 577-587. — Hughes, 1960. Fla. Ent. 43 (2): 90.
- louisianae* (Dozier). Fla. w. to La. Host: *Hemiberlesia lataniae* Sign.
Thysanus louisianae Dozier, 1933. Ent. Soc. Wash., Proc. 35 (6): 100. ♂.
- merceti* Malenotti. La., Calif. Host: *Chrysomphalus dictyospermi* (Morgan), *Hemiberlesia lataniae* (Sign.), *H. rapax* (Comst.).
Signiphora merceti Malenotti, 1917 (1916). Redia 12 (1-2): 181-182. ♀.
- Taxonomy: Malenotti, 1916. Soc. Espan. de Hist. Nat., Bol. 16: 529.
- Biology: Cressman, 1933. Jour. Econ. Ent. 26 (3): 704.
- occidentalis* Howard. Fla., Calif. Host: *Aleyrodes* sp., *Aonidiella aurantii* (Mask.), *A. citrina* (Coq.), *Hemiberlesia lataniae* (Sign.), *Quadraspidiotus juglansregiae* (Comst.), *Lepidosaphes gloveri* (Pack.).
Signiphora occidentalis Howard, 1894. U. S. Dept. Agr., Insect Life 6 (3): 233, 235. ♂, ♀.
- thoreauini* Girault. Calif. Host: *Aspidiotus hederae* (Vallot).
Signiphora thoreauini Girault, 1916. Psyche 23 (2): 41. ♀.
- townsendi* Ashmead. D. C., Tex. Host: *Aleyrodes* sp., *Hemiberlesia lataniae* (Sign.), *Pseudaulacaspis pentagona* (Targ.-Tozz.), *Quadraspidiotus perniciosus* (Comst.).
Signiphora townsendi Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 410, 412. ♀.

TRIBE THYSANINI

Genus CHARTOCERUS Motschulsky

Chartocerus Motschulsky, 1859. Etudes Ent. 8: 171-172.

Type-species: *Chartocerus musciformis* Motschulsky. Monotypic.

Signiphora subg. *Matritia* Mercet, 1916. Soc. Espan. de Hist. Nat., Bol. 16: 523.

Type-species: *Signiphorina conjugalis* Mercet. Orig. desig. Boucek (in Peck *et al.*, 1964) synonymized *Xana* with *Matritia*.

Xana Kurdjumov, 1917 (1916). Jour. Appl. Ent. 1 (1): 80-81.

Type-species: *Xana nigra* Kurdjumov. Monotypic. Junior secondary homonym of *Signiphora nigra* Ashmead, 1900. I have not seen the type-specimen of *Chartocerus (Xana) niger* (Kurdjumov). If the synonymy of Rozanov (1965) is correct, a replacement name for Kurdjumov's species must be proposed.

Signiphorina Nikol'skaya, 1950. Doklady Akad. Nauk. SSSR 75 (2): 321.

Type-species. *Signiphorina mala* Nikol'skaya. Monotypic.

Chartocerus contains about 10 species that parasitize various Homoptera and Diptera.

Taxonomy: De Santis, 1968. Rev. Fac. Agron. La Plata 44 (1): 11-13. — Hayat, 1970.

Entomophaga 15 (4): 388, 390-399.

- dactylopii** (Ashmead). Tex. w. to Calif. Host: *Phenacoccus solenopsis* Tins., *Leucopis* sp. predaceous on *Phenacoccus gossypii* Towns. and Ckll., *Pseudococcus ephedrae* (Coq.). *Signiphora dactylopii* Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 410. ♀.
- elongatus** (Girault). N. J. s. to Ga., w. to S. Dak., Calif. Host: *Coccus hesperidum* L., *Pseudococcus comstocki* (Kuw.), coccid on *Muhlenbergia*, *Acerophagus notativentris* (Gir.), *Achrysonophagus modestus* Timb., *Anagyrus yuccae* (Coq.), *Clausenia purpurea* (Ishii), *Pseudoleptomastix squammulata* Gir., *Tetrastichus minutus* (How.), *Zarhopalus corvinus* Gir. *Neosigniphora elongata* Girault, 1916. Psyche 23 (2): 41-42. ♀.
- Taxonomy:** Timberlake, 1924. Calif. Univ., Pubs. Ent. 3 (2): 246-248. — Novitzky, 1954. Univ. Milano Bol. di Zool. Agr. e Bach. 20: 207. — Ferrière, 1957. Opusc. Zool. 10: 6.
- Biology:** Clausen, 1924. Calif. Univ., Pubs. Ent. 3 (2): 257-266, 281-284. — Clancy, 1944. Jour. Econ. Ent. 37 (3): 451.
- fasciatus** (Girault). Tex. w. to Calif. Host: *Coccus viridis* Green, *Melanaspis lilacina* (Ckll.), *Parasaissetia nigra* (Nietn.). *Signiphora fasciata* Girault, 1913. U. S. Natl. Mus., Proc. 45: 206, 219-220, 221, 229. ♂, ♀.
- Biology:** Arnaud, 1959. Ent. News 70 (6): 163 (primary parasite).
- mexicanus** (Ashmead). Calif. Host: *Aspidiotus hederae* (Vallot). *Signiphora mexicana* Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 411. ♀.
- niger** (Ashmead). N. Y. s. to Fla., Ill., Calif. Host: *Aphytus lounsburyi* (How.), *Chrysomphalus aonidum* (L.), *Clausenia purpurea* Ishii, *Coccus hesperidum* L., *Pseudococcus comstocki* (Kuw.), *Leptostomastidea abnormis* (Gir.), *Saissetia oleae* (Oliv.). *Signiphora nigra* Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 410. ♀.
- Taxonomy:** Smith and Compere, 1928. Calif. Univ., Pubs. Ent. 4 (9): 242, 245, 332-334.
- Biology:** Compere, 1925. Calif. Univ., Pubs. Ent. 3 (3): 296. — Clancy, 1944. Jour. Econ. Ent. 37 (3): 451.
- nigrellus** (Girault). Tex. Host: *Melanaspis tenebricosus* (Comst.). *Signiphora nigrella* Girault, 1913. U. S. Natl. Mus., Proc. 45: 215. ♀.
- pulcher** (Girault). N. J. s. to N. C., Ill., Ark. Host: *Aulacaspis rosae* (Bouche), *Chionaspis americana* Johns., *Lecanium nigrofasciatum* Perg., *Pseudaulacaspis pentagona* (Targ.-Tozz.), *Quadraspis perniciosus* (Comst.). *Signiphora pulchra* Girault, 1913. U. S. Natl. Mus., Proc. 45: 215-217, 229. ♂, ♀.
- Signiphora nigrita* Girault, 1913. U. S. Natl. Mus., Proc. 45: 215.
- unifasciatus** (Ashmead). Ga., Fla. Host: *Ceropsylla sideroxyli* Riley. *Signiphora unifasciata* Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 410. ♀.

Genus THYSANUS Walker

Thysanus Walker, 1840. Ann. Nat. Hist. 4: 234.

Type-species: *Thysanus ater* Haliday. Monotypic.

Triphasius Foerster, 1856. Hym. Stud. v. 2, pp. 83, 84. Unnecessary new name.

Plastocharis Foerster, 1856. Hym. Stud. v. 2, p. 145. Unnecessary new name.

Neosigniphora Rust, 1913. Ent. News 24 (4): 164.

Type-species: *Neosigniphora nigra* Rust. Monotypic.

Species of *Thysanus* are hyperparasites of armored scale insects. Two species are known.

Taxonomy: Silvestread, 1918. Lab. Zool. Gen. e Agr. Portici, Bol. 12: 266-271. — Nikol'skaya, 1950. Doklady Akad. Nauk SSSR 75 (2): 319-321. — Ferrière, 1953. Schweiz. Ent. Gesell. Mitt. 26 (1): 5. — Yoshimoto, 1965. Pacific Insects 7 (4): 703-704. — Rozanov, 1965. Ent. Rev. 44 (4): 508-515. — Quezada, DeBach and Rosen, 1973. Hilgardia 41 (18): 543-604. — Subba Rao, 1974. Bul. Ent. Res. 64 (4): 525-531.

ater Haliday. Md. Ecology: Primary parasite attacking *Melanaspis obscura* (Comst.).

Thysanus ater Haliday, 1840. Ann. Nat. Hist. 4: 234.

SUBFAMILY TETRACNEMINAE

TRIBE ANAGYRINI

Genus ANAGYRUS Howard

Anagyrus Howard, 1896. U. S. Natl. Mus., Proc. 18: 638-639.

Type-species: *Anagyrus greeni* Howard. Monotypic.

Epidinocarsis Girault, 1913. Arch. f. Naturgesch. 79A (6): 83.

Type-species: *Epidinocarsis tricolor* Girault. Monotypic.

Anagyrus is distributed throughout the world; its species are parasites of mealybugs.

Taxonomy: Timberlake, 1924. Calif. Univ., Pubs. Ent. 3 (2): 224-231. — Ishii, 1928. Imp. Agr. Expt. Sta. Japan, Bul. 3 (2): 84-92. — Compere, 1939. Bul. Ent. Res. 30 (1): 3-7.

— Timberlake, 1941. B. P. Bishop Mus., Occas. Papers 16 (9): 218. — Compere, 1947. Calif. Univ., Pubs. Ent. 8 (1): 20-22. — Hoffer, 1953. Ochr. Piroy 8 (4): 84. — Tachikawa, 1956.

Mem. Ehime Univ., Sect 6. 1 (2): 138-141, 147-152. — Trjapitzin, 1968. Vses. Ent. Obshch., Trudy 52: 90-92. — Graham, 1969. Polskie Pismo Ent. 39 (2): 219-220.

antoninae Timberlake. Fla. w. to Tex. Host: *Antonina graminis* (Mask.).

Anagyrus (Epidinocarsis) antoninae Timberlake, 1920. Hawaii. Ent. Soc., Proc. 4 (2): 409-413. ♂, ♀.

Biology: Riherd, 1950. Fla. Ent. 33 (1): 18-22. — Riherd, 1951. Jour. Econ. Ent. 44 (4): 622-623.

— Clausen, 1956. U. S. Dept. Agr., Tech. Bul. 1139, pp. 4, 61, 75. — Questel and Genung, 1957. Fla. Ent. 40 (4): 123-125. — Dean and Schuster, 1958. Jour. Econ. Ent. 51 (3): 363-365.

— Dean, 1960. Jour. Econ. Ent. 53 (4): 694. — Huffaker, 1971. Biol. Control, pp. 228, 229. — DeBach, 1974. Biol. Control by Nat. Enem., p. 169.

clauseni Timberlake. Calif. Host: *Pseudococcus maritimus* (Ehrh.).

Anagyrus clauseni Timberlake, 1924. Calif. Univ., Pubs. Ent. 3 (2): 226-228. ♀.

fusciventris (Girault). Calif. Host: *Pseudococcus longispinus* (Targ.-Tozz.).

Epidinocarsis fusciventris Girault, 1915. Queensland Mus., Mem. 4: 144. ♀.

Anagyrus nigricornis Timberlake, 1919. Hawaii. Ent. Soc., Proc. 4 (1): 197-199. ♂, ♀.

Biology: Flanders, 1940. Jour. Econ. Ent. 33 (5): 757-758. — Flanders, 1940. Calif. Citrog. 25

(5): 146, 154-155. — Clausen, 1956. U. S. Dept. Agr., Tech. Bul. 1139, p. 75.

graminicola Dozier. Tex. Host: *Antonia graminis* (Mask.). This may be a synonym of *Cerchyssius pulchricornis* Howard, 1894.

Anagyrus graminicola Dozier, 1937. Puerto Rico Univ., Jour. Agr. 21 (2): 123. ♀.

nigritus (Howard). Calif.

Aphytus nigritus Howard, 1898. U. S. Natl. Mus., Proc. 21: 241, 243. ♀.

pallidipes Ashmead. N. Y. s. to Fla., w. to Tex.

Anagyrus pallidipes Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 354. ♂.

pseudococcii (Girault). Calif. Introduced. Host: *Pseudococcus citri* (Risso).

Epidinocarsis pseudococcii Girault, 1915. Entomologist 48: 185. ♂, ♀.

Biology: Flanders, 1939. Jour. Econ. Ent. 32 (6): 889. — Flanders, 1953. Jour. Econ. Ent. 46

(2): 268. — Bartlett and Lloyd, 1958. Jour. Econ. Ent. 51 (1): 92-93.

pulcher (Ashmead). Conn. s. to Fla.

Dinocarsis pulcher Ashmead, 1888. Ent. Amer. 4 (1): 17. ♀.

putonophilus Compere. Calif. Host: *Puto ambiguus* (Full.), *P. yuccae* (Coq.).

Anagyrus putonophilus Compere, 1947. Calif. Univ., Pubs. Ent. 8 (1): 20, 22. ♀.

Biology: Maple, 1947. Calif. Univ., Pubs. Ent. 8 (2): 45, 57-59.

smithi Doutt. Calif. Host: *Spilococcus implicatus* Ferris.

Anagyrus smithi Doutt, 1952. Hawaii. Ent. Soc., Proc. 14 (3): 401-402. ♂, ♀.

thyridopterygis (Ashmead). N. J. s. to Fla. Host: *Thyridopteryx ephemeraeformis* (Haw.)?

Host is probably an associated coccid.

Dinocarsis thyridopterygis Ashmead, 1886. Canad. Ent. 18 (5): 97. ♀.

townsendi (Howard). N. Mex. Host: *Pheuacoccus* sp. on cotton.

Aphytus townsendi Howard, 1898. U. S. Natl. Mus., Proc. 21: 243. ♀.

yuccae (Coquillett). Calif. Host: *Anisococcus crawii* (Coq.), *Pseudococcus maritimus* (Ehrh.), P. sp. on grapes, *Puto yuccae* (Coq.), *Achrysonophagrus modestus* Timb.

Blastothrix yuccae Coquillett, 1890. West. Amer. Scientist 7: 44. ♀.

Epidinocarsis subalbicornis Girault, 1916. Psyche 23 (2): 44-45. ♀.

Anagyrus ferrisi Compere, 1926. Calif. Univ., Pubs. Ent. 4 (1): 18-22. ♂, ♀.

Taxonomy: Gahan, 1949. Hawaii. Ent. Soc., Proc. 13 (3): 359-360.

Biology: Clausen, 1924. Calif. Univ., Pubs. Ent. 3 (2): 256-266, 274-276. —Maple, 1947. Calif. Univ., Pubs. Ent. 8 (2): 55-59.

Morphology: Maple, 1937. Ent. Soc. Amer., Ann. 30 (1): 146.

Genus ANATHRIX Burks

Anathrix Burks, 1952. N. Y. Ent. Soc., Jour. 60 (3): 179-180.

Type-species: *Anathrix argyrum* Burks. Orig. desig.

argyrum Burks. Que. s. to Va., Tex. Host: *Ferrisia virgata* (Ckll.).

Anathrix argyrum Burks, 1952. N. Y. Ent. Soc., Jour. 60 (3): 181-182. ♀.

Genus ANUSIA Foerster

Anusia Foerster, 1856. Hym. Stud. v. 2, p. 32. No species included.

Type-species: *Anusia nasicornis* Foerster. Desig. by Gahan and Fagan, 1923.

Taxonomy: Mercet, 1921. Fauna Iberica Himen. Fam. Encirtidos, pp. 87-89. —Graham, 1958.

Ent. Tidskr. 79 (3-4): 148-149. —Graham, 1969. Polskie Pismo Ent. 39 (2): 214.

neomexicana Ashmead. N. Mex. w. to Calif. Host: *Amonostherium lichtensisoides* (Ckll.).

Anusia neomexicana Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 348. ♀.

Genus APOANAGYRUS Compere

Apoanagyrus Compere, 1947. Calif. Univ., Pubs. Ent. 8 (1): 18.

Type-species: *Apoanagyrus californicus* Compere. Monotypic.

californicus Compere. Ariz., Calif. Host: *Pseudococcus solani* (Ckll.).

Apoanagyrus californicus Compere, 1947. Calif. Univ., Pubs. Ent. 8 (1): 18-19. ♂, ♀.

Biology: Maple, 1947. Calif. Univ., Pubs. Ent. 8 (2): 63-66.

Genus LEPTOMASTIDEA Mercet

Leptomastidea Mercet, 1916. Soc. Espan. de Hist. Nat., Bol. 16: 112.

Type-species: *Leptomastidea aurantiaca* Mercet. Monotypic.

Tanaomastix Timberlake, 1918. Calif. Univ., Pubs. Ent. 1 (8): 362-364.

Type-species: *Paraleptomastix abnormis* Girault. Orig. desig.

Less than fifteen species of *Leptomastidea* are known. All are thought to be primary internal parasites of mealybugs.

Taxonomy: Timberlake, 1923. Ent. Soc. Wash., Proc. 25 (3): 59. —Mercet, 1924. Soc. Espan. de Hist. Nat., Bol. 24: 252-258. —Mercet, 1921. Fauna Iberica, Himen., Encirtidos, pp. 7, 15-18, 27, 56, 64, 76, 107-114, 243. —Risbec, 1952. Mem. Inst. Sci. Madagascar, Ser. E, Ent. 2: 5, 10-15. —Ferriere, 1953. Schweiz. Ent. Gesell., Mitt. 26 (1): 17. —Trjaptizin, 1965. Ent. Rev. 44 (4): 517-518.

abnormis (Girault). Que. s. to Fla., w. to La., Calif. Host: *Pheuacoccus gossypii* Tnsd. and Ckll., *Planococcus citri* (Risso), *P. kraunhiae* (Kuw.).

Paraleptomastix abnormis Girault, 1915. Entomologist 48: 184-185. ♂, ♀.

Biology: Smith, 1917. Jour. Econ. Ent. 10 (2): 262-268. —Armitage, 1920. Calif. Dept. Agr., Monthly Bul. 9: 446. —Compere and Smith, 1932. Hilgardia 6 (17): 610-611. —McLeod, 1940 (1939). Ent. Soc. Ontario, Ann. Rept. 70: 65-66. —Maple, 1947. Calif. Univ., Pubs. Ent. 8 (2):

91-93. — Clausen, 1956. U. S. Dept. Agr., Tech. Bul. 1139, p. 109. — Huffaker, 1971. Biol. Control, p. 196.

claripennis (Timberlake). Calif. Host: *Dysmicoccus ryanii* (Coq.).

Tanaomastix claripennis Timberlake, 1918. Calif. Univ., Pubs. Ent. 1 (8): 363, 365-366. ♀.

Genus LEPTOMASTIX Foerster

Leptomastix Foerster, 1856. Hym. Stud. v. 2, pp. 34, 37. No species included.

Type-species: *Leptomastix histrio* Mayr. Subsequent monotypy.

Sterrhoecoma Foerster, 1856. Hym. Stud., v. 2, pp. 33, 36, 37.

Type-species: *Sterrhoecoma histrio* Foerster. Monotypic.

Stenoteryx Thomson, 1876 (1875). Hym. Scand., v. 4, pp. 115, 128.

Type-species: *Stenoteryx orbitalis* Thomson. Monotypic.

Calocerinella Girault, 1913. Wis. Nat. Hist. Soc., Bul. 11: 46.

Type-species: *Calocerinella trifasciata* Girault. Monotypic.

This rather large genus of internal parasites of pseudoceoids is poorly represented in North America.

Taxonomy: Ruschka, (1922). Zool.-Bot. Gesell. Wien, Verhandl. 72 (2): 12. — Compere, 1938.

Bul. Ent. Res. 29 (3): 323-325. — Compere, 1939. Bul. Ent. Res. 30 (1): 24. — Compere, 1939. Calif. Univ., Pubs. Ent. 7 (4): 57-58. — Kryger, 1950. Ent. Meddel. 26 (2): 107-108. — Risbec, 1952. Mem. Inst. Sci. Madagascar, Ser. E, Ent. 2: 15-19. — Trjapitzin, 1965. Ent. Rev. 44 (4): 518-520. — Graham, 1969. Polskie Pismo Ent. 39 (1): 216-219.

dactylopii Howard. Que. s. to La., Calif., Wash. Host: *Phenacoccus gossypii* Tnsd. and Ckll., *P. solani* Ferris, *Planococcus citri* (Risso), *Pseudococcus calceolariae* (Mask.), *P. comstocki* (Kuv.), *P. longispinus* (Targ.-Tozz.), *P. maritimus* (Ehrh.).

Leptomastix dactylopii Howard, 1885. U. S. Dept. Agr., Bur. Ent., Bul. 5: 23-24, 42. ♂, ♀.

Taxonomy: Compere, 1939. Calif. Univ., Pubs. Ent. 7 (4): 57-58.

Biology: Flanders, 1939. In Compere, Calif. Univ., Pubs. Ent. 7 (4): 58. — Watson, 1939.

Genus PARANUSIA Brethes

Paranusia Brethes, 1913. Buenos Aires Mus. Nac. de Hist. Nat., An. 24: 102.

Type-species: *Paranusia bifasciata* Brethes. Orig. desig.

Philoponectroma Brethes, 1913. Buenos Aires Mus. Nac. de Hist. Nat., An. 24: 104.

Type-species: *Philoponectroma pectinatum* Brethes. Orig. desig.

Gyranusia Brethes, 1920. Rev. Chile Hist. Nat. 24: 137.

Type-species: *Gyranusia porteri* Brethes. Orig. desig.

An unidentified species is found in California on *Sphaeralcea*.

Taxonomy: Timberlake, 1923. Ent. Soc. Wash., Proc. 25 (3): 60. — Timberlake, 1924. Calif.

Univ., Pubs. Ent. 3 (2): 225. — De Santis, 1950. La Plata Mus. Rev. Zool. (n. s.) 6: 54, 60-61.

Genus PARASTENOTERYS Girault

Parastenoterys Girault, 1915. Queensland Mus., Mem. 4: 165.

Type-species: *Parastenoterys punctatus* Girault. Orig. desig.

Parectromoides Girault, 1915. Queensland Mus., Mem. 4: 171.

Type-species: *Parectromoides magniscutellum* Girault. Orig. desig.

niveiclavata Girault. Md.

Parastenoterys niveiclavata Girault, 1917. Chalcidoidea Nova Marilandensis II, p. 1. ♀.

Taxonomy: Girault, 1920. U. S. Natl. Mus., Proc. 58: 191.

Genus PSEUDOLEPTOMASTIX Girault

Pseudoleptomastix Girault, 1915. Ent. Soc. Amer., Ann. 8 (3): 272.

Type-species: *Pseudoleptomastix squammulatus* Girault. Monotypic.

squammulata Girault. Calif. Host: *Amonostherium lichtensioides* (Ckll.), *Pseudococcus maritimus* (Ehrh.).

Pseudoleptomastix squammulatus Girault, 1915. Ent. Soc. Amer., Ann. 8 (3): 272. ♀.

Paraleptomastix notatus Girault, 1917. Entomologist 50: 38. ♀.

Pseudoleptomastix flatulescens Compere, 1926. Calif. Univ., Publs. Ent. 4 (1): 22-24. ♂, ♀.

Taxonomy: Timberlake, 1924. Calif. Univ., Publs. Ent. 3 (2): 232-235. — Compere, 1947. Calif. Univ., Publs. Ent. 8 (1): 17.

Biology: Clausen, 1924. Calif. Univ., Publs. Ent. 3 (2): 257-266. — Clausen, 1924. Calif. Univ., Publs. Ent. 3 (2): 277-279. — Maple, 1947. Calif. Univ., Publs. Ent. 8 (2): 112-113.

Genus RHOPUS Foerster

Rhopus Foerster, 1856. Hym. Stud., v. 2, pp. 34, 37, 151.

Type-species: *Eucyrtus piso* Walker. Orig. desig.

Xanthoencyrtus Ashmead, 1902. Canad. Ent. 34 (11): 302.

Type-species: *Xanthoencyrtus nigroclavatus* Ashmead. Monotypic.

Mirastymachus Girault, 1915. N. Y. Ent. Soc., Jour. 23 (3): 166.

Type-species: *Mirastymachus europaeus* Girault. Orig. desig.

Scelioencyrtus Girault, 1915. Queensland Mus., Mem. 4: 161.

Type-species: *Scelioencyrtus nigriclavatus* Girault. Orig. desig.

Pholidocerus Mercet, 1918. Soc. Espan. de Hist. Nat., Bol. 18 (3-4): 237-239.

Type-species: *Pholidoceras brachyptera* Mercet. Monotypic.

Pholidocerodes Ferrière, 1955. Lab. Zool. Gen. e Agr. Portici, Bol. 33: 358.

Type-species: *Pholidoceras parvula* Mercet. Monotypic.

This genus consists of approximately 30 species which are parasites of scale insects. The North American fauna has been poorly studied, but several species are known from Europe.

Taxonomy: Mercet, 1928. Eos 4 (1): 5-7. — Hoffer, 1955. Acta Mus. Nat. Pragae 11 (1): 17-22.

— Ghesquiere, 1956. Lab. Zool. Gen. e Agr. Portici, Bol. 33: 683-692. — Ghesquiere, 1957.

Neotropica 3 (10): 17-22. — Ting-hsi, 1961. Ent. Rev. 40 (1): 72-74. — De Santis, 1965. Com. Invest. Cient. Prov. Buenos Aires, An. 4: 53-56. — Graham, 1969. Polskie Pismo Ent. 39 (2): 220-224.

Biology: Webster, 1903 (1902). Ind. Acad. Sci., Proc., p. 103.

americanus (Girault). D. C., Del., Oreg.

Mirastymachus americanus Girault, 1915. N. Y. Ent. Soc., Jour. 23 (3): 167. ♀.

nigroclavatus (Ashmead). Va. w. to Nebr., S. Dak. Host: Coccid on *Panicum* sp., *Pseudaonidia* sp. on *P. xalapense*.

Xanthoencyrtus nigroclavatus Ashmead, 1902. Canad. Ent. 34 (11): 302. ♀.

Biology: Webster, 1903 (1902). Ind. Acad. Sci., Proc. p. 103.

TRIBE CHRYSOPLATYCYERINI

Genus CHRYSOPLATYCYERUS Ashmead

Rileya Howard, 1888. In Smith, Ent. Amer. 4 (4): 80. Preocc. by *Rileya* Ashmead, 1888.

Type-species: *Rileya splendens* Howard. Monotypic.

Chrysoplatycerus Ashmead, 1889. Canad. Ent. 21 (1): 38. N. name.

This small genus consists of fewer than five described species. The species of *Chrysoplatycerus* are parasites of pseudococcids and thus may be of some importance in biological control.

Taxonomy: Timberlake, 1922. U. S. Natl. Mus., Proc. 61 (2): 1-10.

ferrisi Timberlake. Calif. Host: *Anisococcus adenostomae* (Ferris).

Chrysoplatycerus ferrisi Timberlake, 1922. U. S. Natl. Mus., Proc. 61 (2): 6. ♂, ♀.

Biology: Maple, 1947. Calif. Univ., Pubs. Ent. 8 (2): 115.

howardii Ashmead. Fla. Host: *Pseudococcus* sp.

Chrysoplatycerus howardii Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 405. ♀.

splendens (Howard). Que. (greenhouses), Fla., Calif. Host: *Dysmicoccus ryani* (Coq.),

Planococcus citri (Risso), *Pseudococcus longispinus* (Targ.-Tozz.), *P. maritimus* (Ehrh.).

Rileya splendens Howard, 1888. In Smith, Ent. Amer. (4) 4: 80. ♀.

Biology: Clausen, 1924. Calif. Univ., Pubs. Ent. 3 (2): 256-266, 279. —Clancy, 1944. Jour.

Econ. Ent. 37 (3): 450. —Maple, 1947. Calif. Univ., Pubs. Ent. 8 (2): 115. See Peck (1963) for an extensive bibliography of this species.

TRIBE ERICYDNINI

Genus CLAUSENIA Ishii

Clausenia Ishii, 1923. Japan Dept. Agr. and Com., Imp. Plant Quar. Sta. Bul. 3: 98-100.

Type-species: *Clausenia purpurea* Ishii. Orig. desig.

Clausenia consists of less than a dozen described species, most of which are African. With more research on the group it should prove to be considerably larger. All known species are parasites of mealybugs. At least one species, *C. purpurea*, is exceptionally important in biological control of the Comstock mealybug in the United States and Canada.

Taxonomy: Rosen, 1965. Roy. Ent. Soc. London, Proc. (B) 34 (5-6): 61-64. —Kerrich, 1967.

Brit. Mus. (Nat. Hist.) Ent., Bul. 20 (5): 181-188. —Annecke and Mynhardt, 1970. Ent. Soc. So. Africa, Jour. 33 (1): 42-47.

purpurea Ishii. Ont. s. to Va. Introduced. Host: *Pseudococcus comstocki* (Kuw.).

Clausenia purpurea Ishii, 1923. Japan Dept. Agr. and Com., Imp. Plant Quar. Sta., Bul. 3: 100-101. ♂, ♀.

Biology: Cox, 1940. Jour. Econ. Ent. 33 (3): 446. —Rivnay, 1942. Bul. Soc. Fouad Ier Ent. 26:

1-19. —Clancy, 1944. Jour. Econ. Ent. 37 (3): 450-451. —Haeussler and Clancy, 1944. Jour. Econ. Ent. 37 (4): 503. —Hough, Clancy and Pollard, 1945. Jour. Econ. Ent. 38 (4): 423-425.

Morphology: Flanders, 1942. Ent. Soc. Amer., Ann. 35 (3): 252, 262.

TRIBE PAURIDIINI

Genus PAURIDIA Timberlake

Pauridia Timberlake, 1919. Hawaii. Ent. Soc., Proc. 4 (1): 206-207.

Type-species: *Pauridia peregrina* Timberlake. Orig. desig.

This monotypic genus has been employed in biological control programs against *Pseudococcus* spp. throughout the world.

peregrina Timberlake. Tex., Calif. Introduced. Host: *Planococcus citri* (Risso), *P. kraunhiae* (Kuw.), *Pseudococcus maritimus* (Ehrh.).

Pauridia peregrina Timberlake, 1919. Hawaii. Ent. Soc. Proc. 4 (1): 208. ♂, ♀.

Biology: Armitage, 1920. Calif. Dept. Agr., Monthly Bul. 9: 446. —Essig, 1931. Hist. of Ent., pp. 361, 389. —Clausen, 1956. U. S. Dept. Agr., Tech. Bul. 1139, p. 36. —DeBach, 1964. Biol. Control Insect Pests Weeds, p. 442.

TRIBE RHINOENCYRTINI

Genus RHINOENCYRTUS Mercet

Rhinoencyrtus Mercet, 1918. Soc. Espan. de Hist. Nat., Bol. 18 (3-4): 234-235.

Type-species: *Rhinoencyrtus malenotti* Mercet. Monotypic.

An unidentified species is found in Nebraska, Kansas, and Oklahoma.

Genus AENASIUS Walker

Aenasius Walker, 1846. Ann. and Mag. Nat. Hist. 17 (III): 181.

Type-species: *Encyrtus Hyettus* Walker. Orig. desig.

This genus holds about 25 species which seem to be exclusively Neotropical in distribution. All known species are presumed primary parasites of the genera *Pseudococcus*, *Phenacoccus* and *Puto*.

Taxonomy: Compere, 1937. Hawaii. Ent. Soc., Proc. 9 (3): 383-404. — Kerrich, 1967. Brit. Mus. (Nat. Hist.) Ent., Bul. 20 (5): 195-225.

advenus Compere. Fla.

Aenasius advena Compere, 1937. Hawaii. Ent. Soc., Proc. 9 (3): 384, 388-389, 393. ♂, ♀.

Aenasius ianthinus Compere, 1937. Hawaii. Ent. Soc., Proc. 9 (3): 388, 391, 393-394. ♀.

flandersi Kerrich. Calif. Ecology: On *Pittosporum*.

Aenasius flandersi Kerrich, 1967. Brit. Mus. (Nat. Hist.) Ent., Bul. 20 (5): 204-205, 221. ♀.

maplei Compere. Calif. Host: *Pluto yuccae* (Cog.).

Aenasius maplei Compere, 1937. Hawaii. Ent. Soc., Proc. 9 (3): 384, 390, 397. ♂, ♀.

Biology: Maple, 1947. Calif. Univ., Pubs. Ent. 8 (2): 55-57.

nitens Kerrich. Nebraska.

Aenasius nitens Kerrich, 1967. Brit. Mus. (Nat. Hist.) Ent., Bul. 20 (5): 211-212, 224. ♀.

paulistus Compere. California? Introduced, possibly established. Host: *Pseudococcus maritimus* (Ehrh.).

Aenasius paulistus Compere, 1937. Hawaii. Ent. Soc., Proc. 9 (3): 383-385, 401-403. ♂, ♀.

personatus Kerrich. Fla. Ecology: On *Hibiscus tiliaceus*.

Aenasius personatus Kerrich, 1967. Brit. Mus. (Nat. Hist.) Ent., Bul. 20 (5): 198, 200, 221. ♀.

Genus CHALCASPIS Howard

Chalcaspis Howard, 1895. U. S. Natl. Mus., Proc. 17: 606.

Type-species: *Chalcaspis pergandei* Howard. Monotypic.

Closely related to *Aenasius* but considerably smaller, *Chalcaspis* seems to have adapted itself to more xeric conditions than *Aenasius*. *Chalcaspis* consists of less than 10 species which are also mealybug parasites.

Taxonomy: Kerrich, 1967. Brit. Mus. (Nat. Hist.) Ent., Bul. 20 (5): 191-195.

arizonensis Girault. Ariz. Idaho, Mo., Wash., Calif. Host: *Phenacoccus solenopsis* Tinsley.

Chalcaspis arizonensis Girault, 1915. Ent. Soc. Amer., Ann. 8 (3): 280. ♀.

pergandei Howard. Mass. s. to D. C., S. Dak. s. to Tex.

Chalcaspis pergandei Howard, 1895. U. S. Natl. Mus., Proc. 17: 606. ♀.

phenacocci (Ashmead). Md. s. to Fla., w. to Iowa, Idaho, N. Mex., w. Calif.

Blepyrus phenacocci Ashmead, 1902. Canad. Ent. 34 (11): 301. ♂, ♀.

Biology: Maple, 1947. Calif. Univ., Pubs. Ent. 8 (2): 115.

TRIBE TETRACNEMINI

Genus CALOCERINUS Howard

Calocerinus Howard, 1892. U. S. Natl. Mus., Proc. 15: 362, 368.

Type-species: *Tetracnemus floridanus* Ashmead. Monotypic.

floridanus (Ashmead). Fla.

Tetracnemus(*l*) *floridanus* Ashmead, 1885. Amer. Ent. Soc., Trans. 12: Proc. p. xviii. ♂.

Generic name a lapsus for *Tetracnemus*.

Taxonomy: Girault, 1917. Descr. Stellarum Nov., p. 7.

Genus ARHOPOIDEUS Girault

Arhopoideus Girault, 1915. Queensland Mus., Mem. 4: 174-175.

Type-species: *Arhopoideus brevicornis* Girault. Monotypic.

Hungariella Erdos, 1946. Ann. Hist. Nat., Nat. Mus. Hung. 39: 144.

Type-species: *Hungariella piceae* Erdos. Orig. desig.

The taxonomic status of members of the genus *Arhopoideus* has been confused but recently clarified by the work of Tachikawa (1974) and Annecke (unpublished). Part of the problem stems from the misinterpretation of *Tetracnemus* Westwood. *Arhopoideus* is comprised of less than 10 species all of which are mealybug parasites.

Taxonomy: Erdos, 1955. Acta Zool. (Budapest) 1 (3-4): 216-218. — Hoffer, 1959. Mus. Nat. Pragae, Acta Ent. 33: 13-15. — Hoffer, 1960. Mus. Nat. Pragae, Acta Faun. Ent. 6: 101-102. — Kerrich, 1967. Brit. Mus. (Nat. Hist.) Ent., Bul. 20 (5): 147, 154-166. — Tachikawa and Valentine, 1971. Shikoku Ent. Soc., Trans. 11 (1): 21-30. — Tachikawa, 1974. Shikoku Ent. Soc., Trans. 12 (1-2): 23-31.

peregrinus (Compere). Calif. Introduced. Host: *Pseudococcus calceolariae* (Mask.), *P. longispinus* (Targ.-Tozz.), *P. maritimus* (Ehrh.).

Tetracnemus peregrinus Compere, 1939. Calif. Univ., Pubs. Ent. 7 (4): 59-61. ♂, ♀.

Biology: Flanders, 1940. Jour. Econ. Ent. 33 (5): 757. — Flanders, 1944. Jour. Econ. Ent. 37 (2): 308-309. — DeBach, 1949. Ecology 30 (1): 16-24. — Clausen, 1956. U. S. Dept. Agr., Tech. Bul. 1139, p. 130.

pretiosus (Timberlake). Calif. Host: *Pseudococcus calceolariae* (Mask.), *P. longispinus* (Targ.-Tozz.), *P. maritimus* (Ehrh.).

Tetracnemus pretiosus Timberlake, 1929. Calif. Univ., Pubs. Ent. 5 (1): 5-11. ♂, ♀.

Biology: Compere and Smith, 1932. Hilgardia 6 (17): 585, 601-605, 609-617. — Quayle, 1932. Calif. Agr. Expt. Sta., Bul. 542: 51. — Clancy, 1934. Calif. Univ., Pubs. Ent. 6 (8): 231-248. — Maple, 1947. Calif. Univ., Pubs. Ent. 8 (2): 114-115. — DeBach, 1949. Ecology 30 (1): 16-24. — Clausen, 1956. U. S. Dept. Agr., Tech. Bul. 1139, p. 130. — Bartlett and Lloyd, 1958. Jour. Econ. Ent. 51 (1): 92. — DeBach, 1974. Biol. Control by Nat. Enem., p. 138.

Genus TETRACNEMUS Westwood

Tetracnemus Westwood, 1837. Mag. Nat. Hist. 1: 258.

Type-species: *Tetracnemus diversicornis* Westwood. Monotypic.

Tetracladia Howard, 1892. U. S. Natl. Mus., Proc. 15: 367.

Type-species: *Tetracladia texana* Howard. Desig. by Ashmead, 1900.

Paracalocerinus Girault, 1915. Queensland Mus., Mem. 4: 142.

Type-species: *Paracalocerinus australiensis* Girault. Orig. desig.

Masia Mercet, 1920 (1919). Soc. Espan. de Hist. Nat., Bol. 19 (9-10): 470-472.

Type-species: *Masia bifasciatella* Mercet. Orig. desig.

Anusiella Mercet, 1923. Soc. Espan. de Hist. Nat., Bol. 23 (6): 287-289.

Type-species: *Anusiella heydeni* Mercet. Orig. desig.

Placoceras Erdos, 1946. Frag. Faun. Hung. 9: 1.

Type-species: *Placoceras coloense* Erdos. Monotypic.

Comperencyrtus De Santis, 1964. Com. Cien., Ann., Buenos Aires, An. 4: 106.

Type-species: *Comperencyrtus maculipennis* De Santis. Orig. desig.

Taxonomy: Erdos, 1955. Acta Zool. (Budapest) 1 (3-4): 221-229. — Hoffer, 1960. Mus. Nat. Pragae, Acta Faun. Ent. 6: 101-102. — Kerrich, 1967. Brit. Mus. (Nat. Hist.) Ent., Bul. 20 (5): 149.

americanus (Girault). Kans., Va.

Paracalocerinus americanus Girault, 1916. Ent. News 27 (5): 225-226. ♀.

gracilis (Howard). Fla.

Tetracladia gracilis Howard, 1892. U. S. Natl. Mus., Proc. 15: 362, 368. ♂.

marilandicus (Girault). Md., Ill.

Paracalocerinus marilandicus Girault, 1917. Chalcidoidea Nova Marilandensis I, p. 1-2. ♀.

Taxonomy: Dozier, 1933. Ent. Soc. Wash., Proc. 35 (6): 94-95.

tertius (Girault). Calif., Utah. Host: *Eriococcus* sp.

Paracalocerinus tertius Girault, 1917. Descr. Stellarum Nov., pp. 7-8. ♀.

texanus (Howard). Tex.

Tetracladia texana Howard, 1892. U. S. Natl. Mus., Proc. 15: 362, 367-368. ♂.

Genus ANARHOPUS Timberlake

Anarhopus Timberlake, 1929. Calif. Univ., Pubs. Ent. 5 (2): 15-18.

Type-species: *Avarhopus sydneyensis* Timberlake. Orig. desig.
sydneyensis Timberlake. Calif. Host: *Pseudococcus calceolariae* (Mask.), *P. longispinus* (Targ.-Tozz.).

Avarhopus sydneyensis Timberlake, 1929. Calif. Univ., Pubs. Ent. 5 (2): 5, 18. ♀.

Biology: Compere and Flanders, 1934. Jour. Econ. Ent. 27 (5): 966-973. —Flanders, 1940. Calif. Citrog. 25 (5): 146, 154-155. —Claney, 1944. Jour. Econ. Ent. 37 (3): 450. —Maple, 1947. Calif. Univ., Pubs. Ent. 8 (2): 59-60. —DeBach, 1949. Ecology 30 (1): 16-25. —Clausen, 1956. U. S. Dept. Agr., Tech. Bul. 1139, pp. 75, 130. —Flanders, 1959. Jour. Econ. Ent. 52 (1): 75.

UNPLACED TAXA OF SUBFAMILY TETRACNEMINAE

The following genera have not been placed in tribes of the Tetracneminae.

Genus CIRRHENCYRTUS Timberlake

Cirrhencyrtus Timberlake, 1918. Calif. Univ., Pubs. Ent. 1 (8): 360-362.

Type-species: *Pseudococcobius ehrhorni* Timberlake. Orig. desig.
ehrhorni (Timberlake). Calif. Host: *Dysmicoccus ryani* (Coq.), *Spilococcus sequoiae* (Colm.).
Pseudococcobius ehrhorni Timberlake, 1916. U. S. Natl. Mus., Proc. 50: 564. ♀.

Taxonomy: Timberlake, 1918. Calif. Univ., Pubs. Ent. 1 (8): 362.

Biology: Maple, 1947. Calif. Univ., Pubs. Ent. 8 (2): 115.

Genus ECTROMATOPSIS Compere

Ectromatopsis Compere, 1947. Calif. Univ., Pubs. Ent. 8 (1): 13-15.

Type-species: *Ectroma americanum* Howard. Orig. desig.
americana (Howard). N. Mex. w. to Calif. Host: *Phenacoccus solani* Ferris.
Ectroma americanum Howard, 1898. U. S. Natl. Mus., Proc. 21: 248. ♀.

Taxonomy: Compere, 1947. Calif. Univ., Pubs. Ent. 8 (1): 13, 14, 15.

Biology: Maple, 1947. Calif. Univ., Pubs. Ent. 8 (2): 78-80.

Genus NEODUSMETIA Kerrich

Neodusmetia Kerrich, 1964. Entomophaga 9 (1): 76.

Type-species: *Dusmetia sangwani* Subba Rao. Orig. desig.

Taxonomy: Burks, 1958 (1957). Brooklyn Ent. Soc., Bul. 52 (4): 124-125. —Richards, 1958. Roy. Ent. Soc. London, Proc. (B) 27 (3-4): 61. —Kerrich, 1964. Entomophaga 9 (1): 75-77.
sangwani (Subba Rao). Fla. w. to Ariz. Host: *Antonina graminis* (Mask.).
Dusmetia sangwani Subba Rao, 1957. Ind. Acad. Sci., Proc. 46: 385-386. ♀, ♂.

Dusmetia indica Burks, 1958 (1957). Brooklyn Ent. Soc., Bul. 52 (4): 125-127. ♀, ♂.

Biology: Dean, Schuster and Bailey, 1961. Jour. Econ. Ent. 54 (5): 953. —Beardsley, 1961. Hawaii. Ent. Soc., Proc. 17 (3): 327. —Kerrich, 1964. Entomophaga 9 (1): 75. —DeBach, 1974. Biol. Control by Nat. Enem., p. 168-169.

Genus PARALEUROCERUS Girault

Paraleurocerus Girault, 1915. N. Y. Ent. Soc., Jour. 23 (3): 172.

Type-species: *Paraleurocerus bicoloripes* Girault. Orig. desig.

Gibberella Miller, 1961. Canad. Ent. 98 (6): 494.

Type-species: *Gibberella scutellata* Miller. Orig. desig.

bicoloripes Girault. N. S., Ont., Mass., Tex. Host: *Cameraria caryaefoliella* (Clem.),
Lithocolletis sp. mining cherry leaf, *L.* spp. on *Alnus crispa*, *Carya* sp., *Corylus* sp.,
Fagus sp., *Hamamelis* sp., *Prunus* sp., *L. lucetiella* Clem. on *Tilia americana*.
Paraleurocerus bicoloripes Girault, 1915. N. Y. Ent. Soc., Jour. 23 (3): 172-173. ♀, ♂.

Gibberella scutellata Miller, 1961. Canad. Ent. 98 (6): 495, 496. ♂, ♀.

Biology: Fitzgerald and Simeone, 1971. Ent. Soc. Amer., Ann. 64 (4): 774-777 (polyembryony).

Genus TETRACNEMOPSIS Ashmead

Tetracnemopsis Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 330, 358.

Type-species: *Tetraenemus westwoodi* Cockerell. Orig. desig.

westwoodi (Cockerell). Que., Me., Colo. Host: *Phenacoccus minimus* Tinsley.

Tetraenemus westwoodi Cockerell, 1898. Canad. Ent. 30 (8): 224. ♂, ♀.

SUBFAMILY ENCYRTINAE

TRIBE APHYCINI

Genus ACEROPHAGUS Smith

Acerophagus Smith, 1880. No. Amer. Ent. 1: 83.

Type-species: *Acerophagus cocois* Smith. Monotypic.

Rhopoideus Howard, 1898. U. S. Natl. Mus., Proc. 21: 235.

Type-species: *Rhopoideus citrinus* Howard. Monotypic.

This genus is comprised of fewer than fifteen species and seems restricted to North America and the Caribbean.

Taxonomy: Timberlake, 1916. U. S. Natl. Mus., Proc. 50: 574-579. —Timberlake, 1918. Calif. Univ., Pubs. Ent. 1 (8): 347-351. —Rosen, 1969. Hilgardia 40 (2): 41-72.

antennalis Rosen. Calif. Host: *Dysmicoccus ryanii* (Coq.).

Acerophagus antennalis Rosen, 1969. Hilgardia 40 (2): 42, 43, 44, 45, 50-52. ♂, ♀.

californicus Rosen. Calif. Host: *Spilococcus pressus* Ferris.

Acerophagus californicus Rosen, 1969. Hilgardia 40 (2): 43, 45, 68-69. ♀.

citrinus (Howard). Calif., Nev. Host: *Quadrastriolitus perniciosus* (Comst.)?, *Aulacaspis rosae* (Bouche).

Rhopoideus citrinus Howard, 1898. U. S. Natl. Mus., Proc. 21: 235. ♀.

cocois Smith. Mass. s. to N. J., w. to Ill., Calif. Host: *Phenacoccus acericola* King, *Pulvinaria vitis* (L.).

Acerophagus cocois Smith, 1880. No. Amer. Ent. 1: 84. ♀.

Biology: Howard, 1881. U. S. Dept. Agr., Ann. Rept. for 1880, p. 361.

erii Timberlake. Utah. Host: *Amonostherius lichtensisoides* (Ckll.).

Acerophagus erii Timberlake, 1916. U. S. Natl. Mus., Proc. 50: 575, 577-578. ♀, ♂.

fasciipennis Timberlake. Calif. Host: *Anisococcus cravii* (Coq.).

Acerophagus fasciipennis Timberlake, 1918. Calif. Univ., Pubs. Ent. 1 (8): 347, 348-349. ♂, ♀.

Biology: Maple, 1947. Calif. Univ., Pubs. Ent. 8 (2): 54, 109.

gutierreziae Timberlake. N. Mex. Host: *Spilococcus gutierreziae* (Ckll.).

Acerophagus gutierreziae Timberlake, 1916. U. S. Natl. Mus., Proc. 50: 575, 577. ♀, ♂.

notativentris (Girault). Calif. Host: *Pseudococcus maritimus* (Ehrh.), *P.* sp. on grape.

Pseudaphycus notativentris Girault, 1917. Descr. Hym. Chalcidoid Variorum Cum Observ. III, p. 10. ♀, ♂.

Biology: Clausen, 1924. Calif. Univ., Pubs. Ent. 3 (2): 256-266, 271-274. —Maple, 1947. Calif.

Univ., Pubs. Ent. 8 (2): 54. —Flanders, 1959. Jour. Econ. Ent. 52 (1): 72.

pallidus Timberlake. Calif. Host: *Phenacoccus solani* Ferris, *Pseudococcus maritimus* (Ehrh.), *Spilococcus atriplicis* (Ckll.), *S. eriogoni* (Ehrh.).

Acerophagus pallidus Timberlake, 1918. Calif. Univ., Pubs. Ent. 1 (8): 348, 350-351. ♀, ♂.

Biology: Flanders, 1944. Jour. Econ. Ent. 37 (2): 312. —Maple, 1947. Calif. Univ., Pubs. Ent. 8 (2): 54-55, 109.

texanus (Howard). Tex. Host: *Ferrisia virgata* (Ckll.).

Aphytus texanus Howard, 1898. U. S. Natl. Mus., Proc. 21: 245. ♀.

Genus AENASIOIDEA Girault

Aenasioidea Girault, 1911. Canad. Ent. 43 (5): 171-173.

Type-species: *Aenasioidea latiscapus* Girault. Orig. desig.

Taxonomy: Timberlake, 1916. U. S. Natl. Mus., Proc. 50: 579-585. — Mercet, 1925. Eos 1 (1): 30-31. — Hoffer, 1955. Acta Mus. Nat. Pragae 11 B (1): 1-22. — Compere and Annecke, 1960. Jour. Ent. Soc. So. Africa 23 (2): 386, 382.

armitagei Compere. Calif. Host: *Kermes*? on native oak.

Aenasioidea armitagei Compere, 1926. Calif. Univ., Pubs. Ent. 4 (1): 30-31. ♀.

ferrierei Burks. Md. Host: *Aclerda andropogonis* McConnell on *Andropogon virginicus*.

Aenasioidea ferrierei Burks, 1964. Entomophaga 9 (1): 18-20.

kermicola Timberlake. Utah, Calif. Host: *Kermes galliformis* Riley, *K. nigropunctatus* Ehrh. and Ckll.

Aenasioidea kermicola Timberlake, 1916. U. S. Natl. Mus., Proc. 50: 580, 583-584. ♀, ♂.

latiscapus Girault. Ill. Host: *Kermes pubescens* Bogue.

Aenasioidea latiscapus Girault, 1911. Canad. Ent. 43 (5): 173-174. ♀.

pulchella (Howard). N. Y., N. J., Okla. Host: *Kermes pubescens* Bogue, *K.* sp. on *Quercus velutina*.

Aphytus pulchellus Howard, 1898. U. S. Natl. Mus., Proc. 21: 242. ♀.

trimblei Dozier. Pa. Host: *Lecanium quercifex* Fitch.

Aenasioidea trimblei Dozier, 1935. Ent. Soc. Wash., Proc. 37 (9): 183-184. ♀, ♂.

Genus APHYCUS Mayr

Aphytus Mayr, 1876 (1875). Zool.-Bot. Gesell. Wien, Verhandl. 25: 695.

Type-species: *Encyrtus apicalis* Dalman. Desig. by Ashmead, 1900.

Pseudococcobius Timberlake, 1916. U. S. Natl. Mus., Proc. 50: 563.

Type-species: *Aphytus terryi* Fullaway. Orig. desig.

Waterstonia Mercet, 1917. Soc. Espan. de Hist. Nat., Bol. 17 (5): 268.

Type-species: *Waterstonia prima* Mercet. Orig. desig.

Euaphytes Mercet, 1921. Fauna Iberica, Himen., Encirtidos, pp. 197-212.

Type-species: *Encyrtus hederaceus* Westwood. Desig. by Mercet.

It is difficult to estimate the size of *Aphytus* because of the confusion which has existed over the genera *Metaphytes* and *Aphytus*. In the 1951 Hymenoptera Catalog the species of *Metaphytes* were synonymized under *Aphytus*. Compere and Annecke (1960) discussed the problem and indicated that sound structural differences exist between the genera. Graham (1969) noted that Mercet misidentified *Encyrtus hederaceus* Westwood, the type-species of *Euaphytes*. Most species of *Euaphytes* fall under *Metaphytes* whereas the type-species is assignable to *Aphytus*.

Taxonomy: Timberlake, 1916. U. S. Natl. Mus., Proc. 50: 587-639. — Mercet, 1917. Soc. Espan. de Hist. Nat., Bol. 77 (2): 128-139. — Mercet, 1925. Eos 1 (1): 14-18. — Ishii, 1928. Imp. Agr. Exp. Sta. Japan, Bul. 3 (2): 121-123. — Compere, 1947. Calif. Univ., Pubs. Ent. 8 (1): 1-13. — Hoffer, 1955. Acta Soc. Ent. Cechosl. 51: 82-94. — Alam, 1957. Roy. Ent. Soc. London, Trans. 109 (15): 434-438. — Compere and Annecke, 1960. Ent. Soc. So. Africa, Jour. 23 (2): 377, 378. — Trjapitzin, 1962. Zool. Inst. Leningrad, Trudy 30: 281-286. — Graham, 1969. Polski Pismo Ent. 39 (2): 224-228.

annulipes (Ashmead). Ont. s. to Fla. Host: *Lecanium cornu* Bouche, *L. nigrofasciatum* Perg., L. sp. on *Quercus nigra*.

Coccophagus annulipes Ashmead, 1882. Canad. Ent. 14 (2): 37. ♀.

apicalis (Dalman). Establishment in U. S. questionable.

Encyrtus apicalis Dalman, 1820. Svenska Vetensk. Akad., Handl. 41: 153-154.

Taxonomy: Mercet, 1921. Fauna Iberica, Himen., Encirtidos, pp. 228-231.

bifasciatus (Timberlake). N. H. Host: *Phenacoccus* sp. on apple.

Pseudococcobius bifasciatus Timberlake, 1916. U. S. Natl. Mus. Proc. 50: 564, 566-567. ♀, ♂.

Taxonomy: Compere, 1939. Calif. Univ., Pubs. Ent. 7 (4): 62.

brunneus Howard. N. Y., N. J. Host: *Aulacaspis rosae* (Bouche).

Aphytus brunneus Howard, 1885. U. S. Dept. Agr., Bur. Ent., Bul. 5: 17, 31, 36. ♀.

Aphytus brunneus Dalla Torre, 1898. Cat. Hym., v. 5, p. 251. Unjustified emendation.

ceroplastis Howard. Fla.?, N. Mex. Host: *Ceroplastes floridensis* Comst.? *C. irregularis* Ckll., C. sp. on *Artemisia*.

Aphytus ceroplastis Howard, 1885. U. S. Dept. Agr., Bur. Ent., Bul. 5: 18, 31, 41. ♀, ♂.

cockerelli Howard. N. Mex. Host: *Lecanium* sp. on osage orange.

Aphytus cockerelli Howard, 1898. U. S. Natl. Mus., Proc. 21: 243. ♀.

hederaceus (Westwood). Establishment in U. S. questionable. Host: *Pulvinaria accricola* (W. and R.).

Encyrtus hederaceus Westwood, 1837. London, Edinb. and Dublin Phil. Mag. and Jour. Sci. 10 (3): 441. ♀.

Taxonomy: Howard, 1900. U. S. Dept. Agr., Div. Ent., Bul. 22: 23. —Compere, 1957. Portici R. Lab. Ent. Agr., Bol. 15: 222. —Graham, 1958. Ent. Tidskr. 79 (3-4): 173. —Graham, 1969. Polskie Pismo Ent. 39 (2): 224-225.

immaculatus Howard. Calif. Host: *Aonidiella aurantii* (Mask.).

Aphytus immaculatus Howard, 1894. U. S. Dept. Agr., Insect Life 6 (3): 235-236. ♂.

Genus BLASTOTHRIX Mayr

Blastothrix Mayr, 1876 (1875). Zool.-Bot. Gesell. Wien, Verhandl. 25: 697.

Type-species: *Encyrtus sericeus* Dalman. Desig. by Ashmead, 1900.

Anagyropsis Girault, 1917. Insecutor Inscitiae Menstruus 5 (7-9): 136.

Type-species: *Anagyrus purpureus* Girault. Orig. desig.

The cosmopolitan genus *Blastothrix* has been poorly studied and at present consists of approximately thirty-five species. All species appear to be primary, internal parasites of coccids and kermococcids. Undoubtedly, the North American fauna is larger than indicated here.

Taxonomy: Ruschka, 1923 (1922). Zool.-Bot. Gesell. Wien, Verhandl. 72 (2): 1-6. —Girault, 1924. Homo Pernicosus and New Hymen. (Private Pub.), p. 4. —Alam, 1961. Beitr. zur Ent. 11 (7-8): 807-812. —Sugonyayev, 1965. Ent. Rev. 44 (2): 189-198. —Graham, 1969. Polskie Pismo Ent. 39 (2): 241-243.

adjutabilis Howard. Va. s. to Fla. Host: *Lecanium* spp. on *Crataegus*, Japanese persimmon and oak.

Blastothrix adjutabilis Howard, 1881. U. S. Dept. Agr., Ann. Rpt. for 1880, pp. 365-366. ♀.

incerta Howard. Fla. Host: *Lecanium* sp.? on mesquite, *Lecanium* sp.

Blastothrix incerta Howard, 1881. U. S. Dept. Agr., Ann. Rpt. for 1880, p. 366. ♂.

longipennis Howard. Ont. s. to N. Y., D. C. w. to Minn.; N. Mex. w. to Calif., B. C. Host:

Kermes pubescens Bogue, *Lecanium corni* Bouche, *L. fletcheri* Ckll., *L. pruinatum* Coq., *L. quercifex* Fitch.

Blastothrix longipennis Howard, 1881. U. S. Dept. Agr., Ann. Rept. for 1880, p. 366. ♀.

Taxonomy: Girault, 1915. Ent. Soc. Amer., Ann. 8 (3): 274.

Biology: Glendenning, 1931. Brit. Columbia Ent. Soc., Proc. 28 (1): 30-31. —Lyne, 1934. Calif. Dept. Agr., Monthly Bul. 23: 232. —Maple, 1947. Calif. Univ., Pubs. Ent. 8 (2): 67-68. —Huffaker, 1971. Biol. Control, pp. 271.

sericea (Dalman). Que. s. to Pa., La., B. C. Host: *Kermes* sp. on ash, *Lecanium coryli* (L.), *L. nigrofasciatum* Perg, *Baccha fascipennis* Wied.?

Encyrtus sericeus Dalman, 1820. Svenska Vetensk. Akad., Handl. 41: 357. ♀.

Taxonomy: Girault, 1915. Ent. Soc. Amer. Ann. 8 (3): 274. —Silvestri, 1919. Lab. Zool. Gen. e Agr. Portici, Bol. 13: 163-173. —Mercet, 1921. Fauna Iberica, Himen., Encirtidos, pp. 249-251.

Biology: Glendenning, 1933. Canad. Ent. 65 (8): 169-171. —Maple, 1947. Calif. Univ., Pubs. Ent. 8 (2): 68-69. —Huffaker, 1971. Biol. Control, pp. 318-319.

Genus BOTHRIOCRAERA Timberlake

Bothriocraera Timberlake, 1916. U. S. Natl. Mus., Proc. 50: 567-568.

Type-species: *Bothriocraera flavipes* Timberlake. Orig. desig.

bicolor Compere and Zinna. Introduced, possibly established.

Bothriocraera bicolor Compere and Zinna, 1955. Lab. Ent. Agr. Portici, Bol. 14: 94, 95, 101-105. ♂, ♀.

flavipes Timberlake. Utah. Host: Mealybug on *Elymus*.

Bothriocraera flavipes Timberlake, 1916. U. S. Natl. Mus., Proc. 50: 568-569. ♂, ♀.

Genus ERYTHRAPHYCUS Compere

Erythraphycus Compere, 1947. Calif. Univ., Pubs. Ent. 8 (1): 7-8, 10.

Type-species: *Erythraphycus argyrocomus* Compere. Orig. desig.

This small but distinctive genus can readily be identified by its bright scarlet coloration as the name implies. Species of *Erythraphycus* apparently parasitize eriococcids. An undescribed species parasitizes a pseudococcid of the genus *Stemmatomerinx*.

argyrocomus Compere. Calif. Host: *Eriococcus* sp. on croton, asters, and *Ericameria* sp.

Erythraphycus argyrocomus Compere, 1947. Calif. Univ., Pubs. Ent. 8 (1): 8, 10-11. ♂, ♀.

Biology: Maple, 1947. Calif. Univ., Pubs. Ent. 8 (2): 84-86, 88.

calvus Compere. Calif.

Erythraphycus calvus Compere, 1947. Calif. Univ., Pubs. Ent. 8 (1): 10, 11-12. ♀.

matteolus Compere. Calif.

Erythraphycus matteolus Compere, 1947. Calif. Univ., Pubs. Ent. 8 (1): 10, 11. ♂.

Genus MELANAPHYCUS Compere

Melanaphycus Compere, 1947. Calif. Univ., Pubs. Ent. 8 (1): 4, 5.

Type-species: *Pseudococcobius fumipennis* Timberlake. Orig. desig.

clauseni (Timberlake). Calif. Host: *Amonostherium lichtensioides* (Ckll.), *A.* sp.? on cactus, *Eriococcus adenostomae* Ehrh., *E. palustris* Dodds.

Pseudococcobius clauseni Timberlake, 1918. Calif. Univ., Pubs. Ent. 1 (8): 358-360. ♂.

Biology: Dodds, 1923. Jour. Ent. and Zool. 15 (4): 57-60.

fumipennis (Timberlake). Calif. Host: *Eriococcus* sp., *Phenacoccus solani* Ferris,

Pseudococcus solani (Ckll.).

Pseudococcobius fumipennis Timberlake, 1918. Calif. Univ., Pubs. Ent. 1 (8): 356-358. ♂, ♀.

fuscipennis (Howard). Calif. Host: *Lecanium corni* Bouche.

Aphytus fuscipennis Howard, 1898. U. S. Natl. Mus., Proc. 21: 241-242. ♀.

Taxonomy: Timberlake, 1916. U. S. Natl. Mus., Proc. 50: 597-599. —Compere, 1947. Calif. Univ., Pubs. Ent. 8 (1): 5-6.

Biology: Maple, 1947. Calif. Univ., Pubs. Ent. 8 (2): 115.

Genus METAPHYCUS Mercet

Metaphycus Mercet, 1917. Soc. Espan. de Hist. Nat., Bol. 17 (2): 129, 138-139.

Type-species: *Metaphycus zebratus* Mercet. Monotypic.

As indicated earlier, controversy has existed over the status of *Aphytus* and *Metaphycus*. Most encyrtid specialists now believe the genera are distinct and Trjapitzin (1973) has placed them in separate subtribes of the Aphytini.

Taxonomy: Mercet, 1925. Eos 1 (1): 28. —Timberlake, 1926. Hawaii. Ent. Soc., Proc. 6 (2):

310. —Compere, 1940. Bul. Ent. Res. 31 (1): 7-13, 27. —Gomes, 1941. Esc. Nac. de Agron.

(Rio de Janerio), Bol. 2: 30-34. —Compere, 1947. Calif. Univ., Pubs. Ent. 8 (1): 2-5. —Alam, 1957. Roy. Ent. Soc. London, Trans. 109 (15): 425-426. —Compere, 1958 (1957). Portici Lab. Ent. Agr., Bol. 15: 221-230. —Compere and Annecke, 1960. Ent. Soc. So. Africa, Jour. 23

Africaines. 85 (3-4): 227-274. —Trjapitzin, 1973. Ent. Rev. 52 (2): 287-295.

alberti (Howard). Calif. Host: *Coccus hesperidum* L.

Aphytus alberti Howard, 1898. U. S. Natl. Mus., Proc. 21: 241-247. ♂, ♀.

Taxonomy: Maple, 1947. Calif. Univ., Pubs. Ent. 8 (2): 94-95. —Compere, 1958 (1957). Portici Lab. Ent. Agr., Bol. 15: 221-230.

Biology: Timberlake, 1913. Jour. Econ. Ent. 6 (3): 294-295.

californicus (Howard). Pa., Md., Calif. Host: *Lecanium nigrofasciatum* Perg.

Aphytus californicus Howard, 1898. U. S. Natl. Mus., Proc. 21: 241, 245. ♀.

Taxonomy: Compere and Annecke, 1961. Ent. Soc. So. Africa, Jour. 24 (1): 34. —Annecke and Mynhardt, 1972. Rev. Zool. Bot. Africaines. 85 (3-4): 272.

Biology: Huffaker, 1971. Biol. Control, p. 271.

coquilletti (Howard). Utah, Calif. Host: *Pulvinaria bigeloviae* Ckll.

Aphytus coquilletti Howard, 1898. U. S. Natl. Mus., Proc. 21: 241, 244. ♀.

Taxonomy: Timberlake, 1929. Pan-Pacific Ent. 6 (1): 43.

eriococci (Timberlake). Fla., Tex., Utah, Calif. Host: *Eriococcus quercus* (Comst.), *Coccus hesperidum* (L.).

Aphytus eriococci Timberlake, 1916. U. S. Natl. Mus., Proc. 50: 631-632. ♀.

eruptor (Howard). Va. s. to Fla. Host: *Ceroplastes floridensis* Comst., *Ceroplastes* sp.?

Aphytus eruptor Howard, 1881. U. S. Dept. Agr., Ann. Rept. for 1880, p. 364-365. ♂, ♀.

Biology: Maple, 1947. Calif. Univ., Pubs. Ent. 8 (2): 115.

flammeus Compere. Calif. Host: *Lecanium quercifex* Fitch.

Metaphycus flammeus Compere, 1947. Calif. Univ., Pubs. Ent. 8 (1): 13. ♂, ♀.

Biology: Maple, 1947. Calif. Univ., Pubs. Ent. 8 (2): 95.

flavus (Howard). N. Y. s. to Fla., w. to Tex. Host: *Coccus hesperidum* L., C.

pseudomagnoliarum (Kuw.), *Lepidosaphes glomerii* (Pack.), *Pulvinaria acericola* (W. and R.), *Saissetia oleae* (Oliv.), *Tachardia* sp., *Tormeyella liriodendri* (Gmel.).

Aphytus flavus Howard, 1881. U. S. Dept. Agr. Ann. Rept. for 1880, p. 365. ♀.

Biology: Huffaker, 1971. Biol. Control, p. 463.

helvolus (Compere). Calif. Host: *Coccus hesperidum* L., *C. pseudomagnoliarum* (Kuw.),

Lecanium corni Bouche, *Parasaissetia nigra* (Nietn.), *Saissetia coffeeae* (Walker), *S. oleae* (Oliv.).

Aphytus helvolus Compere, 1926. Calif. Univ., Pubs. Ent. 4 (1): 25-29. ♂, ♀.

Taxonomy: Compere, 1958 (1957). Portici Lab. Ent. Agr., Bol. 15: 221-230. —Compere and Annecke, 1960. Ent. Soc. So. Afr., Jour. 23 (2): 375-389. —Annecke, 1964. Rep. So. Afr. Dept. Agr. Tech. Serv., Ent. Mem. 7: 11-13.

- oregonensis** (Howard). Oreg. Host: *Pulvinaria* sp. on Oregon flowering currant, *P. sp.* on *Ribes*.
Aphytus oregonensis Howard, 1898. U. S. Natl. Mus., Proc. 21: 241, 246. ♀ (♂ misdet.).
- physokermis** (Timberlake). Calif. Host: *Physokermes insignicola* (Craw.).
Aphytus physokermis Timberlake, 1916. U. S. Natl. Mus., Proc. 50: 589, 591, 606-607. ♂, ♀.
- Taxonomy: Compere and Annecke, 1960. Ent. Soc. So. Afr., Jour. 23 (2): 385. —Annecke and Mynhardt, 1972. Rev. Zool. Bot. Africaines 85 (3-4): 270-271.
- psyllidis** Compere. Calif. Host: *Paratrionza cockerelli* (Sule).
Metaphycus psyllidis Compere, 1943. Pan-Pacific Ent. 19 (2): 71-73. ♂, ♀.

- Taxonomy: Compere and Annecke, 1960. Ent. Soc. So. Afr., Jour. 23 (2): 385. —Annecke and Mynhardt, 1972. Rev. Zool. Bot. Africaines 85 (3-4): 271.
- pulvinariae* (Howard). Cosmopolitan. Host: *Lecanium corni* Bouche, *L. fletcheri* Ckll., *L. nigrofasciatum* Perg., *L.* sp. on Japanese persimmon, *L.* sp. on wild goose plum, *Parasuisetta nigra* (Nietn.), *Pulvinaria acericola* (W. and R.), *P. vitis* (L.), *P.* sp. on plum, *P.* sp. on willow.
- Aphytus pulvinariae* Howard, 1881. U. S. Dept. Agr., Ann. Rept. for 1880, p. 365. ♀.
- punctipes* (Dalman). N. Amer.?
- Eucyrtus punctipes* Dalman, 1820. Svenska Vetensk. Akad., Handl. 41: 154.
- rileyi* (Timberlake). Ont. s. N. Y., w. to Mo., Tex. Host: *Lecanium corni* Bouche, *Lecanium* sp. on Japanese persimmon.
- Aphytus rileyi* Timberlake, 1916. U. S. Natl. Mus., Proc. 50: 589-591, 600-601. ♂, ♀.
- schwarzii* (Timberlake). Ariz.
- Aphytus schwarzii* Timberlake, 1916. U. S. Natl. Mus., Proc. 50: 589, 599. ♀.
- similis* (Timberlake). Tex. Host: *Lecanium* sp. on Japanese persimmon.
- Aphytus similis* Timberlake, 1916. U. S. Natl. Mus., Proc. 50: 589, 605-606. ♀.
- Biology: Maple, 1947. Calif. Univ., Pubs. Ent. 8 (2): 115.
- stanleyi* Compere. Calif. Host: *Coccus hesperidum* L., *C. pseudomaguoliarum* (Kuw.), *Eucalyptococcus tessellatus* (Sign.), *Saissetia oleae* (Oliv.).
- Metaphycus stanleyi* Compere, 1940. Bul. Ent. Res. 31 (1): 10, 11, 20. ♂, ♀.
- Taxonomy: Compere, 1940. Hilgardia 13 (7): 417-419. —Compere and Annecke, 1960. Ent. Soc. So. Afr., Jour. 23 (2): 385. —Annecke and Mynhardt, 1972. Rev. Zool. Bot. Africaines 85 (3-4): 262-265.
- stomachosus* (Girault). Mass. s. to Va., w. to Ill. Host: *Lecanium nigrofasciatum* Perg.
- Aphytus stomachosus* Girault, 1909. Psyche 16 (4): 77-79. ♂, ♀.
- subfasciatus* (Timberlake). Kans. Host: *Lecanium corni* Bouche.
- Aphytus subfasciatus* Timberlake, 1916. U. S. Natl. Mus., Proc. 50: 589, 591, 601-602. ♂, ♀.
- ### Genus PSEUDAPHYCUS Clausen
- Pseudaphycus* Clausen, 1915. Calif. Agr. Exp. Sta., Bul. 258: 41.
- Type-species: *Pseudaphycus angelicus* Howard. Monotypic.
- Psilomirinus* Brethes, 1916. Buenos Aires Mus. Nac. de Hist. Nat., An. 27: 424.
- Type-species: *Psilomirinus flavidulus* Brethes. Orig. desig.
- Representatives of the genus *Pseudaphycus* are internal parasites of pseudococcids. Some species, (*P. utilis*, *P. malinus*), have been useful in biological control programs.
- Taxonomy: Timberlake, 1916. U. S. Natl. Mus., Proc. 50: 569-574. —Mercet, 1925. Eos 1 (1): 10-14. —Ferriere, 1937. Bul. Ent. Res. 28 (2): 316-317. —Gahan, 1946. U. S. Natl. Mus., Proc. 96: 311-327. —De Santis, 1947. Soc. Ent. Argentina Rev. 13 (1-5): 281-287. —Hoffer, 1954. Acta Soc. Ent. Cechosl. 51: 81, 102-103. —Compere and Annecke, 1960. Ent. Soc. So. Afr., Jour. 23 (2): 377, 379. —Hoffer, 1960. Mus. Nat. Pragae, Acta Faun. Ent. 6: 94-97.
- abstrusus* Gahan. Va. Host: *Pseudococcus comstocki* (Kuw.).
- Pseudaphycus abstrusus* Gahan, 1946. U. S. Natl. Mus., Proc. 96: 313, 316-317. ♂, ♀.
- alveolatifrons* Gahan. N. J. Host: *Pseudococcus comstocki* (Kuw.).
- Pseudaphycus alveolatifrons* Gahan, 1946. U. S. Natl. Mus., Proc. 96: 314, 326-327. ♂, ♀.
- angelicus* (Howard). Que., Calif. Host: *Dysmicoccus ryanii* (Coq.), *Phenacoccus gossypii* Tns. and Ckll., *Pseudococcus calceolariae* (Mask.), *P. longispinus* (Targ.-Tozz.), *P. maritimus* (Ehrh.), *P.* sp. on *Artemisia californica*, *P.* sp. on passion flowers.
- Aphytus angelicus* Howard, 1898. U. S. Natl. Mus., Proc. 21: 241, 245. ♀.
- Taxonomy: Timberlake, 1916. U. S. Natl. Mus., Proc. 50: 573-574.
- Biology: Flanders, 1940. Jour. Econ. Ent. 33 (5): 756-758. —Haeussler and Clancy, 1944. Jour. Econ. Ent. 37 (4): 504-509. —Maple, 1947. Calif. Univ., Pubs. Ent. 8 (2): 110-111.

graminicola Timberlake, N. Mex., Utah. Host: *Trionymus utahensis* (Ckll.), pseudococcoid on *Elymus condensatus*.

Pseudaphycus graminicola Timberlake, 1916. U. S. Natl. Mus., Proc. 50: 570-571. ♂, ♀.

limatulus Gahan. Md. Host: *Phenacoccus* sp. on *Audropogon* sp.

Pseudaphycus limatulus Gahan, 1946. U. S. Natl. Mus., Proc. 96: 313, 324-325. ♂, ♀.

malinus Gahan. Ont., Conn. s. to Va., w. to Mo. Host: *Pseudococcus comstocki* (Kuw.).

Pseudaphycus malinus Gahan, 1946. U. S. Natl. Mus., Proc. 96: 313, 317-319. ♂, ♀.

Taxonomy: Jasnosh, 1957. Ent. Oboz. 36 (3): 720. —Hoffer, 1960. Mus. Nat. Pragae, Acta Faun. Ent. 6: 95, 97. —Sugonyayev, 1962. Akad. Nauk SSSR Izv., ser. Biol., 5: 754-766.

Biology: Clausen, 1956. U. S. Dept. Agr., Tech. Bul. 1139, p. 125. —Sugonyayev, 1960. Ent. Rev. 39 (2): 235. —DeBach, 1964. Biol. Control Insect Pests and Weeds, p. 681. —DeBach, 1974. Biol. Control by Nat. Enem., p. 160.

meracus Gahan. Va. Host: *Ferrisia virgata* (Ckll.).

Pseudaphycus meracus Gahan, 1946. U. S. Natl. Mus., Proc. 96: 314, 325-326. ♂, ♀.

meritorius Gahan. Va. Host: *Ferrisia virgata* (Ckll.).

Pseudaphycus meritorius Gahan, 1946. U. S. Natl. Mus., Proc. 96: 312, 314-315. ♂, ♀.

mundus Gahan. Va. s. to Fla., w. to La. Host: *Dysmicoccus boninensis* (Kuw.), *Phenacoccus gossypii* Tns. and Ckll., *Pseudococcus comstocki* (Kuw.), *P. longispinus* (Targ.-Tozz.).

Pseudaphycus mundus Gahan, 1946. U. S. Natl. Mus., Proc. 96: 313, 321-324. ♂, ♀.

Biology: Bynum, 1938. La. Agr. Expt. Sta., Bul. 298: 27-29. —Clancy and Pollard, 1947. Jour. Econ. Ent. 40 (4): 579.

perdignus Compere and Zinna. Calif., released, possibly established.

Pseudaphycus perdignus Compere and Zinna, 1955. Portici Lab. Ent. Agr., Bol. 14: 94, 105-108. ♂, ♀.

prosopidis Timberlake. N. Mex. Host: *Spilococcus prosopidis* (Ckll.).

Pseudaphycus prosopidis Timberlake, 1916. U. S. Natl. Mus., Proc. 50: 570, 571-572. ♀.

websteri Timberlake. Ind., Ill. Host: *Pseudococcus maritimus* (Ehrh.), mealybug on stem of *Elymus virginicus*.

Pseudaphycus websteri Timberlake, 1916. U. S. Natl. Mus., Proc. 50: 570, 572. ♀.

Genus STEMMATOSTERES Timberlake

Stemmatosteres Timberlake, 1918. Calif. Univ., Pubs. Ent. 1 (8): 352-354.

Type-species: *Stemmatosteres apterus* Timberlake. Orig. desig.

This morphologically aberrant genus consists of only a few species which seem restricted to the Holarctic Region. A North American species is parasitic on pseudococcids.

Taxonomy: Hoffer, 1955. Acta Soc. Ent. Cechosl. 51: 109-111. —Compere and Annecke, 1960. Ent. Soc. So. Afr., Jour. 23 (2): 381. —Hoffer, 1960. Mus. Nat. Pragae, Acta Faun. Ent. 6: 98.

apterus Timberlake. Calif. Host: *Dysmicoccus timberlakei* (Ckll.).

Stemmatosteres apterus Timberlake, 1918. Calif. Univ., Pubs. Ent. 1 (8): 354-355. ♂, ♀.

Biology: Maple, 1947. Calif. Univ., Pubs. Ent. 8 (2): 109, 114.

kuchari Yoshimoto. Alta.

Stemmatosteres kuchuri Yoshimoto, 1972. Canad. Ent. 104 (11): 1837-1839. ♂, ♀.

Genus TACHARDIOBIUS Timberlake

Tachardiobius Timberlake, 1926. U. S. Natl. Mus., Proc. 69 (3): 19-22.

Type-species: *Tachardiobius nigricans* Timberlake. Orig. desig.

nigricans Timberlake. Ariz., Calif. Host: *Tachardiella larreae* (Comst.).

Tachardiobius nigricans Timberlake, 1926. U. S. Natl. Mus., Proc. 69 (3): 22-23. ♂, ♀.

Genus TIMBERLAKIA Mercet

Timberlakia Mercet, 1925. Eos 1 (1): 9-10.

Type-species: *Acerophagus europaeus* Mercet. Orig. desig.

The only species of this genus was imported from Europe in attempts to control the Rhodes grass scale, *Antonina graminis* (Maskell). Biological control of this pest is achieved by another parasite, *Neodusmetia sangwani* (Subba Rao), but *T. europeaea* (Mercet) has become established.

Taxonomy: Compere and Annecke, 1960. Ent. Soc. So. Afr., Jour. 23 (2): 377, 378. —Hoffer, 1960. Mus. Nat. Pragae, Acta Faun. Ent. 6: 98.

Biology: Dean and Schuster, 1958. Jour. Econ. Ent. 51 (3): 365. —Dean, 1960. Jour. Econ. Ent. 53 (4): 694. —Schuster *et al.*, 1971. In: Huffaker, Biol. Control, p. 228.

europeaea (Mercet). Fla., Tex. Introduced from Europe. Host: *Antonina graminis* (Mask.). *Acerophagus europaeus* Mercet, 1921. Fauna Iberica, Himen., Encirtidos, pp. 191-193. ♂.
♀.

Biology: Huffaker, 1971. Biol. Control, p. 228.

TRIBE ARRHENOPHAGINI

Genus ARRHENOPHAGUS Aurivillius

Arrhenophagus Aurivillius, 1888. Ent. Tidskr. 9: 144-146.

Type-species: *Arrhenophagus chionaspidis* Aurivillius. Monotypic.

Mymariella Risbec, 1951. Inst. Fr. Afr. Noire, Mem. 13: 402-403.

Type-species: *Mymariella parlatoeae* Risbec. Monotypic.

Arrhenophagus consists of fewer than five species, but is widespread in distribution. Its species are parasitic on armored scale insects.

Taxonomy: Girault, 1915. N. Y. Ent. Soc., Jour. 23 (4): 241-242. —Timberlake, 1924. Hawaii. Ent. Soc., Proc. 5 (3): 433. —Agarwal, 1963. Ztschr. f. Parasitenk. 22 (5): 394-397.

chionaspidis Aurivillius. Md. s. to Fla. Host: *Aulacaspis rosae* (Bouche), *Quadraspidiotus perniciosus* (Comst.), *Q. forbesi* (Johns).

Arrhenophagus chionaspidis Aurivillius, 1888. Ent. Tidskr. 9: 146. ♀.

Coccobius diaspidis Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 408. ♀.

Taxonomy: Girault, 1911. N. Y. Ent. Soc., Jour. 19 (3): 177-179. —Girault, 1915. N. Y. Ent. Soc., Jour. 23 (4): 241-242. —Ferriere, 1953. Rev. Path. Veg. d'Ent. Agr. France 32 (2): 116. —Tachikawa, 1957. Jap. Jour. Appl. Ent. and Zool. 1 (3): 174-179. —Hoffer, 1964. Acta Soc. Ent. Cechosl. 61 (2): 118-122. —Trjapitzin, 1968. Vses. Ent. Obsch., Trudy 52: 47.

Biology: Benassy, 1958. (Paris) Acad. Sci. Compt. Rend. 246 (1): 179-181. —Zak-Ogaza, 1961. Polskie Pismo Ent. 31 (26): 356.

Morphology: Dominichini, 1953. Zool. Agr. Bach Univ. Milano, Bol. 19: 242.

TRIBE BOTHRIOTHORACINI

Genus BOTHRIOTHORAX Ratzeburg

Bothriothorax Ratzeburg, 1844. Ichn. d. Forstins., v. 1, table facing p. 4; pp. 208-209.

Type-species: *Bothriothorax altesteinii* Ratzeburg. Monotypic. The type-species is considered a synonym of *Encyrtus clavicornis* Dalman.

Trimorphocerus Dahlbom, 1857. Ofvers. Svenska Vetensk., Akad. Forh. 14 (8): 293-294 (no species included).

Type-species: *Bothriothorax altesteinii* Ratzeburg. Desig. by Gahan and Fagan, 1923.

This Holarctic genus consists of about 15 species that are parasites of syrphid flies.

Taxonomy: Howard, 1895. U. S. Natl. Mus., Proc. 17: 607-611. —Graham, 1958. Ent. Tidskr. 79 (3-4): 161-165. —Kerrich, 1963. Beitr. zur Ent. 13 (3-4): 364. —Trjapitzin, 1967. Akad. Nauk SSSR, Zool. Inst., Trudy 41: 209-212.

Biology: Heiss, 1938. Ill. Biol. Monog. 16 (4): 19, 99, 100. —Graves, 1960. Ent. Soc. Amer., Ann. 53 (1): 74.

californicus Howard. Calif. Host: *Scaeva pyrastri* (L.), *Syrphus nitens* Zett., *S. opinator* O. S.
Bothriothorax californicus Howard, 1895. U. S. Natl. Mus., Proc. 17: 607, 609-610. ♀.

Biology: Kamal, 1926. Jour. Econ. Ent. 19 (5): 726-728.

faridi Kamal. Calif. Host: *Syrphus opinator* O. S.

Bothriothorax faridi Kamal, 1926. Canad. Ent. 58 (11): 283-284. ♂, ♀.

Biology: Kamal, 1939. Egypt Min. Agr. Tech. and Sci. Serv. Ent. Sect., Bul. 207: 33, 46, 48.
maeroglenes Ashmead. Kans.

Bothriothorax macroglenes Ashmead, 1888. Kans. Agr. Expt. Sta., Bul. 3: app. p. V. ♀.

nigripes Howard. N. Mex., Calif. Host: *Euphades volucris* O. S.

Bothriothorax nigripes Howard, 1895. U. S. Natl. Mus., Proc. 17: 607, 610. ♀.

Biology: Kamal, 1939. Egypt Min. Agr. Tech. and Sci. Serv. Ent. Sect., Bul. 207: 33, 46, 48.
 —Maple, 1947. Calif. Univ., Pubs. Ent. 8 (2): 70-71.

noveboracensis Howard. N. H. s. to N. J.

Bothriothorax noveboracensis Howard, 1895. U. S. Natl. Mus., Proc. 17: 607, 609. ♀.

peculiaris Howard. N. H. s. to Va., w. to Wis. Host: *Metasyrphus americanus* (Johns.).
Syrphus rectus O. S., *S. ribesii* (L.).

Bothriothorax peculiaris Howard, 1885. U. S. Dept. Agr., Bur. Ent., Bul. 5: 20-21, 43. ♂, ♀.

rotundiformis Howard. Calif., Colo., Wash.

Bothriothorax rotundiformis Howard, 1895. U. S. Natl. Mus., Proc. 17: 607, 610-611. ♀.

virginiensis Howard. Va.

Bothriothorax virginiensis Howard, 1885. U. S. Dept. Agr., Bur. Ent., Bul. 5: 20, 43. ♀.

Genus TRJAPITZINELLUS Viggiani

Trjapitzinellus Viggiani, 1967. Portici Lab. Ent. Agr., Bol. 25: 166-167.

Type-species: *Trjapitzinellus semidaliphagus* Viggiani. Orig. desig.

This genus consists of two species, one from Italy and one from California. Both are larval-pupal parasites of Coniopterygidae.

microrphanos Gordh. Calif. Host: *Conwentzia* sp., *Parasemidalis* sp.

Trjapitzinellus microrphanos Gordh, 1973. Pan-Pacific Ent. 49 (1): 51-55.

Genus ZETETICONTUS Silvestri

Aratus Howard, 1897. Linn. Soc. London, Jour., Zool. 26: 155-156. Preocc. by *Aratus*
 Milne-Edwards, 1853.

Zeteticontus Silvestri, 1915. Portici Lab. Zool., Bol. 9: 343-344.

Type-species: *Zeteticontus abilis* Silvestri. Orig. desig.

Mirrencyrtus Girault, 1915. Queensland Mus., Mem. 4: 115.

Type-species: *Mirrencyrtus glabruscutellum* Girault. Orig. desig.

Aratuscus Ghesquiere, 1946. Rev. Zool. Bot. Africaines 39 (4): 368. N. name for *Aratus*
 Howard.

Prolitomastix Hoffer, 1954. Ochr. Prirody 9 (6): 172.

Type-species: *Prolitomastix vestonicensis* Hoffer. Orig. desig.

Zeteticontus is cosmopolitan and contains about ten species. Members of the genus are nitidulid beetle parasites.

insularis (Howard). Fla. Host: *Anastrepha ludens* (Loew). Kerrich examined the holotype of
H. insularis and considered it to be an *Aratus* (=*Zeteticontus*). This is interesting
 because *insularis* is a fly parasite whereas all other species of *Zeteticontus* parasitize
 nitidulids.

Bothriothorax insularis Howard, 1896. Linn. Soc. London, Jour., Zool. 26: 147. ♂, ♀.

Taxonomy: Kerrich, 1963. Beitr. zur Ent. 13 (3-4): 367-368.

TRIBE CERAPTEROCERINI

Genus AMMONOENCYRTUS De Santis

Ammonoencyrtus De Santis, 1964. Com. Inv. Cient. Prov. Buenos Aires, An. 4: 376-378.
Type-species: *Cerapterocerus bouariensis* Brethes. Orig. desig.

This New World genus contains two hyperparasitic species that attack parasites of soft-scale insects.

Taxonomy: Annecke, 1967. Roy. Ent. Soc. London, Trans. 119 (4): 101, 159-160.
californicus (Compere). Calif. Host: Primary parasite of *Coccus hesperidum* L., *Saissetia oleae* (Oliv.), *Ceroplastes cirripediformis* Comst., *Metaphycus lounsburyi* (Howard).
Eusemion californicum Compere, 1925. Calif. Univ., Pubs. Ent. 3 (3): 296, 304-306. ♂, ♀.
Biology: Compere, 1925. Calif. Univ., Pubs. Ent. 3 (3): 306-308. —Smith, 1933. Ent. Soc. Amer., Ann. 26 (3): 525-528. —Flanders, 1940. Ent. Soc. Amer., Ann. 33 (2): 252. —Flanders, 1943. Jour. Econ. Ent. 36 (6): 923-924. —Maple, 1947. Calif. Univ., Pubs. Ent. 8 (2): 89-90.

Genus ANICETUS Howard

Anicetus Howard, 1896. U. S. Natl. Mus., Proc. 18: 639.
Type-species: *Anicetus ceylonensis* Howard. Monotypic.

Asteropaecus Howard, 1898. U. S. Natl. Mus., Proc. 21: 231.

Type-species: *Asteropaecus primus* Howard. Monotypic.

Habroleptopterygis Girault, 1915. Queensland Mus., Mem. 4: 86.

Type-species: *Habroleptopterygis felix* Girault. Monotypic.

Krishnieriella Mani, 1935. Rec. Indian Mus. 37 (4): 421-422.

Type-species: *Krishnieriella ceroplastidis* Mani. Orig. desig.

Anicetus contains about 20 species which are parasitic on soft scales, especially *Ceroplastes*. The genus is predominantly Ethiopian and Oriental in distribution.

Taxonomy: Girault, 1916. Ent. Soc. Amer., Ann. 9 (3): 302. —Mercet, 1925. Soc. Roy. Ent. Egypt, Bul. for 1925, p. 50. —Subba Rao, 1965. Roy. Ent. Soc. London, Proc. (B) 34 (5-6): 71. —Trjapitzin, 1965. Ent. Rev. 44 (4): 524-525. —Annecke, 1967. Roy. Ent. Soc. London, Trans. 119 (4): 99-169. —Hayat, 1976. Ent. Monthly Mag. 111 (1328-1330): 49-50.

annulatus Timberlake. Tex., Calif. Host: *Coccus hesperidum* L.

Anicetus annulatus Timberlake, 1919. Hawaii. Ent. Soc., Proc. 4 (1): 227-231. ♂, ♀.

Biology: Maple, 1947. Calif. Univ., Pubs. Ent. 8 (2): 60.

toumeyellae Milliron. Del. s. to Va. Host: *Toumeyella liriodeudri* (Gmel.), *Ceroplastes* sp. on lilly.

Anicetus toumeyellae Milliron, 1959. Ent. Soc. Amer., Ann. 62 (1): 28, 29-30. ♂, ♀.

Genus CERAPTEROCERUS Westwood

Cerapterocerus Westwood, 1833. Mag. Nat. Hist. 6: 495.

Type-species: *Cerapterocerus mirabilis* Westwood. Monotypic.

Telegraphus Ratzeburg, 1848. Ichn. d. Forstins., v. 2, pp. 152-153.

Type-species: *Telegraphus maculipennis* Ratzeburg. Monotypic. The type-species is considered a synonym of *Cerapterocerus mirabilis* Westwood.

This small genus consists of only a few species which are parasitic on mealybugs.

Taxonomy: Timberlake, 1924. Hawaii. Ent. Soc., Proc. 5 (3): 432. —Agarwal, 1963. Ztschr. f. Parasitenk. 22 (5): 398-400. —Doblado, 1966. Graellsia 22: 54.

floridanus Ashmead. Fla.

Cerapterocerus floridanus Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 190. ♂.

Genus EUSEMION Dahlbom

Eusemion Dahlbom, 1857. Ofvers. Svenska Vetenska. Akad., Forh. 14 (8): 293. No species included.

Type-species: *Encyrtus corniger* Haliday. Subsequent monotypy (Thomson, 1876 (1875)).

Eusemion is a small genus consisting of less than five species as the genus is understood by Annecke (1967). These insects are hyperparasitic on primary parasites of soft scales.

Taxonomy: Compere, 1925. Calif. Univ., Pubs. Ent. 3 (3): 303-308. —Compere, 1938. Bul. Ent. Res. 29 (3): 319-320. —Ferriere, 1949. Schweiz. Ent. Gesell., Mitt. 22 (4): 383. —Annecke, 1967. Roy. Ent. Soc. London, Trans. 119 (4): 100, 103-104.

longipennis (Ashmead). Fla., Calif. Host: *Metaphycus flavus* (Howard), *Microterys flavus* (Howard) on *Lecanium* sp.

Mira longipennis Ashmead, 1888. Ent. Amer. 4 (1): 17. ♀.

Biology: Timberlake, 1913. Jour. Econ. Ent. 6 (3): 301-302.

TRIBE CHALCERINYINI

Genus ECHTHROGONATOPUS Perkins

Echthrogonatopus Perkins, 1906. Hawaii. Sugar Planters' Assoc. Expt. Sta., Div. Ent., Bul. 1 (8): 256.

Type-species: *Echthrogonatopus exitiosus* Perkins. Desig. by Girault, 1915.

This is a small genus, consisting of fewer than five species. They are parasites of dryinids, but the North American species was reported to have been recovered from a mealybug. An undetermined species occurs in Florida on *Dysmicoccus patulae* (Rao).

Taxonomy: Girault, 1915. Queensland Mus., Mem. 4: 76.

pachycephalus Perkins. Ohio. Host: Drynid.

Echthrogonatopus pachycephalus Perkins, 1906. Hawaii. Sugar Planters' Assoc. Expt. Sta. Div. Ent. Bul. 1 (8): 257. ♀.

Taxonomy: Girault, 1922. Insecutor Inscitiae Menstruus 10 (7-9): 150. —Girault, 1934. New Capsidae and Hymen. (Priv. pub., no page number.)

Genus HELEGONATOPUS Perkins

Helegonatopus Perkins, 1906. Hawaii. Sugar Planters' Assoc. Expt. Sta., Div. Ent., Bul. 1 (8): 257.

Type-species: *Helegonatopus pseudophanes* Perkins. Monotypic.

Taxonomy: Timberlake, 1918. Hawaii. Ent. Soc., Proc. 4 (1): 185. —Timberlake, 1924. Hawaii. Ent. Soc., Proc. 5 (3): 432. —Williams, 1931. Handb. Ins. and Other Invert. of Hawaii. Sugar Cane Flds., p. 255.

pseudophanes Perkins. Fla., Ohio, Ky. Host: *Gonatopus* sp., ex. drynid on *Amblysellus curtisi*.

Helegonatopus pseudophanes Perkins, 1906. Hawaii. Sugar Planters' Assoc. Expt. Sta., Div. Ent., Bul. 1 (8): 258. ♀.

TRIBE CHEILONEURINI

Genus APTERENCYRTUS Ashmead

Aptereucyrtus Ashmead, 1905. Canad. Ent. 37 (1): 5.

Type-species: *Aptereucyrtus pulchricornis* Ashmead. Monotypic. The type-species is considered a synonym of *Chiloneurus microphagus* Mayr.

Chiloneurius Mercet, 1921. Fauna Iberica, Himen., Encirtidos, p. 646.

Type-species: *Chiloneurus microphagus* Mayr. Orig. desig.

This cosmopolitan genus of scale parasites consists of fewer than 10 species.

Taxonomy: Gahan, 1951. Canad. Ent. 83 (7): 171. — Ferriere, 1955. Schweiz. Ent. Gesell., Mitt. 28 (1): 117-118. — Hoffer, 1957. Acta. Soc. Ent. Cechosl. 54 (4): 349-352. — Alam, 1957. Roy. Ent. Soc. London, Trans. 109 (15): 423, 438-441. — Trjapitzin, 1967. Akad. Nauk SSSR Zool. Inst., Trudy 41: 213-214. — Graham, 1969. Polskie Pismo Ent. 39 (2): 270-271.

microphagus (Mayr). Conn. s. to Fla., Calif. Host: *Lecanium nigrofasciatum* Perg., *Lepidosaphes ulmi* (L.), *Quadrapsidiotus juglansregiae* (Comst.), *Q. perniciosus* (Comst.).

Encyrtus Lambinus Walker, 1838. Ent. Mag. 5: 422. ♀.

Encyrtus Engelela Walker, 1844. Ann. and Mag. Nat. Hist. 14: 184. ♀.

Chiloneurus microphagus Mayr, 1876 (1875). Zool.-Bot. Gesell. Wien, Verhandl. 25: 745, 746. ♀.

Chiloneurus diaspidiarum Howard, 1894. U. S. Dept. Agr., Insect Life 7 (3): 256. ♀.

Apterencyrtus pulchricornis Ashmead, 1905. Canad. Ent. 37 (1): 5. ♀.

Aphidencyrtus aspidioti Girault, 1915. Ent. Soc. Amer., Ann. 8 (3): 283, 284. ♀.

Habrolepis mayri Ruschka, 1915. Ztschr. Angew. Ent. 2: 403-404. ♀.

Apterencyrtus zonatus Alam, 1957. Roy. Ent. Soc. London, Trans. 109 (15): 439, 441. ♀.

Although *Encyrtus lambinus* Walker has priority over *Chiloneurus microphagus* Mayr, the latter name is well known and has been frequently published. Therefore *microphagus* is retained here as the accepted name in the interest of stability.

Taxonomy: Gahan, 1924. U. S. Natl. Mus., Proc. 65 (4): 1-2.

Biology: Griswold, 1925. N. Y. (Cornell) Agr. Expt. Sta., Mem. 93: 44-47.

Genus BOUCEKIELLA Hoffer

Boucekiella Hoffer, 1954. Ochr. Prirody 9 (6): 172, 173.

Type-species: *Boucekiella depressa* Hoffer. Orig. desig.

Urotyndarichus Ferriere, 1955. Soc. Ent. de France, Bul. 60 (1-2): 9-10.

Type-species: *Urotyndarichus antoninae* Ferriere. Orig. desig.

depressa Hoffer. Tex. Introduced for biological control of the Rhodes grass scale, *Antonina graminis* (Mask). Host: *Chaetococcus phragmitis* (Marchal).

Boucekiella depressa Hoffer, 1954. Ochr. Prirody 9 (6): 172-173. ♀.

Urotyndaricus antoninae Ferriere, 1955. Soc. Ent. de France, Bul. 60 (1-2): 10. ♀.

Taxonomy: Hoffer, 1957. Mus. Nat. Pragae, Acta Ent. 31 (486): 220.

Biology: Huffaker, 1971. Biol. Control, pp. 228.

Genus CHEILONEURUS Westwood

Cheiloneurus Westwood, 1833. London, Edinb. and Dublin Phil. Mag. and Jour. Sci. 3 (3): 343.

Type-species: *Encyrtus elegans* Dalman. Monotypic.

Chiloneurus Foerster, 1856. Hym. Stud. v. 2, pp. 32, 34, 50. Unjustified emend.

Cristatithorax Girault, 1911. Canad. Ent. 43 (5): 169.

Type-species: *Cristatithorax pulcher* Girault. Monotypic.

Metacheiloneurus Hoffer, 1957. Acta Soc. Ent. Cechosl. 54 (4): 336-337.

Type-species: *Metacheiloneurus moestus* Hoffer. Orig. desig.

Taxonomy: Gahan, 1914. Ent. Soc. Amer., Ann. 7 (3): 247-248. — Ruschka, 1923. Zool.-Bot. Gesell. Wien, Verhandl. 72 (1): 6-10. — Compere, 1931. Calif. Univ., Publ. Ent. 5 (11): 233. — Compere, 1938. Bul. Ent. Res. 29 (3): 327-328. — Geyer, 1947. Ent. Soc. So. Afr., Jour. 10 (1): 98. — Alam, 1957. Roy. Ent. Soc. London, Trans. 109 (15): 423, 441-444. — Hoffer, 1957. Acta Soc. Ent. Cechosl. 54 (4): 339-348. — Claridge, 1958. Ent. Monthly Mag. (4th. Ser.) 94 (1130): 156-161. — Trjapitzin, 1964. Zool. Zhur. 43 (10): 1463-1465. — Graham, 1969. Polskie Pismo Ent. 39 (2): 273-275.

albicornis Howard. Ont. s. to S. C., w. to La., n. to Wis., Colo. Host: *Kermes* sp. on oak, *Lecanium caryaee* Fitch, *L. corni* Bouche, *L. fletcheri* Ckll., *L. nigrofasciatum* Perg.,

Physokermes piceae (Schr.), *Pulvinaria acericola* (W. and R.), *P. vitis* (L.), *P.* sp. on poison ivy.

Chiloneurus albicornis Howard, 1881. U. S. Dept. Agr., Ann. Rept. for 1880, pp. 363-364. ♀.

Taxonomy: Girault, 1916. Ent. Soc. Amer., Ann. 9 (3): 300-301 (male, female).

cupreicollis Ashmead. Fla. Host: *Lecanium* sp. on oak.

Chiloneurus cupreicollis Ashmead, 1886. Amer. Ent. Soc., Trans. 13: 131. ♀.

cushmani Crawford. Va. Host: *Kermes* sp.

Chiloneurus cushmani Crawford, 1911. Ent. Soc. Wash., Proc. 13 (2): 126. ♂, ♀.

dubius Howard. Mass. w. to Wis., Mo. Host: *Kermes* sp., *Lecanium* sp. from dwarf mountain pine, *L.* sp. from Scotch pine.

Chiloneurus dubius Howard, 1885. U. S. Dept. Agr., Bur. Ent., Bul. 5: 17, 42. ♂.

elegans (Dalman). N. Y. s. to Pa., Va. Host: *Mayetiola destructor* (Say), *Platygaster zosine* Walk.

Eucyrtus elegans Dalman, 1820. Svenska Vetensk. Akad., Handl. 41: 151. ♀.

Taxonomy: Claridge, 1958. Ent. Monthly Mag. 94 (1130): 157-158.

Biology: Gahan, 1934 (1933). U. S. Dept. Agr. Misc. Pub. 174: 60-64. — Hill *et al.*, 1939. U. S. Dept. Agr., Tech. Bul. 689: 5, 12. — Ferriere, 1952. Ninth Internat. Cong. Ent. Amsterdam, Trans. v. 1, p. 594.

Taxonomy: Ferriere, 1956. Lab. Zool. Gen. e. Agr. Portici, Bol. 33: 354.

Biology: Sugonyayev, 1958. Ent. Rev. 37 (2): 260.

Morphology: Hill and Pinckney, 1940. U. S. Dept. Agr., Tech. Bul. 715: 5-6, 11-13.

inimicus Compere. Fla. w. to Calif. Host: *Metaphycus lounsburyi* (How.), *M. physokermis* (Timb.).

Chiloneurus inimicus Compere, 1925. Calif. Univ., Pubs. Ent. 3 (3): 296, 197-302. ♂, ♀.

Taxonomy: Maple, 1947. Calif. Univ., Pubs. Ent. 8 (2): 71.

Biology: McCoy and Selheim, 1970. Ent. Soc. Amer., Ann. 63 (2): 618. — Compere, 1925. Calif. Univ., Pubs. Ent. 3 (3): 301-302.

lineascapus Gahan. Md., La., Calif. Host: *Kermes* sp. on lilac, *K.* sp. on oak, *Saissetia oleae* (Oliv.), *Metaphycus lounsburyi* (How.).

Chiloneurus lineascapus Gahan, 1910. Canad. Ent. 42 (6): 207-208. ♀.

Taxonomy: Compere, 1925. Calif. Univ., Pubs. Ent. 3 (3): 296.

Biology: Smith, 1933. Ent. Soc. Amer., Ann. 26 (3): 525.

Morphology: Maple, 1947. Calif. Univ., Pubs. Ent. 8 (2): 115.

noxius Compere. Calif. Host: *Saissetia oleae* (Oliv.), *Metaphycus lounsburyi* How.

Chiloneurus noxius Compere, 1925. Calif. Univ., Pubs. Ent. 3 (3): 296, 302-303. ♀.

Taxonomy: Smith and Compere, 1928. Calif. Univ., Pubs. Ent. 4 (9): 242, 272-274.

Biology: Flanders, 1940. Ent. Soc. Amer., Ann. 33 (2): 252. — Lepelly, 1937. Bul. Ent. Res. 28 (2): 181-183. — Weseloh, 1969. Ent. Soc. Amer., Ann. 62 (2): 299-305. — Weseloh, 1971. Ent. Soc. Amer., Ann., 64 (3): 580-586. — Weseloh, 1971. Ent. Soc. Amer., Ann. 64 (6): 1188-1190. — Weseloh, 1972. Ent. Soc. Amer., Ann. 65 (1): 41-46. — Weseloh and Bartlett, 1971. Ent. Soc. Amer., Ann. 64 (6): 1259-1264.

Morphology: Maple, 1947. Calif. Univ., Pubs. Ent. 8 (2): 71.

pulcher (Girault). Ill. Host: *Kermes pubescens* Bogue.

Cristatithorax pulcher Girault, 1911. Canad. Ent. 43 (5): 170. ♀.

pulvinariae Dozier. D. C. s. to Fla. Host: *Metaphycus flavus* (How.) parasitic on *Pulvinaria* sp.

Chiloneurus pulvinariae Dozier, 1927 (1925). Puerto Rico Dept. Agr., Jour. 9 (4): 363-365. ♂, ♀.

swezeyi Ashmead. Conn., Ohio. Host: *Ormenis septentrionalis* (Spin.), *Psilodryinus typhlocybae* (Ashm.).

Cheiloneurus swezeyi Ashmead, 1903. Ent. News 14 (6): 193. ♂, ♀.

Biology: Swezey, 1903. Ohio Nat. 3: 446-447.

Genus CHRYSOPOPHAGUS Ashmead

Chrysopophagus Ashmead, 1894. U. S. Dept. Agr., Insect Life 7 (3): 245-246.

Type-species: *Chrysopophagus compressicornis* Ashmead. Monotypic.

Saronotum Perkins, 1906. Hawaii. Sugar Planters' Assoc. Expt. Sta., Div. Ent., Bul. 1 (8): 259-260.

Type-species: *Saronotum australiae* Perkins. Desig. by Gahan and Fagan, 1923.

Chrysopophagus consists of less than ten species.

Taxonomy: Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 331, 350-351. — Girault, 1924. Homo Perniciosus and New Hymen. not paged. (priv. pub.). — Subba Rao, 1957. Indian Acad. Sci., Proc. (B) 46 (6): 382-383.

amplicornis (Gahan). Tex. w. to Calif. Host: *Eriococcus* sp. on *Bouteloua*.
Cheiloneurus amplicornis Gahan, 1914. Ent. Soc. Amer., Ann. 7 (3): 247. ♀.

Biology: Maple, 1947. Calif. Univ., Pubs. Ent. 8 (2): 115.

banksi Howard. Tex., N. Mex.

Chrysopophagus banksi Howard, 1898. U. S. Natl. Mus., Proc. 21: 247-248. ♀.

compressicornis Ashmead. N. C., S. C. w. to Iowa, Mo., Calif. Host: *Chrysopa californica* Coq., *C. majuscula* Banks, *C. plorabunda* Fitch, *C. rufalbris* Burm.
Chrysopophagus compressicornis Ashmead, 1894. U. S. Dept. Agr., Insect Life 7 (3): 246. ♂, ♀.

Biology: Claney, 1946. Calif. Univ., Pubs. Ent. 7 (13): 432-440. — Maple, 1947. Calif. Univ., Pubs. Ent. 8 (2): 72. — Muma, 1959. Fla. Ent. 42 (4): 150-152.

flaccus (Walker). N. C. s. to Fla., Ohio, Calif. Host: Dryinid.

Eneyrtus (Cerchysius) Flaccus Walker, 1847. Ann. and Mag. Nat. Hist. 20 (130): 21. ♀.
Saranotum americanum Perkins, 1906. Hawaii. Sugar Planters' Assoc. Expt. Sta., Div. Ent., Bul. 1 (8): 260.

Taxonomy: Burks, 1975. Brit. Mus. (Nat. Hist.) Ent., Bul. 32 (4): 147-148.

kansensis Girault. Kans.

Chrysopophagus kansensis Girault, 1917. U. S. Natl. Mus., Proc. 53: 447. ♀.

Genus DIVERSINERVUS Silvestri

Diversinervus Silvestri, 1915. Lab. Zool. Gen. e Agr. Portici, Bol. 9: 301-304.

Type-species: *Diversinervus elegans* Silvestri. Orig. desig.

Cheiloneuroides Girault, 1915. Queensland Mus., Mem. 4: 96, 122.

Type-species: *Cheiloneuroides bicristatus* Girault. Orig. desig. The type-species is considered a synonym of *Diversinervus elegans* Silvestri.

Diversinervus is predominantly an African genus consisting of fewer than ten species which parasitize lecaniine scale insects.

Taxonomy: Girault, 1917. Insecutor Inscitiae Menstruus 5: 37. — Compere, 1931. Calif. Univ., Pubs. Ent. 5 (11): 233-235. — Compere, 1940. Hilgardia 13 (7): 407. — Trjapitzin, 1961. Ent. Rev. 40 (3): 369.

elegans Silvestri. Calif. Host: *Saissetia oleae* (Oliv.).

Diversinervus elegans Silvestri, 1915. Lab. Zool. Gen. e Agr. Portici, Bol. Gen. e Agr., Bol. 9: 304-305. ♂, ♀.

Cheiloneuroides bicristatus Girault, 1915. Queensland Mus., Mem. 4: 96-97.

Diversinervus meridionalis Compere, 1931. Calif. Univ., Pubs. Ent. 5 (11): 237-239. ♂, ♀.

Biology: Compere, 1931. Calif. Univ., Pubs. Ent. 5 (11): 241-245, 249.

Genus PARASYRPOPHAGUS Girault

Parasyrpophagus Girault, 1915. Queensland Mus., Mem. 4: 105.

Type-species: *Parasyrpophagus funeralis* Girault. Orig. desig.

This genus has been recovered in India, Australia and the Holarctic Region. It contains four or five species. In North America it is represented by material from California under a manuscript name of Girault.

Taxonomy: Mercet, 1921. Fauna Iberica Himen., Encirtidos, pp. 58, 73, 82, 270. — Hoffer, 1957. Acta Soc. Ent. Cechosl. 54 (4): 329-330.

Genus PROCHILONEURUS Silvestri

Prochiloneurus Silvestri, 1915. Lab. Zool. Gen. e Agr. Portici, Bol. 9: 350-351.

Type-species: *Prochiloneurus pulchellus* Silvestri. Orig. desig.

Achrysopophagus Girault, 1915. Queensland Mus., Mem. 4: 89.

Type-species: *Achrysopophagus oviductus* Girault. Orig. desig.

Approximately thirty species have been assigned to *Achrysopophagus* and *Prochiloneurus*. All of the species originally assigned to *Achrysopophagus* are hyperparasitic on mealybugs and perhaps soft scale insects. The genus is cosmopolitan.

Taxonomy: Mercet, 1919. Soc. Espan. de Hist. Nat., Bol. 19 (9-10): 473-474. — Mercet, 1929. Eos 5 (4): 359. — Compere, 1938. Bul. Ent. Res. 29 (3): 325-327. — Domenichini, 1952. Zool. Agr. Bach. Univ. Milano, Bol. 17 (3): 175-179. — Hoffer, 1957. Acta Soc. Ent. Cechosl. 54 (4): 329, 348-349. — Trjapitzin, 1968. Vses. Ent. Obshch., Trudy 52: 116-122.

americanus (Girault). D. C.

Achrysopophagus americanus Girault, 1917. Descr. Stellarum Nov., p. 16. ♀.

dactylopili (Howard). D. C., N. Mex., Minn. Host: *Phenacoccus solenopsis* Tinsley, *Planococcus citri* (Risso).

Chilonenurus dactylopili Howard, 1885. U. S. Dept. Agr., Bur. Ent., Bul. 5: 17, 42. ♂, ♀.

Taxonomy: Kerrich, 1953. Bul. Ent. Res. 44 (4): 798-799.

Biology: Kirkpatrick, 1952. Rept. Cacao Res. 1952, p. 65.

modestus (Timberlake). Calif. Host: *Pseudococcus maritimus* (Ehrh.), *Anagyrus yuccae* (Coq.), *Zarhopalus corvinus* (Gir.).

Achrysopophagus modestus Timberlake, 1924. Calif. Univ., Publs. Ent. 3 (2): 240-243. ♀.

Biology: Clausen, 1924. Calif. Univ., Publs. Ent. 3 (2): 257-266, 284-286. — Maple, 1947. Calif. Univ., Publs. Ent. 8 (2): 55.

Genus TINEOPHOCTONUS Ashmead

Tineophoctonus Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 328, 351.

Type-species: *Phaenodiscus armatus* Ashmead. Orig. desig.

This is a Holarctic genus consisting of only a few species. The host associations of *Tineophoctonus* are not clear. *Armatus* has been reported as an anobiid parasite in Europe (its host still unknown in North America) whereas *tineaevorus* attacks tineid larvae.

Taxonomy: Viggiani, 1966. Doriania 4 (168): 1-5. — Mercet, 1932. Eos 8 (3): 311-316.

armatus (Ashmead). Fla. Host: *Anobium punctatum* (DeG.).

Phaenodiscus armatus Ashmead, 1888. Ent. Amer. 4 (1): 17. ♀.

Taxonomy: Mercet, 1932. Eos 8 (3): 312-316.

tineaevorus (Ashmead). Fla. Host: Tineid larva in gall of *Andricus pattoni* (Bass.).

Leptomastix tineaeavora Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 191. ♀.

Taxonomy: Ashmead, 1888. Ent. Amer. 4 (1): 16.

Genus TYNDARICHUS Howard

Tyndarichus Howard, 1910. U. S. Dept. Agr. Tech. Ser. Bur. Ent., Bul. 19: 5-6.

Type-species: *Tyndarichus navae* Howard. Orig. desig.

Tyndarichus has less than 10 described species some of which are apparently hyperparasitic on other chalcidoids that attack Lepidoptera eggs. An undetermined species is found from Wis. w. to Mont., s. to Nebr., Fla., Calif.

Taxonomy: Mercet, 1918. Rev. Mont. Madrid 42: 775-781. — Mercet, 1919. Rev. Appl. Ent. (A) 7: 229-230. — Nowicki, 1928. Ztschr. f. Wiss. Insektenbiol. 4 (1): 17, 24-25. — Eady, 1960. Bul. Ent. Res. 50 (4): 669-670. — Paine, 1964. So. Pacific Comm. Tech. Paper 145: 40.

TRIBE COMPERIINI

Genus COMPERIA Gomes

Comperia Gomes, 1942 (1941). Esc. Nac. Agron. Rio de Janeiro, Bol. 2 (1): 41-42.

Type-species: *Dicarnosis merceti* Compere. Orig. desig.

This genus consists of fewer than five described species and presumably has its origin in Africa. One species parasitizes cockroach oothecae.

Taxonomy: Annecke, 1969. Ent. Soc. So. Afr. Jour. 32 (2): 447.

merceti (Compere). Cosmopolitan. Host: *Supella longipalpa* (Serville).

Dicarnosis merceti Compere, 1938. Bul. Ent. Res. 29 (3): 317-319. ♀.

Comperia merceti var. *falsicornis* Gomes, 1942 (1941). Esc. Nac. Agron. Rio de Janeiro, Bol. 2 (1): 43-44. ♂, ♀.

Biology: Lawson, 1954. Kans. Ent. Soc., Jour. 27 (4): 128-142. — Gordh, 1973. Jour. Ent. (A) 47 (2): 115-123.

TRIBE COPIDOSOMATINI

Genus AGENIASPIS Dahlbom

Ageniaspis Dahlbom, 1857. Ofvers. Svenska Vetensk. Akad., Forh. 14 (8): 293. No species included.

Type-species: *Encyrtus fuscicollis* Dalman. Desig. by Ashmaed, 1904.

Holcothorax Mayr, 1876 (1875). Zool.-Bct. Gesell. Wien, Verhandl. 25: 691.

Type-species: (*Encyrtus*) *Holcothorax testaceipes* (Ratzeburg). Desig. by Gahan and Fagan, 1923.

Ageniaspis contains fewer than 10 species, most of which are parasites of Lepidoptera. One species, *fuscicollis* (Dalman), is polyembryonic. The genus appears to be cosmopolitan.

Taxonomy: Narayanan, 1960. Natl. Inst. Sei. India, Proc. (B) 26: 23. — Trjapitzin, 1967. Akad. Nauk SSSR Zool. Inst., Trudy 41: 180. — Trjapitzin, 1968. Vses. Ent. Obshch., Trudy 52: 100-101. — Graham, 1969. Polskie Pismo Ent. 39 (2): 292-293.

bucculatricis (Howard). Ont. s. to D. C., w. to Mo. Host: *Bucculatrix pomifoliella* Clem., galls of *Rhabdophaga cornuta* Walsh and *R. siliqua* Walsh.

Encyrtus bucculatrix Howard, 1883 (1882). In Lintner, Injurious Insects N. Y., Ann. Rept. 1: 160-161. ♀.

Genus COELOPENCYRTUS Timberlake

Coelopencyrtus Timberlake, 1919. Hawaii. Ent. Soc., Proc. 4 (1): 218-221.

Type-species: *Coelopencyrtus odyneri* Timberlake. Orig. desig.

Nesencyrtus Timberlake, 1919. Hawaii. Ent. Soc., Proc. 4 (1): 223-224.

Type-species: *Adelencyrtus kaalae* Ashmead. Orig. desig.

Batrachencyrtus Jansson, 1957. Ent. Tidskr. 78 (1): 71-74.

Type-species: *Batrachencyrtus callidii* Jansson. Orig. desig.

Coelopencyrtus contains about ten species, all of which are parasites of aculeate Hymenoptera. The genus appears throughout the world, with the possible exception of South America. With more thorough investigations of aculeate biology *Coelopencyrtus* may become a larger genus.

Taxonomy: Timberlake, 1922. Hawaii. Ent. Soc., Proc. 5 (1): 135-139. —Burks, 1958. Wash. Acad. Sci., Jour. 48 (1): 22-26. —Trjapitzin, 1960. Ent. Rev. 39 (2): 500-502. —Annecke, 1968. Ent. Soc. So. Afr., Jour. 31 (2): 249-258. —Hedqvist, 1973. Ent. Tidskr. 94 (1-2): 94-96.

hylaei Burks. Md., Nebr. Host: *Hylaeus cressoni* (Ckll.), *Hylaeus* sp.

Coelopencyrtus hylaei Burks, 1958. Wash. Acad. Sci., Jour. 48 (1): 25-26. ♂, ♀.

Biology: Brandhorst, 1962. Ent. Soc. Amer., Ann. 55 (4): 477.

hylaeoletor Burks. Ont., Idaho, Utah, Calif. Host: *Hylaeus* sp., *H. ellipticus* (Kirby).

Coelopencyrtus hylaeoletor Burks, 1958. Wash. Acad. Sci., Jour. 48 (1): 24-25. ♂, ♀.

Biology: Krombein, 1967. Trap-nesting wasps and bees, p. 433 (host, life history).

Genus COPIDOSOMA Ratzeburg

Copidosoma Ratzeburg, 1844. Ichn. d. Forststins. v. 1, table facing p. 40, p. 157.

Type-species: *Copidosoma boucheanum* Ratzeburg. Monotypic.

Litomastix Thomson, 1876 (1875), Hym. Scand., v. 4, pp. 118, 171.

Type-species: *Eucyrtus chalconotus* Dalman. Desig. by Ashmead, 1900.

Berecyntus Howard, 1898. U. S. Natl. Mus., Proc. 21: 237-238.

Type-species: *Berecyntus bakeri* Howard. Monotypic.

Copidosomopsis Girault, 1915. Queensland Mus., Mem. 4: 94.

Type-species: *Copidosomopsis perminutus* Girault. Monotypic.

Paracopidosomopsis Girault, 1916. Psyche 23 (2): 49.

Type-species: *Berecyntus floridanus* Ashmead. Orig. desig. The type-species is considered a synonym of *Copidosoma truncatellum* (Dalman).

Verdunia Mercet, 1917. Soc. Espan. de Hist. Nat., Bol. 17 (3): 203-204.

Type-species: *Verdunia gloriosa* Mercet. Orig. desig.

Litomastillus Mercet, 1921. Fauna Iberica, Himen., Encirtidos, p. 443.

Type-species: *Litomastix* (*Litomastillus*) *claviger* Mercet. Desig. by Peck, 1951.

Limastotix Mercet, 1921. Fauna Iberica, Himen., Encirtidos, p. 443.

Type-species: *Litomastix* (*Limastotix*) *hispanicus* Mercet. Monotypic.

Neocopidosoma Ishii, 1923. Japan Dept. Agr. and Com., Imp. Plant Quar. Sta., Bul. 3: 101.

Type-species: *Neocopidosoma komabae* Ishii. Orig. desig.

Berecytiscus Ghesquiere, 1946. Rev. Zool. Bot. Africaines 34: 368. N. name for

Berecyntus Howard.

Arrenoclavus Doutt, 1948. Pan-Pacific Ent. 24 (3): 145-148.

Type-species: *Copidosoma koehleri* Blanchard. Orig. desig.

This is a large, cosmopolitan genus whose members are polyembryonic parasites of Lepidoptera. Polyembryony in this instance seems to be an evolutionary strategy whereby a parasite of comparatively low reproductive potential has succeeded in maximizing its efficiency by completely consuming a host sometimes thousands of times larger than its own body size.

Taxonomy: Masi, 1911. Lab. Zool. Agr. Portici, Bol. 5 (4): 163-169. —Mercet, 1923. Soc.

Espan. de Hist. Nat., Bol. 23 (1): 51, 54. —Ferriere, 1949. Schweiz. Ent. Gesell., Mitt. 22 (4): 374. —Graham, 1958. Ent. Tidskr. 79 (3-4): 167-169. —Graham, 1969. Polskie Pismo Ent. 39 (2): 300-305.

bakeri (Howard). Cosmopolitan. Host: *Chorizagrotis* sp., *C. auxiliaris* (Grote), *C. thanatologia* Dyar, *Agrotis venerabilis* Wlk., *Euxoa flavidollis* (Smith), *E. detersa* (Wlk.), *E. tristicula* (Morr.), *Cyruodes devastator* (Brace), *Feltia duceus* Wlk., *F. sp.*

Berecyntus bakeri Howard, 1898. U. S. Natl. Mus., Proc. 21: 238. ♀.

Psilophrys pallidipes Schulz, 1906. Spolia Hym., p. 146. Unjustified emend.

Copidosoma gelechiae var. *suga* Girault, 1920. U. S. Natl. Mus., Proc. 58: 188-189. ♂, ♀.

Biology: Patterson, 1919. Jour. Hered. 10: 346. —Barber, 1938. N. Y. Ent. Soc., Jour. 46 (2): 169-171, 174-175. —Schaffner, 1959. U. S. Dept. Agr., Misc. Pub. 737: 37, 86. —Miller, 1963. Ohio Jour. Sci. 63: 71.

Morphology: Leiby, 1922. Jour. Morph. 37 (1): 195-285.

geniculatum (Dalman). Ont., Mass., N. Y., Conn. Host: *Rhyacionia buoliana* (Schiff.).
Encyrtus geniculatus Dalman, 1820. Svenska Vetensk. Akad., Handl. 41: 361. ♂.

Taxonomy: Mayr, 1876 (1875). Zool.-Bot. Gesell. Wien, Verhandl. 25: 734, 735, 736-737.

Biology: Dowden, 1934. Ent. Soc. Amer., Ann. 27 (4): 600.

intermedium Howard. N. J., Mo., Kans. Host: *Gnorimoschema gallaeasterella* (Kell.).
Copidosoma intermedium Howard, 1885. U. S. Dept. Agr., Bur. Ent., Bul. 5: 12, 42. ♂, ♀.

lymani Howard. Ont. Host: *Anacampsis lupinella* Busck, *Rhyacionia buoliana* (Schiff.).
Copidosoma Lymani Howard, 1907. Canad. Ent. 39 (3): 103. ♀.

melanocerum (Ashmead). D. C., N. C., Iowa, Kans. Host: *Feltia* sp. (Haw.).

Loiothorax melanocera Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 363. ♀.

truncatellum (Dalman). Que. to Fla., w. to Tex. and Ariz. Host: *Anomis erosa* Hbn.,
Autographa sp., *Spodoptera ornithogalli* (Guen.), *Trichoplusia ni* (Hbn.), *Zeuzera pyrina* (L.).

Encyrtus truncatellus Dalman, 1820. Svenska Vetensk. Akad., Handl. 41: 168-169.

Berecyntus floridanus Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 365. ♀.

Taxonomy: Mercet, 1921. Fauna Iberica, Himen., Encirtidos, pp. 456-457.

Biology: Silvestri, 1906. Lab. Zool. Agr. Portici, Bol. 6: 3-51. —Silvestri, 1937. Harvard Univ., Mus. Compar. Zool., Bul. 81: 472-487. —Stoner and Weeks, 1974. Environm. Ent. 3 (6): 957-960. —Hunter and Bartlett, 1975. Ent. Soc. Amer., Ann. 68 (1): 61-62 (karyotype). —Hunter and Stoner, 1975. Environm. Ent. 4 (3): 381-382.

turni (Packard). N. H., Conn., N. J. Host: *Papilio glaucus* L.

Encyrtus turni Packard, 1881 (1880). Boston Soc. Nat. Hist., Proc. 21: 32-33. ♂, ♀.

Taxonomy: Howard, 1889. In Scudder, Butterflies of Eastern U. S. and Canada, pp. 1872, 1888.

vagum Howard. Que., N. J., Mo. Host: *Filitima pseudoacaciella* (Chamb.).

Copidosoma vagum Howard, 1885. U. S. Dept. Agr., Bur. Ent., Bul. 5: 11, 31, 42. ♂, ♀.

Genus PARABLASTOTHRIX Mercet

Parblastothrix Mercet, 1917. Soc. Espan. de Hist. Nat., Bol. 17 (9): 538-540.

Type-species: *Parblastothrix vespertinus* Mercet. Monotypic.

Parablastothrix contains only a few species and is Holarctic in distribution. The type-species has been reported as a parasite of buprestid larvae whereas the North American representative of the genus has been recorded from small Lepidoptera.

Taxonomy: Mercet, 1932. Soc. Ent. France, Liv. Cent., pp. 685-686. —Miller, 1965. Canad. Ent. 97 (7): 750-753. —Erdos, 1955. Budapest Magyar Nemz. Muz., Ann. Hist. Nat. (n. s.) 6: 292-294. —Erdos, 1963. Beitr. zur Ent. 13 (3-4): 285.

nearectica Miller. Mich., W. Va., Miss. Host: *Obrussa* sp., *Coptodisca* sp. on *Vaccinium arboreum*.

Parablastothrix nearectica Miller, 1965. Canad. Ent. 97 (7): 750, 751-753. ♂, ♀.

Genus PARALITOMASTIX Mercet

Paralitomastix Mercet, 1921. Fauna Iberica, Himen., Encirtidos, pp. 8, 27, 58, 70, 438.

Type-species: *Eucyrtus varicornis* Nees. Orig. desig.

Pseudolitomastix Risbec, 1954. Inst. Fr. Afr. Noire, Bul. 16: 1068.

Type-species: *Litomastix creona* Risbec. Orig. desig.

A cosmopolitan genus consisting of about a dozen species. *Paralitomastix* attacks Lepidoptera larvae.

Taxonomy: Risbec, 1952. Mem. Inst. Sci. Madagascar, Ser. E, Ent. 2: 6, 38-40. —Risbec, 1954. Inst. Fr. Afr. Noire, Bul. 16 (4): 1067-1068. —Trjapitzin, 1967. Akad. Nauk SSSR Zool. Inst., Trudy 41: 206-207. —Graham, 1969. Polskie Pismo Ent. 39 (2): 294-295.

pyralidis (Ashmead). Ont., Mich., Md. s. to Fla., w. to Utah, Calif. Host: *Anarsia lineatella* Zell., *Trichophae flavocostella* Clem., *T. setosella* Clem.

Eucyrtus(*l*) *pyralidis* Ashmead, 1888. Ent. Amer. 4 (1): 15. ♀. Generic name is a lapsus for *Eucyrtus*.

Copidosoma variegatum Howard, 1888. U. S. Dept. Agr., Insect Life 1 (8): 197. ♀.

Taxonomy: Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 366-367.

Biology: Pack, 1930. Utah Agr. Expt. Sta., Bul. 216: 15-16. —Maple, 1947. Calif. Univ., Pubs. Ent. 8 (2): 109. —Clausen, 1956. U. S. Dept. Agr., Tech. Bul. 1139, p. 22.

Genus PENTALITOMASTIX Eady

Pseudolitomastix Eady, 1960. Bul. Ent. Res. 50 (4): 667-668. Preocc. by *Pseudolitomastix* Risbec.

Type-species: *Pseudolitomastix nacoleiae* Eady. Monotypic.

Pentalitomastix Eady, 1960. Bul. Ent. Res. 51 (1): 173. N. name for *Pseudolitomastix* Eady.

This genus has not been recorded from Africa or South America, but it probably occurs there also. *Pentalitomastix* presently consists of fewer than five species of polyembryonic parasites of Lepidoptera larvae.

Taxonomy: Eady, 1960. Bul. Ent. Res. 51 (1): 173. —Hoffer, 1960. Mus. Nat. Pragae, Acta Faun. Ent. 6: 105-108. —Paine, 1964. So. Pacific Comm., Tech. Paper 145, p. 29. —Trjapitzin, 1967. Akad. Nauk SSSR Zool. Inst., Trudy 41: 207-208.

plethoraicus Caltagirone. Calif. Introduced, possibly established. Host: *Laspeyresia carayana* on pecan, *Paramyelois transitella* (Walk.) on pod of *Tamarindus indica*.

Pentalitomastix plethoricus Caltagirone, 1966. Pan-Pacific Ent. 42 (2): 145-149. ♂, ♀.

Biology: Caltagirone, 1971 (1970). Lab. Ent. Agr. Filippo Silvestri Portici, Bol. 28: 98-112.

Genus PENTACNEMUS Howard

Pentacnemus Howard, 1892. U. S. Natl. Mus., Proc. 15: 362, 366-367.

Type-species: *Pentacnemus bucculatricis* Howard. Monotypic.

This monotypic genus is known only from North America. The type-species is a parasite of lepidopterous larvae.

bucculatricis Howard. Cosmopolitan. Host: *Coleotechnites thujaella* Kearf., *Argyresthia thuiella* (Pack.), *Argyresthia libocedrella* Busck on *Libocedrus decurrens*.

Pentacnemus bucculatricis Howard, 1892. U. S. Natl. Mus., Proc. 15: 366-367. ♂, ♀.

Biology: Underhill, 1943. Va. Agr. Expt. Sta., Bul. 349: 22.

TRIBE DISCODINI

Genus DISCODES Foerster

Discodes Foerster, 1856. Hym. Stud., v. 2, pp. 32, 34, 144.

Type-species: *Encyrtus aeneus* Dalman. Orig. desig.

Phaenodiscus Foerster, 1856. Hym. Stud., v. 2, p. 144. N. name for *Discodes*, thought to be too much like *Discoidea* Gray and *Discoides* Klein.

This genus presently contains fewer than ten species. It is Holarctic in distribution and parasitizes Coccidae. There is an undescribed species in California and Washington which feeds on *Asteroilecanium arabisidis* (Sign.).

Taxonomy: Ashmead, 1900. U. S. Nat. Mus., Proc. 22: 376. — Hoffer, 1954 (1953). Acta. Soc. Ent. Cechosl. 50: 156-157, 167-174. — Trjapitzin, 1967. Akad. Nauk SSSR Zool. Inst., Trudy 41: 212-213. — Trjapitzin, 1968. Vses. Ent. Obshch., Trudy 52: 114. — Graham, 1969. Polskie Pismo Ent. 39 (2): 280-282.

arizonensis (Howard). Tex., Colo., N. Mex., Ariz.

Phaenodiscus arizonensis Howard, 1898. U. S. Natl. Mus., Proc. 21: 248. ♀.

unicolor (Ashmead). Va., Ga., Fla.

Aphycus unicolor Ashmead, 1888. Ent. Amer. 4 (1): 15. ♀.

TRIBE ENCYRTINI

Genus ENCYRTUS Latreille

Encyrtus Latreille, 1809. Gen. Crust. Ins., v. 4, p. 31.

Type-species: *Chrysis infidus* Rossi. Desig. by Latreille, 1810.

Eucomys Foerster, 1856. Hym. Stud., v. 2, pp. 32, 34.

Type-species: *Encyrtus swederi* Dalman. Orig. desig.

Comys Foerster, 1856. Hym. Stud., v. 2, pp. 144-145. N. name for *Eucomys* thought to be preocc. by *Eucomis* in Liliaceae.

Howardia Dalla Torre, 1897. Wien. Ent. Ztg. 16: 86. Preocc. by *Howardia* Berlese and Leonardi, 1896.

Type-species: *Bothriothorax peckhami* Ashmead. Monotypic.

Howardidiella Dalla Torre, 1898. Cat. Hym., v. 5, p. 228. N. name for *Howardia* Dalla Torre.

Allorhopoideus Brethes, 1916. Mus. Argentina Cient. Nat., An. 27: 425.

Type-species: *Allorhopoideus mirabilis* Brethes. Orig. desig.

Prorhopoideus Brethes, 1921. Soc. Ent. de France, Bul. for 1921, p. 80.

Type-species: *Prorhopoideus Baezi* Brethes. Monotypic.

Encyrtus contains over 40 species. It is cosmopolitan in distribution and parasitizes Coccidae.

Taxonomy: Graham, 1969. Polskie Pismo Ent. 39 (2): 305-311.

albicoxa (Ashmead). Fla. w. to Calif. Host: *Coccus hesperidum* L., *Planococcus citri* (Risso), *Pseudococcus longispinus* (Targ.-Tozz.).

Comys albicoxa Ashmead, 1885. Amer. Ent. Soc., Trans. 12: Proc. pp. xvi-xvii. ♂, ♀.

atys (Girault). N. Y.

Eucomys atys Girault, 1917. Deser. Hym. Chalcidoid. Variorum cum Observ. V, p. 2. 1.

barbatus Timberlake. Calif.

Encyrtus barbatus Timberlake, 1919. Hawaii. Ent. Soc., Proc. 4 (2): 209-212. ♂, ♀.

Biology: Ishii, 1932. Japan Dept. Agr. and Com., Imp. Agr. Expt. Sta., Bul. 3 (3): 181, 187-188, 194.

bicolor (Howard). Ont. s. to D. C., w. to Mich., La., Kans., Colo., Calif. Host: *Coccus hesperidum* L., *Lecanium corni* Bouche, *L. fletcheri* Ckll.

rete Walker, Fla.

Encyrtus Rete Walker, 1847. Ann. and Mag. Nat. Hist. 20 (130): 22. ♂.

Taxonomy: Burks, 1975. Brit. Mus. (Nat. Hist.) Ent., Bul. 32 (4): 148.

TRIBE HABROLEPIDINI

Genus ADELENCYRTUS Ashmead

Adelenencyrtus Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 341, 400.

Type-species: *Encyrtus chionaspidis* Howard. Orig. desig.

Epiencyrtiodes Girault, 1915. Queensland Mus., Mem. 4: 108.

Type-species: *Epiencyrtiodes quadridentatus* Girault. Orig. desig.

Rotencyrtus Risbec, 1959. Bul. Acad. Malgache 35: 39.

Type-species: *Rotencyrtus depressus* Risbec. Monotypic.

Adelenencyrtus presently holds about a dozen species. The genus is cosmopolitan in distribution and its members are parasites of scale insects.

Taxonomy: Tachikawa, 1956. Insecta Matsumurana 20 (3-4): 93. —Hoffer, 1960. Mus. Nat. Pragae, Acta Ent. 6: 114-115. —Compere and Annecke, 1961. Ent. Soc. So. Afr., Jour. 24 (1): 47-58.

aulacaspidis (Brethes). Ill., Nebr., Calif. Host: *Aulacaspis rosae* (Bouche).

Prionomitus aulacaspidis Brethes, 1914. Ann. Zool. Aplicada 1: 29-30. ♀.

Taxonomy: Ferriere, 1949. Schweiz. Ent. Gesell., Mitt. 22 (4): 371. —Ferriere, 1953. Rev. Path. Veg. d'Ent. Agr. France 32 (2): 116.

Biology: Benassy, 1958. Acad. Sci. Compt. Rend. 246 (1): 179. —Tshumakova, 1961. Ent. Rev. 40 (2): 170-179. —Sugonyayev, 1962. Akad. Nauk SSSR Izv. Ser. Biol. 5: 754-766.

—Tshumakova, 1965. Ent. Rev. 44 (3): 305-308. —Sorokina, 1973. Ent. Rev. 52 (3): 397-398.

odonaspidis Fullaway. Fla. w. to Tex. Host: *Odonaspis* sp., *Antonina graminis* (Mask.) (?).

Adelenencyrtus odonaspidis Fullaway, 1913. Hawaii. Agr. Exp. Sta., Ann. Rept. for 1912. pp. 27, 28, 30, 31. ♀.

Taxonomy: Timberlake, 1919. Hawaii. Ent. Soc., Proc. 4 (1): 191. —Timberlake, 1924. Hawaii. Ent. Soc., Proc. 5 (3): 432.

Biology: Swezey, 1915. Jour. Econ. Ent. 8 (5): 452. —Beardsley, 1961. Hawaii. Ent. Soc., Proc. 17 (3): 327.

Genus ANABROLEPIS Timberlake

Anabrolepis Timberlake, 1920. Hawaii. Ent. Soc., Proc. 4 (2): 431-432.

Type-species: *Anabrolepis extranea* Timberlake. Orig. desig.

Anabrolepis has not yet been reported from Africa or South America, otherwise it is cosmopolitan in distribution. It includes less than 10 described species which are parasites of the Diaspididae.

Taxonomy: Ishii, 1928. Imp. Agr. Sta. Japan, Bul. 3 (2): 148-149. —Tachikawa, 1956. Insecta Matsumurana 20 (3-4): 94. —Subba Rao, 1957. Indian Acad. Sci., Proc. Sec. B. 46 (6): 382.

—Hoffer, 1960. Mus. Nat. Pragae, Acta Faun. Ent. 6: 114.

- zetterstedtii* (Westwood). Maine w. to Mich., B. C. Host: *Quadraspidiotus ostreaeformis* (Curt.). *Q. perniciosus* (Comst.), *Lepidosaphes ulmi* (L.).
Encyrtus Zetterstedtii Westwood, 1837. London, Edinb. and Dublin Phil. Mag. and Jour. Sci. (3) 10: 440.
Encyrtus dendripennis Ratzeburg, 1852. Ichn. Forstins., v. 3, p. 189. ♀.
Eupelmus pictipennis Six, 1867. Tijdschr. Ent. 2 (2): 219.
- Taxonomy: Girault, 1920. U. S. Nat. Mus., Proc. 58: 188. — Timberlake, 1920. Hawaii. Ent. Soc., Proc. 4 (2): 432. — Gahan, 1924. U. S. Natl. Mus., Proc. 65 (4): 2-3. — Ferriere, 1940. Bul. Ent. Res. 31 (2): 133. — Hoffer, 1960. Mus. Nat. Pragae, Acta Faun. Ent. 6: 114.

Genus COCCIDENCYRTUS Ashmead

Coccidencyrtus Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 339, 345, 383.

Type-species: *Encyrtus eusifer* Howard. Orig. desig.

Coccidencyrtoides Blanchard, 1940. Soc. Cient. Argent., An. 130: 107.

Type-species: *Coccidencyrtoides annulipes* Blanchard. Desig. by De Santis, 1956.

It is difficult to determine precisely the size of *Coccidencyrtus* because of the questioned generic placement of many species. The genus is cosmopolitan in distribution and parasitizes scale insects.

Taxonomy: Risbec, 1952. Mem. Inst. Sci. Madagascar, Ser. E. Ent. 2: 46. — Compere and Annecke, 1961. Ent. Soc. So. Afr., Jour. 24 (1): 59-65. — Tshumakova, 1961. Ent. Rev. 40 (2): 323. — Trjapitzin, 1963. Ent. Rev. 42 (4): 479-480. — Hoffer, 1963. Mus. Nat. Pragae, Acta Ent. 35: 562. — De Santis, 1964. Com. Inv. Cient. Prov. Buenos Aires, An. 4: 229.
ensifer (Howard). Maine s. to Fla., Wis. Host: *Aspidiota corticalis* (Ckll.), *Quadraspidiotus juglansregiae* (Comst.), *Q. perniciosus* (Comst.), *Rhizaspidiotus dearnessi* (Ckll.).
Encyrtus eusifer Howard, 1885. U. S. Dept. Agr., Bur. Ent., Bul. 5: 13, 31, 42, ♂, ♀.

Taxonomy: Girault, 1915. Ent. Soc. Amer., Ann. 8 (3): 284. — Compere, 1928. Calif. Univ., Pubs. Ent. 4 (8): 212.

ochraceipes Gahan. N. Y. Host: *Diaspis boisduvali* Sign.

Coccidencyrtus ochraceipes Gahan, 1927. U. S. Natl. Mus., Proc. 71 (4): 18-19. ♀.

Genus COMPERIELLA Howard

Comperiella Howard, 1906. Ent. News 17 (4): 121-122.

Type-species: *Comperiella bifasciata* Howard. Monotypic.

Pseudanusia Girault, 1915. Queensland Mus., Mem. 4: 155.

Type-species: *Pseudanusia pia* Girault. Orig. desig.

Habrolepistia Mercet, 1921. Fauna Iberica, Himen., Encirtidos, pp. 7, 8, 12, 14, 15, 27, 60, 66, 668-669.

Type-species: *Habrolepistia cerapterocera* Mercet. Orig. desig. The type-species is considered a synonym of *C. bifasciata*.

Comperiella contains fewer than five species and, with the exception of South America, has been recovered on every continent. It is composed of primary, internal parasites of armored scale insects.

Taxonomy: Timberlake, 1923. Ent. Soc. Wash., Proc. 25 (3): 59. — Compere, 1926. Calif. Univ., Pubs. Ent. 4 (2): 44-50. — Mercet, 1926. Eos 2 (4): 320. — Ayyar, 1934. Indian Mus., Rec. 36 (2): 220. — Subba Rao, 1966. Mushi 39 (13): 135. — Prinsloo and Annecke, 1976. Ent. Soc. Afr., Jour. 39 (2): 185-188.

bifasciata Howard. Fla., Calif. Host: *Aonidiella aurantii* (Mask.), *A. citrina* (Coq.), *Chrysomphalus aonidum* (L.). There appear to be at least two distinct races of this species.

Comperiella bifasciata Howard, 1906. Ent. News 17 (4): 122. ♀.

Biology: Flanders, 1942. Jour. Econ. Ent. 35 (6): 834-835. —Smith, 1942. Jour. Econ. Ent. 35 (6): 809-812. —Flanders, 1943. Jour. Econ. Ent. 36 (2): 233-235. —Flanders, 1944. Ent. Soc. Genus HABROLEPIS Foerster

Habrolepis Foerster, 1856. Hym. Stud., v. 2, pp. 34, 38.

Type-species: *Encyrtus nubilipennis* Walker. Orig. desig. The type-species is considered a synonym of *Encyrtus dalmanni* Westwood.

Gymnoneura Risbec, 1951. Mem. Inst. Fr. Afr. Noire 13: 157.

Type-species: *Gymnoneura bambeyi* Risbec. Monotypic.

Habrolepis contains about a dozen species which develop as primary internal parasites of scale insects. Some species have been used in biological control programs with varying degrees of success. The genus has not been reported from South America and one species, *H. rouxi*, was introduced into North America for biological control of the California red scale.

Taxonomy: Timberlake, 1921. Hawaii. Ent. Soc., Proc. 4 (2): 432. —Ferriere, 1953. Rev. Path. Veg. d'Ent. Agr. France 32 (2): 115. —Tachikawa, 1956. Insecta Matsumurana 20 (3-4): 95. —Hoffer, 1960. Genus NEOCOCCIDENCYRTUS Compere

Neococcidencyrtus Compere, 1928. Calif. Univ., Pubs. Ent. 4 (8): 209-212.

Type-species: *Neococcidencyrtus aulula* Compere. Orig. desig. The type-species designation of *aulula* is a lapsus of *n. alula*.

This small genus consists of a few species which are Neotropical and Holarctic in distribution. Its members are parasites of scale insects.

poutiersi (Mercet). Calif. Host: *Furcadaspis zamiae* (Morg.).

Coccidencyrtus poutiersi Mercet, 1922. Soc. Espan. de Hist. Nat., Bol. 22 (9): 399-402.

Neococcidencyrtus alula Compere, 1928. Calif. Univ., Pubs. Ent. 4 (8): 213-214. ♂, ♀.

Genus PLAGIOMERUS Crawford

Plagiomerus Crawford, 1910. U. S. Natl. Mus., Proc. 38: 89.

Type-species: *Plagiomerus diaspidis* Crawford. Orig. desig.

This genus contains three species and it appears to be Nearctic in distribution. The occurrence of one species, *P. diaspidis*, in the Palearctic appears due to accidental introduction with parasitized host material.

Taxonomy: Gahan, 1924. U. S. Natl. Mus., Proc. 65 (4): 1. —Trjapitzin, 1968. Vses. Ent. Obschch., Trudy 52: 76.

cyaneus (Ashmead). Fla.

Comys cyanea Ashmead, 1888. Ent. Amer. 4 (1): 17. ♀.

Taxonomy: Dozier, 1926. Puerto Rico Dept. Agr., Jour. 10 (3-4): 273-274.

diaspidis Crawford. Md. s. to Fla., w. to Calif. Host: *Diaspis echinocacti* (Bouche).

Plagiomerus diaspidis Crawford, 1910. U. S. Natl. Mus., Proc. 38: 90. ♀.

Biology: Gordh and Lacey, 1976. Ent. Soc. Wash., Proc. 78 (2): 132-144.

Genus PSEUDHOMALOPODA Girault

Pseudhomalopoda Girault, 1915. N. Y. Ent. Soc., Jour. 23 (3): 171.

Type-species: *Pseudhomalopoda prima* Girault. Orig. desig.

Pseudhomalopoda contains fewer than five species which are distributed in the Pacific and Holarctic regions. The species are parasites of scale insects.

Taxonomy: Tachikawa, 1956. Insecta Matsumurana 20 (3-4): 90-96. —Tachikawa, 1963. Mem. Ehime Univ. Sec. 6 (Agr.) 9 (1): 17, 95, 101-102.

prima Girault. Fla. w. to Tex. Host: *Aleurocanthus woglumi* Ashby?, *Aonidiella aurantii* (Mask.), *Chrysomphalus aonidum* (L.).

Pseudhomalopoda prima Girault, 1915. N. Y. Ent. Soc., Jour. 23 (3): 171-172. ♀.

Biology: Griffiths and Stearns, 1947. Fla. Ent. 30 (1): 4-7. —Muma and Clancy, 1961. Fla. State Hort. Soc., Proc. 74: 29-32. —Clancy *et al.*, 1963. Jour. Econ. Ent. 56 (5): 604. —Anonymous, 1964. Fitofolo 17 (43): 28.

TRIBE HOMALOTYLINI

Genus ANISOTYLUS Timberlake

Anisotylus Timberlake, 1919. U. S. Natl. Mus., Proc. 56: 170-171.

Type-species: *Homalotylus similis* Ashmead. Orig. desig.

A small genus with fewer than five species, *Anisotylus* is found in North America and Japan. The species of this genus are parasitic on coccinellid beetle larvae.

pallentipes Timberlake. Mo., Ariz.

Anisotylus pallentipes Timberlake, 1919. U. S. Natl. Mus., Proc. 56: 171, 175-176. ♀.

similis similis (Ashmead). Fla. Host: *Scymnus cervicalis* Muls.

Homalotylus similis Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 190. ♀.

Taxonomy: Timberlake, 1919. U. S. Natl. Mus., Proc. 56: 171-173.

similis texanus Timberlake. Tex. Host: *Hyperaspis bigeminata* (Rand.).

Anisotylus similis texanus Timberlake, 1919. U. S. Natl. Mus., Proc. 56: 171, 173. ♀.

similis utahensis Timberlake. Utah, Calif. Host: *Scymnus americanus* Muls., *S. lacustris* Lec.

Anisotylus similis utahensis Timberlake, 1919. U. S. Natl. Mus., Proc. 56: 171, 174. ♂, ♀.

Genus HOMALOTYLUIS Mayr

Homalotylus Mayr, 1876 (1875). Zool.-Bot. Gesell. Wien, Verhandl. 25: 752-753.

Type-species: *Encyrtus flaminius* Dalman. Desig. by Ashmead, 1900.

Nobrimus Thomson, 1876 (1875). Hym. Scand., v. 4, pp. 116, 137-138.

Type-species: *Encyrtus flaminius* Dalman. Desig. by Timberlake, 1919.

Mendozaniella Brethes, 1913. Buenos Aires Mus. Nac. de Hist. Nat., An. 24: 97-98.

Type-species: *Mendozaniella mirabilis* Brethes. Monotypic.

Hemaenasoidea Girault, 1916. Ent. Soc. Amer., Ann. 9 (3): 307.

Type-species: *Hemaenasoidea oculata* Girault. Monotypic.

Lepidaphycus Blanchard, 1936. Soc. Ent. Argentina, Rev. 8: 13-14.

Type-species: *Lepidaphycus bosqui* Blanchard. Orig. desig.

This cosmopolitan genus consists of about 35 described species. They are internal parasites of coccinellid beetle larvae.

Taxonomy: Timberlake, 1919. U. S. Natl. Mus., Proc. 56: 134-170. — Masi, 1919. Genova Mus.

punctifrons Timberlake. Fla.

Homalotylus punctifrons Timberlake, 1919. U. S. Natl. Mus., Proc. 56: 162, 169-170. ♀.

terminalis californicus Girault. Mass. s. to S. C., Utah, Calif. Host: *Adalia bipunctata* (L.), *Coccinella novemnotata* Hbst., *C. quinquepunctata* Kby., *C. transversoguttata* Fald., *Hippodamia convergens* Guer., *Disonychus* sp.

Homalotylus obscurus var. *californicus* Girault, 1915. Ent. Soc. Amer., Ann. 8 (3): 274. ♀.

terminalis terminalis (Say). Eastern U. S., Tex. Host: *Coleonegilla maculata* (Deg.), *C.* sp., *Cycloneda sanguinea* (L.), *C. sanguinea immaculata* (F.); *Chilocorus similis* (Rossi); *Coccinella novemnotata* Hbst., *C. sanguinea* (L.); *Hippodamia convergens* Guer., *Neomysia pullata* (Say), *Psylllobora vigintimaculata* (Say); *Scymnus* sp.

Serlion(?) terminalis Say, 1828. Contrib. Maclur. Lyc. Phila. 1: 80. Generic name a *lapsus* for *Scelio*.

Eutelus? *scymnae* Shimer, 1869. Amer. Ent. Soc., Trans. 2: 385. ♂.

Homalotylus obscurus Howard, 1885. U. S. Dept. Agr., Bur. Ent., Bul. 5: 22, 32, 43. ♀.

Genus ISODROMUS Howard

Isodromus Howard, 1887. U. S. Dept. Agr., Ann. Rept. for 1886. p. 488.

Type-species: *Isodromus iceryae* Howard. Monotypic.

Parataneostigma Girault, 1915. Ent. Soc. Amer., Ann. 8 (3): 275.

Type-species: *Parataneostigma nigriaxillae* Girault. Monotypic. The type-species is considered a synonym of *Isodromus iceryae* Howard.

Isodromus is a cosmopolitan genus consisting of 13 species that parasitize chrysopids and hemerobiids.

Taxonomy: Timberlake, 1919. U. S. Natl. Mus., Proc. 56: 176-190. — Annecke, 1962. Ent. Soc. So. Afr., Jour. 25 (2): 188-191. — Trjapitzin, 1968. Vses. Ent. Obsch., Trudy 52: 69.

atriventris Ashmead. Ont., Que. s. to Fla. Host: *Chrysopa lateralis* Guer.

Isodromus atriventris Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 379. ♀.

iceryae Howard. Cosmopolitan. Host: *Sypherobius angustus* (Banks), *S. californicus* (Banks), *Chrysopa californica* Coq., *C. lateralis* Guer., *C. rufilabris* Burm.

Isodromus iceryae Howard, 1887. U. S. Dept. Agr., Ann. Rept. for 1886. p. 488. ♀.

Parataneostigma nigriaxillae Girault, 1915. Ent. Soc. Amer., Ann. 8 (3): 275. ♀.

Isodromus pulcher Girault, 1917. Descr. Stellarum Nov., p. 16. ♀.

Biology: Riley, 1889. U. S. Dept. Agr., Ann. Rept. for 1888, pp. 85-86. — Clancy, 1946. Calif. Univ., Pubs. Ent. 7 (13): 426-432. — Maple, 1947. Calif. Univ., Pubs. Ent. 8 (2): 91-92. — Muma, 1959. Fla. Ent. 42 (3): 151, 152.

montanus Slosson. N. H., Colo. Host: *Chrysopa* sp. Type lost, but may be *Isodromus vinulus* (Dalman).

Isodromus montanus Slosson, 1895. Ent. News 6 (9): 278.

niger Ashmead. Mass. s. to D. C., w. to Wis., Calif. Host: *Sypherobius angustus* (Banks), *Chrysopa californica* Coq., *C. majuscula* Banks, *C. oculata* Say.

Isodromus niger Ashmead, 1900. U. S. Natl. Mus., Proc., 22: 379. ♀.

Biology: Clancy, 1946. Calif. Univ., Pubs. Ent. 7 (13): 418-426. — Maple, 1947. Calif. Univ., Pubs. Ent. 8 (2): 91-92.

puncticeps (Howard). Eastern U. S., Calif. Host: *Chrysopa* sp.

Encyrtus puncticeps Howard, 1885. U. S. Dept. Agr., Bur. Ent., Bul. 5: 14, 42. ♀.

Aphytus chrysopae Ashmead, 1888. Ent. Amer. 4 (1): 15. ♀.

TRIBE IXODIPHAGINI

Genus HUNTERELLUS Howard

Hunterellus Howard, 1908. Canad. Ent. 40 (7): 240-241.

Type-species: *Hunterellus hookeri* Howard. Monotypic.

Hunterellus is worldwide in distribution and contains fewer than five species. They are parasites of tick nymphs.

Taxonomy: Howard, 1908. Canad. Ent. 40 (7): 239-241. — Risbec, 1954. Inst. Fr. Afr. Noire, Bul. Ser. A 16 (4): 1070-1071. — Oliver, 1964. Pan-Pacific Ent. 40 (4): 227-230.

Biology: Doube and Heath, 1975. Jour. Med. Ent. 12 (4): 443-447.

hookeri Howard. Mass. s. to Fla. w. to Mont., Idaho, Calif. Host: *Dermacentor andersoni* Stiles, *D. parumapterus* Neum., *D. variabilis* (Say), *Haemaphysalis leporispalustris* (Pack.), *Ixodes dentatus* Marx, *I. muris* B. and S., *I. scapularis* Say, *Rhipicephalus sanguineus* (Latr.).

Hunterellus Hookeri Howard, 1908. Canad. Ent. 40 (7): 241. ♂, ♀.

Ixodiphagus Cancertei du Buysson, 1912. Arch. de Parasitol. 15: 246-247. ♂, ♀.

Habrolepis caniphila Risbec, 1951. Inst. Fr. Afr. Noire, Mem. 13: 170-172.

Taxonomy: Gahan, 1934. Ent. Soc. Wash., Proc. 36 (6): 89-97. — Quaraishi, 1958. Amer. Midland Nat. 59 (2): 489-504.

Biology: Wood, 1911. Jour. Econ. Ent. 4 (5): 425-431. — Cooley, 1927. Mont. State Bd. Ent., Bien. Rpt. 6: 15-17. — Cooley and Kohls, 1928. Science 67 (1748): 656. — Cooley, 1929 (1927-1928). Mont. State Bd. Ent., Bien. Rpt. 7: 10-16; 17-31. — Morton, 1929 (1927-1928). Mont. State Bd. Ent., Bien. Rpt. 7: 32-35. — Parker and Butler, 1929 (1927-1928). Mont. State Bd. Ent., Bien. Rpt. 7: 35-38. — Cooley, 1930. Mont. State Bd. Ent., Bien. Rpt. 8: 16-25. — Cooley and Kohls, 1934. Fifth Pacific Sci. Cong., Proc. B. 5: 3375-3381. — Bishopp, 1938. U. S. Dept. Agr., Cir. 478: 23. — Smith and Cole, 1943. Jour. Econ. Ent. 36 (4): 569-572. — Ushakova, 1962. Kazan Inst. Zool. Akad. Nauk SSSR, Trudy 16: 183-185.

Genus IXODIPHAGUS Howard

Ixodiphagus Howard, 1907. Ent. News 18 (9): 377.

Type-species: *Ixodiphagus texanus* Howard. Monotypic.

Ixodiphagus is apparently a monotypic genus distributed throughout the Holarctic Region. The type-species parasitizes tick nymphs.

Taxonomy: Hoffer, 1963. Mus. Nat. Pragae, Acta Ent. 35: 591.

texanus Howard. Mass., Minn. w. to Idaho, Tex. Host: *Dermacentor variabilis* (Say), *Haemaphysalis leporispalustris* (Pack.), *Ixodes cookei* Pack., *I. dentatus* Marx, *I. scapularis* Say, *Rhipicephalus sanguineus* (Latr.).

Ixodiphagus texanus Howard, 1907. Ent. News 18 (9): 376, 377-378. ♀.

Taxonomy: Gahan, 1934. Ent. Soc. Wash., Proc. 36 (6): 89-97. — Quaraishi, 1958. Amer. Midland Nat. 59 (2): 502.

Biology: Larson, 1937. Jour. Parasitol. 24: 496-498. — Larson and Green, 1938. Jour. Parasitol. 24: 363-368. — Smith *et al.*, 1946. U. S. Dept. Agr., Tech. Bul. 905: 72.

TRIBE MICROTERYINI

Genus AGROMYZAPHAGUS Gahan

Agromyzaphagus Gahan, 1912. Ent. Soc. Wash., Proc. 14 (1): 6-7.

Type-species: *Agromyzaphagus detrimentosus* Gahan. Orig. desig.

This monotypic genus is Holarctic. It parasitizes flies of the genus *Leucopis*.

Taxonomy: Mercet, 1926. Eos 2 (4): 317. — Trjapitzin, 1968. Vses. Ent. Obsheh., Trudy 52: 65-66.

detrimentosus Gahan. Md. w. to Wis., Utah, Calif. Host: *Leucopis nigricornis* Egger?, *L.* sp. on plum.

Agromyzaphagus detrimentosus Gahan, 1912. Ent. Soc. Wash., Proc. 14 (1): 7. ♂, ♀.

Genus APHIDENCYRTUS Ashmead

Aphidencyrtus Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 340, 347, 398.

Type-species: *Eucyrtus aphidiphagus* Ashmead. Orig. desig. The type-species is considered a synonym of *Eucyrtus aphidivorus* Mayr.

This is a cosmopolitan genus consisting of about 20 species which are hyperparasites (and perhaps primary parasites) of aphids.

Taxonomy: Gahan, 1923. Ent. Soc. Wash., Proc. 25 (9): 187-188. — Narayanan, 1941. Indian Jour. Ent. 3 (1): 62. — Risbec, 1952. Inst. Sci. Madagascar Ser. E, Ent., Mem. 2: 6, 52. — Alam, 1961. Beitr. zur Ent. 11 (7-8): 803-807. — Hoffer, 1965. Acta Ent. Bohemoslov. 62 (2): 110-128. — Trjapitzin, 1967. Akad. Nauk SSSR Zool. Inst., Trudy 41: 202-205. — Graham, 1969. Polskie Pismo Ent. 39 (2): 252-255.

aphidivorus (Mayr). Maine, Conn. s. to Fla., w. to La., Idaho. Host: *Rhopalosiphonius solani* (Thos.), *Nearctaphis bakeri* (Cowen), *Cararellia aquatica* (G. and B.), *Brevicoryne brassicae* (L.), *Acyrtosiphon cornelli* (Patch), *M. avenae* (F.), *M. lirioidendri* (Monell), *Myzus persicae* (Sulz.), *Schizaphis graminum* (Rond.), *Trialeurodes vaporariorum* (Westw.), *Aphelinus juncundus* Gahan, *A. sanborniae* Gahan, *A. semiflavus* How., *A. sp.*, *Aphidius testaceipes* (Cress.), *A. spp.*

Eucyrtus aphidivorus Mayr, 1876 (1875). Zool.-Bot. Gesell. Wien, Verhandl. 25: 712-713, 724. ♂, ♀.

Eupelmus schizoneurus Ashmead, 1885. Amer. Ent. Soc., Trans. 12: Proc. p. xvi. ♂, ♀ (under *Eucyrtus*).

Eucyrtus aphidiphagus Ashmead, 1887. U. S. Dept. Agr., Div. Ent., Bul. 14: 14. ♀.

Eucyrtus megovae Ashmead, 1887. U. S. Dept. Agr., Div. Ent., Bul. 14: 19. ♂, ♀.

Eucyrtus Websteri Howard, 1890. U. S. Dept. Agr., Insect Life 2 (7-8): 247-248. ♂, ♀.

Microterys submetallicus Mercet, 1921. Fauna Iberica, Himen., Encirtidos, p. 354. Preocc. by Howard, 1896.

Syrphophagus silvestrinus Ghesquiere, 1956 Lab. Zool. Gen. e Agr. Portici, Bol. 33: 701. (n. name for *submetallicus* Mercet).

Syrphophagus merceti Erdos, 1957. Folia Ent. Hungarica (n. s.) 10 (1): 45 (n. name for *submetallicus* Mercet).

Taxonomy: Gahan, 1924 (1923). Ent. Soc. Wash., Proc. 25 (9): 187-188. — Gahan, 1927. U. S. Natl. Mus., Proc. 71 (4): 18. — Gahan, 1930. U. S. Natl. Mus., Proc. 77 (8): 6-7. — Mercet, 1932. Los paras. los ins. perjud. Barcelona, pp. 108-109. — Narayanan, 1941. Indian Jour. Ent. 3 (1): 62. — Ferriere, 1961. Entomophaga 6 (1): 48-49. — Bakkendorf, 1965. Ent. Meddel. 30 (2): 114-115. — Hoffer, 1965. Acta Ent. Bohemoslov. 62 (2): 112-115.

lachni (Ashmead). Fla. Host: *Cinara australi* (Ashm.).

Eupelmus lachni Ashmead, 1885. Amer. Ent. Soc., Trans. Proc. p. xvi. ♀ (under *Eucyrtus*).

Taxonomy: Gahan, 1927. U. S. Natl. Mus., Proc. 71 (4): 18.

Genus AVETIANELLA Trjapitzin

Avetianella Trjapitzin, 1968. Vses. Ent. Obschch., Trudy 52: 97-99.

Type-species: *Acetianella capnodobia* Trjapitzin. Orig. desig.

An undetermined species has been taken in California on *Pinus lambertiana*.

Genus CERCHYSIUS Westwood

Cerchysius Westwood, 1832. London, Edinb. and Dublin Phil. Mag. and Jour. Sci. (3) 1: 127.

Type-species: *Eucyrtus urocerus* Dalman. Desig. by Westwood, 1840. The type-species is considered a synonym of *Eucyrtus subplanus* Dalman.

There are about twenty species of *Cerchysius* distributed throughout the world. Members of the genus are probably parasites of Diptera.

Taxonomy: Girault, 1918. Ent. News 29 (2): 65-66. —Kerrich, 1954. Ann. and Mag. Nat. Hist. (12) 8: 371-379.

elasmoceri Ashmead. D. C., Va. Host: *Monophylla terminata* (Say).

Cerchysius elasmoceri Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 379-380. ♀.

Taxonomy: Girault, 1917 (1916). Insecutor Inscitiae Menstruus 4 (10-12): 119-120. —Girault, 1918. Ent. News 29 (2): 65.

hubbardii Ashmead. Wash. Calif. Host: *Vrilletta hubbardi* Schwarz (?nomen nudum) infesting stems of *Aleurhoffia occidentalis*.

Cerchysius hubbardii Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 380. ♀.

pallipes (Provancher). Ont.

Copidosoma pallipes Provancher, 1887. Addit. Corr. Faune Ent. Canada Hym., p. 205. ♀.
Copidosoma pallidipes Dalla Torre, 1898. Cat. Hym. v. 5, p. 243. Unjustified emend.

Taxonomy: Burks, 1964 (1963). Canad. Ent. 95 (12): 1257.

Genus MICROTERTYS Thomson

Sceptrophorus Foerster, 1856. Hym. Stud., v. 2, pp. 34, 38.

Type-species: *Eucyrtus sceptrigera* Foerster. Desig. by Ashmead, 1900.

Microterys Thomson, 1876 (1875). Hym. Seand. v. 4, pp. 118, 155.

Type-species: *Eucyrtus sylvius* Dalman. Desig. by Ashmead, 1900.

Apentelius Fullaway, 1913. Hawaii Agr. Expt. Sta., Rpt. for 1912, p. 26.

Type-species: *Apentelius kotinskyi* Fullaway. Orig. desig.

The names *Microterys* and *Sceptrophorus* have been used interchangeably in the literature. Rosen (1973, Bul. Zool. Nomencl. 30 (2): 108-111) proposed that *Sceptrophorus* be suppressed.

The actual number of *Microterys* spp. can only be speculated at this time. Currently we recognize over 170 names in the genus, some of which are undoubtedly junior synonyms. The genus probably contains over 100 valid species. The New World fauna is poorly known.

This genus is important to biological control because many species are primary parasites of soft scale insects. Representatives of *Microterys* have been reported on all families of scale insects except the Diaspididae and Asterolecanidae.

Taxonomy: Girault, 1917. Descr. Stellarum Nov., p. 13. —Mercet, 1917. Soc. Espan. de Hist. Nat., Bol. 17 (2): 128-139. —Timberlake, 1923. Ent. Soc. Wash., Proc. 25 (3): 58-59.

Genus OOBBIUS Trjapitzin

Oobius Trjapitzin, 1963. Mus. Nat. Pragae, Acta Ent. 35: 543, 544-545.

Type-species: *Tyndarichus rudneri* Nowicki. Orig. desig.

Oobius is a small genus, consisting of about five species, and is Holarctic and Ethiopian in distribution. These insects are parasites in the eggs of buprestid beetles. An undetermined species is found in Arizona and California. It has been taken from *Pinus muricata*, *Libocedrus decurrens*, and reared from *Melanophila californica* Van Dyke on *P. ponderosa*.

Genus OOEENCYRTUS Ashmead

Oeencyrtus Ashmead 1900. U. S. Natl. Mus., Proc. 22: 338, 345, 381.

Type-species: *Eucyrtus elisiocampae* Ashmead. Orig. desig.

Schedius Howard, 1910. U. S. Dept. Agr., Bur. Ent., Tech. Ser. 19 (1): 2-3.

Type-species: *Schedius kuvanae* Howard. Orig. desig.

Oeencyrtus is another cosmopolitan genus the size of which is difficult to determine. All species are egg parasites of other insects.

Taxonomy: Timberlake, 1923. Ent. Soc. Wash., Proc. 25 (3): 59. — Mercet, 1925. Eos 1 (3): 324-328. — Ferriere, 1931. Bul. Ent. Res. 22 (2): 281-286. — Hoffer, 1963. Mus. Nat. moneilemae Gahan. Tex. Host: *Moneilema crassa* Lee.

Ooencyrtus moneilemae Gahan, 1925. Ent. Soc. Wash., Proc. 27 (8): 167-168. ♂, ♀.

Genus PLATENCYRTUS Ferriere

Platencyrtus Ferriere, 1955. Soc. Ent. de France, Bul. 60 (1-2): 11-12.

Type-species: *Platencyrtus parkeri* Ferriere. Orig. desig.

Platencyrtus Erdos and Novicky, 1955. Beitr. zur Ent. 5 (1-2): 197.

Type-species: *Platencyrtus esuriens* Erdos and Novicky. Orig. desig.

Interestingly, both Ferriere and Erdos and Novicky selected the same generic name for identical species. Ferriere's publication date preceeds that of Erdos and Novicky and therefore has priority. This monotypic genus parasitizes mealybugs on *Phragmites*.

parkeri Ferriere. N. Y.

Platencyrtus parkeri Ferriere, 1955 (Jan.). Soc. Ent. de France, Bul. 60 (1): 11-12. ♂, ♀.

Platencyrtus esuriens Erdos and Novicky, 1955 (June). Beitr. zur. Ent. 5: 197, ♂, ♀.

Genus PSEUDENCYRTUS Ashmead

Pseudencyrtus Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 340, 346, 396.

Type-species: *Encyrtus cecidomyiae* Howard. Orig. desig.

A small genus consisting of approximately nine species, *Pseudencyrtus* is Holarctic in distribution and parasitizes Diptera.

Taxonomy: Erdos, 1957. Acta. Zool. (Budapest). 3 (1-2): 39. —Graham, 1958. Ent. Tidskr. 79 (3-4): 158. —Bakkendorf, 1965. Ent. Meddel. 30 (2): 162-163. —Graham, 1969. Polskie Pismo Ent. 39 (2): 250-252.

bolus (Walker). Ont.

Encyrtus Bolus Walker, 1844. Ann. and Mag. Nat. Hist. (1) 14: 17. ♀.

Taxonomy: Burks, 1975. Brit. Mus. (Nat. Hist.) Ent., Bul. 32 (4): 147-148.

cecidomyiae (Howard). Que., Ont. s. to Fla., w. to Mich. Host: *Mayetiola rigidae* (O. S.), *Rhabdophaga strobilooides* (O. S.).

Encyrtus cecidomyiae Howard, 1885. U. S. Dept. Agr., Bur. Ent., Bul. 5: 16, 32, 42. ♂, ♀.

Taxonomy: Girault, 1916. Ent. News 27 (9): 402.

pleuralis (Ashmead). Ohio. Host: *Atomaria* sp.(?).

Encyrtus pleuralis Ashmead, 1893. Ohio Agr. Expt. Sta., Tech. Ser., Bul. 1: 163. ♀.

Genus PSEUDENCYRTOIDES Gordh and Trjapitzin

Pseudencyrtoides Gordh and Trjapitzin, 1975. Ent. Rev. 54 (4): 872-873.

Type-species: *Pseudencyrtoides cupressi* Gordh and Trjapitzin. Orig. desig.

cupressi Gordh and Trjapitzin. Calif. Host: Cecidomiid galls on *Cupressus*.

Pseudencyrtoides cupressi Gordh and Trjapitzin, 1975. Ent. Rev. 54 (4): 873-875. ♀, ♂.

Genus SYRPHOPHAGUS Ashmead

Syrphophagus Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 340, 346, 397.

Type-species: *Encyrtus mesograptae* Ashmead. Orig. desig. The type-species is considered to be a synonym *Pteromalus quadrivittatus* Ashmead.

Syrphophagus is a cosmopolitan genus of fly parasites and is related to *Pseudencyrtus*. About 25 species are recognized.

Taxonomy: Graham, 1958. Ent. Tidskr. 79 (3-4): 160. —Agarwal, 1962. Indian Jour. Ent. 24 (4): 244-251. —Hoffer, 1965. Mus. Natl. Pragae, Acta Ent. 36: 364-369. —De Santis, 1966. Com. Inv. Cient. Prov. Buenos Aires, Notas 3 (9): 7-8. —Erdos, 1957. Acta. Zool. (Budapest) 3 (1-2): 37-39. —Yasumatsu, 1963. Mushi 37 (10): 124. —Ghesquiere, 1956. Lab. Zool. Gen. Agr. Fac. Agr. Portici, Bol. 33: 701.

quadrimaculatus (Ashmead). S. C. s. to Fla., w. to La. Host: *Syrphus ribesii* (L.), *Roxomerus polita* (Say).

Pteromalus 4-maculatae Ashmead, 1881. Canad. Ent. 13 (8): 171-172. ♂, ♀.

Encyrtus mesograptae Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 232. ♀.

Taxonomy: Girault, 1916. Canad. Ent. 48 (10): 344.

smithi Kamal. Calif. Host: *Syrphus nitens* Zett., *S. opinator* O. S.

Syrphophagus smithi Kamal, 1926. Canad. Ent. 58 (12): 284. ♀.

Biology: Kamal, 1939. Egypt Min. Agr., Tech. and Sci. Serv., Ent. Sect., Bul. 207: 34, 46, 48.

Genus TACHINAEPHAGUS Ashmead

Tachinaephagus Ashmead, 1904. Carnegie Mus., Mem. 1 (4): 304.

Type-species: *Tachinaephagus zealandicus* Ashmead. Orig. desig.

Australencyrtus Johnson and Tiegs, 1921. Roy. Soc. Queensland, Proc. 33 (6): 118-123.

Type-species: *Australencyrtus giraulti* Johnson and Tiegs. Orig. desig.

Tachinacphagus Girault, 1917. Insector Inscitiae Menstruus 5 (7-9): 142.

Type-species: *Tachinacphagus australiensis* Girault. Orig. desig.

Stenosterys Dodd, 1921. In Froggatt, Agric. Gaz. N. S. Wales 32 (10): 728. Unjustified emend. of *Stenoterys* Thomson.

Australomalotylus Risbec, 1956. Ann. Parasit. Hum. Comp. 30 (1-2): 169.

Type-species: *Australomalotylus rageaui* Risbec. Monotypic.

Tachinaephagus is cosmopolitan in distribution and contains fewer than five species. Apparently all species are parasites of fly pupae.

Taxonomy: Girault, 1924. Homo Perniciosus and New Hymenoptera p. 4. —Ghesquiere, 1960. Rev. Zool. Bot. Africaines 62 (1-2): 53-58.

Biology: Hardy, 1924. Queensland Agr. Jour. 22 (5): 349-350.

zealandicus Ashmead. Calif. No. Car. Adventive. Host: Diptera pupae.

Tachinaephagus zealandicus Ashmead, 1904. Carnegie Mus., Mem. 1 (4): 304 ♀.

Tachinacphagus australiensis Girault, 1917. Insector Inscitiae Menstruus 5 (7-9): 142-143.

Stenosterys fulvoventralis Dodd, 1921. Agr. Gaz. N. S. Wales 32 (10): 730-731.

Australencyrtus giraulti Johnson and Tiegs, 1921. Roy. Soc. Queensland, Proc. 33 (6): 118-123.

Australomalotylus rageaui Risbec, 1956. Ann. Parasitol. Hum. Comp. 30 (1-2): 170-173.

Taxonomy: Gahan, 1938. Ent. Soc. Wash., Proc. 40 (8): 210-211. —Ghesquiere, 1960. Rev. Zool. Bot. Africaines 62 (1-2): 55-56. —Timberlake, 1941. B. P. Bishop Mus., Oceas. Papers 16 (9): 216, 226-227.

Biology: Johnson and Tiegs, 1921. Roy. Soc. Queensland, Proc. 33 (6): 107-110, 117.

Genus TRICHOMASTHUS Thomson

Trichomasthus Thomson, 1876 (1875). Hym. Scand., v. 4, pp. 117, 142-143.

Type-species: *Encyrtus cyaneus* Dalman. Desig. by Gahan and Fagan, 1923.

Coccidozenus Crawford, 1913. U. S. Natl. Mus., Proc. 45: 248.

Type-species: *Coccidozenus portoricensis* Crawford. Orig. desig.

Stenoteropsis Girault, 1915. Queensland Mus., Mem. 4: 176, 181.

Type-species: *Stenoteropsis abjectus* Girault. Orig. desig.

Tetracnemella Girault, 1915. Queensland Mus., Mem. 4: 170, 182.

Type-species: *Tetracnemella australiensis* Girault. Orig. desig.

Trichomasthus is a cosmopolitan genus containing over forty described species, most of which are apparently parasites of soft-scale insects.

Taxonomy: Trjapitzin, 1964. Zool. Zhur. 43 (10): 1457-1462. —Alam, 1957. Roy. Ent. Soc. London, Trans. 109 (15): 446-450. —Annecke, 1964. Ent. Soc. So. Afr., Jour. 26 (2): 390-410. —Trjapitzin, 1968. mexicanus (Girault). Fla. w. to Ariz.

Coccidoxyenus mexicanus Girault, 1917. Descr. Stellarum Nov. p. 21. ♀.

niloticus Compere. Calif. Released, possibly established. Host: *Saissetia oleae* (Oliv.).

Coccidoxyenus niloticus Compere, 1940. Hilgardia 13 (7): 395, 405-407. ♂, ♀.

nubilipennis (Girault). Va. w. to Ill.

Anagyrus nubilipennis Girault, 1909. Psyche 16 (4): 76-77. ♂, ♀.

TRIBE MIRAINI

Genus BAEOCHARIS Mayr

Baeocharis Mayr, 1876 (1875). Zool.-Bot. Gesell. Wien, Verhandl. 25: 767-768.

Type-species: *Baeocharis pascuorum* Mayr. Monotypic.

Sphaeropisthus Thomson, 1876 (1875). Hym. Scand., v. 4, pp. 116, 131-132.

Type-species: *Sphaeropisthus pascuorum* Thomson. Monotypic. The type-species may be a junior synonym of *Baeocharis pascuorum* Mayr, but see Ferriere (1955).

This genus consists of three Holarctic species that are parasites of scale insects.

Taxonomy: Ruschka, 1912. Zool.-Bot. Gesell. Wien, Verhandl. 62 (7): 240. —Ferriere, 1955. Ent. Schweiz. Gesell., Mitt. 26 (1): 7.

annulicornis (Ashmead). Fla.

Sphaeropisthus annulicornis Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 369. ♂.

auriceps (Ashmead). Fla.

Sphaeropisthus auriceps Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 369-370. ♀.

pascuorum Mayr. N. H. Host: *Eriopeltis festucae* (Fonsc.).

Baeocharis pascuorum Mayr, 1876 (1875). Zool.-Bot. Gesell. Wien, Verhandl. 25: 768. ♂, ♀.

Encyrtus flavoscutatus Six, 1876. Tijdschr. Ent. 19: 135.

Taxonomy: Trjapitzin, 1968. Vses. Ent. Obschch., Trudy 52: 51.

Genus MAYRIDIA Mercet

Mayridia Mercet, 1921. Fauna Iberica, Himen., Encirtidos, pp. 426-427.

Type-species: *Mayridia pulchra* Mercet. Orig. desig.

This is a Holarctic genus containing 13 species. Host records for this genus are incomplete, but at least two species have been associated with *Aclerda* and *Trionymus*. These host genera belong to different coccoid families and are associated with grasses.

Taxonomy: Mercet, 1921. Fauna Iberica, Himen., Encirtidos pp. 426-436. — Erdos, 1957. Acta Zool. (Budapest). 3 (1-2): 47, 48-54. — Bakkendorf, 1965. Ent. Meddel. 30 (2): 138-139. — Trjapitzin, 1967. Akad. Nauk SSSR Zool. Inst., Trudy 41: 205-206. — Graham, 1969. Polskie Pismo Ent. 39 (2): 272-273.

americanica Timberlake. N. Dak., S. Dak., Utah. Host: *Trionymus utahensis* (Ckll.).

Mayridia americana Timberlake, 1926. U. S. Natl. Mus., Proc. 69 (2629): 28-33. ♂, ♀.

ferrierei Burks. N. J. Host: *Aclerda xalapenseae* McCon. on *Panicum xalapense*.

Mayridia ferrierei Burks, 1964. Entomophaga 9 (1): 17-18. ♂, ♀.

Genus MIRA Schellenberg

Mira Schellenberg, 1803. Genres de Mouches Dipteres, p. 68.

Type-species: *Mira macrocera* Schellenberg. Monotypic.

Dicelloceras Menzel, 1855. Stettin. Ent. Ztg. 17: 270.

Type-species: *Dicelloceras vibrans* Menzel. Monotypic.

Euryscapus Foerster, 1856. Hym. Stud., v. 2, pp. 32, 35.

Type-species: *Eucyrtus platycerus* Dalman. Orig. desig.

Lonchoceras Dahlbom, 1857. Ofvers. K. Vetensk. Akad., Forh. 14 (8): 292.

Type-species: *Eucyrtus platycerus* Dalman. Subsequent monotypy (Thomson, 1876 (1875)).

Euzkadia Mercet, 1921. Fauna Iberica, Himen., Encirtidos, pp. 14, 28, 45, 48, 59, 71, 81, 552-553.

Type-species: *Euzkadia integralis* Mercet. Orig. desig.

Mira is a small genus and is Holarctic in distribution.

Taxonomy: Mercet, 1921. Fauna Iberica, Himen., Encirtidos, pp. 181-183. — Mercet, 1922. Soc. Espan. de Hist. Nat., Bol. 22 (5): 264-267. — Erdos, 1957. Acta Zool. (Budapest). 3 (1-2): 24-25.

macrocera Schellenberg. Idaho.

Mira macrocera Schellenberg, 1803. Genres de Mouches Dipteres, pp. 68-69.

TRIBE NEOCLADINI

Genus CARABUNIA Waterston

Carabunia Waterston, 1928. Bul. Ent. Res. 19 (3): 249.

Type-species: *Carabunia myersi* Waterston. Orig. desig.

Carabunia is a monotypic genus found in the neotropics. It has been employed in biological control of the spittle bug *Clastoptera undulata* Uhler.

Biology: Myers, 1930. Bul. Ent. Res. 21 (3): 341-351. — Maple, 1947. Calif. Univ., Pubs. Ent. 8 (2): 70. — Dustan, 1960. Burmuda Dept. Agr., Bul. 33: 1-11.

myersi Waterston. Fla. Host: *Clastoptera undulata* Uhler.

Carabunia myersi Waterston, 1928. Bul. Ent. Res. 19 (3): 249-251. ♂, ♀.

Biology: Bennett and Hughes, 1963. Entomophaga 8 (1): 49-66.

Genus ZARHOPALUS Ashmead

Zarhopalus Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 342, 406.

Type-species: *Zarhopalus sheldoni* Ashmead. Orig. desig.

Anagyrella Girault, 1915. N. Y. Ent. Soc., Jour. 23 (3): 168-169.

Type-species: *Anagyrella corvina* Girault. Monotypic.

A genus consisting of six species, *Zarhopalus* is Nearctic and Ethiopian in distribution. One species has been described from the Caribbean. These insects are mealybug parasites.

Taxonomy: Timberlake, 1924. Calif. Univ., Pubs. Ent. 3 (2): 235-236. —Joubert, 1943. Union So. Africa, Dept. Agr. Forestry, Bul. 243, p. 4. —Bennett, 1957. Canad. Ent. 89 (12): 571-572.

corvinus (Girault). Que., Calif. Host: *Pseudococcus maritimus* (Ehrh.), *P.* sp._{ss}
Anagrella corvina Girault, 1915. N. Y. Ent. Soc., Jour. 23 (3): 169. ♀.

Biology: Clausen, 1924. Calif. Univ., Pubs. Ent. 3 (2): 256-271. —Maple, 1947. Calif. Univ., Pubs. Ent. 8 (2): 55, 115.

inquisitor (Howard). Md. s. to Fla., w. to Ariz. Host: *Planococcus citri* (Risso).

Eucyrtus inquisitor Howard, 1881. U. S. Dept. Agr., Ann. Rept. for 1880, p. 367. ♀.

sheldoni Ashmead. N. Y., Calif. Host: *Pseudococcus maritimus* (Ehrh.).

Zarhopalus sheldoni Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 406. ♀.

Biology: Clausen, 1924. Calif. Univ., Pubs. Ent. 3 (2): 257-265. —Clancy and Pollard, 1947. Jour. Econ. Ent. 40 (4): 578-579.

TRIBE PRIONOMASTICINI

Genus HEXACLADIA Ashmead

Hexacladia Ashmead, 1891. U. S. Dept. Agr., Insect Life 3 (11-12): 456.

Type-species: *Hexacladia smithii* Ashmead. Desig. by Ashmead, 1900.

Sophencyrtus Crawford, 1911. U. S. Natl. Mus., Proc. 41: 275-276.

Type-species: *Sophencyrtus townsendi* Crawford. Orig. desig.

Hexacladia is a New World genus composed of six species. They are parasites of true bugs of the families Coreidae, Pyrrhocoridae and Pentatomidae.

Taxonomy: Howard, 1892. U. S. Natl. Mus., Proc. 15: 364-366. —Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 337, 377. —Timberlake, 1926. U. S. Natl. Mus., Proc. 96 (3): 12. —De Santis, 1965. Com. Inv. Cien. Prov. Buenos Aires, An. 4: 114. —Burks, 1972. Ent. Soc. Wash., Proc. 74 (4): 363-371.

hilaris Burks. Ohio w. to Kans. Host: *Acrosternum hilare* (Say).

Hexacladia hilaris Burks, 1972. Ent. Soc. Wash., Proc. 74 (4): 363, 367-368. ♂, ♀.

smithi Ashmead. Fla. Host: *Euschistus crenator* (F.).

Hexacladia smithi Ashmead, 1891. U. S. Dept. Agr., Insect Life 3 (11-12): 455, 457. ♂, ♀.

TRIBE PSEUDORHOPINAE

Genus PSEUDORHOPUS Timberlake

Pseudorhopus Timberlake, 1926. U. S. Natl. Mus., Proc. 69 (3): 9.

Type-species: *Eucyrtus testaceus* Ratzeburg. Orig. desig.

Apparently some authors have confused this genus with *Rhopus*. *Pseudorhopus* is Holarctic and contains four species. They parasitize *Physokermes*, but also have been reported attacking *Lecanium*, *Lepidosaphes*, and other armored scale insect genera.

Taxonomy: Ghesquiere, 1956. Lab. Zool. Gen. Agr. Fac. Agr. Portici, Bol. 33: 686. —Alam, 1957. Roy. Ent. Soc. London, Trans. 109 (15): 423, 459-462. —Hoffer, 1960. Mus. Nat. Praagae, Acta Faun. Ent. 6: 94.

Biology: Zak-Ogaza, 1961. Polskie Pismo Ent. 31 (2): 357. —Sugonyayev, 1962. Akad. Nauk. SSSR Izv., Ser. Biol. 5: 754-766. —Schmutterer, 1965. Ztschr. f. Angew. Ent. 56 (4): 305.

fuscus (Girault). Que., Ont. The host is apparently a coccid, not *Choristoneura fumiferana* (Clem.) as previously recorded.

Rhopoideus fuscus Girault, 1912. Canad. Ent. 44 (1): 5-8. ♀.

Biology: Girault, 1920. U. S. Natl. Mus., Proc. 58: 184.

hartmani Timberlake. Tex. Host: *Lecanium* sp.

Pseudorhopus hartmani Timberlake, 1926. U. S. Natl. Mus., Proc. 69 (3): 10-12. ♂, ♀.

Taxonomy: Alam, 1957. Roy. Ent. Soc. London, Trans. 109 (15): 460.

TRIBE PSIOPHYRYDINI

Genus PSIOPHRYS Mayr

Psilophrys Mayr, 1876 (1875). Zool.-Bot. Gesell. Wien, Verhandl. 25: 727.

Type-species: *Encyrtus longicornis* Walker. Monotypic.

Psilophrys is another small, Holarctic genus composed of three or four species. One species has been reported attacking *Kermes*. Material in the U. S. National Museum Collection indicates that *armata* may parasitize *Aroga*.

Taxonomy: Trjapitzin, 1968. Vses. Ent. Obshch., Trudy 52: 69. — Graham, 1969. Polskie Pismo Ent. 39 (2): 235.

armata Ashmead. N. J., Fla. Host: *Aroga triablamaculella* (Chambers).

Psilophrys armatus Ashmead, 1888. Ent. Amer. 4 (1): 16. ♂, ♀.

TRIBE THOMSONISCINI

Genus QUAYLEA Timberlake

Quaylea Timberlake, 1919. Hawaii. Ent. Soc., Proc. 4 (1): 214-216.

Type-species: *Cerchyssius whittieri* Girault. Orig. desig.

This is a monotypic genus from Australia. *Quaylea whittieri* was introduced along with other parasites of the Black scale complex in the belief that it was a primary parasite. It is actually a hyperparasite, as suspected by foreign-explorer George Compere.

whittieri (Girault). Calif. Introduced. Host: *Saissetia oleae* (Oliv.), *Aphytus lounsburyi* How., *Scutellista cyanea* Mots., *Tomocera californica* How.

Cerchyssius whittieri Girault, 1918. Ent. News 29 (2): 66. ♀.

Hemencyrtus crawii Timberlake, 1919. Hawaii. Ent. Soc., Proc. 4 (1): 216.

Quaylea aliena Timberlake, 1919. Hawaii. Ent. Soc., Proc. 4 (1): 216-218. ♂, ♀.

Taxonomy: Girault, 1918. Ent. News 29 (2): 65-66. — Timberlake, 1922. Hawaii. Ent. Soc., Proc. 5 (1): 166-167. — Timberlake, 1924. Hawaii. Ent. Soc., Proc. 5 (3): 430. — Smith and Compere, 1928. Calif. Univ. Pubs., Ent. 4 (9): 292-295.

Biology: Flanders, 1943. Jour. Econ. Ent. 36 (6): 922-925. — Flanders, 1944. Ent. Soc. Amer., Ann. 37 (3): 365.

Taxonomy: Maple, 1947. Calif. Univ., Pubs. Ent. 8 (2): 74, 76.

Biology: Woglum *et al.*, 1947. Jour. Econ. Ent. 40 (6): 820. — Clausen, 1956. U. S. Dept. Agr., Tech. Bul. 1139, pp. 125-126.

TRIBE TRECHNITINI

Genus PRIONOMITUS Mayr

Prionomitus Mayr, 1876 (1875). Zool.-Bot. Gesell. Wien, Verhandl. 25: 701.

Type-species: *Encyrtus chlorinus* Dalman. Monotypic. The type-species is considered a synonym of *Encyrtus mitratus* Dalman.

Prionomitus is Holarctic in distribution and contains about six species. All the species are probably parasites of psyllids.

Taxonomy: Brethes, 1914. Ann. Zool. Aplic. Chile 1: 29-30. — Masi, 1919. Genova Mus. Civ. Stor. Nat., Ann. Ser. 3, 8 (48): 154-155. — Mercet, 1926. Eos 2 (4): 313-315. — Ferriere, 1961. Entomophaga 6 (1): 41-42. — Erdos, 1963. Beitr. zur Ent. 13 (3-4): 285. — Hoffer, 1963. Mus. Nat. Pragae, Acta Ent. 35: 553-556. — Graham, 1969. Polskie Pismo Ent. 39 (2): 245-246.

Biology: Ferriere, 1926. Soc. Ent. de France, Ann. 95 (2): 189-192.

mitratus (Dalman). Wis., Utah, B. C. s. to Calif. Host: Psyllid nymphs.

Encyrtus mitratus Dalman, 1820. Svenska Vetensk. Akad., Handl. 41: 352. ♀.

Encyrtus chlorinus Dalman, 1820. Svenska Vetensk. Akad., Handl. 41: 352. ♂.

Encyrtus confertae Walker, 1837. Ent. Mag. 4: 461. ♂, ♀.

Biology: Jensen, 1957. *Hilgardia* 27 (2): 71-99. — Ferriere, 1926. *Soc. Ent. de France, Ann.* 95 (2): 189-193. — Lal, 1934. *Parasitology* 26 (3): 327-328. — Bonnemaison and Missonier, 1956. *Ann. Epiphyt.*, Ser. C 7 (2): 310-314. — McMullen, 1964. *Wash. State Hort. Assoc., Proc.* 60, p. 81. — Harizanov, 1966. *Priroda (Sofia)* 15 (3): 68-69. — McMullen, 1966. *Canad. Ent.* 98 (3): 236-237.

tiliaris (Dalman). No. Amer. (?).

Encyrtus tiliaris Dalman, 1820. *Svenska Vetensk. Akad., Handl.* 41: 171.

Encyrtus subcupratus Walker, 1837. *Ent. Mag.* 4: 460. ♂, ♀.

Encyrtus subcupratus var. *E.* Walker, 1837. *Ent. Mag.* 4: 461.

Taxonomy: Masi, 1919. *Genova Mus. Civ. Stor. Nat., Ann. Ser.* 38 (48): 154-155. — Ferriere, 1961. *Entomophaga* 6 (1): 42.

Genus PSYLLAEPHAGUS Ashmead

Psyllaephagus Ashmead, 1900. *U. S. Natl. Mus., Proc.* 22: 339, 345, 382.

Type-species: *Encyrtus pachypsyllae* Howard. Orig. desig.

Metaprionomitus Mercet, 1921. *Fauna Iberica, Himen., Encertidos*, pp. 27, 58, 70, 81, 260-261.

Type-species: *Metaprionomitus intermedius* Mercet. Orig. desig.

Shakespearia Girault, 1928. *Some New Hexapods Stolen from Authority*, p. 3 (priv. publ.).

Type-species: *Shakespearia flabellata* Girault. Monotypic.

Calluniphilus Erdos, 1961. *Acta. Zool. (Budapest)* 7 (3-4): 413-414.

Type-species: *Calluniphilus vendicus* Erdos. Orig. desig.

Mercetia Bakkendorf, 1965. *Ent. Meddel.* 30 (2): 139-140.

Type-species: *Copidosoma lusitanica* Mercet. Orig. desig.

Psyllaephagus is a genus with over 100 described species. It is probably cosmopolitan, but has not been reported from the Neotropical Region. As the name implies, species of *Psyllaephagus* are parasites of psyllids. However, some species apparently are hyperparasites of other species of *Psyllaephagus*.

Taxonomy: Ashmead, 1902. *Canad. Ent.* 34 (11): 302. — Waterston, 1922. *Bul. Ent. Res.* 13 (1): 42-47. — Ferriere, 1926. *Soc. Ent. France, Ann.* 95 (2): 191-192. — Gahan and Waterston, 1926. *Bul. Ent. Res.* 16 (4): 373-375. — Mercet, 1926. *Eos* 2 (4): 313-315. — Alam, 1957. *Roy. Ent. Soc. London, Trans.* 109 (15): 423, 456-459. — Ferriere, 1961. *Entomophaga* 6 (1): 42-48. — Riek, 1962. *Austral. Jour. Zool.* 10 (4): 684-757. — Trjapitzin, 1967. *Akad. Nauk SSSR Zool. Inst., Trudy* 41: 190-194. — Trjapitzin, 1968. *Vses. Ent. Obshch., Trudy* 52: 54. — Graham, 1969. *Polskie Pismo Ent.* 39 (2): 248-249.

arbuticola Gahan and Waterston. Calif. Host: *Euphyllura arbuti* Schwarz.

Psyllaephagus arbuticola Gahan and Waterston, 1926. *Bul. Ent. Res.* 16 (4): 373-375. ♂, ♀.
pachylae (Howard). Md. s. to N. C. w. to Kans., Calif. Host: *Pachypsylla celtidisgemma* Riley, *P. venusta* (O. S.), *Trioza beameri* Tuthill.

Encyrtus pachypsyllae Howard, 1885. *U. S. Dept. Agr., Bur. Ent.*, Bul. 5: 15, 32, 42. ♂, ♀.

Biology: Jensen, 1957. *Hilgardia* 27: 79, 95. — Waterston, 1922. *Bul. Ent. Res.* 13 (1): 43.

— Appleby and Neiswander, 1962. *Ohio Agr. Expt. Sta., Res. Cir.* 111, pp. 13. — Moser, 1965. *N. Y. State Mus. Sci. Serv., Bul.* 402, p. 18.

trioziphagus (Howard). Md. s. to N. C. w. to Ohio, Calif. Host: *Trioza diospyri* (Ashm.), *Kuwayama medicaginis* (Cwf.).

Encyrtus trioziphagus Howard, 1885. *U. S. Dept. Agr., Bur. Ent.*, Bul. 5: 14 32, 42. ♂, ♀.

Biology: Eddy, 1927. *Ohio Jour. Sci.* 27 (4): 196-197. — Cazier, 1964. *Pan-Pacific Ent.* 40 (2): 73.

vectius (Walker). Florida. Host: *Trioza magnoliae* (Ashm.).

Encyrtus Vectius Walker, 1847. *Ann. and Mag. Nat. Hist.* (1) 20: 21. ♂.

Encyrtus solus Howard, 1885. *U. S. Dept. Agr., Bur. Ent.*, Bul. 5: 15, 32, 42. ♀.

Taxonomy: Gahan and Waterston, 1926. *Bul. Ent. Res.* 16 (4): 375. — Burks, 1975. *Brit. Mus. (Nat. Hist.) Ent.*, Bul. 32 (4): 148-149.

Genus TRECHNITES Thomson

Trechnites Thomson, 1876 (1875). Hym. Scand. v. 4, pp. 118, 169-170.

Type-species: *Metallon fuscitarsis* Thomson. Monotypic.

Psylledontus Crawford, 1910. U. S. Natl. Mus., Proc. 38: 88-89.

Type-species: *Psylledontus insidiosus* Crawford. Orig. desig.

Metallonella Girault, 1915. Queensland Mus., Mem. 4: 77.

Type-species: *Metallonella australiensis* Girault. Orig. desig.

Metallon Thomson, 1876 (1875). In Thomson, Hym. Scand. v. 4, pp. 169-170. Lapsus for *Trechnites* Thomson.

Trechnites is a Holarctic genus consisting of nine described species. The North American representative of the genus has been recovered from pear psylla.

Taxonomy: Hoffer, 1960. Mus. Nat. Pragae, Acta Faun. Ent. 6: 109-114. —Ferriere, 1961.

Entomophaga 6 (1): 39-41. —Graham, 1969. Polskie Pismo Ent. 39 (2): 243-245.

insidiosus (Crawford). Oreg. Calif. Host: "pear psylla."

Psylledontus insidiosus Crawford, 1910. U. S. Natl. Mus., Proc. 38: 89. ♂, ♀.

Biology: Madsen et al., 1963. Canad. Ent. 95 (8): 842-843. —McMullen, 1966. Canad. Ent. 98

(3): 236-239. —Westigard et al., 1968. Jour. Econ. Ent. 61 (3): 740-743.

UNPLACED TAXA OF SUBFAMILY ENCYRTINAE

The following genera have not been placed in the tribal classification of the Encyrtinae.

Genus ATROPATES Howard

Atropates Howard, 1898. U. S. Natl. Mus., Proc. 21: 236.

Type-species: *Atropates collinsi* Howard. Monotypic.

A genus with only two described species, one from India and one from North America, *Atropates* parasitizes *Pulvinaria* and Læc insects.

Taxonomy: Ferriere, 1935. Bul. Ent. Res. 26 (3): 400-401. —Mani, 1938. Cat. Indian Ins., pt.

23, p. 95. —Mahdihassan, 1957. Ztschr. f. Angew. Ent. 40 (1): 80.

collinsi Howard. N. Y., Wash. Host: *Pulvinaria* sp.

Atropates collinsi Howard, 1898. U. S. Natl. Mus., Proc. 21: 236-237. ♂, ♀.

Genus APHYCOIDEUS Williams

Aphycoideus Williams, 1916. Psyche 23 (5): 153.

Type-species: *Aphycoideus io* Williams. Monotypic.

io Williams. Mass. Host: *Malacosoma americanum* (F.).

Aphycoideus io Williams, 1916. Psyche 23 (5): 153. ♀.

Aphycoideus io Girault, 1917. Descr. Hym. Chalcidoid. Variorum cum Observ. V, p. 5.

Genus BLEPYRUS Howard

Blepyrus Howard, 1898. U. S. Natl. Mus., Proc. 21: 233-234.

Type-species: *Blepyrus mexicanus* Howard. Desig. by Ashmead, 1900.

Coccophoconus Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 337, 344, 375.

Type-species: *Coccophoconus dactylopii* Ashmead. Orig. desig. The type-species is considered a synonym of *Blepyrus mexicanus*.

Blepyrus contains five species which are mealybug parasites. Species in the genus are known from North America, Africa and the Pacific.

Taxonomy: Timberlake, 1922. Hawaii. Ent. Soc., Proc. 5 (1): 168-173. —Gahan, 1942. U. S.

Natl. Mus., Proc. 92: 47-49. —Kerrich, 1967. Brit. Mus. (Nat. Hist.) Ent., Bul. 29 (5): 225-226.

insularis (Cameron). Miss., Tex. Host: *Ferrisia virgata* (Ckll.).

Encyrtus? *insularis* Cameron, 1886. In Blackburn and Cameron, Manchester Lit. and Phil. Soc., Mem. and Proc. (3) 10: 243.

Blepyrus mexicanus Howard, 1898. U. S. Natl. Mus., Proc. 21: 234. ♂, ♀.

Blepyrus marsdeni Howard, 1898. U. S. Natl. Mus., Proc. 21: 234-235. ♀.

Blepyrus texanus Howard, 1898. U. S. Natl. Mus., Proc. 21: 235. ♀.

saccharicola Gahan. Fla., La. Host: *Pseudococcus* sp. on sugarcane.

Blepyrus saccharicola Gahan, 1942. U. S. Natl. Mus., Proc. 92: 47-49. ♂, ♀.

Genus CERAPTROCEROIDEUS Girault

Ceraptroceroideus Girault, 1916. Psyche 23 (2): 47.

Type-species: *Ceraptroceroideus cinctipes* Girault. Orig. desig.

A monotypic genus known only from the type-locality.

cinctipes Girault. Kans. (Wellington). Host: *Rhizaspidiotus dearnessi* (Ckll.).

Ceraptroceroideus cinctipes Girault, 1916. Psyche 23 (2): 47-48. ♂, ♀.

Genus CHESTOMORPHA Ashmead

Chestomorpha Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 335, 343, 370.

Type-species: *Chestomorpha biformis* Ashmead. Orig. desig.

biformis Ashmead. N. Mex., Ariz.

Chestomorpha biformis Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 370. ♀.

Genus EPAENASOMYIA Girault

Epaenasomyia Girault, 1917. Chalcidoidea Nova Marilandensis iii, p. 3.

Type-species: *Epaenasomyia varicornis* Girault. Orig. desig.

varicornis Girault. Maryland.

Epaenasomyia varicornis Girault, 1917. Chalcidoidea Nova Marilandensis III. p. 3.

Genus FORCIPESTRICIS Burks

Forcipestricis Burks, 1968. Ent. News 79 (9): 237-238.

Type-species: *Forcipestricis gazeaui* Burks. Orig. desig.

Forcipestris presently consists of two species, one from Puerto Rico and the other from Eastern North America. Both are larval-pupal parasites of ceratopogonid midges.

Taxonomy: Gordh, 1975. Fla. Ent. 58 (4): 239-241.

gazeaui Burks. Md. Host: *Forcipomyia simulata* Walley.

Forcipestricis gazeaui Burks, 1968. Ent. News 79 (9): 238-240. ♂, ♀.

Genus GAHANIELLA Timberlake

Gahaniella Timberlake, 1926. U. S. Natl. Mus., Proc. 69: 23-26.

Type-species: *Gahaniella californica* Timberlake. Orig. desig.

Gahaniella only has three species which are found in Australia, North and South America. All three are presumably hyperparasitic on other encyrtids that attack soft scale-insects and mealybugs.

Taxonomy: Kerrich, 1953. Bul. Ent. Res. 44 (4): 800-802.

californica Timberlake. Calif. Host: *Lecanium corni* Bouche.

Gahaniella californica Timberlake, 1926. U. S. Natl. Mus., Proc. 69 (3): 26-27. ♂, ♀.

Taxonomy: Kerrich, 1953. Bul. Ent. Res. 44 (4): 800-802.

saissetiae Timberlake. Fla. Host: *Coccus hesperidum* L., *Saissetia oleae* (Oliv.).

Gahaniella saissetiae Timberlake, 1926. U. S. Natl. Mus., Proc. 69 (3): 27-28. ♂, ♀.

Taxonomy: Compere, 1939. Calif. Univ., Pubs. Ent. 7 (5): 89.

Genus HEXACNEMUS Timberlake

Hexacnemus Timberlake, 1926. U. S. Natl. Mus., Proc. 69 (3): 12-15.

Type-species: *Hexacnemus armitagei* Timberlake. Monotypic.

This monotypic genus has been found only in North America. The type-species has been reported to parasitize mealybugs as well as *Sympherobius*.

armitagei Timberlake. Fla., Calif. Host: *Sympherobius californicus* Banks, S. sp., mealybug on citrus.

Hexanemus armitagei Timberlake, 1926. U. S. Natl. Mus., Proc. 69 (3): 15-16. ♂, ♀.

Genus CAENOCERCUS Thomson

Caenocercus Thomson, 1876 (1875). Hym. Scand., v. 4, p. 145.

Type-species: *Caenocercus puncticollis* Thomson. Monotypic.

Bothriencyrtus Timberlake, 1919 (1918). Hawaii. Ent. Soc., Proc. 4 (1): 185, 212-213.

Type-species: *Bothriothorax planifrons* Howard. Orig. desig. The type-species name is a lapsus for *Bothriothorax planiformis* Howard.

A small genus with a Holarctic distribution, *Caenocercus* probably parasitizes Neuroptera.

Taxonomy: Erdos, 1963. Beitr. zur Ent. 13 (3-4): 286-287.

planiformis (Howard). N. C., Miss., Wash., Calif. Host: Hemerobiid.

Bothriothorax planiformis Howard, 1895. U. S. Natl. Mus., Proc. 17: 611. ♀.

Genus EPICERCHYSIUS Girault

Epicерchysius Girault, 1915. N. Y. Ent. Soc., Jour. 23 (3): 167-168.

Type-species: *Epicerchysius xanthipes* Girault. Monotypic.

xanthipes Girault. Tex.

Epicerchysius xanthipes Girault, 1915. N. Y. Ent. Soc., Jour. 23 (3): 168. ♀.

Genus FORMICENCYRTUS Girault

Formicencyrtus Girault, 1916. Psyche 23 (2): 45.

Type-species: *Formicencyrtus thoreauini* Girault. Orig. desig.

thoreauini Girault. N. Mex., Ariz. Host: *Dactylopius confusus* (Ckll.).

Formicencyrtus thoreauini Girault, 1916. Psyche 23 (2): 45-46. ♀.

Genus EPANUSIA Girault

Epanusia Girault, 1913. Arch. f. Naturgesch. 79 (A) (6): 91.

Type-species: *Epanusia bifasciatus* Girault. Orig. desig.

albiclava Girault. D. C., Okla.

Epanusia albiclava Girault, 1916. Psyche 23 (2): 44. ♀.

xerophila (Brues). Kans., Tex.

Anusia xerophila Brues, 1906. Ent. News 17 (2): 61-62. ♂.

Genus EPIENCYRTUS Ashmead

Epiencyrtus Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 340, 346, 396-397.

Type-species: *Encyrtus thyreodontis* Ashmead. Orig. desig.

A genus of about five species that are hyperparasitic in Lepidoptera. *Epiencyrtus* appears cosmopolitan in distribution, but it has not been reported from Africa.

Taxonomy: Graham, 1958. Ent. Tidskr. 79 (3-4): 152-153.

artaceae (Howard). Fla. Host: Ophionine ichneumonid.

Encyrtus artaceae Howard, 1881. U. S. Dept. Agr., Ann. Rept. for 1880, pp. 252-253. ♂, ♀.

Taxonomy: Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 397.

thyreodontis (Ashmead). Mass. Host: *Thyreodon atricolor* (Oliv.).

Encyrtus thyreodontis Ashmead, 1898. Ent. Soc. Wash., Proc. 4 (2): 156. ♀.

Biology: Dimmock, 1898. Ent. Soc. Wash., Proc. 4 (2): 149.

Genus EURYHOPALUS Howard

Euryhopalus Howard, 1898. U. S. Natl. Mus., Proc. 21: 237.

Type-species: *Euryhopalus schwarzi* Howard. Monotypic.

Synaspidia Timberlake, 1923. Hawaii. Ent. Soc., Proc. 5 (3): 397-399.

Type-species: *Synaspidia pretiosa*. Timberlake. Orig. desig.

Taxonomy: Gahan, 1942. U. S. Natl. Mus., Proc. 92: 49. — Kerrich, 1967. Brit. Mus. (Nat. Hist.) Ent., Bul. 20 (5): 190, 235, 246.

schwarzi Howard. Fla.

Euryhopalus schwarzi Howard, 1898. U. S. Natl. Mus., Proc. 21: 237. ♀.

Genus HABROLEPOPTERYX Ashmead

Habroleopopteryx Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 330, 359.

Type-species: *Psilophrys pulchripennis* Ashmead. Orig. desig.

marilandia Girault. Md.

Habroleopopteryx marilandia Girault, 1917. Chalcidoidea Nova Marilandensis I, p. 1. ♀.

Habroleopopteryx marylandia Peck, 1951. U. S. Dept. Agr., Agr. Monog. 2: 479. Unjustified emendation.

pulchripennis aeneiscapus Girault. Fla.

Habroleopopteryx pulchripennis var. *aeneiscapus* Girault, 1916. Ent. News 27 (5): 225. ♀.

pulchripennis pulchripennis (Ashmead). Fla., N. C., N. J. Host: *Eriococcus caroliniae*

Williams.

Psilophrys pulchripennis Ashmead, 1888. Ent. Amer. 4 (1): 16. ♀.

Taxonomy: Girault, 1916. Ent. News 27 (5): 225.

Genus HABROLEPOIDEA Howard

Habrolepoidea Howard, 1894. Linn. Soc. London, Jour., Zool. 25: 89-90.

Type-species: *Habrolepoidea glauca* Howard. Monotypic.

Zarhopaloides Girault, 1915. Queensland Mus., Mem. 4: 99.

Type-species: *Zarhopaloides axillaris* Girault. Orig. desig.

Habrolepoidea contains about 8 species, at least some of which are parasitic on bruchid eggs. The genus is found in North America, the Caribbean, and possibly Australia.

depressa Girault. Ill. Host: *Megacyllene robiniae* (Forst.).

Habrolepoidea depressa Girault, 1916. Canad. Ent. 48 (10): 343-344. ♂, ♀.

perplexa Girault. Pa.

Habrolepoidea perplexa Girault, 1917. Deser. Hym. Chalcidoid. Variorum cum Observ. V, p. 8. ♀.

Taxonomy: Girault, 1920. U. S. Natl. Mus., Proc. 58: 185-187.

tarsalis Girault. Ind.

Habrolepoidea tarsalis Girault, 1916. Canad. Ent. 48 (10): 344. ♀.

Genus HAMBLETONIA Compere

Hambletonia Compere, 1936. Hawaii. Ent. Soc., Proc. 9 (2): 172-173.

Type-species: *Hambletonia pseudococcina* Compere. Orig. desig.

This monotypic genus is found in tropical habitats. It has not been reported from Africa.

pseudococcina Compere. Fla. Host: *Dysmicoccus brevipes* (Ckll.).

Hambletonia pseudococcina Compere, 1936. Hawaii. Ent. Soc., Proc. 9 (2): 173-174. ♂, ♀.

Biology: Carter, 1937. Jour. Econ. Ent. 30 (2): 370-372. — Plank, 1938. Puerto Rico Agr. Expt. Sta., Rpt. for 1937, pp. 98-99. — Bartlett, 1939. Puerto Rico Univ., Jour. Agr. 23: 67-71.

— Clausen, 1956. U. S. Dept. Agr., Tech. Bul. 1139: 106.

Genus HEMAENASIUS Ashmead

Hemaenasius Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 336, 374.

Type-species: *Hemaenasius confusus* Ashmead. Orig. desig.

Hemaaenasius Schulz, 1906. Spolia Hym., p. 146. Unjustified emend.

confusus Ashmead. D. C.

Hemaenasius confusus Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 374. ♀.

Taxonomy: Girault, 1920. U. S. Natl. Mus., Proc. 58: 183.

Genus HOLCENCYRTUS Ashmead

Holcencyrtus Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 339, 346, 394.

Type-species: *Aphytus niger* Ashmead. Orig. desig.

Holcencyrtus contains four species that are New World and Ethiopian in distribution. These insects are parasites of soft scale insects.

niger (Ashmead). Fla.

Aphytus niger Ashmead, 1888. Ent. Amer. 4 (1): 15. ♂.

physokermis Girault. Me., N. H., Wis., Oreg. Host: *Physokermes piceae*, (Schr.).

Holcencyrtus physokermis Girault, 1916. Ent. News 27 (5): 226-227. ♂, ♀.

Genus HENICOPYGUS Ashmead

Henicopygus Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 329, 355-356.

Type-species: *Henicopygus subapterus* Ashmead. Orig. desig.

subapterus Ashmead. Mont., Colo., Tex.

Henicopygus subapterus Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 356. ♀.

Biology: Brues and Melander, 1903. Biol. Bul. 5: 21.

Genus MEROMYZOBIA Ashmead

Meromyzobia Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 328, 349.

Type-species: *Ericydnus maculipennis* Ashmead. Orig. desig.

Meromyzobia presently is known only from North and South America. It contain seven species, one of which has been reported to be a parasite of Orthoptera eggs.

Taxonomy: Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 349-350.

americana (Ashmead). Fla.

Prionomastix americana Ashmead, 1888. Ent. Amer. 4 (1): 16. ♂.

bifasciata (Ashmead). Colo.

Homalotylus bifasciatus Ashmead, 1890. Colo. Biol. Assoc., Bul. 1: 28, 46. ♀.

flava Ashmead. D. C.

Meromyzobia flava Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 350. ♂.

flavincincta (Ashmead). Fla.

Choreia flavincincta Ashmead, 1888. Ent. Amer. 4 (1): 17. ♀.

maculipennis (Ashmead). N. J., Ohio. Host: *Anthracophaga ingrata* (Will.), *Meromyza americana* Fitch.

Ericydnus maculipennis Ashmead, 1893. Ohio Agr. Expt. Sta., Tech. Ser., Bul. 1: 162-163. ♂.

unifasciata Ashmead. Miss.

Meromyzobia unifasciata Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 350. ♀.

Genus NEBAOCHARIS Girault

Nebaocaris Girault, 1916. Psyche 23 (2): 43.

Type-species: *Nebaocaris hemipterus* Girault. Orig. desig.

hemiptera Girault. Colo.

Nebaocaris hemipterus Girault, 1916. Psyche 23 (2): 43.

Genus PARAPHAENODISCUS Girault

Paraphaenodiscus Girault, 1915. Queensland Mus., Mem. 4: 93, 123.

Type-species: *Paraphaenodiscus verus* Girault. Orig. desig.

Aschitus Mercet, 1921. Fauna Iberica, Himen., Encirtidos pp. 59, 71, 599-600.

Type-species: *Aschitus incertus* Mercet. Orig. desig.

Paraphaenodiscus presently holds about 17 names. These parasites are predominantly Palearctic and Ethiopian in distribution and attack acelridids and mealybugs.

Taxonomy: Risbec, 1951. Inst. Fr. Noire, Mem. 13: 147-151. — Hoffer, 1954 (1953). Acta Soc. Ent. Cechosl. 50: 156-157, 162-167. — Hoffer, 1953. Ochr. Prirody 8 (4): 88. — Ferriere, 1956. Schweiz. Ent. Ges., Mitt. 29 (4): 391-396. — Hoffer, 1958. Acta. Soc. Ent. Cechosl. 55 (3): 250-263.

subterraneus Ferriere. Tex. (?).

Paraphaenodiscus subterraneus Ferriere, 1956. Schweiz. Ent. Gesell., Mitt. 29 (4): 391-393, 395. ♂, ♀.

Genus PARAPSILOPHRYS Howard

Parapsilophrys Howard, 1898. U. S. Natl. Mus., Proc. 21: 232-233.

Type-species: *Parapsilophrys gelechiae* Howard. Monotypic.

gelechiae Howard. Wis. w. to Wyo., Utah. Host: *Gelechia* sp. on cottonwood, *Gelechia lynceella* Zeller.

Parapsilophrys gelechiae Howard, 1898. U. S. Natl. Mus., Proc. 21: 233. ♂, ♀.

Genus PENTELICUS Howard

Pentelicus Howard, 1895. U. S. Natl. Mus., Proc. 17: 606, 611-612.

Type-species: *Pentelicus aldrichi* Howard. Monotypic.

aldrichi Howard. N. H., S. Dak., Nebr.

Pentelicus aldrichi Howard, 1895. U. S. Natl. Mus., Proc. 17: 612. ♀.

Taxonomy: Girault, 1920. U. S. Natl. Mus., Proc. 58: 183.

Genus PHEIDOLOXENUS Ashmead

Pheidoloxenus Ashmead, 1904. Carnegie Mus., Mem. 1 (4): 328, 385.

Type-species: *Pheidoloxenus wheeleri* Ashmead. Orig. desig.

Pheidoloxenus Girault, 1915. Ent. Soc. Amer., Ann. 8 (3): 273. Preocc. by Ashmead, 1904.

Type-species: *Pheidoloxenus wheeleri* Girault. Monotypic.

Pheidoloxeniscus Ghesquiere, 1946. Rev. Zool. Bot. Africaines 34 (4): 369. N. name for *Pheidoloxenus* Girault.

wheeleri Ashmead. Tex. Ecology: Nest of *Pheidole tepicana* Perg.

Pheidoloxenus wheeleri Ashmead, 1904. Carnegie Mus., Mem. 1 (4): 328, 385. ♀.

Pheidoloxenus wheeleri Girault, 1915. Ent. Soc. Amer., Ann. 8 (3): 273. Preocc. by Ashmead, 1904.

Taxonomy: Wheeler, 1907. Amer. Mus. Nat. Hist., Bul. 23: 17-18.

Genus PSILOPHRYOIDEA Compere

Psilophryoidea Compere, 1928. Calif. Univ. Pubs., Ent. 4 (8): 214-215.

Type-species: *Psilophryoidea comesor* Compere. Orig. desig.

comesor Compere. Calif. Host: *Kermes cockerelli* Ehrh.

Psilophryoidea comesor Compere, 1928. Calif. Univ., Pubs. Ent. 4 (8): 215. ♀.

Genus RHYTIDOTHORAX Ashmead

Rhytidothorax Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 337, 344, 377.

Type-species: *Rhytidothorax marlatti* Ashmead. Orig. desig.

marlatti Ashmead. Kans.

Rhytidothorax marlatti Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 377. ♀.

Genus TETRALOPHIELLUS Ashmead*Tetralophiellus* Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 330, 357.Type-species: *Tetralophiellus brevicollis* Ashmead. Orig. desig.*brevicollis* Ashmead. Fla., Mo.*Tetralophiellus brevicollis* Ashmead, 1900. U. S. Natl. Mus., Proc. 22: 357. ♂.**Genus TETRALOPHIDEA Ashmead***Tetralophidea* Ashmead, 1900. U. S. Natl. argenticoxae Girault. Que., Ont., Md., Va., W. Va., Ohio, Tenn., Ill., Mo., Man. Ecology:

Parasitizes hosts living in rolled leaves or between leaves tied together with silk. Host: *Ancylis divisana* Walk., *Coleophora malivorella* Riley, *Psilocorsis quercicella* Clem. *Sympiesis argenticoxae* Girault, 1917 (1916). Insecutor Inscitiae Menstruus 4: 120. ♀.

bimaculatipennis (Girault). N. B., Que., Maine, s. to Va., w. to Alaska, s. to Calif. Ecology:

Prefers lepidopterous hosts that make blotch mines or skeletonize leaves of deciduous plants; has been recorded as parasitizing leaf rollers. Host: *Agonopterix posticella* (Wlsm.), *Ancylis comptana fragariae* (W. and R.), *Lithocletis* sp., *L. blanchardella* (F.), *Ornix* sp., *Parornix geminatella* (Pack.), *Spilonota lariciana* (Hein.), *S. ocellana* (D. and S.), *Tischeria malifoliella* (Clem.).

Astichus binaculatipennis Girault, 1912. Canad. Ent. 44: 8. ♀.

Sympiesis bimaculata Crawford, 1913. U. S. Natl. Mus., Proc. 45: 259. ♀.

Sympiesis meteori Girault, 1916. Soc. Ent. 31: 37. ♀.

Biology: Sadava and Miller, 1967. Canad. Ent. 99: 436-442.

conica (Provancher). N. B., Que., Maine, s. to Fla., w. to N. W. T., B. C., Wash., Oreg., Calif.

Ecology: Parasitizes hosts that make blotch or tentiform mines in the leaves of deciduous plants; ectoparasitism on host larvae. Host: *Bucculatrix* sp., *Caloptilia rhombifoliella* (Chamb.), *Cameraria caryaefoliella* (Clem.), *C. hamadryadella* (Clem.), *Choristoneura conflictana* (Walk.), *Coleophora pruniella* Clem., *Coleotechnites milleri* (Busck), *Epinotia laracana* Kft., *Gracillaria alnivorella* Chamb., *G. azaleella* Brants, *G. negundella* Chamb., *Lithocletis* sp., *L. alnicolella* Wlshm., *L. blanchardella* (F.), *L. cincinnatiella* (Chamb.), *L. crataegella* Clem., *L. lucetiella* Clem., *L. salicifoliella* Chamb., *L. tremuloidella* Braun, *Nepticula* sp., *Parornix geminatella* (Pack.), *Phyllonnistis* sp., *Tischeria malifoliella* Clem.; *Sciaphila* sp.; *Apanteles* sp.

Metacolus conicus Provancher, 1887. Addit. Corr. Faune Ent. Canada Hym., p. 200. ♀.

Coccophagus compressicornis Provancher, 1887. Addit. Corr. Faune Ent. Canada Hym., p. 206. ♀.

Sympiesis nigripes Ashmead, 1888. Kans. Agr. Expt. Sta., Bul. 3: App. p. VII. ♀, ♂.

Sympiesis massasoit Crawford, 1913. U. S. Natl. Mus., Proc. 45: 258. ♀, ♂.

Taxonomy: Burks, 1964 (1963). Canad. Ent. 95: 1257, 1259.

Biology: Schaffner, 1959. U. S. Dept. Agr., Misc. Pub. 767: 81. — Miller, 1970. Ent. Soc. Canada, Mem. 68: 42.

dolichogaster Ashmead. Que., Ont., Maine, s. to Fla., w. to Kans., B. C., Idaho; Europe.

Ecology: Prefers lepidopterous hosts that mine deciduous leaves in early development and then live in leaf rolls in later development. Host: *Caloptilia fraxinella* (Ely.), *Episimus argutana* (Clem.), *Gracillaria* sp., *G. belfrageella* Chamb., *G. cuculipennella* (Hbn.), *G. negundella* Chamb., *G. perseae* Busck, *G. sassafrassella* Chamb., *Hydriomena renunciata* (Wlkr.).

Sympiesis dolichogaster Ashmead, 1888. Kans. Agr. Expt. Sta., Bul. 3: App. p. VII. ♀.

Sympiesis nowickii Szelenyi 1941. Frag. Faun. Hung. 4: 27. ♀.

Taxonomy: Girault, 1916. Soc. Ent. 31: 36-37. — Boucek, 1959. Mus. Natl. Pragae, Acta Ent. 33: 130.

enargiae Miller. N. B., Que., Ont., N. W. T., B. C. Ecology: Parasitic on lepidopterous larvae that hide between leaves tied with silk or in rolled or curled leaves. Host: *Enargia decolor* (Walk.).

Sympiesis enargiae Miller, 1970. Ent. Soc. Canada, Mem. 68: 42. ♀, ♂.

fragariae Miller. Conn., Pa., Del., Md., Va., W. Va., Ga., Ohio, Wis., Kans. Ecology: Parasitizes lepidopterous larvae that live within rolled leaves or within cases. Host: *Ancylis comptana fragariae* (W. and R.), *Anthophila pariana* (Clerck), *Argyrotaenia velutinana* (Walk.), *Coleophora malivorella* Riley, *Tetralopha robustella* Zell.

Sympiesis fragariae Miller, 1970. Ent. Soc. Canada, Mem. 68: 68. ♀, ♂.

marylandensis Girault. N. B. and Que., s. to Va., w. to B. C., s. to Calif. Ecology: Parasitizes lepidopterous hosts that make blotch mines in deciduous leaves. Host: *Caloptilia elongella* (L.), *Coleotechnites thujaecella* Kearf., *Lithocletis* sp., *L. basistrigella* Clem., *L. blanchardella* (F.), *L. celtisella* Chamb., *L. crataegella* Clem., *L. felineella* Hein., *L.*

- lucidicostella* Clem., *L. malimalifoliella* Braun, *L. propinquella* Braun, *L. robinella* Clem., *L. salicifoliella* Chamb., *Parornix geminatella* (Pack.), *Peronea chalybeana* Fern., *Phylloconistis populiella* Chamb.; *Heterarthrus nemoratus* (Fallen).

Cratotechus Thomson, 1878. Hym. Scand., v. 5, pp. 208, 219.

Type-species: *Ichneumon larvarum* Linnaeus. Desig. by Ashmead, 1904.

Cratotrechus Dalla Torre, 1898. Cat. Hym., v. 5, p. 55. Emend.

Comedo subg. *Onychocomedo* Graham, 1959. Soc. Brit. Ent., Trans. 13: 183.

Type-species: *Eulophus thespius* Walker. Orig. desig.

Revision: Crawford, 1912. U. S. Natl. Mus., Proc. 43: 186-188 (*comedo*).

Taxonomy: Boucek, 1959. Mus. Natl. Pragae, Acta Ent. 33: 160. —Gijswijt, 1964. Ent. Ber. 24: 31 (*Eulophus* Muller, 1764).

anomocerus (Crawford). Que., Ont., Conn., N. Y., N. J., Va., W. Va., Mich., N. Dak. Host:

Anthophila pariana (Clerck), *Schizura unicornis* (Smith).

Comedo anomocerus Crawford, 1912. U. S. Natl. Mus., Proc. 43: 187. ♀, ♂.

Biology: Schaffner and Griswold, 1934. U. S. Dept. Agr., Misc. Pub. 188: 81, 154. —Raizenne, 1952. Canad. Dept. Agr., Forest Lep. and Par., p. 91.

basalis Say. Ind., Mo.

Eulophus basalis Say, 1836. Boston Jour. Nat. Hist. 1: 273. ♀.

Comedo omari Girault, 1917. Descr. Hym. Chalcidoid. Variorum cum Observ. III, p. 9. ♀.

brevicapitatus (Cook and Davis). Que., Mass., Mich., La. Host: *Euplexia benesimilis* McD., *Heterocampa bilineata* (Pack.), *H. manteo* (Dbldy.), *Symmerista albifrons* (Smith).

Cratotechus brevicapitatus Cook and Davis, 1891. Mich. Agr. Expt. Sta., Bul. 73: 12. ♀, ♂.

Biology: Dimmock, 1898. Ent. Soc. Wash., Proc. 4: 150. —Schaffner and Griswold, 1934. U. S. Dept. Agr., Misc. Pub. 188: 154.

koebelei (Crawford). Calif. Host: *Orgyia vetusta* (Bdvl.).

Comedo koebelei Crawford, 1912. U. S. Natl. Mus., Proc. 43: 187. ♀.

magnisulcatus Girault. Maine, s. to W. Va. Host: *Coleophora laricella* (Hbn.) *C. malivorella* Riley, *C. pruniella* Clem.

Eulophus magnisulcatus Girault, 1916. Ent. News 27: 404. ♀.

Biology: Schaffner, 1959. U. S. Dept. Agr., Misc. Pub. 767: 43, 81.

nebulosus (Provancher). Ont., Mass., s. to Fla., w. to Wis. Host: *Amphipyra pyramidoides* Guen., *Lithophane* sp.

Miotropis nebulosa Provancher, 1887. Addit. Corr. Faune Ent. Canada Hym., p. 208. ♀.
Comedo hookeri Crawford, 1912. U. S. Natl. Mus., Proc. 43: 188. ♀.

Biology: Schaffner and Griswold, 1934. U. S. Dept. Agr., Misc. Pub. 188: 49, 154.
neomexicanus (Girault). N. Mex.

Comedo neomexicanus Girault, 1917. New Chalcid Flies, p. 4.

Taxonomy: Girault, 1920. U. S. Natl. Mus., Proc. 58: 201.

orgyiae (Fitch). Que., Ont., N. Y., N. J., Pa., N. C., Miss., Wis., Wash., Oreg., Calif. Host:
Acronicta grisea Walk., *Alsophila pomaria* (Harris), *Caloptilia rhoifoliella* (Chamb.),
Gluphisia septentrionis Walk., *Orgyia leucostigma* (J. E. Smith), *O. plagiata* (Walk.),
Orthosis hibisci (Gn.), *Stenoma algidella* (Walk.).

Trichogramma? orgyiae Fitch, 1856. Country Gentleman 7: 235.

Taxonomy: Fitch, 1856. N. Y. State Agr. Soc., Trans. 15: 448-449. — Howard, 1897. U. S. Dept. Agr., Div. Ent., Tech. Ser. 5: 28. — Girault, 1920. U. S. Natl. Mus., Proc. 58: 201.

Biology: Raizenne, 1952. Canad. Dept. Agr., Forest Lep. and Par., pp. 39, 49, 92, 97, 109, 257.
smerinthi (Ashmead). Ont., N. H., Mass., Md. Host: *Alsophila pomaria* (Harris), *Amphipyra pyramidoides* Guen., *Paonias excaecata* (Smith).

Cratotechus smerinthi Ashmead, 1898. Ent. Soc. Wash., Proc. 4: 158. ♀, ♂.

Taxonomy: Girault, 1920. U. S. Natl. Mus., Proc. 58: 201. — Burks, 1964 (1963). Canad. Ent. 95: 1257.

Biology: Dimmock, 1898. Ent. Soc. Wash., Proc. 4: 150. — Schaffner and Griswold, 1934. U. S. Dept. Agr., Misc. Pub. 188: 52, 154.

Genus DAHLBOMINUS Hincks

Microplectron Dahlbom, 1857. Ofvers. Svenska Vetensk.-Akad., Forh. 14: 292 (no species). — Thomson, 1878. Hym. Scand., v. 5, p. 222. One species. Preocc. by Streubel, 1842.

Type-species: *Entedon fuscipennis* Zetterstedt. Included by Thomson, 1878.

Dahlbominus Hincks, 1945. Entomologist 78: 90. N. name.

fuscipennis (Zetterstedt). Newfoundland, Que., Ont., Maine, N. Y., Conn., Pa., N. J., Del., Md., Va., N. C., Mich., Wis., Ill., Minn., Mo.; Europe. Introduced for biological control from Europe in 1933 in Eastern Canada and in 1935 in Northeastern U. S. Recovered promptly and much subsequent spread by natural dissemination. Host: *Diprion similis* (Htg.), *Gilpinia frutetorum* (F.), *G. hercyniae* (Htg.), *Neodiprion lecontei* (Fitch), *N. nanulus* Schedl, *N. pinetum* (Nort.), *N. pratti* (Dyar), *N. sertifer* (Geof.), *N. swainei* Midd., *N. tsugae* Midd., *Pristiphora erichsonii* (Htg.).

Entedon fuscipennis Zetterstedt, 1838. Insecta Lapponica, p. 427 [recte 429]. ♀.

Taxonomy: Boucek, 1959. Mus. Natl. Pragae, Acta Ent. 33: 145. — Finlayson, 1960. Canad. Ent. 92: 37-44 (immature stages).

Biology: Morris and Cameron, 1935. Bul. Ent. Res. 26: 407-418. — Ullyett, 1936. Bul. Ent. Res. 27: 195-217. — Ullyett, 1936. Roy. Ent. Soc. London, Proc. (B) 120: 253-291. — Dowden, 1939. Jour. Econ. Ent. 32: 623. — Miller, 1940. U. S. Bur. Ent. Plant Quar. ET-161: 1-5. — Balch, 1941 (1940). N. S. Dept. Lands and Forests, Rpt., pp. 72-74. — Wilkes, 1942. Roy. Ent. Soc. London, Proc. Genus DIMMOCKIA Ashmead

Dimmockia Ashmead, 1904. Carnegie Mus., Mem. 1: 357.

Type-species: *Eulophus incongruus* Ashmead. Monotypic.

Crateulophus Masi, 1917. Novitates Zool. 24: 206.

Type-species: *Crateulophus niger* Masi. Monotypic.

incongrua (Ashmead). Ont., Mass., s. to Fla., w. to Ill. Host: *Anacampsis innocuella* (Zell.), *Argyrotaxa semipurpurana* (Kearf.), *Episimus argutanus* (Clem.), *Sphecodina abbotii* (Swains.), *Sparganothis peltitana* (Rob.); *Exorista larvarum* (L.), *Winthemia datanae* (Tsn.); *Apanteles elisiocampae* Ashm., *A. congregatus* (Say), *A. melanoscelus* (Ratz.), *Psychophagus omnivorus* (Wlk.), *Sphecophaga burra* (Cress.). Almost always a secondary parasite.

Eulophus incongruus Ashmead, 1898. Ent. Soc. Wash., Proc. 4: 158. ♀, ♂.

Dimmockia botticellini Girault, 1917. New Chalcid Flies, p. 2.

Biology: Muesebeck and Dohanian, 1927. U. S. Dept. Agr., Bul. 1487: 12, 29-30. —Proper, 1934. Jour. Agr. Res. 48: 362. —Schaffner, 1959. U. S. Dept. Agr., Misc. Pub. 767: 82. —Kulman, 1965. Jour. Econ. Ent. 58: 68.

Morphology: Snodgrass, 1910. U. S. Natl. Mus., Proc. 39: 66.

marylandica Girault. Md. Type of this sp. lost and no other specimens known.

Dimmockia marylandica Girault, 1920. U. S. Natl. Mus., Proc. 58: 202. ♀.

pallipes Muesebeck. Mass., Wis., Ill. Ecology: Probably always secondary. Host: *Apanteles* sp., *A. melanoscelus* (Ratz.).

Dimmockia pallipes Muesebeck, 1927. Jour. Agr. Res. 34: 333. ♀, ♂.

Biology: Muesebeck and Dohanian, 1927. U. S. Dept. Agr., Bul. 1487: 12, 30. —Forbes et al., 1961. Canad. Dept. Forestry, Ann. Rpt., p. 33.

Genus DICLADOCERUS Westwood

Dicladocerus Westwood, 1832. London, Edinb. and Dublin Phil. Mag. and Jour. Sci. (3) 1: 128.

Type-species: *Dicladocerus westwoodii* Westwood. Monotypic.

Diglyphus Thomson, 1878. Hym. Scand., v. 5, p. 208. Misspelling. Preocc. by Walker, 1844.

Diglyphus Thomson, 1878. Hym. Scand., v. 5, p. 235.

Type-species: *Diglyphis aenescapus* Thomson. Desig. by Gahan and Fagan, 1923.

Diaulinus Schulz, 1906. Spolia Hym., p. 146. N. name for *Diglyphus* Thomson.

Taxonomy: Graham, 1959. Soc. Brit. Ent., Trans. 13: 180.

albitarsis (Ashmead). D. C.

Eulophus albitarsis Ashmead, 1900. Ent. News 11: 623. ♀.

dicladus (Say). Ind.

Eulophus dicladus Say, 1836. Boston Jour. Nat. Hist. 1: 273. ♀.

westwoodii Westwood. Ont.; Europe. Introduced from Europe for biological control, 1938.

Host: *Coleophora laricella* (Hbn.).

Dicladocerus Westwoodii Westwood, 1832. London, Edinb. and Dublin Phil. Mag. and Jour. Sci. (3) 1: 128. ♀, ♂.

Taxonomy: Ferriere, 1933. In Thorpe, Bul. Ent. Res. 24: 290. —Boucek, 1959. Mus. Natl.

Prague, Acta Ent. 33: 145. —Graham, 1963. Soc. Brit. Ent., Trans. 15: 180.

Biology: Thorpe, 1933. Bul. Ent. Res. 24: 277-280. —Graham, 1944. Ent. Soc. Ontario, Ann. Rpt. 74: 50-51. —Pschorr-Walcher, 1964. Commonwealth Inst. Biol. Control, Tech. Bul. 4: 27.

TRIBE EUPLECTRINI

Taxonomy: Ferriere, 1941. Bul. Ent. Res. 32: 17-48 (fauna of Europe, Asia, Africa). —Gadd, 1945. Bul. Ent. Res. 36: 331-337 (generic characters). —Boucek, 1957. In Kratochvil, Klic Zvireny CSR 2: 270. —Lin, 1963. Taiwan Mus., Quart. Jour. 16: 102 (Oriental fauna).

Genus EUPLECTRUS Westwood

Euplectrus Westwood, 1832. London, Edinb. and Dublin Phil. Mag. and Jour. Sci. (3) 1: 128. Type-species: *Euplectrus maculiventris* Westwood. Monotypic.

Diplectron Dahlbom, 1857. Ofvers. Svenska Vetensk.-Akad., Forh. 14: 292 (no species). —Dalla Torre, 1898. Cat. Hym., v. 5, p. 74. Seventeen species.

Type-species: *Pteromalus bicolor* Swederus. Desig. by Gahan and Fagan, 1923.

Pachyscapha Howard, 1897 (1896). Linn. Soc. London, Jour., Zool. 26: 159.

Type-species: *Pachyscapha insularis* Howard. Monotypic.

This is one of the very few chalcidoid genera that spin cocoons; these usually are placed under the emaciated body of the host larva.

Revision: Girault, 1916. Canad. Ent. 48: 265.

bicolor (Swederus). Maine, Mass., N. J.; Europe, N. Africa. Host: *Amathes c-nigrum* (L.), *Epigleia amicta* (Grote).

Pteromalus Bicolor Swederus, 1795. Svenska Vetensk. Akad., Handl. 16: 204.

Taxonomy: Graham, 1963. Soc. Brit. Ent., Trans. 15: 172.

Biology: Silvestri, 1911. Lab. Zool. Gen. e Agr. Portici, Bol. 5: 308. —Lacroix, 1924. Ent. News 35: 217. —Thomsen, 1927. Dansk. Naturalhist., Meddel. 84: 73-89. —Beckwith, 1929. N. Y. Ent. Soc., Jour. 37: 415. —Bischoff, 1929. Ztschr. f. Wiss. Insektenbiol. 24: 78-82. —Steiner, 1936. Ztschr. f. Angew. Ent. 23: 212-214.

Morphology: Domenichini, 1953. Bol. Zool. Agr. e Bach. 19: 270.

catocalae Howard. N. J., Md., Ill., Mo. Host: *Catocala* sp.

Euplectrus catocalae Howard, 1885. U. S. Dept. Agr., Bur. Ent. Bul. 5: 27. ♀, ♂.

comstockii Howard. Conn., s. to Fla., w. to S. Dak., Ariz.; Cent. and S. Amer. Host: *Alabama argillacea* (Hbn.), *Autographa* sp., *Heliothis zea* (Boddie), *Plathypena scabra* (F.), *Spodoptera frugiperda* (J. E. Smith), *S. ornithogalli* (Guen.), *Trichoplusia ni* (Hbn.). *Euplectrus Comstockii* Howard, 1880. Canad. Ent. 12: 158. ♂.

Biology: Schwarz, 1881. Amer. Nat. 15: 61-63. —Howard, 1914 (1913). Ent. Soc. Wash., Proc. 15: 161. —Luginbill, 1928. U. S. Dept. Agr., Tech. Bul. 34: 72-73. —Bibby, 1942. Jour. Econ. Ent. 35: 943.

frontalis Howard. Que., Ont., N. H., N. J., Va., Kans. Host: *Amathes c-nigrum* (L.).

Euplectrus frontalis Howard, 1885. U. S. Dept. Agr., Bur. Ent. Bul. 5: 27. ♀.

Biology: Fyles, 1896. Ent. News 7: 44.

hircinus (Say). Ind., Kans.

Eulophus hircinus Say, 1836. Boston Jour. Nat. Hist. 1: 274.

insularis (Howard). Fla.; West Indies, S. Amer.

Pachyscapha insularis Howard, 1896. Linn. Soc. London, Jour., Zool. 26: 159. ♂.

junctus Gahan. Fla. Host: *Isoparce cupressi* (Bdvl.).

Euplectrus junctus Gahan, 1927. U. S. Natl. Mus., Proc. 71 (4): 30. ♀.

leucotrophis Howard. Fla.

Euplectrus leucotrophis Howard, 1885. U. S. Dept. Agr., Bur. Ent. Bul. 5: 26. ♂.

marginatus Ashmead. Fla., Tenn.

Euplectus(!) marginatus Ashmead, 1885. Amer. Ent. Soc., Trans. 12: Proc. p. xviii. ♀, ♂.

mellipes Provancher. Que., Ont., Maine, N. H., Wis., Alaska. Host: *Coleophora laricella* (Hbn.), *Feralia jocosa* (Guen.).

Euplectrus mellipes Provancher, 1887. Addit. Corr. Faune Ent. Canada Hym., p. 207. ♀.

Taxonomy: Burks, 1964 (1963). Canad. Ent. 95: 1258.

Biology: Guppy, 1959. Canad. Ent. 91: 426. — Evans, 1960. Ent. Soc. Amer., Ann. 53: 566.
— Evans, 1962. Canad. Ent. 94: 597.

pachyscapha Girault. Kans.

Euplectrus pachyscapha Girault, 1917. New Chalcid Flies, p. 2. ♀, ♂.

platyhypenae Howard. N. J., s. to Fla., w. to Nebr., Kans., Tex.; West Indies, Cent. and S.

Amer. Host: *Diatraea saccharalis* (F.), *Heliothis zea* (Boddie), *Leucania latiuscula* (H.-S.), *Manuca sexta* (L.), *Peridroma nigricostata* (Haw.), *Plathypena scabra* (F.), *Pseudaletia unipuncta* (Haw.), *Spodoptera exigua* (Hbn.), *S. frugiperda* (J. E. Smith), *S. ornithogalli* (Guen.), *S. sunia* (Guen.).

Euplectrus(?) platyhypenae(?) Howard, 1885. U. S. Dept. Agr., Bur. Ent. Bul. 5: 26. ♀, ♂.

Biology: Vickery, 1929. U. S. Dept. Agr., Tech. Bul. 138: 16-21, 42-45, 55-59. — Crumb, 1929. U. S. Dept. Agr., Tech. Bul. 88: 155. — Simmonds, 1932. Agr. Jour. Fiji 5: 8. — Wilson, 1933. Fla. Ent. 17: 3, 7-12. — Clausen, 1956. Pan-Pacific Ent. 32: 126. — Bennett, 1961. Tenn. Acad. Sci., Jour. 36: 353. — Marin Acosta, 1966. Agron. Trop. 16: 155. — Burrell, 1967. Jour. Econ. Ent. 60: 114.

semimarginatus Girault. Tex.

Euplectrus semimarginatus Girault, 1917. Descr. Hym. Chalcidoid. Variorum cum Observ. V, p. 1. ♀.

Genus EUPLECTROMORPHA Girault

Euplectromorpha Girault, 1913. Queensland Mus., Mem. 2: 276.

Type-species: *Euplectromorpha unifasciata* Girault. Orig. desig.

americana Girault. Md.

Euplectromorpha americana Girault, 1916. Insecutor Inscitiae Menstruus 4: 114. ♂.

TRIBE ELACHERTINI

Taxonomy: Boucek, 1957. In Kratochvil, Klíč Zvireny CSR 2: 270.

Genus DIAULINOPSIS Crawford

Diaulinopsis Crawford, 1912. U. S. Natl. Mus., Proc. 43: 182.

Type-species: *Diaulinopsis callichroma* Crawford. Monotypic.

Achrysocharolloidea Girault, 1913. Roy. Soc. So. Australia, Trans. 37: 109.

Type-species: *Achrysocharolloidea pax* Girault. Monotypic.

albiscapus (Girault). Md., Minn.

Achrysocharolloidea albiscapus Girault, 1916. Canad. Ent. 48: 336. ♀.

callichroma Crawford. Md., s. to Fla., w. to Calif., Mexico., West Indies, Northern S. Amer.

Host: *Agromyza* sp., *Cerodontha dorsalis* (Loew), *Liriomyza* sp., *Phytobia artemisiae* (Kaltb.).

Diaulinopsis callichroma Crawford, 1912. U. S. Natl. Mus., Proc. 43: 183. ♀, ♂.

Genus ARDALUS Howard

Ardalus Howard, 1896. Linn. Soc. London, Jour., Zool. 26: 161.

Type-species: *Ardalus aciculatus* Howard. Desig. by Ashmead, 1904.

Revision: Gahan, 1922. U. S. Natl. Mus., Proc. 61 (24): 20.

insuetus (Gahan). Fla., La., Tex. Host: *Lerema accius* (A. and S.).

Euplectrus insuetus Gahan, 1914. U. S. Natl. Mus., Proc. 48: 164. ♀.

Taxonomy: Gahan, 1922. U. S. Natl. Mus., Proc. 61 (24): 19-20.

Biology: Ainslie, 1922. Fla. Ent. 6: 14.

Genus PARAOLINX Ashmead

Paraolinx Ashmead, 1894. Linn. Soc. London, Jour., Zool. 25: 166.

Type-species: *Paraolinx lineatifrons* Ashmead. Monotypic.

Leucodesmia Howard, 1895. U. S. Dept. Agr., Insect Life 7: 403.

Type-species: *Leucodesmia typica* Howard. Monotypic.

Revision: Miller, 1964. Canad. Ent. 96: 1352-1362.

canadensis Miller. Que., Maine, Fla., Ohio, Calif.; Mexico. Ecology: An external parasite of gelechiid larvae. Host: *Coleotechnites* sp., *C. apicitripunctella* (Clem.), *Homadaula anisocentra* Meyrick.

Paraolinx canadensis Miller, 1964. Canad. Ent. 96: 1354. ♀, ♂.

taedae Miller. N. C., Ark. Host: *Rhyacionia frustrana* (Comst.).

Paraolinx taedae Miller, 1964. Canad. Ent. 96: 1356. ♀, ♂.

typica (Howard). Va., N. C., Fla., La., Ariz., Calif.; West Indies. Host: *Laetilia coccidivora* (Comst.), *Paramyelois transitella* (Walk.), *Pyroderces rileyi* (Wlsm.).

Leucodesmia typica Howard, 1895. U. S. Dept. Agr., Insect Life 7: 402. ♀, ♂.

Lencodesmia nigriventris Girault, 1916. U. S. Natl. Mus., Proc. 51: 46. ♀.

Taxonomy: Miller, 1964. Canad. Ent. 96: 1358.

Genus STENOMESIUS Westwood

Stenomesius Westwood, 1833. London, Edinb. and Dublin Phil. Mag. and Jour. Sci. (3) 3: 343.

Type-species: *Stenomesius pulchellus* Westwood. Desig. by Westwood, 1840.

harrisinae Ashmead. N. J., Fla. Host: *Harrisina americana* (Guer.).

Stenomesius harrisinae Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 200. ♀.

levana (Walker). Fla.

Elachestus Levana Walker, 1847. Ann. and Mag. Nat. Hist. (1) 20: 27. ♀.

Taxonomy: Burks, 1975. Brit. Mus. (Nat. Hist.) Ent., Bul. 32 (4): 145 (lectotype designated).

Genus MIOTROPIS Thomson

Miotropis Thomson, 1878. Hym. Scand., v. 5, pp. 187, 197.

Type-species: *Miotropis sulcicristata* Thomson. Desig. by Ashmead, 1904.

Mionotropis Schulz, 1906. Spolia Hym., p. 143. Emend.

Stenomesioideus Ashmead, 1904. Carnegie Mus., Mem. 1: xi, 355, 389.

Type-species: *Stenomesioideus melleus* Ashmead. Monotypic.

Stenomesioidea Girault, 1916. U. S. Natl. Mus., Proc. 51: 43.

Type-species: *Stenomesioidea mellea* Girault. Orig. desig.

melleus Ashmead. D. C. Host: *Coleophora caespititiella* Zell.

Stenomesioideus melleus Ashmead, 1904. Carnegie Mus., Mem. 1: xi, 355. ♀.

Stenomesioidea mellea Girault, 1916. U. S. Natl. Mus., Proc. 51: 44. ♀.

Genus ELACHERTUS Spinola

Elachertus Spinola, 1811. Paris Mus. d'Hist. Nat., Ann. 17: 151.

Type-species: *Diplolepis lateralis* Spinola. Desig. by Gahan and Fagan, 1923.

Microterus Spinola, 1811. Paris Mus. d'Hist. Nat., Ann. 17: 151.

Type-species: *Diplolepis petiolata* Spinola. Desig. by Gahan and Fagan, 1923.

Elachestus Nees, 1834. Hym. Ichn. Aff. Monog., v. 2, p. 135. Emend.

Elachistus Foerster, 1856. Hym. Stud., v. 2, p. 73. Emend.

Epardalus Girault, 1917. Descr. Hym. Chalcidoid. Variorum cum Observ. III, p. 5.

Type-species: *Elachistus cidariae* Ashmead. Orig. desig.

aeneoniger Girault. Ont., N. Y., Ohio, Wis., Minn., B. C., Oreg. Host: *Ancylis comptana fragariae* (W. and R.), *Argyrotaenia pinatubana* (Kearf.), *Argyresthia oreasella* Clem.

Choristoneura fumiferana (Clem.).

Elachistus aeneoniger Girault, 1917. Descr. Hym. Chalcidoid. Variorum cum Observ. III, p. 2. ♀.

- cacoeciae* Howard. N. H., Mass., N. J., Pa., D. C., Va., Mo., Utah, Oreg. Host: *Ancylis comptana fragariae* (W. and R.), *Archips argyrosalis* (Walk.), *Choristoneura rosaceana* (Harr.), *Argyrotaenia velutinana* (Walk.), *Heterocampa guttiritta* (Walk.), *Hyphantria cunea* (Drury), *Schizura unicornis* (Smith); *Eulophus orgyiae* (Fitch).
Elachistus cacoeciae Howard, 1885. U. S. Dept. Agr., Bur. Ent. Bul. 5: 28. ♂.
Biology: Carolin and Coulter, 1959. Jour. Econ. Ent. 52: 552.
- cidariae* Ashmead. N. H., Mass. Host: *Lygris diversilineata* (Hbn.).
Elachistus cidariae Ashmead, 1898. Ent. Soc. Wash., Proc. 4: 157. ♀.
Taxonomy: Girault, 1917. Descr. Hym. Chalcidoid. Variorum cum Observ. III, p. 5.
coxalis Howard. D. C., Va., Mich., Calif. Host: *Paralobesia viteana* (Clem.), *Parornix geminatella* (Pack.).
Elachistus coxalis Howard, 1885. U. S. Dept. Agr., Bur. Ent. Bul. 5: 28. ♀.
Biology: Hill and Hough, 1957. Va. Agr. Expt. Sta., Tech. Bul. 130: 16.
- glacialis* Ashmead. Colo., Alaska, Wash., Oreg. Host: *Barbara colfaxiana* (Kearf.), *Mellisopus latiferreanus* (Wlsm.).
Elachistus glacialis Ashmead, 1902 Wash. Acad. Sci., Proc. 4: 147. ♀, ♂.
Biology: Keen, 1958. U. S. Dept. Agr., Tech. Bul. 1169: 94.
- hyphantriae* Crawford. Mass., N. Y., N. J., Ark., Tex., Colo. Host: *Hyphantria cunea* (Drury), *Orgyia definita* (Pack.).
Elachertus hyphantriae Crawford, 1911. U. S. Natl. Mus., Proc. 39: 622. ♀.
Biology: Schaffner and Griswold, 1934. U. S. Dept. Agr., Misc. Pub. 188: 37, 155. —Raizenne, 1952. Canad. Div. Forest Biol., Forest Lep. S. Ont. and Par., p. 31.
- louisiana* (Girault). La.
Epardalton louisiana Girault, 1917. Descr. Hym. Chalcidoid. Variorum cum Observ. III, p. 5. ♀.
marylandicus Girault. Mass., Conn., N. J., Md. Host: *Diacrisia virginica* (F.), *Hyphantria cunea* (Drury).
Elachistus marylandicus Girault, 1916. Brooklyn Ent. Soc., Bul. 11: 112. ♀.
Biology: Schaffner and Griswold, 1934. U. S. Dept. Agr., Misc. Pub. 188: 36, 155. —Swain, 1937. Ent. News 48: 246.
- multidentatus* (Girault). Fla.
Parentedon multidentatus Girault, 1917. Descr. Hym. Chalcidoid. Variorum cum Observ. III, p. 5. ♀.
pini Gahan. Maine, Vt., Mass., Va., Mich. Host: *Diorystria* sp., *Rhyacionia frustrana* (Comst.).
Elachertus pini Gahan, 1927. Jour. Agr. Res. 34: 547. ♀, ♂.
Biology: Cushman, 1927. Jour. Agr. Res. 34: 617.
- proteoteratis* Howard. Que., Ont., Conn., N. J., Pa., Mich., Mo., Idaho, Ariz., B. C., Calif. Host: *Proteoteras aesculana* Riley, *Stenoma algidella* (Walk.).
Elachistus proteoteratis Howard, 1885. U. S. Dept. Agr., Bur. Ent. Bul. 5: 27. ♀.
Euplectrus viridaeneus Provancher, 1887. Addit. Corr. Faune Ent. Canada Hym., p. 207; errata. ♀.
Taxonomy: Burks, 1964 (1963). Canad. Ent. 95: 1252.
- Biology: Waddell, 1952. Ent. Soc. B. C., Proc. 48: 88.
- spilosomatis* Howard. N. J. Host: *Diacrisia virginica* (F.). Described only by a figure of pupae.
Elachistus spilosomatis Howard, 1891. U. S. Dept. Agr., Insect Life 4: 195.

Genus HYSSOPUS Girault

Hyssopus Girault, 1916. Canad. Ent. 48: 115.

Type-species: *Hyssopus thymus* Girault. Monotypic.

Hyssopiscus Ghesquiere, 1946. Rev. Zool. Bot. Africaines 34: 370. N. name, unnecessarily proposed.

benefactor (Crawford). N. Y., Md., Ohio, B. C. Host: *Petrova albicapitana* (Busck), *P. comstockiana* (Fern.), *P. metallica* (Busck), *P. virginiana* (Busck).
Elachertus benefactor Crawford, 1912. U. S. Natl. Mus., Proc. 43: 182. ♀.
evetriae (Girault). Minn., Idaho, Oreg. Host: *Barbara californiana taxifoliella* (Busck), *Melissopus latiferreanus* (Wlsm.), *Petrova albicapitana* (Busck), *P. wenzeli* (Kearf.).
Elachistus evetriae Girault, 1917. Descr. Hym. Chalcidoid. Variorum cum Observ. III, p. 1. ♀.

Biology: Dohanian, 1942. Jour. Econ. Ent. 35: 837, 840. —Miller and Altmann, 1958. Ohio Jour. Sci. 58: 278-280. —Keen, 1958. U. S. Dept. Agr., Tech. Bul. 1169: 95.

johannseni (Crawford). Maine, Va., Miss. Host: *Laspeyresia* sp.
Elachertus johannseni Crawford, 1912. U. S. Natl. Mus., Proc. 43: 181. ♀.
novus Girault. Calif.
Hyssopus novus Girault, 1917. Descr. Hym. Chalcidoid. Variorum cum Observ. III, p. 3. ♀.
rhyacioniae Gahan. Ont., s. to Fla., w. to Mich., Ark., Tex. Host: *Dioryctria abietella* D. and S., *D. amatella* (Hulst), *D. cambiacola* (Dyar), *D. zimmermani* (Grote), *Rhyacionia frustrana* (Comst.).
Hyssopus rhyacioniae Gahan, 1927. Jour. Agr. Res. 34: 546. ♀, ♂.

Biology: Cushman, 1927. Jour. Agr. Res. 34: 617. —Underhill, 1943. Va. Agr. Expt. Sta., Bul. 349: 12.

sanninoideae (Girault). Conn., Va., Ark. Host: *Sanninoidea extiosa* (Say), *Synanthedon scitula* (Harr.).
Elachistus sanninoideae Girault, 1917. Brooklyn Ent. Soc., Bul. 12: 85. ♀, ♂.

Biology: Underhill, 1935. Jour. Econ. Ent. 28: 396.

thymus Girault. Ont. and N. Y., s. to Fla., w. to Idaho and Calif. Host: *Dioryctria auranticella* (Grote), *D. xanthoenoebates* Dyar, *D. zimmermani* (Grote), *Petrova comstockiana* (Fern.), *P. wenzeli* (Kearf.), *Rhyacionia buoliana* (Schiff.), *R. frustrana* (Comst.), *R. rigidana* (Fern.).
Hyssopus thymus Girault, 1916. Canad. Ent. 48: 115. ♀.

Biology: Slate, 1936. Conn. Agr. Expt. Sta., Bul. 381: 181. —Friend, Plumb, and Hicock, 1938. Jour. Econ. Ent. 31: 511. —Miller, 1953. Ohio Jour. Sci. 53: 61-62. —Miller and Altman, 1958. Ohio Jour. Sci. 58: 278-280. —Keen, 1958. U. S. Dept. Agr., Tech. Bul. 1169: 95. —Watson and Arthur, 1959. Canad. Ent. 91: 480-484. —Schaffner, 1959. U. S. Dept. Agr., Misc. Pub. 767: 84. —Hartman and Kulman, 1962. Jour. Econ. Ent. 55: 1007. —Syme, 1970. Canad. Ent. 102: 1523-1527. —Syme, 1971. Canad. Ent. 103: 1691-1696. —Purrrington and Uleman, 1972. Ent. Soc. Amer., Ann. 65: 280-281.

Genus PSEUDOLYNX Girault

Pseudolynx Girault, 1916. Ent. News 27: 152.

Type-species: *Pseudolynx io* Girault. Orig. desig.

flavimaculata Girault. Minn.

Pseudolynx flavimaculatus Girault, 1916. Ent. News 27: 153. ♀.

io Girault. Mass.

Pseudolynx io Girault, 1916. Ent. News 27: 152. ♀.

marilandia Girault. Md.

Pseudolynx marilandia Girault, 1917. Chalcidoidea Nova Marilandensis [I]. p. 1. ♀.

Genus MIROLYNX Girault

Mirolynx Girault, 1916. U. S. Natl. Mus., Proc. 51: 131.

Type-species: *Mirolynx flavitibiae* Girault. Orig. desig.

flavitibiae Girault. Calif.

Mirolynx flavitibiae Girault, 1916. U. S. Natl. Mus., Proc. 51: 131. ♀, ♂.

Genus GROTIUSOMYIA Girault

Grotiusomyia Girault, 1917. Psyche 24: 95.

Type-species: *Grotiusomyia flavicornis* Girault. Orig. desig.
flavicornis Girault, D. C., N. C. Ecology: Parasitic on pyralid leaf miner on oak.
Grotiusomyia flavicornis Girault, 1917. Psyche 24: 95. ♀.

Taxonomy: Girault, 1918. Ent. News 29: 126.

Genus APTEROLOPHUS Gahan

Apterołophus Gahan, 1919. Ent. Soc. Wash., Proc. 21: 3.
 Type-species: *Apterołophus pulchricornis* Gahan. Monotypic.
pulchricornis Gahan, N. Y., S. C., Ind. Ecology: Taken sifting treehole litter.
Apterołophus pulchricornis Gahan, 1919. Ent. Soc. Wash., Proc. 21: 3. ♀.

Genus GIRAULTIA Gahan and Fagan

Cirrospilopsis Girault, 1915. Queensland Mus., Mem. 3: 263. Preocc. by Brethes, 1913.
 Type-species: *Cirrospilopsis nigrivariiegatus* Girault. Orig. desig.
Giraultia Gahan and Fagan, 1923. U. S. Natl. Mus., Bul. 124: 66. N. name.
fuscipennis (Girault). Md.
Cirrospilopsis fuscipennis Girault, 1916. Ent. Soc. Amer., Ann. 9: 293. ♀.
metallicus (Girault). Md.
Cirrospilopsis metallicus Girault, 1917. Psyche 24: 100. ♀.
sapientia (Girault). D. C.
Cirrospilopsis sapientia Girault, 1917. Descr. Hym. Chalcidoid. Variorum cum Observ. V, p. 13. ♀.

Genus CIRROSPILOIDEUS Ashmead

Cirrospiloideus Ashmead, 1904. Carnegie Mus., Mem. 1: 354, 355.
 Type-species: *Miotropis platynotae* Howard. Orig. desig.
Alophus Ashmead, 1904. Carnegie Mus., Mem. 1: 353, 519. Preocc. by Schoenherr, 1826.
 Type-species: *Alophus flavus* Ashmead. Orig. desig.
Alophomyia Ashmead, 1904. Ent. Soc. Wash., Proc. 6: 126. N. name.
Diglyphomorphomyia Girault, 1913. Queensland Mus., Mem. 2: 281.
 Type-species: *Diglyphomorphomyia nigriscutellum* Girault. Orig. desig.
Sympiesomorphellus Girault, 1913. Arch. f. Naturgesch. 79A (6): 75.
 Type-species: *Sympiesomorphelleus suttneri* Girault. Orig. desig.
bicoloriceps (Girault). La. Host: *Keiferia inconspicuelle* (Murtf.).
Sympiesomorphelleus bicoloriceps Girault, 1919. Ent. Soc. Amer., Ann. 9: 302. ♀.
californicus (Girault). Calif.
Sympiesomorphelleus californicus Girault, 1916. Jour. Ent. and Zool. 8: 119. ♀.
johnsoni Girault. Maine, D. C., Ill.
Cirrospiloideus johnsoni Girault, 1917. Descr. Hym. Chalcidoid. Variorum cum Observ. III, p. 7. ♀.
mediolineatus Girault. Md.
Cirrospiloideus mediolineatus Girault, 1917. Chalcidoidea Nova Marilandensis. II, p. 2.
 ♀.
 Taxonomy: Girault, 1920. U. S. Natl. Mus., Proc. 58: 198.
nigriceps (Girault). Tex.
Sympiesomorphelleus nigriceps Girault, 1916. U. S. Natl. Mus., Proc. 51: 44. ♀.
nigriprothorax (Girault). Kans.
Sympiesomorphelleus nigriprothorax Girault, 1916. U. S. Natl. Mus., Proc. 51: 131. ♀.
platynotae (Howard). Fla. Host: *Platynota rostrana* (Walk.).
Miotropis platynotae Howard, 1885. In Hubbard, Insects Affecting the Orange, p. 217. ♂.
seminigriventris Girault. Pa., Ohio. Host: *Eurukuttarus confederata* (Grote).
Cirrospiloideus seminigriventris Girault, 1917. Descr. Hym. Chalcidoid. Variorum cum Observ. V, p. 1. ♀.

Genus PECKELACHERTUS Yoshimoto

Peckelachertus Yoshimoto, 1970. Canad. Ent. 102: 908.

Type-species: *Peckelachertus diprioni* Yoshimoto. Orig. desig.

diprioni Yoshimoto. Que. Host: *Gilpinia frutetorum* (F.).

Peckelachertus diprioni Yoshimoto, 1970. Canad. Ent. 102: 908. ♀, ♂.

Genus CIRROSPILUS Westwood

Cirrospilus Westwood, 1832. London, Edinb. and Dublin Phil. Mag. and Jour. Sci. (3) 1: 128.

Type-species: *Cirrospilus elegantissimus* Westwood. Monotypic.

Pseudiglyphonyia Girault, 1913. Queensland Mus. Mem. 2: 267.

Type-species: *Pseudiglyphonyia biguttata* Girault. Orig. desig.

Atoposomoidea Howard, 1910. U. S. Dept. Agr., Bur. Ent., Tech. Bul. 19: 9.

Type-species: *Atoposomoidea ogimae* Howard. Monotypic.

Plesiospilus Ferriere, 1953. Univ. Bologna, Ist. di Ent., Bol. 19: 398.

Type-species: *Eulophus unistrigatus* Foerster. Orig. desig.

Taxonomy: Delucchi, 1958. Entomophaga 3: 253. — Boucek, 1959. Mus. Natl. Pragae, Acta Ent. 33: 172 (subgenera).

americanus (Girault). Ohio.

Pseudiglyphonyia americanana Girault, 1916. U. S. Natl. Mus. Proc. 51: 43, 45, 48. ♀.

cinctithorax (Girault). N. B., Que., Ont., Maine, Mass., Ill., Wis. Host: *Argyresthia freyella* Wlshm., *Bucculatrix ainsliella* Murtf., *B. canadensisellea* Chamb., *Coleophora fuscedinella* Zeller, *C. pruniella* Clem., *Lithocleletis salicifoliella* Clem., L.

tremuliodiella Braun, *Phylloconistis populiella* Chamb.; *Heterarthrus nemoratus* (Fall.), *Meteorus versicolor* (Wesm.).

Pseudiglyphonyia cinctithorax Girault, 1916. U. S. Natl. Mus. Proc. 51: 45. ♀.

Biology: Proper, 1934. Jour. Agr. Res. 48: 366. — Doner, 1936. Ent. Soc. Amer., Ann. 29: 226. — Schaffner, 1959. U. S. Dept. Agr., Misc. Pub. 767: 84.

columbia (Girault). D. C.

Pseudiglyphonyia columbia Girault, 1917. Descr. Hym. Chalcidoid. Variorum cum Observ. V, pp. 6, 7. ♀.

coptodiscae (Girault). Maine, s. to N. J., Ky. Host: *Coptodisca splendoriferella* (Clem.).

Pseudiglyphonyia coptodiscae Girault, 1916. Canad. Ent. 48: 266. ♀, ♂.

eunapius Walker. Fla.

Cirrospilus Eunapius Walker, 1847. Ann. and Mag. Nat. Hist. (1) 20: 27. ♀.

Taxonomy: Burks, 1975. Brit. Mus. (Nat. Hist.) Ent., Bul. 32 (4): 143 (lectotype designated).

flavicinctus Riley. Maine, s. to D. C., w. to Kans. and Wash. Host: *Archips semiferanus* (Walk.), *Bucculatrix ainsliella* Murtf., *B. pomifoliella* Clem., *Coleophora fuscedinella* Zell., *C. malivorella* Riley, *C. pruniella* Clem.; *Heterarthrus nemoratus* (Fallen).

Cirrospilus flavicinctus Riley, 1883. In Lintner, First Ann. Rpt. Injurious Ins. N. Y., p. 159. ♀, ♂.

Cirrospilus flavomaculatus Ashmead, 1894. Amer. Ent. Soc., Trans. 21: 341. ♀.

Biology: Christensen, 1934. Wis. Agr. Expt. Sta., Bul. 428: 101. — Doner, 1936. Ent. Soc. Amer., Ann. 29: 233-234. — Schaffner, 1959. U. S. Dept. Agr., Misc. Pub. 767: 84.

flavifacies (Girault). Calif.

Pseudiglyphonyia flavifacies Girault, 1916. U. S. Natl. Mus., Proc. 51: 43. ♀.

flavoviridis Crawford. Utah, Ariz., Nev., Calif. Host: *Agromyza parvicornis* Loew, *Cerodontha dorsalis* (Loew), *Liriomyza* sp.

Cirrospilus flavoviridis Crawford, 1913. U. S. Natl. Mus., Proc. 45: 317. ♀, ♂.

giraulti Peck. U. S. Host: *Bucculatrix* sp.

Pseudiglyphonyia pulchra Girault, 1916. U. S. Natl. Mus., Proc. 51: 45. ♀. Preocc. by Masi, 1911.

Cirrospilus giraulti Peck, 1951. U. S. Dept. Agr., Agr. Monog. 2: 458. N. name.

inimicus Gahan. Ill. Host: *Gambrus extrematis* (Cress.).

Cirrospilus inimicus Gahan, 1934. Ent. Soc. Wash., Proc. 36: 123. ♀, ♂.

Biology: Marsh, 1938. N. Y. Ent. Soc., Jour. 46: 27-29.

marilandii Girault. Conn., Md., N. C. Host: *Coptodisca* sp.

Cirrospilus marilandii Girault, 1917. Descr. Hym. Chalcidoid. Variorum cum Observ. III, p. 4. ♀.

marilandicus (Girault). Md.

Pseudiglyphonyia marilandica Girault, 1917. Psyche 24: 91. ♀.

niger Howard. N. J. Host: *Vanessa atalanta* (L.); *Eulophus* sp.

Cirrospilus niger Howard, 1889. In Scudder, Butterflies of Eastern U. S. and Canada, p. 1872. ♀, ♂.

nigrivariegata (Girault). Ind., Iowa, Kans., S. Dak. Host: *Parornix geminatella* (Pack.).
Tischeria malifoliella (Clem.).

Pseudiglyphonyia nigrivariegata Girault, 1917. Descr. Hym. Chalcidoid. Variorum cum Observ. III, p. 7. ♀.

ocellatus Girault. Que., Conn., Ill. Host: *Bucculatrix canadensisella* (Chamb.).

Cirrospilus ocellatus Girault, 1917. U. S. Natl. Mus., Proc. 53: 446. ♀.

ovisugosus Crosby and Matheson. N. Y. Host: *Poecilocapsus lineatus* (F.).

Cirrospilus ovisugosus Crosby and Matheson, 1915. Canad. Ent. 47: 181. ♀, ♂.

pictus (Nees). Que., Ont., Maine; Europe. Introduced from Europe for biological control; first liberated in Ontario in 1935. Host: *Coleophora lariella* (Hbn.); *Fenusia pusilla* (Lep.); *Heterarthrus nemoratus* (Fallen).

Eulophus pictus Nees, 1834. Hym. Ichn. Aff. Monog., v. 2, p. 165. ♀, ♂.

Taxonomy: Ferriere, 1933. In Thorpe, Bul. Ent. Res. 24: 289-290.

Biology: Dowden, 1941. U. S. Dept. Agr., Tech. Bul. 757: 8-9, 37-41. — Sundby, 1958 (1957). Norsk. Ent. Tidsk., Sup. 2, pp. 18-21.

pulcherraria Girault. Kans.

Cirrospilus pulcherraria Girault, 1917. Descr. Hym. Chalcidoid. Variorum cum Observ. V, p. 8. ♀.

Taxonomy: Girault, 1920. U. S. Natl. Mus., Proc. 58: 195.

purpureus Ashmead. Fla.

Cirrospilus purpureus Ashmead, 1886. Amer. Ent. Soc., Trans. 13: 133. ♀.

unguttatipennis (Girault). Calif.

Pseudiglyphonyia unguittatipennis Girault, 1916. Jour. Ent. and Zool. 8: 120. ♀.

Genus ZAGRAMMOSOMA Ashmead

Hippocephalus Ashmead, 1888. Kans. Agr. Expt. Sta., Bul. 3: App., p. VII. Preocc. by Swainson, 1839.

Type-species: *Hippocephalus multilineatus* Ashmead. Monotypic.

Zagrammosoma Ashmead, 1904. Carnegie Mus., Mem. 1: 354. N. name.

Zagrammatosoma Schulz, 1906. Spolia Hym., p. 142. Emend.

Atoposoma Masi, 1907. Lab. Zool. Gen. e. Agr. Portici, Bol. 1: 276.

Type-species: *Atoposoma variegatum* Masi. Monotypic.

Taxonomy: Boucek, 1959. Mus. Natl. Pragae, Acta Ent. 33: 172-173 (subgenus of *Cirrospilus*).

americanum Girault. Colo., Ariz., Calif. Host: *Coleotechnites milleri* (Busck).

Zagrammosoma americanum Girault, 1916. U. S. Natl. Mus., Proc. 51: 125, 126. ♀.

centrolineatum Crawford. Calif. Host: *Lithocolletis mediodorsella* (Braun).

Zagrammosoma centrolineata Crawford, 1913. U. S. Natl. Mus., Proc. 45: 256. ♀.

flavolineatum Crawford. Colo., Calif. Host: *Phthorimaea operculella* (Zell.).

Zagrammosoma flavolineata Crawford, 1913. U. S. Natl. Mus., Proc. 45: 255. ♀.

interlineatum Girault. Mass., D. C., Fla., Ohio. Host: *Exoteleia pinifoliella* (Chamb.).
Lithocolletis cincinnatiella (Chamb.).

Zagrammosoma interlineata Girault, 1916. U. S. Natl. Mus., Proc. 51: 125. ♀.

Biology: Schaffner, 1959. U. S. Dept. Agr., Misc. Pub. 767: 84.

mirum Girault. Calif. Host: *Lithocolletis crataegella* Clem.; *Liriomyza pictella* (Thomson).
Zagrammosoma mira Girault, 1916. Jour. Ent. and Zool. 8: 119. ♀.

multilineatum (Ashmead). Md., D. C., S. C., W. Va., Fla., Ohio, Ind., La., Kans. Host:
Lithocolletis sp., *Parornix geminatella* (Pack.), *Phyllocnistis magnoliella* Ashm.,
Tischeria magnoliella (Clem.); *Agromyza parvicornis* Loew.

Hippocephalus multilineatus Ashmead, 1888. Kans. Agr. Expt. Sta., Bul. 3: App. p. VII. ♀,
♂.

Zagrammosoma multilineata var. *punicea* Girault, 1911. Arch. f. Naturgesch. 77 (1), sup.
2: 123. ♀. N. syn.

Biology: Phillips, 1914. Jour. Agr. Res. 2: 27.

nigrolineatum Crawford. Maine, Calif. Host: *Argyresthia thuiella* (Pack.).

Zagrammosoma nigrolineata Crawford, 1913. U. S. Natl. Mus., Proc. 45: 257. "♀" = ♂.

sanguineum Girault. Colo.

Zagrammosoma sanguinea Girault, 1916. U. S. Natl. Mus., Proc. 51: 133. ♀.

Genus MIRZAGRAMMOSOMA Girault

Mirzagrammosoma Girault, 1915. Ent. Soc. Amer., Ann. 8: 279.

Type-species: *Mirzagrammosoma lineaticeps* Girault. Monotypic.

lineaticeps Girault. Fla.; Cent. America, West Indies. Host: *Leucoptera coffeella* (Guerin);
Liriomyza archboldi Frost.

Mirzagrammosoma lineaticeps Girault, 1915. Ent. Soc. Amer., Ann. 8: 279. ♀.

Genus AULOGYMNUS Foerster

Aulogymnus Foerster, 1851. Naturh. Ver. Rheinlande, Verh. 8: 24.

Type-species: *Aulogymnus aceris* Foerster. Monotypic.

Olynx Foerster, 1856. Hym. Stud., v. 2, p. 72.

Type-species: *Ichneumon gallarum* Linnaeus. Orig. desig.

Taxonomy: Boucek, 1965. Mus. Natl. Pragae, Acta Ent. 36: 551.

minyas (Walker). Fla.

Eulophus Minyas Walker, 1847. Ann. and Mag. Nat. Hist. (1) 20: 26. ♀.

Taxonomy: Burks, 1975. Brit. Mus. (Nat. Hist.) Ent., Bul. 32 (4): 146 (lectotype designated).

SUBFAMILY ENTEDONTINAE

TRIBE EUDERINI

Taxonomy: Erdos, 1956. Rov. Kozlem. (n. s.) 9: 2 (tribe). — Graham, 1959. Soc. Brit. Ent.,
Trans. 13: 203 (subfamily). — Boucek, 1963. Beitr. z. Ent. 13: 257 (subfamily).

Genus ACRIAS Walker

Acrias Walker, 1847. Ann. and Mag. Nat. Hist. (1) 20: 29.

Type-species: *Acrias nileus* Walker. Monotypic.

Taxonomy: Boucek, 1963. Beitr. z. Ent. 13: 258.

nileus Walker. Pa., Fla.

Acrias nileus Walker, 1847. Ann. and Mag. Nat. Hist. (1) 20: 29. ♀.

Taxonomy: Burks, 1975. Brit. Mus. (Nat. Hist.) Ent., Bul. 32 (4): 146.

Genus EUDERUS Haliday

Euderus Haliday, 1844 (1843). Ent. Soc. London, Trans. 3: 298.

Type-species: *Entedon amphis* Walker. Monotypic.

- Secodella* Girault, 1913. Arch. f. Naturgesch. 79A (6): 48.
 Type-species: *Secodella lineata* Girault. Monotypic.
- Omphalomorpha* Girault, 1913. Arch. f. Naturgesch. 79A (6): 103.
 Type-species: *Omphalomorpha viridis* Girault. Monotypic.
- Allomphale* Silvestri, 1914. Lab. Zool. Gen. e. Agr. Portici, Bol. 9: 217.
 Type-species: *Allomphale cavasolae* Silvestri. Monotypic.
- Secodelloidea* Girault, 1917. Speciosissima Genera Nova Eulophidorum, p. 2.
 Type-species: *Secodella rugosa* Crawford. Orig. desig.
- Euderus* subg. *Euderoides* Yoshimoto, 1971. Canad. Ent. 103: 550.
 Type-species: *Euderus (Euderoides) purpureus* Yoshimoto. Orig. desig.
- Euderus* subg. *Neoeuderus* Yoshimoto, 1971. Canad. Ent. 103: 552.
 Type-species: *Euderus (Neoeuderus) viridilineatus* Yoshimoto. Orig. desig.
- Euderus* subg. *Leipocrossus* Yoshimoto, 1971. Canad. Ent. 103: 555.
 Type-species: *Entedon (Euderus) herillus* Walker. Orig. desig.
- Revision: Crawford, 1915. Ent. Soc. Wash., Proc. 17: 142-144 (*Secodella*). —Girault, 1924. Insector Inscitiae Menstruus 12: 94. —Erdos, 1951. Acta Biol. Acad. Sci. Hung. 2: 202 (Hungarian fauna). —Boucek, 1963. Beitr. z. Ent. 13: 257-267 (Palearctic fauna). —Yoshimoto, 1971. Canad. Ent. 103: 541-578.

Taxonomy: Gahan and Peck, 1946. Wash. Acad. Sci., Jour. 36: 316.

Genus WINNEMANA Crawford

Winnemana Crawford, 1911. U. S. Natl. Mus., Proc. 39: 620.

Type-species: *Winnemana argei* Crawford. Orig. desig.

Ootetrastichoides Ii, 1936. Kontyu 10: 221-225.

Type-species: *Ootetrastichoides habachi* Ii. Monotypic.

Taxonomy: Domenichini, 1966. Index Palearctic Tetrastichinae, Le Francois, p. 15.

argei Crawford. Md. Ecology: Egg parasite. Host: *Arge pectoralis* (Leach).

Winnemana argei Crawford, 1911. U. S. Natl. Mus., Proc. 39: 620. ♀, ♂.

Biology: Schwarz, 1909. Ent. Soc. Wash., Proc. 11: 107.

Genus THRIPOSOMA Crawford

Thriposoma Crawford, 1913. U. S. Natl. Mus., Proc. 45: 255.

Type-species: *Thriposoma grafi* Crawford. Orig. desig.

grafi Crawford. Calif.

Thriposoma grafi Crawford, 1913. U. S. Natl. Mus., Proc. 45: 255. ♀.

Genus OMPHALOMOPSIS Girault

Omphalomopsis Girault, 1917. Brooklyn Ent. Soc., Bul. 12: 88.

Type-species: *Omphalomopsis marilandia* Girault. Orig. desig.

marilandia Girault. Md.

Omphalomopsis marilandia Girault, 1917. Brooklyn Ent. Soc., Bul. 12: 88. ♀.

Genus THYMUS Girault

Thymus Girault, 1916. Canad. Ent. 48: 113.

Type-species: *Encyrtus albocinctus* (Ashmead). Orig. desig.

Thymiscus Ghesquiere, 1946. Rev. Zool. Bot. Africaines 34: 371. N. name, unnecessarily proposed.

albocinctus (Ashmead). Fla. Ecology: Reared from cynipid gall on *Quercus nigra*.

Eupelmus albocinctus Ashmead, 1885. Amer. Ent. Soc., Trans. 12: Proc. p. xvi. ♀.

Genus PROTHYMUS Girault

Prothymus Girault, 1917. New Chalcid Flies, p. 1.

Type-species: *Prothymus novus* Girault. Orig. desig.

novus Girault. Fla., Mo.

Prothymus novus Girault, 1917. New Chalcid Flies, p. 1.

Genus GALEOPSOMYIA Girault

Galeopsomyia Girault, 1916. Ent. News 27: 348.

Type-species: *Euderus columbianus* Ashmead. Orig. desig.

haemon (Walker). N. Y., s. to Fla., w. to Mo., Tex., N. Mex. and Ariz. Host: *Asphondylia helianthiglobulus* O. S., *Rhopalomyia* sp. gall on *Solidago*.

Tetrastichus haemon Walker, 1847. Ann. and Mag. Nat. Hist., (1), 20: 28. ♀.

Euderus columbianus Ashmead, 1888. Canad. Ent. 20: 104. ♀.

Taxonomy: Girault, 1912. Canad. Ent. 44: 50-52. — Burks, 1971. Ent. Soc. Wash., Proc. 73: 82.

— Burks, 1975. Brit. Mus. (Nat. Hist.) Ent., Bul. 32 (4): 144 (synonymy).

nigrocyanea (Ashmead). D. C., N. C., Fla., La., Tex., Calif. Host: *Belonocnema treatae* Mayr.

Gyrolasia nigrocyanea Ashmead, 1886. Amer. Ent. Soc., Trans. 13: 134. ♀.

Genus PARAGALEOPSOMYIA Girault

Paragaleopsomyia Girault, 1917. Speciosissima Genera Nova Eulophidorum, p. 1.

Type-species: *Paragaleopsomyia ejia* Girault. Orig. desig.

eja Girault. Ariz., Oreg., Calif.

Paragaleopsomyia ejae Girault, 1917. Speciosissima Genera Nova Eulophidorum, p. 1. ♀.
gallicola Gahan. Tex., Ariz. Ecology: Reared from cecidomyiid gall on *Pluchea borealis*.

Paragaleopsomyia gallicola Gahan, 1919. Ent. Soc. Amer., Ann. 12: 167. ♀, ♂.

Genus GALEOPSOMOPSIS Girault

Galeopsomopsis Girault, 1917. Speciosissima Genera Nova Eulophidorum, p. 1.

Type-species: *Galeopsomopsis multisulcata* Girault. Orig. desig.

squamosa Girault. Calif.

Galeopsomopsis squamosus Girault, 1917. New Chalcid Flies, p. 3.

transcarinata Gahan. Ariz. Host: *Asphondylia websteri* Felt.

Galeopsomopsis transcarinatus Gahan, 1919. Ent. Soc. Amer., Ann. 12: 168. ♀, ♂.

Genus TETRASTICHUS Haliday

Tetrastichus Walker, 1842. Ann. and Mag. Nat. Hist. (1) 10: 116. Genus suppressed by Opinion 720, Internat. Comn. Zool. Nomencl., 1965.

Type-species: *Cirrospilus lycidas* Walker. Desig. by Peck, 1951.

Tetrastichus Haliday, 1844. Ent. Soc. London, Trans. 3: 297. Placed on Official list of Generic Names in Zoology by Opinion 720, Internat. Comn. Zool. Nomencl., 1965.

Type-species: *Cirrospilus attalus* Walker. Monotypic. Placed on Official list of

Specific Names in Zoology by Opinion 720, Internat. Comn. Zool. Nomencl., 1965.
Trichoceras Ratzelburg, 1844. Ichn. d. Forstins, v. 1, insert opp. p. 40, p. 171.

Type-species: *Trichoceras erythrophthalmus* Ratzelburg. Monotypic.

Geniocerus Ratzelburg, 1848. Ichn. d. Forstins, v. 2, p. 175. N. name, unnecessarily proposed.

Baryscapus Foerster, 1856. Hym. Stud., v. 2, p. 84. No species.--Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 202. One species.

Type-species: *Baryscapus centricolae* Ashmead. Included by Ashmead, 1887.

Solenoderus Motschulsky, 1863. Soc. Imp. Nat. Moscou, Bul. 36: 71.

Type-species: *Solenoderus cyaniventris* Motschulsky. Monotypic.

Oomyzus Rondani, 1870. Comizio Agr. Parma, Bol. 3: 140.

Type-species: *Oomyzus gallericcae* (Fonscolombe). Monotypic.

Myiomisa Rondani, 1877. Soc. Ent. Ital., Bol. 9: 189.

Type-species: *Myiomisa microscopica* Rondani. Monotypic.

Tetrastichodes Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 203.

Type-species: *Tetrastichus floridanus* Ashmead. Monotypic.

Lygellus Giard, 1896. Soc. de Biol. (Paris), Compt. Rend., p. 839.

Type-species: *Lygellus pilachnae* Giard. Monotypic.

Neotetrastrichus Perkins, 1912. Hawaii. Sugar Planters' Assoc. Expt. Sta., Div. Ent. Bul. 10: 14.

Type-species: *Neotetrastrichus mimus* Perkins. Monotypic.

Epitetrastrichus Girault, 1913. Queensland Mus., Mem. 2: 205 (footnote), 229.

Type-species: *Epetetrastrichus speciosissimus* Girault. Orig. desig.

Neomphaloideiella Girault, 1913. Roy. Soc. So. Australia, Trans. 37: 69.

Type-species: *Neomphaloideiella fasciativentris* Girault. Monotypic.

Epomphaloides Girault, 1913. Arch. f. Naturgesch. 79A (6): 49.

Type-species: *Epomphaloides flavus* Girault. Orig. desig.

Neotetrastrichodes Girault, 1913. Queensland Mus., Mem. 2: 228.

Type-species: *Neotetrastrichodes flavus* Girault. Orig. desig.

Aprostoceroloides Girault, 1913. Queensland Mus., Mem. 2: 243.

Type-species: *Aprostoceroloides speciosus* Girault. Orig. desig.

Hadrothrix Cameron, 1913. Indian Forest Rec. 4: 102. N. Syn.

Type-species: *Hadrothrix purpurea* Cameron. Monotypic.

Blattotetrastrichus Girault, 1917. Ent. News 28: 257.

Type-species: *Entedon hagenowii* Ratzelburg. Orig. desig.

Paromphaloideomyia Girault, 1917. New Chalcid Flies, p. 1.

Type-species: *Paromphaloideomyia homeri* Girault. Orig. desig.

Tamarixia Mercet, 1924. R. Soc. Espan. Hist. Nat., Bol. 24: 57.

Type-species: *Tamarixia bicolor* Mercet. Orig. desig.

Anellaria Bakkendorf, 1934. Ent. Meddel. 19: 8.

Type-species: *Anellaria conomeli* Bakkendorf. Monotypic.

Pachyscapus Erdos, 1954. Mus. Nat. Hungarici, Ann. Hist. Nat., n. s., 5: 364.

Type-species: *Ceranisus crino* (Walker). Orig. desig.

The genus *Sphenolepis* Nees, 1834 (Hym. Ichn. Aff. Monog., v. 2, p. 265), along with its synonym *Peltaphorus* Erdos, 1961 (Mus. Nat. Hungarici, Ann. Hist. Nat. 53: 483, 489), has been placed as a synonym of *Tetrastichus* Haliday by Boucek, 1961 (Mus. Nat. Pragae, Acta Ent. 34: 475). *Sphenolepis* is a wingless, aberrant form. It is, nevertheless, in Boucek's opinion, the same genus as *Tetrastichus*. Since it has priority over *Tetrastichus*, Boucek expressed his intention to petition the International Commission to suppress it. However, *Sphenolepis* and *Tetrastichus* can, and should, be separated generically.

anthracinus Ashmead. Alaska. Type unidentifiable.

Tetrastichus anthracinus Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 146. ♀.

asparagi Crawford. S. Canada, Eastern U. S., Utah, Ariz., Wash., Oreg.; Europe. Probably introduced with its host plant. Host: *Criocerus asparagi* (L.).

Eulophus coeruleus Nees, 1834. Hym. Ichn. aff. Monog., v. 2, p. 174. ♀.

Tetrastichus asparagi Crawford, 1909. Ent. Soc. Wash., Proc. 11: 150. ♀. Consensus of opinion is that the name *asparagi* should be retained for this species because of wide usage in the economic literature. See Graham, 1961. Ent. Monthly Mag. 97: 39-40 and Domenichini, 1966. Palearctic Tetrastichinae, Le Francois, p. 19. It may be desirable to refer this matter to the Commission.

Biology: Howard, 1910. Jour. Econ. Ent. 3: 257-260. —Russell and Johnston, 1912. Jour. Econ. Ent. 5: 429. —Johnston, 1915. Jour. Agr. Res. 4: 303. —Ross, 1915. Agr. Gaz. Canada 2:

1055. —Paillet, 1917. Ann. du Serv. des Epiphyt. 4: 335. —Chittenden, 1923. Oreg. Bd. Hort., Rpt. 17: 187. —Felt, 1923. N. Y. State Ent., Rpt. 35: 92. —Beaulne, 1935. Quebec Soc. Protect. Plants, Ann. Rpt. 27: 59. —Sweetman, 1936. Biol. Control of Insects, pp. 145-146. —Clausen, 1956. U. S. Dept. Agr., Tech. Bul. 1139: 53. —Askew, 1971. Parasitic Insects, p. 136.

auplopus Burks. Va. Host: *Auplopus* sp.

Tetrastichus auplopus Burks, 1963. Biol. Soc. Wash., Proc. 76: 55. ♀.

baldufi Burks. Ill. Host: *Neuroterus quercusverrucarum* (O. S.) gall.

Tetrastichus baldufi Burks, 1943. U. S. Natl. Mus., Proc. 93: 540. ♀, ♂.

banksii Howard. N. J., D. C., Fla., Ala., Mo. Ecology: In sacs of epeirid spiders.

Tetrastichus banksii Howard, 1892. Ent. Soc. Wash., Proc. 2: 299. ♀.

barbarae Burks. Mont., N. Mex., Oreg. Ecology: In *Abies* cones infested with *Barbara colfaxiana* (Kearf.), *Pinus ponderosa* cones, *Pseudotsuga menziesii* cones; possibly secondary.

Tetrastichus barbarae Burks, 1963. Biol. Soc. Wash., Proc. 76: 52. ♀, ♂.

blastophagi (Ashmead). D. C., Fla. Host: *Callirhytis blastophaga* (Ashm.) gall.

Hypertelia blastophagi Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 202. ♀, ♂.

brevicornis (Panzer). Ont.; Europe. Probably an adventive sp. Host: *Contarinia* sp. in *Fraxinus* seeds.

Cynips brevicornis Panzer, 1804. System. Nomencl. . . Schaeffers . . . Insekten, p. 134.

brevistigma Gahan. N. H., Mass., Conn., R. I., N. Y., D. C., Ohio, Ind., Ky., Wash., Oreg., Calif. Host: *Pyrrhalta luteola* (Muller) pupae. This parasite is native to North America and its host is introduced; its original host must have been some related, native chrysomelid.

Tetrastichus brevitigma Gahan, 1936. Ent. Soc. Wash., Proc. 38: 76. ♀, ♂.

Biology: Berry, 1938. U. S. Dept. Agr., Cir. 485, 11 pp. —Clausen, 1956. U. S. Dept. Agr., Tech. Bul. 1139: 67.

bruchivorus Gahan. France. Introduced, but not established in N. C., Oreg. from France. Host: *Bruchus brachialis* Fahr.

Tetrastichus bruchivorus Gahan, 1942. Ent. Soc. Wash., Proc. 44: 8. ♀, ♂.

Biology: Clausen, 1956. U. S. Dept. Agr., Tech. Bul. 1139: 52.

bruchophagi Gahan. U. S.; Holarctic, South. S. Amer., Africa; prob. worldwide. Host: *Bruchophagus* spp.

Tetrastichus brucophagi(?) Gahan, 1913. U. S. Natl. Mus., Proc. 46: 439. ♀, ♂.

Tetrastichus bruchophagi Girault, 1916. U. S. Natl. Mus., Proc. 51: 128, 132. Emend.

Biology: Urbahns, 1917. Jour. Agr. Res. 8: 277-282. —Gahan, 1919. Ent. Soc. Amer., Ann. 12: 167. —Urbahns, 1920. U. S. Dept. Agr., Bul. 812: 17. —Nikolskaya, 1932. Zashch. rast. 1: 107-111. —Nikolskaya, 1934. Nikhl. nauch. iss. khlopk. inst. (Tashkent) 4-5: 120-122. —Butler and Hansen, 1958. Pan-Pacific Ent. 34: 224-226. —Neunzig and Gyrisco, 1959. Jour. Econ. Ent. 52: 899. —Carrillo and Dickason, 1963. Oreg. State Univ. Agr. Expt. Sta., Tech. Bul. 86: 25, 31. —Batiste, 1967. Hilgardia 38: 463. —Watts and Bellotti, 1967. Jour. Econ. Ent. 60: 961.

byersi Burks. Mich., Ind. Host: *Dolichopeza americana* Needham, *D. walleyi* (Alex.) pupae.

Tetrastichus byersi Burks, 1963. Biol. Soc. Wash., Proc. 76: 53. ♀, ♂.

cassidis Burks. Md., La. Host: *Deloyala guttata* (Oliv.), *Metrionia bicolor* (F.), larvae.

Tetrastichus cassidis Burks, 1943. U. S. Natl. Mus., Proc. 93: 555. ♀, ♂.

centricolae (Ashmead). N. C. Ecology: Reared from gall of *Atrusca quercuscentricola* (O. S.).

Type too broken to be recognized specifically.

Baryscapus centricolae Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 202. ♀.

Taxonomy: Burks, 1943. U. S. Natl. Mus., Proc. 93: 603 (Transferred to *Tetrastichus*).

charoba (Walker). Generally dist. in wheat-producing areas of U. S. and Canada; Holarctic.

Ecology: Usually a primary parasite, but occasionally secondary, developing in other

parasites of the Hessian fly. Host: *Mayetiola destructor* (Say), *Dasineura leguminicola* (Lintner).

Cirrospilus charoba Walker, 1840 (1839). Ann. Nat. Hist. 4: 30. ♀. This name does not have strict priority over other Walker names for this sp., but was selected by Graham (1961. Ent. Monthly Mag. 97: 51) because of usage. Graham lists 12 European synonyms of *charoba*.

Tetrastichus carinatus Forbes, 1885. Ill. State Dept. Agr., Trans. 22 (App.): 48. ♀.

Taxonomy: Gahan, 1934 (1933). U. S. Dept. Agr., Misc. Pub. 174: 138-142, 144. — Hill and Pinckney, 1940. U. S. Dept. Agr., Tech. Bul. 715: 10-13. — Graham, 1961. Ent. Monthly Mag. 97: 51-52 (extensive European synonymy). — Domenichini, 1965. Bol. Zool. agr. e di Bach. (2) 6: 155-156 (synonymy).

Biology: Hill *et al.*, 1939. U. S. Dept. Agr., Tech. Bul. 689: 4-7, 10-15. — Lapina, 1948. Zool. Zhur. 27: 331. — Hill, 1953. U. S. Dept. Agr., Cir. 923: 3.

chlamytis Ashmead. Maine, s. to Fla., w. to Miss., Minn., Tex., and Utah. Host: *Chlamisus* sp., *C. gibbosus* (F.), *Exema dispar* Lacordaire, *E. mormona* Karren.

Tetrastichus chlamytis Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 234. ♀, ♂.

chrysopae (Crawford). Md., s. to Fla., w. to Minn., La., Mont., Oreg. and Calif.; Mexico, West Indies, Brazil. Host: *Chrysopa* sp., *C. californica* Coq., *C. oculata* Say, *C. plorabunda* Fitch, *C. rufilabris* Burm.

Geniocerus chrysopae Crawford, 1915. U. S. Natl. Mus., Proc. 48: 584. ♀.

Aprostoceroloides annapolis Girault, 1917. Chalcidoidea Nova Marilandensis. II, p. 2. ♀.

Biology: Clancy, 1946. Calif. Univ. Pubs., Ent. 7: 448-454. — Muma, 1959. Fla. Ent. 42: 151.

clito (Walker). Ont., N. Y., Pa.; Europe. Adventive, first found in Ont. in 1951. Host: *Cassida rubiginosa* Mull.

Cirrospilus clito Walker, 1840 (1839). Ann. Nat. Hist. 4: 30. ♂.

Taxonomy: Graham, 1961. Ent. Monthly Mag. 97: 39. — Peck, 1963. Canad. Ent., Sup. 30: 128.

Biology: Domenichini, 1966. Palearctic Tetrastichinae, Le Francois, p. 25 (Holarctic hosts and Distribution).

coerulescens Ashmead. N. B., s. to Fla., w. to Alaska, Oreg. and Calif. **Ecology:** Secondary or tertiary parasite of numerous Coleoptera, Lepidoptera, Neuroptera. Host: *Apanteles* sp., *A. congregatus* (Say), *A. melanoscelus* (Ratz.), *Bracon* sp., *B. gelechiae* Ashmead, *B. hebetor* Say, *Catolaccus aeneoviridis* (Girault), *Dibrachys cavus* (Walk.), *Hyposoter pilosulus* (Prov.), *Meteorus acronyctae* Mues., *Microgaster* sp., *Pteromalus* sp.

Tetrastichus coerulescens Ashmead, 1898. Ent. Soc. Wash., Proc. 4: 130. ♀, ♂.

Tetrastichus doteni Crawford, 1911. Ent. Soc. Wash., Proc. 13: 234. ♀, ♂.

Biology: Wester, 1956. Ent. Soc. Wash., Proc. 58: 284. — Schaffner, 1959. U. S. Dept. Agr., Misc. Pub. 767: 38, 82.

compsivorus Crawford. Miss., Okla., Tex. Host: *Compsus auricephalus* (Say).

Tetrastichus compsivorus Crawford, 1915 (1914). Insecutor Inscitiae Menstruus 2: 180. ♀, ♂.

cornutus Burks. Ill. Host: *Aulacidea podagrae* (Bass.) gall, *Hemadas nubilipennis* (Ashm.) gall. The record from *Hemadas* is questionable.

Tetrastichus cornutus Burks, 1943. U. S. Natl. Mus., Proc. 93: 579. ♀, ♂.

crino (Walker). Pa., Md., S. C., Ark., Okla., Tex.; Europe. Host: *Oecanthus* sp., *O. nigricornis quadripunctatus* Beut. eggs.

Cirrospilus crino Walker, 1838. Ann. Nat. Hist. 1: 382. ♂.

Tetrastichus dispar Silvestri, 1920. Lab. Zool. Gen. e Agr. Portici, Bol. 14: 249. ♀, ♂.

Preocc. by Masi, 1916.

Tetrastichus oecanthivorus Gahan, 1932. Ent. Soc. Amer., Ann. 25: 743. N. name for *dispar* Silvestri.

Tetrastichus oecanthivorus var. *compar* Gahan, 1932. Ent. Soc. Amer., Ann. 25: 743. ♀, ♂.

Tetrastichus dubius Bakkendorf, 1955. Ent. Meddel. 27: 152. ♂.

Taxonomy: Domenichini, 1965. Bol. Zool. agr. e di Bach. (2) 6: 136. — Domenichini, 1966.

Palearctic Tetrastichinae, Le Francois, p. 27.

Biology: Udine and Pinckney, 1940. Pa. Acad. Sci., Proc. 14: 81-83.

diarthronomyiae Gahan. Md. Host: *Diarthronomyia chrysanthemi* Ahlb.

Tetrastichus diarthronomyiae Gahan, 1923. Ent. Soc. Wash., Proc. 25: 65. ♀.

Biology: Hamilton, 1924. Md. Agr. Expt. Sta., Bul. 269: 32.

dolosus Gahan. Md., Va., Ohio, Iowa, Ark., La., Kans., Tex., Mont., Idaho, Ariz., Calif. Ecology:

This may be either a primary or secondary parasite. Host: *Ancylis comptana fragariae* (W. and R.), *Coleophora laricella* (Hbn.), *Evora hemidesma* (Zell.), *Fascista cercerisella* (Chamb.), *Homadaula anisocentra* Meyrick, *Parornix* sp.; *Euplectrus comstockii* How., *E. platypenae* How.

Tetrastichus dolosus Gahan, 1917. U. S. Natl. Mus., Proc. 53: 215. ♀, ♂.

dyrus Burks. Mont., Wyo., Colo. Host: *Aphalara curta* Caldw., *Trioza* spp.

Tetrastichus dyrus Burks, 1943. U. S. Natl. Mus., Proc. 93: 541. ♀, ♂.

Taxonomy: Graham, 1961. Ent. Monthly Mag. 97: 42.

ecus (Walker). Maine, Mass., Del., Ohio, Wis., Mont.; Europe. Host: *Coleophora laricella* (Hbn.), *Coptodisca splendoriferella* (Clem.); *Fenusia ulmi* Sund., *Heterarthrus nemoratus* (Fallen), *Phanomeris phyllotoma* Mues.; *Rhynchaenus pallicornis* (Say). Numerous other hosts in European literature.

Cirrospilus ecus Walker, 1838. Ann. Nat. Hist. 2: 204. ♂, ♀.

Eulophus cyclogaster Ratzeburg, 1844. Ichn. d. Forstins., v. 1, p. 167. ♀.

Eulophus xanthops Ratzeburg, 1844. Ichn. d. Forstins., v. 1, p. 170. ♀.

Taxonomy: Graham, 1961. Ent. Monthly Mag. 97: 48. — Domenichini, 1965. Bol. Zool. agr. e di Bach. (2) 6: 130-131. — Domenichini, 1966. Palearctic Tetrastichinae, Le Francois, p. 28.

Biology: Berry, 1938. Jour. Agr. Res. 57: 859-863. — Dowden, 1941. U. S. Dept. Agr., Tech. Bul. 757: 8, 10, 32-35. — Sundby 1957. Norsk. Ent. Tidsskr., sup. 2, pp. 44-47. — Delucchi, 1958. Entomophaga 3: 245, 263-265. — Schaffner, 1959. U. S. Dept. Agr., Misc. Pub. 767: 83. — Capek, 1963. Banska Stiav. Vysk. Ust. Lesn. Hosp. Ved. Prace 4: 270. — Celli, 1965. Univ. Bologna, Ist. di Ent., Bol. 27: 56. — Cheng and LeRoux, 1966. Ent. Soc. Quebec, Ann. 11: 88.

erynniae Domenichini. Calif.; Europe. Ecology: A secondary parasite. Probably inadvertently introduced along with its tachinid host. Host: *Erynniopsis rondonii* Townsend, parasitic on *Pyrrhalta luteola* (Muller).

Tetrastichus erynniae Domenichini, 1965. Bol. Zool. agr. e di Bach. (2) 6: 123. ♀, ♂.

euplectri Gahan. La., Tex. Host: *Euplectrus platypenae* How., *Meteorus* sp.

Tetrastichus euplectri Gahan, 1914. U. S. Natl. Mus., Proc. 48: 167. ♀, ♂.

evonymellae (Bouche). Wash., Calif. Introduced from Europe. Host: *Leucoptera spartifoliella* Hbn.

Eulophus evonymellae Bouche, 1834. Naturgesch. d. Ins., p. 172. ♀, ♂.

faustus Burks. Wis., Minn., Mont., Idaho, Wash., Calif. Host: *Rhaogoletis fausta* (O. S.).

Tetrastichus faustus Burks, 1943. U. S. Natl. Mus., Proc. 93: 582. ♀.

Biology: Balduf, 1959. Ill. Biol. Monog. 26, p. 146.

flavipes Ashmead. Fla. Ecology: Reared from gall of *Disholcaspis quercusvirens* (Ashmead).

Type lost.

Tetrastichus flavipes Ashmead, 1886. Amer. Ent. Soc., Trans. 13: 135. ♀.

flavopictus (Ashmead). Fla. Type lost.

Ceranisus flavopictus Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 202. ♂.

Taxonomy: Burks, 1943. U. S. Natl. Mus., Proc. 93: 604 (Transferred to *Tetrastichus*).

flora (Girault). Md., D. C., Ga., Fla., Tenn. Host: *Monarthropalus buxi* (Lab.).

Aprostocetus flora Girault, 1917. New Chalcid Flies, p. 3. Prob. described from female.

Epitetrastichus tricolor Girault, 1917. Descr. Stellarum Nov., p. 9. ♀.

fumipennis (Girault). N. Y., Md., D. C., Va., Ohio, Ind., Ill., Iowa. Host: *Asteromyia carbonifera* (O. S.) gall on *Solidago*.

Neomphalocephala fumipennis Girault, 1917. Chalcidoidea Nova Marilandensis. [I], p. 2. ♀.

gala Walker. Fla.

Tetrastichus Gala Walker, 1847. Ann. and Mag. Nat. Hist. (1) 20: 28. ♀.

Taxonomy: Burks, 1975. Brit. Mus. (Nat. Hist.) Ent., Bul. 32 (4): 143.

galactopus (Ratzeburg). East Coast states, w. to Kans.; cosmopolitan. Host: *Apanteles glomeratus* (L.), par. of *Pieris*. Other hosts are given in European literature. This species has been named *microgastri* or *rapo* by numerous American and European authors.

Eulophus galactopus Ratzeburg, 1844. Ichn. d. Forstins., v. 1, p. 169. ♀.

Eulophus vinulae Ratzeburg, 1844. Ichn. d. Forstins., v. 1, p. 169. ♀.

Tetrastichus lissonotus Moeller, 1886. Ent. Tidskr. 7: 83. ♀, ♂.

Taxonomy: Graham, 1961. Ent. Monthly Mag. 97: 37-38, 47. — Domenichini, 1965. Bol. Zool. agr. e di Bach. (2) 6: 120-121.

Biology: Masi, 1908. Lab. Zool. Gen. e Agr. Portici, Bol. 3: 133. — Richards, 1940. Jour. Anim. Ecol. 9: 270-286. — Delucchi, 1950. Redia 35: 441-450. — Clausen, 1940. garryana Burks. B. C., Oreg., Wash. Host: *Besbicus mirabilis* (Kinsey), several cynipid galls on *Quercus garryana*.

Tetrastichus garryana Burks, 1963. Biol. Soc. Wash., Proc. 76: 49. ♀, ♂.

Biology: Evans, 1963. Canad. Ent. 95: 1002-1005. — Evans, 1967. Canad. Ent. 99: 187-196.

gelastus Burks. Fla. Host: *Triozza* on Chinese elm.

Tetrastichus gelastus Burks, 1963. U. S. Natl. Mus., Proc. 93: 539. ♀.

gentilei Del Guercio. Fla.; West Indies, Europe, Fiji; cosmopolitan. Host: *Gynaikothrips ficorum* (Marchal), *G. uzeli* (Zimmermann), *Hoplothrips pedicularius* (Haliday), *Liothrips laureli* (Mason), *L. oleae* (Costa), *L. urichi* Karny. The male is unknown and probably does not exist.

Tetrastichus Gentilei Del Guercio, 1911. Accad. Georgofili Firenze, Atti 8: 222-227.

Tetrastichus thripophonus Waterston, 1923. Bul. Ent. Res. 13: 453. ♀.

Tetrastichus tatei Dozier, 1937. Univ. Puerto Rico, Jour. Agr. 21: 129. ♀.

Taxonomy: Domenichini, 1965. Bol. Zool. agr. e di Bach. (2) 6: 178-179.

Biology: Del Guercio, 1911. Accad. Georgofili Firenze, Atti 8: 222-227. — Mason, 1922. Ent. News 33: 199. — Del Guercio, 1931. Redia 19: 75-195. — Melis, 1935. Redia 21: 120-129. — Bournier, 1967. Soc. Ent. de France, Ann. (n. s.) 3: 173-179.

gerstaeckeriae Gahan. Tex. Host: *Gerstaeckeria nobilis* Lec., *G. porosa* Lec.

Tetrastichus gerstaeckeriae Gahan, 1936. U. S. Natl. Mus., Proc. 83: 485. ♀, ♂.

gibboni (Girault). Okla., Ariz. Host: *Languria mozardi* Latr.

Ootetrastichus gibboni Girault, 1917. Brooklyn Ent. Soc., Bul. 12: 86. ♀.

gigas Burks. Wash., Oreg., Calif. Host: *Andricus quercusalifornicus* (Bassett) gall.

Tetrastichus gigas Burks, 1943. U. S. Natl. Mus., Proc. 93: 560. ♀, ♂.

granulatus Walker. Ont.

Tetrastichus granulatus Walker, 1844. Ann. and Mag. Nat. Hist. (1) 14: 17. ♀.

- Taxonomy: Burks, 1975. Brit. Mus. (Nat. Hist.) Ent., Bul. 32 (4): 143 (lectotype designated).
- hagenowii* (Ratzeburg). S. C., Ga., Fla., Ala., Miss., La., Tex.; worldwide. Ecology: Commonly found in roach-infested, heated buildings throughout North America, but able to exist in a state of nature only in the far south. Host: *Blatta orientalis* (L.), *Periplaneta americana* (L.), *P. australasiae* (F.), *P. brunnea* Burm., *P. fuliginosa* (Serv.), *Eurycotis floridana* (Walk.).
- Entedon hagenowii* Ratzeburg, 1852. Ichn. d. Forstins., v. 3, p. 211.
- Tetrastichus floridanus* Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 203. ♀, ♂.
- Tetrastichoides(?) browni* Ashmead, 1905. U. S. Natl. Mus., Proc. 29: 113. ♀.
- Tetrastichodes asthenognathus* Waterston, 1915. Bul. Ent. Res. 5: 340. ♀.
- Taxonomy: Gahan, 1914. U. S. Natl. Mus., Proc. 48: 168. —Burks, 1943. U. S. Natl. Mus., Proc. 93: 554. —Roth and Willis, 1960. Smithson. Inst., Misc. Collect. 141: 249. —Domenichini, 1965. Bol. Zool. agr. e di Bach. (2) 6: 185.
- Biology: Usman, 1949. Current Sci. (India) 18: 407. —Roth and Willis, 1954. Amer. Ent. Soc., Trans. 80: 53-72. —Edmunds, 1955. Ent. Soc. Amer., Ann. 48: 210-213. —Cameron, 1955. Bul. Ent. - phidippi** Burks. Ariz. Host: *Phidippus opifex* (McCook) eggs.
Tetrastichus phidippi Burks, 1963. Biol. Soc. Wash., Proc. 76: 60. ♀, ♂.
- politi** Burks. Va., Tex. Host: *Xanthoteras politum* (Bass.) gall.
Tetrastichus politi Burks, 1963. Biol. Soc. Wash., Proc. 76: 48. ♀, ♂.
- polynemae** Ashmead. N. Y., Del., Ill. Ecology: Parasitizes both damselfly eggs and chalcids developing in them. Host: *Lestes* sp.; *Polynema needhami* (Ashm.).
Tetrastichus polynemae Ashmead, 1900. Ent. News 11: 616. ♀.
Ototetrastichus mymaridis Girault, 1916. U. S. Natl. Mus., Proc. 51: 130. ♀.
- Taxonomy: Girault, 1916. U. S. Natl. Mus., Proc. 51: 130.
- pompilicola** Graham. Labrador. Host: *Anoplus nigerrimus* (Scop.).
Tetrastichus pompilicola Graham, 1960. In Lindroth and Graham, Opusc. Ent. 25: 94. ♀.
- productus** Riley. P.E.I., Que., N. J., Ohio, Minn., Mo., Kans. Host: *Janus abbreviatus* (Say).
Long incorrectly thought to be a parasite of the Hessian fly.
Tetrastichus productus Riley, 1885. U. S. Natl. Mus., Proc. 8: 419. ♂, ♀.
- Taxonomy: Gahan, 1934 (1933). U. S. Dept. Agr., Misc. Pub. 174: 143.
- psyllaephagus** Burks. Ariz. Host: *Trioza collaris* Crawford nymph.
Tetrastichus psyllaephagus Burks, 1963. Biol. Soc. Wash., Proc. 76: 54. ♀, ♂.
- Biology: Cazier, 1964. Pan-Pacific Ent. 40: 71.
- pulchritiventris** (Girault). Md., La., Okla.
Neomphaloidea pulchritiventris Girault, 1916. Canad. Ent. 48: 101. ♀.
- punctatifrons** (Girault). Ariz. Host: *Paraleucoptera albella* (Chamb.). This host record may not be correct.
Epitetrastichus punctatifrons Girault, 1916. U. S. Natl. Mus., Proc. 51: 128. ♀.

racemariae Ashmead. Ont., Conn., N. J., Md., Va., Fla., W. Va., Ill., Minn., Nebr., Kans., Okla., Tex., N. Mex., Calif. Host: *Amphibolips quercuscinerea* (Ashm.), *A. quercusprunus* (W. and R.), *A. quercusracemaria* (Ashm.), *Andricus quercusflocci* (Walsh), *A. lasius* (Ashm.), *Callirhytes quercuspomiformis* (Bass.), *Disholcaspis cinerosa* (Bass.), *D. quercusmamma* (Walsh), *Heteroecus pacificus* (Ashm.), *Neuroterus noxius* (Bass.), *N. quercusbatatus* (Fitch) galls.

Tetrastichus racemariae Ashmead, 1886. Amer. Ent. Soc., Trans. 13: 134. ♀, ♂.

Tetrastichus californicus Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 203. ♀.

Hypertelea floccii Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 203. ♀, ♂.

Tetrastichus phegus Burks, 1943. U. S. Natl. Mus., Proc. 93: 559. ♀, ♂.

Taxonomy: Judd, 1963. Canad. Field-Nat. 77: 64.

repulsus Girault. Iowa.

Tetrastichus repulsus Girault, 1917. New Chalcid Flies, pp. 2, 4.

rhosaces (Walker). Va.; Europe. Ecology: Primary parasite of cassidine beetle larvae on thistles. Adventive; first found in Va. in 1972. Host: *Cassida rubiginosa* Mueller.

Cirrospilus rhosaces Walker, 1839. Monog. Chalcid. v. 1, p. 293. "♂" = ♀.

Cirrospilus racilla Walker, 1839. Monog. Chalcid. v. 1, p. 312. ♀.

Taxonomy: Graham, 1961. Ent. Monthly Mag. 97: 37.

Biology: Domenichini, 1966. Palearctic Tetrastichinae, Le Francois, p. 47.

rosae Ashmead. Conn., N. J., D. C., Va., Fla., Mich., Colo., Idaho, B. C., Calif. Host: *Diplolepis ignota* (O. S.); *D. ostensackeni* (Beut.).

Tetrastichus rosae Ashmead, 1886. Amer. Ent. Soc., Trans. 13: 134. ♀ (♂ misdet.).

rugglesi Rohwer. N. Y., Conn., W. Va., Minn. Host: *Agrilus arcuatus* (Say), *A. champlaini* Frost, *A. rubicola* Abeille.

Tetrastichus rugglesi Rohwer, 1919. Canad. Ent. 51: 160. ♀.

saunderssi (Packard). Ont., Conn., N. J. Host: *Strymon edwardsii* (Saund.), *S. falacer* (Godt.). *Eulophus Saundersii* Packard, 1881. Boston Soc. Nat. Hist., Proc. 21: 34. ♂.

scolyti Ashmead. N. J., W. Va. Host: *Scolytus rugulosus* (Ratz.).

Tetrastichus scolyti Ashmead, 1894. Amer. Ent. Soc., Trans. 21: 343. ♀.

scriptus Burks. N. J., S. C., Ohio. Host: *Euplectrus* sp. Host record questionable.

Tetrastichus scriptus Burks, 1943. U. S. Natl. Mus., Proc. 93: 550. ♀.

semiauraticeps (Girault). Maine, Colo., Ariz., Calif. Ecology: Emerged from needle gall on *Pinus ponderosa*, bud gall on *Pinus scopulorum*.

Epitetrastichus semiauraticeps Girault, 1916. U. S. Natl. Mus., Proc. 51: 127. ♀.

semideas (Packard). N. H., Conn. Host: *Oeneis melissa* (Say).

Eulophus semideae Packard, 1874. In Hitchcock and Huntington, Geol. of N. H., pt. 1, p. 347. ♀, ♂.

semilongifasciatus (Girault). Md., D. C.

Neomphaloidea semilongifasciata Girault, 1916. Soc. Ent. 31: 35. ♀.

silvaticus Gahan. N. B., Maine, Vt., Conn., N. Y., Ont., Mich., Wis., Ill., Minn., N. Dak., Wash., Oreg., Calif. Host: *Malacosoma disstria* Hbn. eggs.

Tetrastichus silvaticus Gahan, 1937. Ent. Soc. Wash., Proc. 39: 266. ♀, ♂.

Biology: Hobson, 1939. Ent. Soc. Amer., Ann. 32: 131-136. —Struble and Bedard, 1958. Pan-Pacific Ent. 34: 184.

sobrius Gahan. Fla., Ariz., Calif. Host: *Asphondylia* sp., *A. websteri* Felt.

Tetrastichus sobrius Gahan, 1919. Ent. Soc. Amer., Ann. 12: 166. ♀, ♂.

sokolowskii Kurdjumov. N. Y., Ont., Mo.; Europe, India, Japan, South Africa. Adventive in No. Amer.; first found in Ont. in 1952. Host: *Plutella xylostella* (L.).

Tetrastichus sokolowskii Kurdjumov, 1912. Russ. Ent. Obozr. 12: 238. ♀, ♂.

Tetrastichus sokolovskii Kurdjumov, 1913. Russ. Ent. Obozr. 13: 254. Emend.

Biology: Cheerian and Basheer, 1939. Indian Acad. Sci., Proc. 9: 87-98. —Ullyett, 1947. Dept. Agr. So. Afr., Ent. Mem. 2: 101-106. —Harcourt, 1953. Canad. Ent. 85: 251. —Harcourt, 1960. Canad. Ent. 92: 422. —Pschorner-Walcher, 1964. Commonwealth Inst. Biol. Control, Tech. Bul. 4: 33.

solidaginis Burks. Que., N. H., Ohio, Mich., Utah. Host: *Eurosta solidaginis* (Fitch) gall.

Tetrastichus solidaginis Burks, 1943. U. S. Natl. Mus., Proc. 93: 534. ♀, ♂.

spilopterus Burks. N. Mex., Oreg., Calif. Host: *Andricus kingi* Bass., *Dryocosmus bicornis* (McC. and E.), *Neuroterus saltatorius* (Edw.), galls.

Tetrastichus spilopterus Burks, 1943. U. S. Natl. Mus., Proc. 93: 564. ♀, ♂.

stanfordiensis Fullaway. Calif. Ecology: Reared from cynipid galls. Type lost.

Tetrastichus stanfordiensis Fullaway, 1912. N. Y. Ent. Soc., Jour. 20: 281. ♀.

strobilus Burks. Minn., Mont., N. Mex., Idaho, Utah, Wash., Oreg., Calif. Ecology: Reared from pine, spruce, and Douglas fir cones. Host: *Barbara colfaxiana* (Krft.). Perhaps on other insects in cones.

Tetrastichus strobilus Burks, 1943. U. S. Natl. Mus., Proc. 93: 552. ♀, ♂.

Biology: Keen, 1958. U. S. Dept. Agr., Tech. Bul. 1169: 95-96. —Hedlin, 1960. Canad. Ent. 92: 832.

tesserus Burks. N. Y., Md., Va., Mich., Ill., Iowa. Host: *Asteromyia* sp. gall on *Solidago*.

Tetrastichus tesserus Burks, 1943. U. S. Natl. Mus., Proc. 93: 552. ♀, ♂.

thanasi Ashmead. Pa., W. Va., Mich., Mont., Calif. Host: *Cymatodera* sp., *Thanasimus* sp., *T. dubius* (F.), *T. trifasciatus* (Say).

Tetrastichus thanasi Ashmead, 1894. Amer. Ent. Soc., Trans. 21: 343. ♀.

theclae (Packard). New England, Host: *Strymon falacer* (Godt.).

Eulophus theclae Packard, 1881. Boston Soc. Nat. Hist., Proc. 21: 34. "♂" = ♀.

tibialis (Ashmead). Mass., Del., Ont., N. Y., W. Va., Iowa. Ecology: A secondary parasite. Host:

Apanteles sp., *Olesicampe* sp., *Homalotylus* sp.

Tetrastichodes tibialis Ashmead, 1894. Amer. Ent. Soc., Trans. 21: 344. ♀.

Biology: Dimmock, 1898. Ent. Soc. Wash., Proc. 4: 150.

tineivorus Ferriere. N. H., Mass., Conn., Md., Ohio, Mo., Calif.; Europe, South Africa; prob.

Cosmopolitan. Ecology: A secondary parasite of tineid moths living in fibers or detritus.

Host: *Apanteles carpatus* (Say).

Tetrastichus tineivorus Ferriere, 1941. Schweiz. Ent. Gesell., Mitt. 18: 376. ♀, ♂.

Tetrastichus carpatus Burks, 1943. U. S. Natl. Mus., Proc. 93: 566. ♀, ♂.

Taxonomy: Gahan, 1951. Canad. Ent. 83: 171.

Biology: Back, 1945. Ent. Soc. Wash., Proc. 47: 183.

triozae Burks. Nebr., Kans., Mont., Colo., N. Mex., Idaho, Ariz., Wash., Calif. Ecology:

Ubiquitous parasite of psyllid nymphs in arid or semi-arid regions; the *Tetrastichus*

larva develops as an external parasite, feeding beneath the body of its host. Host:

Arytaina minuta Cwfd., *Calophya californica* Schw., *C. nigrella* Jens., *C. triozomima* Schw., *Euphalerus vermiculosus* Cwfd., *Paratratioz cockerelli* (Sulc.), *Pexopsylla cercocarpi* Jens., *Trioza albifrons* Cwfd., *T. beameri* Tuth.

Tetrastichus triozae Burks, 1943. U. S. Natl. Mus., Proc. 93: 542. ♀, ♂.

Biology: Pletsch, 1947. Mont. Agr. Expt. Sta., Bul. 446: 74-78. —Jensen, 1957. *Hilgardia* 27: 79-80, 86-96.

trisulcatus Provancher. N. B., s. to Fla., w. to Man., Ky., Ill. and Minn. Host: *Argyra* sp., *A. pectoralis* (Leach), *A. scapularis* (Klug).

Tetrastichus trisulcatus Provancher, 1887. Addit. Corr. Faune Ent. Canada Hym., p. 211. "♂" = ♀.

Hyperteles hylotomae Ashmead, 1888. Canad. Ent. 20: 105. ♀.

Taxonomy: Burks, 1964 (1963). Canad. Ent. 95: 1262.

Biology: Schwarz, 1909. Ent. Soc. Wash., Proc. 11: 107. —Raizenne, 1957. Canada Dept. Agr., Pub. 1009: 8-9.

Morphology: Finlayson, 1963. Canad. Ent. 95: 479, 483, 498 (immature stages).

turionum (Hartig). Mass., Conn., N. J., Ont., N. Y. Introduced from Europe; first recovered in Mass. in 1934. Host: *Rhyacionia buoliana* (Schiff.).

Eulophus turionum Hartig, 1838. Jahresber. ueber die Fortsch. der Forstw. u. Forstl. Naturk. 1: 268. ♀, ♂.

Biology: Dowden, 1934. Ent. Soc. Amer., Ann. 27: 600. — Bergold and Ripper, 1937. Ztschr. f. Parasitenk. 9: 399, 414-415. — Clausen, 1956. U. S. Dept. Agr., Tech. Bul. 1139: 130-131. — Juillet, 1959. Canad. Ent. 91: 716-718. — Schaffner, 1959. U. S. Dept. Agr., Misc. Pub. 767: 83. — Adlung, 1962. Ztschr. f. Angew. Ent. 50: 456. — Adlung and Sailer, 1963. Allg. Forst. u. Jagdztg. 134: 230. — Eichhorn *et al.*, 1965. Anz. f. Schadlingsk. 38: 107.

ulysses (Girault). Md.

Aprostocetus ulysses Girault, 1916. Brooklyn Ent. Soc., Bul. 11: 112. ♀.

varicornis (Girault). Maine, Mass., Md., N. C. Host: *Epinotia nanana* (Treit.), *Rhyacionia frustrana* (Comst.).

Epitetrastichus varicornis Girault, 1917. Descr. Hym. Chalcidoid. Variorum cum Observ. III, p. 4. ♀.

Biology: Schaffner, 1959. U. S. Dept. Agr., Misc. Pub. 767: 83.

venustus Gahan. Que., Maine, Ind., Minn., Iowa, Nebr., Idaho, Ariz., Calif. Ecology: Commonly reared from small leguminous seeds; exact host not established. A closely related, or identical, form was reared in a greenhouse as phytophagous in stems of sweet clover, but the cultures could not be maintained.

Tetrastichus venustus Gahan, 1914. U. S. Natl. Mus., Proc. 48: 168. ♀.

Biology: Urbahns, 1920. U. S. Dept. Agr., Bul. 812: 18. — Teitelbaum and Black, 1954.

Phytopathology 44: 548 (phytophagous in sweet clover). — Butler and Hansen, 1958. Pan-Pacific Ent. 34: 224-226.

verrucarum Balduf. N. Y., D. C., Va., Ga., Ohio, Ill., Wis., Utah, Calif. Host: *Neuroterus floccosus* (Bass.), *N. niger* Gill., *N. quercusverrucarum* (O. S.).

Tetrastichus verrucarum Balduf, 1929. Canad. Ent. 61: 221. ♀, ♂.

Biology: Balduf, 1929. Canad. Ent. 61: 125-130.

whitmani (Girault). Maine, Md., Ill., Wis., Minn., S. Dak. Host: *Dasineura balsamicola* (Lintn.), *Physonota unipunctata* (Say).

Aprostocetus whitmani Girault, 1916. Ent. Soc. Amer., Ann. 9: 296. ♀, ♂.

Aprostocetus marilandicus Girault, 1917. Ent. News 28: 21. ♀.

Biology: Giese and Benjamin, 1959. Forest Sci. 5: 205.

Genus APROSTOCETUS Westwood

Aprostocetus Westwood, 1833. London, Edinb. and Dublin Phil. Mag. and Jour. Sci. (3) 2: 444.

Type-species: *Aprostocetus caudatus* Westwood. Monotypic.

Lonchenton Ratzeburg, 1852. Ichn. d. Forstins., v. 3, p. 215.

Type-species: *Enophus longicaudatus* Foerster. Monotypic.

Tetrastichomorpha Girault, 1913. Queensland Mus. Mem. 2: 227.

Type-species: *Tetrastichomorpha flava* Girault. Orig. desig.

Neomphaloidomyia Girault, 1917. Brooklyn Ent. Soc., Bul. 12: 118.

Type-species: *Hyperteles polynemae* Ashmead. Orig. desig.

Gyrolachnus Erdos, 1954. Mus. Nat. Hungarici, Ann. Hist. Nat., n. s., 5: 365.

Type-species: *Gyrolachnus longulus* Erdos. Orig. desig.

Revision: Burks, 1967. Ent. Soc. Amer., Ann. 60: 756-760.

ajax (Girault). D. C., Mich., N. Dak.

Tetrastichomorpha ajax Girault, 1916. U. S. Natl. Mus., Proc. 51: 132. ♀.

americanus Ashmead. Va. and W. Va., w. to Ind., Mo., Tex., and Calif.; s. to Costa Rica. Host:

Ceratina sp., *C. dupla* Say, *C. ignara* Cress., *C. nanula* Ckll., *C. sequoiae* Mich., *Axima zabriskiei* How., parasite on *Ceratina*.

Aprostocetus americanus Ashmead, 1888. Canad. Ent. 20: 106. ♀.

animus Girault. N. Mex. Type fragmentary.

Aprostocetus animus Girault, 1917. Descr. Hym. Chalcidoid. Variorum cum Observ. III, p. 6. ♀.

bewicki Girault. Wash.

Aprostocetus bewicki Girault, 1917. New Chalcid Flies, p. 2. ♀, ♂.

cincinnatus (Girault). Md.

Neomphaloïdes cincinnatus Girault, 1917. *Psyche* 24: 92. ♀.

coelioxysidis Burks. N. C., Ohio, Ark., Kans. Ecology: Rared from nests of leaf-cutter bees.

Host: *Coelioxys* sp., prob. *octodentata* Say, a parasite of *Megachile brevis* Say.

Aprostocetus coelioxysidis Burks, 1967. *Ent. Soc. Amer., Ann.* 60: 758. ♀, ♂.

daira (Walker). Que., Ont., Ohio, Nebr.; Europe. Host: *Orellia ruficauda* (F.). Possibly other tephritids serve as hosts.

Cirrospilus dairo Walker, 1839. *Monog. Chalcid.*, v. 1, p. 330. ♀.

Aprostocetus canadensis Ashmead, 1888. *Canad. Ent.* 20: 106. ♀.

Taxonomy: Graham, 1961. *Ent. Monthly Mag.* 97: 47.

Biology: Detmers, 1927. *Ohio Agr. Expt. Sta., Bul.* 414: 26-29.

diplosidis Crawford. N. C., s. to Fla., w. to Kans. and Tex.; worldwide in warm-temperate and tropical zones. Host: *Contarinia sorghicola* (Coq.).

Aprostocetus diplosidis Crawford, 1907. *N. Y. Ent. Soc., Jour.* 15: 180. ♀, ♂.

Biology: Dean, 1911. *U. S. Dept. Agr., Bur. Ent. Bul.* 85 (4): 55-57. — Walter, 1941. *U. S. Dept. Agr., Tech. Bul.* 778: 18. — Piore and Viggiani, 1965. *Lab. Ent. Agr. Portici, Bol.* 23: 1-36.

epidius (Walker). Ont., N. Y., Fla., Ill. Ecology: Emerged from undet. gall-maker on elderberry.

Tetrastichus epidius Walker, 1847. *Ann. and Mag. Nat. Hist.* 20: 28. ♀.

Aprostocetus granulatus Ashmead, 1888. *Canad. Ent.* 20: 105. ♀.

Tetrastichus microcosmus Girault, 1917. *Deser. Stellarum Nov.*, p. 22. N. name for *granulatus* Ashmead, unnecessarily proposed.

Taxonomy: Burks, 1975. *Brit. Mus. (Nat. Hist.) Ent., Bul.* 32 (4): 142 (synonymy; lectotype designated).

fidius Girault. Fla., Miss., Ill., N. Mex.; West Indies. Host: *Taxodiomyia cupressiananassa* (O. S.). Other gall-making midges may serve as hosts.

Aprostocetus fidius Girault, 1917. *New Eulophidae*, p. 1. ♀.

Biology: Myers, 1930. *Bul. Ent. Res.* 21: 309-313. — Breland, 1939. *Ent. Soc. Amer., Ann.* 32: 726.

florida (Girault). Fla. Type fragmentary.

Neomphaloïdella florida Girault, 1917. *New Chalcid Flies*, p. 4. ♀, ♂.

irvingi (Girault). N. Mex.

Neomphaloïdella irvingi Girault, 1917. *Brooklyn Ent. Soc., Bul.* 12: 118. ♀.

kansasia Girault. Kans. Type fragmentary.

Aprostocetus kansasia Girault, 1917. *Brooklyn Ent. Soc., Bul.* 12: 88. ♀.

oncideridis (Gahan). W. Va. Host: *Oncideres cingulata* (Say).

Tetrastichus oncideridis Gahan, 1932. *Ent. Soc. Amer., Ann.* 25: 745. ♀, ♂.

oviductus (Girault). Md.

Epitetrastichus oviductus Girault, 1917 (1916). *Insecutor Inscitiae Menstruus* 4: 111. ♀.

polynemae (Ashmead). N. H., N. Y., Ill., Minn. Ecology: Parasitize eggs of *Odonata*. Host:

Anax junius (Drury) *Lestes* spp.

Hyperteles polynemae Ashmead, 1900. *Ent. News* 11: 615. ♀, ♂.

Genus HYPERTETRASTICHUS Moser

Hypertetraстichus Moser, 1965. *N. Y. State Mus. and Sci. Serv., Bul.* 402: 15.

Type-species: *Hypertetraстichus ithacus* Moser. Orig. desig.

ithacus Moser. N. Y., Ohio, W. Va. Host: *Moserina maculata* Deluchi in *Pachypsylla* galls.

Hypertetraстichus ithacus Moser, 1965. *N. Y. State Mus. and Sci. Serv., Bul.* 402: 15. ♀.

Biology: Moser, 1965. *N. Y. State Mus. and Sci. Serv., Bul.* 402: 16.

Genus CRATAEPUS Foerster

Crataepus Foerster, 1878. *Naturh. Ver. Rheinlande, Verh.* 35: 61.

Type-species: *Crataepus aquisgranensis* Foerster. Orig. desig.

marbis (Walker). Ont., Man.; Holarctic. Host: *Orellia ruficauda* (F.).
Cirrospilus marbis Walker, 1839. Monog. Chalcid., v. 1, p. 330. ♀.
Crataepus fletcherii Ashmead, 1892. Canad. Ent. 24: 309. ♀.

Taxonomy: Gradwell, 1953. Ent. Monthly Mag. 89: 73-75.

Biology: MacNay, 1961. Canad. Ins. Pest Rev. 39: 273.

Genus BURKSIA Fullaway

Burksia Fullaway, 1955. Hawaii. Ent. Soc., Proc. 15: 409.

Type-species: *Burksia viridimaculata* Fullaway. Orig. desig.

viridimaculata Fullaway. Fla., Calif.; Hawaii, West Indies, Colombia, Argentina, Europe.

Ecology: Assoc. with armyworm larvae in Bermuda grass.

Burksia viridimaculata Fullaway, 1955. Hawaii. Ent. Soc., Proc. 15: 410. ♀.

Taxonomy: Domenichini, 1965. Bol. Zool. agr. e di Bach. (2) 6: 140. ♀.

Genus FLOCKIELLA Timberlake

Flockiella Timberlake, 1957. Pan-Pacific Ent. 33: 109.

Type-species: *Flockiella eucalypti* Timberlake. Orig. desig.

eucalypti Timberlake. Calif. Ecology: Reared from seed capsules of *Eucalyptus umbellata*.

Probably introduced from Australia.

Flockiella eucalypti Timberlake, 1957. Pan-Pacific Ent. 33: 110. ♀.

Biology: Flock, 1957. Pan-Pacific Ent. 33: 153-155.

Genus SYNTOMOSPHYRUM Foerster

Syntomosphyrum Foerster, 1878. Naturh. Ver. Rheinlande, Verh. 35: 60.

Type-species: *Syntomosphyrum fulvipes* Foerster. Monotypic.

Tetrastichopsis Girault, 1916. U. S. Natl. Mus., Proc. 51: 132.

Type-species: *Tetrastichopsis prionomeri* Girault. Orig. desig.

Tetrastichomyia Girault, 1916. U. S. Natl. Mus., Proc. 51: 48.

Type-species: *Miotropis clisiocampae* Ashmead. Orig. desig.

Revision: Burks, 1952. Ent. Soc. Wash., Proc. 54: 258-264.

Taxonomy: Waterston, 1915. Bul. Ent. Res. 5: 364.

blattae Burks. W. Va., N. C., Ohio. Host: *Parcoblatta* sp. oothecae.

Syntomosphyrum blattae Burks, 1952. Ent. Soc. Wash., Proc. 54: 263. ♀, ♂.

Biology: Edmunds, 1952. Ent. News 63: 143. — Edmunds, 1953. Ent. News 64: 228-229.

— Roth and Willis, 1960. Smithson. Inst., Misc. Collect. 141: 248.

clisiocampae (Ashmead). Conn. and N. Y., s. to S. C., w. to Wis. and Tex. Host: *Achatodes zeae* (Harr.), *Diatraea cramboides* (Grote), *Grapholita molesta* (Busck), *Malacosoma americanum* (F.), *Ostrinia nubilalis* (Hbn.), *Sanninoidea exitiosa* (Say); *Microplitis gortynae* Riley.

Miotropis clisiocampae Ashmead, 1894. Amer. Ent. Soc., Trans. 21: 341. ♀.

Biology: Balduf, 1929. Ohio Jour. Sci. 29: 227-228. — Proper, 1934. Jour. Agr. Res. 48: 370.

— Baker et al., 1949. U. S. Dept. Agr., Tech. Bul. 983: 178.

esurus (Riley). Que. and N. B., s. to Ga., w. to Man., Kans., Tex. Host: *Acrobasis juglandis* (LeB.), *Alabama argillacea* (Hbn.), *Anomis erosa* (Hbn.), *Choristoneura fumiferana* (Clem.), *C. pinus* Freem., *Diatraea saccharalis* (F.), *Grapholita molesta* (Busck), *Gretchena bolliana* (Slingerland), *Hyphantria cunea* (Drury), *Malacosoma disstria* Hbn., *Nygma phaeorrhoea* (Donov.), *Orgyia leucostigma* (J. E. Smith), *Porthetria dispar* (L.), *Stenoma algidella* (Walk.).

Cirrospilus esurus Riley, 1879. Canad. Ent. 11: 162. ♀, ♂.

Syntomosphyrum orgyiae Ashmead, 1894. Amer. Ent. Soc., Trans. 21: 343. ♀.

Biology: Howard, 1897. U. S. Dept. Agr., Div. Ent., Tech. Ser. 5: 38-39. —Driggers, 1931. N. J. Agr. Expt. Sta., Ann. Rpt. 52: 192-193. —Clarke, 1933. Ga. State Bd. Ent., Bul. 77: 30-31. 36. —Allen, 1962. U. S. Dept. Agr., Tech. Bul. 1265: 91-92. —Dixon and Benjamin, 1963. Jour. Econ. Ent. 56: 267.

ischnopterae (Girault). Md., D. C., Fla., Minn. Ecology: Possibly a secondary parasite, attacking Evaniiidae in roach oothecae. Host: *Ischnoptera* sp., *Parcoblatta* sp. egg cases. *Eponphalooides ischnopterae* Girault, 1917. Ent. News 28: 257. ♀, ♂.

Biology: Roth and Willis, 1960. Smithson. Inst., Misc. Collect. 141: 249.

orgyiazele Burks, n. name. D. C. Host: *Orgyia leucostigma* (J. E. Smith).

Tetrastichomyia orgyiae Girault, 1916. Brooklyn Ent. Soc., Bul. 11: 111. ♀. Preocc. by *Syntomosphyrum orgyiae* Ashmead, 1894.

philodromi (Gahan). Ohio, Nebr. Host: *Philodromus aureolus* (Oliv.).

Tetrastichus philodromi Gahan, 1924. U. S. Natl. Mus., Proc. 65 (4): 18. ♀, ♂.

Biology: Auten, 1925. Ent. Soc. Amer., Ann. 18: 242.

prionomeri (Girault). Tenn., La. Host: *Odontopus calceatus* Say.

Tetrastichopsis prionomeri Girault, 1916. U. S. Natl. Mus., Proc. 51: 132. ♀.

silvensis (Girault). Md.

Tetrastichomyia silvensis Girault, 1919. Brooklyn Ent. Soc., Bul. 11: 111 ♀.

Genus MELITTOBIA Westwood

Melittobia Westwood, 1847. Ent. Soc. London, Trans. 5: Proc. pp. xviii, lxv.

Type-species: *Melittobia audouinii* Westwood. Monotypic.

Anthophorabia Newport, 1849. Gard. Chron., p. 183.

Type-species: *Anthophorabia retusa* Newport. Monotypic.

Philopison Cameron, 1908. Deut. Ent. Ztschr., p. 559.

Type-species: *Philopison clavicornis* Cameron. Monotypic.

Sphecopagrus Brethes, 1910. Buenos Aires Mus. Nac. de Hist. Nat., An. 20: 208.

Type-species: *Sphecopagrus sceliphronidis* Brethes. Monotypic.

Sphecophilus Brethes, 1910. Buenos Aires Mus. Nac. de Hist. Nat., An. 20: 310. N. name, unnecessarily proposed for *Sphecopagrus*.

Taxonomy: De Santis, 1949. La Plata Univ. Nac., Mus. Notas 14: 276. —Risbec, 1951. Inst. Franc. d'Afr. Noire, Mem. 13: 90. —Risbec, 1952. Inst. Sci. Madagascar, Mem., Ser. E, 2: 253. —Ferriere, 1960. Acta Hym. 1: 106. —Domenichini, 1965. Bol. Zool. agr. e di Bach. (2) 6: 63-64.

TRIBE ENTEDONTINI

Genus EUDEROMPHALE Girault

Euderomphale Girault, 1916. Canad. Ent. 48: 410.

Type-species: *Euderomphale fuscipennis* Girault, Orig. desig.

Aleurodiphagus Nowicki, 1929. Neue Beitr. z. System. Insektenk. 4: 154.

Type-species: *Pteroptrix flavimedia* Howard. Desig. by Peck, 1951.

This genus was placed in the subfamily Aphelininae in the 1951 Catalog (U. S. Dept. Agr., Agr. Monog. 2: 432), and in the First Supplement (1958. U. S. Dept. Agr., Agr. Monog., Sup. 1: 64) it was incorrectly placed as a synonym of *Cardiogaster* Motschulsky.

Revision: Dozier, 1932. Ent. Soc. Wash., Proc. 34: 120.

Taxonomy: Compere and Annecke, 1961. Ent. Soc. S. Afr., Jour. 24: 65-68 (*Cardiogaster* in Eulophidae). — Peck, 1963. Canad. Ent., Sup. 30: 238 (*Cardiogaster* in Entedontinae).

— Graham, 1963. Soc. Brit. Ent., Trans. 15: 273 (*Euderomphale* in Entedontinae).

flavimedia (Howard). Md., N. Mex., Calif. Host: *Aleyrodes* sp., *A. pruinosa* Bemis, *A. spiraeoides* Quaint.

Gyrolasia flavimedia Howard, 1881. U. S. Dept. Agr., Ann. Rpt. for 1880, p. 369. ♂.

Euderomphale fuscipennis Girault, 1916. Canad. Ent. 48: 410. ♀.

hyalina (Compere and Annecke). Calif. Host: *Aleyrodes* sp.

Cardiogaster hyalina Compere and Annecke, 1961. Ent. Soc. S. Afr., Jour. 24: 68. ♀.

Biology: Poinar, 1964. Jour. Econ. Ent. 57: 382.

quercicola Dozier. La. Host: *Tetraleurodes* sp.

Euderomphale quercicola Dozier, 1933. Ent. Soc. Wash., Proc. 35: 85. ♀, ♂.

Genus CERANISUS Walker

Ceranisus Walker, 1840. Entomologist 1 (vi): pl. N, fig. 2; explanation of plate.

Type-species: *Ceranisus pacuvius* Walker. Monotypic.

Thripoctenus Crawford, 1911. Ent. Soc. Wash., Proc. 13: 233.

Type-species: *Thripoctenus russelli* Crawford. Monotypic.

Cryptomphale Girault, 1917. Speciosissima Genera Nova Eulophidorum, p. 2.

Type-species: *Thripoctenus nubilipennis* Williams. Orig. desig.

Taxonomy: Burks, 1943. U. S. Natl. Mus., Proc. 93: 509. — Bakkendorf, 1957. Ent. Meddel. 28: 1. — Graham, 1959. Soc. Brit. Ent., Trans. 13: 203.

americensis (Girault). Utah, Alta. Ecology: Reared from thrips in alfalfa.

Thripoctenus americensis Girault, 1917. U. S. Natl. Mus. Proc. 53: 448. ♀.

nubilipennis (Williams). Mass. Host: *Cryptothrips rectangularis* Hood, *Megalothrips spinosus* Hood.

Thripoctenus nubilipennis Williams, 1916. Psyche 23: 54. ♀, ♂.

russelli (Crawford). Calif. Host: *Caliothrips fasciatus* (Perg.), *Frankliniella tritici* (Fitch), *Taeniothrips simplex* (Mor.), *Thrips tabaci* Lind.

Thripoctenus russelli Crawford, 1911. Ent. Soc. Wash., Proc. 13: 233. ♀.

Biology: Russell, 1912. U. S. Dept. Agr., Bur. Ent., Tech. Ser. 23: 25-52. — Bailey, 1933. Hilgardia 7: 501-502. — Bailey, 1937. Calif. Agr. Expt. Sta., Bul. 609: 26.

Genus EUOPHTHALMOMYIA Ashmead

Euophthalmomyia Ashmead, 1904. Carnegie Mus., Mem. 1: 339, 340.

Type-species: *Euophthalmomyia pallidipes* Ashmead. Orig. desig.

Euophthalmomyia Ashmead, 1904. Carnegie Mus., Mem. 1: 375. Misspelling.
pallidipes Ashmead. D. C.
Euophthalmomyia pallidipes Ashmead, 1904. Carnegie Mus., Mem. 1: 339, 375. ♀.

Genus OMPHALE Haliday

Omphale Haliday, 1833. Ent. Mag. 1: 339.

Type-species: *Omphale salicis* Haliday. Monotypic.

Smaragdites Westwood, 1833. Mag. Nat. Hist. 6: 419.

Type-species: *Smaragdites admirabilis* Westwood. Monotypic.

Secodes Foerster, 1856. Hym. Stud., v. 2, pp. 78, 81.

Type-species: *Secodes fagi* Foerster. Monotypic.

Taxonomy: Graham, 1963. Soc. Brit. Ent., Trans. 15: 240.

bicincta Ashmead. W. Va., Fla.

Omphale bicincta Ashmead, 1888. Canad. Ent. 20: 103. ♂.

Genus HUBBARDIELLA Ashmead

Hubbardiella Ashmead, 1904. Carnegie Mus., Mem. 1: 339, 340.

Type-species: *Hubbardiella arizonensis* Ashmead. Orig. desig.

Miromphalomyia Girault, 1916. Entomologist 49: 249.

Type-species: *Miromphalomyia perlampoides* Girault. Orig. desig.

arizonensis Ashmead. Ariz.

Hubbardiella arizonensis Ashmead, 1904. Carnegie Mus., Mem. 1: 339, 378. ♀.

Miromphalomyia perlampoides Girault, 1916. Entomologist 49: 250. ♀.

Taxonomy: Gahan and Fagan, 1923. U. S. Natl. Mus., Bul. 124: 90.

Genus CLOSTEROCECUS Westwood

Closterocerus Westwood, 1833. Mag. Nat. Hist. 6: 419.

Type-species: *Closterocerus trifasciatus* Westwood. Monotypic.

Revision: Crawford, 1912. U. S. Natl. Mus., Proc. 43: 175.

californicus Girault. Calif. Host: *Nepticula juglandifoliella* Clem.

Closterocerus utahensis var. *californicus* Girault, 1916. U. S. Natl. Mus., Proc. 51: 46. ♀.

cincinnatus Girault. Ohio.

Closterocerus utahensis cincinnatus Girault, 1916. U. S. Natl. Mus., Proc. 51: 47. ♂.

cinctipennis Ashmead. Que., s. to Fla., w. to Wis., Iowa., Mo. Ecology: Parasitizes both eggs and early-instar larvae. Host: *Brachys aerosus* (Melsh.), *B. ovatus* (Web.); *Bucculatrix canadensisella* (Chamb.), *Cameraria hamadryadella* (Clem.), *C. ulmella* (Chamb.), *Nepticula gossypii* F. and L.; *Caliroa cerasi* (L.), *Neodiprion excitans* Roh., *N. lecontei* (Fitch), *N. rugifrons* Midd., *N. swainei* Midd., *N. virginiana* Roh.

Closterocerus cinctipennis Ashmead, 1888. Canad. Ent. 20: 104. ♂.

Biology: Webster, 1911. Ent. Soc. Amer., Ann. 4: 185. — Weiss and Nicolay, 1918. Psyche 25: 128-130. — Schedl, 1939. VII Internat. Kong. Ent., Verh. 3, pp. 2066-2090. — Benjamin, 1955. U. S. Dept. Agr., Tech. Bul. 1118, pp. 24-26. — Morris, Schroeder, and Bobb, 1963. Pine Sawfly in Va., Va. Div. Forestry, p. 13.

tau Girault. Calif.

Closterocerus tau Girault, 1917. Psyche 24: 101. ♀.

tricinctus (Ashmead). Maine, Ont., s. to Va., w. to Wis., Ill., Kans. Host: *Microrhopala xerene* (Newm.); *Argyresthia thuiella* (Pack.), *Cameraria guttifinitella* (Clem.), *Coleotechnites thujaeella* (Kearf.), *Coptodisca splendoriferella* (Clem.), *Cosmopteryx* sp., *Exoteleia pinifoliella* (Chamb.), *Lithocolletis* sp., *L. lucetiella* Clem., *L. populiella* Chamb., *L. tremuloidella* Braun, *Paraclemensia acerifoliella* (Fitch), *Tischeria malifoliella* (Clem.); *Agromyza parvicoruis* Loew, *Liriomyza melampygga* (Loew), *Meoneura obscurella* (Fall.), *Phytomyza ilicis* Curtis.

Pleurotropis tricincta Ashmead, 1888. Kans. Agr. Expt. Sta. Bul. 3: App. p. VIII. ♀.

Biology: Schaffner, 1959. U. S. Dept. Agr., Misc. Pub. 767: 84.

Morphology: Snodgrass, 1922. Smithson. Inst., Ann. Rpt. for 1920, p. 494.
trifasciatus Westwood. Maine, Mass., Minn., S. Dak., Ariz., Calif.; Europe. Host: *Liriomyza pictella* (Thomson).

Closterocerus trifasciatus Westwood, 1833. Mag. Nat. Hist. 6: 420.

Biology: Sundby, 1957. Norsk Ent. Tidsskr., sup. 2, p. 41.
utahensis Crawford. Conn., Md., Utah, Ariz., Calif. Host: *Bucculatrix thurberiella* (Busck);
Agramyza parvicornis Loew; *Fenusia pusilla* (Lep.).

Closterocerus utahensis Crawford, 1912. U. S. Natl. Mus., Proc. 43: 175. ♀.

Biology: Clancy, 1946. Jour. Econ. Ent. 39: 328. —Hills and Taylor, 1951. Jour. Econ. Ent. 44: 760-762.

winnemanae Crawford. Md. Host: *Arge pectoralis* (Leach).

Closterocerus winnemanae Crawford, 1912. U. S. Natl. Mus., Proc. 43: 176. ♀, ♂.

Genus EPRHOPALOTUS Girault

Eprhopalotus Girault, 1916. U. S. Natl. Mus., Proc. 51: 49.

Type-species: *Eprhopalotus purpureithorax* Girault. Orig. desig.
purpureithorax Girault. Tex. Ecology: Emerged from cecidomyiid gall on oak.
Eprhopalotus purpureithorax Girault, 1916. U. S. Natl. Mus., Proc. 51: 49. ♀.

Genus EMERSONELLA Girault

Emersonella Girault, 1916. Soc. Ent. 31: 36.

Type-species: *Emersonella lemae* Girault. Orig. desig.

Revision: Girault, 1922. No. Amer. Spp. of *Emersonella* and *Entedon*. One page.
lemae Girault. Del., D. C., Va., N. C., Mich., Miss. Host: *Lema* sp., *L. trilineata* (Oliv.).
Emersonella lemae Girault, 1916. Soc. Ent. 31: 36. ♀, ♂.

Biology: Chittenden, 1924. Ent. Soc. Wash., Proc. 26: 46.
niveipes Girault. N. Y., D. C., Va. Host: *Chelymorpha cassidea* (F.).
Emersonella niveipes Girault, 1917. Descr. Hym. Chalcidoid. Variorum cum Observ. III, p. 3. ♀.

Genus CHRYSOCHARIS Foerster

Chrysocharis Foerster, 1856. Hym. Stud., v. 2, pp. 79, 82.

Type-species: *Chrysocharis femoralis* Foerster. Desig. by Ashmead, 1904.

Omphalchrysocharis Girault, 1917. Descr. Hym. Chalcidoid. Variorum cum Observ. V, p. 3.
Type-species: *Omphalchrysocharis orientalis* Girault. Orig. desig.

Kratochviliana Malac, 1943. Ent. Listy (Folia Ent.) Brno 6: 1.

Type-species: *Kratochviliana moravica* Malac. Orig. desig.

Epilampsis Delucchi, 1954. Neue Arten Subfam. Entedontinae, p. 3.

Type-species: *Chrysocharis boops* Thomson. Orig. desig.

Taxonomy: Boucek, 1961. Min. Sel. Kruzy. Moldav. SSR, Trudy 7: 28. —Graham, 1963. Soc. Brit. Ent., Trans. 15: 205.

ainsliei Crawford. Conn., S. C., Wis., Tex., Idaho, Utah, Ariz., Wash., Calif. Host: *Coleophora pruniella* Clem.; *Agramyza parvicornis* Loew, *Liriomyza pictella* (Thomson).

Chrysocharis ainsliei Crawford, 1912. U. S. Natl. Mus., Proc. 43: 174. ♀, ♂.

Biology: Webster and Parks, 1913. Jour. Agr. Res. 1: 79-80. —Oatman, 1960. Jour. Econ. Ent. 53: 682.

cubensis Gahan. Fla.; West Indies.

Chrysocharis cubensis Gahan, 1932. Ent. Soc. Amer., Ann. 25: 748. ♀, ♂.

gemma (Walker). B. C.; Europe. Host: *Phytomyza ilicis* Curtis.

Entedon gemma Walker, 1839. Monog. Chalcid. v. 1, p. 53. ♂.

Taxonomy: Delucchi, 1954. Schweiz. Ent. Ges., Mitt. 27: 300 (*Epilampsis*).

- Biology: Cameron, 1939. Bul. Ent. Res. 30: 178-186. —Downes and Andison, 1940. Jour. Econ. Ent. 33: 948. —Cameron, 1941. Parasitology 33: 29-38. —McLeod, 1954. Ent. Soc. B. C., Proc. 50: 22-23. —Busse, 1953. Hamburg. Zool. Mus., Ent. Mitt. 1: 98.
- giraulti* Yoshimoto. Que., Ont., D. C., Mo., Man., Colo., Alta., B. C. Ecology: Reared from chloropid on daisy.
- Omphalchrysocharis petiolatus* Girault, 1918. Ent. News 29: 131. ♀, ♂. Preocc. in *Chrysosucharis* by Foerster, 1861 and Thomson, 1878.
- Chrysosucharis giraulti* Yoshimoto, 1973. Canad. Ent. 105: 1384. N. name.
- laricinellae* (Ratzeburg). N. B., N. S., Que., Ont., Maine, Vt., N. H., Mass., Conn., N. Y., Wis., Idaho; Europe. Introduced for biological control from Central Europe in 1931; there is some evidence it was already here before it was introduced. Host: *Coleophora laricella* (Hbn.); *Fenusia pusilla* (Lep.), *F. ulmi* Sund., *Heterarthrus nemoratus* (Fall.).
- Entedon laricinellae* Ratzeburg, 1848. Ichn. d. Forstins., v. 2, p. 161. ♂.
- Taxonomy: Ferriere, 1933. In Thorpe, Bul. Ent. Res. 24: 290. —Boucek, 1961. Min. Sel. Kruzy. Moldav SSR, Trudy 7: 28. —Peck, 1963. Canad. Ent., Sup. 30, pp. 205-207.

Agr., Tech. Bul. 1139: 92. —Graham, 1958. Ent. Soc. Ontario, Ann. Rpt. 88: 37-41. —Schaffner, 1959. U. S. Dept. Agr., Misc. Pub. 767: 85. —Quednau, 1966. Ent. Soc. Quebec, Ann. 11: 200. —Quednau, 1967. Canad. Ent. 99: 326, 631.
- majoriana* (Girault). Fla.; West Indies, Brazil. Introd. into Hawaii for biological control. Host: *Liriomyza commeliniae* (Frost), *L. sorosis* (Will.), *Phytobia maculosa* (Mall.).
- Chrysoscharodes majoriana* Girault, 1917. Deser. Hym. Chalcidoid. Variorum cum Observ. III, p. 10. ♀.
- mallochi* Gahan. Conn., Ill. Host: *Liriomyza felti* (Mall.).
- Chrysoscharus!* *mallochi* Gahan, 1917. U. S. Natl. Mus., Proc. 53: 213. ♀, ♂.
- orientalis* (Girault). N. H., Mass. Host: *Phytomyza ilicicola* Loew.
- Omphalchrysocharis orientalis* Girault, 1917. Deser. Hym. Chalcidoid. Variorum cum Observ. V, p. 3. ♀.
- osciniidis* Ashmead. Kans. Ecology: Parasitizes dipterous leaf miners in cottonwood leaves.
- Chrysoscharis osciniidis* Ashmead, 1888. Kans. Agr. Expt. Sta., Bul. 3: App. p. VIII. ♂.
- Taxonomy: Girault, 1916. U. S. Natl. Mus., Proc. 51: 42.
- pallipes* (Gahan). Ont., Conn., Md., Ohio, B. C. Host: *Rhynchaenus pallicornis* (Say); *Nepticula lindquisti* Freed., *Phylloconistis populiella* Chamb.; *Mayetiola destructor* (Say); *Fenusia pusilla* (Lep.).
- Derostenus pallipes* Gahan, 1917. U. S. Natl. Mus., Proc. 53: 214. ♀.
- Taxonomy: Gahan, 1932. Ent. Soc. Amer., Ann. 25: 748.
- Biology: Lindquist, 1962. Canad. Ent. 94: 530. —Condrashoff, 1964. Canad. Ent. 96: 869.
- parksii* Crawford. N. Y., Idaho, Utah, Ariz., Calif. Host: *Agromyza parvicornis* Loew, *Cerodontha femoralis* (Meig.), *Liriomyza munda* Frick, *L. pictella* (Thomson), *Phytomyza atricornis* Meig.
- Chrysoscharis parksii* Crawford, 1912. U. S. Natl. Mus., Proc. 43: 173. ♀, ♂.
- Biology: Webster and Parks, 1913. Jour. Agr. Res. 1: 79-80. —Harding, 1965. Jour. Econ. Ent. 58: 443.
- pubicornis* (Zetterstedt). Que., Ohio, Man., N. W. T., B. C.; Europe. Host: *Phytomyza ilicicola* Loew, *P. ilicis* Curtis.
- Entedon pubicornis* Zetterstedt, 1838. Insect. Lappon., v. 1, p. 427. ♂.
- Entedon punctellus* Zetterstedt, 1838. Insect. Lappon., v. 1, p. 431. ♂.
- Entedon cydon* Walker, 1839. Monog. Chaleid., v. 1, p. 58. ♀.
- Entedon eropus* Walker, 1839. Monog. Chaleid., v. 1, p. 75. ♂.
- Entedon syma* Walker, 1839. Monog. Chaleid., v. 1, p. 98. ♀.
- Entedon amyrtaeus* Walker, 1839. Monog. Chaleid., v. 1, p. 111. ♀, ♂.
- Entedon Hersilia* Walker, 1840. Ann. and Mag. Nat. Hist. 4: 235. ♂.
- Derostenus aeneiscapus* Thomson, 1878. Hym. Scand., v. 5, p. 267. ♀, ♂.

Taxonomy: Boucek and Askew, 1968. Index Palearctic Eulophidae (excl. Tetrastichinae), Le Francoise, p. 116. — Yoshimoto, 1973. Canad. Ent. 105: 1400.
salutaris (Crosby). N. Y. Host: *Nepticula slingerlandella* Kearf.
Derostenus salutaris Crosby, 1911. Canad. Ent. 43: 414. ♂.

Biology: Crosby, 1911. N. Y. (Cornell) Agr. Expt. Sta., Bul. 308: 222.
thomsoni (Crawford). Que., Ont., N. Y., Ind., Alaska, B. C. Host: *Phytobia angulata* (Loew), *P. incisa* (Meig.).

Entedon thomsoni Crawford, 1913. U. S. Natl. Mus., Proc. 45: 316. ♀, ♂.
viridis Provancher. Ont., Ohio. Ecology: Emerges from cynipid galls on *Lactuca*.
Chrysocaris viridis Provancher, 1887. Addit. Corr. Faune Ent. Canada Hym., p. 209. ♀.
Chrysocaris compressicornis Ashmead, 1894. Cincinnati Soc. Nat. Hist., Jour. 17: 53. ♀.

Taxonomy: Burks, 1964 (1963). Canad. Ent. 95: 1257.

Genus NEOCHRYSOCHARIS Kurdjumov

Neochrysocharis Kurdjumov, 1912. Ent. Obozr. 12: 234.
 Type-species: *Neochrysocharis immaculatus* Kurdjumov. Orig. desig.
imbrasus (Walker). Fla.
Entedon imbrasus Walker, 1847. Ann. and Mag. Nat. Hist. (1) 20: 23. ♀.

Taxonomy: Burks, 1975. Brit. Mus. (Nat. Hist.) Ent., Bul. 32 (4): 145.

Genus ENAYSMA Delucchi

Genus ENAYSMA Subgenus ENAYSMA Delucchi

Enaysma Delucchi, 1954. Neue Arten d. Subfam. Entedontinae, p. 1.
 Type-species: *Enaysma zwolferi* Delucchi. Orig. desig. The typical subgenus does not occur in N. Amer.

Genus ENAYSMA Subgenus PENTENAYSMA Graham

Enaysma subg. *Peutinenysma* Graham, 1959. Soc. Brit. Ent., Trans. 13: 196.
 Type-species: *Eulophus latreillei* Curtis. Orig. desig.

Taxonomy: Miller, 1962. Canad. Ent. 94: 1039-1040.
arienascapus Miller. Que., Ont. Host: *Lithocolletis* sp., *L. ostryaefoliella* Clem.
Enaysma arienascapus Miller, 1962. Canad. Ent. 94: 1050. ♀, ♂.
carioca Miller. Que., Ont. Host: *Lithocolletis* sp.
Enaysma carioca Miller, 1962. Canad. Ent. 94: 1043. ♀, ♂.
clypeata Miller. Que. Host: *Lithocolletis* sp.
Enaysma clypeata Miller, 1962. Canad. Ent. 96: 1047, 1050. ♂.
gahani Miller. Que., Ont. Host: *Lithocolletis* sp., *L. lucetiella* Clem.
Enaysma gahani Miller, 1962. Canad. Ent. 94: 1041. ♀, ♂.
hirtiscapus Miller. Ont. Host: *Lithocolletis tiliacella* Chamb.
Enaysma hirtiscapus Miller, 1962. Canad. Ent. 94: 1047. ♀, ♂.
myricae Miller. N. S. Host: *Lithocolletis* sp.
Enaysma myricae Miller, 1962. Canad. Ent. 94: 1043-1047. ♀, ♂.

Genus MOSERINA Delucchi

Moserina Delucchi, 1962. Kans. Ent. Soc., Jour. 35: 389.
 Type-species: *Moserina maculata* Delucchi. Orig. desig.
maculata Delucchi. Ohio. Host: *Pachypsylla celtidismana* (Riley), *P. celtidisvesicula* Riley.
Moserina maculata Delucchi, 1962. Kans. Ent. Soc., Jour. 35: 392. ♀, ♂.
 Biology: Moser, 1965. N. Y. State Mus. and Sci. Serv., Bul. 402: 14-15. — Rowan, 1971. Fla.
 Ent. 54: 63-64.

Genus ACHRYSOCHAROIDES Girault

Achrysocharoides Girault, 1913. Roy. Soc. So. Australia, Trans. 37: 72.

Type-species: *Chrysacharis sarcophagus* Girault. Orig. desig.

Neoderostenus Girault, 1913. Queensland Mus., Mem. 2: 144.

Type-species: *Neoderostenus australiensis* Girault. Orig. desig.

bipunctatus (Girault). Maine, Md. Host: *Lithocolletis tremuloidiella* Braun.

Neoderostenus bipunctatus Girault, 1916. Canad. Ent. 48: 409. ♀.

guizoti Girault. Ind.

Achrysocharoides guizoti Girault, 1917. Descr. Hym. Chalcidoid. Variorum cum Observ. V, p. 11. ♀.

titiani Girault. Ind.

Achrysocharoides titiani Girault, 1916. U. S. Natl. Mus., Proc. 51: 42. ♀.

Genus RHICNOPELTOMYIA Girault

Rhincopeltomyia Girault, 1913. Queensland Mus., Mem. 2: 174.

Type-species: *Rhincopeltomyia washingtoni* Girault. Orig. desig.

achrysocharoides Girault. D. C.

Rhincopeltomyia achrysocharoides Girault, 1916. U. S. Natl. Mus., Proc. 51: 39. ♀.

belisarii Girault. East. U. S.

Rhincopeltomyia belisarii Girault, 1917. New Chalcid Flies, p. 4.

carlylei Girault. Md.

Rhincopeltomyia carlylei Girault, 1917. Descr. Hym. Chalcidoid. Variorum cum Observ. V, p. 6. ♀.

Rhincopeltomyia carlylei var. *poeta* Girault, 1920. U. S. Natl. Mus., Proc. 58: 197. ♀. N. syn.

marylandensis Girault. Md.

Rhincopeltomyia marylandensis Girault, 1916. U. S. Natl. Mus., Proc. 51: 39. ♀.

marylandi Girault. Md.

Rhincopeltomyia marylandi Girault, 1917. New Chalcid Flies, pp. 4, 5.

Taxonomy: Girault, 1920. U. S. Natl. Mus., Proc. 58: 196.

scutellata Girault. D. C.

Rhincopeltomyia scutellata Girault, 1916. U. S. Natl. Mus., Proc. 51: 40. ♀.

viridiscutellum Girault. D. C.

Rhincopeltomyia viridiscutellum Girault, 1916. U. S. Natl. Mus., Proc. 51: 40. ♀.

Genus RHICNOPELTOIDEA Girault

Rhincopeltoidea Girault, 1917. Descr. Hym. Chalcidoid. Variorum cum Observ. V, p. 3.

Type-species: *Rhincopeltoidea amsterdamensis* Girault. Orig. desig.

amsterdamensis Girault. Maine, N. Y., Ind. Host: *Lithocolletis corylisella* (Chamb.).

Cameraria guttifinitella (Clem.), *C. picturatella* Braun.

Rhincopeltoidea amsterdamensis Girault, 1917. Descr. Hym. Chalcidoid. Variorum cum Observ. V, p. 3. ♀.

Genus CARLYLEIA Girault

Carlyleia Girault, 1917. Ent. News 28: 20.

Type-species: *Carlyleia marilandica* Girault. Orig. desig.

marilandica Girault. Md.

Carlyleia marilandica Girault, 1917. Ent. News 28: 20. ♀.

Genus CHRYSOCHAROMYIA Girault

Chrysoscharomyia Girault, 1915. Queensland Mus., Mem. 3: 207.

Type-species: *Chrysoscharomyia elongata* Girault. Orig. desig.

eleganta Girault. Md.*Chrysoscharomyia eleganta* Girault, 1917. Ent. News 28: 21. ♀.**elegantissima** Girault. N. Y. Host: *Phytomyza obscurella* Fall.*Chrysoscharomyia elegantissima* Girault, 1917. Descr. Stellarum Nov., p. 20. ♀.**occidentalis** Girault. Calif.*Chrysoscharomyia occidentalis* Girault, 1916. U. S. Natl. Mus., Proc. 51: 41. ♀.**omari** Girault. Pa.*Chrysoscharomyia omari* Girault, 1917. Descr. Hym. Chalcidoid. Variorum cum Observ. III, p. 9. ♀.**splendidissima** Girault. Pa.*Chrysoscharomyia splendidissima* Girault, 1917. Descr. Stellarum Nov., p. 20. ♀.**Genus HOPLOCREPIS Ashmead***Hoplocrepis* Ashmead, 1890. Ent. Soc. Wash., Proc. 1: 235.Type-species: *Hoplocrepis albiclavus* Ashmead. Orig. desig.**albiclavus** Ashmead. Mass., Fla.; West Indies.*Hoplocrepis albiclavus* Ashmead, 1890. Ent. Soc. Wash., Proc. 1: 236. ♀.**Genus PARACHRYSOCHARIS Girault***Parachrysocharis* Girault, 1913. Queensland Mus., Mem. 2: 177.Type-species: *Parachrysocharis javensis* Girault. Orig. desig.**semiflava** Girault. Wis., Tex. Host: *Auplopus* sp.*Parachrysocharis semiflava* Girault, 1917. Canad. Ent. 49: 129. ♀, ♂.**Genus ACHRYSOCHARIS Girault***Achrysocharis* Girault, 1913. Arch. f. Naturgesch. 79A (6): 104.Type-species: *Achrysocharis bifasciatus* Girault. Monotypic.Taxonomy: Girault, 1913. Soc. Ent. 28: 100. —Girault, 1913. Queensland Mus., Mem. 2: 163.
aemilia Girault. Fla. Host: Cecidomyiid on *Eugenia buxifolia*.*Achrysocharis aemilia* Girault, 1917. New Chalcid Flies, p. 3. ♀.**athanasii** Girault. Md.*Achrysocharis athanasii* Girault, 1917. Deser. Hym. Chalcidoid. Variorum cum Observ. III, p. 3. ♀.**divina** Girault. Md.*Achrysocharis divina* Girault, 1917. Ent. News 2: 22. ♀.**donna** Girault. N. Y. Host: *Taphrocerus gracilis* (Say).*Achrysocharis donna* Girault, 1917. Deser. Stellarum Nov., p. 22. ♀.**kansensis** Girault. Minn., Kans. Host: *Schizocerella pilicornis* (Holmg.).*Achysoscharis(!) kansensis* Girault, 1916. U. S. Natl. Mus., Proc. 51: 42. ♀.**partifuscipennis** Girault. Md.*Achrysocharis partifuscipennis* Girault, 1916. Ent. Soc. Amer. Ann. 9: 294. ♀.**phenacaspia** Yoshimoto. Calif. Host: *Phenacaspis pinifoliae* (Fitch).*Achrysocharis phenacaspia(!)* Yoshimoto, 1972. Canad. Ent. 104: 1483. ♀.**Genus ACHRYSOCHARELLA Girault***Achrysocharella* Girault, 1913. Queensland Mus., Mem. 2: 171.Type-species: *Achrysocharella dubia* Girault. Orig. desig.*Wolfiella* Krausse, 1917. Ztschr. f. Forst. u. Jagdw. 49: 29.Type-species: *Wolfiella ruforum* Krausse. Monotypic.North American species that were placed in *Derostenus* Westwood are generically misplaced and belong here.Revision: Crawford, 1912. U. S. Natl. Mus., Proc. 43: 179 (*Derostenus*).

acuminaticornis Girault. D. C.

Achrysocharella acuminaticornis Girault, 1916. U. S. Natl. Mus., Proc. 51: 50. ♀.

acuminativentris Girault. D. C.

Achrysocharella acuminativentris Girault, 1917. Descr. Hym. Chalcidoid. Variorum cum Observ. III, p. 6. ♀.

agromyzae (Crawford). N. Y., s. to Fla., w. to N. Dak. and Ariz. Host: *Agromyza* sp., *Liriomyza sorosis* (Will.); *Mantura floridana* (Crotch).

Derostenus agromyzae Crawford, 1913. U. S. Natl. Mus., Proc. 45: 314, 315. ♀, ♂.

americana Girault. D. C.

Achrysocharella americana Girault, 1916. Ent. Soc. Amer., Ann. 9: 295.

arizonensis (Crawford). Utah, Ariz., Calif. Host: *Agromyza* sp., *Liriomyza pictella* (Thomson). *Derostenus arizonensis* Crawford, 1913. U. S. Natl. Mus., Proc. 45: 315. ♀, ♂.

Biology: Webster and Parks, 1913. Jour. Agr. Res. 1: 80.
damastes (Walker). Fla.

Closterocerus Damastes Walker, 1847. Ann. and Mag. Nat. Hist. (1) 20: 22. ♀.

Taxonomy: Burks, 1975. Brit. Mus. (Nat. Hist.) Ent., Bul. 32 (4): 142.

diastatae (Howard). Conn. to Fla. and Kans. Host: *Agromyza parvicornis* Loew, *Diastata* sp., *Phytobia angulata* (Loew); *Fenusia pusilla* (Lep.).

Entedon diastatae Howard, 1881. U. S. Dept. Agr., Ann. Rpt. for 1880, p. 246. ♀, ♂.

Biology: Phillips, 1914. Jour. Agr. Res. 2: 26-27.

fullawayi (Crawford). Conn., Va., La., S. Dak., Calif.; Hawaii, Mexico. Host: *Argyresthia thuiella* (Pack.); *Agromyza parvicornis* Loew; *Fenusia pusilla* (Lep.).

Derostenus fullawayi (!) Crawford, 1913. U. S. Natl. Mus., Proc. 46: 348. ♀.

Achrysocharis camilli Girault, 1917. New Chalcid Flies, p. 5.

Derostenus fullawayi Glick, 1939. U. S. Dept. Agr., Tech. Bul. 673: 47. Emend.

Taxonomy: Girault, 1920. U. S. Natl. Mus., Proc. 58: 196.

Biology: Underhill, 1943. Va. Agr. Expt. Sta., Bul. 349: 22.

leucopus (Ashmead). Ohio, Kans. Ecology: Reared from leaf miner on beech.

Derostenus leucopus Ashmead, 1888. Kans. Agr. Expt. Sta., Bul. 3: App. p. VIII. ♀.

obscurinotata Girault. Md.

Achrysocharella obscurinotata Girault, 1916. Ent. Soc. Amer., Ann. 9: 306. ♀.

partiaeiceps Girault. Md.

Achrysocharella partiaeiceps Girault, 1917. New Eulophidae, p. 1. ♀.

pictipes (Crawford). Md., S. C., Ind., Kans., Colo., Utah. Host: *Agromyza* sp., *Phytobia lateralis* (Macq.).

Derostenus pictipes Crawford, 1912. U. S. Natl. Mus., Proc. 43: 180. ♀, ♂.

pulchrella Girault. D. C.

Achrysocharella pulchrella Girault, 1917. Psyche 24: 94. ♀.

punctiventris (Crawford). Ind., Wyo., Utah, Idaho, Calif. Host: *Agromyza parvicornis* Loew, *Liriomyza* sp.

Derostenus punctiventris Crawford, 1912. U. S. Natl. Mus., Proc. 43: 180. ♀.

Biology: Phillips, 1914. Jour. Agr. Res. 2: 28.

silvia Girault. Maine, s. to Md., w. to Wis., Calif. Host: *Coleophora laricella* (Hbn.),

Coleotechnites apicitripunctella (Clem.), *C. milleri* (Busck), *Exoteleia pinifoliella* (Chamb.), *Tetralopha robustella* Zell.

Achrysocharella silvia Girault, 1917. Two New Achrysocharella, p. 1. ♀.

Taxonomy: Girault, 1920. U. S. Natl. Mus., Proc. 58: 197.

Biology: Schaffner, 1959. U. S. Dept. Agr., Misc. Pub. 767: 85.

variipes (Crawford). N. Y., s. to Fla., w. to Mich., La., Tex. Host: *Agromyza* sp.

Derostenus variipes Crawford, 1913. U. S. Natl. Mus., Proc. 45: 315. ♀.

Taxonomy: Gahan, 1914. U. S. Natl. Mus., Proc. 48: 164.

Genus LOPHOCOMUS Haliday

Lophocomus Haliday, 1844 (1843). Ent. Soc. London, Trans. 3: 297.

Type-species: *Cirrosipilus anaitis* Walker. Monotypic.

verticillatus Ashmead. Kans.

Lophocomus verticillatus Ashmead, 1888. Kans. Agr. Expt. Sta., Bul. 3: App. p. VIII. ♂.

Genus HORISMENUS Walker

Horismenus Walker, 1843. Ann. and Mag. Nat. Hist. 11: 117.

Type-species: *Horismenus cleodora* Walker. Monotypic.

Horismenus Crawford, 1907. N. Y. Ent. Soc., Jour. 15: 180. Undoubtedly an error for *Horismenus*, but published in such a way as to validate it as a generic name in Zoology.

Type-species: *Horismenus lizivorus* Crawford. Monotypic.

Pseudomphale Schrottky, 1909. Soc. Cient. Argentina, An. 67: 209.

Type-species: *Pseudomphale opsiphonis* Schrottky. Monotypic.

Pediobioidea Girault, 1911. Canad. Ent. 43: 407.

Type-species: *Pediobioidea cyanea* Girault. Monotypic. Synonymized under *Horismenus* when described.

Triolynx Cameron, 1913. Timehri, R. Agr. Com. Soc. Brit. Guiana, Jour. 3: 130.

Type-species: *Triolynx clavicornis* Cameron. Monotypic.

Akonda Cameron, 1913. Timehri, R. Agr. Com. Soc. Brit. Guiana, Jour. 3: 131.

Type-species: *Akonda hipparchia* Cameron. Monotypic.

Perhymenes Brethes, 1916. Buenos Aires Mus. Nac. de Hist. Nat., An. 27: 427.

Type-species: *Perhymenes schrottkyi* Brethes. Monotypic.

Dirphiphagus Brethes, 1917. An. Zool. Appl. 4: 25.

Type-species: *Dirphiphagus ancilla* Brethes. Orig. desig.

Holcopeltomorpha Blanchard, 1942. Soc. Cient. Argentina, An. 134: 126.

Type-species: *Holcopeltomorpha christensenii* Blanchard. Orig. desig.

Revision: Burks, 1971. Ent. Soc. Wash., Proc. 73: 68-83.

Taxonomy: Boucek, 1965. Mus. Natl. Pragae, Acta Ent. 36: 84 (synonymy). —De Santis, 1968 (1967). Cat. Hym. Argentinos, Buenos Aires, p. 141 (synonymy).

atrosapus (Girault). N. C., Fla. Host: *Acrobasis rubrifasciella* (Pack.), *Tetralopha subcanalis* (Walk.).

Pseudomphale atrosapus Girault, 1917. Descr. Stellarum Nov., p. 20. ♀.

bruchophagus Burks. Tex. Host: *Mimosestes sallei* (Sharp).

Horismenus bruchophagus Burks, 1971. Ent. Soc. Wash., Proc. 73: 72. ♀, ♂.

carolinensis Burks. N. C. Host: *Chrysobothris femorata* (Oliv.), *Oncideres cingulata* (Say). Despite these seemingly reliable host records, this species probably is actually a secondary parasite.

Horismenus carolinensis Burks, 1971. Ent. Soc. Wash., Proc. 73: 73. ♀, ♂.

depressus Gahan. Tex., Calif. Host: *Bruchus* sp., *Stator pruininus* (Horn).

Horismenus depressus Gahan, 1930. U. S. Natl. Mus., Proc. 77 (8): 8. ♀, ♂.

floridanus (Ashmead). N. J. s. to Fla., w. to Ill., Kans., Tex., Calif. Host: *Apanteles* sp., *A. schizurae* Ashm.

Holcopelte floridana Ashmead, 1888. Canad. Ent. 20: 102. ♀.

Biology: Gahan, 1934 (1933). U. S. Dept. Agr., Misc. Pub. 174: 128. —Gilmore, 1938. Jour. Econ. Ent. 31: 715. —Fulton, 1940. Ent. Soc. Amer., Ann. 32: 233. —Nickels, 1951. Jour. Econ. Ent. 44: 434. —Painter, 1955. Jour. Econ. Ent. 48: 41.

fraternus (Fitch). Conn., s. to Fla., w. to Wis., Kans., Tex. Host: *Coleophora pruniella* Clem., *Caneraria caryaefoliella* (Clem.), *Parornix geminatella* (Pack.), *Tischeria malifoliella* (Clem.); *Apanteles* sp., *Euplectrus comstockii* How., *Sympiesis* sp.

Trichogramma? fraterna Fitch, 1856. Country Gentleman 7: 235.

Elachistus euplectri Howard, 1885. In Riley, U. S. Dept. Agr., Ent. Comm., Rpt. 4,

Appendix, p. 108. ♀, ♂.

Holcopelte violacea Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 200. ♀.

Taxonomy: Packard, 1890. U. S. Dept. Agr., Ent. Comm., Rpt. 5, p. 265.

Biology: Dunnam, 1924. Iowa Agr. Expt. Sta., Bul. 220: 65. — Doner, 1936. Ent. Soc. Amer., Ann. 29: 234. — Copenhafer and Parker, 1938. Kans. Ent. Soc., Jour. 11: 46. — Glick, 1939. U. S. Dept. Agr., Tech. Bul. 673: 48. — Nickels, 1948. Jour. Econ. Ent. 4: 114. — Beckham *et al.*, 1950. Va. Agr. Expt. Sta., Tech. Bul. 114: 12. — Schaffner, 1959. U. S. Dept. Agr., Misc. Pub. 767: 85.

ignotus Burks. Fla. Host: *Homaedra sabella* (Chamb.).

Horismenus ignotus Burks, 1971. Ent. Soc. Wash., Proc. 73: 76. ♀.

latroducti Burks. Tex. Ecology: A secondary parasite in egg sacs of the black widow spider, probably parasitizing a chloropid fly, *Pseudogaurax signatus* (Loew), the primary parasite.

Horismenus latroducti Burks, 1971. Ent. Soc. Wash., Proc. 73: 77. ♀, ♂.

lixivorus Crawford, Tex., Ariz. Host: *Lixus musculus* Say., *L. perforatus* LeC., *L. scrobicollis* Boh.

Horismenus(?) lixivorus Crawford, 1907. N. Y. Ent. Soc., Jour. 15: 180. ♀, ♂.

Biology: Pierce, 1910. Jour. Econ. Ent. 3: 453.

microgaster (Ashmead). Maine, s. to N. C., w. to Iowa, Kans., Tex. Host: *Apion decoloratum* Smith; *Acleris minuta* (Rob.), *Anchylopera nebulosana* Clem., *Ancylis comptana fragariae* (W. and R.), *Celama sorghiella* (Riley), *Choristoneura rosaceana* (Har.), *Coleophora loricella* (Hbn.), *C. malivorella* Riley, *Dichomeris marginella* (F.), *Exoteleia pinifoliella* (Chamb.), *Parornix geminatella* (Pack.), *Phyllocnistis populiella* Chamb., *Pterophorus periscelidactylus* Fitch, *Tetralopha robustella* Zell.; *Apanteles* sp., *A. congregatus* (Say), *A. glomeratus* (L.), *A. melanoscelus* (Ratz.), *Chorinaeus* sp., *Microgaster* sp., *Micropititis ceratomiae* Riley, *Oncophanes americanus* (Weed).

Holcopelte microgaster Ashmead, 1888. Canad. Ent. 20: 102. ♂.

Pediobioides cyanea Girault, 1911. Canad. Ent. 43: 407. ♀, ♂.

Pseudomphale aencylae Girault, 1916. Ent. News 27: 223. ♀, ♂.

Biology: Leach, 1916. U. S. Dept. Agr., Bul. 435: 11. — Proper, 1934. Jour. Agr. Res. 48: 365. — Hill and Hough, 1957. Va. Agr. Expt. Sta., Tech. Bul. 130: 16. — Schaffner, 1959. U. S. Dept. Agr., Misc. Pub. 767: 85.

missouriensis (Ashmead). N. Y., s. to Ga., w. to S. Dak., Kans., Okla., Ariz. Host:

Acanthoscelides sp., *Amblycerus* sp., *Gibbocerchus* sp.

Holcopelte missouriensis Ashmead, 1888. Canad. Ent. 20: 101. ♀.

Holcopelte popenoei Ashmead, 1888. Canad. Ent. 20: 101. ♀.

Taxonomy: Girault, 1934. Miridae et Hym. Nova Austral., p. 3 (synonymy).

nitens (Howard). D. C. Ecology: A secondary parasite in egg sacs of epeirid spiders.

Holcopelte nitens Howard, 1892. Ent. Soc. Wash., Proc. 2: 298. ♀, ♂.

productus (Ashmead). Tex., N. Mex., Ariz., Calif. Host: *Acanthoscelides horni* (Pic), *Algarobius prosopis* (LeC.), *Minoestes amicus* (Horn).

Holcopelte producta Ashmead, 1894. Amer. Ent. Soc., Trans. 21: 342. ♀, ♂.

sardus (Walker). Fla.

Entedon (Horismenus) sardus Walker, 1847. Ann. and Mag. Nat. Hist. (1) 20: 23. ♀.

Taxonomy: Burks, 1975. Brit. Mus. (Nat. Hist.) Ent., Bul. 32 (4): 147.

Elachristus(?) flavipes Ashmead, 1886. Amer. Ent. Soc., Trans. 13: 133. ♀.

texanus (Girault). Conn., s. to Ga., w. to Iowa, Kans., Ariz. Ecology: A parasite of small Diptera living in grass stems. Host: *Eunetopiella rufipes* (Macq.), *Mayetiola destructor* (Say), *Meromyza americana* Fitch.

Pseudomphale texana Girault, 1917 (1916). Insecutor Inscitiae Menstruus 4: 120. ♀.

Biology: Gahan, 1934 (1933). U. S. Dept. Agr., Misc. Pub. 174: 128.

Genus PEDIOBIAZUS Walker

Pediobius Walker, 1846. Ann. and Mag. Nat. Hist. (1) 17: 184.

Type-species: *Entedon (Pediobius) imbreus* Walker. Desig. by Ashmead, 1904, p. 384. Incorrectly desig. on p. 344.

Rhopalotus Foerster, 1856. Hym. Stud., v. 2, p. 78.

Type-species: *Elachertus cothurnatus* Ratzeburg. Desig. by Ashmead, 1904.

Pleurotropis Foerster, 1856. Hym. Stud., v. 2, pp. 78, 82. No species. —Foerster, 1861.

Progr. Realsch. Aachen, p. xxxvii, no. 58. One species.

Type-species: *Pleurotropis isomera* Foerster. Included by Foerster, 1861.

Cluthaira Cameron, 1912. Linn. Soc. New South Wales, Proc. 37: 211.

Type-species: *Cluthaira agaristae* Cameron. Monotypic.

Pseudacrias Girault, 1913. Arch. f. Naturgesch. 79A (6): 104.

Type-species: *Pseudacrias micans* Girault. Orig. desig.

Mestocharomyia Girault, 1915. Queensland Mus. Mem. 3: 188.

Type-species: *Mestocharomyia lividus* Girault. Orig. desig.

Eupleurotropis Girault, 1917. Speciosissima Genera Nova Eulophidorum, p. 3.

Type-species: *Pleurotropis testaceipes* Crawford. Orig. desig.

Pseudacrioides Girault, 1917. Descr. Stellarum Nov., p. 9.

Type-species: *Pleurotropis utahensis* Crawford. Orig. desig.

Epipleurotropis Girault, 1917. Descr. Hym. Chalcidoid. Variorum cum Observ. III, p. 7.

Type-species: *Epipleurotropis longfellowi* Girault. Orig. desig.

Boucek, 1965 (Mus. Nat. Pragae, Acta Ent. 36: 7) states that *Microterus* Spinola, 1811, is very likely the same as *Pediobius* Walker, 1846, and should, thus, have priority. He decided, however, to continue to use *Pediobius* as the name of this genus because of usage and because *Microterus* is a long forgotten name. In my opinion the case for recognizing *Microterus* is very weak, at least on the basis of the presently available information. If a case to present to the Commission were drawn up, the only name for this genus that could be retained on the basis of usage is *Pleurotropis* Foerster, 1856. That is the name that was used for it for over a century.

Revision: Crawford, 1912. U. S. Natl. Mus., Proc. 43: 177-179 (*Pleurotropis*). —Boucek, 1965.

Mus. Nat. Pragae, Acta Ent. 36: 5-90 (Palearctic fauna). —Burks, 1966. Ent. Soc. Wash., Proc. 68: 33-43.

Taxonomy: Waterston, 1915. Bul. Ent. Res. 5: 343-346. —Ferriere, 1953. Univ. Bologna, Ist. di Ent., Bol. 19: 400. —Graham, 1959. Soc. Brit. Ent., Trans. 13: 186. —Boucek, 1965. Mus. Natl. Pragae, Acta Ent. 36: 7-10. —Boucek and Askew, 1968. Index Palearctic Eulophidae (excl. Tetrastichinae), Le Francois, p. 88.

albipes (Provancher). Maine, Ont., s. to Va., w. to Ill. Host: *Apanteles congregatus* (Say), *Dibrachys cavus* (Walk.), *Euperteromalus peregrinus* Graham.

Holcopeltis albipes Provancher, 1887. Addit. Corr. Faune Ent. Canada Hym., p. 210. ♂.
Entedon albitarvis Ashmead, 1888. Canad. Ent. 20: 102, 103. ♀, ♂.

Taxonomy: Girault, 1924. Insecutor Inscitiae Menstruus 12: 94. —Burks, 1964 (1963), Canad. Ent. 95: 1259.

aphidiphagus (Ashmead). Que., Fla., Ind., Ill., Kans. Ecology: Parasitic on tineid larvae in oak galls; reared from galls of *Amphibolips quercusinanis* (O. S.) and *A. quercusspongifica* (O. S.).

Entedon aphidiphagus Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 201. ♀.

Ascodes querica Ashmead, 1888. Kans. Agr. Expt. Sta., Bul. 3: App. p. VIII. ♀, ♂.

Taxonomy: Gahan, 1951. Canad. Ent. 83: 170.

bucculatricis (Gahan). Que., Maine, Conn. Host: *Bucculatrix canadensisella* (Chamb.).

Phyllocnistis populiella Chamb.; *Xenochalepus dorsalis* (Thunb.).

Pleurotropis bucculatricis Gahan, 1927. Psyche 34: 171. ♀, ♂.

Biology: Schaffner, 1959. U. S. Dept. Agr., Misc. Pub. 767: 85.

chloropidis Burks. N. Y., W. Va. Ecology: Parasitizes chloropid flies that are egg-predators on bagworms. Host: *Pseudogaurax* sp., *P. anchora* (Loew).

Pediobius chloropidis Burks, 1966. Ent. Soc. Wash., Proc. 68: 42. ♀, ♂.

crocidophorae Burks. S. C., La. Host: *Crocidophora pustuliferalis* Led.

Pediobius crocidophorae Burks, 1966. Ent. Soc. Wash., Proc. 68: 36. ♀, ♂.

- lithocolletidis** (Ashmead). Maine, Conn., Va., N. C., Ind., Ill., Kans. Host: *Anthonomus nigrinus* Boh.; *Argyresthia thiarella* (Pack.), *Cameraria guttifinitella* (Clem.).
Lithocolletis sp.; *Phytobia jucunda* (Wulp), *Phytomyza ilicis* Curt.

Agr., Cir. 607: 7. —Smith, 1949 (1947). Ent. Soc. Ont., Ann. Rpt. 78: 39-42. —Smith, 1959. Canad. Ent. 91: 699-701. —von Rosen, 1959. Ent. Tidskr. 80: 163.

perdubius (Girault). Utah.

Amestocharis perdubius Girault, 1917. Descr. Stellarum Nov., p. 8. ♀.

phyllotretae (Riley). Mo., La. Host: *Phyllotreta zimmermanni* (Crotch).

Pleurotropis phyllotretae Riley, 1885. U. S. Dept. Agr., Ann. Rpt. for 1884, p. 307. ♀, ♂.

rugosithorax (Crawford). Ind., Kans., Utah. Host: *Agromyza* sp., *Phytobia angulata* (Loew).

Pleurotropis rugosithorax Crawford, 1912. U. S. Natl. Mus., Proc. 43: 179. ♀, ♂.

Pleurotropis kansensis Girault, 1918. Ent. News 29: 128. ♀.

Biology: Webster and Parks, 1913. Jour. Agr. Res. 1: 82, 84.

sexdentatus (Girault). Mass., N. J., Ohio, N. C., Kans. Ecology: A primary or secondary parasite of small Lepidoptera. Host: *Acrobasis comptoniella* Hulst, *Ancylis comptana fragariae* (W. and R.); *Meteorus* sp.

Pseudacrias sexdentatus Girault, 1916. Soc. Ent. 31: 36. ♀.

Biology: Patterson, 1915. Biol. Bul. 29: 340-341. —Schaffner, 1959. U. S. Dept. Agr., Misc. Pub. 767: 86.

singularis (Howard). D. C. Host: *Cameraria hamadryadella* (Clem.). Described from the pupa; recognizably a *Pediobius* but cannot be specifically placed at present.

Chrysocarhis singularis Howard, 1882. Amer. Nat. 16: 61.

Biology: Howard, 1891. U. S. Dept. Agr., Insect Life 4: 194.

splendens (Cook and Davis). Mich. Host: *Eulophus* sp.

Derostenus splendens Cook and Davis, 1891. Mich. Agr. Expt. Sta., Bul. 73: 13. ♂, ♀.

tarsalis (Ashmead). N. H., s. to N. C., w. to Wash., Oreg., Calif. Ecology: A common secondary parasite of Lepidoptera. Host: *Compsilura concinna* (Meig.), *Winthemia datauae* (Twns.); *Apanteles clisiocampae* Ashm., *A. hyphantriae* Riley, *A. lacteicolor* Vier., *A. melanoscelus* (Ratz.), *Bracon gelechiae* Ashm., *Casinaria limenitidis* (How.), *Dibrachys cavus* (Walk.), *Dimmockia incongrua* (Ashm.), *D. pallipes* Mues., *Eupelmella vesicularis* (Retz.), *Eupelmus* sp., *Euperonoma peregrinus* Graham, *Eurytoma* sp., *Gambrus extrematis* (Cress.), *Gelis tenellus* (Say), *Habrocytus phycidis* Ashm., *Hyposoter fugitivus* (Say), *Iseropus coelebs* (Walsh), *Itoplectis conquisitor* (Say), *Mastrus* sp., *Phobocampe clisiocampae* (Weed), *Rogas stigmator* (Say), *Schizonotus latus* (Walk.). *Asecodes albitarsis* Ashmead, 1888. Canad. Ent. 20: 103. ♀. Preocc. by Ashmead, 1888. *Holcopeltis tarsalis* Ashmead, 1894. Amer. Ent. Soc., Trans. 21: 341. ♂, ♀.

Pleurotropis ashmeadi Crawford, 1912. U. S. Natl. Mus., Proc. 43: 177. N. name, for *albitarsis*.

Taxonomy: Gahan, 1927. U. S. Natl. Mus., Proc. 71 (4): 26.

Biology: Fiske, 1903. N. H. Agr. Expt. Sta., Tech. Bul. 6: 182, 206, 213, 229. —Smith, 1916. Jour. Econ. Ent. 9: 484. —Muesebeck and Dohanian, 1927. U. S. Dept. Ent. 88: 572. —Schaffner, 1959. U. S. Dept. Agr., Misc. Pub. 767: 86.

testaceipes (Crawford). S. C.

Pleurotropis testaceipes Crawford, 1914. Insecutor Inscitiae Menstruus 2: 37. ♀.

utahensis (Crawford). Maine, Man., N. Dak., Mont., Utah. Host: *Cephus cinctus* Nort.

Originally described as a parasite of an agromyzid, but that was a mistake.

Pleurotropis utahensis Crawford, 1913. U. S. Natl. Mus., Proc. 45: 316. ♀, ♂.

Taxonomy: Phillips, 1914. Jour. Agr. Res. 2: 28. —Gahan, 1921. Ent. Soc. Wash., Proc. 23: 113-117.

Biology: Ainslie, 1920. U. S. Dept. Agr., Bul. 841: 23-24. —Ainslie, 1929. U. S. Dept. Agr., Tech. Bul. 157: 19-20. —Munro *et al.*, 1949. N. Dak. Agr. Expt. Sta., Bimonth. Bul. 11: 90. —Nielson, 1949. Canad. Ent. 81: 174-180. —Davis *et al.*, 1955. N. Dak. Agr. Expt. Sta., Bimonth. Bul. 18: 64-65.

wilderi (Howard). Que., N. Y., Pa., D. C., Md., S. C., Ga., Minn., Ark., Calif. Ecology: A secondary parasite in spider egg sacs, emerging from ichneumonid cocoons. Host: *Gelis sp.*, *Tromatobia rufopectus* (Cress.).

Mestocharis wilderi Howard, 1892. Ent. Soc. Wash., Proc. 2: 298. ♀, ♂.

Taxonomy: Girault, 1911. N. Y. Ent. Soc., Jour. 19: 179. — Crawford, 1912. U. S. Natl. Mus., Proc. 43: 179.

williamsoni (Girault). N. J., Ill., N. Dak., Utah. Ecology: Parasitizes conopid flies that develop in bumblebee nests. Host: *Physocephala sagittaria* (Say), *P. texana* (Will.).

Mestocharis williamsoni Girault, 1911. N. Y. Ent. Soc., Jour. 19: 179. ♀, ♂.

Taxonomy: Frison, 1926. Ent. Soc. Amer., Ann. 19: 222, 232. — Frison, 1927. Ill. State Nat. Hist. Survey, Bul. 16: 222.

Genus ENTEDON Dalman

Entedon Dalman, 1820. Svenska Vetensk. Akad., Handl. 41: 136, 181.

Type-species: *Entedon cyanellus* Dalman. Desig. by Ashmead, 1904.

Eriglyptus Crawford, 1907. N. Y. Ent. Soc., Jour. 15: 179.

Type-species: *Eriglyptus robustus* Crawford. Orig. desig.

Entedonella Girault, 1913. Queensland Mus., Mem. 2: 154.

Type-species: *Entedonella magnifica* Girault. Orig. desig.

Revision: Girault, 1922. No. Amer. spp. of *Emersonella* and *Entedon*, 1 page. — Graham, 1971. Roy. Ent. Soc. London, Trans. 123: 313-358 (British Fauna).

Taxonomy: Girault, 1917 (1916). Insecutor Inscitiae Menstruus 4: 110 (synonymy). — Hedqvist, 1963. Stud. Forest. Suecica 11: 144.

bigeloviae Ashmead. Kans., N. Mex., Utah, Ariz., Oreg. Host: *Aciurina bigeloviae* (Ckll.).

Entedon bigeloviae Ashmead, 1894. Amer. Ent. Soc., Trans. 21: 342. ♀.

columbianus Ashmead. D. C.

Entedon columbiana Ashmead, 1888. Canad. Ent. 20: 103. ♀.

leucogramma (Ratzeburg). Conn., N. Y., Pa., Va., N. C., S. C., Ohio, Ind., Iowa, La., Calif.; Europe. Introduced from Europe for biological control. Host: *Scolytus multistriatus* (Marsh.), *S. rugulosus* (Ratz.).

Ichneumon (Elachestus) Leucogramma Ratzeburg, 1844. Forst.-Ins. d. Wald. Preuss., v. 3, p. 28. ♂.

Taxonomy: Erdos, 1944. Species Hung. Entedon Dalm., Kalocsa, Hung., p. 43. — Hedqvist, 1963. Stud. Forest. Suecica 11: 145-146. — Graham, 1963. Soc. Brit. Ent., Trans. 15: 194-195. — Boucek, 1965. Mus. Natl. Pragae, Acta Ent. 36: 34.

— Capek, 1963. Banska Stiav. Vyskum Ustav Les. Hosped Ved. Prace 4: 269. — Beaver, 1966. Roy. Ent. Soc. London, Proc. (A) 41: 37. — Beaver, 1967. Jour. Anim. Ecol. 36: 437.

leucopus (Ashmead). Fla.

Pleurotropis leucopus Ashmead, 1888. Canad. Ent. 20: 102. ♀.

occidentalis Girault. Utah, Oreg., Calif.

Entedon occidentalis Girault, 1916. U. S. Natl. Mus., Proc. 51: 48. ♀.

robustus (Crawford). D. C. Host: *Anthonomus nigrinus* Boh.

Eriglyptus robustus Crawford, 1907. N. Y. Ent. Soc., Jour. 15: 180. ♀, ♂.

tachypterelli Gahan. N. Y., Colo. Host: *Tachypterellus consors cerasi* List, *T. quadrigibbus* (Say).

Entedon tachypterelli Gahan, 1931. Wash. Acad. Sci., Proc. 21: 38. ♀, ♂.

Biology: List, 1932. Colo. Agr. Expt. Sta., Bul. 385: 59, 61-62. — Hammar, 1936. N. Y. State Agr. Expt. Sta., Tech. Bul. 240: 44-45.

washingtoni Girault. D. C.

Entedon washingtoni Girault, 1917 (1916). Insecutor Inscitiae Menstruus 4: 109. ♀.

Genus PARACRIAS Ashmead

Paracrias Ashmead, 1904. Carnegie Mus., Mem. 1: 343, 344, 510.

Type-species: *Paracrias laticeps* Ashmead. Orig. desig.

Euplectrentedon Girault, 1917. Speciosissima Genera Nova Eulophidorum, p. 3.

Type-species: *Euplectrentedon mirus* Girault. Orig. desig.

mirus (Girault). N. Y., Ohio, Iowa. Host: *Thysanocnemis* sp.

Euplectrentedon mirus Girault, 1917. Speciosissima Genera Nova Eulophidorum, p. 3. ♀.

Genus CHRYSONOTOMYIA Ashmead

Chrysotomia Ashmead, 1904. Carnegie Mus., Mem. 1: 344, 370.

Type-species: *Eulophus auripunctatus* Ashmead. Orig. desig.

auripunctata (Ashmead). Fla.; West Indies. Ecology: Develops as parasite in galls on

Coccolobus uvifera and *Pithecolobium*. Host: *Ctenodactylomyia watsoni* Felt.

Eulophus auripunctatus Ashmead, 1894. Linn. Soc. London, Jour., Zool. 25: 166. ♀.

Genus EMERSONOPSIS Girault

Emersonopsis Girault, 1917. Canad. Ent. 49: 110.

Type-species: *Entedon arizonensis* Ashmead. Orig. desig.

Revision: Girault, 1924. Insecutor Inscitiae Menstruus 12: 93.

arizonensis (Ashmead). N. Dak., Idaho, Utah, Ariz.

Entedon arizonensis Ashmead, 1888. Canad. Ent. 20: 103. ♀.

cupreicollis (Ashmead). Kans.

Entedon cupreicollis Ashmead, 1888. Kans. Agr. Expt. Sta., Bul. 3: App. p. VIII. ♀, ♂.

Genus NESOMYIA Ashmead

Nesomyia Ashmead, 1904. Carnegie Mus., Mem. 1: 344, 382.

Type-species: *Nesomyia albipes* Ashmead. Orig. desig.

cimbicis Brues. Wis. Host: *Cimber americana* Leach.

Nesomyia cimbicis Brues, 1909 (1908). Wis. Nat. Hist. Soc., Bul. 6: 162. ♀.

Biology: Girault, 1912. Ent. News 23: 81-82.

SUBFAMILY ELASMINAE

Taxonomy: Ferriere, 1947. Schweiz. Ent. Gesell., Mitt. 20: 567. — Compere, 1947. Bul. Ent.

Res. 38: 381. — Burks, 1965. Biol. Soc. Wash., Proc. 78: 201-202. — Riek, 1967. Austral. Jour. Zool. 15: 145.

Genus ELASMUS Westwood

Elasmus Westwood, 1833. London, Edinb. and Dublin Phil. Mag. and Jour. Sci. (3) 3: 343.

Type-species: *Eulophus flabellatus* Fonscolombe. Monotypic.

Aneure Nees, 1834. Hym. Ichn. Aff. Monog., v. 2, p. 194.

Type-species: *Aneure nuda* Nees. Desig. by Gahan and Fagan, 1923.

Cyclopleura Cameron, 1913 (1912). Indian Forest Rec. 4: 96.

Type-species: *Cyclopleura funipeennis* Cameron. Desig. by Gahan and Fagan, 1923.

Austelasmus Riek, 1967. Austral. Jour. Zool. 15: 148. N. syn.

Type-species: *Elasmus trifasciativentris* Girault. Orig. desig.

The original description of *Aneure* Nees does not at all sound like a characterization of *Elasmus*, or even of a chalcidoid. Peck, 1963. Canad. Ent. Sup. 30: 319 lists the synonymy of *Aneure* under *Elasmus* as questionable. This synonymy, however, dates from Foerster, 1856. Hym. Stud., v. 2, p. 72. A careful reading of Foerster shows that he speaks of *Anuere* with a confidence that could only have been achieved through his having studied the Nees type specimens. This synonymy should be accepted despite the description.

Revision: Girault, 1918. No. Amer. Hym. Elasmidae, Sydney, Austral, pp. 1-4. — Burks, 1965. Biol. Soc. Wash., Proc. 78: 201-207.

albicoxa Howard. N. J., D. C., N. C., Ind., Mo., Idaho. Host: *Callisto geminatella* (Pack.), *Coptodisca splendorifera* (Clem.), *Parornix* sp.

Elasmus albicoxa Howard, 1885. U. S. Dept. Agr., Bur. Ent. Bul. 5: 30. ♂.

Elasmus aspidiscae Girault, 1917 (1916). Insecutor Inscitiae Menstruus 4: 117. ♀.

Taxonomy: Burks, 1965. Biol. Soc. Wash., Proc. 78: 206.

albizziae Burks. N. J. s. to Va., w. to Kans. Host: *Homadaula anisocentra* (Meyrick).

Elasmus albizziae Burks, 1965. Biol. Soc. Wash., Proc. 78: 204-206. ♀.

Biology: Burks, 1971. Wash. Acad. Sci., Jour. 61: 195 (occurrence of male).

apanteli Gahan. Pa., N. C., Ohio, Ala., Wis., Ark., Sask., Wash., Oreg. Host: *Apanteles marginiventris* (Cress.), *Meteorus laphygmae* Vier., *Phobocampe pallipes* (Prov.), undet. *Campoplegini*.

Elasmus apanteli Gahan, 1913. U. S. Natl. Mus., Proc. 46: 438. ♀.

Biology: Vickery, 1915. Jour. Econ. Ent. 8: 391.

atratus Howard. N. H., Mass., Conn., D. C., Ohio, Wis., Oreg. Host: *Apanteles* sp., *A. delicatus* How., *A. hyphantriae* Riley, *A. melanoscelus* (Ratz.), *A. solitarius* (Ratz.), *Campoplex validus* (Cress.), *Hyposoter pilosulus* (Prov.), *Meteorus hyphantriae* Riley, *M. trachynotus* Vier., *Phobocampe pallipes* (Prov.).

borrowi Girault. D. C.

Elasmus borrowi Girault, 1917 (1916). Insecutor Inscitiae Menstruus 4: 117. ♀.

floridensis Girault. Fla.

Elasmus floridensis Girault, 1916. Soc. Ent. 31: 42. ♀.

maculatus Howard. Fla.; West Indies. Host: *Apanteles* spp.

Elasmus maculatus Howard, 1894. Linn. Soc. London, Jour., Zool. 25: 103. ♀.

marylandicus Girault. Conn., Md., N. C., Okla. Host: Lepidopterous larva in stem of *Ambrosia artemisiaefolia*.

Elasmus marylandicus Girault, 1915. Ent. Soc. Amer., Ann. 8: 281. ♀.

Biology: Schread et al., 1942. Conn. Agr. Expt. Sta., Bul. 461: 502.

meteori Ashmead. Fla., Ill., Iowa, Mo., Ark. Host: *Apanteles cauarsiae* Ashm., *Meteorus* sp., *M. vulgaris* (Cress.).

Elasmus meteori Ashmead, 1898. Ent. Soc. Wash., Proc. 4: 128. ♀, ♂.

Morphology: Burks, 1938. Ent. Soc. Amer., Ann. 31: 161 (wing venation).

mordax Girault. Md., D. C. Host: *Cameraria guttifinitella* (Clem.).

Elasmus mordax Girault, 1917 (1916). Insecutor Inscitiae Menstruus 4: 114. ♀.

nigripes Howard. N. J., Mo., Tex. Host: *Porphyrosela desmodiella* (Clem.).

Elasmus nigripes Howard, 1885. U. S. Dept. Agr., Bur. Ent. Bul. 5: 30. ♂.

Elasmus missouriensis Girault, 1917 (1916). Insecutor Inscitiae Menstruus 4: 117. ♀.

Taxonomy: Burks, 1965. Biol. Soc. Wash., Proc. 78: 206.

polistis Burks. Md., Ga., Pa., Tex. Host: *Polistes annularis* (Linn.), *P. exclamans* Vier., *P. fuscatus* (Fab.), *P. major* Beauv.

Elasmus polistis Burks, 1971. Wash. Acad. Sci., Jour. 61: 195. ♀, ♂.

pulex Girault. Md.

Elasmus pulex Girault, 1916. Soc. Ent. 31: 43. ♀.

Elasmus daedalus Girault, 1917. Descr. Hym. Chalcidoid. Variorum cum Observ. V, p. 8. ♀.

setosiscutellatus Crawford. Md. s. to Fla., w. to Wis., Kans., Ariz., and Calif.; Mexico. Host: *Apanteles* spp. on lepidopterous larvae.

Elasmus setosiscutellatus Crawford, 1910 (1909). Ent. Soc. Wash., Proc. 11: 206. ♀, ♂.

tischeriae Howard. N. J., D. C., Va., Kans. Host: *Tischeria solidaginifoliella* Clem.

Elasmus tischeriae Howard, 1885. U. S. Dept. Agr., Bur. Ent. Bul. 5: 30. ♀.

zigzag Girault. Fla.

Elasmus zigzag Girault, 1917. Descr. Stellarum Nov., p. 16. ♀.

UNPLACED SPECIES OF ELASMUS WESTWOOD

The following species were described from unassociated males and cannot at present be placed. See Burks, 1965. Biol. Soc. Wash., Proc. 78: 203.

Elasmus pullatus Howard, 1885. U. S. Dept. Agr., Bur. Ent. Bul. 5: 30. ♂.

Elasmus varius Howard, 1885. U. S. Dept. Agr., Bur. Ent. Bul. 5: 29. ♂.

Family MYMARIDAE

By B. D. BURKS

All members of this family are egg parasites. The mymarids are easily recognized as a distinct family, but their fundamental thoracic structure shows them to have been derived from the same stem that produced the present-day Eulophidae.

Revision: Girault, 1929. N. Amer. Hym. Mymaridae, pp. 6-27. —Debauche, 1949. Mus. Roy. Hist. Nat. Belg., Mem. 108: 1-248 (Palearctic fauna). —Debauche, 1949. Cong. Belg., Inst. Parcs Nat., Expl. Parc Nat. Albert, Miss. de Witte, 49: 1-105 (Ethiopian fauna). —Kryger, 1950. Ent. Meddel. 26: 1-97 (Palearctic fauna). —Annecke and Doutt, 1961. So. Afr. Dept. Agr., Tech. Ser., Ent. Mem. 5: 1-71 (World genera).

SUBFAMILY ALAPTINAE

TRIBE ANAGRINI

Genus ANAGRUS Haliday

Anagrus Haliday, 1833. Ent. Mag. 1: 346.

Type-species: *Ichneumon atomus* Linnaeus. Desig. by Westwood, 1840.

Pteratomus Packard, 1864. Essex Inst., Proc. 4: 137.

Type-species: *Pteratomus putnami* Packard. Monotypic.

Packardiella Ashmead, 1904. Carnegie Mus., Mem. 1: 364. N. name, unnecessarily proposed for *Pteratomus* Packard.

Paranagrus Perkins, 1905. Hawaii. Sugar Planters' Assn., Div. Ent. Bul. 1: 199.

Type-species: *Paranagrus optabilis* Perkins. Desig. by Gahan and Fagan, 1923.

armatus (Ashmead). Ont., Conn., and N. Y., s. to Fla., w. to Oreg. and Calif.; West Indies, South Amer., Hawaii, Australia. Host: *Delphacodes* sp., *Edwardsiana rosae* (L.), *Empoasca fabae* (Harr.), *Typhlocyba pomaria* McAtee.

Litus armatus Ashmead, 1887. Canad. Ent. 19: 193. ♀.

Eustochus xanthothorax Ashmead, 1887. Canad. Ent. 91: 193. ♀.

Anagrus columbi Perkins, 1905. Hawaii. Sugar Planters' Assn., Div. Ent. Bul. 1: 198. ♀.

Anagrus spiritus Girault, 1911. Ent. News 22: 207. ♀, ♂.

Taxonomy: Girault, 1911. Amer. Ent. Soc., Trans. 37: 277, 289.

Biology: Childs, 1918. Oreg. Agr. Expt. Sta., Bul. 148: 27.

delicatus Dozier. Ill., Calif.

Anagrus delicatus Dozier, 1936. Hawaii. Ent. Soc., Proc. 9: 177. ♀, ♂.

epos Girault. Pa., Md., Va., Fla., Ill., N. Mex., Calif. Host: *Edwardsiana prunicola* (Edw.), *Empoasca fabae* (Harr.), *Erythroneura comes* (Say), *E. plena* Beamer, *Typhlocyba pomaria* McAtee, *T. quercus* (F.).

Anagrus epos Girault, 1911. Amer. Ent. Soc., Trans. 37: 292. ♀, ♂.

Biology: Ackerman, 1919. U. S. Dept. Agr., Bul. 805: 28. —Mulla, 1956. Jour. Econ. Ent. 49: 438-441. —Mulla, 1957. Ent. Soc. Amer., Ann. 50: 85.

giraulti Crawford. Ga., Ala., Idaho, Utah, Calif. Host: *Arilus cristatus* (L.), *Circulifer tenellus* (Baker), *Homalodisca coagulata* (Say).

Anagrus giraulti Crawford, 1913. U. S. Natl. Mus., Proc. 45: 259. ♀, ♂.

Biology: Stahl, 1920. Jour. Agr. Res. 20: 250. — Henderson, 1941. U. S. Dept. Agr., Cir. 593: 2-10. — Turner and Pollard, 1959. U. S. Dept. Agr., Tech. Bul. 1188: 26-27.

nigriceps Girault, new status. Oreg., Calif. Host: *Edwardsiana prunicola* (Edw.), *E. rosae* (L.).
Anagrus armatus var. *nigriceps* Girault, 1915. Ent. Soc. Amer., Ann. 8: 276. ♀.

Biology: Mulla, 1956. Jour. Econ. Ent. 49: 438. — Mulla, 1957. Ent. Soc. Amer., Ann. 50: 86.

nigriiventris Girault, new status. Ont., Conn., s. to S. C., w. to Ill., N. Mex., Utah; New Zealand. Host: *Emoiasca fabae* (Harr.), *Typhlocyba pomaria* McAtee.

Anagrus armatus var. *nigriiventris* Girault, 1911. Amer. Ent. Soc., Trans. 37: 291. ♀.

Biology: Ackerman, 1919. U. S. Dept. Agr., Bul. 805: 28. — Armstrong, 1936. Ent. Soc. Ont., Ann. Rpt. 66: 17-22. — Dumbleton, 1937. New Zeal. Jour. Sci. and Technol. 18: 868. — Steiner, 1938. Conn. Pomol. Soc., Proc. 47: 23-25. — Steiner, 1938. Jour. Econ. Ent. 31: 233-240.

puella Girault. Ill., Colo.

Anagrus puella Girault, 1911. Amer. Ent. Soc., Trans. 37: 293. ♀, ♂.

putnamii Packard. Vt.

Pteratomus Putnamii Packard, 1864. Essex Inst., Proc. 4: 137. ♂.

Genus STETHYNIUM Enock

Stethynium Enock, 1909. Roy. Ent. Soc. London, Trans., 1909: 452.

Type-species: *Stethynium triclavatum* Enock. Monotypic.

annulatum Doutt. Calif.

Stethynium annulatum Doutt, 1947. Pan-Pacific Ent. 23: 152. ♀.

faunum Girault. Ill.

Stethynium faunum Girault, 1911. Amer. Ent. Soc., Trans. 37: 298. ♀, ♂.

TRIBE ALAPTINI

Genus ALAPTUS Westwood

Alaptus Westwood, 1839. Introd. Mod. Class. Ins., v. 2, p. 79.

Type-species: *Mymar minimus* Westwood. Orig. desig.

Parvulinus Mercet, 1912. Soc. Esp. Hist. Nat., Bol. 12: 331.

Type-species: *Parvulinus auranti* Mercet. Monotypic.

Metalaptus Malenotti, 1917. Redia 12: 339.

Type-species: *Metalaptus torquatus* Malenotti. Monotypic.

There has long been a difference of opinion as to the author of this genus and its type-species. They have been listed as *Alaptus* Haliday, with type-species as *Alaptus minimus* Haliday, *Mymar minimus* Walker, *Alaptus minimus* Walker or *Alaptus fusculus* Haliday. However, Annecke and Doutt, 1961 (So. Afr. Dept. Agri., Tech. Ser., Ent. Mem. 5: 8) are of the opinion that the information given by Westwood in his original citation of *Alaptus* and *Mymar minimus* validate him as author of both. This is the most reasonable of all the arguments that have been advanced in this matter.

Some members of this genus are the smallest known insects, being less than 200 microns in overall body length.

Taxonomy: Debauche, 1949. Cong. Belg., Inst. Parcs Nat., Expl. Parc Nat. Albert, Miss. de Witte, 49: 9.

auranti (Mercet). La.; Europe. Ecology: Originally thought to parasitize Coccidae, but actual hosts probably Psocoptera.

Parvulinus auranti Mercet, 1912. Soc. Esp. Hist. Nat., Bol. 12: 333. ♀.

Metalaptus torquatus Malenotti, 1917. Redia 12: 339. ♀, ♂.

Taxonomy: Mercet, 1917. Asoc. Esp. Prog. Ciencia. Cong. de Valladolid, 4: 367. — Cressman et al., 1935. Jour. Agr. Res. 50: 282.

- Biology: Dingler, 1923. Ztschr. f. Angew. Ent. 9: 236-239.
- caecilii** Girault. Maine, Fla., Ill., Calif. Host: *Caecilius aurantiacus* (Hag.), *C. manteri* Som., *Ectopsocus californicus* (Banks), *Psocus* sp.
Alaptus caecilii Girault, 1908. Ent. Soc. Amer., Ann. 1: 189. ♀, ♂.
- Taxonomy: Girault, 1910. N. Y. Ent. Soc., Jour. 18: 241-243. —Ferriere. 1930. Bul. Ent. Res. 21: 41-42.
- Biology: Sommerman, 1943. Ent. Soc. Wash., Proc. 45: 35.
- eriococci** Girault. Calif. Ecology: Parasite of psocids.
Alaptus eriococci Girault, 1908. Ent. Soc. Amer., Ann. 1: 191. ♀, ♂.
- globosicornis** Girault. Fla.; Hawaii, Australia. Host: *Liposcelis divinatorius* (Mull.), *Psocus* sp.
Alaptus globosicornis Girault, 1908. Ent. Soc. Amer., Ann. 1: 188. ♀.
- Taxonomy: Girault, 1911. Arch. f. Naturgesch. 77 (1) sup. 2: 132.
- iceriae** Riley. Ill., Calif. Ecology: Thought to parasitize *Icerya* sp.
Alaptus iceriae Riley, 1889. U. S. Dept. Agr., Ann. Rpt. for 1888, p. 86.
- Taxonomy: Girault, 1908. Ent. Soc. Amer., Ann. 1: 186. —Girault, 1910. N. Y. Ent. Soc., Jour. 18: 240-243.
- intonsipennis** Girault. Ill.
Alaptus intonsipennis Girault, 1910. N. Y. Ent. Soc., Jour. 18: 244. ♀.
- psocidivorus** Gahan. Calif. Ecology: Parasite of psocid eggs, probably *Ectopsocus californicus* Banks.
Alaptus psocidivorus Gahan, 1927. Pan-Pacific Ent. 3: 180. ♀, ♂.
- Biology: Spruyt, 1927. Pan-Pacific Ent. 3: 182-184.

Genus DICOPUS Enoch

- Dicopus* Enoch, 1909. Roy. Ent. Soc. London, Trans. 1909: 455.
 Type-species: *Dicopus minutissima* Enoch. Monotypic.

halitus Girault. Que.

- Dicopus halitus* Girault, 1911. Ent. News 22: 347. ♂.

SUBFAMILY MYMARINAE

TRIBE OOCTONINI

Genus ARESCON Walker

- Arescon* Walker, 1846. Ann. and Mag. Nat. Hist. 18: 49.
 Type-species: *Myrmar dimidiatus* Curtis. Monotypic.
- Panthus** Walker, 1846. Ann. and Mag. Nat. Hist. 18: 52.
 Type-species: *Panthus crassicornis* Walker. Desig. by Gahan and Fagan, 1923.
- Leimacis* Foerster, 1847. Linnaea Ent. 2: 208.
 Type-species: *Leimacis rufula* Foerster. Monotypic.
- Limacis* Foerster, 1856. Hym. Stud. v. 2, p. 120. Emend.
- Xenomyrmar* Crawford, 1913. U. S. Natl. Mus., Proc. 46: 343.
 Type-species: *Xenomyrmar urichi* Crawford. Orig. design.
- Neurotes* Enoch, 1914. Roy. Ent. Soc. London, Proc. 1913: xxxiv.
 Type-species: *Neurotes iridesceus* Enoch. Monotypic.
- aspidioticola** (Ashmead). Fla. Ecology: This parasite lays its egg beneath the female scale; the larva hatches and consumes the eggs contained in the body of the scale. It then pupates, and the adult chews a hole in the scale to escape. Host: *Lepidosaphes beckii* (Newm.), *L. gloverii* (Pack.).
- Aphelinus aspidioticola* Ashmead, 1879. Canad. Ent. 11: 159. ♀.
- Taxonomy: Howard, 1885. U. S. Dept. Agr., Div. Ent. Bul. 5: 43 (Mymarinæ). —Girault, 1911. Arch. f. Naturgesch. 77 (1) Sup. 2: 132 (types lost). —Mercet, 1912. Mus. Nac. Cien. Nat. Madrid, Trab. 10: 95 (genus ?).

Biology: Ashmead, 1880. Orange Insects, pp. 7-9. — Hubbard, 1885. U. S. Dept. Agr., Insects Affecting the Orange, pp. 24, 70.

Genus GONATOCERUS Nees

Gonatocerus Nees, 1834. Hym. Ichn. Affin. Monog., v. 2, p. 192.

Type-species: *Gonatocerus longicornis* Nees. Monotypic.

Lymaenon Walker, 1846. Ann. and Mag. Nat. Hist. 18: 49.

Type-species: *Lymaenon acuminatus* Walker. Desig. by Gahan and Fagan, 1923.

Rachistus Foerster, 1847. Linnaea Ent. 2: 203.

Type-species: *Octonus litoralis* Haliday. Desig. by Gahan and Fagan, 1923.

Rhachistus Dalla Torre, 1898. Cat. Hym., v. 5, p. 429. Emend.

Oophilus Enock, 1909. Roy. Ent. Soc. London, Trans. 1909: 458.

Type-species: *Oophilus longicauda* Enock. Monotypic.

Agonatocerus Girault, 1913. Canad. Ent. 45: 276.

Type-species: *Agonatocerus humboldti* Girault. Orig. desig.

Gonatoceroides Girault, 1913. Entomologist 46: 255.

Type-species: *Gonatoceroides australica* Girault. Orig. desig.

Kryger, 1934 (Ent. Meddel. 18: 503-505) published a paper stating that *Gonatocerus* Nees was not a mymarid, but a chalcidid. Nees' type was destroyed many years ago, so this conclusion was based on a reading of the original description of the genus. The next available name for this genus being *Lymaenon* Walker, numerous authors used it. However, a more careful rereading of Nees' discursive but reasonably exact description of *Gonatocerus* by some later authors led them to the conclusion that Kryger had been mistaken. The characters Nees gives are certainly those of a mymarid. Soyka, 1946 (Zentbl. Gesammtgeb. Ent. 1: 36) first published this correction, and others published it subsequently. Consequently the name *Lymaenon* was widely used for this genus for only about 10 years.

americanus Brues. Wis.

psallidis Gahan. S. C., Miss., Ark., La., Tex., Ariz., Calif. Host: *Psallus seriatus* (Reut.).
Erythmelus psallidis Gahan, 1937. Ent. Soc. Wash., Proc. 39: 268. ♀, ♂.

Biology: Strong, 1938. U. S. Dept. Agr., Bur. Ent. and P. Q., Ann. Rpt. for 1938, p. 52.
 — Ewing and Crawford, 1939. Jour. Econ. Ent. 32: 303-305.

Genus ANAPHES Haliday

Anaphes Haliday, 1833. Ent. Mag. 1: 269, 346.
 Type-species: *Ichneumon punctum* Shaw. Desig. by Internat'l. Comm. Zool.
 Nomencl. Opinion 729, 1965.
Clinomyrmar Kieffer, 1913. Soc. Agr. Alger., Bul. 4: 100.
 Type-species: *Clinomyrmar peyerimhoffi* Kieffer. Orig. desig.
Stammeriella Soyka, 1950. Ent. Nachr. Burgdorf 3: 120.
 Type-species: *Stammeriella wolfsthalii* Soyka. Orig. desig.
Synanaphes Soyka, 1946. Zentbl. Gesamtgeb. Ent. 1: 181.
 Type-species: *Synanaphes ranalteri* Soyka. Orig. desig.
Ferrievella Soyka, 1946. Zentbl. Gesamtgeb. Ent. 1: 182.
 Type-species: *Ferrievella neoprantensis* Soyka. Orig. desig.

Gahan, 1949 (Wash. Acad. Sci., Jour. 39: 204-205) published a paper about *Anaphes* and *Mymar* in which he changed the application these names had had in literature for about a century. As a result, these names were used in the sense he advocated in the 1951 Hymenoptera Catalog, its First Supplement, and Peck's 1963 catalog. However, Hincks, 1952 (Soc. Brit. Ent., Trans. 11: 163) had proposed submitting this matter to the Internat'l. Comm. on Zool. Nomencl., requesting that traditional usage be restored. Annecke and Doutt, 1963 (Bul. Zool. Nomencl. 20: 134-136) formally submitted a petition to the Commission requesting the restoration of traditional usage.

This was approved in Opinion 729, 1965.

alaskae Annecke and Doutt. Alaska.

Anaphes alaskae Annecke and Doutt, 1961. So. Afr. Dept. Agr., Tech. Ser., Ent. Mem. 5:
 47. ♀, ♂.

anomocerus Girault. Tex., Ariz. Host: *Psallus seriatus* (Reut.).

Anaphes iole anomocerus Girault, 1929. No. Amer. Hym. Mymaridae, p. 13. ♂.

Biology: Strong, 1938. U. S. Dept. Agr., Bur. Ent. and P. Q., Ann. Rpt. for 1938, p. 52.

Family TRICHOGRAMMATIDAE

By B. D. BURKS

All members of this family are parasites in the eggs of other insects. Their thoracic structures show them to have affinities with the Eulophidae, but they must have diverged from the eulophid stem at some remote time in chalcidoid evolution. Since all trichogrammatids have 3-segmented tarsi, lack the strigil of the foretibia, have greatly reduced antennae, never have the abdomen petiolate, and the forewing usually bears characteristic lines of cilia, they are widely separated from their nearest relatives in the Eulophidae.

Taxonomy: Kryger, 1918. Ent. Meddel. 12: 257-354 (European spp.). —Mani, 1938. Cat. Indian Insects, pt. 23, pp. 133-141 (bibliography and cat. of Indian spp.). —Kloete and Hincks, 1945. Check List Brit. Insects, Arboath, Scotland, p. 303 (list Brit. spp.).

Genus OLIGOSITA Walker

Oligosita Walker, 1851. Ann. and Mag. Nat. Hist. (2)7: 212-213. (Cited as Haliday MS.)

Type-species: *Oligosita collina* Walker. Monotypic.

Westwoodella Ashmead, 1904. Carnegie Mus., Mem. 1: 359.

Type-species: *Oligosita subfasciata* Westwood. Monotypic.

Paroligosita Kurdjumov, 1911. Russ. Ent. Obozr. 11: 434.

Type-species: *Paroligosita bella* Kurdjumov. Orig. desig.

Pseudoligosita Girault, 1913. Queensland Mus., Mem. 2: 104.

Type-species: *Pseudoligosita arnoldi* Girault. Orig. desig.

Zorontogramma Silvestri, 1915. Lab. Zool. Agr. Portici, Bol. 9: 327.

Type-species: *Zorontogramma distinctum* Silvestri. Orig. desig.

americana Girault. Ind. and Ill., s. to S. C., Ga., Tex., and N. Mex. Host: *Dorycephalus platyrhynchus* Osb., *Homalodisca insolita* (Walk.), cicadellid eggs in grasses.

Oligosita americana Girault, 1909. Psyche 16: 106. ♀.

Taxonomy: Girault, 1911. Amer. Ent. Soc., Trans. 37: 56-62.

clarimaculosa (Girault). Va., Ill.

Westwoodella clarimaculosa Girault, 1911. Amer. Ent. Soc., Trans. 37: 67. ♀.

comosipennis (Girault). N. Y.

Westwoodella comosipennis Girault, 1911. Amer. Ent. Soc., Trans. 37: 66. ♀.

marilandia Girault. Md.

Oligosita marilandia Girault, 1917. Chalcidoid. nova Marilandensis II, p. 1. ♀.

plebeia (Perkins). Okla.; Mexico. Host: Cicadellid eggs in cane.

Westwoodella plebeia Perkins, 1912. Hawaii. Sugar Planters' Assoc. Expt. Sta., Div. Ent. Bul. 10: 16. ♀.

sanguinea (Girault). Conn. w. to N. Dak., s. to Fla., Ariz., Calif.; Mexico and Brazil Host: Cicadellid eggs in wheat, grasses, and clover.

Westwoodella sanguinea Girault, 1911. Amer. Ent. Soc., Trans. 37: 58-62. ♀, ♂.

Oligosita sanguinea var. *claripes* Girault, 1916. Ent. News 27: 4. ♀.

subfasciatipennis (Girault). Vt., Wis., Iowa, N. Dak., Wash. Host: Cicadellid eggs in wheat.

Westwoodella subfasciatipennis Girault, 1911. Amer. Ent. Soc., Trans. 37: 63-66.

Genus MEGAPHRAGMA Timberlake

Megaphragma Timberlake, 1924. Hawaii. Ent. Soc., Proc. 5: 413.

Type-species: *Megaphragma mymaripenne* Timberlake. Monotypic.

Sethosiella Kryger, 1932. Soc. Ent. d'Egypte, Bul. p. 38.

Type-species: *Sethosiella priesneri* Kryger. Monotypic.

Members of this genus, being parasites in thrips eggs, are thought to be the smallest of all insects. Some specimens have an overall body length of only 170 or 180 microns. However, some of the mymarids of the genus *Alaptus* Haliday have a body length of only 200 microns and are much more slender, so that it is difficult to decide which is actually the smaller.

Revision: Ghesquiere, 1939. Rev. Zool. Bot. Africaines 33: 39.

mymaripenne Timberlake. La., Calif.; Hawaii; Haiti. Host: Eggs of *Heliothrips haemorrhoidalis* Bouche and *Leucothrips* sp.

Megaphragma mymaripenne Timberlake, 1924. Hawaii. Ent. Soc., Proc. 5: 413. ♀.

Biology: Dozier, 1932. Ent. Soc. Wash., Proc. 34: 29-30.

Genus HYDROPHYLITA Ghesquiere

Hydrophylax Matheson and Crosby, 1912. Ent. Soc. Amer., Ann. 5: 65. Preocc. by Fitzinger, 1843.

Type-species: *Hydrophylax aquivolans* Matheson and Crosby. Monotypic.

Hydrophylita Ghesquiere, 1946. Rev. Zool. Bot. Africaines 39: 371. N. name.

Lutzimicron Costa Lima, 1960. São Paulo Inst. Biol. Arq. 27: 197.

Type-species: *Lutzimicron lestesi* Costa Lima. Monotypic.

Taxonomy: DeSantis, 1964. Comision inv. Cient. Prov. B. A., Notas 2(3): 3-5. —Doutt and Viggiani, 1968. Calif. Acad. Sci., Proc. (4) 35: 493.

aquivolans (Matheson and Crosby). N. Y., Ohio, Kans. Host: Eggs of *Ischnura verticalis* (Say).

Hydrophylax aquivolans Matheson and Crosby, 1912. Ent. Soc. Amer., Ann. 5: 65. ♂, ♀.

Biology: Davis, 1962. Limnol. and Oceanog. 7: 390-392.

Genus PARACENTROBIA Howard

Paracentrobia Howard, 1897. Linn. Soc. London, Jour., Zool. 26: 178.

Type-species: *Paracentrobia punctata* Howard. Monotypic.

Abbella Girault, 1911. Amer. Ent. Soc., Trans. 37: 9.

Type-species: *Abbella subflava* Girault. Orig. desig.

Ittys Girault, 1911. Amer. Ent. Soc., Trans. 37: 25.

Type-species: *Trichogramma cerasarum* Ashmead. Monotypic.

Brachistella Girault, 1911. N. Y. Ent. Soc., Jour. 19: 184.

Type-species: *Trichogramma acuminata* Ashmead. Monotypic.

Jassidophthora Perkins, 1912. Hawaii. Sugar Planters' Assoc. Expt. Sta., Div. Ent. Bul. 10: 17.

Type-species: *Jassidophthora prima* Perkins. Monotypic.

Abbellisca Ghesquiere, 1946. Rev. Zool. Bot. Africaines 39: 371. N. name, unnecessarily proposed.

Taxonomy: Doutt and Viggiani, 1968. Calif. Acad. Sci., Proc. (4) 35: 562.

acuminata (Ashmead). N. Y. and Minn. s. to Fla., La., Tex., and Calif.; Mexico, West Indies.

Host: *Lestes dryas* Kirby, *L. unguiculatus* Hagen, *Cuerna costalis* (Fab.).

Draeculacephala minor (Walk.), *D. mollipes* (Say), *D. portola* (Ball), *Homalodisca insolita* (Walk.). There is some evidence that a complex of species is at present under this one name.

Trichogramma acuminatum Ashmead, 1888. Canad. Ent. 20: 107. ♀, ♂.

Brachista pallida Ashmead, 1900. Ent. News 11: 616. ♀.

Biology: Gibson, 1915. U. S. Dept. Agr., Bul. 254: 14. —Turner and Pollard, 1959. U. S. Dept. Agr., Tech. Bul. 1188: 26-27.

americana (Girault). Utah. Host: Cicadellid eggs in *Elymus*.

Abbella americana Girault, 1917. U. S. Natl. Mus., Proc. 53: 445. ♀, ♂.

auriscutellum (Girault). Ariz.; Mexico. Host: *Draeculacephala mollipes* (Say).

Abbella auriscutellum Girault, 1916. Ent. News 27: 4. ♀.

Biology: Gibson, 1915. U. S. Dept. Agr., Bul. 254: 14.

ceresarum (Ashmead). N. S., N. J., Ohio, Ill., Calif. Host: *Ceresa borealis* Fairm., *C. bubalus* (Fab.), *C. taurina* (Fitch), *Stictocephala inernis* (Fab.).

Trichogramma cesarum Ashmead, 1888. Canad. Ent. 20: 107. ♀.

livii (Girault). Md.

Neobrachistella livii Girault, 1918. No. Amer. Hym. Trichogrammatidae, Sydney, Austral., p. 11. ♀.

nymphia (Girault). Tex. Host: Cicadellid eggs in stems of *Ambrosia*; eggs of *Psallus seriatus* (Reuter).

Abbella nymphia Girault, 1911. Entomologist 44: 197. ♀.

perditrix (Gahan). Ariz. Host: *Stictocephala festina* (Say).

Abbella (Ittys) perditrix Gahan, 1918. Ent. Soc. Wash., Proc. 20: 25. ♀, ♂.

prima (Perkins). Fla., Tex.; Mexico. Host: Cicadellid eggs in cane.

Jassidophthora prima Perkins, 1912. Hawaii. Sugar Planters' Assoc. Expt. Sta., Div. Ent. Bul. 10: 18. ♀, ♂.

subflava (Girault) D. C., S. C., Ill., Kans., S. Dak., Idaho, Wash., Calif.; Mexico, Argentina, Australia. Host: *Blissus leucopterus* (Say) (?), *Balclutha impicta* (Van Duzee), *Circulifer tenellus* (Baker), *Deltoccephalus minutus* Van Duzee, *D. sonorus* Ball, *Empoasca solana* De Long, *Halticus bracteatus* (Say). The conspecificity of the North American and Australian specimens of this species should be reinvestigated, even though the identifications of both were made by the author of this species. A careful reading of the paper by McColloch and Yuasa, cited below, shows that the record of *subflava* from the eggs of the chinch bug is either incorrect or fortuitous.

Abella subflava Girault, 1911. Amer. Ent. Soc., Trans. 37: 11. ♀, ♂.

Biology: McColloch and Yuasa, 1915. Ent. News 26: 147-148. —Stahl, 1920. Jour. Agr. Res. 20: 250. —Henderson, 1941. U. S. Dept. Agr., Cir. 593: 1-18. —Henderson, 1955. U. S. Dept. Agr., Cir. 967: 1-16. —Flock et al., 1962. Jour. Econ. Ent. 55: 279.

Genus UFENS Girault

Ufens Girault, 1911. Amer. Ent. Soc., Trans. 37: 32.

Type-species: *Trichogramma nigrum* Ashmead. Orig. desig.

Ufensia Girault, 1913. Queensland Mus., Mem. 2: 101.

Type-species: *Ufensia pretiosa* Girault. Orig. desig. Genus redescribed the following year with the same type-species in Ent. Soc. Wash., Proc. 16: 118.

Neocentrobia Blood, 1923. Bristol Nat. Soc., Ann. Rpt. and Proc. 2: 101. Nom. nud.

Neocentrobia Blood and Kryger, 1928. Ent. Meddel. 16: 203. Preocc. by Girault, 1912.

Type-species: *Neocentrobia hirticornis* Blood and Kryger. Orig. desig.

Stephantheisa Soyka, 1931. Naturh. Maandbl. 20: 111.

Type-species: *Stephantheisa vitoldi* Soika. Monotypic.

Grantanna Girault, 1939. Ohio Jour. Sci. 39: 324. N. name for *Neocentrobia*.

Taxonomy: Doutt and Viggiani, 1968. Calif. Acad. Sci., Proc. (4) 35: 576.

beneficus Dozier. Tex.; Mexico, West Indies. Host: Orthopterous eggs, probably of Tettigoniidae, deposited on leaf surfaces.

Ufens beneficus Dozier, 1932. Ent. Soc. Wash., Proc. 34: 33. ♀, ♂.

niger (Ashmead). Del., Md., w. to Ohio, Ill., Idaho, and Wash., s. to Fla., La., Tex., and Calif.; Mexico, West Indies. Host: *Colladonus geminatus* (Van Duzee), *Cuerna costalis* (Fab.), *Keonollo confluens* (Uhler), *Draeculacephala mollipes* (Say), *Homalodisca* sp., *Saccharosydne saccharivora* (Westw.). This may represent a complex of species.

Trichogramma nigrum Ashmead, 1888. Canad. Ent. 20: 107. ♀.

spiritus Girault. Md., Ga., Fla., La. Host: *Homalodisca coagulata* (Say), *Oncometopia orbona* (Fab.).

Ufens spiritus Girault, 1918. No. Amer. Hym. Trichogrammatidae, Sydney, Austral., p. 6.

Ufens spiritus americanus Girault, 1918. No. Amer. Hym. Trichogrammatidae, Sydney, Austral., p. 6.

Genus BRACHYUFENS Viggiani

Brachyufens Viggiani, 1968. In Doutt and Viggiani, Calif. Acad. Sci., Proc., (4) 35: 566.

Type-species: *Ufens osborni* Dozier. Orig. desig.

osborni (Dozier). Fla.; West Indies. Host: *Diaprepes* spp., *Pachnaeus litus* (Germ.). This may be a secondary parasite.

Ufens osborni Dozier, 1932. Ent. Soc. Wash., Proc. 34: 36. ♀, ♂.

Biology: Tucker, 1936. Barbados Agr. Jour. 5: 9. —Baranowski, 1960. Fla. Ent. 43: 197.

Genus ZAGELLA Girault

Zagella Girault, 1918. No. Amer. Trichogrammatidae, Sydney, Austral., pp. 2, 7.

Type-species: *Paracentrobia flavipes* Girault. Orig. desig.

Burksiella De Santis, 1957. La Plata Univ. Nac, Facultad de Cien. Nat. y Mus., Notas de Mus. 19: 133.

Type-species: *Burksiella subannulata* De Santis. Orig desig.

Taxonomy: Doutt and Viggiani, 1968. Calif. Acad. Sci., Proc. (4) 35: 572.

flavipes (Girault). D. C., Ga., Calif. Host: *Lestes* sp., lepidopterous eggs.

Paracentrobia flavipes Girault, 1905. Ent. News 16: 287. ♀, ♂.

Genus TRICHOGRAMMA Westwood

Trichogramma Westwood, 1833 (June). London, Edinb. and Dublin Phil. Mag. and Jour.

Sci. (3) 2: 444.

Type-species: *Trichogramma evanescens* Westwood. Monotypic.

Calleptiles Haliday, 1833 (July). Ent. Mag. 1: 340.

Type-species: *Calleptiles latipennis* Haliday. Monotypic.

Pentarthron Packard, 1872 (1871). Rec. Amer. Ent., p. 8.

Type-species: *Trichogramma ? minuta* Riley. Monotypic.

Trichogramma subg. *Aprobosca* Westwood, 1878. Linn. Soc. London, Trans., Zool., (2) 1: 592.

Type-species: *Trichogramma (Aprobosca) erosicornis* Westwood. Monotypic.

Oophthora Aurivillius, 1898 (1897). Ent. Tidskr. 18: 250.

Type-species: *Oophthora semblidis* Aurivillius. Monotypic.

Pentarthrum Dalla Torre, 1898. Cat. Hym., v. 5, p. 3. Emend.

Xanthoatomus Ashmead, 1904. Carnegie Mus., Mem. 1: xi, 360.

Type-species: *Xanthoatomus albipes* Ashmead. Orig. desig.

Neotrichogramma Girault, 1911. Amer. Ent. Soc., Trans. 37: 38-39.

Type-species: *Neotrichogramma acutiventre* Girault. Orig. desig.

Trichogramma subg. *Trichogrammatana* Girault, 1932. New lower Hymenoptera from Australia and India, Brisbane, Austral., p. 1.

Type-species: *Trichogramma singularis* Girault. Monotypic.

The latest revision of this genus was published in 1960. Although it was a very great improvement over the 1918 revision, it left most workers unsatisfied. At present other revisional works are in progress, and new papers revising *Trichogramma* may be published at about the time this catalog appears. Several undescribed species from North America are at present known to be in manuscript. Fundamental studies are also currently being made on the genetics, hybridization, male genitalia, and biologies of the described species of *Trichogramma*. Consequently, the arrangement of the species in this catalog is provisional.

Due to the fact that much of the older literature on biology cannot now be assigned to individual species as they are listed in this catalog, a large part of the biological literature on *Trichogramma* that was published before 1960 has been omitted. This literature is cited in full elsewhere; see Peck, 1963. Canad. Ent., Sup. 30: 51-73.

Any species of this genus can be reared in the laboratory or insectary on the eggs of almost any convenient host, although Salt, 1938. Bul. Ent. Res. 29: 223-246 showed that a few insect eggs may be physically or chemically unsuitable. The true host specificity for *Trichogramma* in nature seems to be to appropriate insect eggs that are deposited in particular environmental niches rather than simply to the eggs of particular host species. Consequently, host species are not listed here for the species of *Trichogramma*, but their ecological requirements, as far as they are known, are indicated.

minutum Riley. S. Canada, U. S. except for most southern and southwestern areas. Ecology: Insect eggs deposited in arboreal habitats are parasitized.

Trichogramma minutum Riley, 1871. Mo. State Bd. Agr., Ann. Rpt. 6: 157.

Taxonomy: Flanders, 1953. Ent. Soc. Amer., Ann. 46: 85. —Quednau, 1960. Biol. Bund. fur Land- u. Forstwirtsch., Mitt. 100: 11-50. —Nagarkatti and Nagaraja, 1971. Bul. Ent. Res. 61: 21, 23.

Biology: Langston, 1957. Univ. Calif. Publ., Ent. 14: 25-26. —Downey, 1958 (1957). Ill. State Acad. Sci., Trans. 50: 299. —Schaffner, 1959. U. S. Dept. Agr., Misc. Pub. 767: 81. —Glass, 1963. Ent. Soc. Amer., Ann. 56: 564. —Kulman, 1965. Ent. Soc. Amer., Ann. 58: 241-243. —Flanders, 1968. Ent. Soc. Amer., Ann. 61: 1122-1124. —Oatman *et al.*, 1970. Ent. Soc. Amer., Ann. 63: 633-635. —Fazalludin and Nagarkatti, 1971. Ent. Soc. Amer., Ann. 64: 1470-1471.

pretiosum Riley. S. Canada, U. S. except most southern and southwestern areas. Ecology: Insect eggs deposited on herbaceous vegetation in campestral habitats are parasitized.

Trichogramma pretiosa Riley, 1879. Canad. Ent. 11: 161. ♀, ♂.

Taxonomy: Flanders, 1953. Ent. Soc. Amer., Ann. 46: 85. —Flanders, 1968. Ent. Soc. Amer., Ann. 61: 1122-1124. —Orphanides and Gonzalez, 1970. Ent. Soc. Amer., Ann. 63: 1784-1785. —Nagarkatti and Nagaraja, 1971. Bul. Ent. Res. 61: 24-25.

Biology: Oatman, 1966. Jour. Econ. Ent. 59: 831. —Orphanides and Gonzalez, 1970. Ent. Soc. Amer., Ann. 63: 1734-1740. —Oatman *et al.*, 1970. Ent. Soc. Amer., Ann. 63: 633-635. —Orphanides and Gonzalez, 1971. Ent. Soc. Amer., Ann. 64: 824-834. —Fazalludin and Nagarkatti, 1971. Ent. Soc. Amer., Ann. 64: 1470-1471. —Oatman and Platner, 1971. Jour. Econ. Ent. 64: 501-506.

retorridum (Girault). Iowa s. to no. New Mexico, w. to Great Basin and Pacific Coast Range in Central Calif. Ecology: Insect eggs deposited in dry, but not arid, environments are parasitized.

Pentarthron retorridum Girault, 1911. Amer. Ent. Soc., Trans. 37: 52. ♀, ♂.

Taxonomy: Quednau, 1960. Biol. Bund. fur Land- u. Forstwirtsch., Mitt. 100: 11-50.
—Nagarkatti and Nagaraja, 1971. Bul. Ent. Res. 61: 25-27.

Biology: Webster, 1912. Jour. Econ. Ent. 5: 335-336. —Stern and Atallah, 1965. Ent. Soc. Amer., Ann. 58: 76-81. —Orphanides and Gonzalez, 1971. Ent. Soc. Amer., Ann. 64: 824-834.

semblidis (Aurivillius). Canada and No. U. S.; Europe. Ecology: Insect eggs deposited in aquatic or semi-aquatic habitats are parasitized. In nature this species parasitizes the eggs of such insects as *Chrysops*, *Tabanus*, *Sialis*, and *Chauliodes* that occur in an aquatic habitat. When it is reared in the insectary on such hosts as the eggs of *Ephestia* the progeny are so different they would be taken for another species were their derivation not known.

Oophthora semblidis Aurivillius, 1897. Ent. Tidskr. 18: 253. ♀, ♂.

Taxonomy: Quednau, 1960. Biol. Bund. fur Land- u. Forstwirtsch., Mitt. 100: 11-50.
—Kolomiets, 1962. Akad. Nauk SSSR Sibirskoi Otdel. Biol. Inst., p. 134. —Nagarkatti and Nagaraja, 1971. Bul. Ent. Res. 61: 26-27.

UNPLACED SPECIES OF TRICHOGRAMMA WESTWOOD

The following species have for many years been listed as synonyms of *minutum* Riley. Now that *minutum* itself is being redefined, all its synonyms must be re-evaluated.

Trichogramma minutissimum Packard, 1881. Boston Soc. Nat. Hist., Proc. 21: 37. ♀, ♂.

Trichogramma odontotae Howard, 1885. Ent. Amer. 1: 117. ♀, ♂.

Trichogramma intermedium Howard, 1889. In Scudder, Butterflies of Eastern U. S. and Canada, pp. 1872, 1895. ♀, ♂.

Xanthoatomus albipes Ashmead, 1904. Carnegie Mus., Mem. 1: xi, 360. ♀.

Trichogramma pretiosa var. *nigra* Girault, 1906. Canad. Ent. 38: 82. ♀, ♂.

Trichogramma helochareae Perkins, 1907. Hawaii. Sugar Planters' Assoc. Expt. Sta., Div. Ent. Bul. 4: 58. (Probably not *Trichogramma*).

Genus TRICHOGRAMMATOMYIA Girault

Trichogrammatomyia Girault, 1916. Canad. Ent. 48: 268.

Type-species: *Trichogrammatomyia tortricis* Girault. Orig. desig.

tortricis Girault. Ont., N. B., Conn., N. Y. Host: *Archips argyrospilus* (Wlk.), *A. cerasivoranus* (Fitch).

Trichogrammatomyia tortricis Girault, 1916. Canad. Ent. 48: 268. ♀, ♂.

Biology: Baird, 1918. Agr. Gaz. Canada 5: 766, 771. —Chapman, Pearce, and Avens, 1941. Jour. Econ. Ent. 34: 643-644.

Genus POROPOEA Foerster

Poropoea Foerster, 1851. Naturh. Ver. Rheinlande, Verh. 8: 28.

Type-species: *Poropoea stollwerckii* Foerster. Monotypic.

Poropoea subg. *Poropoeoides* Nowicki, 1936. Ztschr. f. Angew. Ent. 23: 125.

Type-species: *Poropoea (Poropoeoides) bohemica* Nowicki. Monotypic.

attelaborum Girault. S. E. U. S.; Puerto Rico. Host: *Attelabus analis* Illiger.

Poropoea attelaborum Girault, 1911. Amer. Ent. Soc., Trans. 37: 68. ♂.

Genus XENUFENS Girault

Xenufens Girault, 1916. Ent. News 27: 5.

Type-species: *Xenufens ruskini* Girault. Monotypic.

ruskini Girault. Fla.; Cuba. Host: *Calpodes ethlius* (Stoll), *Lerema accius* (A. and S.), *Preneus nero* (Fab.), *Urbanus proteus* (L.), undet. Hesperiidae eggs.

Xenufens ruskini Girault, 1916. Ent. News 27: 6.

Genus GIRAULTIOLA Nowicki

Giraultiola Nowicki, 1936. Ztschr. f. Angew. Ent. 23: 136.

Type-species: *Brachysticha fidiae* Ashmead. Monotypic. This species has been considered also to be the type-species of *Brachista* Walker, 1851, by subsequent

reference of Ashmead, 1894; see Gahan and Fagan, 1923. U. S. Natl. Mus. Bul. 124: 23. Nowicki, 1936, rejects this and designates *fidae* type-species of his new genus, but does so on the basis of very weak arguments. Doutt and Viggiani, 1968, accept Nowicki's action, however, in order to preserve *Brachista* as usage dictates; that is, with *B. pungens* (Mayr) as type-species. *Brachista* in that sense does not occur in North America.

Taxonomy: Nowicki, 1936. Ztschr. f. Angew. Ent. 23: 127, 136. — Doutt and Viggiani, 1968. Calif. Acad. Sci., Proc. (4) 35: 497, 552.

fidae (Ashmead). Pa., Va., Ohio. Host: *Magicicada septendecim* (L.); *Fidia viticida* Walsh. *Brachysticha fidae* Ashmead, 1894. Cincinnati Soc. Nat. Hist., Jour. 17: 171. ♀.
Lathromeris cicadae Howard, 1898. Canad. Ent. 30: 102. ♀, ♂.

Biology: Johnson and Hammar, 1910. U. S. Dept. Agr., Bur. Ent. Bul. 89: 51, 56-57. — Marlatt, 1898. U. S. Dept. Agr., Bur. Ent. Bul. 14(n. s.): 99. — Hyslop, 1936. Jour. Econ. Ent. 29: 676.

Genus TUMIDICLAVA Girault

Tumidiclava Girault, 1911. Amer. Ent. Soc., Trans. 37: 6.

Type-species: *Tumidiclava pulchrinotum* Girault. Orig. desig.

Orthonevra Blood and Kryger, 1928. Ent. Medd. 16: 211. Preocc. by Macquart, 1829.

Type-species: *Orthoneura bimaculata* Blood and Kryger. Orig. desig.

Orthoneurella Blood and Kryger, 1929. Ent. Medd. 16: 322. N. name.

pulchrinotum Girault. Fla., Ill., La. Host: Eggs of Tettigoniidae.

Tumidiclava pulchrinotum Girault, 1911. Amer. Ent. Soc., Trans. 37: 8. ♀.

Genus ZAGA Girault

Zaga Girault, 1911. Amer. Ent. Soc., Trans. 37: 30.

Type-species: *Zaga latipennis* Girault. Orig. desig.

latipennis Girault. Del., Va., Ill., La., Idaho, Utah. Host: Eggs of *Entylia sinuata* (Fab.), undet. membracid eggs.

Zaga latipennis Girault, 1911. Amer. Ent. Soc., Trans. 37: 31. ♀.

Genus APHELINOIDEA Girault

Aphelinoidae Girault, 1911. Amer. Ent. Soc., Trans. 37: 2.

Type-species: *Aphelinoidea semifuscipennis* Girault. Orig. desig.

Lathromeroidea Girault, 1913. Ent. News 24: 211.

Type-species: *Lathromeroidea longicorpus* Girault. Orig. desig.

Diaclava Blood and Kryger, 1928. Ent. Medd. 16: 213.

Type-species: *Diaclava waterhousei* Blood and Kryger. Orig. desig.

Kryggeriola Nowicki, 1934. Polski Pismo Ent. 12: 3.

Type-species: *Kryggeriola dolichoptera* Nowicki. Monotypic.

Thalesanna Girault, 1938. Rev. de Ent. 8: 80.

Type-species: *Aphelinoidea nigrioculae* Girault. Orig. desig.

Lathromeroidea subg. *Lengerkeniola* Nowicki, 1946. Zentbl. Gesamtgeb. Ent. 1: 45.

Type-species: *Lengerkeniola bischoffi* Nowicki. Monotypic.

Encyrtogramma De Santis, 1957. La Plata Univ. Nac., Facultad de Cien. Nat. y Mus., Notas del Mus. 19: 33.

Type-species: *Encyrtogramma habros* De Santis. Orig. desig.

Tanygramma De Santis, 1957. La Plata Univ. Nac., Facultad de Cien. Nat. y Mus., Notas del Mus. 19: 37.

Type-species: *Tanygramma xiphias* De Santis. Orig. desig.

Taxonomy: Doutt and Viggiani, 1968. Calif. Acad. Sci., Proc. (4) 35: 527.

neomexicana (Girault). Iowa, N. Dak., Mont., N. Mex., Idaho, Calif. Host: Undet. hemipterous eggs in grasses.

Lathromeroidea neomexicanus Girault, 1916. Ent. News 27: 5. ♀.

plutella Girault. Va., Ill., Tex., N. Mex., Idaho, Utah, Ariz., Calif.; Mexico. Host: *Circulifer tenellus* (Baker).

Aphelinoidea plutella Girault, 1912. Ent. News 23: 296. ♀, ♂.

Biology: Henderson, 1941. U. S. Dept. Agr., Cir. 593: 1-18. —Henderson, 1955. U. S. Dept. Agr., Cir. 967: 1-16. —Flock *et al.*, 1962. Jour. Econ. Ent. 55: 279.

semifuscipennis Girault. Ill., Okla., Tex. Host: Leafhopper eggs in grasses.

Aphelinoidea semifuscipennis Girault, 1911. Amer. Ent. Soc., Trans. 37: 4. ♀.

Genus LATHROMEROIDEA Girault

Lathromeroidea Girault, 1912. Queensland Mus., Mem. 1: 94.

Type-species: *Lathromeroidea nigra* Girault. Orig. desig.

Centrobiopsis Girault, 1918. No. Amer. Hym. Trichogrammatidae, Sydney, Austral., pp. 4, 7.

Type-species: *Centrobia odonatae* Ashmead. Orig. desig.

Taxonomy: Doutt and Viggiani, 1968. Calif. Acad. Sci., Proc. (4) 35: 506-507.

odonatae (Ashmead). N. Y., Ill. Host: *Lestes uncatus* Kirby, *L. unguiculatus* Hagen.

Centrobia odonatae Ashmead, 1900. Ent. News 11: 616. ♀.

Genus USCANA Girault

Uscana Girault, 1911. Amer. Ent. Soc., Trans. 37: 22.

Type-species: *Uscana semifumipennis* Girault. Monotypic.

Brichoctonus Grese, 1924. In Korab, Saratov Admin. State Assoc. Sugar Indus., Bul. 7: 116-117.

Type-species: *Brichoctonus senax* Grese. Monotypic. *Lathromeris* of authors, not Foerster, 1856.

marilandica Girault. Md. Host: *Callosobruchus maculatus* (Fab.).

Uscana marilandica Girault, 1918. No. Amer. Hym. Trichogrammatidae, Sydney, Austral., p. 10.

semifumipennis Girault. N. J., D. C., N. Dak., Tex., Mont., Ariz.; Hawaii. Host: *Acanthoscelides alboscutellatus* (Horn), *Althaeus hibisci* (Oliv.), *Callosobruchus maculatus* (Fab.), *Stator limbatus* (Horn).

Uscana semifumipennis Girault, 1911. Amer. Ent. Soc., Trans. 37: 23. ♀, ♂.

Biology: Paddock and Reinhard, 1919. Tex. Agr. Expt. Sta., Bul. 256: 81-83. —Steffan, 1954. Paris Mus. d'Hist. Nat., Bul. (2) 26: 669.

UNPLACED TAXA IN CHALCIDOIDEA

By B. D. BURKS

Entedon antiopae Packard, 1881. Boston Soc. Nat. Hist., Proc. 21: 36. ♂. Type not located.

Stenomesius aphidicola Ashmead, 1880. Orange Insects, p. 67. ♀, ♂. Type lost.

Smicra Bimaculatas Strecker, 1878. U. S. War Dept., Ann. Rpt. 2 (3): 1878. Type not located.

Diomorus biorhizae Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 186. ♀. Type lost; from original description not *Diomorus*.

Halticoptera brodii Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 192. ♀. Type lost; from original description not *Halticoptera*.

Caccophagus brunneus Provancher, 1887. Addit. Corr. Faune Ent. Canada Hym., p. 205. Type broken, but fragments look to be Pteromalini.

Taxonomy: Dalla Torre, 1898. Cat. Hym., v. 5, p. 224 (*Coccophagus*). —Burks, 1964 (1963). Canad. Ent. 95: 1257 (type).

Camptotera clavata Provancher, 1888. Addit. Corr. Faune Ent. Canada Hym., p. 404. ♀, ♂.

Type lost.

Entedon coquilletti Riley, 1889. U. S. Dept. Agr., Ann. Rpt. for 1888, p. 86. Type lost.

Stinoplus cyaneus Ashmead, 1894. Amer. Ent. Soc., Trans. 21: 338. ♂. Type lost.

Trichogramma flavus Ashmead, 1880. Orange Insects, p. 33. ♀. Type lost.

Solenotus fletcheri Cockerell, 1889. Colo. Biol. Assoc., Rpt. 6: 2. Type lost.

Leucospis integra Haldeman, 1844. Acad. Nat. Sci. Phila., Proc. 2: 53. ♂. Type lost; from original description not *Leucospis*; *Bracymeria*?

Taxonomy: Cresson, 1872. Amer. Ent. Soc., Trans. 4: 35.

Cricellius megachilis Ashmead, 1897. South. Calif. Acad. Sci., Proc. 1 (3): 6. ♀, ♂. Type missing.

Semiotellus minimus Provancher, 1881. Nat. Canad. 12: 295.. ♀. Type fragmentary.

Taxonomy: Burks, 1964 (1963). Canad. Ent. 95: 1262 (type).

Meraporus monticola Ashmead, 1889. Colo. Biol. Assoc., Rpt. 3: 4. Type lost.

Pteromalus nigricornis Provancher, 1881. Nat. Canad. 12: 297. ♀. Type fragmentary, but not *Pteromalus*.

Taxonomy: Burks, 1964 (1963). Canad. Ent. 95: 1260 (type).

Eurytoma orbiculata Say, 1836. Boston Jour. Nat. Hist. 1: 272. Type lost.

Rhopalicus pallipes Provancher, 1888. Addit. Corr. Faune Ent. Canada Hym., p. 407. ♀. Type lost, but from original description, not *Rhopalicus*.

Taxonomy: Burks, 1964 (1963). Canad. Ent. 95: 1261.

Eulophus ramosus Provancher, 1881. Nat. Canad. 12: 297. ♀, ♂. Type lost.

Taxonomy: Burks, 1964 (1963). Canad. Ent. 95: 1258 (type).

Trigonoderus varipes Viereck, 1903. Amer. Ent. Soc., Trans. 29: 75. ♀. Type lost.

Superfamily CYNIPOIDEA

By B. D. BURKS

The Cynipoidea have gone through an evolutionary development that approximately parallels that of the Chalcidoidea. Both superfamilies have parasitic and phytophagous forms, although the Cynipoidea does not include known genera that have phytophagous as well as parasitic species. In the Chalcidoidea several genera include phytophagous and parasitic species; in the Cynipoidea no such mixtures occur below the family level. It should be borne in mind, however, that the present classification of the Cynipoidea may have given unjustifiable weight to the habits of the forms placed in the various higher categories. In any case, in each superfamily it is debatable whether the phytophagous or parasitic habit is the more primitive. Although all authorities agree that the members of each superfamily came originally from phytophagous ancestors, there is disagreement as to whether the first Hymenoptera recognizable as representing either superfamily were parasitic or phytophagous. If they were parasitic, as many authorities believe, the present-day phytophagous species are secondarily evolved from parasitic ancestors. The close agreement in essential morphological characters among all members of each superfamily excludes the possibility of polyphyletic origin for the parasitic and phytophagous forms.

Revision: Dalla Torre and Kieffer, 1910. Das Tierreich, 24, Hymenoptera, Cynipidae, 891 pp. (world monograph, literature through 1905). —Weld, 1952. Cynipoidea 1905–1950. Ann Arbor, Mich., Privately Printed, 351 pp. (supplement to Dalla Torre and Kieffer; illustrated keys).

Taxonomy: Felt, 1940. Plant Galls and Gall Makers, pp. 78-228; 254-269; 329-338 (illustrated keys to galls). —Weld, 1957. Cynipid Galls of Pacific Slope. Ann Arbor, Mich., Privately Printed, 80 pp. (illustrated keys to galls). —Weld, 1959. Cynipid Galls of the Eastern United States, Ann Arbor, Mich., Privately Printed, 158 pp. (illustrated keys to galls). —Weld, 1960. Cynipid Galls of the Southwest. Family IBALIIDAE

SUBFAMILY IBALIINAE

Genus IBALIA Latreille

Ibalia Latreille, 1802. Hist. Nat. Crust. Ins. v. 3, p. 306

Type-species: *Ophion cultellator* Fabricius. Monotypic.

Sagaris Panzer, 1806. Krit. Rev. Insektenf. Deutschlands, v. 2, p. 91.

Type-species: *Ophion cultellator* Fabricius. Monotypic.

Parasitic on Siricidae. The European species *lencospoides* Hochenwarth has been successfully introduced into New Zealand for the control of *Sirex noctilio* (Fabricius) in plantings of introduced species of *Pinus*. *I. leucospoides* is now considered to be a senior synonym of *cultellator* Fabricius.

Taxonomy: Weld, 1952. Cynipoidea 1905-1950, p. 150 (key to U. S. spp.).

Biology: Cameron, 1965. Commonwealth Inst. Biol. Control, Tech. Bul. 5: 18.
anceps Say, Minn., Ark., Tex.

Ibalia anceps Say, 1824. In Keating, Narr. Long's 2nd Exped., App., p. 325. ♀.

leucospoides ensiger Norton. Transcont. introd. into N. Zeal. and Australia. *Ibalia leucospoides leucospoides* (Hochenwarth) is Palearctic. Host: Siricidae and Syntexidae in conifers.

Ibalia ensiger Norton, 1862. Ent. Soc. Phila., Proc. 1: 200. ♀.

Biology: Wickman, 1964. Pan-Pacific Ent. 40: 19. — Wickman, 1967. Ent. Soc. Amer., Ann. 60: 1294. — Cameron, 1968. Pan-Pacific Ent. 44: 168. — Zondag, 1969. New Zeal. Jour. Sci. 12: 744.

maculipennis Haldeman. Que., Ont., Eastern U. S. Host: *Tremex columba* (L.). Differs from *scalpellator* Westwood only by slight differences in color, teste Weld, 1952. Cynipoidea 1905-1950, p. 150.

Ibalia maculipennis Haldeman, 1846. Acad. Nat. Sci. Phila., Proc. 3: 127. ♀.

Ibalia fasciipennis Kieffer, 1909. Soc. Hist. Nat. Metz, Bul. 26: 57. ♀.

Morphology: Snodgrass, 1941. Smithson. Misc. Collect. 99: 37 (male genitalia).

montana Cresson. Labrador, Nev., Wash., Oreg., Calif.

Ibalia montana Cresson, 1879. Amer. Ent. Soc., Trans. 7: Proc. xvii. ♀.

ruficollis Cameron. N. Mex., Ariz.; Mexico. Host: *Sirex* in conifers.

Ibalia ruficollis Cameron, 1884. Roy. Ent. Soc. London, Trans. 1884: 488. ♀.

rufipes rufipes Cresson. Nova Scotia, N. B., Que., Ont., Man., Alta., Host: *Sirex cyaneus* Fab., *Urocerus gigas flavicornis* (Fab.). The subspecies *rufipes drewseni* Borries is Palearctic.

Ibalia rufipes Cresson, 1879. Amer. Ent. Soc., Trans. 7: Proc. xvii. ♀.

Ibalia gigantea Yoshimoto, 1970. Canad. Ent. 102: 1196. ♀, ♂.

scalpellator Westwood. Ga.

Ibalia scalpellator Westwood, 1837. In Guerin, Mag. Zool. 7: cl. 9, pl. 179, fig. 2. ♂.

Family LIOPTERIDAE

SUBFAMILY MESOCYNIPINAE

Mostly exotic. Habits unknown.

Genus PARAMBLYNOTUS Cameron

Paramblynnotus Cameron, 1908. Entomologist 41: 299.

Type-species: *Paramblynnotus punctulatus* Cameron. Desig. by Rohwer and Fagan, 1917.

Allocynips Kieffer, 1914. Philippine Jour. Sci. 9 D : 185.

Type-species: *Allocynips ruficeps* Kieffer. Monotypic.

Mayrella Hedicke, 1922. Deut. Ent. Ztschr., p. 190.

Type-species: *Mayrella formosana* Hedicke. Monotypic.

Baviana Barbotin, 1954. Soc. Ent. France, Bul. 59: 125.

Type-species: *Baviana ferruginea* Barbotin. Monotypic.

Decellea Benoit, 1956. Rev. Zool. Bot. Africaines 53: 51.

Type-species: *Decellea yangambicola* Benoit. Monotypic.

Taxonomy: Weld, 1962 (1961). Ent. Soc. Wash., Proc. 63: 279. — Maa, 1962. Taiwan Mus., Quart. Jour. 15: 124.

zonatus Weld. Tex.

Paramblynnotus zonatus Weld, 1944. Ent. Soc. Wash., Proc. 46: 56, fig. 2. ♀.

Genus KIEFFERIELLA Ashmead

Kiefferia Ashmead, 1903. Psyche 10: 10. Preocc. by Mik, 1895 and Kunstler and Chaine, 1902.

Type-species: *Kiefferia rugosa* Ashmead. Monotypic.

Kiefferiella Ashmead, 1903. Ent. Soc. Wash., Proc. 5: 221. N. name.

acmaeodera Weld. Idaho.

Kiefferiella acmaeodera Weld, 1956. Ent. Soc. Wash., Proc. 58: 291. ♀.

rugosa (Ashmead). Calif. (Santa Cruz Mts.).

Kiefferia rugosa Ashmead, 1903. Psyche 10: 10.

Taxonomy: Weld, 1921. U. S. Natl. Mus., Proc. 59: 435. ♀.

Family FIGITIDAE

SUBFAMILY ASPICERATINAE

Parasites in the puparia of Syrphidae.

Genus PARASPICERA Kieffer

Paraspicera Kieffer, 1907. Ent. Ztschr. Stuttgart 21: 152.

Type-species: *Paraspicera bakeri* Kieffer. Monotypic.

bakeri Kieffer. Md., D. C., Ill., Wis.

Paraspicera bakeri Kieffer, 1907. Ent. Ztschr. Stuttgart 21: 152. ♂.

Taxonomy: Weld, 1944. Ent. Soc. Wash., Proc. 46: 57. (female).

clarimontis (Kieffer). Calif.

Aspicera clarimontis Kieffer, 1907. Ent. Ztschr. Stuttgart 21: 152. ♀.

utahensis (Ashmead), n. comb. Utah.

Aspicera utahensis Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 183. ♀.

Genus PROSASPICERA Kieffer

Prosaspicera Kieffer, 1907. Ent. Ztschr. Stuttgart 21: 152.

Type-species: *Prosaspicera ensifera* Kieffer. Desig. by Rohwer and Fagan, 1917.

albihirta (Ashmead). Fla.

Aspicera albihirta Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 156. ♀.

similis (Ashmead). Pa., Fla., Ark.

Aspicera similis Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 156. ♀.

Aspicera albinervis Kieffer, 1910. Lab. Zool. Gen. e Agr. Portici, Bol. 4: 337. ♀, ♂.

Genus OMALASPIS Giraud

Omalaspis Giraud, 1860. Zool.-Bot. Gesell. Wien, Verhandl. 10: 155.

Type-species: *Omalaspis norica* Giraud. Monotypic.

Lambertonia Kieffer, 1901. Soc. Ent. France, Bul. 1901, pp. 158, 159.

Type-species: *Lambertonia abnormis* Kieffer. Desig. by Ashmead, 1903.

Tavaresia Kieffer, 1901. Soc. Ent. France, Bul. 1901, pp. 158, 160.

Type-species: *Tavaresia carinata* Kieffer. Desig. by Ashmead, 1903.

Taxonomy: Weld, 1931. Ent. Soc. Wash., Proc. 33: 22. — Weld, 1952. Cynipoidea 1905-1950, p. 168.

nigra (Hartig). N. Y., Del., Va., Ala., Ill., Okla., Colo., Idaho; Europe. Prob. adventive. Host: Syrphid puparia.

Figites niger Hartig, 1840 (1839). Ztschr. f. Ent. 2: 202. ♀.

Genus CALLASPIDIA Dahlbom

Callaspidia Dahlbom, 1842. Onychia och Callaspidia, p. 10.

Type-species: *Callaspidia De fonscolombei* Dahlbom. Desig. by Rohwer and Fagan, 1917.

provancheri Ashmead, Que., Maine, N. H., Mass., N. Y., Conn., Pa., Mich., Ind., Ill., Wis., Idaho.
Host: *Metasyrphus americanus* (Wiedemann).
Callaspidea provancheri Ashmead, 1887. In Provancher, Addit. Corr. Faune Ent. Canada
Hym., p. 167. ♀.

SUBFAMILY ANACHARITINAE

Parasitic in the cocoons of lace-wing flies: *Chrysopa*, *Sympnerobius*, *Hemerobius*.

Genus XYALASPIS Hartig

Xyalaspis Hartig, 1843. Ztschr. f. Ent. 4: 416.

Type-species: *Xyalaspis laevigata* Hartig. Monotypic.

Conaspicera Hedicke, 1914. Nyt. Mag. Nat. Kristiana 52: 354.

Type-species: *Conaspicera norvegica* Hedicke. Orig. desig.

flavipes Ashmead. Md., Va.

Xyalaspis flavipes Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 183. ♂.

microstyla Kieffer. Ala.

Xyalaspis microstyla Kieffer, 1907. Ent. Ztschr. Stuttgart 21: 151. ♂.

Genus ACOTHYREUS Ashmead

Acothyreus Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 157.

Type-species: *Acothyreus osceola* Ashmead. Monotypic.

mellipes Provancher. Que.

Acothyreus mellipes Provancher, 1888. Addit. Corr. Faune Ent. Canada Hym., p. 438. ♀.

osceola Ashmead. Fla.

Acothyreus osceola Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 157. ♂.

Genus ANACHARIS Dalman

Anacharis Dalman, 1823. Anal. Ent., p. 96.

Type-species: *Cynips eucharoides* Dalman. Monotypic.

Megapelmus Hartig, 1840 (1839). Ztschr. f. Ent. 2: 186.

Type-species: *Megapelmus spheciformis* Hartig. Monotypic.

flavicornis Kieffer. Wis.

Anacharis flavicornis Kieffer, 1909. Soc. Hist. Nat. Metz, Bul. 26: 80. ♂.

lamyi Cockerell. N. Mex.

Anacharis mexicana Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 184. ♀. Preocc. by Cameron, 1884.

Anacharis lamyi Cockerell, 1899. Kans. Acad. Sci., Trans. 16: 213. N. name.

Anacharis ashmeadi Dalla Torre and Kieffer, 1902. In Wytsman, Gen. Ins., fasc. 9, p. 141. N. name, unnecessarily proposed.

levifrons Kieffer. Pa.

Anacharis levifrons Kieffer, 1907. Ent. Ztschr. Stuttgart 21: 143. ♀.

marginata Provancher. Que. (Cap Rouge).

Anacharis marginata Provancher, 1887. Addit. Corr. Faune Ent. Canada Hym., p. 168. ♂.

melanoneura Ashmead. Va., S. C., Ga., Fla., La., Tex.

Anacharis melanoneura Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 158. ♂.

pediculata Provancher. Ont. (Ottawa).

Anacharis pediculata Provancher, 1887. Addit. Corr. Faune Ent. Canada Hym., p. 169. ♂.

punctatifrons Kieffer. Calif.

Anacharis punctatifrons Kieffer, 1907. Ent. Ztschr. Stuttgart 21: 143. ♀.

Taxonomy: Kieffer, 1908. Soc. Sci. Bruxelles, Ann. 32: 64. ♂.

subcompressa (Provancher). Que., Ill., Iowa.

Eucoila subcompressa Provancher, 1881. Nat. Canad. 12: 237. ♀.

tripartita Kieffer. Calif.

Anacharis tripartita Kieffer, 1907. Ent. Ztschr. Stuttgart 21: 143. ♀.

Genus HEXACHARIS Kieffer

Hexacharis Kieffer, 1907. Ent. Ztschr. Stuttgart 21: 142.
Type-species: *Hexacharis flavipes* Kieffer. Monotypic.

flavipes Kieffer. Colo.

Hexacharis flavipes Kieffer, 1907. Ent. Ztschr. Stuttgart 21: 142. ♂.

Genus AEGILIPS Walker

Aegilips Walker, 1835. Ent. Mag. 3: 160.

Type-species: *Cynips nitidula* Dalman. Desig. by Westwood, 1840.

aciculatus Provancher. Canada.

Aegilips aciculatus Provancher, 1881. Nat. Canad. 12: 239. ♂, ♀.

clarimontis Kieffer. Calif. Host: *Chrysopa californica* Coq.

Aegilips clarimontis Kieffer, 1907. Ent. Ztschr. Stuttgart 21: 143. ♀.

nevadensis Kieffer. Nev.

Aegilips nevadensis Kieffer, 1908. Soc. Sci. Bruxelles, Ann. 32: 63. ♂.

obtusilobae Osten Sacken. D. C.

Aegilips obtusilobae Osten Sacken, 1861. Ent. Soc. Phila., Proc. 1: 68. ♀.

reticulata Kieffer. Calif.

Aegilips reticulata Kieffer, 1908. Soc. Sci. Bruxelles, Ann. 32: 63. ♂.

rugata Kieffer. Colo.

Aegilips rugata Kieffer, 1907. Ent. Ztschr. Stuttgart 21: 144. ♀.

trisecta Kieffer. Wis.

Aegilips trisecta Kieffer, 1907. Ent. Ztschr. Stuttgart 21: 143. ♂.

victoriae Ashmead. B. C. (Victoria).

Aegilips victoriae Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 184. ♀.

SUBFAMILY FIGITINAE

Parasitic in the puparia of Diptera.

Genus NERALSIA Cameron

Neralsia Cameron, 1883. Biol. Centr.-Amer., Hym., v. 1, p. 74.

Type-species: *Neralsia rufipes* Cameron. Monotypic.

Solenaspis Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 155. Preocc. by Osten Sacken, 1881.

Type-species: *Solenaspis hyalinipennis* Ashmead. Monotypic.

Xyalosema Dalla Torre and Kieffer, 1910. Das Tierreich, v. 24, p. 94. N. name for

Solenaspis Ashmead.

armata (Say). East and middle U. S. Host: *Sarcophaga bullata* Parker, *S. plinthopyga* Wied.

Diplolepis armatus Say, 1836. Boston Jour. Nat. Hist. 1: 266. ♂.

Biology: Roberts, 1935. Jour. Agr. Res. 50: 487-488.

hyalinipennis (Ashmead). Va. s. to Fla. Ecology: Reported on human excrement.

Solenaspis hyalinipennis Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 155. ♀.

Xyalosema dubiosae Kieffer, 1910. Lab. Zool. Gen. e Agr. Portici, Bol. 4: 338. ♂, ♀.

nigriventris (Kieffer). Nev.

Xyalophora impatiens var. *nigriventris* Kieffer, 1908. Soc. Sci. Bruxelles, Ann. 32: 64. ♂.

Genus XYALOPHORA Kieffer

Xyalophora Kieffer, 1901. Soc. Ent. France, Bul. p. 344.

Type-species: *Figitis clavatus* Giraud. Orig. desig.

leviventris Kieffer. Colo.

Xyalophora leviventris Kieffer, 1908. Soc. Sci. Bruxelles, Ann. 32: 64. ♂.

quinquelineata (Say). Transcont. in Transit. zone. Host: *Sarcophaga* sp.

Diplolepis 5-lineata Say, 1836. Boston Jour. Nat. Hist. 1: 267. ♀.

Xyalophora armata var. *nigricornis* Kieffer, 1907. Ent. Ztschr. Stuttgart 21: 157. ♂, ♀.

singularis (Ashmead). Ill.

Solenaspis singularis Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 183. ♂, ♀.

Genus PARASCHIZA Weld

Paraschiza Weld, 1944. Ent. Soc. Wash., Proc. 46: 58.

Type-species: *Paraschiza cupressana* Weld. Orig. desig.

cupressana Weld. Calif. Ecology: Taken from holes of *Citellus* in mushrooms.

Paraschiza cupressana Weld, 1944. Ent. Soc. Wash., Proc. 46: 58. ♀.

Genus LONCHIDIA Thomson

Lonchidia Thomson, 1861. Ofvers. Svensk. Vet.-Akad., Forh. 18: 413.

Type-species: *Figitis maculipennis* Dahlbom. Desig. by Foerster, 1869.

hirta Provancher. Que. (Cap Rouge).

Lonchidia hirta Provancher, 1887. Addit. Corr. Faune Ent. Canada Hym., p. 170. ♀.

Genus MELANIPS Walker

Melanips Walker, 1835. Ent. Mag. 3: 161. No species. —Giraud, 1860. Zool.-Bot. Gesell.

Wien, Verh. 10: 163. Seven species.

Type-species: *Scytodes opacus* Hartig. Desig. by Foerster, 1869.

Scytodes Hartig, 1840 (1839). Ztschr. f. Ent. 2: 187, 202. Preocc. by Latreille, 1804.

Type-species: *Scytodes opacus* Hartig. Desig. by Rohwer and Fagan, 1917.

Amblynotus Hartig, 1843. Ztschr. f. Ent. 4: 419. N. name for *Scytodes* Hartig.

bilineatus (Kieffer). Idaho, Wash.

Amblynotus bilineatus Kieffer, 1909. Soc. Hist. Nat. Metz, Bul. 26: 82. ♀.

coxalis (Kieffer). Nev., Calif.

Amblynotus jowensis(!) var. *coxalis* Kieffer, 1907. Ent. Ztschr. Stuttgart 21: 161. ♂, ♀.

coxalis var. *dipterorum* (Kieffer). Ark.

Amblynotus coxalis var. *dipterorum* Kieffer, 1910. Lab. Zool. Gen. e Agr. Portici, Bol. 4: 339. ♂.

iowensis Ashmead. Iowa.

Melanips iowensis Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 158. ♂, ♀.

opacus (Hartig). Calif.; Europe.

Scytodes opacus Hartig, 1840. Ztschr. f. Ent. 2: 202. ♂, ♀.

Biology: Belizin, 1966. Kishinev. Moldavian Nauch.-Issled Inst. Sadov. Vinograd.: Vinod. Ent., Trudy 13: 9. (Russian hosts).

semirugosus (Crawford). N. Y. (Adirondack Mts.).

Amblynotus semirugosus Crawford, 1917. Ent. Soc. Wash., Proc. 19: 172. ♀.

slossonae (Crawford). N. H. (Mt. Washington).

Amblynotus slossonae Crawford, 1917. Ent. Soc. Wash., Proc. 19: 171. ♀.

Genus SAROTHRUS Hartig

Sarothrus Hartig, 1840 (1839). Ztschr. f. Ent. 2: 187.

Type-species: *Sarothrus canaliculatus* Hartig. Desig. by Foerster, 1869.

Amphithectus Hartig, 1840 (1839). Ztschr. f. Ent. 2: 203.

Type-species: *Amphithectus dahlbomii* Hartig. Monotypic.

californicus Kieffer. Calif.

Sarothrus californicus Kieffer, 1907. Ent. Ztschr. Stuttgart 21: 161. ♂, ♀.

canadensis Kieffer. Ont., Colo.

Sarothrus canadensis Kieffer, 1907. Ent. Ztschr. Stuttgart 21: 161. ♀.

nasoni Ashmead. Ill. (Algonquin).

Sarothrus(!) *nasoni* Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 182. ♀.

Genus TRISCHIZA Foerster

Trischiza Foerster, 1869. Zool.-Bot. Gesell. Wien, Verh. 19: 364, 367.

Type-species: *Figites agaricolarum* Dahlbom. Monotypic.

Figitodes Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 150.

Type-species: *Figitodes atricornis* Ashmead. First included species, Ashmead, 1896. *atricornis* (Ashmead). N. Mex. (Santa Fe).

Figitodes atricornis Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 182. ♀.

leviventris Kieffer. Nev. (Ormsby Co.).

Trischiza leviventris Kieffer, 1907. Ent. Ztschr. Stuttgart 21: 161. ♂.

Genus ZYGOSIS Foerster

Zygosis Foerster, 1869. Zool.-Bot. Gesell. Wien, Verh. 19: 363, 365.

Type-species: *Figites urticeti* Dahlbom. Orig. desig.

Diceraea Foerster, 1869. Zool.-Bot. Gesell. Wien, Verh. 19: 364, 367.

Type-species: *Figites urticeti* Dahlbom. Orig. desig.

Thyreocera Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 154.

Type-species: *Thyreocera nigrifemora* Ashmead. Monotypic.

laevicatum (Provancher). Que.

Figites laevicatum Provancher, 1887. Addit. Corr. Faune Ent. Canada Hym., p. 170. ♂, ♀.

Thyreocera nigrifemora Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 155. ♀.

Genus FIGITES Latreille

Figites Latreille, 1802. Hist. Nat. Crust. Ins., v. 3, p. 307.

Type-species: *Cyriips scutellaris* Rossi. Desig. by Latreille, 1810.

Psilogaster Hartig, 1840 (1839). Ztschr. f. Ent. 2: 187.

Type-species: *Psilogaster anthomyiarum* Bouche. Desig. by Rohwer and Fagan, 1917.

Pychnotrichia Foerster, 1869. Zool.-Bot. Gesell. Wien, Verh. 19: 363, 366.

Type-species: *Pychnotrichia erythropo* Foerster. Orig. desig.

Omalaspoides Hedicke, 1913. Ent. Mitt. 2: 146.

Type-species: *Omalaspoides letzueri* Hedicke. Orig. desig.

Seitneria Tavares, 1928. Broteria, Rev. Luso-Brazil. Ser. Zool. 25: 5.

Type-species: *Seitneria austriaca* Tavares. Monotypic.

albinervis Kieffer. Wis. (Polk Co.).

Figites albinervis Kieffer, 1909. Soc. Hist. Nat. Metz, Bul. 26: 82. ♂.

coloradensis Ashmead. Colo. (Westcliffe).

Figites coloradensis Ashmead, 1890. Colo. Biol. Assoc., Bul. 1: 12, 38. ♀.

consobrinus Giraud. D. C., Va.; Europe. Prob. adventive. Host: *Sarcophaga* sp.

Figites consobrinus Giraud, 1860. Zool.-Bot. Gesell. Wien, Verh. 10: 153. ♂, ♀.

floridanus Ashmead. Fla. (Jacksonville).

Figites floridanus Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 155. ♀.

floridanus var. *dubius* Kieffer. Pa., Ark.

Figites dubius Kieffer, 1907. Ent. Ztschr. Stuttgart 21: 161. ♂.

Figites floridanus var. *dubius* Kieffer, 1910. Lab. Zool. Gen. e Agr. Portici, Bol. 4: 339. ♂.

floridensis Weld. N. Y., Va., Fla., Ala., Tex.

Omalaspis floridanus Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 155. ♂. Preocc. by Ashmead, 1887.

Figites floridensis Weld, 1944. Ent. Soc. Wash., Proc. 46: 62. ♀. N. name.

impatiens Say. Ind.

Figites impatiens Say, 1836. Boston Jour. Nat. Hist. 1: 268. ♀.

inermis (Provancher). Que. (Cap Rouge).

Onychia inermis Provancher, 1887. Addit. Corr. Faune Ent. Canada Hym., p. 171. ♂.

parvulus Kieffer. Colo.

Figites parvulus Kieffer, 1907. Ent. Ztschr. Stuttgart 21: 161. ♂.

popenoei Crawford. D. C.

Figites popenoei Crawford, 1915. U. S. Natl. Mus., Proc. 48: 582. ♂, ♀.

Family EUCOILIDAE

Parasites in the puparia of Diptera.

Taxonomy: Quinlan, 1967. R. Ent. Soc. London, Proc. (B) 36: 1-10 (key to genera).

Genus KLEIDOTOMA Westwood

Genus KLEIDOTOMA Subgenus KLEIDOTOMA Westwood

Kleidotoma Westwood, 1833. Mag. Nat. Hist. 6: 494.

Type-species: *Kleidotoma pilooides* Westwood. Monotypic.

Clidotoma Westwood, 1869. In Foerster, Zool.-Bot. Gesell. Wien, Verh. 19: 342, 348.
Emend.

Schizosema Kieffer, 1901. Feuille Jeunes Nat. (4)31: 161.

Type-species: *Cothonaspis emarginatus* Hartig. Desig. by Ashmead, 1903.

Coptereucoila Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 151.

Type-species: *Coptereucoila americana* Ashmead. Monotypic.

Trirhoptrasema Kieffer, 1901. Soc. Ent. France Bul., p. 344.

Type-species: *Kleidotoma americana* Ashmead. Monotypic.

americana Ashmead. Que. (Cap Rouge).

Kleidotoma americana Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 152, line 6. ♀.

Coptereucoila ashmeadi Rohwer and Fagan, 1911. U. S. Natl. Mus., Proc. 53: 377,
footnote. N. name, unnecessarily proposed.

ashmeadi (Kieffer). Fla. (Jacksonville).

Coptereucoila americana Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 152, top line. ♀.
Preocc. by Ashmead, 1887.

Cleidotoma (*Cleidotoma*(!)) *ashmeadi* Kieffer, 1901. Feuille Jeunes Nat. (4)31: 161. N.
name.

fossa Kieffer. Calif. (San Mateo Co.).

Kleidotoma fossa Kieffer, 1908. Soc. Sci. Bruxelles, Ann. 32: 60. ♀.

marginata (Gillette). Ill. (Quincy, Normal).

Coptereucoila marginata Gillette, 1891. Ill. State Lab. Nat. Hist., Bul. 3: 203. ♀.

marginata var. *glabra* Kieffer. Calif. (San Mateo Co.).

Kleidotoma marginata var. *glabra* Kieffer, 1908. Soc. Sci. Bruxelles, Ann. 32: 61. ♂, ♀.

Genus KLEIDOTOMA Subgenus TETRARHOPTRA Foerster

Tetrarhoptra Foerster, 1869. Zool.-Bot. Gesell. Wien, Verh. 19: 342, 349.

Type-species: *Kleidotoma heterotoma* Thomson. Orig. desig.

Tetratoma Cameron, 1890. Monog. Brit. Phytophagous Hym., v. 3, p. 223.

Type-species: *Kleidotoma heterotoma* Thomson. Desig. by Rohwer and Fagan, 1917.

alaskensis (Ashmead). Alaska (St. Paul Island).

Tetrarhaphta(!) *alaskensis* Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 141. ♂, ♀.

lugens Kieffer. Colo., Calif.

Kleidotoma lugens Kieffer, 1908. Soc. Sci. Bruxelles, Ann. 32: 62. ♀.

tristis Kieffer. Calif. (San Mateo Co.).

Kleidotoma (*Tetrarhoptra*) *tristis* Kieffer, 1908. Soc. Sci. Bruxelles, Ann. 32: 62. ♀.

Genus KLEIDOTOMA Subgenus KLEIDOTOMIDEA Rohwer and Fagan

Kleidotomidea Rohwer and Fagan, 1917. U. S. Natl. Mus., Proc. 53: 369.

Type-species: *Kleidotoma hexatoma* Thomson. Orig. desig.

californica Kieffer. Calif.

Kleidotoma (*Hexacola*) *californica* Kieffer, 1908. Soc. Sci. Bruxelles, Ann. 32: 62. ♂, ♀.

Genus KLEIDOTOMA Subgenus HEPTAMERIS Foerster

Heptameris Foerster, 1869. Zool.-Bot. Gesell. Wien, Verh. 19: 342, 350.

Type-species: *Eucoela pygmaea* Dahlbom. Monotypic.

oscinidis (Ashmead). Ohio. Host: *Oscinella* sp. in wheat stems.

Heptameris oscinidis Ashmead, 1893. Ohio Agr. Expt. Sta., Tech. Ser., Bul. 1(3): 159. ♀.

UNPLACED SPECIES IN KLEIDOTOMA WESTWOOD

avenae (Fitch). N. Y. Ecology: Captured in grain field.

Allotria Avenue Fitch, 1861(1860). N. Y. State Agr. Soc. Trans. 20: 842. ♂.

carolinensis Kieffer. "Carolina."

Kleidotoma carolinensis Kieffer, 1910. Lab. Zool. Gen. e Agr. Portici, Bol. 4: 334. ♂.

rufitarsis (Ashmead). Kans. (Riley Co.).

Copterencoilia(!) rufitarsis Ashmead, 1888. Kans. Agr. Expt. Sta., Bul. 3: App. p. I. ♀.

Genus HEXACOLA Foerster

Hexacula Foerster, 1869. Zool.-Bot. Gesell. Wien, Verh. 19: 342, 349.

Type-species: *Eucoela picierus* Giraud. Monotypic.

Hexuplasta Foerster, 1869. Zool.-Bot. Gesell. Wien, Verh. 19: 345, 359.

Type-species: *Cothonaspis hexatoma* Hartig. Orig. desig.

Taxonomy: Weld, 1962 (1961). Ent. Soc. Wash., Proc. 63: 280.

hexatoma (Hartig). Va.; Europe. Prob. introduced with its host. Host: *Oscinella frit* (L.).

Cothonaspis hexatoma Hartig, 1841. Ztschr. f. Ent. 3: 357. ♀.

subaperta (Kieffer). Pa. (Jeannette).

Ganaspis subaperta Kieffer, 1907. Ent. Ztschr. Stuttgart 21: 131. ♀.

websteri (Crawford). Kans. (Wellington). Host: *Euxesta nitidiventris* Loew.

Hexaplasta websteri Crawford, 1915. U. S. Nat. Mus., Proc. 48: 582. ♀.

Genus EUTRIAS Foerster

Entrias Foerster, 1869. Zool.-Bot. Gesell. Wien, Verh. 19: 344, 357.

Type-species: *Eucoela tritoma* Thomson. Monotypic.

tritoma (Thomson). Tex. Introduced from Europe. Host: Sepsidae in cow dung.

Eucoela tritoma Thomson, 1861. Ofvers. Svensk. Vet.-Akad., Forh. 18: 403. ♀.

Genus EUKOILA Westwood

Eukoila Westwood, 1833. Mag. Nat. Hist. 6: 494.

Type-species: *Eukoila crassinerva* Westwood. Monotypic.

Eukoela Agassiz, 1846. Nomencl. Zool. Index Univ., p. 146. Emend.

Psilodora Foerster, 1869. Zool.-Bot. Gesell. Wien, Verh. 19: 348, 354.

Type-species: *Cothonaspis boyenii* Hartig. Orig. desig.

Lytosema Kieffer, 1901. Feuille Jeunes Nat. (4)31: 162.

Type-species: *Eukoila guerini* Dahlbom. Desig. by Ashmead, 1903.

atricornis (Kieffer). "Carolina."

Lytosema atricornis Kieffer, 1910. Lab. Zool. Gen. e Agr. Portici, Bol. 4: 330. ♂.

culta (Girault). Ill. (Urbana).

Psilodora cultra Girault, 1920. U. S. Natl. Mus., Proc. 58: 182. ♀.

erythropa (Ashmead). Va. s. to Ga., w. to Mo., Tex. Ecology: Reported on human excrement.

Cothonaspis erythropus. Ashmead, 1888. Kans. Agr. Expt. Sta., Bul. 3: App. p. I. ♂.

hirticornis (Kieffer). Pa.

Lytosema hirticornis Kieffer, 1910. Lab. Zool. Gen. e Agr. Portici, Bol. 4: 330. ♀.

impatiens (Say). N. Y., Ill., Tex., N. Mex. Introduced into Hawaii. Host: *Sarcophaga* sp.,

Haematobia irritans (L.), dung-fly larvae.

Diplolepis impatiens Say, 1836. Boston Jour. Nat. Hist. 1: 267. ♂.

Kleidotoma cupulifera Provancher, 1881. Nat. Canad. 12: 238. ♂, ♀.

rufocincta (Kieffer). Western and Southwest. U. S. Host: Maggots in cow dung and blow-fly larvae in carrion.

Psilodora rufocincta Kieffer, 1907. Ent. Ztschr. Stuttgart 21: 131. ♂.

rufoscutata Kieffer. Ark. (Fayetteville).

Eukoila rufoscutata Kieffer, 1910. Lab. Zool. Gen. e Agr. Portici, Bol. 4: 332. ♂.

septemspinosa Gillette, Ill. (Quincy).

Eucoila 7-spinosa Gillette, 1891. Ill. State Lab. Nat. Hist., Bul. 3: 204. ♀.
vagabunda (Ashmead). Gulf coast, Fla. to Tex.

Kleidotoma vagabunda Ashmead, 1885. Amer. Ent. Soc., Trans. 12: 302. ♀.

Genus APOREUCOELA Kieffer

Aporeucoela Kieffer, 1908. Soc. Sci. Bruxelles, Ann. 32: 49.

Type-species: *Aporeucoela fuscipes* Kieffer. Monotypic.

floridana (Ashmead). Fla. (Archer).

Piezobria floridana Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 185. ♀.

fuscipes Kieffer. Calif. (Claremont).

Aporeucoela fuscipes Kieffer, 1908. Soc. Sci. Bruxelles, Ann. 32: 49. ♀.

Genus TRYBLOGRAPHA Foerster

Genus TRYBLOGRAPHA Subgenus TETRAPLASTA Ashmead

Tetraplasta Ashmead, 1903. Psyche 10: 68.

Type-species: *Tetraplasta unica* Ashmead. Orig. desig.

Taxonomy: Weld, 1952. Cynipoidea 1905-1950, p. 220.

bakeriana (Kieffer). Calif. (San Mateo Co.).

Cothonaspis bakeriana Kieffer, 1908. Soc. Sci. Bruxelles, Ann. 32: 56. ♀, ♂.

pictipennis (Kieffer). Calif. (Claremont).

Cothonaspis (Tetraplasta) pictipennis Kieffer, 1909. Soc. Hist. Nat. Metz, Bul. 26: 70. ♂,
 ♀.

Genus TRYBLOGRAPHA Subgenus PENTAPLASTIDIA Weld

Trybliographa subg. *Pentaplastidia* Weld, 1951. U. S. Dept. Agr., Agr. Monog. 2, p. 603.

Type-species: *Cothonaspis (Pentaphroptera) clarimontis* Kieffer. Orig. desig.

Taxonomy: Weld, 1951. U. S. Dept. Agr., Agr. Monog. 2, p. 603.

clarimontis (Kieffer). Calif. (Claremont).

Cothonaspis (Pentaphroptera) clarimontis Kieffer, 1909. Soc. Hist. Nat. Metz, Bul. 26: 72. ♀.

Genus TRYBLOGRAPHA Subgenus DIDYCTIUM Riley

Didyctium Riley, 1879. In Comstock, Rpt. on Cotton Ins., pp. 197-198.

Type-species: *Didyctium zigzag* Riley. Monotypic.

Didyctium Comstock, 1879. Rpt. on cotton Ins., pp. 214, 500. Emend.

Didictium Weld, 1952. Cynipoidea 1905-1950, p. 221. Emend.

Taxonomy: Weld, 1962 (1961). Ent. Soc. Wash., Proc. 63: 280.

fungicola (Crawford). D. C.

Hexaplasta fungicola Crawford, 1915. U. S. Natl. Mus., Proc. 48: 581. ♀.

lucida (Rohwer). N. Y. (Syracuse).

Hexaplasta lucida Rohwer, 1920. U. S. Natl. Mus., Proc. 57: 219. ♂, ♀.

marlatti (Crawford). Va. (Warrenton).

Hexaplasta marlatti Crawford, 1915. U. S. Natl. Mus., Proc. 48: 580. ♂, ♀.

minuta (Crawford). Tenn. (Nashville).

Hexaplasta minuta Crawford 1917 (1916). Insecutor Insectiae Menstruus 4: 101. ♀.

zigzag (Riley). Fla., Ala. Host: *Megaselia aletiae* (Comst.).

Didyctium zig-zag Riley, 1879. In Comstock, Rpt. on Cotton Ins., pp. 198, 214, 500. ♂, ♀.

Taxonomy: Weld, 1962 (1961). Ent. Soc. Wash., Proc. 63: 280.

Genus TRYBLOGRAPHA Subgenus TRYBLOGRAPHA Foerster

Trybliographa Foerster, 1869. Zool.-Bot. Gesell. Wien, Verh. 19: 345, 359.

Type-species: *Cothonaspis scutellaris* Hartig. Orig. desig.

Dimicrostrophis Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 160. No included spp.

Dimicrostrophis(!) Ashmead, 1887. In Provancher, Addit. Corr. Faune Ent. Canada Hym., p. 172.

Type-species: *Dimicrostrophis ruficornis* Ashmead. First included sp.

Dimicrostrophis Sharp, 1888. Zool. Rec. 24 (Ins.): 204. Emend.

Dusmetiola Tavares, 1924. Broteria, Rev. Luso-Brazil., Ser. Zool. 21: 18.

Type-species: *Dusmetiola hispanica* Tavares. Monotypic.

fuscostrigata (Kieffer). Calif. (San Mateo).

Cothonaspis fuscostrigata Kieffer, 1908. Soc. Sci. Bruxelles, Ann. 32: 55. ♂, ♀.

neocera (Kieffer). Pa. (Jeannette).

Cothonaspis (Anectoclis) neocera Kieffer, 1907. Ent. Ztschr. Stuttgart 21: 131. ♂, ♀.

rapae (Westwood). Ont., N. Y., N. J., Mich., Ill., Minn., Colo., B. C., Wash. Introduced from Europe. Host: *Hylemya* sp.

Eucoila rapae Westwood, 1835. Mag. Nat. Hist. 8: 178. ♂, ♀.

Pseudeucoila gillettei Washburn, 1906. Minn. Agr. Expt. Sta., Bul. 100: 8. ♀.

Biology: Wishart and Monteith, 1954. Canad. Ent. 56: 145-154 (immature stages).

ruficornis (Ashmead). Que. (Cap Rouge).

Dimicrostrophis ruficornis Ashmead, 1887. In Provancher, Addit. Corr. Faune Ent. Canada Hym., p. 173. ♀.

Genus TRYBLIOGRAPHA Subgenus Undetermined

aperta (Kieffer). Calif. (San Mateo Co.).

Eucoila (Rhoptromeris) aperta Kieffer, 1908. Soc. Sci. Bruxelles, Ann. 32: 58. ♂.

bakeriana var. **nigriventris** (Kieffer). Calif. (San Mateo).

Cothonaspis bakeriana var. *nigriventris* Kieffer, 1909. Soc. Hist. Nat. Metz, Bul. 26: 73. ♂.

coloradensis (Kieffer). Colo.

Cothonaspis coloradensis Kieffer, 1907. Ent. Ztschr. Stuttgart 21: 136. ♂.

klagesi (Kieffer). Pa. (Jeannette).

Cothonaspis klagesi Kieffer, 1907. Ent. Ztschr. Stuttgart 21: 136. ♂.

melanopa (Ashmead). Ohio. Host: *Leucopis* sp.

Hexaplasta melanopa Ashmead, 1894. Cincinnati Soc. Nat. Hist., Jour. 17: 40, 45. ♂.

nigricornis (Provancher). Ont. (Ottawa).

Dimicrostrophis nigricornis Provancher, 1888. Addit. Corr. Faune Ent. Canada Hym., p. 436. ♀.

Genus PSICHACRA Foerster

Psichacra Foerster, 1869. Zool.-Bot. Gesell. Wien, Verh. 19: 344, 356.

Type-species: *Cothonaspis longicornis* Hartig. Monotypic.

laticeps (Kieffer). Nev. (Ormsby Co.).

Eucoila (Psichacra) laticeps Kieffer, 1908. Soc. Sci. Bruxelles, Ann. 32: 57. ♀.

troglodytes (Kieffer). Wis. (Polk Co.).

Eucoila (Psichacra) troglodytes Kieffer, 1909. Soc. Hist. Nat. Metz, Bul. 26: 74. ♀.

Genus GANASPIS Foerster

Ganaspis Foerster, 1869. Zool.-Bot. Gesell. Wien, Verh. 19: 334, 355.

Type-species: *Ganaspis mundata* Foerster. Monotypic.

diastrophi Ashmead. Nebr.

Ganaspis diastrophi Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 184. ♂, ♀.

nigra (Kieffer). Pa. (Jeannette).

Miteucoila nigra Kieffer, 1907. Ent. Ztschr. Stuttgart 21: 121. ♀.

reclusa Kieffer. Calif.

Ganaspis reclusa Kieffer, 1908. Soc. Sci. Bruxelles, Ann. 32: 51. ♀.

Genus GANASPIDIUM Weld*Ganaspidium* Weld, 1955. Ent. Soc. Wash., Proc. 57: 274.Type-species: *Ganaspidium pusillae* Weld. Monotypic.*pusillae* Weld. Tex. Host: *Liriomyza* sp., a serpentine leaf miner on peas.*Ganaspidium pusillae* Weld, 1955. Ent. Soc. Wash., Proc. 57: 274. ♀, ♂.**Genus HYPOLETHRIA Foerster***Hypoletchia* Foerster, 1869. Zool.-Bot. hunteri (Crawford). Tex. (Dallas). Host: *Liriomyza* sp., a cotton leaf miner.

Encoila hunteri Crawford, 1913. U. S. Natl. Mus., Proc. 45: 310. ♀.

stigmata (Say). Mass., N. Y., N. J., D. C., Va., Ind., Ill., Canada.

Diplolepis stigmata Say, 1836. Boston Jour. Nat. Hist. 1: 268. ♀.

Kleidotoma maculipennis Provancher, 1881. Nat. Canad. 12: 237. ♀.

Genus PSEUDEUCOILA Subgenus MACROCEREUCOILA Ashmead

Macrocereucoila Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 153.

Type-species: *Macrocereucoila longicornis* Ashmead. Monotypic.

ashmeadiana (Dalla Torre and Kieffer). Fla.

Macrocereucoila longicornis Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 153. ♂. Preocc. by Hartig, 1840.

Eucoela (Macrocerenucoela(?) **Ashmeadiana** Dalla Torre and Kieffer, 1902. In Wytsman, Gen. Ins., fasc. 9, p. 26. N. name.

Eucoila (Macrocerenucoila) ashmeadi Dalla Torre and Kieffer, 1910. Das Tierreich, v. 24, p. 181.

Genus PSEUDEUCOILA Subgenus Undetermined

bruneocineta (Kieffer). Pa. (Jeannette).

Eucoela bruneocineta Kieffer, 1907. Ent. Ztschr. Stuttgart 21: 138. ♂.

clavatipalpis (Kieffer). Ont. (Toronto).

Eucoela clavatipalpis Kieffer, 1907. Ent. Ztschr. Stuttgart 21: 138. ♂.

mellipes (Say). Ont., Ind., Ill.

Figites mellipes Say, 1836. Boston Jour. Nat. Hist. 1: 269. ♀.

Kleidotoma minima Provancher, 1883. Nat. Canad. 14: 20. ♀.

nigrimanus (Kieffer). Calif. (Claremont).

Eucoela nigrimanus Kieffer, 1907. Ent. Ztschr. Stuttgart 21: 138. ♂.

nudicollis (Kieffer). Wis. (Polk Co.).

Eucoila (Eucoila) nudicollis Kieffer, 1909. Soc. Hist. Nat. Metz, Bul. 26: 74. ♂.

pedata (Say). Ind.

Diplolepis pedata Say, 1836. Boston Jour. Nat. Hist. 1: 267. ♂.

rubripes (Ashmead). Fla. (Jacksonville).

Eucoila rubripes Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 153. ♂.

siphonophorae (Ashmead). Fla. (Jacksonville).

Eucoila siphonophorae Ashmead, 1887. U. S. Dept. Agr., Div. Ent., Bul. 14: 21. ♂.

xystiformis (Ashmead). Fla. (Jacksonville).

Dimicrostrophis xystiformis Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 153. ♂.

Genus COTHONASPIS Hartig

Cothonaspis Hartig, 1840 (1839). Ztschr. f. Ent. 2: 186.

Type-species: *Cothonaspis pentatomus* Hartig. Desig. by Foerster, 1869.

Psilosema Kieffer, 1901. Feuille Jeunes Nat. (4)31: 160.

Type-species: *Cothonaspis pentatoma* Giraud. Desig. by Rohwer and Fagan, 1917.

The type-species of this genus, *Cothonaspis pentatoma* Giraud, 1860, is a homonym of *Cothonaspis pentatoma* Hartig, 1840, and was renamed *giraudi* by Dalla Torre and Kieffer, 1910.

americana (Girault). Ill. (Urbana).

Microstilba americana Girault, 1920. U. S. Natl. Mus., Proc. 58: 182. ♀.

pratti (Crawford). Tex. (Dallas).

Psilosema pratti Crawford, 1913. U. S. Natl. Mus., Proc. 45: 310. ♀, ♂.

Genus EUCOILIDEA Ashmead

Eucoilidea Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 154.

Type-species: *Eucoilidea canadensis* Ashmead. Desig. by Ashmead, 1903.

- Eucoelidea* Dalla Torre, 1893. Cat. Hym., v. 2, p. 15. Emend.
arcuata Kieffer. Wis. (Polk Co.).
Eucoelidia(?) arcuata Kieffer, 1909. Soc. Hist. Nat. Metz., Bul. 26: 65. ♂, ♀.
canadensis Ashmead. Que. (Cap Rouge).
Eucoiliidea canadensis Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 154. ♀.
crenulata Kieffer. Colo. (Gunnison).
Eucoiliidea crenulata Kieffer, 1908. Soc. Sci. Bruxelles, Ann. 32: 47. ♀.
fuscipes Kieffer. Calif. (Claremont).
Eucoelidia(?) fuscipes Kieffer, 1907. Ent. Ztschr. Stuttgart 21: 112. ♂.
longicornis Ashmead. Fla. (Jacksonville).
Eucoiliidea longicornis Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 154. ♂.
rufipes Gillette. Ill. (Morris).
Eucoiliidea rufipes Gillette, 1891. Ill. State Lab. Nat. Hist., Bul. 3: 205. ♀.

Family ALLOXYSTIDAE

Parasites of braconid or chalcidoid primary parasites of aphids or other Hemiptera-Homoptera.

Taxonomy: Fallen, 1963. Fauna Fenn. 15: 3-23.

Genus LYTOXYSTA Kieffer

Lytoxysta Kieffer, 1909. Naturw. Ztschr. f. Forst. u. Landw. 7: 479.

Type-species: *Lytoxysta brevipalpis* Kieffer. Desig. by Rohwer and Fagan, 1917.

brevipalpis Kieffer. Mass., Ohio, Ark., Idaho, Utah.

Lytoxysta brevipalpis Kieffer, 1909. Naturw. Ztschr. f. Forst. u. Landw. 7: 480. ♀.

Taxonomy: Weld, 1939. Ent. Soc. Wash., Proc. 41: 53 (male).

brevipalpis var. *nigra* Kieffer. Ark.

Lytoxysta brevipalpis var. *nigra* Kieffer, 1909. Naturw. Ztschr. f. Forst. u. Landw. 7: 480. ♀.

Genus ALLOXYSTA Foerster

Allotria Westwood, 1833. Mag. Nat. Hist. 6: 494. Preocc. by Huebner, 1823.

Type-species: *Allotria victrix* Westwood. Monotypic.

Xystus Hartig, 1840 (1839). Ztschr. f. Ent. 2: 186. Preocc. by Schoenherr, 1826.

Type-species: *Xystus erythrocephalus* Hartig. Desig. by Rohwer and Fagan, 1917.

Alloxysta Foerster, 1869. Zool.-Bot. Gesell. Wien, Verh. 19: 338, 340.

Type-species: *Xystus macrophadnus* Hartig. Monotypic.

Pezophycta Foerster, 1869. Zool.-Bot. Gesell. Wien, Verh. 19: 338, 339.

Type-species: *Xystus brachypterus* Hartig. Orig. desig.

Nephyceta Foerster, 1869. Zool.-Bot. Gesell. Wien, Verh. 19: 338, 339.

Type-species: *Nephyceta discreta* Foerster. Orig. desig.

abdominalis Baker. Colo. (Ft. Collins).

Alloxysta abdominalis Baker, 1896. Canad. Ent. 28: 135. ♀.

affinis (Baker). Colo. (Ft. Collins).

Dylita(?) affinis Baker, 1896. Canad. Ent. 28: 132. ♀.

alaskensis Ashmead. Alaska (Muin Inlet, St. Paul Is.).

Alloxysta alaskensis Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 142. ♂, ♀.

ambrosiae (Ashmead). Mass. (Cambridge).

Allotria ambrosiae Ashmead, 1897. Ent. Soc. Wash., Proc. 4: 149, 156. ♀.

apicalis Baker. Colo. (Ft. Collins).

Alloxysta apicalis Baker, 1896. Canad. Ent. 28: 135. ♀.

areolata (Kieffer), n. comb. Mass. (Forest Hills).

Charips areolata Kieffer, 1909. Naturw. Ztschr. f. Forst. u. Landw. 7: 481. ♂, ♀.

- bakeri** (Kieffer), n. comb. Calif. (San Mateo).
Allotria bakeri Kieffer, 1907. Ent. Ztschr. Stuttgart 21: 162. ♀.
bicolor (Baker). Colo. (Ft. Collins).
Dylita(?) bicolor Baker, 1896. Canad. Ent. 28: 132. ♀.
brassicae (Ashmead), n. comb. N. Y., Fla., Mich., Mo., N. Dak., Ariz., Calif.
Allotria brassicae Ashmead, 1887. U. S. Dept. Agr., Div. Ent., Bul. 14: 14. ♀, ♂.
coloradensis (Baker). Colo. (Ft. Collins).
Dylita(?) coloradensis Baker, 1896. Canad. Ent. 28: 133. ♂.
gracilis Baker. Colo. (Ft. Collins).
Alloxysta gracilis Baker, 1896. Canad. Ent. 28: 134. ♀.
hayhursti (Kieffer), n. comb. Mass. (Forest Hills).
Charips hayhursti Kieffer, 1909. Naturw. Ztschr. f. Forst. u. Landw. 7: 481. ♂, ♀.
lachni (Ashmead). Fla.
Allotria lachni Ashmead, 1885. Amer. Ent. Soc., Trans. 12: 297, 302. ♂, ♀.
leguminosa (Weld), n. comb. Idaho, Utah, Oreg. Host: *Aphelinus lapisigni* How. in *Roepkeia bakeri* (Cowen).
Charips (Charips) leguminosa Weld, 1920. Ent. News 31: 15. ♀, ♂.
longiventris Baker. Colo. (Ft. Collins).
Alloxysta longiventris Baker, 1896. Canad. Ent. 28: 134. ♀.
magna Baker. Colo. (Ft. Collins).
Alloxysta magna Baker, 1896. Canad. Ent. 28: 134. ♀.
megourae (Ashmead). Fla. (Jacksonville). Ecology: Reared from tomato aphid.
Allotria megourae Ashmead, 1887. U. S. Dept. Agr., Div. Ent., Bul. 14: 19. ♀.
robusta Baker. Colo. (Ft. Collins).
Alloxysta robusta Baker, 1896. Canad. Ent. 28: 133. ♀.
ruficeps (Baker). Colo. (Ft. Collins).
Dylita(?) ruficeps Baker, 1896. Canad. Ent. 28: 132. ♀.
rufipleura Baker. Colo. (Ft. Collins).
Alloxysta rufipleura Baker, 1896. Canad. Ent. 28: 135. ♂.
similis (Baker). Colo. (Ft. Collins).
Dylita(?) similis Baker, 1896. Canad. Ent. 28: 133. ♂.
tritici (Fitch). N. Y., N. J., D. C., Va., N. C., Ohio, Ind. Ecology: Reared from *Schizaphis graminium* (Rond.). Host: *Aphidius nigripes* (Ashmead).
Allotria tritici Fitch, 1861 (1860). N. Y. State Agr. Soc., Trans. 20: 841. ♀.
vagans Kieffer. Mass. (Forest Hills). Ecology: Reared from *Hyalopteroides humilis* (Walk.).
Alloxysta vagans Kieffer, 1909. Naturw. Ztschr. f. Forst. u. Landw. 7: 480. ♀.
viatrix (Westwood). Greenland; Europe.

Genus DILYTA Foerster

- Dilyta* Foerster, 1869. Zool.-Bot. Gesell. Wien, Verh. 19: 338, 340.
 Type-species: *Dilyta subclavata* Foerster. Orig. desig.
Charips Marshall, 1870. Ent. Monthly Mag. 6: 181.
 Type-species: *Charips microcera* Marshall. Monotypic.
Glyptoxysta Thomson, 1877. Opusc. Ent., v. 8, pp. 811, 814.
 Type-species: *Glyptoxysta heterocera* Thomson. Desig. by Ashmead, 1903.
necans (Kieffer), n. comb. Mass. (Forest Hills).
Glyptoxysta necans Kieffer, 1909. Naturw. Ztschr. f. Forst. u. Landw. 7: 481. ♀.

Genus HEMICRISIS Foerster

- Hemicrisis* Foerster, 1869. Zool.-Bot. Gesell. Wien, Verh. 19: 338, 339.
 Type-species: *Hemicrisis ruficornis* Kieffer. Monotypic.

brevicornis Kieffer. Nev. (Ormsby Co.).

Hemicrisis brevicornis Kieffer, 1907. Ent. Ztschr. Stuttgart 21: 162. ♂.

nevadensis Kieffer. Nev. (Ormsby Co.).

Hemicrisis nevadensis Kieffer, 1907. Ent. Ztschr. Stuttgart 21: 162. ♀.

Genus PHAENOGLYPHIS Foerster

Phaenoglyphis Foerster, 1869. Zool.-Bot. Gesell. Wien, Verh. 19: 338.

Type-species: *Phaenoglyphis xanthochroa* Foerster. Monotypic.

Auloxysta Thomson, 1877. Opusc. Ent., v. 8, p. 811.

Type-species: *Auloxysta nigripes* Thomson. Desig. by Ashmead, 1903.

Bothrioxysta Kieffer, 1902. Soc. Hist. Nat. Metz, Bul. (2) 10: 11.

Type-species: *Auloxysta nigripes* Thomson. Desig. by Rohwer and Fagan, 1917.

americana Baker. Colo. (Ft. Collins).

Phaeoglyphis americana Baker, 1896. Canad. Ent. 28: 131. ♂.

Family CYNIPIDAE

All the species of this family inhabit plants, either as gall-makers or as inquilines. The latter develop in galls produced by other Cynipidae, by Chalcidoidea, or by Diptera. The first subfamily, Synerginae, contains only inquilines, or as often designated in cynipid literature, guests. The second subfamily, Cynipinae, is composed entirely of gall producing species.

The arrangement of genera and species used here is based on the published papers of the late L. H. Weld, his unpublished notes, and his arrangement of the U. S. N. M. collection. The nomenclature used here may or may not agree with that used by Felt in his 1940 publication, Plant Galls and Gall Makers, 364 pp. All evidence is that Mr. Weld thoroughly considered Felt's nomenclature before he prepared the Cynipidae section of the 1951 Hymenoptera Catalog.

As was done in the 1951 Hymenoptera Catalog, two large papers by A. C. Kinsey are cited as separate publications. This is done primarily because those works were widely distributed by Kinsey as separate volumes. The complete references for them are as follows: Kinsey, 1930. The Gall Wasp Genus Cynips, Ind. Univ. Studies 16 (84, 85, 86): 1-577, June, Sept., Dec. 1929, issued Feb. 1930. (Waterman Inst. Sci. Res. Pub. 42; Contrib. Dept. Zool., Ind. Univ. No. 220, Ent. Ser. No. 7). Kinsey, 1936. The Origin of Higher Categories in Cynips, Ind. Univ. Pubs., Sci. Ser. No. 4: 1-334, issued Nov. 1936. (Contrib. Dept. Zool., Ind. Univ. No. 242, Ent. Ser. No. 10).

SUBFAMILY SYNERGINAE

All members of this subfamily develop as inquilines, or guests, in galls on various plants. Although all the species of this subfamily emerge from galls, in no instance do they induce the formation of the galls. There is, however, evidence that some inquilines cause slight changes in the structure of the galls they inhabit. Their entire development occurs in galls induced by members of the subfamily Cynipinae, some chalcidoids, or the dipterous gall makers in the family Cecidomyiidae. It often occurs, however, that so many inquilines emerge from the galls, and so few of the gall-makers emerge (in some instances no gall-makers emerge), that it is easy to misjudge the habits of the inquilines. As a matter of fact, some of the inquilines have been described as gall-makers, but in no instance is that true. Mani, 1964, (Ecology of Plant Galls, pp. 236-238), gives a summary of the existing literature on cynipid inquilines.

The subfamily name Synerginae was first proposed by Ashmead, 1896, (Amer. Ent. Soc., Trans. 23: 186). This group somewhat corresponds to the "Group Inquilinea" proposed by Hartig, 1840, (Ztschr. f. Ent. 2: 197). Hartig's name Inquilinea is not available for use because it is not based on a generic name in the Cynipidae. Actually, Hartig's name Inquilinea was a descriptive term that meant "Einmieter" or lodger.

Genus SAPHONECRUS Dalla Torre and Kieffer

Saphonecrus Dalla Torre and Kieffer, 1910. Das Tierreich, Lief. 24, p. 605.

Type-species: *Synergus connatus* Hartig. Orig. desig.

Guests in galls on oak.

brevicornis (Ashmead). Calif.

Synergus brevicornis Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 189. ♀, ♂.

Taxonomy: Weld, 1952. U. S. Natl. Mus., Proc. 102: 315.

brevis Weld. N. Mex., Ariz. Host: *Andricus ruginosus* Bassett gall.

Saphonecrus brevis Weld, 1926. U. S. Natl. Mus., Proc. 68(10): 109. ♀, ♂.

favanus Weld. D. C., Mo. Host: *Dryocosmus favus* Beutenmueller gall.

Saphonecrus favanus Weld, 1944. U. S. Natl. Mus., Proc. 95: 1. ♀, ♂.

gemmariae (Ashmead). Fla. Host: *Callirhytis quercusgemmaria* (Ashmead) gall.

Sapholytus gemmariae Ashmead, 1885. Amer. Ent. Soc., Trans. 12: 297, 302. ♂.

Genus SYNERGUS Hartig

Synergus Hartig, 1840 (1839). Ztschr. f. Ent. 2: 186.

Type-species: *Synergus vulgaris* Hartig. Desig. by Foerster, 1869.

Sapholytus Foerster, 1869. Zool.-Bot. Gesell. Wien, Verh. 19: 332, 337.

Type-species: *Synergus apicalis* Hartig. Monotypic.

Guests in galls on oak.

agrifoliae Ashmead. Calif. Host: *Neuroterus saltatorius* (Edwards) gall.

Synergus agrifoliae Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 189. ♀, ♂.

Synergus maculatus Fullaway, 1911. Ent. Soc. Amer., Ann. 4: 371. ♀, ♂.

Synergus obscurus McCracken and Egbert, 1922. Stanford Univ., Pubs., Univ. Ser. Biol. Sci. 3(1): 57. ♀.

Taxonomy: Weld, 1952. U. S. Natl. Mus., Proc. 102: 337.

atra Gillette. Colo. Host: *Disholcaspis rubens* (Gillette) gall.

Synergus atra Gillette, 1896. Amer. Ent. Soc., Trans. 23: 86. ♀, ♂.

atripennis Ashmead. Fla. Host: *Disholcaspis spongiosa* (Karsch) gall.

Synergus atripennis Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 189. ♀.

atripes Gillette. Colo. Host: *Atrusca brevipennata* (Gillette) gall.

Synergus atripes Gillette, 1896. Amer. Ent. Soc., Trans. 23: 90, 96. ♀, ♂.

batatooides Ashmead. Fla. Host: *Callirhytis quercusbatooides* (Ashmead) gall.

Synergus batatooides Ashmead, 1885. Amer. Ent. Soc., Trans. 12: 297, 301. ♀, ♂.

bellus McCracken and Egbert. Calif.

Synergus bellus McCracken and Egbert, 1922. Stanford Univ., Pubs., Univ. Ser. Biol. Sci. 3(1): 54. ♀, ♂.

bicolor Ashmead. Fla. Host: *Andricus quercusfoliatus* (Ashmead) gall.

Synergus bicolor Ashmead, 1885. Amer. Ent. Soc., Trans. 12: 297, 302. ♀, ♂.

campanula Osten Sacken. N. Y., N. J., D. C., Ill., Wis. Host: *Disholcaspis quercusglobulus* (Fitch) gall.

Synergus campanula Osten Sacken, 1865. Ent. Soc. Phila., Proc. 4: 376. ♀.

castanopsisidis (Beutenmueller). Calif. Host: *Dryocosmus castanopsisidis* (Beutenmueller) gall.

Periclistus castanopsisidis Beutenmueller, 1918. Ent. News 29: 251. ♀.

citriformis (Ashmead). Fla. Host: *Amphibolips quercuscitriformis* (Ashmead) gall.

Ceroptres citriformis Ashmead, 1885. Amer. Ent. Soc., Trans. 12: 300. ♀, ♂.

confertus McCracken and Egbert. Calif. Host: *Andricus confertus* McCracken and Egbert gall.

Synergus confertus McCracken and Egbert, 1922. Stanford Univ., Pubs., Univ. Ser. Biol. Sci. 3(1): 55. ♀, ♂.

coniferae Ashmead. Fla. Host: *Callirhytis quercusventricosa* (Bassett) gall.

Synergus coniferae Ashmead, 1885. Amer. Ent. Soc., Trans. 12: 297, 301. ♀, ♂.

davisi (Beutenmueller). N. J. Host: *Callirhytis quercusgemmaria* (Ashmead) gall.

Andricus davisi Beutenmueller, 1907. Amer. Mus. Nat. Hist., Bul. 23: 463. ♀, ♂.

digressus McCracken and Egbert. Calif.

Synergus digressus McCracken and Egbert, 1922. Stanford Univ., Pubs., Univ. Ser. Biol. Sci. 3(1): 52. ♀, ♂.

dimorphus Osten Sacken. D. C.

- Synergus dimorphus* Osten Sacken, 1865. Ent. Soc. Phila., Proc. 4: 376. ♀, ♂.
- distinctus** McCracken and Egbert. Calif. Host: *Disholcaspis canescens* (Bassett) gall.
- Synergus distinctus* McCracken and Egbert, 1922. Stanford Univ., Pubs., Univ. Ser. Biol. Sci. 3(1): 58. ♀, ♂.
- dorsalis** (Provancher). Calif.
- Ceroptres dorsalis* Provancher, 1888. Addit. Corr. Faune Ent. Canada Hym., p. 298. ♀, ♂.
- duricoria** Gillette. Del. Host: *Disholcaspis quercusmamma* (Walsh) gall.
- Synergus duricoria* Gillette, 1896. Amer. Ent. Soc., Trans. 23: 90, 93. ♀.
- erinacei** Gillette. N. Y., Iowa.
- Synergus erinacei* Gillette, 1896. Amer. Ent. Soc., Trans. 23: 90, 94. ♀, ♂.
- ficigerae** Ashmead. Fla. Host: *Disholcaspis quercuscirens* (Ashmead) gall.
- Synergus ficigerae* Ashmead, 1885. Amer. Ent. Soc., Trans. 12: 297, 301. ♀, ♂.
- flavens** McCracken and Egbert. Calif. Host: *Heteroecus flavens* (McCracken and Egbert) gall.
- Synergus flavens* McCracken and Egbert, 1922. Stanford Univ., Pubs., Univ. Ser. Biol. Sci. 3(1): 55. ♀.
- flavus** Kieffer. Calif. Host: *Callirhytis quercuspumiformis* (Bassett) gall.
- Synergus flavus* Kieffer, 1904. Soc. Hist. Nat. Metz, Bul. (2) 11: 133. ♀, ♂.
- garryana** Gillette. Wash., Oreg. Host: *Disholcaspis eldoradensis* (Beutenmueller) gall.
- Synergus garryana* Gillette, 1893. Canad. Ent. 25: 110. ♀, ♂.
- incisus** Gillette. Colo. Host: *Callirhytis frequeus* (Gillette) gall.
- Synergus incisus* Gillette, 1896. Amer. Ent. Soc., Trans. 23: 90, 92. ♀, ♂.
- laeviventris** (Osten Sacken). D. C. Host: *Amphibolips quercusspongifica* (Osten Sacken) gall.
- Synophrus laeviventris* Osten Sacken, 1861. Ent. Soc. Phila., Proc. 1: 57. ♀.
- lignicola** (Osten Sacken). D. C., N. Y., Mich., Ind. Host: *Callirhytis cornigera* (Osten Sacken), *Callirhytis quercuspunctata* (Bassett) galls.
- Cynips* (*Synerges!*) *lignicola* Osten Sacken, 1862. Ent. Soc. Phila., Proc. 1: 252. ♀, ♂.
- Synerges!* *rhopodium* Walsh, 1864. Ent. Soc. Phila., Proc. 2: 499. ♀, ♂.
- magnificus** Weld. Calif. Host: *Disholcaspis truckeeensis* (Ashmead) gall.
- Synergus magnificus* Weld, 1957. U. S. Natl. Mus., Proc. 107: 107. ♀, ♂.
- magnus** Gillette. Mich. Host: *Amphibolips cookii* Gillette gall.
- Synergus magnus* Gillette, 1891. Ill. State Lab. Nat. Hist., Bul. 3: 202. ♀.
- medullae** Ashmead. Fla. Host: *Callirhytis quercusmedullae* (Ashmead) gall.
- Synergus medullae* Ashmead, 1885. Amer. Ent. Soc., Trans. 12: 297, 302. ♀, ♂.
- mendax** Walsh. Ill. Host: *Callirhytis quercuspunctata* (Bassett) gall.
- Synerges!* *mendax* Walsh, 1864. Ent. Soc. Phila., Proc. 2: 498. ♀.
- multiplicatus** Fullaway. Calif. Host: *Audricus chrysolepidicola* (Ashmead) gall.
- Synergus multiplicatus* Fullaway, 1911. Ent. Soc. Amer., Ann. 4: 370. ♀, ♂.
- niger** Fullaway. Calif.
- Synergus niger* Fullaway, 1911. Ent. Soc. Amer., Ann. 4: 369. ♀, ♂.
- nigroornatus** McCracken and Egbert. Calif. Host: *Heteroecus pacificus* (Ashmead) gall.
- Synergus nigro-ornatus* McCracken and Egbert, 1922. Stanford Univ., Pubs., Univ. Ser. Biol. Sci. 3(1): 57. ♀, ♂.
- obtusilobae** (Ashmead). Fla.
- Ceroptres obtusilobae* Ashmead, 1885. Amer. Ent. Soc., Trans. 12: 300. ♀.
- ochreus** Fullaway. Calif. Host: *Callirhytis quercuspomiformis* (Bassett) gall.
- Synergus ochreus* Fullaway, 1911. Ent. Soc. Amer., Ann. 4: 368. ♀.
- oneratus** *oneratus* (Harris). Mass., N. Y., N. J., D. C., Mich., Ill., Iowa. Host: *Dicholcasps quercusglobulus* (Fitch), *Adleria quercusstrobilana* (Osten Sacken) galls.
- Cynips oneratus* Harris, 1841. Rpt. Ins. Mass. Injurious to Veg., p. 398.
- oneratus coloradensis** Gillette. Colo. Host: *Disholcaspis rubens* (Gillette), *Atrusca brevipennata* (Gillette) galls.
- Synergus oneratus* var. *coloradensis* Gillette, 1896. Amer. Ent. Soc., Trans. 23: 90. ♀, ♂.

- pacificus** McCracken and Egbert. Calif. Host: *Heteroecus pacificus* (Ashmead) gall.
Synergus pacificus McCracken and Egbert, 1922. Stanford Univ., Pubs., Univ. Ser. Biol. Sci. 3(1): 56. ♂, ♀.
- poniformis** (Ashmead). Calif. Host: *Callirhytis quercuspomiformis* (Bassett) gall.
Ceropales poniformis Ashmead, 1885. Amer. Ent. Soc., Trans. 12: 300. ♂.
- profusus** McCracken and Egbert. Calif. Host: *Disholcaspis canescens* (Bassett) gall.
Synergus profusus McCracken and Egbert, 1922. Stanford Univ., Pubs., Univ. Ser. Biol. Sci. 3(1): 59. ♀, ♂.
- punctatus** Gillette. Colo. Host: *Disholcaspis rubens* (Gillette), *Xanthoteras eburneum* (Bassett) galls.
Synergus punctata Gillette, 1896. Amer. Ent. Soc., Trans. 23: 90, 94. ♀, ♂.
- quercuslana** (Fitch). N. Y., Iowa. Host: *Andricus quercusflocci* (Walsh) gall.
Cynips Quercus-lana Fitch, 1859 (1858). N. Y. State Agr. Soc., Trans. 18: 814. ♀.
- reniformis** McCracken and Egbert. Host: *Andricus reniformis* McCracken and Egbert gall.
Synergus reniformis McCracken and Egbert, 1922. Stanford Univ., Pubs., Univ. Ser. Biol. Sci. 3(1): 53. ♀, ♂.
- rutulus** McCracken and Egbert. Calif. Host: *Disholcaspis plumbea* Kinsey gall.
Synergus rutulus McCracken and Egbert, 1922. Stanford Univ., Pubs., Univ. Ser. Biol. Sci. 3(1): 60. ♀.
- similis** Gillette. Colo. Host: *Atrusca brevipennata* (Gillette) gall.
Synergus similis Gillette, 1896. Amer. Ent. Soc., Trans. 23: 90, 92. ♀.
- splendidus** Fullaway. Calif. Host: *Callirhytis quercuspomiformis* (Bassett) gall.
Synergus splendidus Fullaway, 1911. Ent. Soc. Amer., Ann. 4: 369. ♀.
Synergus dubiosus Fullaway, 1911. Ent. Soc. Amer., Ann. 4: 372. ♀, ♂.
- succinipedes** (Ashmead). Fla. Host: *Disholcaspis quercussuccinipes* (Ashmead) gall.
Ceropales succinipedes Ashmead, 1885. Amer. Ent. Soc., Trans. 12: 300. ♀.
- varicolor** Fullaway. Calif. Host: *Callirhytis quercuspomiformis* (Bassett) gall.
Synergus varicolor Fullaway, 1911. Ent. Soc. Amer., Ann. 4: 371. ♀, ♂.
- variegatus** McCracken and Egbert. Calif. Host: *Heteroecus pacificus* (Ashmead) gall.
Synergus variegatus McCracken and Egbert, 1922. Stanford Univ., Pubs., Univ. Ser. Biol. Sci. 3(1): 51. ♀, ♂.
- villosus** Gillette. Mich. Host: *Acraspis villosa* (Gillette) gall.
Synergus villosus Gillette, 1891. Ill. State Lab. Nat. Hist., Bul. 3: 202. ♀.
- virentis** (Ashmead). Fla. Host: *Belonocnema quercusvirens* (Osten Sacken) gall.
Ceropales virentis Ashmead, 1885. Amer. Ent. Soc., Trans. 12: 300. ♀.
- walshii** Gillette. Ill.
Synophrurus albipes Walsh, 1864. Ent. Soc. Phila., Proc. 2: 479, 496. ♀, ♂. Preocc. by Hartig, 1841.
Synergus walshii Gillette, 1896. Amer. Ent. Soc., Trans. 23: 97. N. name.

Genus SYNOPHRUS Hartig

Synophrurus Hartig, 1843. Ztschr. f. Ent. 4: 411.
 Type-species: *Synophrurus politus* Hartig. Monotypic.

- mexicanus** (Gillette). N. Mex.
Synergus mexicana Gillette, 1896. Amer. Ent. Soc., Trans. 23: 90, 96. ♀.

Genus SYNOPHROMORPHA Ashmead

Synophromorpha Ashmead, 1903. Psyche 10: 145.
 Type-species: *Synophromorpha salicis* Ashmead. Orig. desig.

Guests in galls on *Rubus* and *Rosa*. Unfortunately the type-species of this genus, *S. salicis* Ashmead, is from an unknown locality and its host was supposed to be a dipterous gall-maker on *Salix*. The type of *salicis* has not been located and probably does not exist.

Taxonomy: Weld, 1952. Cynipoidea 1905-1950, p. 266.

- rubi** Weld. Ill. Host: *Diastrophus cuscuteformis* (Osten Sacken) gall.
Synophromorpha rubi Weld, 1952. U. S. Natl. Mus., Proc. 102: 317. ♀, ♂.
sylvestris (Osten Sacken). Conn., Ont., N. Y., N. J., D. C., Mich. Host: *Diplolepis ignota* (Osten Sacken) gall.
Synophrus sylvestris Osten Sacken, 1861. Stettin Ent. Ztg. 22: 415. ♀.
 Taxonomy: Weld, 1952. U. S. Natl. Mus., Proc. 102: 316.
terricola Weld. D. C., Va. Host: *Diastrophus bassetti* Beutenmueller, *D. radicum* Bassett galls.
Synophromorpha terricola Weld, 1952. U. S. Natl. Mus., Proc. 102: 316. ♀, ♂.

Genus PERICLISTUS Foerster

- Periclistus* Foerster, 1869. Zool.-Bot. Gesell. Wien, Verh. 19: 332, 337.
 Type-species: *Aylax caninae* Hartig. Monotypic.

Guests in galls on roses.

- arefactus** McCracken and Egbert. Calif. Host: *Diplolepis arefacta* (Gillette) gall.
Periclistus arefactus McCracken and Egbert, 1922. Stanford Univ., Pubs., Univ. Ser. Biol. Sci. 3(1): 62. ♀, ♂.
californicus Ashmead. Calif. Host: *Diplolepis polita* (Ashmead) gall.
Periclistus californicus Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 188. ♀, ♂.
obliquus Provancher. Calif.
Periclistus obliquus Provancher, 1888. Addit. Corr. Faune Ent. Canada, Hym. p. 397. ♀.
piceus Fullaway. Calif. Host: *Diplolepis polita* (Ashmead) gall.
Periclistus piceus Fullaway, 1911. Ent. Soc. Amer., Ann. 4: 374. ♀, ♂.
pirata (Osten Sacken). D. C. Host: *Diplolepis ignota* (Osten Sacken) gall.
Aulax pirata Osten Sacken, 1863. Ent. Soc. Phila., Proc. 2: 42. ♀, ♂.
Rhodites globulus Beutenmueller, 1892. Amer. Mus. Nat. Hist., Bul. 4: 247. ♀, ♂.
semipiceus (Harris). Mass. Host: *Diplolepis* sp., galls on rose roots.
Cynips semipiceus Harris, 1841. Rpt. Ins. Mass. Injurious to Veg., p. 400. ♀, ♂.
smilacis Ashmead. Fla. Host: *Diastrophus smilacis* Ashmead gall. Host may be incorrect.
Periclistus smilacis Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 188. ♀, ♂.

Genus MYRTOPSEN Rubsaamen

- Myrtopsen* Rubsaamen, 1908. Marcellia 6: 136.
 Type-species: *Myrtopsen mayri* Rubsaamen. Monotypic.
 Reared from woody galls on leguminous trees and shrubs.

- mimosae** Weld. Ariz. Host: *Tanaostigmodes* sp. galls on *Mimosa biuncifera*.
Myrtopsen mimosae Weld, 1926. U. S. Natl. Mus., Proc. 68(10): 116. ♀, ♂.

Genus CEROPTRES Hartig

- Ceroptres* Hartig, 1840 (1839). Ztschr. f. Ent. 2: 186, 197.
 Type-species: *Ceroptres clavicornis* Hartig. Desig. by Foerster, 1869.
 Guests in galls on oak.
catesbaei Ashmead. Fla. Host: *Bassettia quercuscatesbaei* (Ashmead) gall.
Ceroptres catesbaei Ashmead, 1885. Amer. Ent. Soc., Trans. 12: 301. ♀, ♂.
confertus (McCracken and Egbert). Calif. Host: *Andricus confertus* McCracken and Egbert gall.
Periclistus confertus McCracken and Egbert, 1922. Stanford Univ., Pubs., Univ. Ser. Biol. Sci. 3(1): 62. ♀.
frondosae Ashmead. Mo.
Ceroptres frondosae Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 186. ♀.
inermis (Walsh). Ill. Host: *Cineticornia pilulae* (Osten Sacken) gall.
Amblynotus inermis Walsh, 1864. Ent. Soc. Phila., Proc. 2: 498. ♀, ♂.

lanigerae Ashmead. Fla. Host: *Andricus quercuslaniger* (Ashmead) gall.

Ceroptris lanigerae Ashmead, 1885. Amer. Ent. Soc., Trans. 12: 301. ♀.

minutissimi Ashmead. Fla. Host: *Neuroterus quercusminutissimus* (Ashmead) gall.

Ceroptris minutissimi Ashmead, 1885. Amer. Ent. Soc., Trans. 12: 301. ♀, ♂.

montensis Weld. Calif. Host: *Andricus reniformis* McCracken and Egbert gall.

Ceroptris montensis Weld, 1957. U. S. Natl. Mus., Proc. 107: 108. ♀, ♂.

niger Fullaway. Calif. Specimen now labeled as Type in California Academy of Science is not a *Ceroptris*, but an undetermined gall-maker; original description of *niger* is clearly that of a true *Ceroptris*.

Ceroptris niger Fullaway, 1911. Ent. Soc. Amer., Ann. 4: 373. ♀.

Taxonomy: Weld, 1952. Cynipoidea 1905-1950, p. 268.

petiolicola (Osten Sacken). D. C., Ill. Host: *Andricus quercuspetiolicola* (Bassett) gall.

Amblynotus petiolicola Osten Sacken, 1861. Ent. Soc. Phila., Proc. 1: 67. ♀.

Amblynotus ensiger Walsh, 1864. Ent. Soc. Phila., Proc. 2: 487, 496. ♀.

politus Ashmead, Va. Ecology: Ovipositing in leaf of red oak.

Ceroptris politus Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 187. ♀, ♂.

quercusbaros (Fitch). N. Y. Host: *Callirhytis clavula* (Osten Sacken) gall.

Cynips Quercus-baros Fitch, 1859 (1858). N. Y. State Agr. Soc., Trans. 18: 809. ♂.

quercusficus (Fitch). N. Y. Host: *Xanthoteras quercusforticorne* (Walsh) gall.

Cynips Quercus-ficus Fitch, 1859 (1858). N. Y. State Agr. Soc., Trans. 18: 812. ♀, ♂.

quercusobtusilobae Karsch. Tex. Host: Galls on *Quercus stellata*.

Diplolepis q. obtusilobae Karsch, 1880. Ztschr. f. Gesam. Naturw. 53: 292. ♀.

Cynips obtusilobae Dalla Torre, 1893. Cat. Hym., v. 2, p. 74.

Ceroptris obtusilobensis Weld, 1951. U. S. Dept. Agr., Agr. Monog. 2, p. 614.

quercuspisum (Fitch). N. Y. Host: *Acraspis pezomachoides* (Osten Sacken) gall.

Cynips Quercus-pisum Fitch, 1859 (1858). N. Y. State Agr. Soc., Trans. 18: 818. ♀, ♂.

quercustuber (Fitch). N. Y. Host: *Callirhytis clavula* (Osten Sacken) gall.

Cynips Quercus-tuber Fitch, 1859 (1858). N. Y. State Agr. Soc., Trans. 18: 806. ♀, ♂.

rufiventris Ashmead. Mo. Host: *Andricus quercusostensackenii* (Bassett) gall.

Ceroptris rufiventris Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 186. ♀.

Genus EUCEROPTRES Ashmead

Euceroptris Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 187.

Type-species: *Euceroptris primus* Ashmead. Monotypic.

Guests in galls on oak.

maritimus Weld. Calif. Host: *Callirhytis quercussuttoni* (Bassett) gall.

Euceroptris maritimus Weld, 1926. U. S. Natl. Mus., Proc. 68 (10): 113, 116. ♀, ♂.

montanus Weld. Calif. Host: *Disholcaspis truceensis* (Ashmead) gall.

Euceroptris montanus Weld, 1926. U. S. Natl. Mus., Proc. 68(10): 113, 116. ♀, ♂.

primus Ashmead. Fla. Host: *Andricus quercuspetiolicola* (Bassett) gall and other oak galls.

Euceroptris primus Ashmead, 1896. Amer. Ent. Soc., Trans. 23: 187. ♀, ♂.

Aylax(?) futilis Osten Sacken, 1861. Ent. Soc. Phila., Proc. 1: 51, 64. ♂.

SUBFAMILY CYNIPINAE

In this subfamily all species are gall-makers. The species of the first few genera, *Gonaspis* through *Diplolepis*, produce galls on plants other than *Quercus*. From the genus *Neuroterus* to the end of the subfamily all but two of the species produce galls only on *Quercus*. The two exceptions are *Andricus mendocinensis* Weld, which is a gall-maker on the tanbark oak, *Lithocarpus densiflorus*, and *Dryocosmus castanopsidis* (Beutenmueller), which produces galls on *Castanopsis chrysophylla* and *C. sempervirens*. *Lithocarpus* and *Castanopsis* have by some Botanists been considered to be synonyms of *Quercus*. The prevalent current opinion is that those two genera are very closely related to *Quercus*, but are distinct.

The subfamily Cynipinae is limited here as it was by Ashmead, 1903. (*Psyche* 10: 145). This

corresponds somewhat with the old term *Psenides* Hartig, 1840. (Ztschr. f. Ent. 2: 187). The name *Psenides* Hartig is not based on any generic name in the Cynipoidea, but is a descriptive term meaning "Gallenerzeuger" or gall producer.

There are European species of gall-makers that are commonly intercepted at our ports of entry, but they are not known to have been established in North America. The best known of these is *Andricus kollari* (Hartig). This produces bud galls on *Quercus rober* and other European oaks. The galls produced by this species are imported for the production of permanent inks that are required by law in some states for signatures to certain documents. The cynipid gall-makers occasionally have been known to emerge in factories where these inks are produced, and some factory workers have complained that they were stung by the cynipids. Many of the species of oaks on which this cynipid produces galls in Europe are grown in North America as rare ornamentals. This cynipid has not yet been found developing here. "Nut galls" or "Aleppo galls," produced by *Adleria gallaeuctioriae* (Olivier), are also commonly imported, as are the acorn galls of *Andricus glandium* (Giraud). The cynipids producing these galls are not known to be established in North America.

Taxonomy: Eady and Quinlan, 1963. Handb. Ident. Brit. Ins. 8(1a): 1-81.

Genus GONASPIS Ashmead

Gonaspis Ashmead, 1897. Psyche 8: 68.

Type-species: *Diastrophus scutellaris* Gillette. Orig. desig.

Produce galls on *Potentilla*.

potentillae (Bassett). N. B. s. to Va., w. to Ill., Mo. Ecology: Produces globular galls in leaf axils of *Potentilla* spp.

Diastrophus potentillae Bassett, 1864. Ent. Soc. Phila., Proc. 3: 689. ♀, ♂, gall.

Diastrophus scutellaris Gillette, 1891. Ill. State Lab. Nat. Hist., Bul. 3: 191.

Taxonomy: Weld, 1959. Cynipid Galls Eastern U. S., p. 84.

Genus ANTISTROPHUS Walsh

Antistrophus Walsh, 1869. Amer. Ent. 2: 74.

Type-species: *Antistrophus lygodesmiaepisum* Walsh. Monotypic.

Asclepiadiphila Ashmead, 1897. Canad. Ent. 29: 263.

Type-species: *Asclepiadiphila stephanotidis* Ashmead. Monotypic.

Produce galls on various composites.

bicolor Gillette. Ill. Ecology: Said to produce galls on *Silphium integrifolium*.

Antistrophus bicolor Gillette, 1891. Ill. State Lab. Nat. Hist., Bul. 3: 197.

chrysanthemi (Beutenmueller). Ariz. Ecology: Produce galls on *Chrysanthemum* sp. that are stem swellings covered with feltlike pubescence.

Aulax chrysanthemi Beutenmueller, 1908. N. Y. Ent. Soc., Jour. 16: 45. ♀, ♂, gall.

laciniatus Gillette. Ill. Ecology: Produces minute galls among disk florets in flower heads of *Silphium laciniatum*.

Antistrophus laciniatus Gillette, 1891. Ill. State Lab. Nat. Hist., Bul. 3: 194. ♀, ♂, gall.

lygodesmiaepisum Walsh. Ill., N. Dak., S. Dak., Kans., Wyo., Colo., N. Mex. Ecology: Produces pea-shaped galls along stem of *Lygodesmia juncea*.

Antistrophus lygodesmiaepisum Walsh, 1869. Amer. Ent. 2: 73. ♀, ♂, gall.

Antistrophus pisum Ashmead, 1885. Amer. Ent. Soc., Trans. 12: 294.

Asclepiadiphila stephanotidis Ashmead, 1897. Canad. Ent. 29: 263. ♀, ♂, gall.

microseris (McCracken and Egbert). Calif. Ecology: Produces gall on stem of *Microseris* sp.

Aylax microseris McCracken and Egbert, 1922. Stanford Univ., Pubs., Univ. Ser. Biol. Sci. 3(1): 45. ♀, gall.

minor Gillette. Ill. Ecology: Bred from galls hidden in stems of *Silphium laciniatum*.

Antistrophus minor Gillette, 1891. Ill. State Lab. Nat. Hist., Bul. 3: 196. ♀, ♂, gall.

Aulax Gillettei Kieffer, 1902. Soc. Hist. Nat. Metz., Bul. (2) 10: 95. N. name unnecessarily proposed.

rufus Gillette. Ill., Kans. Ecology: Bred from galls hidden in stem of *Silphium laciniatum*.

Antistrophus rufus Gillette, 1891. Ill. State Lab. Nat. Hist., Bul. 3: 195. ♀, ♂, gall.

silphii Gillette. Va., Ill., Nebr. Ecology: Produces club-shaped subterminal stem galls on *Silphium perfoliatum*.

Antistrophus silphii Gillette, 1891. Ill. State Lab. Nat. Hist., Bul. 3: 192. ♀, ♂, gall.

Antistrophus leaveuworthi Bassett, 1900. Amer. Ent. Soc., Trans. 26: 310. ♀, ♂, gall.

Genus DIASTROPHUS Hartig

Diastrophus Hartig, 1840 (1839). Ztschr. f. Ent. 2: 186.

Type-species: *Diastrophus rubi* Hartig. Monotypic.

Produce galls on *Rubus*, *Fragaria*, *Potentilla*.

bassettii Beutenmueller. N. Y., N. J., Pa. Ecology: Produce irregularly globose galls half buried in ground at tips of running *Rubus* stems.

Diastrophus bassettii Beutenmueller, 1892. Amer. Mus. Nat. Hist., Bul. 4: 248. ♂, gall.

cuscutaeformis Osten Sacken. Conn. to S. C., w. to Ont., Ill., Iowa. Ecology: Produce seedlike galls on *Rubus* stems near ground level.

Diastrophus cuscutaeformis Osten Sacken, 1863. Ent. Soc. Phila., Proc. 2: 39. ♀, ♂, gall.

fragariae Beutenmueller. R. I., N. Y., s. to Va., w. to Ont., Ill. Ecology: Produce galls on petiole of strawberry, *Fragaria virginiana*.

Diastrophus fragariae Beutenmueller, 1915. Canad. Ent. 47: 353. ♂, gall.

Taxonomy: Weld, 1926. U. S. Natl. Mus., Proc. 68 (10): 118 (description of female).

fusiformans Ashmead. Ont., Colo. Ecology: Produce galls on *Potentilla* sp. that are slight swellings, often curved, in stems.

Diastrophus fusiformans Ashmead, 1890. Colo. Biol. Assoc., Bul. 1: 13, 38. ♀, gall.

kincaidii Gillette. Colo., Idaho, B. C., Wash., Oreg., Calif. Ecology: Produce lumpy and pithy stem galls on *Rubus parviflorus*.

Diastrophus kincaidii Gillette, 1893. Canad. Ent. 25: 110. ♀, ♂, gall.

Diastrophus kincaidii var. *austriior* Kinsey, 1922. Ind. Univ. Studies 53: 54. ♀, ♂, gall.

minimus Bassett. Mass., Conn., N. J. Ecology: Produce small, oval galls on internodes of *Potentilla canadensis*.

Diastrophus minimus Bassett, 1900. Amer. Ent. Soc., Trans. 26: 325. ♀, ♂, gall.

nebulosus (Osten Sacken). Conn. to Fla., w. to Ont., Kans., Okla. Ecology: Produce stem galls on *Rubus* sp., blackberries, that are large, abrupt, pithy, subterminal swellings with longitudinal grooves.

Cynips (*Diastrophus?*) *nebulosus* Osten Sacken, 1861. Stettin. Ent. Ztg. 22: 415. ♀, gall.

niger Bassett. Mass., N. Y., D. C., Mich., Ill., Mo., Ark. Ecology: Produce spindle-shaped stem galls on *Potentilla caudensis*.

Diastrophus niger Bassett, 1900. Amer. Ent. Soc., Trans. 26: 324. ♀, gall.

piceus Provancher. Ont. (Ottawa).

Diastrophus piceus Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 161. ♀, ♂.

radicum Bassett. Conn. s. to N. C., w. to Ont., Mich., Colo. Ecology: Produce irregular, globose root galls on black raspberry, *Rubus occidentalis*.

Diastrophus radicum Bassett, 1870. Canad. Ent. 2: 98. ♀, ♂, gall.

smilacis Ashmead. Ill. Originally described from specimens said to be from gall on *Smilax*; this species has not been reared again since. The plant record may be incorrect.

Diastrophus smilacis Ashmead, 1896. Amer. Ent. Soc., Trans. 19: 135. ♀, gall.

tumefactus Kinsey. Que., Ont. Ecology: Produce enlarged stem galls on *Potentilla*.

Diastrophus tumefactus Kinsey, 1920. Amer. Mus. Nat. Hist., Bul. 42: 299. ♀, gall.

turgidus Bassett. Que., Maine, Ont., Conn., D. C., N. Y., Ind., Ill., Mo. Ecology: Produce abrupt stem swelling galls on red raspberries, *Rubus strigosus*.

Diastrophus turgidus(!) Bassett, 1870. Canad. Ent. 2: 99. ♀, gall.

Diastrophus turgidus Bassett, 1870. Canad. Ent. 2: 100.

Genus LIPOSTHENES Foerster

Liposthenus (!) Foerster, 1869. Zool.-Bot. Gesell. Wien, Verh. 19: 332.

Liposthenes Foerster, 1869. Zool.-Bot. Gesell. Wien, Verh. 19: 336.

Type-species: *Aulax glechomae* Hartig. Orig. desig.

Produce galls on *Nepeta hederacea*, in Europe and North America.

glechomae (Linnaeus). Maine s. to Va., w. to Ont., W. Va., Ill. Europe. Ecology: Produce globular, green, fleshy galls on *Nepeta hederacea*. Introduced from Europe with its host plant and established in the Eastern U. S. and Ontario.

Cynips Glechomae Linnaeus, 1758. Syst. Nat., Ed. 10, p. 553. ♀, gall.

Diastrophus similis Bassett, 1881. Canad. Ent. 13: 95. ♀, gall.

Aulax Latreillei Kieffer, 1898. Wien. Ent. Ztg. 17: 257. ♀, ♂, gall.

Taxonomy: Weld, 1952. Cynipoidea 1905-1950, p. 273.

Genus AYLAX Hartig

Aylax Hartig, 1840 (1839). Ztschr. f. Ent. 2: 186, 195.

Type-species: *Cynips rhoeadis* Bouche. Desig. by Ashmead, 1903.

Aulax Hartig, 1843. Ztschr. f. Ent. 4: 412. Emend.

Pseudaulax Ashmead, 1903. Psyche 10: 213.

Type-species: *Cynips hieracii* Linnaeus. Orig. desig.

papaveris (Perris). North America ?; Europe. Ecology: Produce galls in seed-heads of *Papaver*. *Introduced from Europe into North America many times but not certainly known to be established here.*

Diplolepis papaveris Perris, 1840. Soc. Ent. France, Ann. 9: 95. ♀, ♂, gall.

quinquecostatus (Provancher). Ont. (Toronto).

Diastrophus 5-costatus Provancher, 1883. Nat. Canad. 14: 19. ♀, ♂.

Genus PHANACIS Foerster

Phanacis Foerster, 1860. Naturh. Ver. Rheinlande, Verh. 17: 145.

Type-species: *Phanacis centaureae* Foerster. Monotypic.

Timaspis Mayr, 1881. Zwanzig. Jahressber. Comm.-Oberrealisch. I. Bez. Wien., p. 18.

Type-species: *Diastrophus lampsanae* Karsch. Monotypic.

Gillettea Ashmead, 1897. Psyche 8: 69.

Type-species: *Gillettea taraxaci* Ashmead. Orig. desig.

Taxonomy: Eady and Quinlan, 1963. Handb. Ident. Brit. Ins. 8 (1a): 17-18.

hypochaeridis (Kieffer). Wash., Oreg., Calif.; Europe. Ecology: Produce stem swelling galls on *Hypochoeris radicata*. Introduced from Europe into Pacific Coast states.

Aulax hypochaeridis Kieffer, 1887. Zool.-Bot. Gesell. Wien, Verh. 37: 205. ♀, gall.

taraxaci (Ashmead). Ont., N. Y., Ill., Minn., Iowa; Hawaii, Europe. Ecology: Produce fusiform galls on petiole, leaf midrib, or base of peduncle. Introduced from Europe along with its host plant, *Taraxacum officinale*.

Gillettea taraxaci Ashmead, 1897. Psyche 8: 69. ♀, ♂, gall.

Genus AULACIDEA Ashmead

Anlacidea Ashmead, 1897. Psyche 8: 68.

Type-species: *Aulax mulgediicola* Ashmead. Orig. desig.

Produce galls on various composites.

abdita Kinsey. Que. Ecology: Produce cell-like galls in pith of *Lactuca*. This is doubtfully distinct from *harringtoni* (Ashmead).

Aulacidea abdita Kinsey, 1920. Amer. Mus. Nat. Hist., Bul. 42: 296. ♀, ♂, gall.

ambrosiaecola (Ashmead). Mo. (Kirkwood). Ecology: Supposed to produce galls on *Ambrosia*, but has not been found again since it was described.

Aulax ambrosiaecola Ashmead, 1896. U. S. Natl. Mus., Proc. 19: 134. ♀, ♂, gall.

- annulata** Kinsey. Mass. (Sharon). Ecology: Produce galls on *Lactuca*. This may be a synonym of *tumida* (Bassett).
- Aulacidea annulata* Kinsey, 1920. Amer. Mus. Nat. Hist., Bull. 42: 298. ♀, ♂, gall.
- harringtoni** (Ashmead). Ont. to D. C., w. to Mo. Ecology: Produce cell-like galls in pith of stems of *Lactuca villosa*, probably other species of *Lactuca* also.
- Aulax harringtoni* Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 146. ♀.
- Aulax bicolor* Gillette, 1891. Ill. State Lab. Nat. Hist., Bul. 3(1): 201. ♀.
- Aulax mulgedicola* Ashmead, 1896. U. S. Natl. Mus., Proc. 19: 133. ♀, ♂, gall.
- Aulax caricola* Ashmead, 1896. U. S. Natl. Mus., Proc. 19: 134. ♀.
- nabali** (Brodie). Que. to N. C., w. to Ill. Ecology: Produce stem galls on *Prenanthes*, these hemispherical swellings on the stem just below surface of ground.
- Aulax nabali* Brodie, 1892. Canad. Ent. 24: 12. ♀, ♂, gall.
- podagrae** (Bassett). N. Y., Pa., Va., Ill., Mo. Ecology: Produce knotty stem galls on *Lactuca canadensis*, these scattered along stem at leaf bases.
- Aulax podagrae* Bassett, 1890. Amer. Ent. Soc., Trans. 17: 91. ♀, ♂, gall.
- tumida** (Bassett). Ont. to Va., w. to Ill. Ecology: Produce galls that are swellings near apex of stem of *Lactuca canadensis* and *Sonchus*.
- Aulax tumidus* Bassett, 1890. Amer. Ent. Soc., Trans. 17: 92. ♀, ♂, gall.
- Aulax sonchicola* Ashmead, 1896. U. S. Natl. Mus., Proc. 19: 134. ♀, ♂, gall.
- Aulacidea solidaginis* Girault, 1903. Ent. News 14: 323. ♀, ♂, gall.
- ### Genus DIPLOLEPIS Fourcroy
- Diplolepis* Geoffroy, 1762. Hist. Abregee des Ins., v. 2, p. 308. Not available for nomenclatorial purposes, Internat'l. Comm. Zool. Nomencl., Opinion 228, 1954.
- Diplolepis* Fourcroy, 1785. Ent. Parisiensis, pt. 2, p. 391.
- Type-species: *Cynips rosae* Linnaeus. Desig. by Karsch, 1880.
- Rhodites* Hartig, 1840 (1839). Ztschr. f. Ent. 2: 186.
- Type-species: *Cynips rosae* Linnaeus. Desig. by Foerster, 1869.
- Hololexis* Foerster, 1869. Zool.-Bot. Gesell. Wien, Verh. 19: 330, 333.
- Type-species: *Hololexis rufipes* Foerster. Monotypic.
- Tribalia* Walsh, 1864. Ent. Soc. Phila., Proc. 2: 470.
- Type-species: *Tribalia batatorum* Walsh. Monotypic.
- Lytorrhodites* Kieffer, 1902. Soc. Hist. Nat. Metz., Bul. (2) 10: 96.
- Type-species: *Rhodites arefactus* Gillette. Desig. by Rohwer and Fagan, 1917.
- Produce galls on *Rosa*. It is unfortunately true that the bulk of the literature about this genus used the generic name *Rhodites*. There is some sentiment for asking the Commission to place *Rhodites* on the list of conserved names, but no such proposal has been presented. As the years pass and literature accumulates using the name *Diplolepis*, the likelihood of such a proposal being made to the Commission becomes increasingly less likely.
- arefacta** (Gillette). Colo., Ariz., Utah, Nev., Wash. Ecology: Produce galls on small shoots of *Rosa*.
- Rhodites arefactus* Gillette, 1894. Canad. Ent. 26: 157. ♀, ♂, gall.
- ashmeadi** (Beutenmueller). Oreg. Ecology: Produce globose galls on *Rosa nutkana* stems.
- Rhodites ashmeadi* Beutenmueller, 1918. Canad. Ent. 50: 306. ♀, gall.
- bassetti bassetti** (Beutenmueller). Wash., Oreg. Ecology: Produce clusters of small, woody galls with fine, curled filaments on twigs of *Rosa nutkana*.
- Rhodites bassetti* Beutenmueller, 1918. Canad. Ent. 50: 307. ♀, ♂, gall.
- bassetti lucida** Kinsey. Idaho, Oreg. Ecology: Produce clusters of small woody galls with stout, straight filaments on twigs of *Rosa nutkana*.
- Diplolepis bassetti* var. *lucida* Kinsey, 1922. Ind. Univ. Studies 53: 57. ♀, ♂, gall.
- bicolor** (Harris). Maine to Va., w. to Ill. Ecology: Produce spherical, spiny leaf galls on *Rosa*; galls may completely conceal leaves.
- Cynips bicolor* Harris, 1841. Rpt. Ins. Mass. Injurious to Veg., p. 399. ♀, ♂, gall.

- californica** (Beutenmueller). Wash., Oreg., Calif. Ecology: Produce fairly large, spherical galls on terminals of *Rosa* twigs; gall covered with dense, irregular filaments and semi-aborted leaves.
- Rhodites californicus* Beutenmueller, 1914. Brooklyn Ent. Soc., Bul. 9: 88. ♀, ♂, gall.
- dichlocera** (Harris). Ont. to Va. w. to Ill. Ecology: Produce fusiform stem galls on *Rosa*; galls usually with prickly surface.
- Cynips dichlocerus* Harris, 1841. Rpt. Ins. Mass. Injurious to Veg., p. 399. ♀, ♂, gall.
- fulgens** (Gillette). Conn., Ont., N. Y., N. J., W. Va., Ill., Minn., S. Dak., Colo. Ecology: Produce potatolike root galls on *Rosa blanda*.
- Rhodites fulgens* Gillette, 1894. Canad. Ent. 26: 159. ♀.
- fusiformans fusiformans** (Ashmead). Ont., Ill., Nebr., Colo., Ariz. Ecology: Produce fusiform or abrupt, one-sided enlargements of stems of *Rosa*.
- Rhodites fusiformans* Ashmead, 1890. Colo. Biol. Assoc., Bul. 1: 14. ♀, ♂, gall.
- fusiformans mendocinensis** Kinsey. Calif. Ecology: Produce polythalamous stem galls on *Rosa*.
- Diplolepis fusiformans* var. *mendocinensis* Kinsey, 1922. Ind. Univ. Studies 53: 62. ♀, ♂, gall.
- fusiformans minuta** Kinsey. Calif. Ecology: Produce small stem galls on *Rosa*, each gall containing 4 or less cells.
- Diplolepis fusiformans* var. *minuta* Kinsey, 1922. Ind. Univ. Studies 53: 61. ♀, ♂, gall.
- gracilis** (Ashmead). Mass., Conn., Ont., N. Y., Ill., Wis., Utah. Ecology: Produce galls on under side of *Rosa* leaves; galls single or in clusters, each one globular with flattened top.
- Rhodites gracilis* Ashmead, 1897. U. S. Natl. Mus., Proc. 19: 135. ♀, ♂, gall.
- ignota** (Osten Sacken). Ont. to Va. w. to Ill. Ecology: Produce globular, hard, many-celled galls on under side of leaves of *Rosa*; several galls may coalesce into an irregular mass; surface of gall covered with mealy, white bloom. Mealy rose gall.
- Rhodites ignota* Osten Sacken, 1863. Ent. Soc. Phila., Proc. 2: 45, 49, 63. ♀, ♂, gall.
- Rhodites carolina* Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 133, 148. ♀, gall.
- lens** Weld. Wash., Oreg., Calif. Ecology: Produce small lens-shaped leaf galls on *Rosa nutkana*.
- Diplolepis lens* Weld, 1952. U. S. Natl. Mus., Proc. 102: 320. ♀, ♂.
- mayri** (Schlechtendal). N. J., Ohio; Europe. Ecology: Produce lobed, terminal stem galls on *Rosa rubiginosa*. Introduced from Europe; first identified from New Jersey specimens in 1914.
- Rhodites mayri* Schlechtendal, 1877 (1876). Jabresber. Ver. Zwickau, p. 59. ♀, gall.
- nebulosa** (Bassett). Conn., Ont., N. Y., N. J., Ill. Ecology: Produce small, globular galls on under side of leaves of *Rosa*; galls with a few, weak spines.
- Rhodites nebulosus* Bassett, 1890. Amer. Ent. Soc., Trans. 17: 63. ♀, gall.
- neglecta** (Gillette). Colo. Ecology: Produce abrupt, corky enlargements of small stems of *Rosa*; surface of galls smooth.
- Rhodites neglectus* Gillette, 1894. Canad. Ent. 26: 158. ♀, ♂, gall.
- nodulosa** (Beutenmueller). Mass., Md., Mich., Ill. Ecology: Produce hardly perceptible enlargements of base of lateral branches of *Rosa*, branches dying beyond galled area.
- Rhodites nodulosus* Beutenmueller, 1909. Ent. News 20: 247. ♀, gall.
- oregonensis** (Beutenmueller). Oreg. Ecology: Produce galls in buds of *Rosa* in spring, these galls greatly distorting the buds.
- Rhodites oregonensis* Beutenmueller, 1918. Canad. Ent. 50: 305. ♀, gall.
- ostensackeni** (Beutenmueller). Oreg. Ecology: Produce root galls on *Rosa nutkana*.
- Rhodites ostensackeni* Beutenmueller, 1918. Canad. Ent. 50: 307. ♀, gall.
- polita** (Ashmead). Ariz., Oreg., Calif. Ecology: Produce spherical, spiny leaf galls on *Rosa californica*.
- Rhodites polita* Ashmead, 1890. Colo. Biol. Assoc., Bul. 1: 14. ♀, ♂, gall.
- Rhodites occidentalis* Beutenmueller, 1922. Brooklyn Ent. Soc., Bul. 17: 45. ♀, ♂, gall.
- pustulatooides** (Beutenmueller). Va., Ind., Tenn., Colo., Utah, Oreg. Ecology: Produce small, round or ovate galls on upper surface of *Rosa* leaves.
- Rhodites pustulatooides* Beutenmueller, 1914. Brooklyn Ent. Soc., Bul. 9: 89. ♀, ♂.

- radicum** (Osten Sacken). Ont. and Mass. to Va., w. to Sask., Wash., Oreg. Ecology: Produce large, potatolike galls on roots or stems of *Rosa* at ground level; galls usually hidden by soil surface litter.
Rhodites radicum Osten Sacken, 1863. Ent. Soc. Phila., Proc. 2: 42, 45, 46. ♀, ♂, gall.
Tribalia batatorum Walsh, 1864. Ent. Soc. Phila., Proc. 2: 470. ♀.
Rhodites atahensis Bassett, 1890. Amer. Ent. Soc., Trans. 17: 62. ♀, ♂, gall.
Diplolepis radicum var. *johsoni* Kinsey, 1922. Ind. Univ. Studies 53: 67. ♀, ♂, gall.
Diplolepis radicum var. *plana* Kinsey, 1922. Ind. Univ. Studies 53: 70. ♀, gall.
Diplolepis radicum var. *divergens* Kinsey, 1922. Ind. Univ. Studies 53: 70. ♀, ♂, gall.
Diplolepis radicum var. *angustior* Hunter, 1923. Psyche 30: 173. ♀, ♂, gall.
- rosae** (Linnaeus). Que. to Va., w. to Kans.; Europe. Ecology: Produce large, 2-to 4-inch diameter, spherical stem galls on *Rosa eglanteria* and *R. rugosa*; surface of gall densely filamentous. Introduced from Europe, first found in Toronto, Ont. in 1868. Mossy rose gall.
Cynips rosae Linnaeus, 1758. Syst. Nat., Ed. 10, p. 553. ♀, gall.
- rosaefoli** (Cockerell). Ont., N. Y., Ohio, Mich., Ill. Ecology: Produce lentil-shaped leaf galls on *Rosa*.
Rhodites rosaefoli Cockerell, 1889. Ent. Monthly Mag. 25: 324, 363. ♀, gall.
Rhodites lenticularis Bassett, 1890. Amer. Ent. Soc., Trans. 17: 59. ♀, ♂, gall.
- similis** (Ashmead). Wyo., Colo., N. Mex. Ecology: Produce semi-spherical twig galls on *Rosa*; surface of galls smooth.
Rhodites similis Ashmead, 1896. U. S. Natl. Mus., Proc. 19: 136. ♀, ♂, gall.
- spinosa** (Ashmead). Ohio, Wis., Ill., Man., Minn., Sask., Alta. Ecology: Produce irregularly lobed, subterminal stem galls on *Rosa*; surface of galls densely spinose.
Rhodites spinosa Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 134. gall.
Rhodites spinosissima Gillette, 1889. Iowa Agr. Expt. Sta., Bul. 7: 284. Preocc. by Giraud, 1859.
Rhodites multispinosa Gillette, 1890. Ent. Amer. 6: 25. ♀, ♂, gall.
- terrigena** Weld. Calif. Ecology: Produce subterranean galls at crown of *Rosa* plants; gall rather shaped like a bunch of grapes.
Diplolepis terrigena Weld, 1952. U. S. Natl. Mus., Proc. 102: 320. ♀, ♂, gall.
- tuberculatrix** (Cockerell). N. Dak., Colo., N. Mex., Utah, Wash., Oreg., Calif. Ecology: Produce abrupt, semi-spherical stem galls on *Rosa*; galls with numerous cells and outer surface bears scattered spines.
Rhodites tuberculatrix Cockerell, 1888. West. Amer. Sci. 4: 60. ♀, gall.
Diplolepis tuberculatrix var. *coloradensis* form *coloradensis* Kinsey and Ayres, 1922. Ind. Univ. Studies 53: 149. ♀, ♂, gall.
Diplolepis tuberculatrix var. *coloradensis* form *subcoloradensis* Kinsey and Ayres, 1922. Ind. Univ. Studies 53: 150. ♀, gall.
Diplolepis tuberculatrix var. *wasatchensis* Kinsey and Ayres, 1922. Ind. Univ. Studies 53: 153. ♀, ♂, gall.
Diplolepis tuberculatrix var. *versicolor* Kinsey and Ayres, 1922. Ind. Univ. Studies 53: 156. ♀, gall.
Diplolepis tuberculatrix var. *melanderi* Kinsey and Ayres, 1922. Ind. Univ. Studies 53: 156. ♀, ♂, gall.
Diplolepis tuberculatrix var. *rubriderma* Kinsey and Ayres, 1922. Ind. Univ. Studies 53: 157. ♀, ♂, gall.
Diplolepis tuberculatrix var. *sierranensis* Kinsey and Ayres, 1922. Ind. Univ. Studies 53: 158. ♀, ♂, gall.
Diplolepis tuberculatrix var. *descauzonis* Kinsey and Ayres, 1922. Ind. Univ. Studies 53: 159. ♀, ♂, gall.
- tumida** (Bassett). Utah. Ecology: Produce terminal stem swellings on *Rosa*.
Rhodites tumidus Bassett, 1890. Amer. Ent. Soc., Trans. 17: 60. ♀, ♂, gall.
Diplolepis tuberculatrix var. *tumida* form *xerophila* Kinsey and Ayres, 1922. Ind. Univ. Studies 53: 151. ♀, ♂, gall.

variabilis (Bassett). N. Dak., N. Mex., Utah, Ariz., Wash., Oreg. Ecology: Produce irregularly round, smooth, russet colored leaf galls on *Rosa*.

Rhodites variabilis Bassett, 1890. Amer. Ent. Soc., Trans. 17: 61. ♀, ♂, gall.

Rhodites globuloides Beutenmueller, 1907. Amer. Mus. Nat. Hist., Bul. 23: 638. ♀.

variabilis var. *lutescens* Kinsey, Colo.

Diplolepis variabilis var. *lutescens* Kinsey, 1922. Ind. Univ. Studies 53: 77. ♀, ♂.

variabilis var. *rufopicea* Kinsey, Colo.

Diplolepis variabilis var. *rufopicea* Kinsey, 1922. Ind. Univ. Studies 53: 76. ♀, ♂.

variabilis var. *sculpta* Kinsey, Utah.

Diplolepis variabilis var. *sculpta* Kinsey, 1922. Ind. Univ. Studies 53: 75. ♀, ♂.

verna (Osten Sacken). P. E. I., Ont., s. to D. C. Ecology: Produce rounded enlargements of small *Rosa* stems.

Rhodites verna Osten Sacken, 1863. Ent. Soc. Phila., Proc. 2: 41, 45, 47. ♀, ♂, gall.

weldi (Beutenmueller). Calif. Ecology: Produce clusters of leaf galls on *Rosa*.

Rhodites weldi Beutenmueller, 1913. Insector Inscitiae Menstruus 1: 93. ♂, gall.

Genus NEUROTERUS Hartig

Neuroterus Hartig, 1840 (1839). Ztschr. f. Ent. 2: 185, 192.

Type-species: *Neuroterus politus* Hartig. Desig. by Ashmead, 1903.

Spathegaster Hartig, 1840 (1839). Ztschr. f. Ent. 2: 186.

Type-species: *Spathegaster petioliventris* Hartig. Monotypic.

Ameristus Foerster, 1869. Zool.-Bot. Gesell. Wien, Verh. 19: 330,333.

Type-species: *Neuroterus politus* Hartig. Desig. by Rohwer and Fagan, 1917.

Dolichostrophus Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 129 (footnote).

Type-species: *Cynips irregularis* Osten Sacken. Monotypic.

Neuroterus subg. *Neospathegaster* Kinsey, 1923. Ind. Univ. Studies 58: 28, 35, 121.

Type-species: *Cynips vesicula* Bassett. Orig. desig.

Neuroterus subg. *Diplobius* Kinsey, 1923. Ind. Univ. Studies 58: 27, 28-31, 35.

Type-species: *Cynips floccosa* Bassett. Orig. desig.

Neuroterus subg. *Pseudoneuroterus* Kinsey, 1923. Ind. Univ. Studies 58: 28, 130.

Type-species: *Cynips macropterus* Hartig. Orig. desig.

Produce galls on white oaks only.

affinis (Bassett). Conn. Ecology: Produce bud galls on *Quercus prinoides*.

Cynips affinis Bassett, 1881. Canad. Ent. 13: 103. ♀, ♂, gall.

argentinatus Weld. Ariz. Ecology: Produce leaf galls on *Quercus gambelii*, *Q. oblongifolia*.

Neuroterus argentinatus Weld, 1944. U. S. Natl. Mus., Proc. 95: 2. ♀, gall.

bassettii Dalla Torre. Conn. Ecology: Produce leaf galls on *Quercus alba*.

Neuroterus pallipes Bassett, 1890. Amer. Ent. Soc., Trans. 17: 89. ♀, ♂, gall. Preocc. by Schenck, 1863.

Neuroterus bassettii Dalla Torre, 1892. Wien. Ent. Ztg. 11: 131. N. name.

clarkeae Beutenmueller. Mass. Ecology: Produce stem galls on *Quercus alba*.

Neuroterus clarkeae Beutenmueller, 1910. Amer. Mus. Nat. Hist., Bul. 28: 132. ♀, ♂, gall.

clavensis Weld. Colo., N. Mex., Ariz. Ecology: Produce stem galls on *Quercus gambelii*, *Q. subterminella*.

Neuroterus clavensis Weld, 1944. U. S. Natl. Mus., Proc. 95: 3, ♀, gall.

cockerelli Beutenmueller. Colo. Ecology: Produce leaf galls on *Quercus* sp.

Neuroterus cockerelli Beutenmueller, 1910. Amer. Mus. Nat. Hist., Bul. 28: 125. ♀, gall.

congregatus Gillette. Colo. Ecology: Produce bud galls on *Quercus* sp.

Neuroterus congregatus Gillette, 1893. Ent. News 4: 166. ♂, gall.

consimilis Bassett. Conn. Ecology: Produce stem galls on *Quercus alba*.

Neuroterus consimilis Bassett, 1900. Amer. Ent. Soc., Trans. 26: 335. ♀, gall.

contortus (Weld). Tex. Ecology: Produce galls at bases of sprouts of *Quercus brevirobusta*.

Xystoteras contorta Weld, 1921. U. S. Natl. Mus., Proc. 59: 191, 209. ♀, gall. Agamic gen.

Xystoteras contortus, bisexual form *principalis* Kinsey, 1923. Ind. Univ. Studies 58: 92. ♀, ♂, gall. Sexual gen.

- cupulae** Kinsey. Calif. Ecology: Produce galls in cup at base of acorn on *Quercus lobata*.
Neuroterus cupulae Kinsey, 1922. Ind. Univ. Studies 53: 99. ♀, gall.
- distortus** Bassett. Conn., N. Y., N. J., Ill. Ecology: Produce stem galls on *Quercus bicolor*.
Neuroterus distortus Bassett, 1900. Amer. Ent. Soc., Trans. 26: 336. ♀, ♂, gall.
- dubius** Bassett. Conn. Call unknown.
Neuroterus dubius Bassett, 1900. Amer. Ent. Soc., Trans. 26: 335. ♀, ♂.
- dubius** var. **digressus** Kinsey. Calif.
Neuroterus dubius var. *digressus* Kinsey, 1923. Ind. Univ. Studies 53: 32, 96. ♀.
- engelmanni** Kinsey. Calif. Ecology: Produce leaf galls on *Quercus engelmanni*.
Neuroterus engelmanni Kinsey, 1922. Amer. Mus. Nat. Hist., Bul. 46: 293. ♀, gall.
- escharensis** Weld. Ill. Ecology: Produce stem galls on *Quercus bicolor*.
Neuroterus escharensis Weld, 1926. U. S. Natl. Mus., Proc. 68 (10): 5. ♀, gall.
- evanescens** Kinsey. Tex. Ecology: Produce galls on aments of *Quercus brevirostra*.
Neuroterus evanescens Kinsey, 1922. Ind. Univ. Studies 53: 100. ♀, ♂, gall.
- evolutus** Weld. Calif. Ecology: Produce stem galls on *Quercus douglasii*, *Q. lobata*.
Neuroterus evolutus Weld, 1926. U. S. Natl. Mus., Proc. 68 (10): 6. ♀, gall.
- exiguissimus** Bassett. Mass., Conn., N. Y., N. J., Va. Ecology: Produce leaf galls on *Quercus alba*.
Neuroterus exiguissimus Bassett, 1900. Amer. Ent. Soc., Trans. 26: 332. ♀, gall.
- exiguus** Bassett. Conn., N. Y., N. J., Va. Ecology: Produce galls on aments of *Quercus stellata*.
Neuroterus exiguus Bassett, 1900. Amer. Ent. Soc., Trans. 26: 333. ♀, ♂, gall.
- floccosus** (Bassett). Ont. to Va., w. to Ill. Ecology: Produce leaf galls on *Quercus bicolor*.
Cynips floccosa Bassett, 1881. Canad. Ent. 13: 111. ♀, gall.
Neuroterus verrucarum var. *pernotus* Kinsey, 1923. Ind. Univ. Studies 58: 30, 74. ♀, gall.
- floricola** Kinsey. Calif. Ecology: Produce ament galls on *Quercus douglasii*.
Neuroterus floricola Kinsey, 1922. Ind. Univ. Studies 53: 101. ♀, ♂, gall.
- floricomus** Weld. Ariz. Ecology: Produce galls on aments of *Quercus arizonica*, *Q. oblongifolia*, *Q. reticulata*, *Q. toumeyi*.
Neuroterus floricomus Weld, 1957. U. S. Natl. Mus., Proc. 107: 109. ♀, ♂, gall.
- florulentus** Weld. Calif. Ecology: Produce galls on aments of *Quercus dumosa*, *Q. lobata*.
Neuroterus florulentus Weld, 1957. U. S. Natl. Mus., Proc. 107: 110. ♀, ♂, gall.
- fragilis** Bassett. Calif. Ecology: Produce leaf galls on *Quercus douglasii*, *Q. dumosa*.
Neuroterus fragilis Bassett, 1900. Amer. Ent. Soc., Trans. 26: 335. ♀, ♂, gall.
Neuroterus pacificus Beutenmueller, 1918. Brooklyn Ent. Soc., Bul. 13: 119. ♀, ♂, gall.
- fugiens** Weld. Ill. Ecology: Produces leaf galls on *Quercus macrocarpa*.
Neuroterus fugiens Weld, 1926. U. S. Natl. Mus., Proc. 68: (10): 12. ♀, ♂, gall.
- gillettei** Bassett. Conn., Va. Ecology: Produces leaf galls on *Quercus stellata*.
Neuroterus Gillettei Bassett, 1900. Amer. Ent. Soc., Trans. 26: 334. ♀, ♂, gall.
- howertoni** Bassett. N. Mex., Ariz. Ecology: Produce leaf galls on *Quercus arizonica*, *Q. oblongifolia*.
Neuroterus howertoni Bassett, 1890. Amer. Ent. Soc., Trans. 17: 90. ♀, gall.
- lamellae** Weld. Ariz. Ecology: Produce leaf galls on *Quercus subturbinella*.
Neuroterus lamellae Weld, 1957. U. S. Natl. Mus., Proc. 107: 109-110. ♀, gall.
- minutus** (Bassett). Mass., Conn., Ont., Pa., Va. Ecology: Produce bud galls on *Quercus alba*.
Cynips minuta Bassett, 1881. Canad. Ent. 13: 96. ♀, ♂, gall.
- niger** Gillette. Mass., Mich., Wis., Iowa. Ecology: Produce leaf galls on *Quercus macrocarpa*.
Neuroterus nigrinus Gillette, 1888. Mich. State Bd. Agr., Rpt. 27: 475. ♀, gall.
- niger** var. **alimas** Kinsey. Tex. Ecology: Produce leaf galls on *Quercus virginiana*.
Neuroterus niger var. *alimas* Kinsey, 1923. Ind. Univ. Studies 58: 30, 42. ♀, ♂, gall.
- niger** var. **arizonicae** Kinsey. Ariz. Ecology: Produce leaf galls on *Quercus arizonica*.
Neuroterus niger var. *arizonicae* Kinsey, 1923. Ind. Univ. Studies 58: 30, 43. ♀, gall.
- niger** var. **griseae** Kinsey. Tex. Ecology: Produce leaf galls on *Quercus grisea*.
Neuroterus niger var. *griseae* Kinsey, 1923. Ind. Univ. Studies 58: 31, 44. ♀, gall.

- niger** var. **nigripes** Kinsey. Tex. Ecology: Produce leaf galls on *Quercus brevirostra*, *Q. stellata*.
Neuroterus niger var. *nigripes* Kinsey, 1923. Ind. Univ. Studies 58: 14, 31, 45. ♀, gall.
- niger** var. **pattersoni** Kinsey. Tex. Ecology: Produce leaf galls on *Quercus brevirostra*, *Q. stellata*.
Neuroterus niger var. *pattersoni* Kinsey, 1923. Ind. Univ. Studies 58: 14, 31, 47. ♀, ♂, gall.
 Sexual gen.
Neuroterus niger var. *pattersoni*, agamic form *hiemalis* Kinsey, 1923. Ind. Univ. Studies 58: 47. ♀. Agamic gen.
- noxiosus** (Bassett). Mass., Conn., s. to W. Va., w. to Ill. Ecology: Produce galls on *Quercus bicolor*, sexual generation on leaves, agamic generation on stems.
Cynips noxiosus Bassett, 1881. Canad. Ent. 13: 108. ♀, ♂, gall. Sexual and agamic gen.
Neuroterus noxiosus form *vernalis* Kinsey, 1920. Amer. Mus. Nat. Hist., Bul. 42: 337. ♀, ♂, gall. Sexual gen.
- pallidus** Bassett. Conn., N. Y., N. J. Ecology: Produce galls on aments on *Quercus bicolor*.
Neuroterus pallidus Bassett, 1890. Amer. Ent. Soc., Trans. 17: 88. ♀, ♂, gall.
- papillosus** Beutenmueller. N. Y., N. J., Ind., Ill. Ecology: Produce leaf galls on *Quercus bicolor*.
Neuroterus papillosus Beutenmueller, 1910. Amer. Mus. Nat. Hist., Bul. 28: 121. ♀, ♂, gall.
- perminimus** Bassett. Ont., N. Y., Md., Va., Ohio, Ill. Ecology: Produce leaf galls on *Quercus alba*.
Neuroterus perminimus Bassett, 1900. Amer. Ent. Soc., Trans. 26: 332. ♀, ♂, gall.
- quericeola** Dalla Torre. Utah. Ecology: Produce leaf galls on *Quercus* sp.
Neuroterus politus Bassett, 1890. Amer. Ent. Soc., Trans. 17: 89. ♂, gall. Preocc. by Hartig, 1840.
Neuroterus quericeola Dalla Torre, 1892. Wien. Ent. Ztg. 11: 131. N. name.
- quericola** var. **pubescens** Kinsey. Ariz.
Neuroterus quericola var. *pubescens* Kinsey, 1923. Ind. Univ. Studies 58: 114. ♀, gall.
- quercusbatatus** (Fitch). Conn., Ont., s. to Fla., w. to Ill. Ecology: Produce stem galls on *Quercus alba*, in both sexual and agamic generations.
Cynips Quercus-batatus Fitch, 1859 (1858). N. Y. State Agr. Soc., Trans. 18: 810. ♀, ♂.
 Sexual gen.
Cynips q. batatus Fitch, 1864. In Bassett, Ent. Soc. Phila., Proc. 3: 684. ♀, ♂, gall.
Neuroterus batatus var. *bisexualis* Kinsey, 1920. Amer. Mus. Nat. Hist., Bul. 42: 334. ♀, ♂, gall.
- quercusbatatus** var. **prini** Kinsey. R. I. Ecology: Produce stem galls on *Quercus prinus*.
Neuroterus batatus var. *prini*, bisexual form *prini* Kinsey, 1923. Ind. Univ. Studies 58: 33, 88. ♀, gall. Sexual gen.
Neuroterus batatus var. *prini*, agamic form *deprini* Kinsey, 1923. Ind. Univ. Studies 58: 89. ♀, gall. Agamic gen.
- querucusirregularis** (Osten Sacken). N. Y., w. to Mo., Okla., Tex. Ecology: Produce leaf galls on *Quercus brevirostra*, *Q. stellata*.
Cynips querucusirregularis Osten Sacken, 1861. Ent. Soc. Phila., Proc. 1: 65. ♂, gall.
Cynips irregularis Osten Sacken, 1865. Ent. Soc. Phila., Proc. 4: 340, 344, 349, 353, 379.
- querucusirregularis** var. **albipleurae** Kinsey. Tex.
Neuroterus irregularis var. *albipleurae* Kinsey, 1923. Ind. Univ. Studies 58: 14, 34, 99. ♀, gall.
- querucusirregularis** var. **variegatus** Kinsey. Okla.
Neuroterus irregularis var. *variegatus* Kinsey, 1923. Ind. Univ. Studies 58: 14, 35, 102. ♀, ♂.
- quercusmajalis** (Bassett). Ont. to Fla., w. to Ill., Mo. Ecology: Produce leaf galls on *Quercus alba*.
Cynips q. majalis Bassett, 1864. Ent. Soc. Phila., Proc. 3: 682. ♀, ♂, gall.
Cynips majalis Osten Sacken, 1865. Ent. Soc. Phila., Proc. 4: 353.
- quercusminutissimus** (Ashmead). Fla. Ecology: Produce leaf galls on *Quercus virginiana*.
Cynips q. minutissima Ashmead, 1885. Amer. Ent. Soc., Trans. 12: Proc. p. vii. ♀, gall.
Neuroterus minutissimus Ashmead, 1885. Amer. Ent. Soc., Trans. 12: 296.

quercusrileyi (Bassett). Mass. to Va., w. to Ind., Mo., Okla., Tex. Ecology: Produce stem galls on *Quercus muehlenbergii*, *Q. prinoides*, *Q. prinus*.

Cynips. q. rileyi Bassett, 1881. Amer. Nat. 15: 149. ♀, gall.

Neuroterus Rileyi Ashmead, 1885. Amer. Ent. Soc. Trans. 12: 296.

quercusrileyi var. *atipleurae* Kinsey. Okla.

Neuroterus rileyi var. *atipleurae* Kinsey, 1923. Ind. Univ. Studies 58: 32, 118. ♀, gall.

quercusrileyi var. *mutatus* Kinsey. Tex.

Neuroterus rileyi var. *mutatus* Kinsey, 1923. Ind. Univ. Studies 58: 20, 32, 118. ♀, gall.

quercusrileyi var. *thompsoni* Kinsey. Mass.

Neuroterus thompsoni Kinsey, 1920. Amer. Mus. Nat. Hist., Bul. 42: 301. ♀, ♂, gall.

Neuroterus rileyi var. *thompsoni* Kinsey, 1923. Ind. Univ. Studies 58: 32, 120.

querucusverrucarum (Osten Sacken). N. Y. to Fla., w. to Okla., Tex. Ecology: Produce leaf galls on *Quercus brevirostra*, *Q. chapmanii*, *Q. macrocarpa*, *Q. stellata*.

Cynips querucus verrucarum Osten Sacken, 1861. Ent. Soc. Phila., Proc. 1: 62. ♀, gall.

Cynips verrucarum Osten Sacken, 1865. Ent. Soc. Phila., Proc. 4: 354.

querucusverrucarum var. *inficiens* Kinsey. Tex.

Neuroterus verrucarum var. *inficiens* Kinsey, 1923. Ind. Univ. Studies 58: 14, 30, 71. ♀, gall.

querucusverrucarum var. *macrocarpae* Kinsey. Tex.

Neuroterus verrucarum var. *macrocarpae* Kinsey, 1923. Ind. Univ. Studies 58: 30, 72. ♀, gall.

querucusverrucarum var. *opacus* Kinsey. Tex.

Neuroterus verrucarum var. *opacus* Kinsey, 1923. Ind. Univ. Studies 58: 14, 15, 30, 73. ♀, gall.

querucusverrucarum var. *pulvinus* Kinsey. Tex.

Neuroterus verrucarum var. *pulvinus* Kinsey, 1923. Ind. Univ. Studies 58: 11, 15, 30, 75. ♀, gall.

querucusverrucarum var. *restrictus* Kinsey. Fla.

Neuroterus verrucarum var. *restrictus* Kinsey, 1923. Ind. Univ. Studies 58: 14, 30, 77. ♀, gall.

sadlerensis Weld. Oreg. Ecology: Produce leaf galls on *Quercus sadleriana*.

Neuroterus sadlerensis Weld, 1926. U. S. Natl. Mus., Proc. 68 (10): 9. ♀, ♂, gall.

saltarius Weld. Mich., Ind., Minn., Iowa, Mo. Ecology: Produce leaf galls on *Quercus macrocarpa*.

Neuroterus saltarius Weld, 1926. U. S. Natl. Mus., Proc. 68 (10): 11. ♀, gall.

saltatorius (Edwards). Tex., Ariz., Calif. Ecology: Produce leaf galls in agamic and sexual generations on *Quercus arizonica*, *Q. douglasii*, *Q. dumosa*, *Q. garryana*, *Q. lobata*, *Q. stellata*, *Q. virginiana*.

Cynips Saltatorius Edwards, 1874. Pacific Rural Press 7: 97. ♀, gall.

Neuroterus decipiens Kinsey, 1922. Amer. Mus. Nat. Hist., Bul. 46: 292. ♀, ♂, gall. Sexual gen.

Taxonomy: Rosenthal and Koehler, 1971. Ent. Soc. Amer., Ann. 64: 565-570.

saltatorius var. *australis* Kinsey. Tex.

Neuroterus saltatorius var. *australis* Kinsey, 1923. Ind. Univ. Studies 58: 31, 51. ♀, gall.

saltatorius var. *decrescens* Kinsey. Ariz.

Neuroterus saltatorius var. *decrescens* Kinsey, 1923. Ind. Univ. Studies 58: 31, 52. ♀, gall.

saltatorius var. *texanus* Kinsey. Tex.

Neuroterus saltatorius var. *texanus* Kinsey, 1923. Ind. Univ. Studies 58: 31, 56.

tantulus Weld. Md. Ecology: Produce leaf galls on *Quercus alba*.

Neuroterus tantulus Weld, 1952. U. S. Natl. Mus., Proc. 102: 321. ♀, gall.

tectus Bassett. Mass., Conn., R. I., N. Y. Ecology: Produce stem galls on *Quercus prinoides*.

Neuroterus tectus Bassett, 1900. Amer. Ent. Soc., Trans. 26: 331. ♀, ♂, gall. Agamic gen.

Neuroterus tectus form. *abundans* Kinsey, 1920. Amer. Mus. Nat. Hist., Bul. 42: 339. ♀.

umbilicatus Bassett. Conn., Ont., s. to Va. Ecology: Produce leaf galls on *Quercus bicolor*.

Neuroterus umbilicatus Bassett, 1900. Amer. Ent. Soc., Trans. 26: 330. ♀, gall.

varians Kinsey. Calif. Ecology: Produce stem galls on *Quercus douglasii*, *Q. lobata*.

Neuroterus varians Kinsey, 1922. Amer. Mus. Nat. Hist., Bul. 46: 294. ♀, gall.

vernus Gillette. Iowa. Ecology: Produce leaf galls on *Quercus macrocarpa*.

Neuroterus vernus Gillette, 1889. Iowa Agr. Expt. Sta., Bul. 7: 281. ♀, gall.

vesicula (Bassett). Ont. to Va., w. to Ill., Iowa, Tex. Ecology: Produce bud galls on *Quercus alba*.

Cynips vesicula Bassett, 1881. Canad. Ent. 13: 97. ♀, ♂, gall.

vesicula var. *cerinus* Kinsey. Tex. Ecology: Produce stem galls on *Quercus stellata*.

Neuroterus vesicula var. *cerinus* Kinsey, 1923. Ind. Univ. Studies 58: 15, 35, 125. ♀, ♂, gall.

vesicula var. *ocularis* Kinsey. Tex. Ecology: Produce bud galls on *Quercus stellata*.

Neuroterus vesicula var. *ocularis* Kinsey, 1923. Ind. Univ. Studies 58: 15, 35, 126. ♀, ♂, gall.

virgens Gillette. Colo. Ecology: Produce stem galls on *Quercus arizonica*, *Q. gambelii*, *Q. subturbanella*.

Neuroterus virgens Gillette, 1895. Ent. News 4: 166. ♀, ♂, gall.

washingtonensis Beutenmueller. Wash. Ecology: Produce leaf galls on *Quercus garryana*.

Neuroterus washingtonensis Beutenmueller, 1913. Canad. Ent. 45: 280. ♀, ♂, gall.

Genus TRICHOTERAS Ashmead

Trichoteras Ashmead, 1897. Psyche 8: 67.

Type-species: *Trichoteras coquilletti* Ashmead. Monotypic.

californicum (Beutenmueller). Calif. Ecology: Produce leaf galls on *Quercus douglasii*, *Q. dumosa*.

Philonix californica Beutenmueller, 1911. Ent. News 22: 69. ♀, gall.

coquilletti Ashmead. Ariz., Calif. Ecology: Produce leaf galls on *Quercus chrysolepis*, *Q. wilcoxii*.

Trichoteras coquilletti Ashmead, 1897. Psyche 6: 68. ♀, gall.

frondeum Weld. Ariz., Calif. Ecology: Produce bud galls on *Quercus chrysolepis*, *Q. wilcoxii*.

Trichoteras frondeum Weld. 1944. U. S. Natl. Mus., Proc. 95: 4. ♀, gall.

perfervum Weld. Calif. Ecology: Produce leaf galls on *Quercus chrysolepis*.

Trichoteras perfervum Weld, 1952. U. S. Natl. Mus., Proc. 102: 322. ♀, gall.

rotundula Weld. Ariz., Calif. Ecology: Produce leaf galls on *Quercus chrysolepis*, *Q. wilcoxii*.

Trichoteras rotundula Weld, 1952. U. S. Natl. Mus., Proc. 102: 323. ♀, gall.

tubifaciens (Weld). Calif. Ecology: Produce leaf galls on *Quercus garryana*.

Xanthoteras tubifaciens Weld, 1926. U. S. Natl. Mus., Proc. 68 (10): 53. ♀, gall.

vacciniiifoliae (Ashmead). Calif. Ecology: Produce leaf galls on *Quercus vaccinifolia*, *Q. chrysolepis*.

Callirhytis vacciniiifoliae Ashmead, 1896. U. S. Natl. Mus., Proc. 19: 130. ♀, gall.

Genus PHYLLOTERAS Ashmead

Phylloteras Ashmead, 1897. Psyche 8: 67.

Type-species: *Biorhiza rubinus* Gillette. Monotypic.

cupella (Weld). N. Mex., Ariz. Ecology: Produce leaf galls on *Quercus arizonica*, *Q. oblongifolia*, *Q. reticulata*, *Q. subturbanella*.

Trigonaspidis cupella Weld, 1926. U. S. Natl. Mus., Proc. 68 (10): 50. ♀, gall.

rubinum (Gillette). N. Y., Md., Va., N. C., Mich., Ill., Mo. Ecology: Produce leaf galls on *Quercus alba*.

Biorhiza rubinus Gillette, 1888. Mich. State Bd. Agr., Rpt. 27: 472. ♀, gall.

sigma Weld. N. Y., Md., D. C., Va. Ecology: Produce leaf galls on *Quercus alba*.

Phylloteras sigma Weld, 1944. U. S. Natl. Mus., Proc. 95: 5. ♀, gall.

Genus XYSTOTERAS Ashmead

Xystoteras Ashmead, 1897. Canad. Ent. 29: 260.

Type-species: *Xystoteras volutellae* Ashmead. Monotypic.

nigrum (Fitch). N. Y., Mo. Ecology: Produce leaf galls on *Quercus alba*.

Biarhiza (?) *nigra* Fitch, 1859 (1858). N. Y. State Agr. Soc., Trans. 18: 782. ♀.

Aeraspis politus Bassett, 1890. Amer. Ent. Soc., Trans. 17: 85. ♀.

poculum (Osten Sacken). N. H., Vt., N. Y., Va., Ill., Mo. Ecology: Produce leaf galls on *Quercus alba*.

Cecidomyia poculum Osten Sacken, 1862. Smithsn. Misc. Collect. 6: 201. Gall.

Xystoteras poculum Weld, 1922. U. S. Natl. Mus., Proc. 61 (18): 7. ♀, gall.

Taxonomy: Gagne, 1973. Ent. Soc. Amer., Ann. 66: 858.

volutellae Ashmead. Kans. Ecology: Produce leaf galls on *Quercus macrocarpa*.

Xystoteras volutellae Ashmead, 1897. Canad. Ent. 29: 260. ♀, gall.

Genus XANTHOTERAS Ashmead

Xanthoteras Ashmead, 1897. Canad. Ent. 29: 261.

Type-species: *Biorhiza forticornis* Walsh. Orig. desig.

eburneum (Bassett). Colo., N. Mex., Utah, Ariz. Ecology: Produce stem galls on *Quercus reticulata*, *Q. submollis*, *Q. subturbinella*.

Dryophanta eburneus Bassett, 1890. Amer. Ent. Soc., Trans. 17: 10. ♀, gall. Agamic gen.

Dryophanta similis Bassett, 1890. Amer. Ent. Soc., Trans. 17: 71. ♀, gall. Preocc. by Adler, 1881.

Dryophanta simillima Dalla Torre, 1893. Cat. Hym., v. 2, p. 54. N. name.

Dryophanta glabra Gillette, 1894. Canad. Ent. 26: 237. ♀, gall.

emoryi (Ashmead). N. Mex. Ecology: Produce leaf galls on *Quercus* sp.

Dryophanta emoryi Ashmead, 1896. U. S. Natl. Mus., Proc. 19: 115. ♀, gall. Agamic gen.

fumosum (Weld). N. Mex., Ariz. Ecology: Produce root galls on *Quercus gambelii*, *Q. reticulata*, *Q. submollis*, *Q. subturbinella*.

Trigonaspis fumosa Weld, 1921. U. S. Natl. Mus., Proc. 59: 204. ♀, ♂, gall. Sexual gen.

mediocre Weld. Ariz. Ecology: Produce root galls on *Quercus subturbinella*.

Xanthoteras mediocre Weld, 1930. Ent. Soc. Wash., Proc. 32: 30. ♀, gall. Agamic gen.

obconicum (Weld). Calif. Ecology: Produce root galls on *Quercus douglasii*.

Trigonaspis obconica Weld, 1921. U. S. Natl. Mus., Proc. 59: 202. ♀, ♂, gall. Sexual gen.

ornatum (Kinsey). Tex. Ecology: Produce leaf galls on *Quercus brevirostra*.

Trigonaspis ornata Kinsey, 1922. Ind. Univ. Studies 53: 139. ♀, ♂, gall. Sexual gen.

politum (Bassett). N. J. to Fla., w. to Mo., Okla., Tex. Ecology: Produce leaf galls on *Quercus chapmanii*, *Q. stellata* on coastal plains and inland lowlands.

Cynips polita Bassett, 1881. Canad. Ent. 13: 99. ♀, gall. Agamic gen.

pulchellum (Beutenmueller). Oreg., Calif.

Dryophanta pulchella Beutenmueller, 1911. Ent. News 22: 357. ♀. Sexual gen.

pulechrinum (Ashmead). Ariz., Calif. Ecology: Produce leaf galls on *Quercus arizonica*, *Q. oblongifolia*, *Q. reticulata*, *Q. subturbinella*, *Q. toumeyei*.

Dryophanta pulechrinum Ashmead, 1896. U. S. Natl. Mus., Proc. 19: 115. ♀, gall. Agamic gen.

Dryophanta porterae Cockerell, 1900. Canad. Ent. 32: 91. ♀, gall.

pumiliventre (Bassett). Colo., Utah. Ecology: Produce root galls on *Quercus* sp.

Dryophanta pumiliventris Bassett, 1890. Amer. Ent. Soc., Trans. 17: 69. ♂, ♀. Sexual gen.

Belonocnema colorado Gillette, 1893. Ent. News 4: 210. ♀.

Trigonaspis radieis Ashmead, 1896. U. S. Natl. Mus., Proc. 19: 113. ♀, ♂, gall.

quercusforticorne (Walsh). N. H. to Va., w. to Minn. Ecology: Produce stem galls on *Quercus alba*.

Cynips q. forticornis Walsh, 1864. Ent. Soc. Phila., Proc. 2: 489. ♀, gall. Agamic gen.

Cynips (*Teras*) *forticornis* Osten Sacken, 1865. Ent. Soc. Phila., Proc. 4: 340, 350, 353.

Taxonomy: Fitch, 1859 (1858). N. Y. State Agr. Soc., Trans. 18: 812.

radicola (Ashmead). Ont., N. Y., N. J., Pa., D. C., Va., Ind., Ill., Mo. Ecology: Produce root galls on *Quercus alba*.

Dryophanta radicola Ashmead, 1896. U. S. Natl. Mus., Proc. 19: 116. ♀, gall. Sexual gen.

teres Weld. Oreg., Calif. Ecology: Produce leaf galls on *Quercus dumosa*, *Q. garryana*.

Xanthoteras teres Weld, 1926. U. S. Natl. Mus., Proc. 68 (10): 52. ♀, gall. Agamic gen.

teres var. *hildebrandae* (Kinsey). Calif.

Cynips (*Autron*) *teres* var. *hildebrandae* Kinsey, 1930. Gall wasp genus *Cynips*, p. 217. ♀, gall. Agamic gen.

Genus PARACRASPIS Weld

Paracraspis Weld, 1952. U. S. Natl. Mus., Proc. 102: 324.

Type-species: *Callirhytis guadaloupensis* Fullaway. Orig. desig.

guadaloupensis (Fullaway). Ariz., Calif. Ecology: Produce leaf galls on *Quercus chrysolepis*, *Q. wilcoxii*.

Callirhytis guadaloupensis Fullaway, 1911. Ent. Soc. Amer., Ann. 4: 363. ♀, gall.

insolens (Weld). Calif. Ecology: Produce leaf galls on *Quercus chrysolepis*.

Acraspis insolens Weld, 1926. U. S. Natl. Mus., Proc. 68 (10): 59. ♀, gall.

patelloides (Trotter). Calif. Ecology: Produce leaf galls on *Quercus chrysolepis*.

Andricus? *patelloides* Trotter, 1911. Lab. Zool. Gen. e Agr. Portici, Bol. 5: 106. gall.

Acraspis patelloides Weld, 1926. U. S. Natl. Mus., Proc. 68 (10): 60. ♀, gall.

Genus ACRASPIS Mayr

Acraspis Mayr, 1881. Zwanzig. Jahresber. Comm.-Oberrealsch. I. Bez. Wien. pp. 2, 29.

Type-species: *Cynips pezomachoides* Osten Sacken. Desig. by Rohwer and Fagan, 1917.

alaria Weld. Colo. Ecology: Produce leaf galls on *Quercus gambelii*.

Acraspis alaria Weld, 1922. U. S. Natl. Mus., Proc. 61 (18): 14. ♀, gall.

arida (Kinsey). Tex. Ecology: Produce leaf galls on *Quercus grisea*.

Cynips (*Acraspis*) *arida* Kinsey, 1930. Gall wasp genus *Cynips*, p. 313. ♀, gall.

bandero (Kinsey). Colo. Ecology: Produce leaf galls on *Quercus gambelii*.

Cynips (*Acraspis*) *bandero* Kinsey, 1936. Origin of higher categories in *Cynips*, p. 284. ♀, gall.

conica (Kinsey). Ariz. Ecology: Produce leaf galls on *Quercus grisea*.

Cynips (*Acraspis*) *conica* Kinsey, 1930. Gall wasp genus *Cynips*, p. 338. ♀, gall.

echinii Ashmead. Fla. Ecology: Produce leaf galls on *Quercus bicolor*.

Acraspis echinii Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 140. ♀, gall.

Cynips (*Acraspis*) *pezomachoides* var. *echinoides* Kinsey, 1930. Gall wasp genus *Cynips*, p. 412. N. name, unnecessarily proposed.

erinacei (Beutenmueller). Ont. s. to Va. w. to Ill. Ecology: Produce galls on *Quercus alba*, sexual generation on the buds, agamic generation on leaves.

Philonix erinacei Beutenmueller, 1909. Amer. Mus. Natl. Hist., Bul. 26: 247. ♀, gall.

Agamic gen.

Andricus fulvicollis form *bicolens* Kinsey, 1920. Amer. Mus. Nat. Hist., Bul. 42: 354. ♀, ♂, gall.

Taxonomy: Triggerson, 1914. Ent. Soc. Amer., Ann. 7: 6. ♀, ♂, gall. Bisexual gen.

gemula (Bassett). N. Y., N. J., w. to Kans. Ecology: Produce galls on *Quercus alba*, *Q. michauxii*, *Q. muehlenbergii*, *Q. prinoides*, sexual generation on the buds, agamic generation on leaves.

Cynips gemula Bassett, 1881. Canad. Ent. 13: 104. ♀, ♂, gall.

gemula var. *cruenta* (Kinsey). Ill.

Cynips (*Acraspis*) *gemula*(!) var. *cruenta* Kinsey, 1930. Gall wasp genus *Cynips*, p. 360. ♀, gall. Agamic gen.

gemula var. *fuscata* (Kinsey). Kans.

Cynips (*Acraspis*) *gemula*(!) var. *fuscata* Kinsey, 1930. Gall wasp genus *Cynips*, p. 362. ♀, gall. Agamic gen.

gemula var. *spectata* (Kinsey). Ind.

Cynips (*Acraspis*) *gemula*(!) var. *spectata* Kinsey, 1930. Gall wasp genus *Cynips*, p. 364. ♀, gall. Agamic gen.

- hibrida** (Kinsey). Tenn. Ecology: Produce galls on leaves of *Quercus alba*.
Cynips (Acraspis) hibrida Kinsey, 1936. Origin of higher categories in Cynips, p. 273. ♀, gall.
- hirtior** (Kinsey). Utah. Ecology: Produce leaf galls on *Quercus utahensis*.
Cynips (Acraspis) hirtior Kinsey, 1936. Origin of higher categories in Cynips, p. 286. ♀, gall. Agamic gen.
- inflata** (Kinsey). Ind. Ecology: Produce leaf galls on *Quercus alba*.
Cynips (Acraspis) inflata Kinsey, 1936. Origin of higher categories in Cynips, p. 274. ♀, gall. Agamic gen.
- longicornis** (Bassett). Conn. Ecology: Produce stem galls on *Quercus stellata*.
Dryophanta longicornis Bassett, 1900. Amer. Ent. Soc., Trans. 26: 327. ♂, ♀. Sexual gen.
- macrocarpae** Bassett. Conn. Ecology: Produce leaf galls on *Quercus macrocarpa*.
Acraspis macrocarpae Bassett, 1890. Amer. Ent. Soc., Trans. 17: 84. ♀, gall. Agamic gen.
Acraspis undulata Gillette, 1893. Ent. News 4: 28. ♀, gall. Agamic gen.
- Cynips (Acraspis) hirta* var. *macrescens* Kinsey, 1930. Gall wasp genus Cynips, p. 423. N. name, unnecessarily proposed.
- pezomachoides** (Osten Sacken). Ont. s. to N. C., w. to Minn., Colo. Ecology: Produce leaf galls on *Quercus alba*.
Cynips pezomachoides Osten Sacken, 1862. Ent. Soc. Phila., Proc. 1: 250. ♀, gall. Agamic gen.
- pezomachoides** var. *advena* (Kinsey). Tenn.
Cynips (Acraspis) pezomachoides var. *advena* Kinsey, 1930. Gall wasp genus Cynips, p. 409. ♀, gall. Agamic gen.
- pezomachoides** var. *cincturata* (Kinsey). Colo.

Cynips (Acraspis) hirta var. *packorum* Kinsey, 1930. Gall wasp genus Cynips, p. 418. ♀, gall. Agamic gen.
- quercushirta** var. *scelestia* (Kinsey). Mich.
Cynips (Acraspis) hirta var. *scelestia* Kinsey, 1930. Gall wasp genus Cynips, p. 422. ♀, gall. Agamic gen.

ulterior (Kinsey). Colo. Ecology: Produce leaf galls on *Quercus gambelii*.

Cynips (Acraspis) ulterior Kinsey, 1936. Origin of higher categories in Cynips, p. 294. ♀, gall. Agamic gen.

villosa Gillette. N. Y., Mich., Iowa, Kans., Tex., Utah, Ariz. Ecology: Produce leaf galls on *Quercus arizonica*, *Q. grisea*, *Q. macrocarpa*, *Q. utahensis*.

Acraspis villosus Gillette, 1888. Mich. State Bd. Agr., Rpt. 27: 474. ♀, gall. Agamic gen.

villosa var. *apache* (Kinsey). Ariz.

Cynips (Acraspis) villosa var. *apache* Kinsey, 1930. Gall wasp genus Cynips, p. 352. ♀, gall. Agamic gen.

villosa var. *calvescens* (Kinsey). Utah.

Cynips (Acraspis) villosa var. *calvescens* Kinsey, 1930. Gall wasp genus Cynips, p. 354. ♀, gall. Agamic gen.

villosa var. *consocians* (Kinsey). Kans.

Cynips (Acraspis) villosa var. *consocians* Kinsey, 1930. Gall wasp genus Cynips, p. 357. ♀, gall. Agamic gen.

villosa var. *expositor* (Kinsey). Tex.

Cynips (Acraspis) villosa var. *expositor* Kinsey, 1930. Gall wasp genus Cynips, p. 351. ♀, gall. Agamic gen.

Genus PHILONIX Fitch

Philonix Fitch, 1859 (1858). N. Y. State Agr., Soc., Trans. 18: 783.

Type-species: *Philonix fulvicollis* Fitch. Desig. by Ashmead, 1903.

fulvicollis Fitch. N. Y., Mich., Tenn., Ill., Kans. Ecology: Produce leaf galls on *Quercus alba*, *Q. chapmani*, *Q. macrocarpa*. Specimens have been collected on snow in late autumn.

Philonix fulvicollis Fitch, 1859 (1858). N. Y. State Agr. Soc., Trans. 18: 783. ♀. Agamic gen.

fulvicollis var. *canadensis* (Kinsey). Mich.

Cynips (Philonix) fulvicollis var. *canadensis* Kinsey, 1930. Gall wasp genus Cynips, p. 273. ♀, gall.

fulvicollis var. *major* (Kinsey). Ill.

Cynips (Philonix) fulvicollis var. *major* Kinsey, 1930. Gall wasp genus Cynips, p. 257. ♀, gall.

fulvicollis var. *rubricosa* (Kinsey). Tenn.

Cynips (Philonix) fulvicollis var. *rubricosa* Kinsey, 1930. Gall wasp genus Cynips, p. 254. ♀, gall.

fulvicollis var. *vorisi* (Kinsey). Kans.

Cynips (Philonix) fulvicollis var. *vorisi* Kinsey, 1930. Gall wasp genus Cynips, p. 255. ♀, gall.

gigas Weld. Tex. Ecology: Produce leaf galls on *Quercus lyrata*.

Philonix gigas Weld, 1922. U. S. Natl. Mus., Proc. 61 (18): 12. ♀, gall.

insulensis (Kinsey). Wis., Ill., Minn., Iowa, S. Dak., Nebr., Wyo., Colo. Ecology: Produce leaf galls on *Quercus gambelii*, *Q. macrocarpa*.

Cynips (Philonix) insulensis Kinsey, 1936. Origin of higher categories in Cynips, p. 210. ♀, gall (agamic gen.).

lanaeglobuli (Ashmead). Fla. Ecology: Produce leaf galls on *Quercus* sp., probably *Q. michauxii*.

Acraspis lanaeglobuli Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 139. ♀, gall.

latigenae (Kinsey). Utah. Ecology: Produce leaf galls on *Quercus utahensis*.

Cynips (Philonix) latigenae Kinsey, 1936. Origin of higher categories in Cynips, p. 212. ♀, gall.

nigra (Gillette). Conn., Mich., Iowa. Ecology: Produce leaf galls on *Quercus alba*.

Acraspis niger Gillette, 1889. Iowa Agr. Expt. Sta., Bul. 7: 282. ♀, gall.

Acraspis Gillettei Bassett, 1900. Amer. Ent. Soc., Trans. 26: 323. ♀, gall.

nigricollis Fitch. N. Y. Collected on snow before 1858 and not known to have been found or reared since.

Philonix nigricollis Fitch, 1859 (1858). N. Y. State Agr. Soc., Trans. 18: 783. ♀.

Taxonomy: Kinsey, 1930. Gall wasp genus Cynips, p. 262 (syn. of *fulvicollis* Fitch).
pallipes (Bassett). Conn., N. Y., Md., D. C., Va., Ill. Ecology: Produce bud galls on *Quercus alba*.

Dryophanta pallipes Bassett, 1900. Amer. Ent. Soc., Trans. 26: 327. ♀, gall.

Taxonomy: Kinsey, 1930. Gall wasp genus Cynips, p. 269 (sexual form of *fulvicollis* Fitch ?).

Genus LIODORA Foerster

Liodora Foerster, 1869. Zool.-Bot. Gesell. Wien, Verh. 19: 331, 334.

Type-species: *Liodora sulcata* Foerster. Monotypic.

apiarium Weld. D. C., Va. Ecology: Produce leaf galls on *Quercus alba*.

Liodora apiarium Weld, 1944. U. S. Natl. Mus., Proc. 95: 6. ♀, gall.

clarkei (Bassett). Mass., Mo. Ecology: Produce bud galls on *Quercus alba*, *Q. stellata*.

Dryophanta clarkei Bassett, 1890. Amer. Ent. Soc., Trans. 17: 69. ♀, ♂, gall.

Dryophanta vesiculoides Ashmead, 1896. U. S. Natl. Mus., Proc. 19: 114. ♀, ♂, gall.

comata Weld. Va. Ecology: Produce leaf galls on *Quercus alba*.

Liodora comata Weld, 1952. U. S. Natl. Mus., Proc. 102: 325. ♀, ♂, gall.

Genus DROS Kinsey

Dros Kinsey, 1937. Rev. Ent. 7: 49.

Type-species: *Dros petasum* Kinsey. Orig. desig.

amphora (Weld). N. Mex., Ariz. Ecology: Produce leaf galls on *Quercus arizonica*, *Q. oblongifolia*.

Diplolepis amphora Weld, 1926. U. S. Natl. Mus., Proc. 68 (10): 17. ♀, gall.

atrimentum (Kinsey). Calif. Ecology: Produce leaf galls on *Quercus douglasii*.

Andricus atrimentus Kinsey, 1922. Amer. Mus. Nat. Hist., Bul. 46: 279. ♀, ♂, gall.

pedicellatum (Kinsey). Calif. Ecology: Produce leaf galls on *Quercus douglasii*.

Andricus pedicellatus Kinsey, 1922. Amer. Mus. Nat. Hist., Bul. 46: 284. ♀, ♂, gall.

sessile (Weld). Ariz. Ecology: Produce leaf galls on *Quercus arizonica*, *Q. oblongifolia*.

Diplolepis sessilis Weld, 1926. U. S. Natl. Mus., Proc. 68 (10): 31. ♀, gall.

viscidum (Weld). Ariz. Ecology: Produce leaf galls on *Quercus oblongifolia*.

Liodora viscosa Weld, 1944. U. S. Natl. Mus., Proc. 95: 5. ♀, gall.

Genus ADLERIA Rohwer and Fagan

Adleria Rohwer and Fagan, 1917. U. S. Natl. Mus., Proc. 53: 359.

Type-species: *Cynips kollaris* Hartig. Orig. desig.

The name *Cynips* was applied to this genus by Hartig and most other authors, but not Linnaeus and not Kinsey.

Taxonomy: Niblett, 1955. So. London Ent. and Nat. Hist. Soc., Proc. and Trans. 1953-54, p. 144 (Possible syn. of *Andricus* Hartig).

arizonica (Cockerell). Ariz. Ecology: Produce leaf galls on *Quercus arizonica*.

Holcaspis arizonica Cockerell, 1902. Canad. Ent. 34: 183. ♀, gall.

dimorpha (Beutenmueller). N. Y., N. J., Md., Va., Mich., Ill., Iowa. Ecology: Produce leaf galls on *Quercus alba*, *Q. macrocarpa*.

Cynips dimorphus Beutenmueller, 1913. Amer. Ent. Soc., Trans. 39: 245. ♀, gall.

flavicornis (Ashmead). Ill.

Cynips flavicornis Ashmead, 1896. U. S. Natl. Mus., Proc. 19: 133. ♀.

nigricornis (Gillette). N. Y., N. J., Va., Ohio, Mich., Ill., Mo. Ecology: Produce leaf galls on *Quercus bicolor*.

Cynips nigricornis Gillette, 1888. Mich. State Bd. Agr., Rpt. 27: 473. ♀, gall.

Andricus ashmeadii Bassett, 1890. Amer. Ent. Soc., Trans. 26: 320. ♀.

quercusstrobilana (Osten Sacken). Ont., Mass. to Va., w. to Ill., Iowa. Ecology: Produce stem galls on *Quercus bicolor*, *Q. macrocarpa*.

Cynips q. strobilana Osten Sacken, 1862. Ent. Soc. Phila., Proc. 1: 254. gall.

Cynips quercus strobilana Osten Sacken, 1864. In Bassett, Ent. Soc. Phila., Proc. 3: 690. ♀.

Cynips strobilana Osten Sacken, 1865. Ent. Soc. Phila., Proc. 4: 345, 349, 350.

vacciniiformis (Beutenmueller). Tex. Ecology: Produce leaf galls on *Quercus stellata*.

Cynips vacciniiformis Beutenmueller, 1913. Amer. Ent. Soc., Trans. 39: 247. ♀, gall.

weldi (Beutenmueller). Ont., Mass. to Va., w. to Ill., Mo., Ark. Ecology: Produce leaf petiole galls on *Quercus alba*.

Cynips weldi Beutenmueller, 1918. Brooklyn Ent. Soc., Bul. 13: 118. ♀, gall.

Genus AMPHIBOLIPS Reinhard

Amphibolips Reinhard, 1865. Berlin Ent. Ztschr. 9: 10.

Type-species: *Cynips spongifica* Osten Sacken. Orig. desig.

Trissandricus Kieffer, 1910. Lab. Zool. Gen. e Agr. Portici, Bol. 4: 115.

Type-species: *Trissandricus maculipennis* Kieffer. Monotypic.

Revision: Beutenmueller, 1909. Amer. Mus. Nat. Hist., Bul. 26: 47-66.

acuminata Ashmead. Atlantic and Gulf Coast plains, Mississippi Valley n. to Mo. Ecology: Produce bud and stem galls on *Quercus cinerea*, *Q. falcata*.

Amphibolips acuminata Ashmead, 1896. U. S. Natl. Mus., Proc. 19: 126. ♀, gall.

arcuata (Kieffer). Ga. Ecology: Produce stem galls on *Quercus* sp.

Callirhytis arcuata Kieffer, 1910. Lab. Zool. Gen. e Agr. Portici, Bol. 4: 341. ♀.

confluenta (Harris). Mass., Ont. to Va., w. to Ill., Iowa, Kans. Ecology: Produce leaf galls on red oaks.

Cynips confluentus Harris, 1841. Rpt. Ins. Mass. Injurious to Veg., p. 397. ♀, gall.

Cynips aciculata Osten Sacken, 1861. Ent. Soc. Phila., Proc. 1: 56. ♀, gall.

cookii Gillette. Ont. to Va., w. to Mich., Wis., Ill., Mo. Ecology: Produce bud galls on *Quercus rubra*.

Amphibolips cookii Gillette, 1888. Mich. State Bd. Agr., Rpt. 27: 475. ♀, gall.

gainesi Bassett. Ark., Tex. Ecology: Produce acorn galls on *Quercus laurifolia*.

Amphibolips Gainesi Bassett, 1900. Amer. Ent. Soc., Trans. 26: 322. ♀, gall.

globulus Beutenmueller. N. J. Ecology: Produce bud galls on *Quercus marilandica*.

Amphibolips globulus Beutenmueller, 1909. Amer. Mus. Nat. Hist., Bul. 26: 60. ♀, gall.

globus Weld. Va. Ecology: Produce bud galls on *Quercus palustris*.

Amphibolips globus Weld, 1952. U. S. Natl. Mus., Proc. 102: 325. ♀, ♂, gall. Sexual gen. and female of agamic gen.

gumia Kinsey. Ariz. Ecology: Produce stem galls on *Quercus emoryi*, *Q. hypoleuca*.

Amphibolips gumia Kinsey, 1937. Rev. Ent. 7: 437. ♀, gall.

melanocera Ashmead. Fla. Ecology: Produce bud galls on *Quercus nigra*.

Amphibolips melanocera Ashmead, 1885. Amer. Ent. Soc., Trans. 12: 299, 303. ♂, gall.

murata Weld. Fla. Ecology: Produce bud galls on *Quercus cinerea*, *Q. laurifolia*, *Q. myrtifolia*, *Q. pumila*.

Amphibolips murata Weld, 1957. U. S. Natl. Mus., Proc. 107: 111-112. ♀, gall.

nigra Beutenmueller. Ariz.; Mexico. Ecology: Produce stem galls on *Quercus emoryi*, *Q. hypoleuca*.

Amphibolips nigra Beutenmueller, 1911. Ent. News 22: 198. ♀.

Taxonomy: Beutenmueller, 1917. Canad. Ent. 49: 348 (gall).

nubilipennis (Harris). Mass. to Va., w. to Mich., Ill., Iowa. Ecology: Produce leaf galls on red oaks.

Cynips nubilipennis Harris, 1841. Rpt. Ins. Mass. Injurious to Veg., p. 399. ♀, gall.

Cynips q. sculptus Bassett, 1863. Ent. Soc. Phila., Proc. 2: 324. ♀, ♂, gall.

quercuscinerea (Ashmead). Fla. Ecology: Produce stem galls on *Quercus cinerea*.

Cynips q. cinerea Ashmead, 1881. Amer. Ent. Soc., Trans. 9: Proc. p. xix. ♀, gall.

Amphibolips cinerea Ashmead, 1885. Amer. Ent. Soc., Trans. 12: 294.

quercuscitriformis (Ashmead). Fla. Ecology: Produce bud galls on *Quercus phellos*.

Cynips q. citriformis Ashmead, 1881. Amer. Ent. Soc., Trans. 9: Proc. p. xxviii. ♀, gall.

Amphibolips citriformis Ashmead, 1885. Amer. Ent. Soc., Trans. 12: 294.

querucuscolebs (Osten Sacken). Mass., N. Y., D. C., Va. Ecology: Produce leaf galls on *Quercus coccinea*.

Cynips querucus colebs Osten Sacken, 1861. Ent. Soc. Phila., Proc. 1: 61. ♂, gall.

Cynips colebs Osten Sacken, 1865. Ent. Soc. Phila., Proc. 4: 340, 345, 348, 355.

quercusfuliginosa (Ashmead). Fla. Ecology: Produce acorn galls on *Quercus laurifolia*.

Cynips q. fuliginosa Ashmead, 1885. Amer. Ent. Soc., Trans. 12: Proc. p. vii. ♀, gall.

Amphibolips fuliginosa Ashmead, 1885. Amer. Ent. Soc., Trans. 12: 294.

quercusilicifoliae (Bassett). Mass., Conn., N. Y., N. J., Pa., Va. Ecology: Produce leaf galls on *Quercus ilicifolia*.

Cynips q. ilicifoliae Bassett, 1864. Ent. Soc. Phila., Proc. 3: 681. ♀, ♂, gall.

Cynips ilicifoliae Osten Sacken, 1865. Ent. Soc. Phila., Proc. 4: 340, 355.

quercusinanis (Osten Sacken). Ont. s. to Va. w. to Wis., Ill., Mo. Ecology: Produce leaf galls on *Quercus rubra*.

Cynips q. inanis Osten Sacken, 1862. Ent. Soc. Phila., Proc. 1: 242, 247. ♀, gall.

Cynips inanis Osten Sacken, 1865. Ent. Soc. Phila., Proc. 4: 344, 347, 354.

quercusjuglans (Osten Sacken). Mass. to Va., w. to Iowa, Mo. Ecology: Produce acorn galls on red oaks.

Cynips q. juglans Osten Sacken, 1862. Ent. Soc. Phila., Proc. 1: 255. gall.

Cynips q. prunus Walsh and Riley, 1869. Amer. Ent. I: 104. ♀, gall.

querusracemaria (Ashmead). Fla. Ecology: Produce leaf galls on *Quercus laurifolia*.

Cynips q. racemaria Ashmead, 1881. Amer. Ent. Soc., Trans. 9: Proc. p. xxvi. ♀, gall.

Amphibolips racemaria Ashmead, 1885. Amer. Ent. Soc., Trans. 12: 294.

queruscpongifica (Osten Sacken). Ont. to Va., w. to Ill. Ecology: Produce leaf galls on *Quercus coccinea*, *Q. marilandica*, *Q. velutina*.

Cynips q. spongifica Osten Sacken, 1862. Ent. Soc. Phila., Proc. 1: 244, 247. ♀, gall.

Cynips spongifica Osten Sacken, 1865. Ent. Soc. Phila., Proc. 4: 340, 344, 347, 354.

Cynips q. coccinea Osten Sacken, 1862. Ent. Soc. Phila., Proc. 1: 243. ♀, gall.

Amphibolips Carolinaeensis Bassett, 1890. Amer. Ent. Soc., Trans. 17: 85. ♀, gall.

Amphibolips longicornis Bassett, 1900. Amer. Ent. Soc., Trans. 26: 321. ♀, gall.

Trissandricus maculipennis Kieffer, 1910. Lab. Zool. Gen. e Agr. Portici, Bol. 4: 115. ♀.

spinosa Ashmead. Fla. Ecology: Produce bud galls on *Quercus laurifolia*.

Amphibolips spinosa Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 141. ♀, gall.

tinctoriae Ashmead. N. Y. to Va., w. to Ill., Mo. Ecology: Produce bud galls on *Quercus coccinea*, *Q. velutina*.

Amphibolips tinctoriae Ashmead, 1896. U. S. Natl. Mus., Proc. 19: 125. ♀, gall.

trizonata Ashmead. N. Mex., Ariz. Ecology: Produce stem galls on *Quercus emoryi*, *Q. hypoleuca*.

Amphibolips trizonata Ashmead, 1896. U. S. Natl. Mus., Proc. 19: 125. ♀, ♂, gall.

Genus ANDRICUS Hartig

Andricus Hartig, 1840 (1839). Ztschr f. Ent. 2: 185, 190.

Type-species: *Andricus noduli* Hartig. Desig. by Foerster, 1869.

Aphilothrix Foerster, 1869. Zool.-Bot. Gesell. Wien, Verh. 19: 331, 336.

Type-species: *Cynips corticis* Linnaeus. Monotypic.

Manderstjernia Radoszkowski, 1886. Soc. Nat. Moscou, Bul. 39: 304.

Type-species: *Manderstjernia paradox* Radoszkowski. Monotypic.

Euschmitzia Dettmer, 1925. Naturhist. Maand. Maastricht 14: 122.

Type-species: *Euschmitzia rara* Dettmer. Monotypic.

Oncaspis Dettmer, 1925. Naturhist. Maand. Maastricht 14: 123.

Type-species: *Oncaspis filigranata* Dettmer. Monotypic.

Eusympagrus Dettmer. 1930. Broteria, Rev. Luso-Brazil, Ser. Zool. 26: 54-57.

Type-species: *Eusympagrus bellus* Dettmer. Monotypic.

Druon Kinsey, 1937. Rev. Ent. 7: 56.

- Type-species: *Druon protagion* Kinsey. Orig. desig.
Femuros Kinsey, 1937. Rev. ent. 7: 65.
 Type-species: *Femuros repandae* Kinsey. Orig. desig.
Feron Kinsey, 1937. Rev. Ent. 7: 69.
 Type-species: *Feron verutum* Kinsey. Orig. desig.
Conobius Kinsey, 1938. Ind. Acad. Sci., Proc. 47: 262.
 Type-species: *Conobius strues* Kinsey. Orig. desig.
- aciculatus* Beutenmueller. Mo., Ark., Tex. Ecology: Produce stem galls on *Quercus stellata*.
Andricus aciculatus Beutenmueller, 1909. Ent. News 20: 247. ♀, gall.
- albicomus* Weld. Oreg. Ecology: Produce leaf galls on *Quercus garryana*.
Andricus albicomus Weld, 1952. U. S. Natl. Mus., Proc. 102: 328. ♀, gall.
- albobalani* Weld. Calif. Ecology: Produce acorn galls on *Quercus douglasii*, *Q. dumosa*, *Q. lobata*.
Andricus albobalani Weld, 1926. U. S. Natl. Mus., Proc. 68 (10): 68. ♀, gall.
- biconicus* Weld. D. C., Va. w. to Mo., Ark., Okla., Tex. Ecology: Produce leaf galls on *Quercus stellata*.
Andricus biconicus Weld, 1926. U. S. Natl. Mus., Proc. 68 (10): 68. ♀, gall.
- bracteatus* Weld. Ariz. Ecology: Produce stem galls on *Quercus arizonica*, *Q. oblongifolia*, *Q. reticulata*, *Q. toumeyi*.
Andricus bracteatus Weld, 1944. U. S. Natl. Mus., Proc. 95: 7. ♀, gall.
- brunneus* Fullaway. Calif. Ecology: Produce leaf galls on *Quercus douglasii*, *Q. dumosa*, *Q. garryana*, *Q. lobata*.
Andricus brunneus Fullaway, 1911. Ent. Soc. Amer., Ann. 4: 353. ♀, gall.
- Taxonomy: Weld, 1952. U. S. Natl. Mus., Proc. 102: 327 (gall).
- caepula* (Weld). N. Mex., Ariz. Ecology: Produce leaf galls on *Quercus arizonica*, *Q. oblongifolia*, *Q. subturbinella*.
Diplolepis caepula Weld, 1926. U. S. Natl. Mus., Proc. 68 (10): 19. ♀, gall.
- capillatus* (Weld). Md., D. C., Va. w. to Ill., Mo., Ark. Ecology: Produce leaf galls on *Quercus alba*.
Diplolepis capillata Weld, 1926. U. S. Natl. Mus., Proc. 68 (10): 20. ♀, gall.
- cellularius* Gillette. Colo. Ecology: Produce bud galls on *Quercus undulata*.
Andricus cellularius Gillette, 1892. Ent. News 3: 247. ♀, gall.
- Neuroterus cellula* (!) Gillette, 1902. In Mayr, Zool.-Bot. Gesell. Wien, Verh. 52: 289.
- chico* Weld. Calif. Ecology: Produce bud galls on *Quercus lobata*.
Andricus chico Weld, 1952. U. S. Natl. Mus., Proc. 102: 328. ♀, gall.
- chinquapin* (Fitch). Conn., N. Y. to Va., w. to Ill., Mo. Ecology: Produce leaf galls on *Quercus alba*, *Q. bicolor*, *Q. prinoides*.
Figitis chinquapin Fitch, 1859 (1858). N. Y. State Agr. Soc., Trans. 18: 820. ♀, gall.
Cynips quercus fusiformis Osten Sacken, 1861. Ent. Soc. Phila., Proc. 1: 61. ♀, gall.
Cynips capsula Bassett, 1881. Canad. Ent. 13: 101. ♀, ♂, gall.
- chrysobalani* Weld. Calif. Ecology: Produce acorn galls on *Quercus chrysolepis*.
Andricus chrysobalani Weld, 1926. U. S. Natl. Mus., Proc. 68 (10): 71. ♀, gall.
- chrysolepidicola* (Ashmead). Calif. Ecology: Produce stem galls in agamic generation, bud galls in sexual generation, on *Quercus douglasii*, *Q. dumosa*, *Q. garryana*, *Q. lobata*. Originally described incorrectly as producing galls on *Quercus chrysolepis*.
Cynips chrysolepidicola Ashmead, 1896. U. S. Natl. Mus., Proc. 19: 124. ♀, gall.
- Cynips kelloggi* Fullaway, 1911. Ent. Soc. Amer., Ann. 4: 345. ♀, gall.
- Cynips rufescens* McCracken and Egbert, 1922. Stanford Univ., Pubs., Univ. Ser., Biol. Sci. 3 (1): 21. ♀, gall.
- Plagiotrichus* (!) *chrysolepidicola* var. *diminuens* Kinsey, 1922. Ind. Univ. Studies 53: 114. ♀, gall.
- Plagiotrichus* (!) *chrysolepidicola* var. *alutaceus* Kinsey, 1922. Ind. Univ. Studies 53: 116. ♀, gall.
- Plagiotrichus* (!) *chrysolepidicola* var. *atricinctus* Kinsey, 1922. Ind. Univ. Studies 53: 117. ♀, gall.

Plagiotrichus (?) *chrysolepidicola* var. *compositus* Kinsey, 1922. Ind. Univ. Studies 53: 118. ♀, gall.

Biology: Burdick, 1967. Pan-Pacific Ent. 43: 227-231.

chrysolepidicola var. *garryanae* (Kinsey). Oreg. Ecology: Produce stem galls on *Quercus* *garryana*.

Plagiotrichus (?) *chrysolepidicola* var. *garryanae* Kinsey, 1922. Ind. Univ. Studies 53: 121. ♀, gall.

chrysolepidicola var. *pugnoides* (Kinsey). Calif. Ecology: Produce stem galls on *Quercus* *lobata*.

Plagiotrichus (?) *chrysolepidicola* var. *pugnoides* Kinsey, 1922. Ind. Univ. Studies 53: 120. ♀, gall.

chrysolepidicola var. *pugnus* (Kinsey). Calif. Ecology: Produce stem galls on *Quercus* *lobata*.

Plagiotrichus (?) *chrysolepidicola* var. *pugnus* Kinsey, 1922. Ind. Univ. Studies 53: 120. ♀, gall.

cinnamomeus Ashmead. Fla. Ecology: Produce bud galls on *Quercus chapmani*.

Andricus cinnamomeus Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 137. ♀, gall.

Andricus calycicola Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 141. ♀, gall.

confertus McCracken and Egbert. Calif. Ecology: Produce leaf galls on *Quercus lobata*.

Andricus confertus McCracken and Egbert, 1922. Stanford Univ., Pubs., Univ. Ser., Biol. Sci. 3 (1): 32. ♀, gall.

coortus Weld. Calif. Ecology: Produce stem galls on *Quercus douglasii*, *Q. dumosa*.

Andricus coortus Weld, 1944. U. S. Natl. Mus., Proc. 95: 8. ♀, gall.

coronus Beutenmueller. N. Y., D. C., Va., Ga., Ala. Ecology: Produce stem galls on *Quercus* *palustris*, *Q. phellos*.

Andricus coronus Beutenmueller, 1907. Amer. Mus. Natl. Hist., Bul. 23: 464. ♀, gall.

costatus Weld. Colo., N. Mex., Ariz. Ecology: Produce acorn galls on *Quercus fendleri*, *Q. gambelii*, *Q. subturbanella*.

Andricus costatus Weld, 1944. U. S. Natl. Mus., Proc. 95: 9. ♀, gall.

crassicornis (Ashmead). Fla. Ecology: Produce leaf galls on *Quercus* sp.

Callirhytis crassicornis Ashmead, 1896. U. S. Natl. Mus., Proc. 19: 130. ♀, gall.

crenatus Weld. Calif. Ecology: Produce leaf galls on *Quercus dumosa*, *Q. douglasii*.

Andricus crenatus Weld, 1952. U. S. Natl. Mus., Proc. 102: 330. ♀, gall.

crystallinus Bassett. Calif. Ecology: Produce leaf galls on *Quercus douglasii*, *Q. dumosa*, *Q. garryana*.

Andricus crystallinus Bassett, 1900. Amer. Ent. Soc., Trans. 26: 319. ♀, gall. Agamic gen.

Biology: Doutt, 1960. Pan-Pacific Ent. 36: 167-170 (female, male, gall; sexual gen. on leaves of *Quercus douglasii*).

deciduatus Weld. Ill. Ecology: Produce bud galls on *Quercus bicolor*.

Andricus deciduatus Weld, 1926. U. S. Natl. Mus., Proc. 68 (10): 72. ♀, gall.

discalis (Weld). N. Mex., Ariz. Ecology: Produce leaf galls on *Quercus subturbanella*.

Diplolepis discalis Weld, 1926. U. S. Natl. Mus., Proc. 68 (10): 24. ♀, gall.

discularis (Weld). Calif. Ecology: Produce leaf galls on *Quercus garryana*.

Diplolepis discularis Weld, 1926. U. S. Natl. Mus., Proc. 68 (10): 25. ♀, gall.

ellipsoidalis (Weld). Va. Ecology: Produce bud galls on *Quercus falcata*, *Q. palustris*.

Amphibolips ellipsoidalis Weld, 1926. U. S. Natl. Mus., Proc. 68 (10): 105. ♀, gall.

femoratus Ashmead. Fla. Ecology: Produce leaf galls on *Quercus laurifolia*, *Q. phellos*.

Andricus femoratus Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 141. ♀, gall.

fimbrialis Weld. Calif. Ecology: Produce leaf galls on *Quercus douglasii*, *Q. dumosa*, *Q. lobata*.

Andricus fimbrialis Weld, 1926. U. S. Natl. Mus., Proc. 68 (10): 74. ♀, ♂, gall.

flavohirtus Beutenmueller. N. J., Ill. Ecology: Produce bud galls on *Quercus bicolor*.

Andricus flavohirtus Beutenmueller, 1913. Insecutor Inscitiae Menstruus 1: 124. ♀, gall.

foliaformis Gillette. N. Y., Mich., Ill., Ariz. Ecology: Produce leaf galls on *Quercus alba*, *Q. bicolor*, *Q. macrocarpa*.

Andricus foliaformis Gillette, 1888. Mich. State Bd. Agr., Rpt. 27: 471. ♀, gall.

Andricus foliosus Weld, 1926. U. S. Natl. Mus., Proc. 68 (10): 76. ♀, ♂, gall.

Taxonomy: Weld, 1967. In Krombein and Burks, U. S. Dept. Agr., Agr. Monog. 2, Supp. 2: 283.

formosalis Weld. Ariz. Ecology: Produce stem galls on *Quercus emoryi*.

Andricus formosalis Weld, 1944. U. S. Natl. Mus., Proc. 95: 10. ♀, gall.

fullawayi Beutenmueller. Calif. Ecology: Produce leaf galls on *Quercus lobata*.

Andricus fullawayi Beutenmueller, 1913. Amer. Ent. Soc., Trans. 39: 244. ♀, gall.

furnessulus Weld. Ariz. Ecology: Produce stem galls on *Quercus arizonica*, *Q. oblongifolia*.

Andricus furnessulus Weld, 1944. U. S. Natl. Mus., Proc. 95: 12. ♀, gall.

howertoni Bassett. N. Mex., Ariz. Ecology: Produce stem galls on *Quercus subturbanella*.

Andricus howertoni Bassett, 1890. Amer. Ent. Soc., Trans. 17: 82. ♀, gall.

ignotus (Bassett). Mass., Conn., Ill., Minn. Ecology: Produce leaf galls on *Quercus bicolor*, *Q. macrocarpa*.

Cynips ignota Bassett, 1881. Canad. Ent. 13: 106. ♀, gall.

incertus Bassett. Conn., Ill. Ecology: Produce acorn galls on *Quercus bicolor*.

Andricus incertus Bassett, 1900. Amer. Ent. Soc., Trans. 26: 317. ♀.

Andricus fimbriatus Weld, 1922. U. S. Natl. Mus., Proc. 61 (19): 29. ♀, gall.

incognitus Weld. Conn. Ecology: Produce leaf galls on *Quercus stellata*.

Andricus ignotus Bassett, 1900. Amer. Ent. Soc., Trans. 26: 317. ♀. Preocc. by Bassett, 1881.

Andricus incognitus Weld, 1951. U. S. Dept. Agr., Agr. Monog. 2: 634. N. name.

indistinctus Bassett. Ohio. Ecology: Produce stem galls on *Quercus alba*.

Andricus indistinctus Bassett, 1890. Amer. Ent. Soc., Trans. 17: 81. ♀, gall.

kingi Bassett. Calif. Ecology: Produce leaf galls in agamic and sexual generations on *Quercus douglasii*, *Q. dumosa*, *Q. garryana*, *Q. lobata*.

Andricus Kingi Bassett, 1900. Amer. Ent. Soc., Trans. 26: 316. ♀, gall. Agamic gen.

Andricus pistillaris Trotter, 1910. Lab. Zool. Gen. e Agr. Portici, Bol. 5: 117. ♀, gall.

Liodora dumosae Weld, 1957. U. S. Natl. Mus., Proc. 107: 111. ♀, ♂, gall. Sexual gen.

Taxonomy: Rosenthal and Koehler, 1971. Ent. Soc. Amer., Ann. 64: 565-570.

lasius (Ashmead). Ariz., Calif. Ecology: Produce leaf galls on *Quercus chrysolepis*, *Q. wilcoxii*.

Callirhytes lasius Ashmead, 1896. U. S. Natl. Mus., Proc. 19: 132. ♀, gall.

lasius var. **areolaris** Kinsey. Calif.

Andricus lasius var. *areolaris* Kinsey, 1922. Ind. Univ. Studies 53: 19. ♀, gall.

lasius var. **sublasius** Kinsey. Calif.

Andricus lasius var. *sublasius* Kinsey, 1922. Ind. Univ. Studies 53: 19. ♀, gall.

mamillaformis (Weld). Md., Va., N. C., Ill. Ecology: Produce bud galls on *Quercus alba*.

Callirhytes mamillaformis Weld, 1926. U. S. Natl. Mus., Proc. 68 (10): 96. ♀, gall.

maxwelli Bassett. Tex. Ecology: Produce twig galls on *Quercus* sp.

Andricus Maxwelli Bassett, 1890. Amer. Ent. Soc., Trans. 17: 83. ♀, ♂, gall.

mendocinensis Weld. Calif. Ecology: Produce subterranean galls, probably on the roots, on *Lithocarpus densiflora*, the tanbark oak.

Andricus mendocinensis Weld, 1957. U. S. Natl. Mus., Proc. 107: 112. ♀, gall.

montezuma Beutenmueller. Ariz.; Mexico. Ecology: Produce stem galls on *Quercus arizonica*, *Q. oblongifolia*, *Q. reticulata*, *Q. toumeyi*.

Andricus montezumus Beutenmueller, 1913. Amer. Ent. Soc., Trans. 39: 243. ♀.

Taxonomy: Kinsey, 1920. Amer. Mus. Nat. Hist., Bul. 42: 306 (gall).

multicostatus Weld. Ariz. Ecology: Produce bud galls on *Quercus subturbanella*.

Andricus multicostatus Weld, 1952. U. S. Natl. Mus., Proc. 102: 331. ♀, gall.

murtfeldtae Ashmead. N. J. to S. C., w. to Mo., Tex. Ecology: Produce bud galls on *Quercus* *stellata*.

Andricus murtfeldtae Ashmead, 1896. U. S. Natl. Mus., Proc. 19: 117. ♂, gall.

Taxonomy: Weld, 1926. U. S. Natl. Mus., Proc. 68 (10): 78 (female).

occultatus (Weld). Calif. Ecology: Produce bud galls on *Quercus douglasii*, *Q. dumosa*, *Q. lobata*.

Diplolepis occultatus Weld, 1926. U. S. Natl. Mus., Proc. 68 (10): 28. ♀, gall.

opertus (Weld). Calif. Ecology: Produce bud galls on *Quercus douglasii*, *Q. lobata*.

Callirhytis nigra Fullaway, 1911. Ent. Soc. Amer., Ann. 4: 362. ♀. Preocc. by Tavares, 1902. Gall described originally for *nigra* Fullaway is another sp.

Diplolepis operta Weld, 1926. U. S. Natl. Mus., Proc. 68 (10): 29. ♀, gall.

Andricus nigridius Weld, 1944. U. S. Natl. Mus., Proc. 95: 11. N. name for *nigra* Fullaway.

parmula Bassett. Calif. Ecology: Produce leaf galls on *Quercus douglasii*, *Q. dumosa*, *Q. engelmanni*, *Q. garryana*, *Q. lobata*.

Andricus parvula Bassett, 1900. Amer. Ent. Soc., Trans. 26: 312. ♀, gall.

Dryophanta discus Bassett, 1900. Amer. Ent. Soc., Trans. 26: 326. ♀, gall.

pattersonae Fullaway. Wash., Calif. Ecology: Produce leaf galls on *Quercus douglasii*, *Q. dumosa*, *Q. garryana*, *Q. lobata*.

Andricus pattersonae Fullaway, 1911. Ent. Soc. Amer., Ann. 4: 352. ♀, gall.

pattoni (Bassett). Conn. to Fla., w. to Okla., Tex. Ecology: Produce leaf galls on *Quercus stellata*.

Cynips pattoni Bassett, 1881. Canad. Ent. 13: 98. ♀, gall.

pillula Bassett. Utah. Ecology: Produce leaf galls on *Quercus gambelii*.

Andricus (Callirhytis) pilula Bassett, 1890. Amer. Ent. Soc., Trans. 17: 77. ♀, gall.

Taxonomy: Weld, 1952. U. S. Natl. Mus., Proc. 102: 332 (male).

pillularis Weld. Ariz. Ecology: Produce leaf galls on *Quercus arizonica*, *Q. gambelii*, *Q. oblongifolia*, *Q. reticulata*, *Q. subturbinella*, *Q. toumeyi*.

Andricus pilularis Weld, 1952. U. S. Natl. Mus., Proc. 102: 333. ♀, ♂, gall.

pisiformis Beutenmueller. N. J., Md., Va., Fla., Ill. Ecology: Produce bud galls on *Quercus alba*, *Q. bicolor*.

Andricus pisiformis Beutenmueller, 1911. Ent. News 22: 70. ♀, gall.

prescotti Weld. Ariz. Ecology: Produce acorn galls on *Quercus arizonica*, *Q. gambelii*, *Q. oblongifolia*, *Q. reticulata*, *Q. subturbinella*.

Andricus prescotti Weld, 1952. U. S. Natl. Mus., Proc. 102: 331. ♀, gall.

projectus Weld. Oreg. Ecology: Produce bud galls on *Quercus chrysolepis*.

Andricus projectus Weld, 1952. U. S. Natl. Mus., Proc. 102: 329. ♀, gall.

pulchellus Bassett. Conn. Ecology: Probably produce stem or leaf galls on *Quercus prinoides*.

Andricus pulchellus Bassett, 1900. Amer. Ent. Soc., Trans. 26: 314. ♀.

quercusecalifornicus (Bassett). Wash., Oreg., Calif. Ecology: Produce stem galls on *Quercus douglasii*, *Q. dumosa*, *Q. engelmanni*, *Q. garryana*, *Q. lobata*.

Cynips q. californicus Bassett, 1881. Canad. Ent. 13: 51. ♀, gall.

Andricus (Callirhytis) californicus Ashmead, 1885. Amer. Ent. Soc., Trans. 12: 294.

Andricus spongiosa Gillette, 1894. Canad. Ent. 26: 235. ♀, gall.

Andricus californicus var. *fructiformis* Kinsey, 1922. Ind. Univ. Studies 53: 12. ♀, gall.

Andricus californicus var. *intermedius* Kinsey, 1922. Ind. Univ. Studies 53: 14. ♀, gall.

quercusflocci (Walsh). Mass. to N. C., w. to Mich., Ill., Mo., Ark. Ecology: Produce leaf galls on *Quercus alba*.

Cynips quercus flocci Walsh, 1864. Ent. Soc. Phila., Proc. 2: 482. ♀, gall.

Cynips (Andricus?) flocci Osten Sacken, 1865. Ent. Soc. Phila., Proc. 4: 348, 352.

Taxonomy: Fitch, 1859 (1858). N. Y. State Agr. Soc., Trans. 18: 814 (gall).

quercusfoliatus (Ashmead). Ga., Fla., Ala., Miss., Tex. Ecology: Produce bud galls on *Quercus virginiana*.

Cynips q. foliata Ashmead, 1881. Amer. Ent. Soc., Trans. 9: Proc. p. xii. ♀, gall.

Andricus (Andricus) foliatus Ashmead, 1885. Amer. Ent. Soc., Trans. 12: 295.

quercusformosus (Bassett). Conn. s. to Fla., w. to Ill., Mo. Ecology: Produce stem galls on *Quercus cinerea*, *Q. coccinea*, *Q. marilandica*, *Q. phellos*, *Q. rubra*.

Cynips q. formosa Bassett, 1864. Ent. Soc. Phila., Proc. 3: 679. ♀, gall.

Cynips formosa Osten Sacken, 1865. Ent. Soc. Phila., Proc. 4: 341, 345, 349.

- Cynips q. capsula* Ashmead, 1885. Amer. Ent. Soc., Trans. 12: Proc. p. ix ♀, gall.
querucuslanigera (Ashmead). Ga., Fla., Ala., Miss., La., Tex. Ecology: Produce leaf galls on *Quercus virginiana*.
Cynips q. lanigera Ashmead, 1881. Amer. Ent. Soc., Trans. 9: Proc. p. xiii. ♀, gall.
- Andricus (Andricus) lanigera* Ashmead, 1885. Amer. Ent. Soc., Trans. 12: 295.
- querucusostensackenii* (Bassett). Conn. to Va., w. to Ill. Ecology: Produce leaf galls on *Quercus coccinea*, *Q. palustris*.
Cynips q. Osten Sackenii Bassett, 1863. Ent. Soc. Phila., Proc. 2: 327. ♀, ♂, gall.
Cynips Osten Sackenii Osten Sacken, 1865. Ent. Soc. Phila., Proc. 4: 345, 348, 355.
- querucuspetiolicola* (Bassett). Mass. to Va., w. to Tenn., Mo. Ecology: Produce leaf galls on *Quercus alba* and other white oaks.
Cynips q. petiolicola Bassett, 1863. Ent. Soc. Phila., Proc. 2: 325. ♀, ♂, gall.
Cynips (Andricus) petiolicola Osten Sacken, 1865. Ent. Soc. Phila., Proc. 4: 339, 346, 349.
Andricus quinquesepultum Ashmead, 1885. Amer. Ent. Soc., Trans. 12: 299. ♂, gall.
Andricus cicatricula Bassett, 1890. Amer. Ent. Soc., Trans. 17: 80. ♀, ♂, gall.
Andricus concolorans Kinsey, 1920. Amer. Mus. Nat. Hist., Bul. 42: 302. ♀, ♂, gall.
- queruccussingularis* (Bassett). Maine, Que. s. to N. C. Ecology: Produce leaf galls on *Quercus rubra*.
Cynips q. singularis Bassett, 1863. Ent. Soc. Phila., Proc. 2: 326. ♀, ♂, gall.
Cynips singularis Osten Sacken, 1865. Ent. Soc. Phila., Proc. 4: 345, 348, 355.
- querucusutriculus* (Bassett). Conn. to Fla., w. to Ill. Ecology: Produce leaf galls on *Quercus alba*, *Q. chapmani*, *Q. stellata*.
Cynips q. utricula Bassett, 1881. Canad. Ent. 13: 78. ♀, ♂, gall.
Andricus (Andricus) utricularis Ashmead, 1885. Amer. Ent. Soc., Trans. 12: 295.
Andricus pruinosus Bassett, 1900. Amer. Ent. Soc., Trans. 26: 311. ♀, gall.
- reniformis* McCracken and Egbert. Calif. Ecology: Produce stem galls on *Quercus chrysolepis*, *Q. vaccinifolia*.
Andricus reniformis McCracken and Egbert, 1922. Stanford Univ., Pubs., Univ. Ser., Biol. Sci. 3 (1): 31. ♀, gall.
- reticulatus* Bassett. N. Mex., Ariz. Ecology: Produce leaf galls on *Quercus arizonica*, *Q. gambelii*, *Q. oblongifolia*, *Q. reticulata*, *Q. subturbinella*, *Q. toumeyi*.
Andricus (Callirhytis) reticulata Bassett, 1890. Amer. Ent. Soc., Trans. 17: 74. ♀, gall.
- rhizoxenus* (Ashmead). Ariz. Ecology: Produce stem galls on *Quercus reticulata*.
Callirhytis rhizoxenus Ashmead, 1896. U. S. Natl. Mus., Proc. 19: 132. ♀, gall.
- robustus* Weld. D. C., Va. to Fla., w. to Mo., Ark., Tex. Ecology: Produce leaf galls on *Quercus stellata*.
Andricus robustus Weld, 1926. U. S. Natl. Mus., Proc. 68 (10): 81. ♀, gall.
- rugatus* Weld. Mo., Ark. Ecology: Produce leaf galls on *Quercus lyrata*.
Andricus rugatus Weld, 1926. U. S. Natl. Mus., Proc. 68(10): 82. ♀, gall.
- ruginosus* Bassett. N. Mex., Ariz. Ecology: Produce stem galls on *Quercus fendleri*, *Q. gambelii*.
Andricus (Callirhytis) ruginosus Bassett, 1890. Amer. Ent. Soc., Trans. 17: 75. ♀, gall.
- scutella* Weld. Ariz. Ecology: Produce leaf galls on *Quercus gambelii*, *Q. subturbinella*.
Andricus scutella Weld, 1930. Ent. Soc., Wash., Proc. 32: 29. ♀, gall.
- spectabilis* Kinsey. Calif. Ecology: Produce stem galls on *Quercus chrysolepis*.
Andricus spectabilis Kinsey, 1922. Amer. Mus. Nat. Hist., Bul. 46: 289. ♀, gall.
- spectabilis* var. *incisus* Kinsey. Calif.
Andricus spectabilis var. *incisus* Kinsey, 1922. Ind. Univ. Studies 53: 45. ♀.
- spectabilis* var. *ukiahensis* Kinsey. Calif.
Andricus spectabilis var. *ukiahensis* Kinsey, 1922. Ind. Univ. Studies 53: 46. ♀.
- spicatus* (Bassett). Ariz. Ecology: Produce stem galls on *Quercus arizonica*, *Q. oblongifolia*, *Q. toumeyi*.
Loranthus spicatus Bassett, 1900. Amer. Ent. Soc., Trans. 26: 329. ♀, gall.
- splendens* Weld. Ariz. Ecology: Produce leaf galls on *Quercus grisea*, *Q. subturbinella*.
Andricus splendens Weld, 1919. Canad. Ent. 51: 254. ♀, gall.

- stellaris** Weld. Calif. Ecology: Produce leaf galls on *Quercus douglasii*, *Q. garryana*.
Andricus stellaris Weld, 1926. U. S. Natl. Mus., Proc. 68(10): 84. ♀, gall.
- stramineus** Weld. Ariz. Ecology: Produce stem galls on *Quercus oblongifolia*.
Andricus straminens Weld, 1944. U. S. Natl. Mus., Proc. 95: 13. ♀, gall.
- stropus** Ashmead. Va. to Fla., w. to Mo., Ark., Tex. Ecology: Produce bud galls on *Quercus stellata*.
Andricus stropus Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 136. ♀, gall.
Andricus atropus (!) Ashmead, 1910. In Smith, N. J. State Mus. Rpt. for 1909, p. 602.
- sulfureus** (Weld). Ariz. Ecology: Produce leaf galls on *Quercus arizonica*, *Q. oblongifolia*.
Diplolepis sulfureus Weld, 1926. U. S. Natl. Mus., Proc. 68 (10): 33. ♀, gall.
- tecturnarum** Kinsey. N. Mex., Ariz. Ecology: Produce leaf galls on *Quercus arizonica*, *Q. gambelii*, *Q. oblongifolia*, *Q. subturbanella*, *Q. toumeyi*.
Andricus tecturnarum Kinsey, 1920. Amer. Mus. Nat. Hist., Bul. 42: 312. ♀, gall.
- tenuicornis** (Bassett). Ariz. Ecology: Produce leaf galls on *Quercus arizonica*.
Cynips tenuicornis Bassett, 1881. Canad. Ent. 13: 92. ♀, gall.
- toumeyi** Weld. N. Mex., Ariz. Ecology: Produce stem galls on *Quercus subturbanella*, *Q. toumeyi*.
Andricus toumeyi Weld, 1926. U. S. Natl. Mus., Proc. 68 (10): 85. ♀, gall.
- tubalis** Weld. Ariz. Ecology: Produce stem galls on *Quercus arizonica*, *Q. oblongifolia*.
Andricus tubalis Weld, 1926. U. S. Natl. Mus., Proc. 68 (10): 86. ♀, gall.
- tubularius** Weld. N. Mex., Ariz. Ecology: Produce stem galls on *Quercus subturbanella*.
Andricus tubularius Weld, 1926. U. S. Natl. Mus., Proc. 68 (10): 87. ♀, gall.
- verensis** Weld. Calif. Ecology: Produce bud galls on *Quercus dumosa*, *Q. garryana*.
Andricus verenus Weld, 1944. U. S. Natl. Mus., Proc. 95: 13. ♀, gall. Preocc. by Bassett, 1900.
Andricus verensis Weld, 1951. U. S. Dept. Agr., Agr. Monog. 2: 636. N. name.
- vernus** (Bassett). Conn. Ecology: Specimen collected ovipositing in buds of *Quercus ilicifolia*.
Amphibolips verna Bassett, 1900. Amer. Ent. Soc., Trans. 26: 321. ♀.
- wheeleri** Beutenmueller. N. Mex., Ariz. Ecology: Produce stem galls on *Quercus arizonica*, *Q. oblongifolia*, *Q. subturbanella*, *Q. toumeyi*.
Andricus wheeleri Beutenmueller, 1907. Amer. Mus. Nat. Hist., Bul. 23: 464. ♀, gall.
- wiltzae** Fullaway. Calif. Ecology: Produce stem galls on *Quercus dumosa*, *Q. lobata*.
Andricus wiltzae Fullaway, 1911. Ent. Soc. Amer., Ann. 4: 353. ♀, gall.

Genus BESBICUS Kinsey

- Cynips** subg. **Besbicus** Kinsey, 1930. Gall wasp genus Cynips, p. 222.
 Type-species: *Cynips (Besbicus) multipunctata* var. *conspicua* Kinsey. Orig. desig. *conspicuous* (Kinsey). Calif. Ecology: Produce stem galls on *Quercus douglasii*, *Q. lobata*.
Cynips (Besbicus) multipunctata var. *conspicua* Kinsey, 1930. Gall wasp genus Cynips, p. 229. ♀, gall.
Cynips conspicua Kinsey, 1936. Origin of higher categories in Cynips, p. 42.
heldae (Fullaway). Calif. Ecology: Produce leaf galls on *Quercus lobata*.
Cynips heldae Fullaway, 1911. Ent. Soc. Amer., Ann. 4: 345. ♀, gall.
indictus (Kinsey). Calif. Ecology: Produce leaf galls on *Quercus douglasii*.
Cynips (Besbicus) multipunctata var. *indicta* Kinsey, 1930. Gall wasp genus Cynips, p. 228. ♀, gall.
Cynips (Besbicus) indicta Kinsey, 1936. Origin of higher categories in Cynips, p. 324.
leachii (Kinsey). Calif. Ecology: Produce leaf galls on *Quercus garryana*.
Cynips (Besbicus) mirabilis var. *leachii* Kinsey, 1930. Gall wasp genus Cynips, p. 238. ♀, gall.
Cynips (Besbicus) leachii Kinsey, 1936. Origin of higher categories in Cynips, p. 325.
maculosus (Weld). Calif. Ecology: Produce leaf galls on *Quercus dumosa*.
Cynips maculosa Weld, 1926. U. S. Natl. Mus., Proc. 68 (10): 63. ♀, gall.

- mirabilis* (Kinsey). B. C., Wash., Oreg. Ecology: Produce leaf galls in agamic generation, bud galls in sexual generation, on *Quercus garryana*.
Cynips mirabilis Kinsey, 1922. Ind. Univ. Studies 53: 50. ♀, gall.
- Biology: Evans, 1967. Canad. Ent. 99: 187-196.
- multipunctatus* (Beutenmueller). Calif. Ecology: Produce leaf galls on *Quercus douglasii*.
Dryophanta multipunctata Beutenmueller, 1911. Ent. News 22: 67. ♀, gall.
- tritior* (Kinsey). Calif. Ecology: Produce leaf galls on *Quercus dumosa*, *Q. durata*.
Cynips (Besbicus) maculosa var. *tritior* Kinsey, 1930. Gall wasp genus *Cynips*, p. 235. ♀, gall.
Cynips (Besbicus) tritior Kinsey, 1936. Origin of higher categories in *Cynips*, p. 325.
- Genus ATRUSCA Kinsey**
- Cynips* subg. *Atrusca* Kinsey, 1930. Gall wasp genus *Cynips*, p. 276.
 Type-species: *Cynips (Atrusca) dugesi* var. *simulatrix* Kinsey. Orig. desig.
- aggregata* (Weld). Ariz. Ecology: Produce stem galls on *Quercus arizonica*, *Q. oblongifolia*, *Q. toumeyi*.
Diplolepis aggregata Weld, 1926. U. S. Natl. Mus., Proc. 68 (10): 15. ♀, gall.
- bella* (Bassett). N. Mex., Ariz. Ecology: Produce leaf galls on *Quercus arizonica*, *Q. oblongifolia*, *Q. reticulata*, *Q. subturbanella*, *Q. toumeyi*.
Cynips bella Bassett, 1881. Canad. Ent. 13: 93. ♀, gall.
- Holcaspis maculipennis* Gillette, 1894. Canad. Ent. 26: 236. ♀, gall.
- brevipennata* (Gillette). Colo. Ecology: Produce leaf galls on *Quercus fendleri*, *Q. gambelii*, *Q. subturbanella*.
Holcaspis brevipennata Gillette, 1893. Ent. News 4: 31. ♀, gall.
- Andricus pellucidus* Kinsey, 1920. Amer. Mus. Nat. Hist., Bul. 42: 309. ♀, gall.
- capronae* (Weld). Ariz. Ecology: Produce leaf galls on *Quercus subturbanella*.
Diplolepis capronae Weld, 1930. Ent. Soc. Wash., Proc. 32: 29. ♀, gall.
- catena* (Kinsey). Tex. Ecology: Produce leaf galls on *Quercus grisea*.
Cynips catena Kinsey, 1936. Origin of higher categories in *Cynips*, p. 102. ♀, gall.
- cava* (Weld). Tex. Ecology: Produce leaf galls on *Quercus brevirobusta*.
Diplolepis cava Weld, 1926. U. S. Natl. Mus., Proc. 68 (10): 22. ♀, gall.
- clivorum* (Kinsey). Ohio. Ecology: Produce leaf galls on *Quercus stellata*.
Cynips (Atrusca) centricola var. *clivorum* Kinsey, 1930. Gall wasp genus *Cynips*, p. 300. ♀, gall.
Cynips clivorum Kinsey, 1936. Origin of higher categories in *Cynips*, p. 181.
- congesta* (Kinsey). Tex. Ecology: Produce leaf galls on *Quercus grisea*.
Cynips (Atrusca) bella var. *congesta* Kinsey, 1930. Gall wasp genus *Cynips*, p. 292. ♀, gall.
- Cynips congesta* Kinsey, 1936. Origin of higher categories in *Cynips*, p. 171.
- cubitalis* (Kinsey). Colo. Ecology: Produce leaf galls on *Quercus gambelii*.
Cynips (Atrusca) cubitalis Kinsey, 1936. Origin of higher categories in *Cynips*, p. 107. ♀, gall.
- pupoides* (Kinsey). Tex. Ecology: Produce leaf galls on *Quercus grisea*.
Cynips (Atrusca) dugesi var. *pupoides* Kinsey, 1930. Gall wasp genus *Cynips*, p. 284. ♀, gall.
Cynips pupoides Kinsey, 1936. Origin of higher categories in *Cynips*, p. 92.
- quercusecentrica* (Osten Sacken). N. J. s. to N. C., w. to Mo., Ark., Tex. Ecology: Produce leaf galls on *Quercus stellata*.
Cynips quercusecentrica Osten Sacken, 1861. Ent. Soc. Phila., Proc. 1: 58. ♀, gall.
- Cynips centricola* Osten Sacken, 1865. Ent. Soc. Phila., Proc. 4: 339, 345, 347.
- Cynips quercus-rubrae* Karsch, 1880. Ztschr. f. Gesam. Naturw. 53: 293. ♀, gall.
- simulatrix* (Kinsey). N. Mex., Ariz. Ecology: Produce leaf galls on *Quercus arizonica*, *Q. gambelii*, *Q. grisea*, *Q. oblongifolia*, *Q. undulata*.
Cynips (Atrusca) dugesi var. *simulatrix* Kinsey, 1930. Gall wasp genus *Cynips*, p. 280. ♀, gall.
Cynips simulatrix Kinsey, 1936. Origin of higher categories in *Cynips*, p. 131.

strians (Kinsey). Ill. Ecology: Produce leaf galls on *Quercus stellata*.

Cynips (Atrusca) centricola var. *strians* Kinsey, 1930. Gall wasp genus Cynips, p. 304. ♀, gall.

Cynips strians Kinsey, 1936. Origin of higher categories in Cynips, p. 181.

subnigra (Kinsey). N. Mex. Ecology: Produce leaf galls on *Quercus grisea*.

Cynips (Atrusca) subnigra Kinsey, 1936. Origin of higher categories in Cynips, p. 140. ♀, gall.

vanescens (Kinsey). Ariz. Ecology: Produce leaf galls on *Quercus grisea*.

Cynips (Atrusca) bella var. *vanescens* Kinsey, 1930. Gall wasp genus Cynips, p. 292. ♀, gall.

Cynips vanescens Kinsey, 1936. Origin of higher categories in Cynips, p. 178.

Genus DISHOLCASPIS Dalla Torre and Kieffer

Holcaspis Mayr, 1881. Zwanzig. Jahresber. Comm.-Oberrealsch. I. Bez. Wien. p. 35.
toumeyi.

Type-species: *Cynips globulus* Fitch. Desig. by Ashmead, 1903.

Disholcaspis Dalla Torre and Kieffer, 1910. Das Tierreich, v. 24, p. 371. N. name.

Known only from agamic females emerging in the late fall from oak galls. The sexual generation for these species is unknown, or at least unrecognized. Members of this genus are known from North America only.

Revision: Beutenmueller, 1909. Amer. Mus. Nat. Hist., Bul. 26: 29-45.

acetabula Weld. Colo. Ecology: Produce root galls on *Quercus gambelii*, *Q. reticulata*, *Q. subtrubinella*, *Q. toumeyi*.

Disholcaspis acetabula Weld, 1921. U. S. Natl. Mus., Proc. 59: 194. ♀, gall.

bassetti (Gillette). Ohio, Mich., Ill. Ecology: Produce stem galls on *Quercus bicolor*, *Q. macrocarpa*.

Holcaspis bassetti Gillette, 1888. Mich. State Bd. Agr., Rpt. 27: 472. ♀, gall.

brevinota Weld. Tex. Ecology: Produce root galls on *Quercus brevirostra*.

Disholcaspis brevinota Weld, 1921. U. S. Natl. Mus., Proc. 59: 197. ♀, gall.

canescens (Bassett). Calif. Ecology: Produce stem galls on *Quercus douglasii*, *Q. dumosa*, *Q. lobata*.

Holcaspis canescens Bassett, 1890. Amer. Ent. Soc., Trans. 17: 66. ♀, gall.

chrysolepidis (Beutenmueller). Calif. Ecology: Produce twig galls on *Quercus chrysolepis*.

Holcaspis chrysolepidis Beutenmueller, 1911. Ent. News 22: 68. ♀, gall.

cinerosa (Bassett). Tex. Ecology: Produce stem galls on *Quercus virginiana*.

Cynips cinerosa Bassett, 1881. Canad. Ent. 13: 10. ♀, gall.

colorado (Gillette). Colo. Ecology: Produce stem galls on *Quercus* sp., prob. *Q. gambelii*.

Holcaspis colorado Gillette, 1893. Ent. News 4: 210. ♀, gall.

conalis Weld. Calif. Ecology: Produce stem galls on *Quercus garryana*.

Disholcaspis conalis Weld, 1926. U. S. Natl. Mus., Proc. 68 (10): 37. ♀, gall.

corallina (Bassett). Calif. Ecology: Produce stem galls on *Quercus douglasii*.

Holcaspis corallina Bassett, 1890. Amer. Ent. Soc., Trans. 17: 66. ♀, gall.

eldoradensis (Beutenmueller). Wash., Oreg., Calif. Ecology: Produce stem galls on *Quercus dumosa*, *Q. garryana*, *Q. lobata*.

Holcaspis eldoradensis Beutenmueller, 1909. Amer. Mus. Nat. Hist., Bul. 26: 38. ♀, gall.

edura Weld. Ariz. Ecology: Produce stem galls on *Quercus arizonica*, *Q. oblongifolia*, *Q. reticulata*.

Disholcaspis simulata Kinsey, 1922. Ind. Univ. Studies 53: 79. ♀, gall.

simulata var. **vancouverensis** Kinsey. Oreg., Calif. Ecology: Produce twig galls on *Quercus garryana*.

Disholcaspis simulata var. *vancouverensis* Kinsey, 1922. Ind. Univ. Studies 53: 81. ♀, gall.
spissa Weld. Ariz. Ecology: Produce stem galls on *Quercus arizonica*, *Q. havardii*, *Q. reticulata*, *Q. subturbanella*.

Disholcaspis spissa Weld, 1957. U. S. Natl. Mus., Proc. 107: 114. ♀, gall.

spongiosa (Karsch). Ga., Fla., Ala., Mo., Ark., Okla., Tex. Ecology: Produce stem galls on *Quercus chapmanii*, *Q. stellata*.

Diplolepis spongiosa Karsch, 1880. Ztschr. f. Gesam. Naturw. 53: 295. ♀, gall.

Cynips q. fuscata Bassett, 1881. Canad. Ent. 13: 75. ♀, gall.

sulcata (Ashmead). Ariz. Ecology: Produce leaf galls on *Quercus arizonica*, *Q. oblongifolia*, *Q. reticulata*, *Q. subturbanella*, *Q. toumeyi*.

Cynips sulcatus Ashmead, 1896. U. S. Natl. Mus., Proc. 19: 123. ♀, gall.

terrestris Weld. Va., N. C., Fla., Ala., Mo., Ark., Tex. Ecology: Produce root galls on *Quercus margaretae*, *Q. stellata*.

Disholcaspis terrestris Weld, 1921. U. S. Natl. Mus., Proc. 59: 198. ♀, gall.

truckeensis (Ashmead). Calif. Ecology: Produce stem galls on *Quercus chrysolepis*, *Q. wilcoxii*.
Holcaspis truckeensis Ashmead, 1896. U. S. Natl. Mus., Proc. 19: 127. ♀, gall.

washingtonensis (Gillette). Wash., Oreg., Calif. Ecology: Produce twig galls on *Quercus douglasii*, *Q. dumosa*, *Q. garryana*, *Q. lobata*.

Cynips washingtonensis Gillette, 1894. Canad. Ent. 26: 235. ♀, gall.

Genus ANTRON Kinsey

Cynips subg. *Antron* Kinsey, 1930. Gall wasp genus *Cynips*, p. 180.

Type-species: *Cynips (Antron) echinus* var. *schulthessae* Kinsey. Orig. desig.

aeraspiformis (Weld). N. Mex. Ecology: Produce leaf galls on *Quercus subturbanella*, *Q. toumeyi*.

Diplolepis aeraspiformis Weld, 1926. U. S. Natl. Mus., Proc. 68 (10): 14. ♀, gall.

clavuloides (Kinsey). Calif. Ecology: Produce leaf galls on *Quercus lobata*.

Dryophanta clavula Beutenmueller, 1911. Ent. News 22: 67. ♀, gall. Preocc. in *Cynips* by Osten Sacken, 1865.

Cynips (Antron) teres var. *clavuloides* Kinsey, 1930. Gall wasp genus *Cynips*, p. 215. N. name.

douglasii (Ashmead). Calif. Ecology: Produce leaf galls in agamic generation and bud galls in sexual generation on *Quercus douglasii*, *Q. dumosa*, *Q. lobata*.

Holcaspis douglasii Ashmead, 1896. U. S. Natl. Mus., Proc. 19: 127. ♀, gall. Agamic gen.

Dryophanta lobata McCracken and Egbert, 1922. Stanford Univ., Pubs., Univ. Ser., Biol. Sci. 3 (1): 13. ♀, ♂, gall. Sexual gen.

Taxonomy: Kinsey, 1930. Gall wasp genus *Cynips*, p. 190.

dumosae (Kinsey). Calif. Ecology: Produce leaf galls on *Quercus dumosa*.

Cynips (Antron) echinus var. *dumosae* Kinsey, 1930. Gall wasp genus *Cynips*, p. 199. ♀, gall. Agamic gen.

Cynips dumosae Kinsey, 1936. Origin of higher categories in *Cynips*, p. 77.

magdalena Weld. N. Mex. Ecology: Produce leaf galls on *Quercus subturbanella*.

Antron magdalena Weld, 1957. U. S. Natl. Mus., Proc. 107: 116. ♀, gall.

pileus Weld. Ariz. Ecology: Produce stem galls on *Quercus subturbanella*.

Antron pileus Weld, 1952. U. S. Natl. Mus., Proc. 102: 333. ♀, ♂, gall.

plumbeum (Weld). Ariz. Ecology: Produce leaf galls on *Quercus arizonica*, *Q. oblongifolia*, *Q. toumeyi*.

Cynips plumbea Weld, 1926. U. S. Natl. Mus., Proc. 68 (10): 64. ♀, gall.

quercechinus (Osten Sacken). Calif. Ecology: Produce leaf galls in agamic generation and bud galls in sexual generation on *Quercus douglasii*, *Q. dumosa*, *Q. lobata*.

Cynips querqus echinus Osten Sacken, 1870. Amer. Ent. Soc., Trans. 3: 56. ♀, gall. Agamic gen.

- Cynips echinus* Ashmead, 1885. Amer. Ent. Soc., Trans. 12: 295.
Andricus speciosus Bassett, 1890. Amer. Ent. Soc., Trans. 17: 81. ♀, gall.
Andricus ribes Kinsey, 1922. Ind. Univ. Studies 53: 42. ♀, ♂, gall. Sexual gen.
querusechinus var. *mistum* (Kinsey). Calif. Ecology: Produce leaf galls on *Quercus dumosa*.
Cynips (*Antron*) *echinus* var. *mista* Kinsey, 1930. Gall wasp genus *Cynips*, p. 200. ♀, gall.
querusechinus var. *schulthessae* (Kinsey). Calif. Ecology: Produce galls on *Quercus douglasii*, *Q. durata*.
Cynips (*Antron*) *echinus* var. *schulthessae*, agamic form *schulthessae* Kinsey, 1930. Gall wasp genus *Cynips*, p. 202. ♀, gall. Agamic gen.
Cynips (*Antron*) *echinus* var. *schulthessae*, bisexual form *atrata* Kinsey, 1930. Gall wasp genus *Cynips*, p. 204. ♀, ♂, gall. Sexual gen.
querusechinus var. *vicinum* (Kinsey). Calif. Ecology: Produce galls on *Quercus douglasii*.
Cynips (*Antron*) *echinus* var. *vicina*, agamic form *vicina* Kinsey, 1930. Gall wasp genus *Cynips*, p. 196. ♀, gall. Agamic gen.
Cynips *vicina*, agamic form *vicina* Kinsey, 1936. Origin of higher categories in *Cynips*, p. 78.
Cynips (*Antron*) *echinus* var. *vicina*, bisexual form *incepta* Kinsey, 1930. Gall wasp genus *Cynips*, p. 198. ♀, ♂, gall. Sexual gen.
quercusnubila (Bassett). Ariz. Ecology: Produce leaf galls on *Quercus arizonica*, *Q. oblongifolia*, *Q. reticulata*, *Q. subturbanella*, *Q. toumeyi*.
Cynips *q. nubila* Bassett, 1881. Canad. Ent. 13: 56. ♀, gall.
Dryophanta nubila Mayr, 1881. Zwanzig. Jahresber. Comm.-Oberrealsch. I. Bez. Wien., p. 39. Nom. nud.
Dryophanta nubila Ashmead, 1885. Amer. Ent. Soc., Trans. 12: 296.
russum (Kinsey). Ariz. Ecology: Produce leaf galls on *Quercus arizonica*, *Q. oblongifolia*.
Cynips (*Acraspis*) *nubila* var. *russa* Kinsey, 1930. Gall wasp genus *Cynips*, p. 343. ♀, gall.
Cynips *russa* Kinsey, 1936. Origin of higher categories in *Cynips*, p. 255.

Genus BELONOCNEMA Mayr

- Belonocnema* Mayr, 1881. Zwanzig. Jahresber. Comm.-Oberrealsch. I. Bez. Wien., pp. 4, 16, 38.
 Type-species: *Belonocnema treatae* Mayr. Monotypic.
Dryorhizoxenus Ashmead, 1882 (1881). Amer. Ent. Soc., Trans. 9: Proc. p. xxv.
 Type-species: *Dryorhizoxenus floridanus* Ashmead. Monotypic.
kinseyi Weld. Tex. Ecology: Produce leaf galls on *Quercus virginiana*.
Belonocnema kinseyi Weld, 1921. U. S. Natl. Mus., Proc. 59: 241. ♀, gall.
querucusvirens (Osten Sacken). Fla. Ecology: Produce pea-shaped leaf galls on *Quercus virginiana*.
Cynips *q. virens* Osten Sacken, 1861. Ent. Soc. Phila., Proc. 1: 57. gall.
Belonocnema fossoria Weld, 1921. U. S. Natl. Mus., Proc. 59: 240. ♀, gall.
treatae Mayr. Fla. Ecology: Produce root galls on *Quercus virginiana*.
Belonocnema (?) *Treatae* Mayr, 1881. Zwanzig. Jahresber. Comm.-Oberrealsch. I. Bez. Wien., p. 17, footnote. ♀, gall.
Dryorhizoxenus floridanus Ashmead, 1882 (1881). Amer. Ent. Soc., Trans. 9: Proc. p. xxv. ♀, ♂, gall.

Genus SPHAEROTERAS Ashmead

- Sphaeroteras* Ashmead, 1897. Psyche 8: 67.
 Type-species: *Biorrhiza* (?) *mellea* Ashmead. Monotypic.
caepuliforme (Beutenmueller). N. Y., Md., Va., Fla., Ind., Ill., Mo., Ark., Tex. Ecology: Produce root galls on red oaks.
Biorrhiza caepuliformis Beutenmueller, 1911. Ent. News 22: 69. ♀, gall.
carolina (Ashmead). N. C., Fla., Mo., Ark., Tex. Ecology: Produce leaf galls on *Quercus alba*, *Q. stellata*.
Dryophanta carolina Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 145. ♀, gall.

- melleum** (Ashmead). Fla. Ecology: Produce leaf galls on *Quercus chapmani*.
Biorhiza mellea Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 128, 138. ♀, gall.
- melleum** var. **albicolens** (Kinsey). Ga. Ecology: Produce leaf galls on *Quercus alba*.
Cynips (Acraspis) mellea var. *albicolens* Kinsey, 1930. Gall wasp genus *Cynips*, p. 336. ♀, gall.
- melleum** var. **anceps** (Kinsey). Tex. Ecology: Produce leaf galls on *Quercus breviloba*.
Cynips (Acraspis) mellea var. *anceps* Kinsey, 1930. Gall wasp genus *Cynips*, p. 323. ♀, gall.
- melleum** var. **bifurcum** (Kinsey). Miss. Ecology: Produce leaf galls on *Quercus stellata*.
Cynips (Acraspis) mellea var. *bifurca* Kinsey, 1930. Gall wasp genus *Cynips*, p. 325. ♀, gall.
- melleum** var. **comptum** (Kinsey). Tex. Ecology: Produce leaf galls on *Quercus stellata*.
Cynips (Acraspis) mellea var. *compta* Kinsey, 1930. Gall wasp genus *Cynips*, p. 322. ♀, gall.
- melleum** var. **concolor** (Kinsey). Fla. Ecology: Produce leaf galls on *Quercus minima*.
Cynips (Acraspis) mellea var. *concolor* Kinsey, 1930. Gall wasp genus *Cynips*, p. 329. ♀, gall.
- melleum** var. **crassior** (Kinsey). Ga. Ecology: Produce leaf galls on *Quercus stellata*.
Cynips (Acraspis) mellea var. *crassior* Kinsey, 1930. Gall wasp genus *Cynips*, p. 335. ♀, gall.
- melleum** var. **litigans** (Kinsey). Ala. Ecology: Produce leaf galls on *Quercus stellata*.
Cynips (Acraspis) mellea var. *litigans* Kinsey, 1930. Gall wasp genus *Cynips*, p. 327. ♀, gall.
- ocala** (Weld). Fla. Ecology: Produce root galls on *Quercus chapmani*.
Biorhiza ocala Weld, 1921. U. S. Natl. Mus., Proc. 59: 207. ♀, ♂, gall.
- rydbergiana** (Cockerell). N. Mex. Ecology: Produce leaf galls on *Quercus rydbergiana*.
Dryophanta rydbergiana Cockerell, 1903. Canad. Ent. 35: 217. ♀, gall.
- texanum** (Ashmead). Tex. Gall unknown.
Dryophanta texana Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 145. ♀.
- trimaculosum** (McCracken and Egbert). Calif. Ecology: Produce leaf galls on *Quercus douglasii*, *Q. dumosa*, *Q. garryana*, *Q. lobata*.
Callirhytis trimaculosa McCracken and Egbert, 1922. Stanford Univ., Pubs., Univ. Ser., Biol. Sci. 3 (1): 41. ♀, gall.
- unicum** (Weld). Mo., Ark., Tex. Ecology: Produce leaf galls on *Quercus stellata*.
Diplolepis unica Weld, 1926. U. S. Natl. Mus., Proc. 68 (10): 34. ♀, gall.

Genus ZOPHEROTERAS Ashmead

- Zopheroteras** Ashmead, 1897. Canad. Ent. 29: 261.
 Type-species: *Acraspis vaccinii* Ashmead. Monotypic.
- Parateras** Ashmead, 1897. Canad. Ent. 29: 262.
 Type-species: *Parateras hubbardi* Ashmead. Monotypic.
- compressum** (Gillette). Iowa. Ecology: Produce leaf galls on *Quercus rubra*.
Acraspis compressus Gillette, 1891. Ill. State Lab. Nat. Hist., Bul. 3: 197. ♀, gall.
- cuneatum** Weld. Va., Mo., Ark. Ecology: Produce leaf galls on *Quercus alba*.
Zopheroteras cuneatum Weld, 1944. U. S. Natl. Mus., Proc. 95: 14. ♀, gall.
- guttatum** Weld. Va. Ecology: Produce leaf galls on *Quercus palustris*.
Zopheroteras guttatum Weld, 1952. U. S. Natl. Mus., Proc. 102: 334. ♀, gall.
- hubbardi** (Ashmead). Md., Va., N. C., Mich., Ill. Ecology: Produce leaf galls on *Quercus coccinea*, *Q. velutina*.
Parateras hubbardi Ashmead, 1897. Canad. Ent. 29: 262. ♀.
- sphaerula** Weld. N. C., Ill., Mo. Ecology: Produce leaf galls on *Quercus rubra*.
Zopheroteras sphaerula Weld, 1926. U. S. Natl. Mus., Proc. 68 (10): 56. ♀, gall.
- vaccinii** (Ashmead). D. C., Fla. Ecology: Produce leaf galls on *Quercus stellata*.
Acraspis vaccinii Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 136. ♀.

Genus LOXAULUS Mayr

Loxaulus Mayr, 1881. *Zwanzig. Jahresber. Comm.-Oberrealsch. I. Bez. Wien.*, pp. 9, 12, 33.

Type-species: *Loxaulus mammula* Mayr. Monotypic.

Solenozopheria Ashmead, 1887. *Amer. Ent. Soc., Trans.* 14: 149.

Type-species: *Solenozopheria vaccinii* Ashmead. Monotypic.

Compsodryoxenus Ashmead, 1896. *U. S. Natl. Mus., Proc.* 19: 128.

Type-species: *Compsodryoxenus maculipennis* Ashmead. Desig. by Ashmead, 1903.

ashmeadi Kieffer. United States. Ecology: Produce hardly visible galls in wood of branches of English Oak, *Quercus robur*. Occurs only on introduced English Oaks, so presumably not of North American origin.

Loxaulus ashmeadi Kieffer, 1902. *Soc. Hist. Nat. Metz., Bul.* (2) 10: 4. ♀, gall.

beutenmuelleri Weld. N. J., Pa., Ill. Ecology: Produce leaf galls on *Quercus rubra*.
Loxaulus beutenmuelleri Weld, 1957. *U. S. Natl. Mus., Proc.* 107: 116-117. ♀.

brunneus (Ashmead). Calif. Ecology: Produce stem galls on *Quercus chrysolepis*.

Compsodryoxenus brunneus Ashmead, 1896. *U. S. Natl. Mus., Proc.* 19: 129. ♀, gall.

brunneus var. *atrior* (Kinsey). Calif. Ecology: Produce stem galls on *Quercus lobata*.

Compsodryoxenus brunneus var. *atrior* Kinsey, 1922. *Ind. Univ. Studies* 53: 49. ♀, gall.

ferrugineus (Gillette). Iowa.

Chilaspis ferruginea Gillette, 1891. *Ill. State Lab. Nat. Hist., Bul.* 3: 200. ♀.

humilis (Weld). Fla. Ecology: Produce root galls on *Quercus chapmani*, *Q. stellata*.

Compsodryoxenus humilis Weld, 1921. *U. S. Natl. Mus., Proc.* 59: 190, 236. ♀, gall.

illinoiensis (Weld). Ill. Ecology: Produce root galls on *Quercus macrocarpa*.

Compsodryoxenus illinoiensis Weld, 1921. *U. S. Natl. Mus., Proc.* 59: 191, 234. ♀, gall.

maculipennis (Ashmead). Ariz. Ecology: Produce stem galls on live oaks.

Compsodryoxenus maculipennis Ashmead, 1896. *U. S. Natl. Mus., Proc.* 19: 129. ♀, gall.

pattersoni (Kinsey). Tex. Ecology: Produce root galls on *Quercus virginiana*.

Compsodryoxenus pattersoni Kinsey, 1922. *Ind. Univ. Studies* 53: 49. ♀, gall.

querkusmammula (Bassett). Conn., N. J., Md., Va. Ecology: Produce stem galls on *Quercus alba*.

Cynips q. mammula Bassett, 1881. *Canad. Ent.* 13: 76. ♀, ♂, gall.

Loxaulus mammula Mayr, 1881. *Zwanzig. Jahresber. Comm.-Oberrealsch. I. Bez. Wien.*, p. 34.

tenuis (Weld). Colo. Ecology: Produce root galls on *Quercus fendleri*.

Compsodryoxenus tenuis Weld, 1921. *U. S. Natl. Mus., Proc.* 59: 190, 235. ♀, gall.

trizonalis Weld. Calif. Ecology: Produce acorn galls in agamic generation and stem galls in sexual generation on *Quercus chrysolepis*.

Loxaulus trizonalis Weld, 1926. *U. S. Natl. Mus., Proc.* 68 (10): 45. ♀, gall (agamic gen.); ♀, ♂ (sexual gen.).

vaccinii (Ashmead). Fla. Ecology: Produce stem galls on *Quercus* sp. The original statement that this sp. produced galls on *Vaccinium* was incorrect.

Solenozopheria vaccinii Ashmead, 1887. *Amer. Ent. Soc., Trans.* 14: 134, 149. ♀.

Genus BASSETTIA Ashmead

Bassettia Ashmead, 1887. *Amer. Ent. Soc., Trans.* 14: 146.

Type-species: *Bassettia floridana* Ashmead. Desig. by Ashmead, 1903.

aquaticae (Ashmead). Fla. Ecology: Produce stem galls on *Quercus nigra*.

Callirhytis aquaticae Ashmead, 1887. *Amer. Ent. Soc., Trans.* 14: 144. ♀, gall.

ceropterooides (Bassett). Conn. Ecology: Produce stem galls on *Quercus velutina*.

Callirhytis ceropterooides Bassett, 1900. *Amer. Ent. Soc., Trans.* 26: 324. ♀, gall.

floridana Ashmead. Conn. s. to Fla. Ecology: Produce clumps of galls at bases of sprouts on *Quercus chapmanii*; also observed to oviposit on *Quercus prinoides*.

Bassettia floridana Ashmead, 1887. *Amer. Ent. Soc., Trans.* 14: 147. ♀.

Dryophanta corrugis Bassett, 1890. *Amer. Ent. Soc., Trans.* 17: 71. ♀.

Taxonomy: Weld, 1952. *U. S. Natl. Mus., Proc.* 102: 336.

gemmae Ashmead. Mo.

Bassettia gemmae Ashmead, 1896. U. S. Natl. Mus., Proc. 19: 128. ♀.

herberti (Weld). Calif. Ecology: Produce stem galls on *Quercus agrifolia*, *Q. kelloggii*, *Q. wislizenii*.

Eumayria herberti Weld, 1926. U. S. Natl. Mus., Proc. 68 (10): 108. ♀, gall.

ligni Kinsey. Calif. Ecology: Produce stem galls in agamic generation and leaf galls in sexual generation on *Quercus douglasii*, *Q. dumosa*, *Q. lobata*.

Bassettia ligni Kinsey, 1922. Amer. Mus. Nat. Hist., Bul. 46: 291. ♀, gall.

Biology: Rosenthal and Koehler, 1971. Ent. Soc. Amer., Ann. 64: 565-570.

pallida Ashmead. Ga., Fla., Mo. Ecology: Produce stem galls on live oaks.

Bassettia pallida Ashmead, 1896. U. S. Natl. Mus., Proc. 19: 128. ♀.

queruscatesbaei (Ashmead). Fla. Ecology: Produce stem galls on *Quercus catesbeiae*.

Cynips q. catesbeiae Ashmead, 1881. Amer. Ent. Soc., Trans. 9: Proc. p. xv. ♀, ♂, gall.

Andricus (Andricus) catesbeiae Ashmead, 1885. Amer. Ent. Soc., Trans. 12: 295.

tennana Weld. N. Mex., Ariz. Ecology: Produce root galls on *Quercus gambelii*, *Q.*

subturbanella.

Bassettia tennana Weld, 1921. U. S. Natl. Mus., Proc. 59: 190, 232. ♀, gall.

Genus EUMAYRIA Ashmead

Eumayria Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 147.

Type-species: *Eumayria floridana* Ashmead. Monotypic.

eldoradensis (Beutenmueller). Oreg., Calif. Ecology: Produce acorn galls on *Quercus agrifolia*, *Q. kelloggii*, *Q. wislizenii*.

Andricus eldoradensis Beutenmueller, 1913. Brooklyn Ent. Soc., Bul. 8: 105. ♂.

floridana Ashmead. Va., Fla., Ind., Ill., Ark., Tex. Ecology: Produce root galls on red oaks.

Eumayria floridana Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 147. ♀, ♂, gall.

invisa Weld. Fla. Ecology: Produce stem galls on *Quercus myrtifolia*.

Eumayria invisa Weld, 1952. U. S. Natl. Mus., Proc. 102: 335. ♀, gall.

longipennis (Ashmead). Fla. Ecology: Produce stem galls on *Quercus laurifolia*.

Neuroterus longipennis Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 132, 140. ♂, gall.

Genus TRISOLENIELLA Rohwer and Fagan

Trisolenia Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 142. Preocc. by Ehrenberg, 1861.

Type-species: *Andricus saltatus* Ashmead. Monotypic.

Trisoleniella Rohwer and Fagan, 1917. U. S. Natl. Mus., Proc. 53: 377. N. name.

brevicornis (Beutenmueller). N. J. Ecology: Observed ovipositing in the buds of *Quercus alba*.

Andricus brevicornis Beutenmueller, 1913. Amer. Ent. Soc., Trans. 39: 245. ♀.

enigma (Weld). Va., Fla., Ill., Tex. Ecology: Produce root galls on *Quercus catesbeiae*, *Q. myrtifolia*, *Q. rubra*, *Q. texana*.

Callirhytis enigma Weld, 1921. U. S. Natl. Mus., Proc. 59: 219. ♀, gall.

bignelli (Dalla Torre and Kieffer). N. Y., N. J.

Trisolenia punctata Ashmead, 1896. U. S. Natl. Mus., Proc. 19: 129. ♀. Preocc. in *Andricus* by Bignell, 1892.

Andricus bignelli Dalla Torre and Kieffer, 1902. In Wytsman, Gen. Ins., fasc. 9, p. 61. N. name.

Amphibolips montana Beutenmueller, 1913. Insecutor Inscitiae Menstruus 1: 122. ♀.

saltata (Ashmead). N. C., Fla. Ecology: Produce bud galls on *Quercus cinerea*, *Q. falcata*.

Andricus saltatus ashmead, 1887. Amer. Ent. Soc., Trans. 14: 142. ♀, gall.

Genus ODONTOCYNIPS Kieffer

Odontocynips Kieffer, 1910. Lab. Zool. Gen. e Agr. Portici, Bol. 4: 112.

Type-species: *Odontocynips nebulosa* Kieffer. Monotypic.

nebulosa Kieffer. Ga., Fla., Mo., Ark., Tex. Ecology: Produce root galls on *Quercus stellata*.

Odontocynips nebulosa Kieffer, 1910. Lab. Zool. Gen. e Agr. Portici, Bol. 4: 112. ♀.

Genus HOLOCYNIPS Kieffer

Holocynips Kieffer, 1910. Lab. Zool. Gen. e Agr. Portici, Bol. 4: 114.

Type-species: *Holocynips emarginata* Kieffer. Monotypic.

badia (Bassett). Conn., N. Y., s. to Fla., w. to Ill., Mo., Ark., Tex. Ecology: Produce galls at bases of sprouts of *Quercus alba*, *Q. bicolor*, *Q. chapmani*, *Q. macrocarpa*, *Q. prinus*, *Q. stellata*.

Amphibolips badius Bassett, 1900. Amer. Ent. Soc., Trans. 26: 323. ♀.

Holocynips emarginata Kieffer, 1910. Lab. Zool. Gen. e Agr. Portici, Bol. 4: 114. ♀, gall.

Callirhytis coralloso Weld, 1921. U. S. Natl. Mus., Proc. 59: 191, 216. ♀, gall.

hartmani (Weld). Calif. Ecology: Produce root galls on *Quercus chrysolepis*.

Callirhytis hartmani Weld, 1921. U. S. Natl. Mus., Proc. 59: 191, 214. ♀, gall.

humicola (Kinsey). Oreg., Calif. Ecology: Produce root galls on *Quercus agrifolia*, *Q. kelloggi*, *Q. wislizenii*.

Andricus humicola Kinsey, 1922. Amer. Mus. Nat. Hist., Bul. 46: 283. ♀, gall.

maxima (Weld). N. Y., Md., D. C., Va., Ill. Ecology: Produce root galls on *Quercus alba*, *Q. bicolor*, *Q. macrocarpa*, *Q. prinus*.

Callirhytis maxima Weld, 1921. U. S. Natl. Mus., Proc. 59: 191, 217. ♀, gall.

Genus PLAGIOTROCHUS Mayr

Plagiotrochus Mayr, 1881. Zwanzig. Jahresber. Comm.-Oberrealsch. I. Bez. Wien., pp. 8, 12, 32.

Type-species: *Cynips ilicis* Fabricius. Desig. by Ashmead, 1903.

suberi Weld. Calif. Ecology: Produce stem galls on the introduced European cork oak, *Quercus suber*.

Plagiotrochus suberi Weld, 1926. U. S. Natl. Mus., Proc. 68 (10): 47. ♀, gall.

Genus DRYOCOSMUS Giraud

Dryocosmus Giraud, 1859. Zool.-Bot. Gesell. Wien., Verh. 9: 353.

Type-species: *Dryocosmus cerriphilus* Giraud. Monotypic.

Entropa Foerster, 1869. Zool.-Bot. Gesell. Wien, Verh. 19: 330, 334.

Type-species: *Entropa lissounota* Foerster. Monotypic.

albidus Weld. N. Y., Va., N. C., Ill. Ecology: Produce leaf galls on *Quercus coccinea*, *Q. velutina*.

Dryocosmus albidus Weld, 1944. U. S. Natl. Mus., Proc. 95: 15. ♀, gall.

asymmetricus (Kinsey). Calif. Ecology: Produce stem galls on *Quercus chrysolepis*.

Plagiotrichus(!) asymmetricus Kinsey, 1922. Ind. Univ. Studies 53: 106. ♀, gall.

asymmetricus var. *annectens* (Kinsey). Calif.

Plagiotrichus(!) asymmetricus var. *annectens* Kinsey, 1922. Ind. Univ. Studies 53: 107. ♀, gall.

asymmetricus var. *compactus* (Kinsey). Calif.

Plagiotrichus(!) asymmetricus var. *compactus* Kinsey, 1922. Ind. Univ. Studies 53: 108. ♀, gall.

attractans (Kinsey). Calif. Ecology: Produce bud galls on *Quercus wislizenii*.

Andricus attractans Kinsey, 1922. Amer. Mus. Nat. Hist., Bul. 46: 281. ♂, gall.

castanopsisidis (Beutenmueller). Oreg., Calif. Ecology: Produce staminate flower galls on *Castanopsis chrysophylla*, *C. sempervirens*.

Andricus castanopsisidis Beutenmueller, 1917. Canad. Ent. 49: 345. ♀, gall.

cinereae (Ashmead). N. Y., Pa., Va., S. C., Fla., Ill., Mo., Tex. Ecology: Produce leaf galls on *Quercus cinerea* and other red oaks.

Dryophanta cinereae Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 144. ♀, gall.

Andricus (Callirhytis) saccularius Bassett, 1890. Amer. Ent. Soc., Trans. 17: 76. ♂, gall.

coxii (Bassett). N. Mex., Ariz. Ecology: Produce stem galls on *Quercus emoryi*, *Q. hypoleuca*.

Cynips coxii Bassett, 1881. Canad. Ent. 13: 112. ♀, gall.

Andricus coxi Bassett, 1900. Amer. Ent. Soc., Trans. 26: 320. ♀, gall.

- Andricus Bassettianus* Dalla Torre and Kieffer, 1902. In Wytsman, Gen. Ins., fasc. 9, p. 61.
 N. name for *coxi* Bassett, 1900.
- coxii* var. *translatus* (Kinsey). Ariz. Ecology: Produce stem galls on *Quercus hypoleuca*.
Plagiotrichus(?) coxii var. *translatus* Kinsey, 1922. Ind. Univ. Studies 53: 125. ♀, gall.
- deciduus* (Beutenmueller). Md., Va., N. C., Tenn., Ill., Mo. Ecology: Produce leaf galls on *Quercus rubra*, *Q. velutina*.
Andricus deciduus Beutenmueller, 1913. Insector Inscitiae Menstruus 1: 131. ♀, gall.
- dubiosus* (Fullaway). Calif. Ecology: Produce leaf galls in agamic generation, ament galls in sexual generation, on *Quercus agrifolia*, *Q. wislizenii*.
Diplolepis dubiosa Fullaway, 1911. Ent. Soc. Amer., Ann. 4: 339. ♀, ♂, gall. Sexual gen.
Callirhytis bicornis McCracken and Egbert, 1922. Stanford Univ. Pubs., Univ. Ser., Biol. Sci. 3 (1): 42. ♀, gall. Agamic gen.
- Biology: Doutt, 1959. Ent. Soc. Amer., Ann. 52: 69-74.
- favus* Beutenmueller. Pa. s. to Fla., w. to Ill., Mo., Ark., Tex. Ecology: Produce root galls on red oaks.
Dryocosmus favus Beutenmueller, 1911. Ent. News 22: 197. ♀, gall.
- floridensis* (Beutenmueller). Va. s. to Fla., w. to Okla., Tex. Ecology: Produce stem galls on red oaks.
Dryophanta floridensis Beutenmueller, 1917. Canad. Ent. 49: 349. ♀, gall.
- Andricus peltatus* Wells and Metcalf, 1921. Canad. Ent. 53: 212. ♀, gall.
- gigas* (Kinsey). Calif. Ecology: Produce ament galls on *Quercus douglasii*.
Andricus gigas Kinsey, 1922. Amer. Mus. Nat. Hist., Bul. 46: 282. ♀, ♂, gall.
- imbricariae* (Ashmead). Conn., N. Y. to Fla., w. to Mo., Okla., Tex. Ecology: Produce stem galls on red oaks.
Andricus imbricariae (?) Ashmead, 1896. U. S. Natl. Mus., Proc. 19: 122. ♀, gall.
Holcaspis fasciata Bassett, 1900. Amer. Ent. Soc., Trans. 26: 328. ♀, gall.
- minusculus* Weld. Calif. Ecology: Produce leaf galls on *Quercus agrifolia*.
Dryocosmus minusculus Weld, 1952. U. S. Natl. Mus., Proc. 102: 337. ♀, gall.
- quercuslaurifoliae* (Ashmead). Fla. Ecology: Produce leaf galls on *Quercus laurifolia*, *Q. nigra*.
Spathegaster q. laurifoliae Ashmead, 1881. Amer. Ent. Soc., Trans. 9: Proc. p. xvii. ♀, ♂, gall.
- Cynips q. aquatica* Ashmead, 1881. Amer. Ent. Soc., Trans. 9: Proc. p. xvi. ♀, ♂, gall.
- Dryophanta laurifoliae* Ashmead, 1885. Amer. Ent. Soc., Trans. 12: 296.
- Dryophanta aquatica* Ashmead, 1885. Amer. Ent. Soc., Trans. 12: 296.
- quercusnotha* (Osten Sacken). Conn., N. Y., N. J., Md., Va., Fla., Ill. Ecology: Produce leaf galls on *Quercus palustris* and other red oaks.
Cynips q. notha Osten Sacken, 1870. Amer. Ent. Soc., Trans. 3: 55. ♀, ♂, gall.
- Andricus (Callirhytis) notha* Ashmead, 1885. Amer. Ent. Soc., Trans. 12: 295.
- Andricus (Callirhytis) pusulatoides* Bassett, 1890. Amer. Ent. Soc., Trans. 17: 74. ♀, gall.
- quercuspalustris* (Osten Sacken). Mass., Ont. to Fla., w. to Iowa, La. Ecology: Produce leaf galls on red oaks.
Cynips (Trigonaspis ?) quercus palustris Osten Sacken, 1861. Ent. Soc., Phila., Proc. 1: 62. ♀, ♂, gall.
- Andricus (Callirhytis) palustris* Ashmead, 1885. Amer. Ent. Soc., Trans. 12: 294.
- Dryophanta liberaecellulae* Gillette, 1890. Ent. Amer. 6: 24. ♀, ♂, gall.
- rileyi* (Ashmead). N. Y. to Fla., w. to Mo., Tex. Ecology: Produce leaf galls on red oaks.
Andricus rileyi Ashmead, 1896. U. S. Natl. Mus., Proc. 19: 121. ♀, gall.

Genus HETEROECUS Kinsey

- Heteroecus* Kinsey, 1922. Ind. Univ. Studies 53: 81.
 Type-species: *Andricus dasydastyli* Ashmead. Orig. desig.
- Revision: Kinsey, 1922. Ind. Univ. Studies 53: 81-100.
- chrysolepidis* (Ashmead). Calif. Ecology: Produce stem galls on *Quercus chrysolepis*.
Andricus chrysolepidis Ashmead, 1896. U. S. Natl. Mus., Proc. 19: 119. ♀, gall.

- dasydactyli** (Ashmead). Calif. Ecology: Produce stem galls in agamic generation and leaf galls in sexual generation on *Quercus chrysolepis*.
Andricus dasydactyli Ashmead, 1896. U. S. Natl. Mus., Proc. 19: 117. ♀, gall.
 Biology: Rosenthal and Koehler, 1971. Ent. Soc. Amer., Ann. 64: 565-570.
- dasydactyli** var. **pygmaeus** Kinsey. Calif.
Heteroecus dasydactyli var. *pygmaeus* Kinsey, 1922. Ind. Univ. Studies 53: 91. ♀, gall.
- eriophora** (Kieffer). Calif. Ecology: Produce twig galls on *Quercus* sp.
Callirhytis eriophora Kieffer, 1904. Soc. Hist. Nat. Metz., Bul. (2) 11: 132. ♀, gall.
- flavens** (McCracken and Egbert). Calif. Ecology: Produce leaf galls on *Quercus chrysolepis*, *Q. vaccinifolia*.
Callirhytis flavens McCracken and Egbert, 1922. Stanford Univ. Pubs., Univ. Ser., Biol. Sci. 3(1): 40. ♀, gall.
- malus** Kinsey. Calif. Ecology: Produce twig galls on *Quercus chrysolepis*.
Heteroecus malus Kinsey, 1922. Ind. Univ. Studies 53: 92. ♀, gall.
- melanoderma** Kinsey. Ariz., Calif. Ecology: Produce stem galls on *Quercus chrysolepis*, *Q. wilcoxii*. Date seed gall.
Heteroecus melanoderma Kinsey, 1922. Ind. Univ. Studies 53: 92. ♀, gall.
- pacificus** (Ashmead). Calif. Ecology: Produce stem galls in agamic generation and leaf galls in sexual generation on *Quercus chrysolepis*.
Andricus pacificus Ashmead, 1896. U. S. Natl. Mus., Proc. 19: 118. ♀, gall.
Callirhytis bakeri Kieffer, 1904. Soc. Hist. Nat. Metz., Bul. (2) 11: 132. ♀, gall.
- Biology: Lyon, 1963. Ent. Soc. Wash., Proc. 65: 250-254.
- pacificus** var. **gracilis** Kinsey. Calif.
Heteroecus pacificus var. *gracilis* Kinsey, 1922. Ind. Univ. Studies 53: 95. ♀, gall.
- pacificus** var. **subpacificus** Kinsey. Calif.
Heteroecus pacificus var. *subpacificus* Kinsey, 1922. Ind. Univ. Studies 53: 95. ♀, gall.
- sanctaclarae** (Fullaway). Calif. Ecology: Produce stem galls on *Quercus chrysolepis*.
Callirhytis sanctae-clarae Fullaway, 1911. Ent. Soc. Amer., Ann. 4: 363. ♀, gall.
- sanctaclarae** var. **aliud** Kinsey. Calif.
Heteroecus sanctae-clarae var. *aliud* Kinsey, 1922. Ind. Univ. Studies 53: 98. ♀, gall.
- sanctaclarae** var. **fuscior** Kinsey. Calif.
Heteroecus sanctae-clarae var. *fuscior* Kinsey, 1922. Ind. Univ. Studies 53: 98. ♀, gall.
- Genus CALLIRHYTIS Foerster**
- Callirhytis* Foerster, 1869. Zool.-Bot. Gesell. Wien, Verh. 19: 331, 335.
 Type-species: *Callirhytis hartigi* Foerster. Monotypic.
- apicalis** (Ashmead). Calif. Ecology: Produce root galls on *Quercus agrifolia*, *Q. kelloggii*, *Q. wislizenii*.
Andricus apicalis Ashmead, 1896. U. S. Natl. Mus., Proc. 19: 120. ♀, gall.
- attigua** Weld. Tex. Ecology: Produce leaf galls on *Quercus texana*.
Callirhytis attigua Weld, 1926. U. S. Natl. Mus., Proc. 68 (10): 88. ♀, gall.
- balanacea** Weld. N. Y., Va., Mo. Ecology: Produce acorn galls on *Quercus palustris*.
Callirhytis balanacea Weld, 1944. U. S. Natl. Mus., Proc. 95: 16. ♀, gall.
- balanaspis** Weld. D. C., Va., Mo., Ark., Tex. Ecology: Produce acorn galls on *Quercus marilandica*.
Callirhytis balanaspis Weld, 1922. U. S. Natl. Mus., Proc. 61 (19): 22. ♀, gall.
- balanella** Weld. Ariz. Ecology: Produce acorn galls on *Quercus emoryi*.
Callirhytis balanella Weld, 1957. U. S. Natl. Mus., Proc. 107: 117. ♀, gall.
- balanooides** Weld. N. Y., Va., Ill., Mo., Tex. Ecology: Produce acorn galls on *Quercus velutina*.
Callirhytis balanooides Weld, 1922. U. S. Natl. Mus., Proc. 61 (19): 27. ♀, gall.
- balanopsis** Weld. Va., Ga., Ala., Miss., Mo., Ark., Tex. Ecology: Produce acorn galls on *Quercus marilandica*.
Callirhytis balanopsis Weld, 1922. U. S. Natl. Mus., Proc. 61 (19): 26. ♀, gall.

- balanosa** Weld. Ill. Ecology: Produce acorn galls on *Quercus coccinea*.
Callirhytis balanosa Weld, 1922. U. S. Natl. Mus., Proc. 61 (19): 19. ♀, gall.
- bipapillata** Weld. N. Y., Va. Ecology: Produce leaf galls on *Quercus ilicifolia*.
Callirhytis bipapillata Weld, 1944. U. S. Natl. Mus., Proc. 95: 17. ♀, ♂, gall.
- blastophaga** (Ashmead). Fla. Ecology: Produce ament galls on *Quercus cinerea*.
Andricus blastophagus Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 143. ♀, gall.
- carmelensis** Weld. Calif. Ecology: Produce acorn galls on *Quercus agrifolia*, *Q. kelloggii*, *Q. wislizenii*.
Callirhytis carmelensis Weld, 1922. U. S. Natl. Mus., Proc. 61 (19): 20. ♀, gall.
- cistella** Weld. Ariz. Ecology: Produce acorn galls on *Quercus emoryi*, *Q. hypoleuca*.
Callirhytis cistella Weld, 1952. U. S. Natl. Mus., Proc. 102: 338. ♀, gall.
- clarkei** (Bassett). Mass., N. J., Va. Ecology: Produce ament galls on *Quercus ilicifolia*.
Andricus (Callirhytis) clarkei Bassett, 1890. Amer. Ent. Soc., Trans. 17: 79. ♀, gall.
- clavula** (Osten Sacken). Mass., N. Y., Pa., N. J., D. C., N. C., Ill., Iowa. Ecology: Produce stem galls on *Quercus alba*.
Cynips clavula Osten Sacken, 1865. Ent. Soc. Phila., Proc. 4: 351. ♀, gall.
- congregata** (Ashmead). Calif. Ecology: Produce ament galls on *Quercus agrifolia*, *Q. wislizenii*.
Andricus congregatus Ashmead, 1896. U. S. Natl. Mus., Proc. 19: 120. ♀, gall.
- cornigera** (Osten Sacken). Mass. to Ga., w. to Iowa. Ecology: Produce stem galls on *Quercus palustris* and other red oaks.
Cynips cornigera Osten Sacken, 1865. Ent. Soc. Phila., Proc. 4: 358. ♀, gall.
- corrugis** (Bassett). Conn., Va. Ecology: Produce acorn galls on *Quercus velutina*.
Cynips corrugis Bassett, 1881. Canad. Ent. 13: 109. ♀.
Callirhytis defecta Kieffer, 1910. Lab. Zool. Gen. e Agr. Portici, Bol. 4: 116. ♀.
- Taxonomy: Weld, 1952. U. S. Natl. Mus., Proc. 102: 338 (gall).
- cressoni** (Beutenmueller). Tex. Ecology: Produce bud galls on *Quercus stellata*.
Dryophanta cressoni Beutenmueller, 1913. Amer. Ent. Soc., Trans. 39: 247. ♀, gall.
- crypta** (Ashmead). Ga., Fla., Ala., Miss., Tex. Ecology: Produce stem galls on *Quercus cinerea*, *Q. marilandica*.
Andricus cryptus Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 145. ♀, gall.
- cryptica** Weld. Fla., Ala. Ecology: Produce bud galls on *Quercus myrtifolia*.
Callirhytis cryptica Weld, 1922. U. S. Natl. Mus., Proc. 61 (18): 19. ♀, gall.
- difficilis** (Ashmead). Ga. w. to Mo., Ark., Tex. Ecology: Produce stem galls on *Quercus myrtifolia*, *Q. nigra*, *Q. phellos*.
Andricus difficilis Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 143. ♀, gall.
- electrea** Weld. Md., D. C., Va. Ecology: Produce acorn galls on *Quercus prinus*.
Callirhytis electrea Weld, 1944. U. S. Natl. Mus., Proc. 95: 18. ♀, gall.
- ellipsoidea** Weld. Ill. Ecology: Produce root galls on *Quercus bicolor*.
Callirhytis ellipsoidea Weld, 1921. U. S. Natl. Mus., Proc. 59: 227. ♀, gall.
- elliptica** Weld. Pa., D. C., Va., Ill. Ecology: Produce root galls on *Quercus alba*.
Callirhytis elliptica Weld, 1921. U. S. Natl. Mus., Proc. 59: 228. ♀, gall.
- elongata** (Kinsey). Tex. Ecology: Produce stem galls on *Quercus brevirostra*.
Plagiotrichus(!) elongatus Kinsey, 1922. Ind. Univ. Studies 53: 125. ♀, gall.
- elongata** var. **rufopleurae** (Kinsey). Tex. Ecology: Produce stem galls on *Quercus brevirostra*.
Plagiotrichus(!) elongatus var. *rufopleurae* Kinsey, 1922. Ind. Univ. Studies 53: 128. ♀, gall.
- elongata** var. **stellatae** (Kinsey). Tex. Ecology: Produce stem galls on *Quercus stellata*.
Plagiotrichus(!) elongatus var. *stellatae* Kinsey, 1922. Ind. Univ. Studies 53: 128. ♀, gall.
- excavata** (Ashmead). New England, N. C. Ecology: Produce stem galls on *Quercus rubra*.
Andricus excavatus Ashmead, 1896. U. S. Natl. Mus., Proc. 19: 121. ♀, gall.
- exigua** (Bassett). Conn., D. C., Va. Ecology: Produce ament galls on *Quercus stellata*.
Andricus exiguus Bassett, 1900. Amer. Ent. Soc., Trans. 26: 318. ♀, ♂, gall.

- favosa* (Bassett). N. Y., Pa., Md., Va., Ohio. Ecology: Produce leaf galls on *Quercus palustris*, *Q. velutina*.
Neuroterus favosus Bassett, 1890. Amer. Ent. Soc., Trans. 17: 87. ♀, ♂, gall.
- flavipes* (Gillette). Ill., Minn., Iowa. Ecology: Produce leaf galls on *Quercus macrocarpa*.
Neuroterus flavipes Gillette, 1889. Iowa Agr. Expt. Sta., Bul. 7: 281. ♀, ♂, gall.
- flora* Weld, Calif. Ecology: Produce leaf galls on *Quercus agrifolia*, *Q. wislizeni*.
Callirhytis flora Weld, 1922. U. S. Natl. Mus., Proc. 61 (18): 20. ♀, gall.
- florensis* Weld, Va. Ecology: Produce ament galls on *Quercus marilandica*.
Callirhytis florensis Weld, 1944. U. S. Natl. Mus., Proc. 95: 19. ♀, ♂, gall.
- floridana* (Ashmead). Md., D. C., Va., N. C., Fla., Mo., Ark., La. Ecology: Produce stem galls on *Quercus chapmanii*, *Q. stellata*.
Andricus floridanus Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 137. ♀, ♂, gall.
- floripara* Weld, Calif. Ecology: Produce ament galls on *Quercus agrifolia*.
Callirhytis floripara Weld, 1957. U. S. Natl. Mus., Proc. 107: 118. ♀, ♂, gall.
- frequens* (Gillette). Colo., N. Mex., Ariz. Ecology: Produce stem galls on *Quercus gambelii*, *Q. havardii*, *Q. undulata*.
Andricus frequens Gillette, 1892. Ent. News 3: 247. ♀, gall.
- frequens* var. *piceoderma* (Kinsey). Colo.
Plagiotrichus(!) frequens var. *piceoderma* Kinsey, 1922. Ind. Univ. Studies 53: 131. ♀.
- fructicola* Ashmead. Pa., Va., S. C., Tenn. Ecology: Produce acorn galls on *Quercus ilicifolia*, *Q. marilandica*, *Q. velutina*.
Callirhytis fructicola Ashmead, 1896. U. S. Natl. Mus., Proc. 19: 131. ♀, gall.
- fructuosa* Weld, N. Y., Md., Va., N. C., S. C., Ga., Ala., Ill., Mo., Tex. Ecology: Produce acorn galls on red oaks.
Callirhytis fructuosa Weld, 1922. U. S. Natl. Mus., Proc. 61: (19): 14. ♀, gall.
- fulva* Weld, Calif. Ecology: Produce root galls on *Quercus chrysolepis*.
Callirhytis fulva Weld, 1921. U. S. Natl. Mus., Proc. 59: 226. ♀, gall.
- furva* Weld, Va., Mo. Ecology: Produce leaf galls on *Quercus nigra*, *Q. palustris*.
Callirhytis furva Weld, 1952. U. S. Natl. Mus., Proc. 102: 341. ♀, gall.
- gallaestriatae* Weld, N. Y., Va., N. C., Ill. Ecology: Produce bud galls on *Quercus coccinea*, *Q. palustris*, *Q. rubra*, *Q. velutina*.
Callirhytis gallaestriatae Weld, 1926. U. S. Natl. Mus., Proc. 68 (10): 92. ♀, gall.
- gemmiformis* (Beutenmueller). N. Y., N. J., Md., Va., Ill. Ecology: Produce bud galls on *Quercus alba*.
Andricus gemmiformis Beutenmueller, 1917. Canad. Ent. 49: 346. ♀, gall.
- glandulus* (Beutenmueller). N. J. Ecology: Produce acorn galls on *Quercus prinoides*.
Andricus glandulus Beutenmueller, 1913. Brooklyn Ent. Soc., Bul. 8: 103. ♀.
- glomerosa* Weld, Va. Ecology: Produce bud galls on *Quercus coccinea*.
Callirhytis glomerosa Weld, 1957. U. S. Natl. Mus., Proc. 107: 119. ♀, gall.
- hopkinsi* Weld, D. C., Va., W. Va. Ecology: Produce acorn galls on *Quercus imbricaria*.
Callirhytis hopkinsi Weld, 1952. U. S. Natl. Mus., Proc. 102: 339. ♀, gall.
- infuscata* (Ashmead). Ga., Fla. Ecology: Produce leaf galls on *Quercus catesbeiae* and other red oaks on the coastal plains.
Andricus infuscatus Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 144. ♀, gall.
- intersita* Weld, Va. Ecology: Females collected ovipositing in internodes of twigs of *Quercus alba*.
Callirhytis intersita Weld, 1957. U. S. Natl. Mus., Proc. 107: 119. ♀.
- juvenile* Weld, N. Mex., Ariz. Ecology: Produce leaf galls on *Quercus arizonica*, *Q. gambelii*, *Q. oblongifolia*, *Q. reticulata*, *Q. subturbanella*.
Callirhytis juvenile Weld, 1944. U. S. Natl. Mus., Proc. 95: 20. ♀, gall.
- lanata* (Gillette). Mass. s. to N. C., Ala., w. to Minn., Ark., Tex. Ecology: Produce leaf galls on *Quercus coccinea*, *Q. rubra*.
Dryophanta lanata Gillette, 1891. Ill. State Lab. Nat. Hist., Bul. 3: 198. ♀, gall.
- lapillula* Weld, D. C., Ill. Ecology: Produce acorn galls on *Quercus bicolor*.
Callirhytis lapillula Weld, 1922. U. S. Natl. Mus., Proc. 61 (19): 18. ♀, gall.

lupana Weld. Ariz. Ecology: Produce leaf galls on *Quercus emoryi*, *Q. hypoleuca*.

Callirhytis lupana Weld, 1944. U. S. Natl. Mus., Proc. 95: 21. ♀, ♂, gall.

marginata Weld. Ill. Ecology: Produce root galls on *Quercus coccinea*.

Callirhytis marginata Weld, 1921. U. S. Natl. Mus., Proc. 59: 225. ♀, gall.

medularis Weld. Pa., Va., Ohio. Ecology: Produce stem galls on *Quercus coccinea*, *Q. velutina*.

Callirhytis medularis Weld, 1957. U. S. Natl. Mus., Proc. 107: 121. ♀, ♂, gall.

middletoni Weld. D. C., Fla., Ala. Ecology: Produce acorn galls on *Quercus phellos*.

Callirhytis middletoni Weld, 1922. U. S. Natl. Mus., Proc. 61 (19): 25. ♀, gall.

milleri Weld. Calif. Ecology: Produce acorn galls on *Quercus agrifolia*, *Q. kelloggii*, *Q. wislizenii*.

Callirhytis milleri Weld, 1922. U. S. Natl. Mus., Proc. 61 (19): 11. ♀, gall.

Callirhytis essigi McCracken and Egbert, 1922. Stanford Univ., Pubs., Univ. Ser., Biol. Sci. 3 (1): 43. ♀, gall.

morrisoni (Ashmead). Ariz. Ecology: Produce leaf galls on *Quercus* sp.

Andricus morrisoni Ashmead, 1896. U. S. Natl. Mus., Proc. 19: 116. ♀, ♂, gall.

myrtifoliae (Beutenmueller). Fla. Ecology: Produce ament galls on *Quercus myrtifolia*.

Andricus myrtifoliae Beutenmueller, 1917. Canad. Ent. 49: 346. ♀, ♂, gall.

oblata Weld. Va. Ecology: Produce bud galls on *Quercus coccinea*, *Q. falcata*.

Callirhytis oblata Weld, 1952. U. S. Natl. Mus., Proc. 102: 340. ♀, gall.

obtusilobae (Bassett). Conn. Ecology: Produce leaf galls on *Quercus stellata*.

Andricus obtusilobae Bassett, 1900. Amer. Ent. Soc., Trans. 26: 316. ♀.

ovata Weld. Fla., Ark., Tex. Ecology: Produce root galls on *Quercus catesbeiae*, *Q. cinerea*, *Q. myrtifolia*, *Q. texana*.

Callirhytis ovata Weld, 1921. U. S. Natl. Mus., Proc. 59: 222. ♀, gall.

ovata var. **melanica** (Kinsey). Tex. Ecology: Produce root galls on *Quercus schneckei*.

Andricus ovata var. *melanicus* Kinsey, 1922. Ind. Univ. Studies 53: 32. ♀, gall.

parva Weld. Va., W. Va., Mo. Ecology: Produce ament galls on *Quercus imbricaria*.

Callirhytis parva Weld, 1922. U. S. Natl. Mus., Proc. 61 (18): 23. ♀, ♂, gall.

parvifoliae Ashmead. Fla. Ecology: Produce leaf galls on *Quercus chapmani*.

Callirhytis parvifoliae Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 138. ♀, gall.

parvula (Bassett). Conn. Ecology: Taken ovipositing in buds of *Quercus ilicifolia*; never reared and gall unknown.

Dryophanta parvula Bassett, 1900. Amer. Ent. Soc., Trans. 26: 326. ♀.

patiens (Bassett). Conn. Ecology: Taken ovipositing in buds of *Quercus ilicifolia*; never reared and gall unknown. This may be a synonym of *parvula*.

Andricus patiens Bassett, 1900. Amer. Ent. Soc., Trans. 26: 312. ♀.

pedunculata (Bassett). Conn., N. Y., Va., Ill. Ecology: Produce leaf galls on *Quercus coccinea*, *Q. rubra*.

Dryophanta pedunculata Bassett, 1890. Amer. Ent. Soc., Trans. 17: 72. ♀, ♂, gall.

perdens (Kinsey). Oreg., Calif. Ecology: Produce stem galls on *Quercus agrifolia*, *Q. kelloggii*, *Q. wislizenii*.

Andricus perdens Kinsey, 1922. Amer. Mus. Nat. Hist., Bul. 46: 286. ♀, gall.

perdens var. **destructor** (Kinsey). Calif.

Plagiotrichus(?) perdens var. *destructor* Kinsey, 1922. Ind. Univ. Studies 53: 134. ♀, gall.

perditor (Bassett). Conn., N. Y., N. J., Va. Ecology: Produce acorn galls on *Quercus ilicifolia*; galls secrete honeydew.

Andricus perditor Bassett, 1900. Amer. Ent. Soc., Trans. 26: 313. ♀, gall.

perfoveata (Kinsey). Calif. Ecology: Produce leaf galls on *Quercus agrifolia*, *Q. kelloggii*, *Q. wislizenii*.

Andricus perfoveatus Kinsey, 1922. Amer. Mus. Nat. Hist., Bul. 46: 287. ♀, gall.

perobscura Weld. Va. Ecology: Observed ovipositing in buds of *Quercus velutina*; gall unknown.

Callirhytis perobscura Weld, 1957. U. S. Natl. Mus., Proc. 107: 122. ♀.

perplexa (Ashmead). Mo. Ecology: Produce woolly leaf galls on *Quercus* sp.

Andricus perplexus Ashmead, 1896. U. S. Natl. Mus., Proc. 19: 122. ♀, gall.

perrugosa Weld. N. J., Pa., Md., D. C., Va. Ecology: Taken ovipositing in terminal buds on sprouts of *Quercus alba*; probably form root galls.

Callirhytis perrugosa Weld, 1944. U. S. Natl. Mus., Proc. 95: 22. ♀.

petrina Weld. Ariz. Ecology: Produce acorn galls on *Quercus hypoleuca*.

Callirhytis petrina Weld, 1922. U. S. Natl. Mus., Proc. 61 (19): 13. ♀, gall.

petrosa Weld. Ga., Fla., Tex. Ecology: Produce acorn galls on *Quercus cinerea*.

Callirhytis petrosa Weld, 1922. U. S. Natl. Mus., Proc. 61 (19): 15. ♀, gall.

pirgra (Bassett). Conn. s. to Fla., w. to Ill., Mo. Ecology: Produce leaf galls on *Quercus coccinea*, *Q. velutina*.

Cynips pigrina Bassett, 1881. Canad. Ent. 13: 105. ♀, gall.

Callirhytis cellae Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 141. ♀, gall.

pipteroidea (Bassett). Maine to N. C., w. to Ill. Ecology: Produce leaf galls on *Quercus rubra* and other red oaks.

Andricus pipterooides Bassett, 1900. Amer. Ent. Soc., Trans. 26: 314. ♀, gall.

pulchra (Bassett). Mass., N. Y., Va., Ill. Ecology: Produce ament galls on *Quercus rubra*, *Q. velutina*.

Andricus (Callirhytis) pulchra Bassett, 1890. Amer. Ent. Soc., Trans. 17: 73. ♀, ♂, gall.

querufoliae (Ashmead). Fla. Ecology: Produce leaf galls on *Quercus catesbeiae*.

Andricus querufoliae Ashmead, 1885. Amer. Ent. Soc., Trans. 12: 299. ♂, gall.

queruscagrifoliae (Bassett). Calif. Ecology: Produce leaf galls in agamic generation and leaf axil galls in sexual generation on *Quercus agrifolia*, *Q. kelloggii*, *Q. wislizenii*.

Cynips q. agrifoliae Bassett, 1881. Canad. Ent. 13: 53. ♀, gall.

Andricus (Callirhytis) agrifoliae Ashmead, 1885. Amer. Ent. Soc., Trans. 12: 294.

Andricus wislizeni(?) Ashmead, 1896. U. S. Natl. Mus., Proc. 19: 119. ♀, gall.

Callirhytis clarimontis Kieffer, 1904. Soc. Hist. Nat. Metz, Bul. (2) 11: 132. ♀, gall.

Biology: Lyon, 1964. Ent. Soc. Wash., Proc. 66: 193.

queruscusatatooides (Ashmead). S. C., Ga., Fla., Ala., Miss., La. Ecology: Produce stem galls on *Quercus virginiana*.

Cynips (Dryocosmus?!) queruscusatatooides Ashmead, 1881. Amer. Ent. Soc., Trans. 9: Proc. p. xi. ♀, gall.

Cynips batatoides Packard, 1881. U. S. Ent. Comm., Bul. 7: 57.

Andricus (Andricus) batatoides Ashmead, 1885. Amer. Ent. Soc., Trans. 12: 296.

queruscusclavigera (Ashmead). Fla. Ecology: Produce stem galls on *Quercus laurifolia*.

Cynips q. clavigera Ashmead, 1881. Amer. Ent. Soc., Trans. 9: Proc. p. xxvii. ♀, gall.

Andricus (Andricus) clavigerus Ashmead, 1885. Amer. Ent. Soc., Trans. 12: 295.

queruscusconfusa (Ashmead). Fla. Ecology: Produce leaf galls on *Quercus laurifolia*.

Cynips q. confusa Ashmead, 1881. Amer. Ent. Soc., Trans. 9: Proc. p. xviii. ♀, gall.

Neuroterus confusa Ashmead, 1885. Amer. Ent. Soc., Trans. 12: 296.

queruscusfutilis (Osten Sacken). Mass. s. to Va., w. to Wis., Ark., Okla. Ecology: Produce root galls in agamic generation, leaf galls in sexual generation, on *Quercus alba*, *Q. prinus*.

Cynips queruscusfutilis Osten Sacken, 1861. Ent. Soc., Phila., Proc. 1: 63. ♂, gall.

Cynips queruscus papillata Osten Sacken, 1861. Ent. Soc. Phila., Proc. 1: 64. ♂, gall.

Cynips (Andricus) futilis Osten Sacken, 1865. Ent. Soc. Phila., Proc. 4: 346, 349, 352.

Cynips papillata Osten Sacken, 1865. Ent. Soc. Phila., Proc. 4: 346, 352.

Callirhytis radicicola Bassett, 1889. Psyche 5: 237. ♀. Preoec. by Fabricius, 1798.

Andricus radicicola Dalla Torre, 1893. Cat. Hym., v. 2, p. 95. N. name.

queruscusgemmaria (Ashmead). Mass., N. J., Va., Ga., Fla., Ind., Ill., Tex. Ecology: Produce stem galls on *Quercus cinerea* and other red oaks.

Cynips q. gemmaria Ashmead, 1885. Amer. Ent. Soc., Trans. 12: Proc. p. ix. ♀, gall.

Andricus (Andricus) gemmarius Ashmead, 1885. Amer. Ent. Soc., Trans. 12: 295.

queruscusmedullae (Ashmead). Fla. Ecology: Produce stem galls on *Quercus cinerea*.

Cynips q. medullae Ashmead, 1885. Amer. Ent. Soc., Trans. 12: Proc. p. viii. ♀, gall.

Andricus (Andricus) medullae Ashmead, 1885. Amer. Ent. Soc., Trans. 12: 295.

queruscusmodesta (Osten Sacken). Conn., N. Y., D. C., Va., Ind., Okla., Tex. Ecology: Produce leaf galls on *Quercus rubra*, *Q. velutina*.

Cynips queruscusmodesta Osten Sacken, 1861. Ent. Soc. Phila., Proc. 1: 65. ♀, gall.

Cynips modesta Osten Sacken, 1865. Ent. Soc. Phila., Proc. 4: 346, 349, 357, 379.

Cynips papula Bassett, 1881. Canad. Ent. 13: 107. ♀, gall.

quercusnigrae (Osten Sacken). D. C., Va., N. C., Mo., Ark. Ecology: Produce leaf galls on *Quercus marilandica*.

Cynips quercus nigrae Osten Sacken, 1861. Ent. Soc. Phila., Proc. 1: 66. ♀, ♂, gall.

Andricus (Callirhytis) nigrae Ashmead, 1885. Amer. Ent. Soc., Trans. 12: 294.

quercusoperator (Osten Sacken). Nova Scotia s. to N. C., w. to Iowa, Mo., Ark. Tex. Ecology: Produce acorn galls in agamic generation, ament galls in sexual generation, on *Quercus marilandica* and other red oaks.

Cynips quercus operator Osten Sacken, 1862. Ent. Soc. Phila., Proc. 1: 256. ♀, ♂, gall.
Sexual gen.

Cynips operator Osten Sacken, 1865. Ent. Soc. Phila., Proc. 4: 357.

Andricus operatorola Bassett, 1900. Amer. Ent. Soc., Trans. 26: 315. ♀. Agamic gen.

Andricus operator var. *consobrinus* Kinsey, 1922. Ind. Univ. Studies 53: 26. ♀, ♂, gall.

quercusoperator var. *austrior* (Kinsey). Tex. Ecology: Produce ament galls on *Quercus schneckii*.

Andricus operator var. *austrior* Kinsey, 1922. Ind. Univ. Studies 53: 26. ♀, ♂, gall.

quercusoperator var. *falsa* (Kinsey). R. I. Ecology: Produce ament galls on *Quercus ilicifolia*.
Andricus operator var. *falsus* Kinsey, 1922. Ind. Univ. Studies 53: 27. ♀, ♂, gall.

quercusoperator var. *illistrans* (Kinsey). N. H. Ecology: Produce ament galls on *Quercus ilicifolia*.

Andricus operator var. *illistrans* Kinsey, 1922. Ind. Univ. Studies 53: 28. ♀, ♂, gall.

quercusphephilos (Osten Sacken). Md., D. C., Va. Ecology: Produce stem galls on *Quercus phellos*.

Cynips quercus phellos Osten Sacken, 1861. Ent. Soc. Phila., Proc. 1: 70. ♀, gall.

Amphibolips phellos Ashmead, 1885. Amer. Ent. Soc., Trans. 12: 294.

quercuspomiformis (Bassett). Calif. Ecology: Produce stem galls in agamic generation, leaf galls in sexual generation, on *Quercus agrifolia*, *Q. wislizenii*.

Cynips q. pomiformis Bassett, 1881. Canad. Ent. 13: 74. ♀, gall. Agamic gen.

Andricus (Andricus) pomiformis Ashmead, 1885. Amer. Ent. Soc., Trans. 12: 295.

Callirhytis rossi Kieffer, 1903. Marecellia 2: 84. ♀, gall.

Callirhytis maculipennis Kieffer, 1904. Soc. Hist. Nat. Metz, Bul. (2) 11: 131. ♀, gall.

Andricus yosemite Beutenmueller, 1911. Canad. Ent. 43: 211. ♀, gall.

Biology: Lyon, 1959. So. Calif. Acad., Sci. Bul. 58 (1): 33-37 (sexual gen. on leaves).

quercuspomiformis var. *descansonis* (Kinsey). Calif.

Andricus pomiformis var. *descansonis* Kinsey, 1922. Ind. Univ. Studies 53: 41. ♀, gall.

quercuspomiformis var. *distincta* (Kinsey). Calif.

Andricus pomiformis var. *distincta* Kinsey, 1922. Ind. Univ. Studies 53: 38. ♀, gall.

quercuspomiformis var. *provincialis* (Kinsey). Calif.

Andricus pomiformis var. *provincialis* Kinsey, 1922. Ind. Univ. Studies 53: 40. ♀, gall.

quercuspunctata (Bassett). Maine, Ont. to N. C., w. to Ill. Ecology: Produce stem galls on

Quercus coccinea, *Q. palustris*, *Q. velutina*. Gouty gall.

Cynips q. punctata Bassett, 1863. Ent. Soc. Phila., Proc. 2: 323. ♀, gall.

Cynips q. podagrae Walsh, 1864. Ent. Soc. Phila., Proc. 2: 491. ♀, gall.

Cynips punctata Osten Sacken, 1865. Ent. Soc. Phila., Proc. 4: 358.

Cynips podagrae Osten Sacken, 1865. Ent. Soc. Phila., Proc. 4: 358.

quercusrugosa (Ashmead). N. Y., Md., Va., Fla., Ill. Ecology: Produce leaf galls on *Quercus imbricaria*, *Q. laurifolia*, *Q. phellos*.

Cynips q. rugosa Ashmead, 1881. Amer. Ent. Soc., Trans. 9: Proc. p. xviii. ♀, ♂, gall.

Andricus (Andricus) rugosus Ashmead, 1885. Amer. Ent. Soc., Trans. 12: 295.

quercuscitula (Bassett). Mass., Conn., N. Y., N. J., Va., Ind., Ill. Ecology: Produce stem galls on *Quercus coccinea*, *Q. velutina*.

Cynips q. scitula Bassett, 1864. Ent. Soc. Phila., Proc. 3: 683. ♀, ♂, gall.

Cynips scitula Osten Sacken, 1865. Ent. Soc. Phila., Proc. 4: 341, 358.

- quercussimilis** (Bassett). Mass., Conn., N. Y., Md., Ga., Fla., Tex. Ecology: Produce stem galls on *Quercus ilicifolia* and other red oaks.
Cynips q. similis Bassett, 1864. Ent. Soc. Phila., Proc. 3: 685. ♀, ♂, gall.
Cynips similis Osten Sacken, 1865. Ent. Soc. Phila., Proc. 4: 356.
- quercusuttonii** (Bassett). Calif. Ecology: Produce stem galls in agamic generation, leaf galls in sexual generation, on *Quercus agrifolia*, *Q. kelloggii*, *Q. wislizenii*.
Cynips Q. Suttonii Bassett, 1881. Canad. Ent. 13: 54. ♀, gall.
Andricus (Callirhytis) Suttoni Ashmead, 1885. Amer. Ent. Soc., Trans. 12: 294.
Callirhytis polythyra Kieffer, 1904. Soc. Hist. Nat. Metz, Bul. (2) 11: 132. ♀, gall.
- Biology: Lyon, 1969. Ent. Soc. Wash., Proc. 71: 61-65.
- quercusuttonii** var. **lustrior** (Kinsey). Calif. Ecology: Produce stem galls on *Quercus wislizenii*.
Plagiotrichus(!) suttonii var. *lustrior* Kinsey, 1922. Ind. Univ. Studies 53: 137. ♀, gall.
- quercesturnerii** (Ashmead). Fla. Ecology: Produce ament galls on *Quercus nigra*.
Cynips q. Turnerii Ashmead, 1881. Amer. Ent. Soc., Trans. 9: Proc. p. xvi. ♀, gall.
Andricus (Andricus) Turnerii Ashmead, 1885. Amer. Ent. Soc., Trans. 12: 295.
Andricus toparius Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 136. ♀, gall.
- quercusventricosa** (Bassett). Mass., Conn., to Ala., w. to Ill. Ecology: Produce stem galls on *Quercus ilicifolia*, *Q. imbricaria*, *Q. phellos*.
Cynips q. ventricosus Bassett, 1864. Ent. Soc. Phila., Proc. 3: 681. ♀, gall.
Cynips ventricosus Osten Sacken, 1865. Ent. Soc. Phila., Proc. 4: 358.
Cynips q. conifera Ashmead, 1881. Amer. Ent. Soc., Trans. 9: Proc. p. xxvii. ♀, gall.
Neuroterus coniferus Ashmead, 1885. Amer. Ent. Soc., Trans. 12: 296.
- rubida** Weld. Pa., Md., Ind., Ill. Ecology: Produce root galls on *Quercus coccinea*, *Q. rubra*.
Callirhytis rubida Weld, 1921. U. S. Natl. Mus., Proc. 59: 224. ♀, gall.
- rugulosa** (Beutenmueller). N. J., D. C., Va., Ind., Ill. Ecology: Produce bud galls on *Quercus rubra*, *Q. velutina*.
Andricus rugulosus Beutenmueller, 1911. Canad. Ent. 43: 211. ♀, gall.
- seminator** (Harris). Que. to Fla., w. to Minn., Iowa. Ecology: Produce large wooly, globular stem galls on *Quercus alba*. Wool sower; oak seed gall.
Cynips seminator Harris, 1841. Rpt. Ins. Mass. Injurious to Veg., p. 399. ♀, gall.
- seminalis** (Bassett). N. Y., Va., Ohio. Ecology: Produce stem galls on *Quercus coccinea*, *Q. palustris*.
Andricus (Callirhytis) seminalis Bassett, 1890. Amer. Ent. Soc., Trans. 17: 76. ♀, gall.
- serricornis** (Kinsey). Calif. Ecology: Produce ament galls in sexual generation, leaf galls in agamic generation, on *Quercus agrifolia*, *Q. wislizenii*.
Andricus serricornis Kinsey, 1922. Amer. Mus. Nat. Hist., Bul. 46: 288. ♀, ♂, gall. Sexual gen.
Dryocosmus grumatus Weld, 1952. U. S. Natl. Mus., Proc. 102: 336. ♀, gall. Agamic gen.
- Taxonomy: Lyon, 1970. Ent. Soc. Wash., Proc. 72: 176-178.
- tuberosa** (Bassett). Mass., Conn., N. J. Ecology: Produce stem galls on *Quercus ilicifolia*.
Andricus (Callirhytis) tuberosa Bassett, 1900. Amer. Ent. Soc., Trans. 26: 311. ♀, ♂, gall.
- tubicola** (Osten Sacken). D. C., Va., Miss., Okla., Tex. Ecology: Produce leaf galls on *Quercus rubra*, *Q. velutina*.
Cynips tubicola Osten Sacken, 1861. Ent. Soc. Phila., Proc. 1: 60. ♀, gall.
Andricus texanus Beutenmueller, 1909. Ent. News 20: 248. ♀, gall.
- tumifica** (Osten Sacken). N. Y., Va., N. C., Ill., Iowa. Ecology: Produce leaf galls on *Quercus rubra*, *Q. velutina*.
Cynips tumifica Osten Sacken, 1865. Ent. Soc. Phila., Proc. 4: 356. ♀, ♂, gall.
- uvellae** Weld. Calif. Ecology: Produce bud galls on *Quercus agrifolia*, *Q. kelloggii*, *Q. wislizenii*.
Callirhytis uvellae Weld, 1944. U. S. Natl. Mus., Proc. 95: 23. ♀, gall.
- vaccinii** (Ashmead). N. Y., Ga., Fla., Mo., Okla., Tex. Ecology: Produce leaf galls on *Quercus stellata*.
Acraspis vaccinii Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 136. gall.

Andricus lustrans Beutenmueller, 1913. Amer. Ent. Soc., Trans. 39: 244. ♀.

Andricus impositus Beutenmueller, 1918. Ent. News 29: 329. ♀, gall.

Andricus dimorphus var. *verifactor* Kinsey, 1922. Ind. Univ. Studies 53: 15. ♀, gall.

UNPLACED SPECIES IN SUPERFAMILY CYNIPOIDEA

The manuscript names included in this list have all appeared at least once in some publication other than the original one.

Andricus acinosus Bassett, 1881. In Mayr, Zwanzig. Jahresber. Comm.-Oberrealsch. I. Bez. Wien., p. 28. MS.

Hexaplasta unnae Ashmead, 1897. In Slosson, Ent. News 8: 237. MS.

Cynips! aspera Stebbins, 1910. Springfield Mus. Nat. Hist., Bul. 2: 26. gall.

Neuroterus atomus Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 203. MS.

Kleidotoma bakeri Ashmead, 1900. In Howard, Wash. Acad. Sci., Proc. 2: 557. MS.

Oxylabis bifoceolata Brues, 1904. Canad. Ent. 36: 119. ♂. Transf. from Diapriidae.

Taxonomy: Weld, 1967. In Krombein and Burks, U. S. Dept. Agr., Agr. Monog. Sup. 2, p. 284.

Cynips! cadiacus Walsh, 1890. In Packard, U. S. Ent. Comm., Rpt. 5: 115. gall.

Andricus concinnus Bassett, 1882. Amer. Nat. 16: 246. MS.

Cynips! constricta Stebbins, 1910. Springfield Mus. Nat. Hist., Bul. 2: 20. gall.

Cynips (Neuroterus) crassitellus Provancher, 1881. Nat. Canad. 12: 233. ♀. Unique type in Provancher Collection in Quebec in bad condition.

Cynips! cristata Stebbins, 1910. Springfield Mus. Nat. Hist., Bul. 2: 24. gall.

Callirhytis! flocculenta Trotter, 1910. Lab. Zool. Gen. e Agr. Portici, Bol. 5: 115. gall.

Rhodites fusiformans Cockerell, 1890. Entomologist 23: 75. gall.

Cynips (Andriens) gibbosus Provancher, 1881. Nat. Canad. 12: 232. ♀, ♂. Type in Provancher Collection in Quebec, but only thorax remains.

Rhodites globosus Cockerell, 1890. Entomologist 23: 75. gall.

Solenaspis hyalinus Ashmead, 1895. U. S. Dept. Agr., Insect Life 7: 326. Host: *Mesograpta polita* (Say) puparium. MS.

Neuroterus laurifoliae Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 140. ♀. Type lost.

Cynips maculatus Blanchard, 1840. In Laporte, Hist. Nat. Anim. Articules, v. 3, p. 250. "Carolina."

Eucoila minor Provancher, 1888. Addit. Corr. Faune Ent. Canada Hym., p. 398. ♀. Type probably lost; not located in Quebec or Ottawa collections.

Rhodites bicolor var. *minor* Trotter, 1910. Lab. Zool. Gen. e Agr. Portici, Bol. 5: 103. gall.

Aegilips monticola Ashmead, 1902. In Slosson, Ent. News 13: 320, 17: 323. MS.

Periclistidea monticola Ashmead, 1902. In Slosson, Ent. News 13: 5. Both generic and specific names MS.

Eumayria multiarticulata Ashmead, 1887. Amer. Ent. Soc., Trans. 14: 133. gall.

Kleidotoma nigrosum Ashmead, 1906. In Nason, Ent. News 17: 9. ♀. MS.

Cynips! obovata Stebbins, 1910. Springfield Mus. Nat. Hist., Bul. 2: 24. gall.

Neuroterus! perpusillus Trotter, 1910. Lab. Zool. Gen. e Agr. Portici, Bol. 5: 107. gall.

Figitis pini Harris, 1833. Geol. Mass., Rpt., p. 587. MS.

Diplolepis potentillae Harris, 1833. Geol. Mass., Rpt. p. 587. MS.

Andricus pseudocallidoma Trotter, 1910. Lab. Zool. Gen. e Agr. Portici, Bol. 5: 105. gall.

Cynips quercusfloccicola Riley, 1890. In Packard, U. S. Ent. Comm., Rpt. 5: 115. gall.

Cynips quercusfrondosa Bassett, 1864. Ent. Soc. Phila., Proc. 3: 688. gall.

Cynips quercusmellaria Riley, 1880. Amer. Ent. 3: 298. gall.

Cynips! sera Stebbins, 1910. Springfield Mus. Nat. Hist., Bul. 2: 24. gall.

Rhodites silvestrii Trotter, 1910. Lab. Zool. Gen. e Agr. Portici, Bol. 5: 103. gall.

Superfamily EVANIOIDEA

By ROBERT W. CARLSON

This superfamily includes three families, Evaniidae, Aulacidae, and Gasteruptiidae. There appears to be little evidence to indicate that the Aulacidae and Gasteruptiidae are actually related to the Evaniidae. There does appear to be some evidence to indicate that the Aulacidae and Gasteruptiidae are distantly related. Because there is no evidence to suggest that a common ancestor of Aulacidae and Gasteruptiidae would have been less closely related to ancestral Evaniidae than to the ancestor of any other group, there is little reason for not maintaining placement of the Aulacidae and Gasteruptiidae in the Evanioidea.

Revision: Kieffer, 1912. Das Tierreich, v. 30, XIX and 431 p. (spp. of world).

Taxonomy: Crosskey, 1951. Roy. Ent. Soc. London, Trans. 102: 282-301. —Muesebeck and Walkley, 1956. U. S. Natl. Mus., Proc. 105: 319-419 (type-species).

Morphology: Crosskey, 1951. Roy. Ent. Soc. London, Trans. 102: 247-281.

Family EVANIIDAE

Members of this family are parasitic within the egg cases of cockroaches. Known hosts of the evaniids found in North America are members of the cockroach families Blattidae and Blatellidae. Species of Evaniidae are most numerous in the tropics.

Revision: Bradley, 1908. Amer. Ent. Soc., Trans. 34: 128-162. —Townes, 1949. U. S. Natl. Mus., Proc. 99: 525-539.

Taxonomy: Hedicke, 1939. Hym. Cat., pt. 9, 50 p. (world catalog).

Genus EVANIA Fabricius

Evania Fabricius, 1775. Systema Ent., p. 345.

Type-species: *Ichneumon appendigaster* Linnaeus. Desig. by Curtis, 1829.

According to Townes (1958) *Evania* is comprised of larger species which occur mostly in the Oriental Region.

Taxonomy: Townes, 1958. Ins. of Micronesia, v. 19, no. 2, p. 84.

appendigaster (Linnaeus). Southeastern Mass., s.e. N. Y., s.e. Pa., D. C., Ga., Fla., Tenn., La., Tex., s. N. Mex., s. Ariz.; West Indies and Mexico s. to n. Argentina; Old World (especially warmer parts). Adventive. Host: *Blatta orientalis* L.?, *Periplaneta americana* (L.). I have found no published rearing records for North America, but because *appendigaster* has been reared from *P. americana* in other parts of the world there is no reason to doubt that it serves as a host in North America. I am not aware of

records of *appendigaster* as a parasite of *B. orientalis* which have been confirmed by authoritative identification of the adult parasites. Therefore, I do not feel certain that such records do not in fact apply to *Prosevania fuscipes* (Illiger). North of a latitude of approximately 37 degrees in the eastern United States *appendigaster* apparently ranges inland only rather short distances from the Atlantic coast. Some of the names cited in the synonymy below will possibly prove to be synonyms of *Prosevania fuscipes*, but Westwood's (1844) description of a specimen in "the Linnaean cabinet" (presumably the *appendigaster* type) seems to indicate that the name *appendigaster* correctly applies to the present species.

Ichneumon appendigaster Linnaeus, 1758. Syst. Nat., ed. 10, p. 566. Sex not indicated.

Ichneumon niger Goeze, 1780. In Degeer, Des ... Degeer Abhandl. zur Gesch. des Insecten, v. 3, p. 285. Sex not indicated?

Evania laevigata Olivier, 1791. Encycl. Meth., Dict. Ins., v. 6, p. 453. ♀.

Evania unicolor Say, 1824. In Keating, Narr. Long's 2nd Exped., v. 2 (App.), p. 320. Sex not indicated.

Evania Cubae Guerin-Meneville, 1834. Iconogr. Regne Anim., pl. 65, figs. 1-2. ♂. For date of publication see Cowan (1971, p. 28-29).

Evania Desjardinsii Blanchard, 1840. Hist. Nat. Anim. Artic., Ins., v. 3, p. 299. ♂.

Evania affinis Le Guillou, 1841. Soc. Ent. de France, Ann. 10: 311. ♂. *

Evania appendigastra Hedqvist, 1973. Ent. Tidskr. 94: 178. Emend.

Taxonomy: Westwood, 1844 (1843). Ent. Soc. London, Trans. 3: 241-242. —Cowan, 1971. Soc. Bibliog. Nat. Hist., Jour. 6: 18-29 (dating of *E. cubae*).

Biology: Cameron, 1957. Bul. Ent. Res. 48: 199-209. —Roth and Willis, 1960. Smithsonian Misc. Coll. 141: 236.

Genus PROSEVANIA Kieffer

Evania subg. *Prosevania* Kieffer, 1911. Soc. Ent. de France, Ann. 80: 157.

Type-species: *Prosevania afra* Kieffer. Desig. by Viereck, 1914. Described as a subgenus, but in the case of *afra* treated nomenclaturally as a genus.

This is a large genus of the Old World Tropics.

fuscipes (Illiger), n. comb. Northwestern Mass. w. to s. Ohio, s. to n.e. N. C. and Ga.; s.e.

Europe, n.w. Asia, n. Africa. Adventive. Host: *Blatta orientalis* L., *Periplaneta americana* (L.). The name *punctata* (Brulle) has erroneously been treated as the senior name for this species for many years (since 1919 in North America). The names *Evania fuscipes* Illiger (1807) and *E. flavigornis* Curtis (1829) were proposed for *E. appendigaster* Linnaeus as misidentified by Panzer (1799), Latreille (1805), and Jurine (1807). There is little reason to doubt that the species identified as *appendigaster* by any of these three authors is the present species, but Panzer's figure in particular leaves no doubt whatsoever and is, therefore, here selected as lectotype for both the names *E. fuscipes* Illiger and *E. flavigornis* Curtis.

Evania fuscipes Illiger, 1807. In Rossi, Fauna Etrusca, ed. 2, v. 2, p. 83. [male].

Evania flavigornis Curtis, 1829. Brit. Ent., v. 6, pl. 257. [male].

Evania punctata Brulle, 1833. Exped. Sci. de Moree, v. 3, p. 378. sex not indicated. N. syn. *Evania urbane* Bradley, 1908. Amer. Ent. Soc., Trans. 34: 140. ♂, ♀. N. syn.

Taxonomy: Panzer, 1799. Faunae Ins. German., fasc. 62, pl. 12. —Latreille, 1805. Hist. Nat. Crust. Ins., v. 13, p. 193. —Jurine, 1807. Nouv. Meth. Class. Hym. Dipt., v. 1, p. 85 and pl. 7, fig. 6. —Bequaert, 1919. Brooklyn Ent. Soc., Bul. 14: 23.

Biology: Edmunds, 1952; 1953. Ohio Jour. Sci. 52: 29-30; 53: 121-122. —Edmunds, 1954. Ent. Soc. Amer., Ann. 47: 575-592.

Genus EVANIELLA Bradley

Evaniella Bradley, 1905. Canad. Ent. 37: 64.

Type-species: *Evania unicolor* Say as misidentified by Ashmead (1901). Orig. desig. According to Bradley (1908), *Evaniella semaeoda* Bradley is the species which Ashmead identified as *unicolor*.

This is a large genus of Australian, Nearctic, and Neotropic distribution (particularly the latter).

Taxonomy: Ashmead, 1901. Canad. Ent. 33: 304. — Bradley, 1908. Amer. Ent. Soc., Trans. 34: 142-147.

californica (Ashmead). East-central Calif.

Evania Californica Ashmead, 1901. Canad. Ent. 33: 304. ♂.

Taxonomy: Snelling, 1963. Pan-Pacific Ent. 39: 108 (female described).

neomexicana (Ashmead). Southeastern N. Mex., s.e. Calif.

Evania Neomexicana Ashmead, 1901. Canad. Ent. 33: 304. ♂.

semaeoda Bradley. R. I. w. to s. Mich. and n.e. Kans., s. to s. Fla. and s. La.; West Indies.

Evaniella semaeoda Bradley, 1908. Amer. Ent. Soc., Trans. 34: 144. ♂, ♀.

Genus HYPTIA Illiger

Hyptia Illiger, 1807. In Rossi, Fauna Etrusca, ed. 2, v. 2, p. 82. Appeared as "Hyptiam" in accusative case, *Hyptia* being the nominative equivalent. Fauna Etrusa, ed. 2, v. 2 not necessarily published prior to volume six of Mag. f. Insectenkunde, but usually treated as prior in synonymies pertaining to various other generic names.

Hyptia Illiger, 1807. Mag. f. Insektenkunde 6: 192.

Type-species: *Evania petiolata* Fabricius. Monotypic.

This is a large genus of the New World, with many more Neotropic species than Nearctic ones. Rearing data are few, but the species appear to be parasites of forest dwelling Blattoidea such as *Parcoblatta* spp.

femorata Townes. Western Tex.

Hyptia femorata Townes, 1949. U. S. Natl. Mus., Proc. 99: 537. ♂, ♀.

floridana Ashmead. Western N. C. w. to n. La., s. to s. Fla.; Guatemala, Panama.

Hyptia Floridana Ashmead, 1901. Canad. Ent. 33: 303. ♂.

harpyoides Bradley. N. H. w. to s.e. Minn., s. to n.w. S. C., n. Miss., and n. Kans. Host:

Parcoblatta uhleriana (Sauss.), *P. virginica* (Brunn.). This species occurs farther north than any other evaniid in North America.

Hyptia harpyoides Bradley, 1908. Amer. Ent. Soc., Trans. 34: 151. ♂, ♀.

Hyptia brevipalcar var. *glabriceps* Kieffer, 1910. Soc. Ent. de France, Ann. 79: 72. ♂.

oblonga Townes. Southwestern Ga., s. Ala., and s.e. Ariz. s. to s. Fla.; s. Mex., Costa Rica.

Hyptia oblonga Townes, 1949. U. S. Natl. Mus., Proc. 99: 538. ♂, ♀.

reticulata (Say). Mass. w. to mid Mich., s. to s. Fla., s. La., and s.w. Tex.; s. Mexico.

Brachygaster reticulata Say, 1836. Boston Jour. Nat. Hist. 1: 223. sex not indicated.

Hyptia nyctoides Bradley, 1908. Amer. Ent. Soc., Trans. 34: 159. ♂.

Hyptia prosetetheta Bradley, 1908. Amer. Ent. Soc., Trans. 34: 160. ♂.

thoracica (Blanchard). Mass., s. Ont., Wis., and n.e. Kans. s. to s. Fla. and s. Tex. Host:

Parcoblatta sp., *P. pensylvanica* (Deg.).

Evania thoracica Blanchard, 1840. Hist. Nat. Anim. Artic., Ins., v. 3, p. 299. Sex not indicated.

Hyptium thoracicum Shuckard, 1841. Entomologist 1: 120. ♂. Preocc. by Blanchard, 1840.

Evania dorsalis Westwood, 1851. Ent. Soc. London, Trans. (2) 1: 214. Unnecessary n. name for *E. thoracica* Blanchard, there being no *E. thoracica* Klug or Leach.

Evania brevipalcar Kieffer, 1904. Arkiv for Zool. 1: 541. ♂.

Hyptia mylacidowanae Bradley, 1908. Amer. Ent. Soc., Trans. 34: 153. ♀.

Hyptia hyptiogastris Bradley, 1908. Amer. Ent. Soc., Trans. 34: 160. ♂.

Hyptia texana Bradley, 1908. Amer. Ent. Soc., Trans. 34: 161. ♀.

Family AULACIDAE

The approximately 150 species of this small family are distributed throughout the world. All are thought to be parasites of wood boring Coleoptera or Hymenoptera.

Revision: Bradley, 1902 (1901). Amer. Ent. Soc., Trans. 27: 319-330 (date according to Ent. News 13: 94). — Townes, 1950. U. S. Natl. Mus., Proc. 100: 87-120.

Taxonomy: Hedicke, 1939. Hym. Cat., pt. 10, 28 p. (world catalog). —Townes, 1950. U. S. Natl. Mus., Proc. 100: 85-86 (phyletetic position). —Crosskey, 1951. Roy. Ent. Soc. London, Trans. 102: 249. —Crosskey, 1953. Ann. and Mag. Nat. Hist. (12) 6: 758-759.

Biology: Crosskey, 1951. Roy. Ent. Soc. London, Trans. 102: 285.

Morphology: Short, 1959. Ent. Monthly Mag. 95: 217-219 (final-instar larva).

Genus PRISTAULACUS Kieffer

Aulacostethus Philippi, 1873. Stettin. Ent. Ztg. 34: 302. Preocc. by Waterhouse, 1869 and Uhler, 1871.

Type-species: *Aulacostethus rubriventer* Philippi. Monotypic.

Pristaulacus Kieffer, 1900 (1899). Soc. Ent. de France, Ann. 68: 813.

Type-species: *Pristaulacus chlapowskii* Kieffer. Desig. by Kieffer, 1903.

Deraiodontus Bradley, 1901. Ent. Student 2: 29.

Type-species: *Aulacus montanus* Cresson. Included and desig. by Bradley, 1902. *Oleisopristes* Bradley, 1902 (1901). Amer. Ent. Soc., Trans. 27: 324.

Type-species: *Aulacus firmus* Cresson. Orig. desig.

Anaulacus Semenov, 1903. Rev. Russse d'Ent. 3: 173. Preocc. by MacLeay, 1825.

Type-species: *Aulacus sibiricola* Semenov. Monotypic.

Semenoviella Kieffer, 1903. In Andre, Spec. Hym. Eur. Alg., v. 7 (2nd), p. 382, 720. N. name for *Anaulacus* Semenov; preocc. by Weise, 1889.

Odontaulacus Kieffer, 1903. In Andre, Spec. Hym. Eur. Alg. 7 (2nd), p. 382.

Type-species: *Aulacus rufitarsis* Cresson. Desig. by Bradley, 1908.

Interaulacus Bradley, 1908. Amer. Ent. Soc., Trans. 34: 123.

Type-species: *Interaulacus kiefferi* Bradley. Monotypic and orig. desig.

Semenoviellus Bradley, 1908. Amer. Ent. Soc., Trans. 34: 123. N. name for *Anaulacus* Semenov and *Semenowia* Kieffer.

Tropaulacus Bradley, 1908. Amer. Ent. Soc., Trans. 34: 120, 125.

Type-species: *Tropaulacus torridus* Bradley. Monotypic and orig. desig.

Pristaulacus subg. *Neaulacus* Bradley, 1908. Amer. Ent. Soc., Trans. 34: 126.

Type-species: *Aulacus occidentalis* Cresson. Orig. desig.

Disaulacinus Kieffer, 1910. Soc. Ent. de France, Bul. 15: 350.

Type-species: *Disaulacinus flavimanus* Kieffer. By subsequent monotypy from inclusion by Kieffer, 1911.

Tetraulacinus Kieffer, 1910. Soc. Ent. de France, Bul. 15: 350.

Type-species: *Pristaulacus rufobalteatus* Cameron. By subsequent monotypy from inclusion by Kieffer, 1911.

Psilauleucus Kieffer, 1910. Soc. Ent. de France, Bul. 15: 350.

Type-species: *Psilauleucus annulatus* Kieffer. By subsequent monotypy from inclusion by Kieffer, 1911.

Members of this large genus presumably occur throughout the forested regions of the world.

arizonicus (Townes). Southeastern Ariz.

Aulacostethus arizonicus Townes, 1950. U. S. Natl. Mus., Proc. 100: 98. ♀.

bilobatus (Provancher). N. S. s. to w. N. C., w. to Wis. Ecology: Often associated with *Tsuga*.

Host: *Melanophila fulvoguttata* (Harris).

Aulacus bilobatus Provancher, 1878. Nat. Canad. 10: 237. ♂.

californicus (Townes). Northern Calif. Host: *Paratimia conicola* Fisher.

Aulacostethus californicus Townes, 1950. U. S. Natl. Mus., Proc. 100: 101. ♂, ♀.

canadensis (Townes). Maine, s. Man.

Aulacostethus canadensis Townes, 1950. U. S. Natl. Mus., Proc. 100: 102. ♂, ♀.

editus (Cresson). Northern Mich., s. B. C., Wash., n. Calif. Host: *Chrysophana placida* (LeC.), *Paratimia conicola* Fisher.

Aulacus editus Cresson, 1880. Amer. Ent. Soc., Trans. 8: v in Proc. ♀.

fasciatus (Say). Pa., D. C., Ohio, Mich., Ind., Mo., Ark. Ecology: One specimen in the U. S. Natl. Museum collection emerged from *Carya* wood.

Aulacus fasciatus Say, 1829. Contrib. Maclurian Lyceum to Arts and Sci. 1: 67. ♀.

- flavicerurus** (Bradley). Vt. w. to n. Mich., s. to n.w. S. C. and Ill.
Deraiodontus flavicerurus Bradley, 1902 (1901). Amer. Ent. Soc., Trans. 27: 322. ♀.
Pristaulacus flavipes Kieffer, 1904. Arkiv for Zool. 1: 559. ♂.
- foxleei** (Townes). Western Mont., n. Idaho, s. B. C., Wash., Oreg., n. Calif. Host: *Leptura oblitterata* Hald.
Aulacostethus foxleei Townes, 1950. U. S. Natl. Mus., Proc. 100: 107. ♂, ♀.
- melleus** (Cresson). Nev., w. Wash., Oreg., n. Calif.
Aulacus melleus Cresson, 1879. Amer. Ent. Soc., Trans. 7: 255. ♀.
Aulacus consors Cresson, 1879. Amer. Ent. Soc., Trans. 7: 255. ♂.
Pristaulacus ferrugineus Kieffer, 1904. Soc. d'Hist. Nat. de Metz, Bul. (2) 11: 29. ♀.
- minor** (Cresson). Northwestern Wyo., n. Utah, n.w. Mont., n. Idaho, s. B. C., Wash., Oreg., n. Calif. Host: *Semanotus ligneus* (F.), *Melanophila drummondi* (Kby.), *M. intrusa* Horn.
Aulacus minor Cresson, 1880. Amer. Ent. Soc., Trans. 8: vi in Proc.
- montanus** (Cresson). Southern B. C. s. to Nev. and s. Calif. Host: *Xylotrechus nauticus* (Mann.), *Chrysobothris* sp.
Aulacus montanus Cresson, 1879. Amer. Ent. Soc., Trans. 7: 256. ♀.
Deraiodontus fuscatus Bradley, 1902 (1901). Amer. Ent. Soc., Trans. 27: 321. ♀.
Pristaulacus (Oleisopristes) dentatus Bradley, 1908. Amer. Ent. Soc., Trans. 34: 126. ♂.
- niger** (Shuckard), revised status. N. S. w. to Man. and Colo., s. to s. Fla. and Tex. Ecology:
 Occurs on dead pine trees.
Aulacus niger Shuckard, 1841 (June). Entomologist 1: 124. Sex not indicated.
Aulacus ater Westwood, 1841 (Sept.). Ann. Nat. Hist. 7: 538. ♀.
Aulacus Abbottii Westwood, 1841 (Sept.). Ann. Nat. Hist. 7: 538. ♀.
Pristaulacus [Pristaulacus] hopkinsii Bradley, 1908. Amer. Ent. Soc., Trans. 34: 127. ♀.
 The variant spelling *hopkinsi* also appeared on p. 127 (key).
Pristaulacus aterrimus Kieffer, 1911. Soc. Ent. de France, Ann. 80: 230. Unnecessary n. name for *Aulacus ater* Westwood, the latter not being preocc. by *A. ater* Guerin-Meneville, 1844.
Pristaulacus floridana Rohwer, 1913. U. S. Natl. Mus., Proc. 45: 534. ♀.
- Taxonomy: Westwood, 1843. Ent. Soc. London, Trans. 3: 265-266. —Townes, 1950. U. S. Natl. Mus., Proc. 100: 95-96.
- occidentalis lavatus** (Townes). Northern Idaho, s. B. C., w. Wash., Oreg., n. Calif.
Aulacostethus occidentalis lavatus Townes, 1950. U. S. Natl. Mus., Proc. 100: 106. ♂, ♀.
- occidentalis occidentalis** (Cresson). Colo., N. Mex., n.w. Wyo., n. Idaho, n. Utah.
Aulacus occidentalis Cresson, 1879. Amer. Ent. Soc., Trans. 7: 255. ♀.
- oregonus** (Townes). Western Oreg.
Aulacostethus oregonus Townes, 1950. U. S. Natl. Mus., Proc. 100: 96. ♂, ♀.
- pacificus** (Cresson). Colo., n. Idaho, s. B. C., Wash., w. Oreg.
Aulacus pacificus Cresson, 1879. Amer. Ent. Soc., Trans. 7: 256. ♀.
- resutorivorus** (Westwood). Que. w. to s. B. C., s. to n. Va., Colo., and n. Calif. Host: *Arhopalus productus* (LeC.)?
Aulacus Resutorivorus Westwood, 1851. Ent. Soc. London, Trans. (2) 1: 224. ♀.
Aulacus firmus Cresson, 1879. Amer. Ent. Soc., Trans. 7: 256. ♀.
Aulacus subfirmus Bradley, 1901. Ent. Student 2: 31. [female]. Published as *A. subfirmus* "Viereck," but validated in key written by Bradley.
Oleisopristes subfirmus Viereck, 1902 (1901). In Bradley, Amer. Ent. Soc., Trans. 27: 325. ♀. Preocc. in *Pristaulacus* by Bradley, 1901.
- rufitarsis** (Cresson). Que. w. to Alaska, s. to w. N. C., Minn., N. Mex., and n. Calif. Host:
Graphisurus sp., *Saperda calcarata* Say, *Chrysobothris caurina* Horn, *Melanophila drummondi* (Kby.), *M. fulvoguttata* (Harris).
Aulacus rufitarsis Cresson, 1864. Ent. Soc. Phila., Proc. 3: 134. ♀.
Aulacus abdominalis Cresson, 1880. Amer. Ent. Soc., Trans. 8: v in Proc. ♀.
Aulacus erythrogaster Kieffer, 1904. Arkiv for Zool. 1: 561. ♂, ♀.
Odontauleucus spinosipes Kieffer, 1910. Soc. Ent. de France, Ann. 79: 79. ♀.
- stigmaterus** (Cresson). Que. s. to n. Ga., w. to Mich. and Mo.
Aulacus stigmaterus Cresson, 1864. Ent. Soc. Phila., Proc. 3: 134. ♀.

- Pristaulacus punctaticeps* Kieffer, 1910. Soc. Ent. de France, Ann. 79: 78. ♀.
strangaliae Rohwer. N. S. s. to n. Va., w. to s. Man.
Pristaulacus strangaliae Rohwer, 1917. U. S. Natl. Mus., Proc. 53: 157. ♀.
Pristaulacus (Oleisopristes) tanghanic Bradley, 1926. Brooklyn Ent. Soc., Bul. 21: 173. ♀.
Pristaulacus (Oleisopristes) glabrescens Bradley, 1926. Brooklyn Ent. Soc., Bul. 21: 174. ♀.
torridus (Bradley). Southern Tex.
Tropaulacus torridus Bradley, 1908. Amer. Ent. Soc., Trans. 34: 125. ♀.
violaceus (Bradley). D. C., Va., s. Ohio.
Deraiodontus violaceus Bradley, 1905. Ztschr. System. Hym. Dipt. 5: 26. ♂, ♀.

Genus AULACUS Jurine

- Aulacus* Jurine, 1801. In Panzer, Litteratur-Ztg. Erlangen, Intelligenzbl. 1: 163. Nomen nudum.
Aulacus Jurine, 1807. Nouv. Method. Class. Hym. Dipt., v. 1, p. 89.
 Type-species: *Aulacus striatus* Jurine. Monotypic.
Aulacus subg. *Aulacinus* Westwood, 1869 (1868). Ent. Soc. London, Trans. 16: 331.
 Type-species: *Aulacus (Aulacinus) moerens* Westwood. Monotypic.
Pammegischia Provancher, 1882. Nat. Canad. 13: 302.
 Type-species: *Pammegischia burquei* Provancher. Monotypic.
Parafoenus Kieffer, 1910. Soc. Ent. de France, Bul. 15: 350.
 Type-species: *Parafoenus formosus* Kieffer. By subsequent monotypy from inclusion by Kieffer, 1911.
Neuraulacinus Kieffer, 1910. Soc. Ent. de France, Bul. 15: 350.
 Type-species: *Neuraulacinus braconiformis* Kieffer. Desig. by Kieffer, 1912 from three species included by Kieffer, 1911.
Micraulacinus Kieffer, 1910. Soc. Ent. de France, Bul. 15: 350.
 Type-species: *Micraulacinus elegans* Kieffer. By subsequent monotypy from inclusion by Kieffer, 1911.
Pycnaulacus Cushman, 1919. U. S. Natl. Mus., Proc. 76 (25): 17.
 Type-species: *Pycnaulacus brevicaudus* Cushman. Monotypic and orig. desig.

Members of this moderate-sized genus presumably occur throughout the forested regions of the world.

aneurus Walkley. Southern N. Mex. Host: *Dendroctonus* sp.? *D. adjunctus* Bland.? Muesebeck (1958) cited *Dendroctonus* sp. as a host without query, but none of the specimens in the U. S. Natl. Museum collection are known to have been reared from *Dendroctonus*; notes in the Hopkins file indicate that some of them emerged from trees infested with *D. adjunctus*, and that all were associated with *Dendroctonus*. Because *aneurus* does not seem to be too large to be a parasite of *D. adjunctus*, it seems possible that rearings will confirm *D. adjunctus* as a host.

Aulacus aneurus Walkley, 1952. Ent. Soc. Wash., Proc. 54: 185. ♂, ♀.

Biology: Muesebeck, 1958. In Krombein et al., U. S. Dept. Agr., Agr. Monog. 2, Sup. 1, p. 88. *brevicaudus* (Cushman). Southwestern Oreg. s. to n.w. and e.-central Calif. Ecology: Specimens have been reared from *Alnus rhombifolia* and twigs of *Salix* bearing *Euura* galls.

Pycnaulacus brevicaudus Cushman, 1930 (1929). U. S. Natl. Mus., Proc. 76 (25): 18. ♀.

burquei (Provancher). N. S. s. to Md., w. to Mich. Host: *Xiphydria maculata* Say.

Pammegischia Burquei Provancher, 1882. Nat. Canad. 13: 303. ♀.

digitalis Townes. Mass., Conn., Pa., n. W. Va., n. Ohio. Host: *Xiphydria maculata* Say.

Aulacus digitalis Townes, 1950. U. S. Natl. Mus., Proc. 100: 118. ♂, ♀.

dispilus Townes. Southern Tex. Ecology: One specimen is reported to have emerged from *Celtis laevigata*.

Aulacus dispilus Townes, 1950. U. S. Natl. Mus., Proc. 100: 114. ♀.

lorei (Ashmead). Que., Vt., Mass., N. Y., N. J., Pa., Md. Host: *Xiphydria abdominalis* Say, *X. champlaini* Roh., *X. tibialis* Say.

Pammegischia Lovei Ashmead, 1901. Canad. Ent. 33: 301. ♀.

Pammegischia ouelletii Bradley, 1902 (1901). Amer. Ent. Soc., Trans. 27: 329. ♂.

pallipes Cresson. N. B. w. to s. B. C., s. to n. Va., Mo., n. Idaho, and n.e. Wash.? Host: *Xiphydria mellipes* Harris. In the U. S. Natl. Museum collection there are two females from Metaline Falls, Wash. (a locality cited for *pallipes* in Townes' [1950] revision of the Aulacidae) which are less melanistic than other *pallipes* specimens in the collection. They bear Hopkins no. 21306, the card for which indicates that they were collected while ovipositing in *Pseudotsuga menziesii* infested by *Buprestis* sp. *P. menziesii* is not known to be a host for any Xiphydriidae.

Aulacus pallipes Cresson, 1879. Amer. Ent. Soc., Trans. 7: xvii in Proc. δ.

Pammegischia minnesotae Bradley, 1908. Amer. Ent. Soc., Trans. 34: 122. δ.

Family GASTERUPTIIDAE

This small family is nearly worldwide in distribution (unknown from Micronesia and Polynesia). Crosskey (1962) recognized two subfamilies, the Hyptogastrinae with five genera and the Gasteruptiinae with one genus. Because Gasteruptiion includes the vast majority of Gasteruptiidae, there is little practical value in recognizing two subfamilies at this time.

The accounts of the biologies of Gasteruptiidae given by Hoeppner (1904) and Malyshev (1968) indicate that the larvae are predators or predator-inquiline in the nests of solitary bees and sphecids which nest in wood. According to Hoeppner, the egg of *Gasteruption assectator* (Linnaeus) is laid on a mature larva of the prey. After consuming the latter, the *assettator* larva invades the cell of a second prey larva and consumes it also. The species discussed by Malyshev deposited their eggs in proximity to an egg of a solitary bee, the exact positioning of eggs varying among species of gasteruptiids. Upon eclosion from the egg the gasteruptiid larva consumed the egg of the bee. Sometimes the larva would then complete its development by feeding upon the provisions in the same bee larval cell but often invaded one or more other cells where they consumed both bee larvae and provisions.

Revision: Townes, 1950. U. S. Natl. Mus., Proc. 100: 120-145.

Taxonomy: Hedicke, 1939. Hym. Cat., pt. 11, 54 p. (world catalog). —Crosskey, 1962. Roy. Ent. Soc. London, Trans. 114: 377-402 (genera of world).

Morphology: Crosskey, 1951. Roy. Ent. Soc. London, Trans. 102: 247-281. —Short, 1952. Roy. Ent. Soc. London, Trans. 103: 45-48, 49 (final-instar larva).

Genus GASTERUPTION Latreille

Gasteruption Latreille, 1796. Precis Caract. Gen. Ins., p. 113.

Type-species: *Ichneumon assectator* Linnaeus. Desig. by Viereck, 1914 from 83 species included by Schletterer, 1885. The discussion by Crosskey (1962, p. 396-397) is based upon the erroneous assumption that species are included in a genus described without included species by virtue of suppression of its name in the synonymy of a genus having species.

Foenus Fabricius, 1798. Sup. Ent. System., p. 210, 240.

Type-species: *Ichneumon assectator* Linnaeus. Desig. by Curtis, 1832. I do not accept Latreille, 1810 as designator of any type-species.

Gastrypium Agassiz, 1846. Nomencl. Zool., Index Univ., p. 160. Emend.

Gasteryption Semenov, 1892. Acad. Imp. des Sci. St. Petersburg, Bul. (n. s.) 3: 12. Emend. Schletterer (1890) suggested this spelling but used *Gasteruption*.

Superfamily PELECINOIDEA

By CARL F. W. MUESEBECK

Taxonomy: Handlirsch, 1933. Handbuch der Zoologie, v. 4 (2), Insecta 2, pp. 981-982.

Family PELECINIDAE

The relationships of this family have not been satisfactorily established. More commonly, although with some reservations, the group has been treated as a family of the Proctotrupoidea. Until its affinities are better understood it seems best to follow Handlirsch (1933) and consider it as representing an independent superfamily.

Taxonomy: Ashmead, 1900. U. S. Natl. Mus., Proc. 23: 3. —Ashmead, 1902. N. Y. Ent. Soc. Jour. 10: 242-243. —Schulz, 1903. Bayer. Akad. der Wiss., Math.-Phys. Kl. Sitzber. 33: 435-440.

Biology: Clausen, 1962. Entomophagous Insects, pp. 270-271 (This author suggests that although the Pelecinidae have been recorded as internal parasites of ground-inhabiting scarabaeid larvae the principal hosts may actually be coleopterous larvae living in decaying wood.).

Genus PELECINUS Latreille

Pelecinus Latreille, 1800. Bul. Sci. Soc. Philom., Paris, 2(44): 155.

Type-species: *Ichneumon polycerator* Fabricius. Desig. by Latreille, 1810. *Epicuastes* Gistel, 1848. Naturgesch. Thierr. f. hoh. Schul., p. X, col. 1. N. name, unnecessarily proposed for *Pelecinus* Latreille, thought to be preocc. by *Pelecinus* Moench in Botany.

This genus, which comprises the family Pelecinidae, appears to be represented in North America by a single variable species that ranges from Canada far down into South America. It is quite possible that a critical study of the rather large accumulations of specimens contained in some of the principal insect collections will prove this supposed taxon to be actually a complex of several distinct species. Descriptions, in fact, have been published under a number of different specific names. At present, however, these are all treated as applicable to a single species.

Taxonomy: Latreille, 1825. Encycl. Meth., Ins., v. 10, pp. 29-30. —Klug, 1841. Ztschr. f. Ent. 3: 379-385. —Westwood, 1843. Ent. Soc. London, Trans. 3: 247-251. —Schletterer, 1889. Berlin. Ent. Ztschr. 33: 226-237. —Brues, 1928. Psyche 35: 205-209.

Superfamily PROCTOTRUPOIDEA

By CARL F. W. MUESEBECK

This is a large and diverse group of parasitic Hymenoptera, but the North American proctotrupoid fauna has had little critical study with the result that apparently most of our species remain undescribed. The only comprehensive treatments of the North American Proctotrupoidea are that by Ashmead, in 1893, and that included by Kieffer in his monograph of the world fauna, which comprises three volumes that were published between 1914 and 1926. Kieffer used the name Serphoidea, based on *Serphus* Schrank, 1780, for this superfamily and that usage was followed generally in the literature of the next thirty years; but *Serphus* Schrank was set aside by the International Commission on Zoological Nomenclature in 1946 (Opinion 178), under suspension of the Rules, and its synonym *Proctotrupes* Latreille, 1796, with *P. brevipennis* Latreille as type-species, was added to the Official List of Generic Names in Zoology as Name No. 616. As a result of that action the name Proctotrupoidea has come into general use again.

I am indebted to Dr. Lubomir Masner, Biosystematics Research Institute, Canada Department of Agriculture, for much helpful advice and for new records, in connection with the preparation of this section of the Catalog.

Biology: Clausen, 1962. Entomophagous Insects, pp. 239-270.

Morphology: Snodgrass, 1941. Smithson. Misc. Collect. 99 (14): 38-41. —Reid, 1941. Roy. Ent. Soc. London, Trans. 91: 428-430. —Pschorn-Walcher, 1955. Schweiz. Ent. Gesell., Mitt. 28: 214-219.

Family VANHORNIIDAE

This family is represented by a single known species, specimens of which seem to be rare in collections. The group appears to be closely related to the Heloridae and the Roproniidae.

Genus VANHORNIA Crawford

Vanhornia Crawford, 1909. Ent. Soc. Wash., Proc. 11: 63.

Type-species: *Vanhornia euenemidarum* Crawford. Orig. desig.

euenemidarum Crawford. Que., Maine, N. H., Mass., Conn., N. Y., Pa., Md., Va. Host: Larvae of Eucnemidae.

Vanhornia euenemidarum Crawford, 1909. Ent. Soc. Wash., Proc. 11: 63. ♀, ♂.

Family ROPRONIIDAE

This is another small, little-known group that is poorly, if at all, represented in most collections. The species appear to be parasites of sawfly larvae.

Revision: Townes, 1948. U. S. Natl. Mus., Proc. 98: 85-89.

Taxonomy: Ashmead, 1898. Ent. Soc. Wash., Proc. 4: 132-133. — Bradley, 1905. Ent News 16: 14-17. — Yasumatsu, 1956. Insecta Matsumurana 19: 117-122. — Yasumatsu, 1958. Insecta Matsumurana 21: 112-114. — Heqvist, 1959. Ent. Tidskr. 80: 137-139. — Yasumatsu, 1961. Mushi 35: 68-69.

Biology: Chao, 1957. Fukien Agr. Jour. 5: 73-76 (*Ropronia* reported to be parasitic on sawfly larvae).

Genus ROPRONIA Provancher

Ropronia Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., pp. 152, 154.

Type-species: *Ropronia pediculata* Provancher. Monotypic.

Roptronia Ashmead, 1898. Ent. Soc. Wash., Proc. 4: 132. Error.

californica Ashmead, Calif., Oreg.

Roptronia(!) californica Ashmead, 1898. Ent. Soc. Wash., Proc. 4: 133. ♂.

garmani Ashmead. N. H. to Ga., w. to Iowa.

Roptronia(!) garmani Ashmead, 1898. Ent. Soc. Wash., Proc. 4: 132. ♂.

pediculata Provancher. Ont., N. Y. Host: *Monocotenus suffusus* (Cress.). (Record communicated by L. Masner in correspondence).

Ropronia pediculata Provancher, 1886. Addit. Corr. Faune Ent. Canada Hym., p. 154. ♀.

Ropronia ashmeadii Bradley, 1905. Ent. News 16: 17. ♀.

Family HELORIDAE

The members of this family are internal parasites of the larvae of Chrysopidae.

Revision: Pschor-Walcher, 1955. Schweiz. Ent. Gesell., Mitt. 28: 233-250 (Palearctic species).

Taxonomy: Ashmead, 1893. U. S. Nat. Mus., Bul. 45: 330-331. — Ashmead, 1902. N. Y. Ent. Soc., Jour. 10: 243. — Kieffer, 1914. Das Tierreich, Lief. 42, pp. 57-62. — Riek, 1955. Austral. Jour. Zool. 3: 258-265. — Ceballos, 1965. Graellsia 21: 11-16.

Morphology: Oeser, 1961. Berlin Zool. Mus., Mitt. 37: 72-73 (ovipositor).

Genus HELORUS Latreille

Helorus Latreille, 1802. Hist. Nat. Crust. Ins., v. 3, p. 309.

Type-species: *Helorus ater* Latreille. Monotypic.

Copelus Provancher, 1881. Nat. Canad. 12: 206.

Type-species: *Copelus paradoxus* Provancher. Monotypic.

paradoxus (Provancher). As currently identified this species occurs throughout Continental United States (except Alaska); known also from N. B. and B. C. Host: *Chrysopa majuscula* Banks; *Chrysopa* spp.

Copelus paradoxus Provancher, 1881. Nat. Canad. 12: 207. ♀.

Biology: Clancy, 1946. Calif. Univ. Pub., Ent. 7, pp. 407-418. — Clausen, 1962. Entomophagous Insects, pp. 266-270.

Family PROCTOTRUPIDAE

The Proctotrupidae are principally internal parasites of the larvae of Coleoptera, including those of Carabidae, Staphylinidae, Nitidulidae, Erotylidae, Elateridae, Coccinellidae and Curculionidae. However, certain forms are said to have been reared from larvae of the dipterous family Mycetophilidae; and there is also what appears to be a reliable record (Newman, 1867) of the rearing of a species of *Phaenoserphus* from a centipede of the genus *Lithobius*.

Revision: Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 331-344 (Nearctic species). — Kieffer, 1914. Das Tierreich, Lief. 42, pp. 1-57 (World fauna). — Nixon, 1938. Roy. Ent. Soc. London, Trans. 87: 431-465 (British species). — Riek, 1955. Austral. Jour. Zool. 3: 106-117 (Australian species).

Taxonomy: Brues, 1919. N. Y. Ent. Soc., Jour. 27: 1-19 (Key to Nearctic species). — Morley, 1922. Entomologist 55: 1-3, 59-60, 82-83, 108-110, 132-135, 157-161, 182-186. — Pschorr-Walcher, 1958. Schweiz. Ent. Gesell., Mitt. 31: 57-64. — Masner, 1958. Beitr. z. Ent. 8: 477-481. — Pschorr-Walcher, 1958. Beitr. z. Ent. 8: 724-731. — Masner, 1961. Parc Natl. Upemba Miss. de Witte, fasc. 60, pp. 37-47 (Key to the genera of the world). — Kozlov, 1970. Ent. Obozr. 49: 203-209 (English transl.: Ent. Rev. 49: 115-118). — Kozlov, 1971. Soc. Ent. Unionis Soviet., Horae 54: 7-12.

Biology: Newman, 1867. Entomologist 3: 342-344. — Frohawk, 1886. Entomologist 19: 225. — Eastham, 1929. Parasitology 21: 1-21. — Zolk, 1924. Tartu Ulikooli Ent. Katsejaama Teadaanded 5: 1-10. — Williams, 1932. Hawaii. Ent. Soc., Proc. 8: 205-209. — Riek, 1955. Linn. Soc. N. S. Wales, Proc. 80: 147. — Jansson, 1960. Opusc. Ent. 25: 83-86. — Hedqvist, 1963. Ent. Tidskr. 84: 62-64. — Weidemann, 1965. Ztschr. f. Morph. u. Oekol. der Tiere 55: 425-480. — Masner, 1968. Acta Ent. Bohemoslov. 65: 464-466.

Genus DISOGMUS Foerster

Disogmus Foerster, 1856. Hym. Stud., v. 2, p. 99.

Type-species: *Proctotrupes areolator* Haliday. Monotypic.

In North America at least the genus seems to be relatively rare. It is most closely related to *Proctotrupes* Latreille. Published host records for species of *Disogmus* are very meager and apparently somewhat doubtful but suggest parasitization of carabid and pyrochroid larvae.

Taxonomy: Kieffer, 1914. Das Tierreich, Lief. 42, pp. 16-22. — Nixon, 1938. Roy. Ent. Soc. London, Trans. 87: 447-450. — Pschorr-Walcher, 1958. Schweiz. Ent. Gesell., Mitt. 31: 58-59. *canadensis* Harrington. Ont. (Ottawa).

Disogmus canadensis Harrington, 1889. Roy. Soc. Canada, Trans. (2) 5: 193. ♀.

diversicornis Kieffer. Calif. (San Mateo).

Disogmus diversicornis Kieffer, 1906 (1905). Berlin. Ent. Ztschr. 50: 271. ♂.

glabratrus Kieffer. Calif. (San Mateo).

Disogmus glabratrus Kieffer, 1906 (1905). Berlin. Ent. Ztschr. 50: 271, 273. ♂.

pubescens Kieffer. Nev., (?) Ill. Host: *Amara (Curtonotus) carinatus* (LeC.).

Disogmus pubescens Kieffer, 1906 (1905). Berlin. Ent. Ztschr. 50: 271, 272. ♀, ♂.

torvus Whittaker. B. C. (Chilliwack).

Disogmus torvus Whittaker, 1930. Ent. Soc. Wash., Proc. 32: 68. ♀, ♂.

Genus PHAENOSERPHUS Kieffer

Phaenoserphus Kieffer, 1908. In Andre, Spec. Hym. Eur. Alg., v. 10. p. 298.

Type-species: *Proctotrupes curtipes* Haliday. Desig. by Muesebeck and Walkley, 1951.

Carabiphagus Morley, 1929. Suffolk Nat. Soc., Trans. 1: 40.

Type-species: *Proctotrupes laevifrons* Foerster. Monotypic.

There are no published host records for any North American form of this genus, but on the basis of rearings of Old-World species it appears that the hosts are mainly fungicolous beetle larvae of the families Carabidae and Staphylinidae. One remarkable observation has been recorded by Newman (1867), who described the emergence of specimens of *P. calcar* (Haliday) from a centipede of the genus *Lithobius*.

Taxonomy: Kieffer, 1908. In Andre, spec. Hym. Eur. Alg., v. 10, pp. 298-313. —Kieffer, 1914. Das Tierreich, Lief. 42, pp. 22-36. —Nixon, 1933. Roy. Ent. Soc. London, Trans. 87: 451-460. —Hellen, 1941. Notulae Ent. 21: 33-36. —Pschorn-Walcher, 1958. Schweiz. Ent. Gesell., Mitt. 31: 62-63.

Biology: Newman, 1867. Entomologist 3: 342-344. —Eastham, 1921. Parasitology 29: 1-21. —Raynaud, 1935. Misc. Ent. 36: 97-100. —Weidemann, 1965. Ztschr. f. Oekol. u. Morph. der Tiere 55: 446-480. —Masner, 1968. Acta Ent. Bohemoslov. 65: 464-465.

Morphology: Tonapi, 1958. Indian Jour. Ent. 20: 208, 209, figs. 31-33 (respiratory system). *longipes* Brues. Wash. (Almota).

Phaenoserphus longipes Brues, 1919. N. Y. Ent. Soc., Jour. 27: 9. ♂.

nevadensis (Kieffer). Calif., Nev.

Proctotrypes nevadensis Kieffer, 1906 (1905). Berlin. Ent. Ztschr. 50: 275. ♂.

nigripes (Ashmead). Alaska, Oreg.

zabriskieei (Brues). N. Y. (Rochester).

Serphus zabriskieei Brues, 1919. N. Y. Ent. Soc., Jour. 27: 2, 3. ♀.

Genus CODRUS Panzer

Codrus Panzer, 1801. Faunae Ins. German., Heft 85, no. 9.

Type-species: *Codrus niger* Panzer. Desig. by Morice and Durrant, 1915.

Exallonyx Kieffer, 1904. Soc. Hist. Nat. Metz, Bul. 23: 34.

Type-species: *Exallonyx formicarius* Kieffer. Orig. desig.

Although dipterous larvae, of the family Mycetophilidae, have been considered possible hosts it appears that the species of *Codrus* are essentially parasites of fungicolous beetle larvae. Masner (1968) has indicated that all reliable host records involve Staphylinidae only.

Taxonomy: Brues, 1919. N. Y. Ent. Soc., Jour. 27: 9-18. — Nixon, 1938. Roy. Ent. Soc. London, Trans. 87: 434-446. — Muesebeck and Walkley, 1951. U. S. Dept. Agr., Agr. occidentalis Brues. Idaho, Wash.

Cryptoserpheus occidentalis Brues, 1919. N. Y. Ent. Soc., Jour. 27: 7. ♀.

Family DIAPRIIDAE

This is a large family in which apparently only a small percentage of the existing species have been described. Most of those whose host associations are known are parasites of Diptera.

Revision: Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 345-448. — Kieffer, 1916. Das Tierreich, Lief. 44, pp. VI-XXX, 1-627.

Taxonomy: Jansson, 1939. Ent. Tidskr. 60: 167-172. — Masner, 1961. Inst. Sci. Madagascar, Mem. 12: 289-292. — Kozlov, 1971. Soc. Ent. Unionis Sovet., Horae 54: 12-33.

SUBFAMILY AMBOSITRINAE

Taxonomy: Masner, 1961. Inst. Sci. Madagascar, Mem. 12, pp. 289-295. — Masner, 1969. Ber. ueber die 10. Wanderversammlung Deut. Ent. no. 80, pp. 105-109.

Genus PROPSILOMMA Kieffer

Propsilomma Kieffer, 1916. Das Tierreich, Lief. 44, pp. xxiv, 351, 422.

Type-species: *Psilomma columbianum* Ashmead. Monotypic.

Taxonomy: Masner, 1964. Acta Soc. Ent. Cechoslov. 61: 130.

columbianum (Ashmead). D. C.

Psilomma columbianum Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 379. ♀, ♂.

SUBFAMILY ISMARINAE

Taxonomy: Thomson, 1858. Ofvers. Kongl. Vetensk.-Akad., Forh. 15: 377. — Hellen, 1963.

Fauna Fennica 14: 4. — Hellen, 1964. Fauna Fennica 18: 3-6.

Genus ISMARUS Haliday

Ismarus Haliday, 1835. Ent. Mag. 2: 467.

Type-species: *Cinetus dorsiger* Curtis. Monotypic.

Entomia Herrich-Schaeffer, 1840. Nomencl. Ent., v. 2, p. 127, pl. 6, fig. 21.

Type-species: *Entomia campanulata* Herrich-Schaeffer. Monotypic.

Entomius Haliday, 1857. Nat. Hist. Rev., v. 4, p. 169. Emend.

Agonophorus Dahlbom, 1858 (1857). Ofvers. Kongl. Vetensk.-Akad., Forh. 14: 289. No species. — Muesebeck, 1972. Ent. Soc. Wash., Proc. 74: 131. Three species.

Type-species: *Ismarus rugulosus* Foerster. Desig. by Muesebeck, 1972.

The species for which host associations are known are parasitic on Dryinidae.

Taxonomy: Thomson, 1858. Ofvers. Kongl. Vetensk.-Akad., Forh. 15: 377. — Nixon, 1957. Roy. Ent. Soc. London, Handb. 8 (3), p. 11. — Dessart, 1967. So. Austral. Mus., Rec. 15: 553. — Muesebeck, 1972, Ent. Soc. Wash., Proc. 74: 131.

Biology: Chambers, 1955. Ent. Monthly Mag. 91: 114-115.

americanus Fouts. Pa. (Carlisle).

Ismarus americanus Fouts, 1924. Ent. Soc. Wash., Proc. 26: 164. ♀.

nevadensis Kieffer. Nev. (Ormsby County).

Ismarus nevadensis Kieffer, 1906 (1905). Berlin. Ent. Ztschr. 50: 276. ♀.

SUBFAMILY BELYTINAE

Revision: Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 345-384. — Kieffer, 1908-1910. In Andre, Spec. Hym. Eur. Alg., v. 10, pp. 345-691 (pp. 345-448 pub. in 1908, pp. 449-592 in 1909, pp. 593-691 in 1910). — Kieffer, 1916. Das Tierreich, Lief. 44, pp. 347-593 (World fauna). — Nixon, 1957. Roy. Ent. Soc. London, Handb. 8 (3), 107 pp. (British species). — Hellen, 1964. Fauna Fennica 18: 6-66 (Finnish species).

Taxonomy: Foerster, 1856. Hym. Stud., v. 2, pp. 127-142. — Thomson, 1858. Ofvers. Kongl. Vetensk.-Akad., Forh. 15: 155-180. — Ashmead, 1902. N. Y. Ent. Soc., Jour. 10: 244-247. — Kieffer, 1910. In Wytsman, Gen. Ins., fasc. 107, pp. 1-47. — Masner, 1961. Inst. Sci. Madagascar, Mem. 12: 290-292. — Kozlov, 1971. Soc. Ent. Unionis Sovet., Horae 54: 12-18, 23-28.

Genus CINETUS Jurine

Cinetus Jurine, 1807. Nouv. Meth. Class. Hym. Dipt., p. 310. No species. — Lepeletier and Serville, 1825. Encycl. Meth., Ins., v. 10, p. 210. One species.

Type-species: *Cinetus iridipennis* Lepeletier and Serville. First included species. Also desig. by Kieffer, 1910.

Cinntus Curtis, 1829. Guide Brit. Ins., column 109. Error.

Leptorhaptus Foerster, 1856. Hym. Stud., v. 2, pp. 129, 137. No species. — Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 346, 349. Two species.

Type-species: *Leptorhaptus conicus* Ashmead. Desig. by Muesebeck and Walkley, 1951.

Styliadolon Ashmead, 1897. Canad. Ent. 29: 53.

Type-species: *Styliadolon politum* Ashmead. Monotypic.

Styliododon Ashmead, 1902. N. Y. Ent. Soc., Jour. 10: 245. Error.

An unnamed European species has been recorded as parasitizing larvae of Mycetophilidae. No rearing records for any North American species have been published although one species is reported to have been taken in burrows of the bark beetle *Phloeosinus canadensis* Swaine, where it presumably had developed on some dipterous scavenger.

Taxonomy: Masner, 1964. Acta Soc. Ent. Cechoslov. 61: 126-130. — Masner, 1967. In Krombein and Burks, U. S. Dept. Agr., Agr. Monog. 2, Sup. 2, p. 293.

californicus Ashmead. Calif. (Santa Cruz Mts.)

Cinetus californicus Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 360, 361. "♂" = ♀.

canadensis (Ashmead). Que., Ont. Ecology: With *Phloeosinus canadensis* Swaine.

Miota canadeensis Ashmead, 1897. Canad. Ent. 29: 54. ♀.

Biology: Schedl, 1932. Canad. Ent. 64: 1.

coloradensis (Ashmead). Colo. (Westcliffe).

Psilonma coloradense Ashmead, 1890. Colo. Biol. Assoc., Bul. 1: 11. ♀.

conicus (Ashmead). Que., Ont., D. C., Va.

Leptorhaptus conicus Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 350. ♀, (male misdet.).

pleuralis Fouts. N. Y. (McLean Bogs).

Cinetus pleuralis Fouts, 1925. Ent. Soc. Wash., Proc. 27: 151. ♀, ♂.

procerus Masner and Muesebeck. Va. (Arlington).

Zelotypa ruficornis Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 365, 366. ♂. Preocc. by

Curtis, 1831.

- Cinetus procerus* Masner and Muesebeck, 1968. U. S. Natl. Mus. Bul. 270: 25. N. name.
subpolitus Masner. Ont. (Ottawa).
Styliodon politum Ashmead, 1897. Canad. Ent. 29: 54. ♀. Preocc. by Thomson, 1858.
Cinetus subpolitus Masner, 1964. Acta Soc. Ent. Cechoslov. 61: 128. N. name.
texanus (Ashmead). Tex.
Zelotypa texana Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 364, 365. ♂.

Genus MIOTA Foerster

- Miota* Foerster, 1856. Hym. Stud., v. 2, pp. 131, 141. No species. —Ashmead, 1890. Colo. Biol. Assoc., Bul. 1: 12. One species.
 Type-species: *Miota glabra* Ashmead. First included species.
Leptonetus Masner, 1964. Acta Soc. Ent. Cechoslov. 61: 128.
 Type-species: *Cinetus politus* Thomson. Orig. desig.

Host relationships of members of this genus are unknown.

Taxonomy: Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 351-353. —Masner, 1964. Acta Soc. Ent. Cechoslov. 61: 128-129. —Masner, 1967. In Krombein and Burks, U. S. Dept. Agr., Agr. Monog. 2, Sup. 2, p. 292.

alaskensis (Ashmead). Alaska (Virgin Bay).

Zelotypa alaskensis Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 139. ♂.

americana (Ashmead). Fla.

Psilomma americana Ashmead, 1887. Canad. Ent. 19: 197. ♂.

analis Ashmead. "Carolina."

Miota analis Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 351, 352. ♀.

ashmeadi (Kieffer). Calif. (Claremont).

Leptorhaptus Ashmeadi Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 377. ♂.

bakeri (Kieffer). Calif. (Claremont).

Leptorhaptus Bakeri Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 377, 378. ♂.

bisulcata (Kieffer). Pa. (Jeannette).

Leptorhaptus bisulcatus Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 377, 378. ♂.

clarimontis (Kieffer). Calif. (Claremont).

Leptorhaptus Clarimontis Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 377, 379. ♀.

conformis Fouts. Calif. (Westwood).

Miota conformis Fouts, 1966. Ent. Soc. Wash., Proc. 68: 19. ♀.

filicornis (Kieffer). Calif. (San Mateo).

Zelotypa filicornis Kieffer, 1906 (1905). Berlin. Ent. Ztschr. 50: 279. ♀.

flavicornis Kieffer. Colo. (Gunnison).

Miota flavicornis Kieffer, 1906 (1905). Berlin. Ent. Ztschr. 50: 281. ♀.

glabra Ashmead. Colo. (Westcliffe).

Miota glabra Ashmead, 1890. Colo. Biol. Assoc., Bul. 1: 12. ♀.

longinervis (Kieffer). Calif. (Claremont).

Leptorhaptus longinervis Kieffer, 1906 (1905). Berlin. Ent. Ztschr. 50: 281. ♀.

monticola (Kieffer). Calif. (Claremont).

Cinetus monticola Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 376. ♀.

pennsylvanica (Kieffer). Pa. (Pittsburgh).

Cinetus pennsylvanicus Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 376. ♂.

rufa (Ashmead). Va.

Leptorhaptus rufus Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 350. ♀, ♂.

vera (Fouts). Fla.

Scorpiolelia vera Fouts, 1927. Ent. Soc. Wash., Proc. 29: 173. ♀.

xanthocera (Kieffer). Pa. (Jeannette).

Cinetus xanthocerus Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 376, 377. ♀.

Genus SCORPIOTELEIA Ashmead

Scorpioteleia Ashmead, 1897. Canad. Ent. 29: 53.

Type-species: *Scorpioteleia mirabilis* Ashmead. Monotypic.

Taxonomy: Masner, 1964. Acta Soc. Ent. Cechoslov. 61: 130.
mirabilis Ashmead. Ont. (Kettle Isl.).

Scorpioteleia mirabilis Ashmead, 1897. Canad. Ent. 29: 53. ♀.

Genus MACROHYNNIS Foerster

Macrohynnis Foerster, 1856. Hym. Stud., v. 2, pp. 129, 136. No species. — Mayr, 1904.
 Zool.-Bot. Gesell. Wien, Verhandl. 54: 593. One species.

Type-species: *Macrohynnis lepidus* Mayr. First included species.

Cinelaptus Nixon, 1957. Roy. Ent. Soc. London, Handb. 8 (3), pp. 7, 91.

Type-species: *Cinelaptus fragilis* Nixon. Orig. desig.

americanus Kieffer. Pa. (Jeannette).

Macrohynnis americanus Kieffer, 1909. Soc. Sci. de Bruxelles, 33: 338. ♀.

Genus ACLISTA Foerster

Aclista Foerster, 1856. Hym. Stud., v. 2, pp. 128, 131, 133, 134, 135. No species. — Marshall, 1873. Cat. Brit. Hym., Oxyura, p. 9. Three species, one of them doubtfully included.

Type-species: *Acoretus scutellaris* Thomson. Desig. by Muesebeck and Walkley, 1951.

Anectata Foerster, 1856. Hym. Stud., v. 2, pp. 129, 136. No species. — Ashmead, 1887.
 Canad. Ent. 19: 198. One species.

Type-species: *Anectata hirtifrons* Ashmead. First included species.

Xenotoma Foerster, 1856. Hym. Stud., v. 2, pp. 129, 137. No species. — Foerster, 1861.
 Programm Realschule Aachen, p. xliv. One species.

Type-species: *Xenotoma nigricoxis* Foerster. First included species.

Acoretus Haliday, 1857. Nat. Hist. Rev., v. 4, p. 169. Proposed as a subgenus of *Belyta*
 Jurine.

Type-species: *Belyta rufopetiolata* Nees. Monotypic.

Although the species of this genus are numerous and specimens are abundantly collected in the field nothing has been published concerning their habits, biology or host relations except in the case of *A. fungicola* (Crawford), which was reared in large numbers from dipterous larvae living in a mushroom fungus of the genus *Boletus*.

Taxonomy: Nixon, 1957. Roy. Ent. Soc. London, Handb. 8 (3), pp. 66-84. — Hellen, 1964.
 Fauna Fennica 18: 18-32.

antennalis (Fouts). N. Y. (McLean Bogs).

Xenotoma (*Xenotoma*) *antennalis* Fouts, 1926. Brooklyn Ent. Soc., Bul. 21: 152, 154. ♀.

aquilonia Muesebeck. Alaska (Muir Inlet).

Zelotypa borealis Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 137, 138. ♀. Preocc. by *Aclista borealis* Ashmead, 1893, which is now in *Zygota*.

Aclista ashmeadi Muesebeck and Walkley, 1951. U. S. Dept. Agr., Agr. Monog. 2, p. 686.
 N. name. Preocc. by Kieffer, 1905.

Aclista aquilonia Muesebeck, 1958. U. S. Dept. Agr., Agr. Monog. 2, Sup. 1, p. 91. N. name.
ashmeadi (Kieffer). Calif. (San Mateo). Doubtfully referable to *Aclista*.

Zelotypa Ashmeadi Kieffer, 1905. Soc. Hist. Nat. Metz, Bul. 24: 109. ♂.

bradleyi (Fouts). Calif. (Cuyamaca Mts.).

Xenotoma bradleyi Fouts, 1927. Ent. Soc. Wash., Proc. 29: 172. ♀.

brunnipes Muesebeck and Walkley. Colo.

Xenotoma coloradensis Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 368, 370. ♂. Preocc.
 by *Zelotypa coloradensis* Ashmead, 1890, now in *Pantoclis*, when both were placed in

Aclista by Muesebeck and Walkley, 1951.

Aclista brunnipes Muesebeck and Walkley, 1951. U. S. Dept. Agr., Agr. Monog. 2, p. 686.
 N. name.

castanea (Kieffer). Pa. (Jeanette).

Xenotoma castanea Kieffer, 1908. Soc. Sci. de Bruxelles, Ann. 32: 44. ♀.

clarimontis (Kieffer). Calif. (Claremont).

Xenotoma Clarimontis Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 369, 374. ♂.

cubitalis Muesebeck and Walkley. Wis. (Polk County).

Xenotoma clinoneura Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 368, 372. ♂. Preocc. by *Pantoclis clinoneura* Kieffer, 1909, when both were placed in *Aclista* by Muesebeck and Walkley, 1951.

Aclista cubitalis Muesebeck and Walkley, 1951. U. S. Dept. Agr., Agr. Monog. 2, p. 686. N. name.

curvicauda (Fouts). N. Y. (McLean Bogs).

Xenotoma (Xenotoma) curvicauda Fouts, 1926. Brooklyn Ent. Soc., Bul. 21: 152, 155. ♀.

flavidipes (Kieffer). Fla. (Ft. George Isl.)

Zelotypa flavipes Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 365. ♂. Preocc. by *Pantoclis flavipes* Ashmead, 1893, when also placed in *Pantoclis* by Kieffer, 1910.

Pantoclis ? flavidipes Kieffer, 1910. In Wytsman, Gen. Ins., fasc. 107, p. 27. N. name.

flavinervis (Kieffer). Pa. (Jeanette).

Xenotoma flavinervis Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 370, 375. ♀, ♂.

flavoris Muesebeck and Walkley. Pa., Wis.

Xenotoma Bakeri Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 369, 373. ♀, ♂. Preocc. by *Pantoclis bakeri* Kieffer, 1909, when both were placed in *Aclista* by Muesebeck and Walkley, 1951.

Aclista flavoris Muesebeck and Walkley, 1951. U. S. Dept. Agr., Agr. Monog. 2, p. 687. N. name.

foutsi Muesebeck and Walkley. Ont. (Gull Lake).

Anectata canadensis Fouts, 1924. Ent. Soc. Wash., Proc. 26: 165. ♀. Preocc. by *Pantoclis canadensis* Ashmead, 1897, when both names were placed in *Aclista* by Muesebeck and Walkley, 1951.

Aclista foutsi Muesebeck and Walkley, 1951. U. S. Dept. Agr., Agr. Monog. 2, p. 687. N. name.

fungicola (Crawford). Va. (Clarendon). Ecology: A long series was reared from dipterous larvae in a fungus of the genus *Boletus*.

Zelotypa fungicola Crawford, 1915. U. S. Natl. Mus., Proc. 48: 583. ♀, ♂.

fuscinervis (Kieffer). Pa. (Jeanette).

Xenotoma fuscinervis Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 370, 375. ♀, ♂.

harringtoni (Kieffer). Que. (Hull).

Pantoclis mandibularis Harrington, 1899. Roy. Soc. Canada, Trans. (2) 5: 198. ♀. Preocc. by Ashmead, 1893.

Xenotoma (Zelotypa) harringtoni Kieffer, 1916. Das Tierreich, Lief. 44, pp. 544, 549. N. name.

hirtifrons (Ashmead). Ont. (Ottawa).

Anectata hirtifrons Ashmead, 1887. Canad. Ent. 19: 198. ♀.

insularis (Ashmead). Fla. (Ft. George Isl.).

Pantoclis insularis Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 367, 369. ♀, (male misdet.).

kiefferi (Fouts). Pa. (Jeanette).

Xenotoma xanthopus Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 368, 371. ♂. Preocc. by Ashmead, 1893.

Xenotoma flavipes Kieffer, 1910. In Wytsman, Gen. Ins., fasc. 107, p. 33. N. name. Preocc. by Ashmead, 1893. See under *A. flavidipes* (Kieffer).

Xenotoma (Xenotoma) kiefferi Fouts, 1926. Brooklyn Ent. Soc., Bul. 21: 151, 153. N. name.

laeta (Kieffer). Calif. (Claremont).

Xenotoma laeta Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 368, 371. ♂.

longicornis (Provancher). Canada.

Spilomicrus longicornis Provancher, 1881. Nat. Canad. 12: 262. ♀.

Taxonomy: Masner, 1969. Nat. Canad. 96: 782.

macrodyctium (Ashmead). Colo. (Westcliffe).

Cinetus macrodyctium Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 360. ♀, (male misdet.).

mandibularis (Ashmead). Tex.

Xenotoma mandibularis Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 363. ♀, (♂ misdet.).

megaloplasta (Ashmead). Kans. (Manhattan).

Pantoclis megaloplasta Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 367, 368. ♀.

Pantoclis megaloplasta Schulz, 1906. Spolia Hym., p. 151. Emend.

melanocera (Kieffer). Calif. (Claremont).

Xenotoma melanocera Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 368, 370. ♂.

mellicornis Muesebeck and Walkley. Va. (Arlington).

Cinetus ruficornis Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 359, 360. ♀. Preocc. by Curtis, 1831.

Aclista mellicornis Muesebeck and Walkley, 1951. U. S. Dept. Agr., Agr. Monog. 2, p. 688. N. name.

mellipes (Say). Que., Ont., Va., Ind.

Cinetus mellipes Say, 1836. Boston Jour. Nat. Hist. 1: 279. ♀.

morula Muesebeck and Walkley. Colo.

Aneactata coloradensis Kieffer, 1908. Soc. Sci. de Bruxelles, Ann. 32: 42. ♀. Preocc. by

Zelotypa coloradensis Ashmead, 1890, when both were placed in *Aclista* by Muesebeck and Walkley, 1951, although the Ashmead species is now in *Pantoclis*.

Aclista morula Muesebeck and Walkley, 1951. U. S. Dept. Agr., Agr. Monog. 2, p. 688. N. name.

nevadensis Kieffer. Nev. (Ormsby County).

Aclista nevadensis Kieffer, 1906 (1905). Berlin. Ent. Ztschr. 50: 277. ♂.

pacifica Muesebeck and Walkley. Calif.

Aneactata californica Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 381. ♀. Preocc. by *Aclista californica* Ashmead, 1893, although the latter is now in *Zygota* where it is preoccupied and has been renamed *distans* Muesebeck and Walkley, 1951.

Aclista pacifica Muesebeck and Walkley, 1951. U. S. Dept. Agr., Agr. Monog. 2, p. 688. N. name.

paludicola Muesebeck and Walkley. N. Y. (McLean Bogs).

Xenotoma (Xenotoma) palustra Fouts, 1926. Brooklyn Ent. Soc., Bul. 21: 151, 153. ♀.

Preocc. by *Aclista palustra* Fouts, 1926, which is now in *Zygota*.

Aclista paludicola Muesebeck and Walkley, 1951. U. S. Dept. Agr., Agr. Monog. 2, p. 688. N. name.

parvicellula (Kieffer). Calif. (Claremont).

Xenotoma parvicellula Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 368, 371. ♀.

pilosa (Fouts). N. Y. (McLean Bogs).

Xenotoma (Xenotoma) pilosa Fouts, 1926. Brooklyn Ent. Soc., Bul. 21: 150, 153. ♂.

politula (Ashmead). Colo. (Westcliffe).

Aneactata polita Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 381, 382. ♂.

rufopleuralis (Ashmead). Que. (Hull).

Miota rufopleuralis Ashmead, 1897. Canad. Ent. 29: 54. ♀.

rufosignata (Kieffer). Calif. (Claremont).

Xenotoma rufosignata Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 369, 373. ♀, ♂.

scutellata (Ashmead). Alaska.

Zelotypa scutellata Ashmead, 1902. Wash. Acad. Sci., Proc. 4: 137. ♀.

similis (Ashmead). Va.

Cinetus similis Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 359, 361. ♀.

trisulcata (Kieffer). Pa. (Jeannette).

Xenotoma trisulcata Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 369, 372. ♀.

vagabunda Muesebeck and Walkley. Pa. (Jeannette).

Xenotoma Klagesi Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 369, 374. ♀. Preocc. when it and *Pantoclis klagesi* Kieffer, 1909, were both placed in *Aclista* by Muesebeck and Walkley, 1951, although the latter name has now been restored to *Pantoclis*.

Aclista vagabunda Muesebeck and Walkley, 1951. U. S. Dept. Agr., Agr. Monog. 2, p. 689.
N. name.

xanthopus (Ashmead). N. J.

Xenotoma xanthopus Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 363. ♀, ♂.

Genus PANTOCLIS Foerster

Pantoclis Foerster, 1856. Hym. Stud., v. 2, pp. 129, 137. No species. — Foerster, 1861.

Programm Realschule Aachen, p. xliii. One species.

Type-species: *Pantoclis barycerus* Foerster. First included species.

Zelotypa Foerster, 1856. Hym. Stud., v. 2, pp. 130, 141. No species. — Ashmead, 1890. Colo. Biol. Assoc., Bul. 1: 12. One species.

Type-species: *Zelotypa coloradensis* Ashmead. First included species.

There appear to be no published indications of host associations for any species of this genus.

Revision: Kieffer, 1916. Das Tierreich, Lief. 44, pp. 475-506.

Taxonomy: Nixon, 1957. Roy. Ent. Soc. London, Handb. 8(3), pp. 41-54. — Hellen, 1964. Fauna Fennica 18: 32-38.

aculeata Kieffer. Pa. (Pittsburgh).

Pantoclis aculeatus Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 353, 357. ♀.

analis Ashmead. D. C.

Pantoclis analis Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 367, 370. ♀.

aptera Kieffer. Alaska.

Pantoclis scutellata aptera Kieffer, 1916. Das Tierreich, Lief. 44, p. 498. ♀.

Taxonomy: Muesebeck and Masner, 1967. U. S. Dept. Agr., Agr. Monog. 2, Sup. 2, p. 294.

bakeri Kieffer. Pa. (Jeannette).

Pantoclis Bakeri Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 353, 354. ♂.

bruesi Kieffer. Pa., Wis.

Pantoclis Bruesi Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 353, 357. ♀.

californica Ashmead. Calif. (Santa Cruz Mts.).

Pantoclis californica Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 367, 371. ♀, (male misdet.).

canadensis Ashmead. Ont. (Ottawa).

Pantoclis canadensis Ashmead, 1897. Canad. Ent. 29: 55. ♀.

clinoneura Kieffer. Pa. (Jeannette).

Pantoclis clinoneurus Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 353, 355. ♂.

coloradensis (Ashmead). Colo. (Westcliffe).

Zelotypa coloradensis Ashmead, 1890. Colo. Biol. Assoc., Bul. 1: 12. "♀" = ♂.

consimilis (Muesebeck). Ont. (Ottawa).

Pantoclis similis Ashmead, 1897. Canad. Ent. 29: 55. ♂. Preocc. by *Cinetus similis*

Ashmead, 1893, when both were placed in *Aclista* by Muesebeck, 1958.

Aclista consimilis Muesebeck, 1958. U. S. Dept. Agr., Agr. Monog. 2, Sup. 1, p. 91. N. name.

dubiosa Kieffer. Calif. (Claremont).

Pantoclis dubiosa Kieffer, 1906 (1905). Berlin. Ent. Ztschr. 50: 278. ♀.

duplicata (Muesebeck and Walkley). Calif. (Claremont).

Pantoclis californicus Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 352, 354. ♀. Preocc. by Ashmead, 1893.

Pantoclis californiae Kieffer, 1910. In Wytsman, Gen. Ins., fasc. 107, p. 26. N. name. Again proposed as n. name for *californicus* in 1926 (Das Tierreich, Lief. 44: 504). Placed in *Aclista* by Muesebeck and Walkley, 1951, and there preoccupied by *Aclista californiae* Kieffer, 1910, which is now in *Belyta*.

Aclista duplicata Muesebeck and Walkley, 1951. U. S. Dept. Agr., Agr. Monog. 2, p. 686. N. name.

flavipes Ashmead. Va. (Arlington).

Pantoclis flavipes Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 367, 370. ♀.

Pantoclis flavigerus Kieffer, 1916. Das Tierreich, Lief. 44, pp. 480, 500. Unnecessarily proposed as a n. name for *P. flavipes* Ashmead.

floridana Ashmead. Fla. (Jacksonville).

Pantoclis floridana Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 367, 372. ♀.

georgica (Ashmead). Ga.

Anecta georgica Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 381, 382. ♂.

integrifrons Kieffer. Pa. (Jeannette).

Pantoclis integrifrons Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 353, 356. ♀.

jeannettensis (Muesebeck and Walkley). Pa. (Jeannette).

Pantoclis microneurus Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 353, 355. ♂. Preocc. by *Aclista microneura* Kieffer, 1909, when placed in *Aclista* by Muesebeck and Walkley, 1951, although that species is now in *Zygota*.

Aclista jeannettensis Muesebeck and Walkley, 1951. U. S. Dept. Agr., Agr. Monog. 2, p. 688. N. name.

klagesi Kieffer. Pa. (Jeannette).

Pantoclis Klagesi Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 353, 358. ♂.

monilicornis (Ashmead). Colo. (Westcliffe).

Belyta mouilicornis Ashmead, 1890. Colo. Biol. Assoc., Bul. 1: 12. ♀.

montana Ashmead. Calif. (Santa Cruz Mts.).

Pantoclis montana Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 367, 368. ♀, (male misdet.).

orthoneura Kieffer. Wis. (Polk County).

Pantoclis orthoneurus Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 353, 358. ♂.

rufescens Ashmead. Tex.

Pantoclis rufescens Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 367, 372. ♀.

ruficauda Ashmead. Va. (Arlington).

Pantoclis ruficauda Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 367, 370. ♀.

singularis Kieffer. Pa. (Jeannette).

Pantoclis singularis Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 352, 354. ♂.

subfuscus Kieffer. Pa. (Jeannette).

Pantoclis subfuscus Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 353, 355. ♀.

subobtusa Kieffer. Pa. (Jeannette).

Pantoclis subobtusus Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 353, 358. ♀.

Genus ZYGOTA Foerster

Zygota Foerster, 1856. Hym. Stud., v. 2, pp. 128, 131, 133, 135. No species. — Marshall, 1873. Cat. Brit. Hym.; Oxyura, p. 9. Two species.

Type-species: *Belyta abdominalis* Nees. Desig. by Ashmead, 1893.

Carinia Kieffer, 1905. Soc. Sci. de Bruxelles, Ann. 29: 140.

Type-species: *Carinia nitida* Kieffer. Monotypic.

Tetrapsilus Kieffer, 1908. In Andre, Spec. Hym. Eur. Alg., v. 10, pp. 367, 397.

Type-species: *Tetrapsilus filicornis* Kieffer. Monotypic.

Although specimens are commonly collected nothing seems to be known concerning the biology or host relationships of members of this genus.

Taxonomy: Fouts, 1926. Brooklyn Ent. Soc., Bul. 21: 145-149. (under *Aclista* Foerster).

—Nixon, 1957. Roy. Ent. Soc. London, Handb. 8 (3), pp. 54-65. —Hellen, 1964. Fauna Fennica 18 : 38-45.

americana Ashmead. Greenland, Que., Ont., Alaska.

Zygota Americana Ashmead, 1888. Canad. Ent. 20: 54. ♀, ♂.

arcuata (Kieffer). Pa. (Jeannette).

Aclista arcuata Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 348, 349. ♂.

borealis (Ashmead). Ont. (Ottawa).

Aclista borealis Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 376, 378. ♀.

caudata (Harrington). Que. (Hull).

Aclista caudata Harrington, 1899. Roy. Soc. Canada, Trans. (2) 5: 199. ♀, ♂.

crassicornis (Harrington). Ont. (Ottawa).

Aclista crassicornis Harrington, 1899. Roy. Soc. Canada, Trans. (2) 5: 200. ♂.

distans Muesebeck and Walkley. Alaska, Calif.

Aclista californica Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 375, 378. ♀. Preocc. by *Pantoclis californica* Ashmead, 1893, when the latter was placed in *Aclista* by

Muesebeck and Walkley, 1951, although it has now been restored to *Pantoclis*.

Zygota distans Muesebeck and Walkley, 1951. U. S. Dept. Agr., Agr. Monog. 2, p. 683. N. name.

dolichoneura (Kieffer). Nev. (Ormsby County).

Aclista dolichoneura Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 349, 351. ♂.

dupla Muesebeck and Walkley. D. C.

Aclista rufopetiolata Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 375, 376. ♀. Preocc. by Nees, 1834.

Zygota dupla Muesebeck and Walkley, 1951. U. S. Dept. Agr., Agr. Monog. 2, p. 683. N. name.

emarginata (Kieffer). Wis. (Polk County).

Aclista (Zygota) emarginata Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 348, 350. ♂.

excavata (Fouts). N. Y. (McLean Bogs).

Aclista excavata Fouts, 1926. Brooklyn Ent. Soc., Bul. 21: 146, 147. ♂.

inermis (Provancher). Que., Ont.

Aneurynchus (!) *inermis* Provancher, 1887. Addit. Corr. Faune Ent. Canada Hym., p. 176.
"♀" = ♂.

Taxonomy: Masner, 1969. Nat. Canad. 96: 777.

insignis (Kieffer). Pa. (Jeannette).

Aclista insignis Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 349, 350. ♂.

levistylus (Kieffer). Pa. (Jeannette).

Aclista levistylus Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 348, 350. ♂.

longicornis (Ashmead). Va. (Arlington).

Zelotypa longicornis Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 365. ♂.

microneura (Kieffer). Calif. (Claremont).

Aclista microneura Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 349, 351. ♂.

monticola Muesebeck and Walkley. Calif. (Santa Cruz Mts.).

Aclista rufescens Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 375, 376. ♀. Preocc. by *Pantoclis rufescens* Ashmead, 1893, when the latter was placed in *Aclista* by Muesebeck and Walkley, 1951, although it has now been restored to *Pantoclis*.

Zygota monticola Muesebeck and Walkley, 1951. U. S. Dept. Agr., Agr. Monog. 2, p. 684.

obliterata (Fouts). N. Y. (McLean Bogs).

Aclista oblitterata Fouts, 1926. Brooklyn Ent. Soc., Bul. 21: 146, 147. ♂.

palustra (Fouts). N. Y. (McLean Bogs).

Aclista palustra Fouts, 1926. Brooklyn Ent. Soc., Bul. 21: 145, 146. ♂.

rufa (Ashmead). Tex.

Aclista rufa Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 375, 376. ♀.

scleroneura (Kieffer). Pa. (Jeannette).

Aclista scleroneura Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 349, 352. ♂.

simulans (Fouts). N. Y. (McLean Bogs).

Aclista simulans Fouts, 1926. Brooklyn Ent. Soc., Bul. 21: 146, 148. ♂.

texana Ashmead. Tex.

Zygota texana Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 373, 374. ♀.

Genus ACROPIESTA Foerster

Acropiesta Foerster, 1856. Hym. Stud., v. 2, pp. 129, 135, 136. No species. —Cameron, 1883. Ent. Soc. London, Trans., p. 195. One species doubtfully included and therefore not

available as type-species.—Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 353. Two species.

Type-species: *Acropiesta flavicauda* Ashmead. Desig. by Muesebeck and Walkley, 1951.

Pantopieta Maneval, 1939. Soc. Ent. de France, Bul. 44: 169, 170.

Type-species: *Cinetus flaviventris* Thomson. Orig. desig.

Taxonomy: Nixon, 1957. Roy. Ent. Soc. London, Handb. 8(3), pp. 24-27.

flavicauda Ashmead. Ont. (Ottawa).

Acropista flavicauda Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 354. ♀.

pulchella Whittaker. B. C. (Hollyburn).

Acropista pulchella Whittaker, 1930. Ent. Soc. Wash., Proc. 32: 75. ♀, ♂.

pulchella var. *melanocephala* Whittaker. B. C. (Hollyburn).

Acropista pulchella var. *melanocephala* Whittaker, 1930. Ent. Soc. Wash., Proc. 32: 76. ♀, ♂.

pulchella var. *rufa* Whittaker. B. C. (Hollyburn).

Acropista pulchella var. *rufa* Whittaker, 1930. Ent. Soc. Wash., Proc. 32: 76. ♀, ♂.

pulchella var. *rufifrons* Whittaker. B. C. (Hollyburn).

Acropista pulchella var. *rufifrons* Whittaker, 1930. Ent. Soc. Wash., Proc. 32: 76. ♀, ♂.

semirufa Fouts. Md. (Glen Echo).

Acropista semirufa Fouts, 1924. Ent. Soc. Wash., Proc. 26: 165. ♀.

subaptera Ashmead. Mich. (Marquette).

Acropista subaptera Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 354. ♀.

Genus BELYTA Jurine

Belyta Jurine, 1807. Nouv. Meth. Class. Hym. Dipt., p. 311.

Type-species: *Belyta bicolor* Jurine. Monotypic.

Belita Haliday, 1857. Nat. Hist. Rev., v. 4, p. 169. Emend.

Balyta Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 366. Error.

Paraclysta Kieffer, 1909. In Andre, Spec. Hym. Eur. Alg., v. 10, p. 476. Proposed as a subgenus of *Belyta* Jurine.

Type-species: *Belyta brachyptera* Thomson. Desig. by Kieffer, 1910.

Neobelyta Hellen, 1964. Fauna Fennica 18: 50. Proposed as a subgenus of *Belyta* Jurine.

Type-species: *Belyta sanguinolenta* Nees. Orig. desig.

There are no host association records for any of the North American species of *Belyta*. One unnamed European species is said to have been reared from mycetophilid larvae.

Revision: Kieffer, 1916. Das Tierreich, Lief. 44, pp. 387-422.

Taxonomy: Hellen, 1964. Fauna Fennica 18: 49-56.

anthracina Whittaker. B. C. (Hollyburn).

Belyta anthracina Whittaker, 1931. Ent. Soc. Wash., Proc. 33: 179. ♀.

bisulcata Kieffer. Pa. (Jeannette).

Belyta bisulcata Kieffer, 1908. Soc. Sci. de Bruxelles, Ann. 32: 43. ♀, ♂.

borealis Whittaker. B. C. (Hollyburn).

Belyta boreale Whittaker, 1931. Ent. Soc. Wash., Proc. 33: 179. ♀.

californiae (Kieffer). Calif. (Placer County).

Zygota californica Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 373. ♂. Preocc. by *Aclista californica* Ashmead, 1893, when transferred to *Aclista* by Kieffer, 1910.

Aclista californiae Kieffer, 1910. In Wytsman, Gen. Ins., fasc. 107, p. 24. N. name.

contempta Kieffer. Pa. (Pittsburgh).

Belyta contempta Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 359, 361. ♂.

crassicornis (Ashmead). Va. (Arlington).

Pantoclis crassicornis Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 367, 369. ♀, (male misdet.).

despecta Kieffer. Wis. (Polk County).

Belyta despecta Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 360, 362. ♂.

erythropus Ashmead. Wis.

Belyta erythropus Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 356, 357. ♀.

frontalis Ashmead. Del.

Belyta frontalis Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 356. ♀.

infuscata Kieffer. Pa. (Jeannette).

Belyta infuscata Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 359, 361. ♂.

klagesi Kieffer. Pa. (Jeannette).

Belyta Klagesi Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 360, 362. ♂.

longicollis Fouts. Pa. (Mount Holly Springs).

Belyta longicollis Fouts, 1926. Ent. Soc. Wash., Proc. 28: 174. ♀.

missouriensis (Ashmead). Mo. (St. Louis).

Actista missouriensis Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 375, 377. ♂.

nasuta (Provancher). Ont. (Ottawa).

Cinetus nasutus Provancher, 1887. Addit. Corr. Faune Ent. Canada Hym., p. 178. ♀.

Taxonomy: Masner, 1969. Nat. Canad. 96: 718.

nigripes Kieffer. Calif. (Claremont).

Belyta nigripes Kieffer, 1906 (1905). Berlin. Ent. Ztschr. 50: 280. ♂.

occidentalis (Muesebeck and Walkley). Calif. (Claremont).

Belyta californica Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 360, 363. ♂. Preocc. by

Ashmead, 1893, in *Cinetus* as treated by Muesebeck and Walkley, 1951.

Cinetus occidentalis Muesebeck and Walkley, 1951. U. S. Dept. Agr., Agr. Monog. 2, p. 682. N. name.

peninsularis (Muesebeck and Walkley). Fla. (Jacksonville).

Actista floridana Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 376, 378. ♂. Preocc. by

Pantoclis floridana Ashmead, 1893, when this name was transferred to *Actista* by Muesebeck and Walkley, 1951, although it is now restored to *Pantoclis*.

Cinetus peninsularis Muesebeck and Walkley, 1951. U. S. Dept. Agr., Agr. Monog. 2, p. 682. N. name.

picipes (Ashmead). D. C.

Pantoclis picipes Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 367, 368. ♂.

robustior Fouts. N. Y., Md.

Belyta robustior Fouts, 1925. Ent. Soc. Wash., Proc. 27: 152. ♀.

rostrata Harrington. Que. (Chelsea).

Belyta rostrata Harrington, 1899. Roy. Soc. Canada, Trans. (2) 5: 196. ♀.

rugifrons Fouts. N. Y., Md.

Belyta rugifrons Fouts, 1926. Brooklyn Ent. Soc., Bul. 21: 149. ♂.

rugosopetiolata (Ashmead). Va., La.

Actista rugosopetiolata Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 375, 377. ♀.

sanguinea Whittaker. B. C. (Hollyburn).

Belyta sanguinea Whittaker, 1931. Ent. Soc. Wash., Proc. 33: 177. ♀, ♂.

sulcata Kieffer. Pa.

Belyta bisulcata Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 359, 360. ♀, ♂. Preocc. by Kieffer, 1908.

Belyta sulcata Kieffer, 1910. In Wytsman, Gen. Ins., fasc. 107, p. 22. N. name.

texana Ashmead. Tex.

Belyta texana Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 356, 357. ♀.

vera Kieffer. Wis. (Polk County).

Belyta vera Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 359, 362. ♂.

vilis Kieffer. Pa. (Pittsburgh).

Belyta vilis Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 360, 363. ♂.

whittakeri (Muesebeck and Walkley). B. C. (Hollyburn).

Belyta excavata Whittaker, 1931. Ent. Soc. Wash., Proc. 33: 180. ♀. Preocc. by Kieffer, 1910, when placed in *Cinetus* by Muesebeck and Walkley, 1951.

Cinetus whittakeri Muesebeck and Walkley, 1951. U. S. Dept. Agr., Agr. Monog. 2, p. 683. N. name.

xanthopus Kieffer. Wis. (Polk County).

Belyta xanthopus Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 360, 364. ♂.

xanthopus var. *assimilis* Kieffer. Pa., Wis.

Belyta xanthopus var. *assimilis* Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 360, 364. ♂.
xanthostoma Kieffer. Pa. (Jeannette).

Belyta xanthostoma Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 360, 363. ♂.

Genus DIPHORA Foerster

Diphora Foerster, 1856. Hym. Stud., v. 2, pp. 130, 140.

Type-species: *Diphora westwoodii* Foerster. Monotypic.

Taxonomy: Nixon, 1957. Roy. Ent. Soc. London, Handb. 8 (3), p. 41.

nearctica Whittaker. B. C. (Hollyburn).

Diphora nearctica Whittaker, 1930. Ent. Soc. Wash., Proc. 32: 74. ♀, ♂.

Genus OXYLABIS Foerster

Oxylabis Foerster, 1856. Hym. Stud., v. 2, pp. 128, 130, 133, 139.

Type-species: *Cuetus picipes* Nees. Desig. by Muesebeck and Walkley, 1951.

Lyteba Thomson, 1858. Ofvers. Kongl. Vetensk-Akad., Forh. 15: 155, 180.

Type-species: *Belyta bisulea* Nees. Monotypic.

Host associations unknown.

Revision: Kieffer, 1916. Das Tierreich, Lief. 44, pp. 363-374.

Taxonomy: Nixon, 1957. Roy. Ent. Soc. London, Handb. 8 (3), pp. 27-29.

arcuata Kieffer. Pa. (Jeannette).

Oxylabis arcuata Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 346, 348. ♂.

californica Kieffer. Calif. (San Mateo).

Oxylabis californica Kieffer, 1906 (1905). Berlin. Ent. Ztschr. 50: 279. ♀.

carinifrons Kieffer. Wis. (Polk County).

Oxylabis carinifrons Kieffer, 1909. Soc. Sci. de Bruxelles, Ann. 33: 346, 347. ♂.

fuscicornis (Ashmead). Que. (Hull).

Zelotypa fuscicornis Ashmead, 1897. Canad. Ent. 29: 55. ♂.

klagesi Kieffer. Pa. (Jeannette).

Oxylabis Klagesi Kieffer, 1908. Soc. Sci. de Bruxelles, Ann. 32: 42. ♂.

spinosa (Provancher). Que., Ont.

Aneurynchus (!) *spinosus* Provancher, 1881. Nat. Canad. 12: 262. ♀.

Genus ACANOSEMA Kieffer

Acanosema Kieffer, 1908. In Andre, Spec. Hym. Eur. Alg., v. 10, pp. 360, 367, 407.

Type-species: *Acanosema rufum* Kieffer. Orig. desig.

Cardiopsilus Kieffer, 1908. In Andre, Spec. Hym. Eur. Alg., v. 10, pp. 360, 405.

Type-species: *Cardiopsilus productus* Kieffer. Monotypic.

Taxonomy: Nixon, 1957. Roy. Ent. Soc. London, Handb. 8 (3), pp. 21-24. —Hellen, 1964.

Fauna Fennica 18: 56-57.

sylvanum Whittaker. B. C. (Hollyburn).

Acanosema sylvana Whittaker, 1930. Ent. Soc. Wash., Proc. 32: 134. ♀, ♂.

Genus RHYNCHOPSILUS Kieffer

Rhynchopsilus Kieffer, 1908. In Andre, Spec. Hym. Eur. Alg., v. 10, pp. 360, 400.

Type-species: *Rhynchopsilus apertus* Kieffer. Desig. by Kieffer, 1910.

Brunnicophilus Nixon, 1931. Ent. Rec. and Jour. Variation 43: 83.

Type-species: *Brunnicophilus donisthorpei* Nixon. Orig. desig.

Taxonomy: Nixon, 1957. Roy. Ent. Soc. London, Handb. 8 (3), pp. 13-15.

conicus (Ashmead). Va. (Arlington).

Aclista conica Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 375, 377. ♀.

Genus POLYPEZA Foerster

Polypeza Foerster, 1856. Hym. Stud., v. 2, pp. 123, 127. No species. — Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 385, 387. One species.

Type-species: *Polypeza pergandei* Ashmead. First included species.

Atelopsilus Kieffer, 1908. In Andre, Spec. Hym. Eur. Alg., v. 10, p. 360.

Type-species: *Pantolyta brunnea* Ashmead. Orig. desig.

Propantolyta Kieffer, 1910. In Andre, Spec. Hym. Eur. Alg., v. 10, pp. 697, 709.

Type-species: *Polypeza pergandei* Ashmead. Orig. desig.

Taxonomy: Masner and Sundholm, 1959. Acta Soc. Ent. Cechoslov. 56: 161-164. — Masner, 1964. Acta Soc. Ent. Cechoslov. 61: 131.

alaskensis (Ashmead). Alaska (Muir Inlet).

Spilomicrus alaskensis Ashmead, 1902. Wash. Acad. Sci., Proc. 45: 383. ♀.

brunnea (Ashmead). Wash. (Easton).

Pantolyta brunnea Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 383. ♀.

Taxonomy: Masner, 1964. Acta Soc. Ent. Cechoslov. 61: 131.

pergandei Ashmead. Va. (Arlington).

Polypeza Pergandei Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 387. ♀, ♂.

Genus SYNACRA Foerster

Synacra Foerster, 1856. Hym. Stud., v. 2, pp. 128, 130, 134. No species. — Marshall, 1873.

Cat. Brit. Hym.; Oxyura, p. 10. One species but two names.

Type-species: *Diapria brachialis* Nees. Desig. by Ashmead, 1893.

Artibulus Haliday, 1857. Nat. Hist. Rev., v. 4, p. 173.

Type-species: *Diapria brachialis* Nees. Desig. by Muesebeck and Walkley, 1956.

Neopropria Kieffer, 1904. Soc. Hist. Nat. Metz, Bul. 23: 53.

Type-species: *Neopropria sociabilis* Kieffer. Monotypic.

Prosynacra Kieffer, 1905. Mus. Civ. Stor. Nat. Genova, Ann. (3) 2: 35, 37. No species.

— Kieffer, 1910. Lab. Zool. Portici, Bol. 4: 108. One species.

Type-species: *Prosynacra nigriceps* Kieffer. First included species.

Paratelopsilus Whittaker, 1930. Ent. Soc. Wash., Proc. 32: 73.

Type-species: *Paratelopsilus canadensis* Whittaker. Orig. desig.

Taxonomy: Pschorn-Walcher, 1957. Schweiz. Ent. Gesell., Mitt. 30: 74-76. — Masner, 1964.

Acta Soc. Ent. Cechoslov. 61: 131-132. — Masner, 1967. In Krombein and Burks, U. S.

Dept. Agr., Agr. Monog. 2, Sup. 2, p. 295.

canadensis (Whittaker). B. C. (Chilliwack).

Paratelopsilus canadensis Whittaker, 1930. Ent. Soc. Wash., Proc. 32: 73. ♀.

gracilis (Fouts). Mass. (Petersham). Ecology: Reared with *Pissodes strobi* (Peck).

Prosynacra gracilis Fouts, 1927. Ent. Soc. Wash., Proc. 29: 171. ♀.

insoleta Fouts. Minn. (St. Paul). Ecology: Reared from galls on raspberry roots.

Synacra insoleta Fouts, 1966. Ent. Soc. Wash., Proc. 68: 18. ♀, ♂.

SUBFAMILY DIAPRIINAE

Revision: Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 384-448 (North American species).

— Kieffer, 1910-1911. In Andre, Spec. Hym. Eur. Alg., v. 10, pp. 691-1008 (pp. 691-752 pub. in 1910, pp. 753-1008 in 1911). — Kieffer, 1912 (1911). In Wytsman, Gen. Ins., fasc. 124, pp. 1-72. — Dodd, 1915. Roy. Soc. So. Austral. Trans. 39: 397-443 (Australian species).

— Kieffer, 1916. Das Tierreich, Lief. 44, pp. 3-347 (World fauna).

Genus PARAMESIUS Westwood

Paramesius Westwood, 1832. London, Edinb. and Dublin Phil. Mag. and Jour. Sci. (3) 1: 129.

Type-species: *Paramesius rufipes* Westwood. Monotypic.

Lipoglyptus Crawford, 1910. U. S. Natl. Mus., Proc. 38: 123.

Type-species: *Lipoglyptus primus* Crawford. Orig. desig.

Apramesius Kieffer, 1913. *Insecta* 3: 436.

Type-species: *Apramesius carinatus* Kieffer. Orig. desig.

Taxonomy: Baltazar, 1961. *Philippine Jour. Sci.* 90: 395.

analis (Ashmead). "Carolina," Tex.

Basalys analis Ashmead, 1893. *U. S. Natl. Mus., Bul.* 45: 443, 445. ♀.

clavipes Ashmead. Ont. (Ottawa).

Paramesius clavipes Ashmead, 1888. *Canad. Ent.* 20: 53. ♀.

foveatus (Provancher). Que. (Cap Rouge).

Spilomicrus foveatus Provancher, 1887. *Addit. Corr. Faune Ent. Canada Hym.*, p. 176. "♀"

= ♂. Placement in *Paramesius* communicated by L. Masner in correspondence.

laetus Fouts. B. C. (Chilliwack).

Paramesius laetus Fouts, 1927. *Ent. Soc. Wash., Proc.* 29: 170. ♀.

nigriclavis (Fouts). Ont., N. Y.

Apramesius nigriclavis Fouts, 1926. *Ent. Soc. Wash., Proc.* 28: 169. ♀.

oregonensis Ashmead. B. C., Oreg.

Paramesius oregonensis Ashmead, 1893. *U. S. Natl. Mus., Bul.* 45: 392, 395. ♂.

pallidipes Ashmead. D. C., Va., "Carolina."

Paramesius pallidipes Ashmead, 1893. *U. S. Natl. Mus., Bul.* 45: 392, 395. ♀, ♂.

parvulus Ashmead. D. C., Va.

Paramesius parvulus Ashmead, 1893. *U. S. Natl. Mus., Bul.* 45: 392, 393. ♀.

spinosus Ashmead. D. C., Va.

Paramesius spinosus Ashmead, 1893. *U. S. Natl. Mus., Bul.* 45: 392, 394. ♀, ♂.

utahensis Ashmead. Utah (Utah Lake).

Paramesius utahensis Ashmead, 1893. *U. S. Natl. Mus., Bul.* 45: 392, 394. ♀.

Genus ENTOMACIS Foerster

Entomacis Foerster, 1856. *Hym. Stud.*, v. 2, pp. 121, 123. No species. — Marshall, 1873.

Cat. Brit. Hym.; *Oxyura*, p. 10. Two species.

Type-species: *Diapria (Glyphidopria) platyptera* Haliday. Desig. by Muesebeck and Walkley, 1951.

Hemilexis Foerster, 1856. *Hym. Stud.*, v. 2, pp. 122, 123, 127. No species. — Ashmead, 1887. Catad. Ent. 19: 196. One species.

Type-species: *Hemilexis mellipetiolata* Ashmead. First included species.

Glyphidopria Haliday, 1857. *Nat. Hist. Rev.*, v. 4, p. 172. Proposed as a subgenus of *Diapria* Latreille.

Type-species: *Diapria (Glyphidopria) platyptera* Haliday. Desig. by Muesebeck and Walkley, 1951.

Hemilexodes Ashmead, 1893. *U. S. Natl. Mus., Bul.* 45: 386, 399.

Type-species: *Hemilexodes floridana* Ashmead. Orig. desig.

Adeliopria Ashmead, 1902. *Biol. Bul.* 3: 15.

Type-species: *Adeliopria longii* Ashmead. Orig. desig.

Taxonomy: Masner, 1964. *Acta Soc. Ent. Cechoslov.* 61: 134. — Sundholm, 1970. *South African Anim. Life* 14: 321-324.

ambigua (Brues). Conn. (Colebrook). Ecology: Taken in nest of *Aphaenogaster rudis picea* (Emery).

Hemilexodes ambigua Brues, 1903. *Amer. Ent. Soc., Trans.* 29: 126. ♀.

californica (Ashmead). Wash., Calif. Host: *Forcipomyia* sp.

Hemilexis californica Ashmead, 1893. *U. S. Natl. Mus., Bul.* 45: 389, 390. ♂.

canadensis (Harrington). Canada.

Hemilexes canadensis Harrington, 1899. *Roy. Soc. Canada, Trans.* (2) 5: 201. ♀.

floridana (Ashmead). Fla. (Jacksonville).

Hemilexodes floridana Ashmead, 1893. *U. S. Natl. Mus., Bul.* 45: 400. ♀. The male mentioned by Ashmead is a species of Aphidiidae.

longii (Ashmead). Tex. (Austin). Host: *Forcipomyia wheeleri* (Long) in an old ant nest.

Adeliopria longii Ashmead, 1902. *Biol. Bul.* 3: 15. ♀, ♂.

Taxonomy: Masner 1964. Acta Soc. Ent. Cechoslov. 61: 134-135.

mellipetiolata (Ashmead). Fla.

Hemilexis mellipetiolata Ashmead, 1887. Canad. Ent. 19: 196. "♂" = ♀.

Hemilexis mellipetiolata Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 389, 390. Emend.

subemarginata (Ashmead). D. C., Va.

Hemilexis subemarginata Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 389. ♀, (male misdet.).

Genus HOPLOPRIA Ashmead

Hoplopria Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 385, 386, 388.

Type-species: *Hoplopria pulchripennis* Ashmead. Orig. desig.

No Nearctic species have been described, but the collection of the U. S. National Museum of Natural History contains unnamed specimens, identified by L. Masner as belonging to this genus, from Md., S. C., and Fla.

Genus SPILOMICRUS Westwood

Spilomicrus Westwood, 1832. London, Edinb. and Dublin Phil. Mag. and Jour. Sci. (3) 1: 129.

Type-species: *Spilomicrus stigmatalis* Westwood. Monotypic.

Chlidonia Herrich-Schaeffer, 1838. Faunae Ins. German., Heft 157, p. 24.

Type-species: *Chlidonia moniliata* Herrich-Schaeffer. Desig. by Viereck, 1914.

Loxotropa Foerster, 1856. Hym. Stud., v. 2, pp. 122, 123, 126.

Type-species: *Psilus antennatus* Jurine. Monotypic.

Loxoptera Mani, 1941. Cat. Indian Ins., pt. 26, pp. 39, 40, 41, 47. Error for *Loxotropa* Foerster.

Eriopria Kieffer, 1910. In Andre, Spec. Hym. Eur. Alg., v. 10, pp. 693, 744.

Type-species: *Eriopria nigra* Kieffer. Desig. by Kieffer, 1912.

Tritopria Kieffer, 1910. In Andre, Spec. Hym. Eur. Alg., v. 10, pp. 717, 748.

Type-species: *Tritopria lusitanica* Kieffer. Monotypic.

Cologlyptus Crawford, 1910. U. S. Natl. Mus., Proc. 38: 123.

Type-species: *Cologlyptus kiefferi* Crawford. Orig. desig.

Scutellipria Szabo, 1961. Mus. Nat. Hungarici, Ann. Hist.-Nat. 53: 493.

Type-species: *Scutellipria quinquepunctata* Szabo. Orig. desig.

One species of *Spilomicrus* has been reared from the pupa of a syrphid; otherwise there appear to be no reliable records of host association for members of this genus.

Revision: Kieffer, 1916. Das Tierreich, Lief. 44, pp. 283-307.

Taxonomy: Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 385 (Tribe Spilomicrini proposed).

—Masner, 1964. Entomophaga 9: 81-85. —Sundholm, 1970. South African Anim. Life 14: 314-320.

armatus Ashmead. D. C.

Spilomicrus armatus Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 397. ♀.

atriclavus Ashmead. Ont. (Ottawa).

Spilomicrus atriclavus Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 397, 398. ♀.

atropetiolatus (Ashmead). Colo. (Westcliffe).

Ismarus atropetiolatus Ashmead, 1890. Colo. Biol. Assoc., Bul. 1: 11. ♀.

bifoveatus Kieffer. Pa. (Jeannette).

Spilomicrus bifoveatus Kieffer, 1908. Soc. Sci. de Bruxelles, Ann. 32: 40. ♀, ♂.

brevicornis (Ashmead). Colo.

Basalys brevicornis Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 443, 446. ♀.

californicus (Ashmead). Calif. (Santa Cruz Mts.).

Basalys californica Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 443, 446. ♀. The male is the holotype of *Trichopria californiae* (Kieffer), 1916.

flavicornis Ashmead. Va. (Arlington).

Spilomicrus flavicornis Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 397, 398. ♂.

foutsi Masner. N. Y.

Spilomicrus kiefferi Fouts, 1925. Ent. Soc. Wash., Proc. 27: 150. ♀, ♂. Preocc. by Crawford, 1910.

Spilomicrus foutsi Masner, 1967. In Krombein and Burks, U. S. Dept. Agr., Agr. Monog. 2, Sup. 2, p. 289. N. name.

ruficornis (Provancher). Canada.

Basalys ruficornis Provancher, 1881. Nat. Canad. 12: 261. ♂.

Taxonomy: Masner, 1969. Nat. Canad. 96: 778.

unifoveatus Kieffer. Pa. (Jeanette).

Spilomicrus unifoveatus Kieffer, 1908. Soc. Sci. de Bruxelles, Ann. 32: 41. ♀.

virginicus Fouts. Va. (Falls Church). Host: *Xylota bicolor* Loew.

Spilomicrus virginicus Fouts, 1926. Ent. Soc. Wash., Proc. 28: 168. ♀.

Genus PENTAPRIA Kieffer

Pentapria Kieffer, 1905 (October). Genova Mus. Civ. Stor. Nat., Ann. (3) 2: 34. No species.

—Kieffer, 1905 (November). Soc. Hist. Nat. Metz (2) 12: 105. One species.

Type-species: *Pentapria conjugens* Kieffer. First included species.

Xenopria Fouts, 1939. Ent. Soc. Wash., Proc. 41: 260.

Type-species: *Xenopria columbiana* Fouts. Orig. desig.

Taxonomy: Masner, 1964. Acta Soc. Ent. Cechoslov. 61: 134.

columbiana (Fouts). B. C. (Kootenay Natl. Park). Host: A species of Stratiomyidae.

Xenopria columbiana Fouts, 1939. Ent. Soc. Wash., Proc. 41: 261. ♀, ♂.

nigripes (Fouts). Wyo. (Saratoga).

Xenopria nigripes Fouts, 1939. Ent. Soc. Wash., Proc. 41: 262. ♀.

punctata (Fouts). Md. (Cabin John).

Xenopria punctata Fouts, 1939. Ent. Soc. Wash., Proc. 41: 263. ♀.

Genus ANEURHYNCHUS Westwood

Aneurhynchus Westwood, 1832. London, Edinb. and Dublin Phil. Mag. and Jour. Sci. (3) 1: 129.

Type-species: *Aneurhynchus galesiformis* Westwood. Monotypic.

Anenrynchus Brulle, 1846. In Lepeletier, Hist. Nat. Ins. Hym., v. 4, p. 612. Emend.

Aneurhynchus Marshall, 1873. Cat. Brit. Hym.; Oxyura, p. 11. Emend.

Glyptonota Foerster, 1856. Hym. Stud., v. 2, pp. 122, 126. No species. —Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 401. One species.

Type-species: *Glyptonota nigriclavata* Ashmead. First included species.

Revision: Kieffer, 1916. Das Tierreich, Lief. 44, pp. 329-338.

Taxonomy: Masner and Sundholm, 1959. Acta Soc. Ent. Cechoslov. 56: 161-168.

floridanus Ashmead. Fla.

Aneurhynchus floridanus Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 404, 405. ♂.

mellipes Ashmead. Ont. (Ottawa).

Aneurhynchus mellipes Ashmead, 1888. Canad. Ent. 20: 52. ♀.

nigriclavatus (Ashmead). D. C.

Glyptonota nigriclavata Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 401. ♀.

unifoveatus Kieffer. Pa. (Jeanette).

Aneurhynchus unifoveatus Kieffer, 1908. Soc. Sci. de Bruxelles, Ann. 32: 41. ♂.

virginicus Ashmead. W. Va. (Harpers Ferry).

Aneurhynchus virginicus Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 404, 405. ♂.

Genus PSILUS Panzer

Psilus Panzer, 1801. Faunae Ins. German., Heft 83, no. 11.

Type-species: *Psilus cornutus* Panzer. Monotypic.

Galesus Haliday, 1829. In Curtis, Guide Brit. Ins., column 108.

Type-species: *Psilus cornutus* Panzer. Monotypic. Three species were listed but two of them were *nomina nuda*.

Coptera Say, 1836. Boston Jour. Nat. Hist. 1: 281.

Type-species: *Coptera polita* Say. Monotypic.

Anisoptera Herrich-Schaeffer, 1940. Nomencl. Ent. v. 2, pp. 57, 69. Preocc. by Berthold, 1827.

Type-species: *Anisoptera egregia* Herrich-Schaeffer. Monotypic.

Laches Gistel, 1848. Naturgesch. Thierr. f. hoh. Schul., p. viii. N. name for *Anisoptera* Herrich-Schaeffer.

Schizogalesus Kieffer, 1911. In Andre, Spec. Hym. Eur. Alg., v. 10, pp. 832, 833. Proposed as a subgenus of *Galesus* Haliday.

Type-species: *Galesus (Schizogalesus) punctatus* Kieffer. Desig. by Muesebeck and Walkley, 1951.

The few species of *Psilus* that have been reared from known hosts are parasites of Diptera, especially of Lonchaeidae and Tephritidae. An African species, *P. silvestrii* (Kieffer), which is a parasite of various tephritids of the genera *Ceratitis* and *Dacus*, was introduced into Hawaii as a possible aid in the control of the Mediterranean fruit fly.

Revision: Kieffer, 1916. Das Tierreich, Lief. 44, pp. 200-235 (World fauna). — Nixon, 1930. Ann. and Mag. Nat. Hist. (10) 6: 399-414 (African species).

Taxonomy: Brues, 1906. Wis. Nat. Hist. Soc., Bul. 4: 150-152 (Key to No. Amer. species).

Biology: Clausen, 1940. Entomophagous Insects, pp. 261-262.

Morphology: Snodgrass, 1941. Smithson. Misc. Collect. 99(4): 38-40 (male genitalia). *atricornis* (Ashmead). Ont., Md., Va., Idaho, Wash. Host: *Lonchaea corticis* Taylor.

Galesus atricornis Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 408, 409. ♀.

autumnalis (Brues). Wis. (Milwaukee County).

Galesus autumnalis Brues, 1906. Wis. Nat. Hist. Soc., Bul. 4: 150, 151. ♀.

clarimontis (Kieffer). Calif. (Claremont).

Galesus clarimontis Kieffer, 1906 (1905). Berlin. Ent. Ztschr. 50: 285. ♂.

microtomus (Kieffer). Calif. (San Mateo).

Galesus microtomus Kieffer, 1906 (1905). Berlin. Ent. Ztschr. 50: 285. ♂.

pilosus (Ashmead). Tex.

Galesus pilosus Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 409, 411. ♂.

politus (Say). Conn., Ont., N. Y., D. C., Md., Fla., Ind. Host: *Rhagoletis cingulata* (Loew), *R. fausta* (O. S.).

Coptera polita Say, 1836. Boston Jour. Nat. Hist. 1: 282. ♂.

punctiger (Fouts). Tex. (Uvalde). Host: *Drosophila* sp.?

Galesus punctiger Fouts, 1926. Ent. Soc. Wash., Proc. 28: 170. ♀, ♂.

quebecensis (Provancher). Que., D. C.

Galesus Quebecensis Provancher, 1881. Nat. Canad. 12: 260. ♂.

texanus (Ashmead). Tex.

Galesus texanus Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 409, 411. ♂.

viereckii (Brues). Conn. (Colebrook).

Galesus viereckii Brues, 1905. Wis. Nat. Hist. Soc., Bul. 3: 187. ♂.

Genus MONELATA Foerster

Monelata Foerster, 1856. Hym. Stud., v. 2, pp. 123, 127. No species. — Marshall, 1873. Cat. Brit. Hym.; *Oxyura*, p. 13. Three species.

Type-species: *Diapria parvula* Nees. Desig. by Ashmead, 1893.

Corynopria Haliday, 1857. Nat. Hist. Rev., v. 4, p. 170. Proposed as a subgenus of *Diapria* Latreille.

Type-species: *Diapria petiolaris* Nees. Desig. by Muesebeck and Walkley, 1951.

Entomopria Kieffer, 1912 (1911). In Wytsman, Gen. Ins., fasc. 124, pp. 4, 18.

Type-species: *Corynopria solida* Thomson. Monotypic.

There appear to be no published records of host association for any species of this genus.

Taxonomy: Pschorn-Walcher, 1956. Schweiz. Ent. Gesell., Mitt. 29: 58-67.

hirticollis Ashmead. Ont. (Ottawa).

Monelata hirticollis Ashmead, 1888. Canad. Ent. 20: 54. ♀.

mellicollis Ashmead. Fla. (Jacksonville).

Monelata mellicollis Ashmead, 1887. Canad. Ent. 19: 197. ♀.

nigra Whittaker. B. C. (Hollyburn).

Monelata nigra Whittaker, 1930. Ent. Soc. Wash., Proc. 32: 133. ♀.

Genus BASALYS Westwood

Bsalys Westwood, 1833. London, Edinb. and Dublin Phil. Mag. and Jour. Sci. (3) 3: 343.

Type-species: *Bsalys funipennis* Westwood. Monotypic.

Tropidopsis Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 386, 402. Preocc. by Brauer and Bergenstamm, 1889.

Type-species: *Tropidopsis clavata* Ashmead. Orig. desig.

Ceratopria Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 407, 428.

Type-species: *Ceratopria longiceps* Ashmead. Orig. desig.

Acidopria Kieffer, 1913. Insecta 3: 442.

Type-species: *Acidopria varicornis* Kieffer. Desig. by Kieffer, 1916.

Nesopria Muesebeck and Walkley, 1956. U. S. Natl. Mus., Proc. 105: 374. N. name for *Tropidopsis* Ashmead.

A North American form was reared from a species of Anthomyiidae and another was found in the nest of a bee. There is also a record of a European species having been collected in an ant nest. Otherwise there seems to be nothing in the literature concerning the habits or host relations of members of this genus.

Revision: Kieffer, 1916. Das Tierreich, Lief. 44, pp. 192-200.

Taxonomy: Sundholm, 1960. Opusc. Ent. 25: 221. — Masner, 1964. Entomophaga 9: 85-86.
ashmeadianus (Kieffer). "Canada."

Loxotropa ashmeadiana Kieffer, 1916. Das Tierreich, Lief. 44, pp. 171, 190. ♀.

californicus (Ashmead). Calif. (Santa Cruz Mts.).

Loxotropa californica Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 413, 415. ♀.

Basalytis barda Masner and Muesebeck, 1968. U. S. Natl. Mus. Bul. 270: 8. Unnecessarily proposed as a n. name for *Loxotropa californica* Ashmead.

columbianus (Ashmead). Md., D. C., Va. Ecology: Taken in nest of *Lasioglossum pruinosum* (Robertson).

Loxotropa columbiana Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 413. ♀.

Loxotropa ruficornis Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 413, 414. ♂. Preocc. by Thomson, 1858.

Loxotropa ashmeadi Kieffer, 1911. In Andre, Spec. Hym. Eur. Alg., v. 10, p. 923. N. name for *L. ruficornis* Ashmead.

Taxonomy: Fouts, 1927. Ent. Soc. Wash., Proc. 29: 167.

Biology: Melander and Brues, 1903. Biol. Bul. 5: 9, 23.

flavipes (Ashmead). Md., D. C., Va., Ill.

Loxotropa flavipes Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 413, 415. ♀, ♂.

fuscipennis Ashmead. D. C.

Basalytis fuscipennis Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 443, 444. ♂.

ganahlii Dalla Torre. D. C.

Basalytis picipes Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 443, 444. ♂. Preocc. by Nees, 1834.

Basalytis ganahlii Dalla Torre, 1898. Cat. Hym., v. 5, p. 432. N. name.

longiceps (Ashmead). Va. (Arlington).

Ceratopria longiceps Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 429. ♀, (male misdet.).

microtoma Kieffer. Pa. (Sunbury).

Basalytis microtoma Kieffer, 1908. Soc. Sci. de Bruxelles, Ann. 32: 39. ♂.

modestus (Brues). Pa. (Lehigh Gap).

Loxotropa modesta Brues, 1905. Wis. Nat. Hist. Soc., Bul. 3, 188. ♀.

nanus (Ashmead). Fla.

Loxotropa nana Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 413, 415. ♀.

nigrescens (Fouts). Sask., B. C.

Loxotropa nigrescens Fouts, 1927. Ent. Soc. Wash., Proc. 27: 169. ♀.

pegomyiae (Brues). Minn. Host: *Hylemya brassicae* (Bouche).

Loxotropa pegomyiae Brues, 1907. Extr. from Rpt. Minn. State Ent., p. 1. ♀, ♂.

pusillus (Ashmead). D. C., Va.

Ceratopria pusilla Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 429, 430. ♀.

utahensis Ashmead. Utah (Canyon City).

Basalys utahensis Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 443, 444. ♂.

Genus IDIOTYPA Foerster

Idiotypa Foerster, 1856. Hym. Stud., v. 2, pp. 122, 125. No species. — Marshall, 1873. Cat.

Brit. Hym.; *Oxyura*, p. 11. Two species.

Type-species: *Diapria (Mionopria) maritima* Haliday. Desig. by Ashmead, 1893.

Mionopria Haliday, 1857. Nat. Hist. Rev., v. 4, p. 172. Proposed as a subgenus of *Diaprla* Latreille.

Type-species: *Diapria (Mionopria) maritima* Haliday. Monotypic.

pallipes Fouts. N. Y. (McLean).

Idiotypa pallipes Fouts, 1925. Ent. Soc. Wash., Proc. 27: 102. ♀.

Genus TRICHOPRIA Ashmead

Trichopria Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 407, 431.

Type-species: *Trichopria pentaplasta* Ashmead. Orig. desig.

Phaenopria Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 407, 436.

Type-species: *Phaenopria minutissima* Ashmead. Orig. desig.

Planopria Kieffer, 1908. Soc. Hist. Nat. Metz, Bul. 25: 19.

Type-species: *Diapria californica* Ashmead. Desig. by Muesebeck and Walkley, 1951.

Orthopria Kieffer, 1911. In Andre, Spec. Hym. Eur. Alg., v. 10, pp. 983, 984.

Type-species: *Diapria californica* Ashmead. Desig. by Muesebeck and Walkley, 1951.

Ashmeadopria Kieffer, 1912 (1911). In Wytsman, Gen. Ins., fasc. 124, pp. 8, 10, 59.

Type-species: *Diapria verticillata* Latreille. Desig. by Mani, 1941.

Rhopalopria Kieffer, 1912 (1911). In Wytsman, Gen. Ins., fasc. 124, pp. 8, 61.

Type-species: *Rhopalopria vulgaris* Kieffer. Monotypic.

Neodiapria Kieffer, 1916. Das Tierreich, Lief. 44, pp. xxi, 346.

Type-species: *Tropidopria erynniae* Kieffer. Monotypic.

Apparently the species of this genus are very numerous, most of them still undescribed. They are parasites of Diptera, including members of the families Tephritidae, Tachinidae, Syrphidae, Ephydriidae, Stratiomyidae, Calliphoridae, Sarcophagidae, Drosophilidae, Glossinidae, Tabanidae, Chloropidae, Agromyzidae and Sciomyzidae.

Revision: Kieffer, 1916. Das Tierreich, Lief. 44, pp. 52-65 and 77-146.

Taxonomy: Mani, 1941. Cat. Indian Ins., pt. 26, pp. 44-47. — Sundholm, 1960. Opusc. Ent. 25:

218-222. — Masner, 1964. Acta Soc. Ent. Cechoslov. 61: 136. — Masner, 1965. Brit. Mus.

(Nat. Hist.), Bul., Ent., Sup. 1, p. 40.

Biology: Cros, 1935. Soc. d'Hist. Nat. de l'Afrique du Nord, Bul. 26: 131-136.

abdominalis Fouts. N. J. (Riverton).

Trichopria (Trichopria) abdominalis Fouts, 1926. Ent. Soc. Wash., Proc. 28: 174. ♀.

acutiventris (Brues). Tex. (near Austin). Ecology: In nest of *Labidus coecus* (Latreille).

Phaenopria acutiventris Brues, 1902. Amer. Nat. 36: 372. ♀.

affinis (Ashmead). D. C.

Phaenopria affinis Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 437, 440. ♀.

agromyzae (Fitch). N. Y. Host: *Meoneura vagans* (Fall.).

Diapria agromyzae Fitch, 1856 (1855). N. Y. State Agr. Soc., Trans. 15: 535. ♀, ♂.

angustipennis Muesebeck. N. Y. (Ithaca). Host: *Lemnaphila scotlandae* Cress.

Trichopria angustipennis Muesebeck, 1939. Ent. Soc. Wash., Proc. 41: 60. ♀, ♂.

Biology: Scotland, 1939. Ent. Soc. Amer., Ann. 32: 717.

armata (Ashmead). Ont. (Ottawa).

Loxotropa armata Ashmead, 1888. Canad. Ent. 20: 53. ♀.

atrichomelinæ Muesebeck. N. Y. Host: *Atrichomelina pubera* (Loew).

Trichopria atrichomelinæ Muesebeck, 1972. Ent. News 83: 141. ♀, ♂.

bifovea Kieffer. Calif.

Diapria bifoveata Kieffer, 1906 (1905). Berlin. Ent. Ztschr. 50: 286, 287. ♀. Preocc. by Ashmead, 1895.

Trichopria bifovea Kieffer, 1912 (1911). In Wytsman, Gen. Ins., fasc. 124: 64. N. name.

bifoveolata (Ashmead). W. Va. (Harpers Ferry).

Ceratopria bifoveolata Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 429, 430. ♀.

californiae (Kieffer). Calif. (Santa Cruz Mts.).

Basalys californiae Kieffer, 1916. Das Tierreich, Lief. 44, pp. 193, 199. ♂. See *Spilomicrus californicus* (Ashmead).

californica (Ashmead). Calif. (Santa Cruz Mts.).

Diapria californica Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 421, 422. ♀, ♂.

carolinensis Ashmead. Pa., "Carolina."

Trichopria carolinensis Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 433, 434. ♀.

clarimontis (Kieffer). Calif. (Claremont).

Diapria clarimontis Kieffer, 1906 (1905). Berlin. Ent. Ztschr. 50: 286, 287. ♂.

columbiana (Ashmead). D. C. Va., Mich., Minn. Host: *Hydrellia bergi* Cress., H. sp.

Diapria columbiana Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 422, 424. ♀.

crassiclava (Kieffer). Calif. (San Mateo).

Diapria crassiclava Kieffer, 1906 (1905). Berlin Ent. Ztschr. 50: 287, 288. ♀.

dentata Muesebeck. Ala. (Town Creek). Host: A species of Syrphidae.

Trichopria dentata Muesebeck, 1967. Fla. Ent. 50: 59. ♀, ♂.

discreta Muesebeck and Walkley. D. C.

Diapria tetraplasta Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 422, 426. ♀. Preocc. by Ashmead, 1893.

Trichopria discreta Muesebeck and Walkley, 1951. U. S. Dept. Agr., Agr. Monog. 2, p. 678. N. name.

erythropus (Ashmead). D. C., Va., Fla.

Diapria erythropus Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 421, 423. ♀, ♂.

erythrothorax (Ashmead). Fla. (Jacksonville).

Diapria erythrothorax Ashmead, 1887. Canad. Ent. 19: 196. ♂.

flavipes Ashmead. Va. (Arlington).

Trichopria flavipes Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 433, 436. ♀.

floridana (Ashmead). Fla. (Jacksonville).

Cephalonomia floridana Ashmead, 1887. Canad. Ent. 19: 196. "♂" = ♀.

floridensis (Ashmead). Fla. (Fort George).

Galesus floridensis Ashmead, 1887. Canad. Ent. 19: 195. ♂.

Galesus floridanus Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 410. Error.

foveata (Kieffer). Pa. (Jeanette).

Tropidopria foveata Kieffer, 1908. Soc. Sci. de Bruxelles, Ann. 32: 38. ♂.

haematobiae (Ashmead). Va., Tex. Host: *Haematobia irritans* (L.).

Phaenopria haematobiae Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 437, 438. ♀.

harringtoni (Ashmead). Ont. (Ottawa).

Loxotropa Harringtoni Ashmead, 1888. Canad. Ent. 20: 53. ♀.

hirticollis (Ashmead). Fla., Tex. Host: *Blaesoxipha plinthopyga* (Wied.).

Cephalonomia hirticollis Ashmead, 1887. Canad. Ent. 19: 195. ♀.

Biology: Roberts, 1935. Jour. Agr. Res. 50: 491.

infuscatus (Ashmead). Ont. (Ottawa).

Ceratopria (?) infuscatus Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 429, 431. ♀.

kiefferi Muesebeck, n. name. Calif. (Claremont).

Diapria montana Kieffer, 1906 (1905). Berlin. Ent. Ztschr. 50: 287, 288. ♀. Preocc. by Ashmead, 1893.

megaplasta (Ashmead). Ont. (Ottawa).

Ceratopria megaplasta Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 429, 430.

Ceratopria megaplasta Schulz, 1906. Spolia Hym., p. 151. Emend.

melanocera (Kieffer). Calif. (San Mateo).

Diapria melanocera Kieffer, 1906 (1905). Berlin. Ent. Ztschr. 50: 287, 288. ♀.

minutissima (Ashmead). Fla., Tenn.

Phaenopria minutissima Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 437, 438. ♀.

montana (Ashmead). Calif. (Santa Cruz Mts.).

Phaenopria montana Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 438, 440. ♂.

muscae (Ashmead). Calif.

Diapria muscae Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 422, 426. ♀, ♂.

myoleptae Muesebeck. Fla. (Gainesville). Host: *Myolepta varipes* Loew.

Trichopria myoleptae Muesebeck, 1967. Fla. Ent. 50: 57. ♀, ♂.

nevadensis (Kieffer). Nev. (Ormsby County).

Diapria nevadensis Kieffer, 1906 (1905). Berlin. Ent. Ztschr. 50: 287, 288. ♀.

occidentalis (Fouts). B. C., Calif. Host: *Hippelates collusor* (Townsend).

Phaenopria occidentalis Fouts, 1927. Ent. Soc. Wash., Proc. 29: 168. ♀.

Biology: Legner, Bay and Medved, 1966. Ent. Soc. Amer., Ann. 59: 977-983.

pacifica Ashmead. Calif. (Santa Cruz Mts.).

Trichopria pacifica Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 433, 436. ♀.

paludis Muesebeck. N. Y. (Ithaca). Host: *Lemnaphila scotlandae* Cress.

Trichopria paludis Muesebeck, 1939. Ent. Soc. Wash., Proc. 41: 62. ♀.

Biology: Scotland, 1939. Ent. Soc. Amer., Ann. 32: 717.

parkeri Fouts. Md. (Williamsport).

Trichopria parkeri Fouts, 1920. Ent. Soc. Wash., Proc. 22: 61. ♀, ♂.

parva (Ashmead). D. C.

Phaenopria parva Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 438, 440. ♂.

pentoplasta Ashmead. D. C., Va., Kans.

Trichopria pentoplasta Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 432, 433. ♀, ♂.

pezomachoides (Ashmead). Ont. (Ottawa).

Loxotropa pezomachoides Ashmead, 1888. Canad. Ent. 20: 53. ♀.

Phaenopria aptera Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 437, 439. ♀.

popei (Muesebeck). N. Y., Fla., Mich. Host: *Sepedon fuscipennis* Loew, *Eltgiva sundewalli*

Kloet and Hincks, *Atrichomelina pubera* (Loew), *Dictya* sp.

Phaenopria popei Muesebeck, 1950 (1949). Canad. Ent. 81: 234. ♀, ♂.

Biology: Knutson and Berg, 1963. Canad. Ent. 95: 724-726.

popenoei Ashmead. Kans. (Riley County).

Trichopria Popenoei Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 433, 435. ♀, (male misdet.).

popenoei var. *illinoiensis* Girault, Ill. (Urbana).

Trichopria popenoei var. *illinoiensis* Girault, 1920. U. S. Natl. Mus., Proc. 58: 178. ♀, ♂.

provancheri (Kieffer). Ont. (Ottawa).

Ashmeadopria provancheri Kieffer, 1916. Das Tierreich, Lief. 44, pp. 122, 141. ♀.

rufipes Ashmead. D. C.

Trichopria rufipes Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 433, 434. ♀, (male misdet.).

schwarzii (Ashmead). Md., D. C., Va., Fla.

Phaenopria Schwarzii Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 437, 439. ♀.

tabanivora Fouts. Mass., Sask., Host: *Chrysops mitis* O. S., *Tabanus reinwardtii* Wied., *T. nigrovittatus* Macq.

Trichopria (Trichopria) tabanivora Fouts, 1926. In Cameron, Bul. Ent. Res. 17: 39. ♀, ♂.
tetraplasta (Ashmead). D. C.

Tropidopria tetraplasta Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 417, 420. ♀.

texana (Ashmead). Tex.

Diapria texana Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 421, 424. ♀.

unifoveata (Kieffer). Calif. (Santa Clara County).

Tropidopria unifoveata Kieffer, 1906 (1905). Berlin. Ent. Ztschr. 50: 286. ♂.

utahensis (Ashmead). Utah (Salt Lake).

Diapria utahensis Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 421, 423. ♀.

villosicornis (Kieffer). Nev. (Ormsby County).

Loxotropa villosicornis Kieffer, 1906 (1905). Berlin. Ent. Ztschr. 50: 286. ♂.

virginica (Ashmead). Va.

Diapria virginica Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 422, 426. ♀.

virginiensis Masner. D. C., Va.

Phaenopria virginica Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 437, 438. ♀, ♂. Preocc. by Ashmead, 1893.

Trichopria virginiensis Masner, 1967. In Krombein and Burks, U. S. Dept. Agr., Agr. Monog. 2, Sup. 2, p. 290. N. name.

zimmermanni Ashmead. "Carolina."

Trichopria Zimmermanni Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 432, 434. ♀.

Genus DIAPRIA Latreille

Diapria Latreille, 1796. Precis. Caract. Gen. Ins., p. 110. No species. —Latreille, 1802. Hist. Nat. Crust. Ins., v. 3, p. 309. Two species.

Type-species: *Ichneumon conicus* Fabricius. Desig. by Latreille, 1810.

Tropidopria Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 416.

Type-species: *Ichneumon conicus* Fabricius. Orig. desig.

Tropidobria Brethes, 1927. Ent. Mitt. 16: 334. Error.

Taxonomy: Sundholm, 1960. Opuse. Ent. 25: 215-223.

conica (Fabricius). Que. to N. C., west to Ont. and Colo.; Europe. Host: *Eristalis tenax* (L.).

Ichneumon conicus Fabricius, 1775. Systema Ent. p. 343.

Cynips crassipes Fourcroy, 1785. Entomologia Parisiensis, p. 390.

Biology: Sanders, 1911. Canad. Ent. 43: 48-50. —Maneval, 1937. Mus. Roy. d'Hist. Nat. de Belg., Bul. 13: 7-9.

simulans (Ashmead). Ont. (Ottawa).

Tropidopria simulans Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 417, 419. ♀.

torquata (Provancher). Que., Ont.

Platymischus torquatus Provancher, 1887. Addit. Corr. Faune Ent. Canada Hym., p. 182. ♀.

Taxonomy: Masner, 1969. Nat. Canad. 96: 780.

Genus ACANTHOPRIA Ashmead

Acanthopria Ashmead, 1896. Zool. Soc. London, Proc. 1895: 804.

Type-species: *Acanthopria crassicornis* Ashmead. Orig. desig.

There are no described North American species of this essentially Neotropical genus, but the collection of the U. S. National Museum of Natural History contains specimens of an undescribed species from Texas.

Taxonomy: Ferriere, 1929. Zool. Anz. 82: 166-168.

Genus DOLIOPRIA Kieffer

Doliopria Kieffer, 1910. Ent. Rundschau 27 (8): 48. No species. — Kieffer, 1910. Ent. Rundschau 27 (9): 54. One species.
Type-species: *Doliopria flavipes* Kieffer. First included species.

The meager published records indicate that members of this genus are usually found associated with ant colonies.

Taxonomy: Ferriere, 1929. Zool. Anz., 82: 156, 163-166.

Biology: Ferriere, 1929. Zool. Anz. 82: 156, 163-166.

americana Fouts. Pa., Va.

Doliopria americana Fouts, 1926. Ent. Soc. Wash., Proc. 28: 169. ♀.

Genus AUXOPAEDEUTES Brues

Auxopaedeutes Brues, 1903. Amer. Ent. Soc., Trans. 29: 126.

Type-species: *Auxopaedeutes sodalis* Brues. Monotypic.

Cracinopria Fouts, 1924. Ent. Soc. Wash., Proc. 26: 162.

Type-species: *Trichopria marylandica* Fouts. Orig. desig.

The species of *Auxopaedeutes* are apparently myrmecophiles.

Taxonomy: Masner, 1964. Acta Soc. Ent. Cechoslov. 61: 135-136. —Wing, 1951. Roy. Ent. Soc. London, Trans. 102: 204-205.

crassicornis (Fouts). Md. (Hagerstown).

Cracinopria crassicornis Fouts, 1924. Ent. Soc. Wash., Proc. 26: 163, 164. ♀.

emarginatus (Fouts). Md. (Hagerstown).

Cracinopria emarginata Fouts, 1924. Ent. Soc. Wash., Proc. 26: 163. ♂.

lyriformis Brues. Mass. (Boston). Ecology: In nest of *Solenopsis molesta* (Say).

Auxopaedeutes lyriformis Brues, 1910. Wis. Nat. Hist. Soc., Bul. 8: 82. ♀.

marylandicus (Fouts). Md. (Hagerstown).

Trichopria marylandica Fouts, 1920. Ent. Soc. Wash., Proc. 22: 62. ♀, ♂.

perplexus (Fouts). Md. (Hagerstown).

Cracinopria perplexa Fouts, 1924. Ent. Soc. Wash., Proc. 26: 163, 164. ♀.

sodalis Brues. Tex. Ecology: In nest of *Solenopsis molesta* (Say).

Auxopaedeutes sodalis Brues, 1903. Amer. Ent. Soc., Trans. 29: 127. ♀.

Genus LEPIDOPRIA Kieffer

Lepidopria Kieffer, 1910. In Andre, Spec. Hym. Eur. Alg., v. 10, p. 695. No species.

—Kieffer, 1911. In Andre, Spec. Hym. Eur. Alg., v. 10, p. 869. One species.

Type-species: *Lepidopria pedestris* Kieffer. First included species.

Taxonomy: Wing, 1951. Roy. Ent. Soc. London, Trans. 102: 205.

aberrans Brues. Md. (Hagerstown). Host: *Cryptomeigenia theutis* (Wlkr.)? This species almost certainly does not belong in *Lepidopria*, but the holotype and only known specimen is in poor condition and its proper generic placement has not been determined.

Lepidopria (!) *aberrans* Brues, 1916. Psyche 23: 126. ♀.

Genus BRUESOPRIA Wing

Bruesopria Wing, 1951. Roy. Ent. Soc. London, Trans. 102: 195.

Type-species: *Bruesopria seeversi* Wing. Orig. desig.

americana (Brues). D. C., Tenn. Ecology: In nest of *Paratrechina parvula* (Mayr).

Solenopsis americana Brues, 1936. Psyche 43: 16. ♀.

seeversi Wing. N. C. (Wake County). Ecology: With *Solenopsis molesta* (Say).

Bruesopria seeversi Wing, 1951. Roy. Ent. Soc. London, Trans. 102: 195. ♀.

Genus MYRMECOPRIA Ashmead

Myrmecopria Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 407, 446.

Type-species: *Loxotropa mellea* Ashmead. Orig. desig.
mellea (Ashmead). Fla., Ala. Ecology: In nests of *Eciton* spp.
Loxotropa mellea Ashmead, 1887. Canad. Ent. 19: 196. ♂.
 Taxonomy: Masner, 1964. Acta Soc. Ent. Cechoslov. 61: 132-133. Redescription, with first
 description of female.
 Biology: Wing, 1951. Roy. Ent. Soc. London, Trans. 102: 207.

Psilus terminatus Say, 1836. Boston Jour. Nat. Hist. 1: 282. Ind.

Family SCELIONIDAE

So far as known all species of this family are parasitic in the eggs of other insects or in the
 egg sacs of spiders.

Revision: Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 136-247 (Nearctic fauna). —Kieffer, 1908.
 Soc. Sci. de Bruxelles, Ann. 32: 111-251. —Kieffer, 1912-1913. In Andre, Spec. Hym. Eur.
 Alg., v. 11, pp. 3-304 (pp. 3-160 pub. in 1912; pp. 161-304 in 1913). —Dodd, 1913. Roy. Soc.
 So. Austral., Trans. 37: 130-181 (Australian fauna). —Kieffer, 1926. Das Tierreich, Lief. 48,
 pp. 1-557 (World fauna).

Taxonomy: Ashmead, 1903. N. Y. Ent. Soc., Jour. 11: 86-94. —Brues, 1909 (1908). In
 Wytsman, Gen. Ins., fasc. 80, pp. 1-59. —Mani, 1941. Cat. Indian Ins., pt. 26, pp. 2-29.

 1971. Soc. Ent. Unionis Soviet., Horae 54: 33-54.

Biology: Kieffer, 1926. Das Tierreich, Lief. 48, pp. 6-8. —Clausen, 1940. Entomophagous
 Insects, pp. 349-357.

SUBFAMILY SCELIONINAE

Revision: Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 167-247. —Kieffer, 1926. Das Tierreich,
 Lief. 48, pp. 264-557.

Taxonomy: Mani, 1941. Cat. Indian Ins., pt. 26, pp. 17-29. —Kozlov, 1970. Ent. Obozr. 49:
 209-214 (English transl.: Ent. Rev. 49: 118-122). —Hellen, 1971. Fauna Fennica 23: 1-25.

Genus SPARASION Latreille

Sparasion Latreille, 1802. Hist. Nat. Crust. Ins., v. 3, p. 316.

Type-species: *Sparasion cephalotes* Latreille. Monotypic.

Oxyurus Lamarck, 1817. Hist. Nat. Anim. sans Vert., v. 4, p. 128. Preocc. by Rafinesque,
 1810.

Type-species: *Sparasion frontalis* Latreille. Desig. by Muesebeck and Walkley,
 1951.

Bebelus Gistel, 1848. Naturgesch. Thierr. f. hoh. Schul., p. x. N. name for *Oxyurus*
 Lamarck.

Sparaison Brues, 1909 (1908). In Wytsman, Gen. Ins., fasc. 80, pp. 41, 56. Error.

The only species for which reliable records of host association are available is parasitic in the
 eggs of the Mormon cricket, *Anabrus simplex* Hald. The North American species have not been
 critically studied; most material in the larger collections is unidentified. Apparently there are
 numerous undescribed species.

Revision: Kieffer, 1926. Das Tierreich, Lief. 48, pp. 282-299.

bakeri Kieffer. Colo.

Sparaison Bakeri Kieffer, 1908. Soc. Sci. de Bruxelles, Ann. 32: 26, 27. ♂.

femorale Kieffer. Nev. (Ormsby County).

Sparasion femorale Kieffer, 1908. Soc. Sci. de Bruxelles, Ann. 32: 26. ♂.

graenicheri Brues. Wis. (Milwaukee).

Sparaison (?) graenicheri Brues, 1906. Wis. Nat. Hist. Soc., Bul. 4: 149. ♀.

gregarium Brues. Md., Va.

Sparaison (?) gregarium Brues, 1907. Wis. Nat. Hist. Soc., Bul. 5: 154. ♀.

humile Kieffer. Pa. (Jeannette).

Sparaison humile Kieffer, 1908. Soc. Sci. de Bruxelles, Ann. 32: 26, 27. ♂.

nigrum Ashmead. Pa., Md., Va.

Sparaison nigrum Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 238, 239. ♀, ♂.

pacificum Ashmead. Wash., Calif.

Sparaison pacificum Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 238, 239. ♂.

pilosum Ashmead. Nev., Wash., Mont., Wyo., Utah. Host: *Anabrus simplex* Hald.

Sparaison pilosum Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 238. ♀, ♂.

Biology: Cowan, 1929. U. S. Dept. Agr., Tech. Bul. 161: 22-23. — Mills, 1942. Mont. Agr. Expt. Sta., Bul. 408: 11-13.

Morphology: Snodgrass, 1941. Smithson. Misc. Collect. 99, pp. 38-40.

Genus SCELIOMORPHA Ashmead

Sceliomorpha Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 210, 211, 239.

Type-species: *Sceliomorpha longicornis* Ashmead. Orig. desig.

There are no described Nearctic species of *Sceliomorpha*, but the Cornell University collection contains an unnamed specimen from Florida, as communicated by L. Masner in correspondence.

Genus SCELIO Latreille

Scelio Latreille, 1805. Hist. Nat. Crust. Ins., v. 13, p. 226.

Type-species: *Scelio rugulosus* Latreille. Desig. by Latreille, 1810.

Scelionus Rafinesque, 1815. Analyse, p. 125. Emend.

Serlion Say, 1828. Contr. Maclur. Lyc. Philadelphia 1: 80. Error.

Scelion Blanchard, 1849. In Cuvier, Regne Animal, Ins., v. 2, p. 157; atlas pl. 116, fig. 4.

Emend.

Aleria Marshall, 1874. Ent. Monthly Mag. 10: 208.

Type-species: *Aleria flavibarbis* Marshall. Monotypic.

Caloptenobia Riley, 1878 (1877). U. S. Ent. Comm., Ann. Rpt. 1, p. 306.

Type-species: *Caloptenobia ovivora* Riley. Monotypic.

Discelio Kieffer, 1908. Soc. Sci. de Bruxelles, Ann. 32: 116, 124.

Type-species: *Scelio thoracicus* Ashmead. Desig. by Kieffer, 1926.

Dichacantha Kieffer, 1908. Soc. Sci. de Bruxelles, Ann. 32: 118, 147.

Type-species: *Trimorus luteus* Cameron. Orig. desig.

Enneascelio Kieffer, 1910. Soc. Ent. de France, Bul. 1910: 293.

Type-species: *Enneascelio exaratus* Kieffer. Orig. desig.

Apparently all species of *Scelio* are parasitic in the eggs of grasshoppers.

Revision: Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 241-247 (Nearctic species). — Kieffer, 1926. Das Tierreich, Lieff. 48, pp. 308-345 (World species). — Dodd, 1927. Roy. Soc.

Queensland, Proc. 38: 127-175 (Australian fauna). — Nixon, 1958. Roy. Ent. Soc. London, Trans. 111: 303-313 (African species). — Muesebeck, 1972. Smithson. Contrib. Zool. 102: 1-33 (Nearctic species).

Genus GOVINDA Nixon

Govinda Nixon, 1933. Ann. and Mag. Nat. Hist. (10) 12: 465.

Type-species: *Govinda mila* Nixon. Orig. desig.

Although there are no described North American species of this genus the U. S. National Museum of Natural History contains unnamed specimens, apparently representing several different species, from Texas, Oklahoma, Arizona, and California.

Genus BARYCONUS Foerster

Baryconus Foerster, 1856. Hym. Stud., v. 2, pp. 101, 104. No species. — Ashmead, 1887. Ent. Amer. 3: 118. One species.

Type-species: *Baryconus floridanus* Ashmead. First included species.

Hoploteleia Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 210, 211, 227.

Type-species: *Baryconus floridanus* Ashmead. Orig. desig.

Rhacoteleia Cameron, 1905. Spolia Zeylanica 3: 72.

Type-species: *Rhacoteleia pilosa* Cameron. Monotypic.

Apegusoneura Cameron, 1912. Soc. Ent. 27: 69.

Type-species: *Apegusoneura striolatus* Cameron. Desig. by Muesebeck and Walkley, 1951.

In the unclassified material of *Baryconus* in the collection of the U. S. National Museum of Natural History there are several specimens labeled as having been reared from eggs of katydids (Tettigonidae).

floridanus Ashmead. Va., Fla., Miss., La.

Baryconus floridanus Ashmead, 1887. Ent. Amer. 3: 118. ♂.

noveboracensis (Brues). N. Y. (New York City).

Hoploteleia noveboracensis Brues, 1908. Wis. Nat. Hist. Soc., Bul. 6: 49. ♂.

Genus MACROTELEIA Westwood

Macroteleia Westwood, 1835. Zool. Soc. London, Proc. 3: 70.

Type-species: *Macroteleia cleonymoides* Westwood. Monotypic.

Romilius Walker, 1842. Ann. and Mag. Nat. Hist. 10: 274.

Type-species: *Romilius zotale* Walker. Desig. by Kieffer, 1910.

Macrotelia Agassiz, 1846. Nomencl. Zool., p. 221. Emend.

Baeoneura Foerster, 1856. Hym. Stud., v. 2, pp. 100, 102. No species. — Ashmead, 1887. Ent. Amer. 3: 99. Two species.

Type-species: *Baeoneura floridana* Ashmead. Desig. by Muesebeck and Walkley, 1956.

Baeoneura Ashmead, 1887. Ent. Amer. 3: 99. Error.

Prosapegus Kieffer, 1908. Soc. Sci. de Bruxelles, Ann. 32: 121, 147.

Type-species: *Anteris elongata* Ashmead. Orig. desig.

Stictoteleia Kieffer, 1926. Das Tierreich, Lief. 48, pp. xxix, 272, 546.

Type-species: *Macroteleia virginiensis* Ashmead. Orig. desig.

The very meager records of host association indicate parasitization in the eggs of Tettigoniidae.

Revision: Kieffer, 1926. Das Tierreich, Lief. 48, pp. 520-544.

Taxonomy: Nixon, 1931. Eos 7: 367-379. — Dodd, 1933. Roy. Soc. Queensland, Proc. 44: 75-103. — Masner, 1964. Acta Soc. Ent. Cechoslov. 61: 137-138. — Masner, 1965. Brit. Mus. (Nat. Hist.), Bul. Ent. Sup. 1, p. 81.

elongata (Ashmead). Md., Va., Fla., Ala., Okla., Tex.

Anteris elongata Ashmead, 1887. Ent. Amer. 3: 118. ♂.

famelica (Say). Ind.

Sparasion famelicus Say. 1836. Boston Jour. Nat. Hist. 1: 276.

Taxonomy: Muesebeck, 1972. Smithson. Contrib. Zool. 102, p. 13.

floridana (Ashmead). Md., Fla.

Baeoneura floridana Ashmead, 1887. Ent. Amer. 3: 99. ♀, ♂.

goldsmithi Girault. Ill.

Macroteleia floridana var. *goldsmithi* Girault, 1920. U. S. Natl. Mus., Proc. 58: 180. ♀.

macrogaster Ashmead. Pa., Ga., Tex.

virginiensis (Ashmead). Va.

Anteris virginiensis Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 225. ♂.

Genus CREMASTOBAEUS Ashmead

Cremastobaeus Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 210, 211, 228.

Type-species: *Cremastobaeus bicolor* Ashmead. Orig. desig.

Although no Nearctic species of this genus have been described, L. Masner reports that the Canadian National Collection contains unnamed specimens from Georgia, Florida, Missouri and Texas. There is also an unidentified specimen of *Cremastobaeus* from Alabama in the U. S. National Museum of Natural History.

Genus PROBARYCONUS Kieffer

Probaryconus Kieffer, 1908. Soc. Sci. de Bruxelles, Ann. 32: 118, 165, 168. Proposed as subg. of *Baryconus*.

Type-species: *Baryconus (Probaryconus) spinosus* Kieffer. Monotypic.

Amblyconus Kieffer, 1913. In Andre, spec. Hym. Eur. Alg., v. 11, p. 221. No species.

—Kieffer, 1914. In Andre, Spec. Hym. Eur. Alg., v. 11, p. 325. One species.

Type-species: *Amblyconus quadridens* Kieffer. First included species.

Taxonomy: Masner, 1965. Brit. Mus. (Nat. Hist.), Bul., Ent., Sup. 1, p. 90.

cinctiventris (Ashmead). Fla. (Jacksonville).

Baeoneura cinctiventris Ashmead, 1887. Ent. Amer. 3: 99. ♀.

heidemanni (Ashmead). Va., D. C., Ga., Tex.

Caloteleia Heidemanni Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 212, 213. ♀.

striatus (Ashmead). D. C.

Caloteleia striata Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 212, 213. ♀.

Genus OETHECOCTONUS Ashmead

Cacus Riley, 1893. In Ashmead, U. S. Natl. Mus., Bul. 45: 209, 210, 211, 223. Preocc. by Gistel, 1848.

Type-species: *Cacus oecanthi* Riley. Desig. by Ashmead, 1893.

Oethecoctonus Ashmead, 1900. Canad. Ent. 32: 368. N. name.

Cacellus Ashmead, 1903. N. Y. Ent. Soc., Jour. 11: 92. Unnecessarily proposed as n. name for *Cacus* Riley.

Taxonomy: Masner, 1964. Acta Soc. Ent. Cechoslov. 61: 139-140.

oecanthi (Riley). N. Y., Pa., Va., Mich., Ind., La. Host: *Oecanthus fultoni* Walker, O. *quadripunctatus* Beut.

Cacus oecanthi Riley, 1893. In Ashmead, U. S. Natl. Mus., Bul. 45: 224. ♀, ♂.

Genus LEPTOTELEIA Kieffer

Leptoteleia Kieffer, 1908. Soc. Sci. de Bruxelles, Ann. 32: 120, 163.

Type-species: *Baryconus oecanthi* Riley. Monotypic.

Taxonomy: Kieffer, 1926. Das Tierreich, Lief. 48, pp. 477-479. —Szabo, 1962. Folia Ent. Hungarica (n. s.) 15: 222. —Masner, 1964. Acta Soc. Ent. Cechoslov. 61: 138-139.

oecanthi (Riley). N. Y., Pa., Va., Nebr. Host: *Oecanthus fultoni* Walker, *O. quadripunctatus* Beut.

Baryconus oecanthi Riley, 1893. In Ashmead, U. S. Natl. Mus., Bul. 45: 215. ♀, ♂.

Biology: Udine and Pineckney, 1940. Pa. Acad. Sci., Proc. 14: 81-84.

Genus HOLOTELEIA Kieffer

Holoteleia Kieffer, 1908. Soc. Sci. de Bruxelles, Ann. 32: 120, 169.

Type-species: *Baryconus (Holoteleia) bicolor* Kieffer. Orig. desig. This name, preocc. by *Baryconus bicolor* Harrington, 1899, has been replaced by *Holoteleia nigriceps* Kieffer, 1926.

The following species are placed in *Holoteleia* on the authority of L. Masner, who has examined the holotypes.

bicolor (Harrington), n. comb. Ont., Alta.

Baryconus bicolor Harrington, 1899. Canad. Ent. 31: 79. ♀, ♂.

cincta (Harrington), n. comb. Ont., Sask., Wis.

Baryconus cinctus Harrington, 1899. Canad. Ent. 31: 79. ♀.

parvipennis (Melander and Brues), n. comb. Mass., Ohio.

Caloteleia parvipennis Melander and Brues, 1903. Biol. Bul. 5: 22. ♀.

Genus DUTA Nixon

Duta Nixon 1933. Ann. and Mag. Nat. Hist. (10) 12: 306.

Type-species: *Holoteleia tenuicornis* Dodd. Orig. desig.

Chaetaanteris Priesner, 1951. Inst. Fouad I du Desert, Bul. 1: 136. N. syn. (teste L. Masner in correspondence).

Type-species: *Chaetaanteris serraticeps* Priesner. Orig. desig.

No species of this genus have been described from North America but the U. S. National Museum of Natural History has isolated specimens of *Duta*, apparently representing several different species, from Maryland, District of Columbia, Virginia, Tennessee, Louisiana and Arizona.

Genus OPISTHACANTHA Ashmead

Opisthacantha Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 209, 211, 221.

Type-species: *Opisthacantha mellipes* Ashmead. Orig. desig.

Protrimorus Kieffer, 1908. Soc. Sci. de Bruxelles, Ann. 32: 146.

Type-species: *Trimorus americanus* Ashmead. Monotypic.

Taxonomy: Masner, 1964. Acta Soc. Ent. Cechoslov. 61: 140-141.

americanus (Ashmead). Va. (Arlington).

Trimorus americanus Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 139. ♂.

mellipes Ashmead. D. C.

Opisthacantha mellipes Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 221. ♀, ♂.

Genus PSILANTERIS Kieffer

Psilanteris Kieffer, 1916. Broteria, Rev. Luso.-Brazil., Zool. ser., 14: 177.

Type-species: *Auteris bicolor* Kieffer. Orig. desig.

Taxonomy: Szabo, 1958. Mus. Natl. Hungarici, Ann. Hist.-Nat. 50: 271. —Kozlov, 1971. Soc. Ent. Unionis Sovet., Horae 54: 41.

reticulatus (Fouts). D. C.

Anteris reticulatus Fouts, 1926. Ent. Soc. Wash., Proc. 28: 178. ♀, ♂.

Genus PARIDRIS Kieffer

Paridris Kieffer, 1908. Soc. Sci. de Bruxelles, Ann. 32: 122.

Type-species: *Idris laeviceps* Ashmead. Desig. by Kieffer, 1926.

Paranteris Kieffer, 1910. Soc. Ent. de France, Bul. 1910: 292.

Type-species: *Paranteris nigriclava* Kieffer. Orig. desig.

Taxonomy: Kieffer, 1912. Linn. Soc. London, Trans. (ser. 2), Zool. 15: 65. — Masner, 1965.
Brit. Mus. (Nat. Hist.), Bul., Ent., Sup. 1, p. 88.

brevipennis Fouts. Ill., S. Dak., La., Tex., Calif. Host: *Gryllus* spp. (eggs).

Paridris brevipennis Fouts, 1920. Ent. Soc. Wash., Proc. 22: 66. ♀, ♂.

Biology: Severin, 1935. S. Dak. Agr. Expt. Sta., Bul. 295: 44.

laeviceps (Ashmead). Va. (Arlington).

Idris laeviceps Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 235. ♂.

Idris lericeps Dalla Torre, 1898. Cat. Hym., v. 5, p. 497. Emend.

nigricornis (Brues). Conn. (Colebrook). Ecology: From mixed colony of *Myrmica* sp. and

Leptothorax sp.

Idris nigricornis Brues, 1903. Amer. Ent. Soc., Trans. 29: 125. ♂.

pallipes (Ashmead). Fla. (Jacksonville).

Thoron pallipes Ashmead, 1887. Ent. Amer. 3: 99. ♀.

Genus PSEUDANTERIS Fouts

Pseudanteris Fouts, 1927. Ent. Soc. Wash., Proc. 29: 177.

Type-species: *Pseudanteris insignis* Fouts. Orig. desig.

Taxonomy: Masner, 1964. Acta Soc. Ent. Cechoslov. 61: 141.

insignis Fouts. Ont., Md.

Pseudanteris insignis Fouts, 1927. Ent. Soc. Wash., Proc. 29: 177. ♀.

Genus GRYON Haliday

Gryon Haliday, 1833. Ent. Mag. 1: 271.

Type-species: *Gryon misellus* Haliday. Monotypic.

Acolus Foerster, 1856. Hym. Stud., v. 2, pp. 100, 102. No species. — Thomson, 1859 (1858).

Ofvers. Kongl. Vetensk.-Akad. Forh. 15: 422. Two species.

Type-species: *Acolus opacus* Thomson. Desig. by Ashmead, 1903.

Hadroneurus Foerster, 1856. Hym. Stud., v. 2, pp. 101, 105. No species. — Foerster, 1861.

Programm Realschule Aachen, p. xli. One species.

Type-species: *Hadroneurus excultus* Foerster. First included species.

Plastogryon Kieffer, 1908. Soc. Sci. de Bruxelles, Ann. 32: 119, 141.

Type-species: *Plastogryon foersteri* Kieffer. Desig. by Brues, 1909 (1908).

Psilacolus Kieffer, 1908. Soc. Sci. de Bruxelles, Ann. 32: 179, 180.

Type-species: *Acolus xanthogaster* Ashmead. Desig. by Kieffer, 1926.

Holacolus Kieffer, 1912. In Andre Spec. Hym. Eur. Alg., v. 11, pp. 89, 94, 106.

Type-species: *Acolus opacus* Thomson. Desig. by Muesebeck and Walkley, 1956.

Telenomoides Dodd, 1913. Roy. Soc. So. Austral., Trans. 37: 158, 168.

Type-species: *Telenomoides flavipes* Dodd. Orig. desig.

Hadronotellus Kieffer, 1917. Ent. Meddel. (2) 11: 341.

Type-species: *Hadronotellus pedestris* Kieffer. Orig. desig.

Hadrophanurus Kieffer, 1926. Das Tierreich, Lief. 48, pp. xvi, 15, 130.

Type-species: *Telenomus ? penusylvanicus* Ashmead. Orig. desig.

Heterogryon Kieffer, 1926. Das Tierreich, Lief. 48, pp. xxvi, 271, 446, 448.

Type-species: *Plastogryon sagax* Kieffer. Desig. by Muesebeck and Walkley, 1956.

Holacolus Risbec, 1950. Trav. Lab. d'Ent. du Sect. Soudanais de Recherches Agron., p. 577.

Error for *Holacolus* Kieffer.

The species of *Gryon* are parasites in the eggs of Hemiptera, especially those of the family Coreidae.

- Revision: Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 229-234 (North American species).
 —Kieffer, 1926. Das Tierreich, Lief. 48, pp. 446-473 (World fauna). —Nixon, 1934. Ann. and Mag. Nat. Hist. (10) 14: 290-313 (African species).
- Taxonomy: Brues, 1910. Wis. Nat. Hist. Soc., Bul. 8: 47. —Dodd, 1914. Arch. f. Naturgesch. 80 (A): 18-21. —Masner, 1961. Acta Soc. Ent. Cecoslov. 58: 158-163.
- ajax** (Girault). N. C., Tenn., Ala., La., Ohio, Ill., Mo., Ariz. Host: *Anasa tristis* (DeG.).
Hadronotus ajax Girault, 1920. U. S. Natl. Mus., Proc. 58: 181. ♀, ♂.
 Biology: Schell, 1943. Ent. Soc Amer., Ann. 36: 625-635.
- anasae** (Ashmead). Fla. Host: *Anasa tristis* (DeG.), *Euthochtha galeator* (F.).
Telenomus anasae Ashmead, 1887. U. S. Dept. Agr., Div. Ent., Bul. 14: 23. ♀, ♂.
- atriscapus** (Gahan). Tex. Host: *Narnia pallidicornis* Stal, *N. femorata* Stal, *Leptoglossus phyllopus* (L.).
Hadronotus atriscapus Gahan, 1927. U. S. Natl. Mus., Proc. 71 (4): 37. ♀, ♂.

- xanthogaster** (Ashmead). D. C.
Acolus xanthogaster Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 174. ♀.

Genus MIROTELEONOMUS Dodd

Mirotelenomus Dodd, 1913. Roy. Soc. So. Austral., Trans. 37: 158, 173.

Type-species: *Mirotelenomus abnormis* Dodd. Monotypic.

Microtelenomus Kieffer, 1926. Das Tierreich, Lief. 48, pp. 15, 19. Error for *Mirotelenomus* Dodd.

There are no described North American species of this genus but a specimen of an undescribed species, from California, has been referred to *Mirotelenomus* by Masner.

Genus EMBIDOBIA Ashmead

Embidoobia Ashmead, 1895. Trinidad Field Naturalists' Club, Jour. 2: 264.

Type-species: *Embidoobia urichi* Ashmead. Monotypic.

Eflatounina Priesner, 1951. Inst. Fouad I du Desert, Bul. 1: 126.

Type-species: *Eflatounina gyrontoides* Priesner. Orig. desig.

The species of this genus are parasitic in the eggs of Embioptera. No North American species of *Embidoobia* has been described but the U. S. National Museum of Natural History has an undescribed species from Texas which has been referred to this genus by Masner.

Taxonomy: Dodd, 1939. Linn. Soc. N. S. Wales, Proc. 64: 339-344. — Masner, 1964. Acta Soc. Ent. Cechoslov. 61: 142-144. — Masner, 1968. Natal Mus., Ann. 20: 197. — Kozlov, 1970. Ent. Obozr. 49: 213 (English transl.: Ent. Rev. 49: 119-120). — Masner and Dessart, 1972. Canad. Ent. 104: 505-506.

Genus TIPHODYTES Bradley

Limnodytes Marchal, 1900. Soc. Ent. de France, Ann. 69: 171, 174. Preocc. by Dumeril and Bibron, 1841.

Type-species: *Limnodytes gerriphagus* Marchal. Orig. desig.

Tiphodytes Bradley, 1902. Canad. Ent. 34: 179. N. name.

Hungaroscelio Szabo, 1957. Folia Ent. Hungarica (n. s.) 10: 289.

Type-species: *Hungaroscelio kaszabi* Szabo. Orig. desig.

Members of this genus are parasitic in the eggs of certain aquatic insects.

Taxonomy: Masner and Kozlov, 1965. Acta Ent. Bohemoslov. 62: 292.

Biology: Marchal, 1900. Soc. Ent. de France, Ann. 69: 171-173. — Matheson and Crosby, 1912. Ent. Soc. Amer., Ann. 5: 67-68. — Henriksen, 1918. Ent. Meddel. 12: 142-143. — Martin, 1928. Ent. Amer. 8 (n. s.): 131-143.

gerriphagus (Marchal). Ont., Maine, N. Y., Mich., Calif.; Europe. Host: *Gerris* sp., *Trepobates* sp.

Limnodytes gerriphagus Marchal, 1900. Soc. Ent. de France, Ann. 69: 172, 175. ♀, ♂.

Hungaroscelio kaszabi Szabo, 1957. Folia Ent. Hungarica (n. s.) 10: 290. ♂.

Genus THORON Haliday

Thoron Haliday, 1833. Ent. Mag. 1: 271.

Type-species: *Thoron metallicus* Haliday. Monotypic.

metallicus Haliday. Que., Ont., Mass.; Europe. Host: *Nepa cinerea* L.

Thoron metallicus Haliday, 1833. Ent. Mag. 1: 272.

Biology: Jansson, 1939. Entomologbladet 3: 13.

Genus IDRIS Foerster

Idris Foerster, 1856. Hym. Stud. v. 2, pp. 102, 105.

Type-species: *Idris flavigornis* Foerster. Monotypic.

Acoloides Howard, 1890. U. S. Dept. Agr., Insect Life 2: 269.

Type-species: *Acoloides saitidis* Howard. Monotypic.

Megacolus Priesner, 1951. Inst. Fouad I du Desert, Bul. 1: 121. Preocc. by Cameron, 1903.

Type-species: *Megacolus desertorum* Priesner. Monotypic.

Philoplanes Muesebeck and Walkley, 1956. U. S. Natl. Mus., Proc. 105: 384. N. name for *Megacolus* Priesner.

The species of *Idris* are parasitic in the egg sacs of spiders.

Taxonomy: Masner, 1961. Acta Soc. Ent. Cechoslov. 58: 163-166. — Szabo, 1965. Mus. Natl. Hungarici, Ann. Hist.-Nat. 57: 367-373.

bicolor (Ashmead). Ont. (Ottawa).

Acoloides bicolor Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 170, 172. ♀.

emertonii (Howard). Mass., Conn.

Aculoides emertonii Howard, 1891. U. S. Dept. Agr., Insect Life 4: 202. ♀.
floridensis (Fouts). Fla. (Orlando).

Aculoides floridensis Fouts, 1927. Ent. Soc. Wash., Proc. 29: 179. ♀.

howardii (Ashmead). D. C., Ind., Mich.

Aculoides Howardii Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 170, 171. ♀.

melleus (Ashmead). Va. (Arlington).

Aculoides melleus Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 170, 172. ♀.

saitidis (Howard). Ont., Pa., Ind., Nebr. Ariz. Host: *Habrocestum pulex* (Hentz), *Phidippus opifex* (McCook).

Aculoides saitidis Howard, 1890. U. S. Dept. Agr., Insect Life 2: 270. ♀, ♂.

Taxonomy: Masner, 1964. Acta Soc. Ent. Cechoslov. 61: 142.

seminiger (Ashmead). Ont. (Ottawa).

Aculoides seminiger Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 170, 173. ♀.

subapterus (Ashmead). Ont. (Ottawa).

Aculoides subapterus Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 170, 173. ♀.

Genus CERATOBAEUS Ashmead

Ceratobaeus Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 167, 175.

Type-species: *Ceratobaeus cornutus* Ashmead. Orig. desig.

The species of this genus are parasitic in spider egg sacs.

binotatus Ashmead. Md., D. C., Ind., Ont.

Ceratobaeus binotatus Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 176. ♀.

cornutus Ashmead. D. C.

Ceratobaeus cornutus Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 176. ♀.

Genus BAEUS Haliday

Baeus Haliday, 1833. Ent. Mag. 1: 270.

Type-species: *Baeus seminulum* Haliday. Monotypic.

Hyperbaeus Foerster, 1856. Hym. Stud., v. 2, p. 144. Unnecessarily proposed as a n. name for *Baeus* Haliday, which Foerster thought to be preoccupied by *Baea* Commerson in Botany.

Psilobaenus Kieffer, 1926. Das Tierreich, Lief. 48, pp. xvii, 132, 151.

Type-species: *Baeus curvatus* Kieffer. Monotypic.

The species of *Baeus* are spider-egg parasites.

Revision: Kieffer, 1926. Das Tierreich, Lief. 48, pp. 146-151.

Taxonomy: Gahan, 1924. U. S. Natl. Mus., Proc. 65 (4): 20. —Masner, 1965. Brit. Mus. (Nat. Hist.), Bul., Ent. Sup. 1, p. 67.

americanus Howard. Que., N. Y., Ont., Ohio.

Baeus americanus Howard, 1890. U. S. Dept. Agr., Insect Life 2: 270. ♀.

latrodecti Dozier. Md., S. C., Mo., La., Kans., Tex., Calif.; West Indies, Hawaii. Host: *Latrodectus mactans* (F.).

Baeus latrodecti Dozier, 1931. Ent. Soc. Wash., Proc. 33: 27. ♀, ♂.

Baeus californicus Pierce, 1939 (1938). So. Calif. Acad. Sci., Bul. 37: 101, 103. ♀, ♂.

Biology: Pemberton and Rosa, 1940. Hawaii. Planters Rec. 44: 73-80.

minutus Ashmead. Ont. (Ottawa).

Baeus minutus Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 178. ♀.

niger Ashmead. Ont., D. C.

Baeus niger Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 178. ♀.

Taxonomy: Harrington, 1901. Canad. Ent. 33: 331.

piceus Ashmead. Ont. (Ottawa).

Baeus piceus Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 178, 179. ♀.

rotundiventris Gahan. Ohio (Middle Bass Isl.).

Baeus rotundiventris Gahan, 1924. U. S. Natl. Mus., Proc. 65 (4): 20. ♀, ♂.

zabriskiei (Ashmead). N. Y.

Acolus Zabriskiei Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 175. ♂.

SUBFAMILY TELEASINAE

Revision: Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 180-208 (North American species).

—Kieffer, 1926. Das Tierreich, Lief. 48, pp. 173-264 (World fauna). —Dodd, 1930. Linn. Soc. N. S. Wales, Proc. 55: 41-91 (Australian fauna). —Nixon, 1936. Ann. and Mag. Nat. Hist. (10) 17: 114-141; 161-191 (African fauna). —Szabo, 1966. Folia Ent. Hungarica (n. s.) 19: 9-108 (Palearctic species).

Genus TELEAS Latreille

Teleas Latreille, 1809. Gen. Crust. Ins., v. 4, p. 32.

Type-species: *Scelio clavicornis* Latreille. Desig. by Latreille, 1810.

There are apparently no reliable published host records for any North American species of *Teleas*.

americanus (Ashmead). Fla. (Jacksonville).

Prosacantha americana Ashmead, 1887. Ent. Amer. 3: 100. ♀.

canadensis Harrington. Que. (Hull).

Teleas canadensis Harrington, 1899. Canad. Ent. 31: 78. ♂.

coxalis Ashmead. Va. (Arlington).

Teleas coxalis Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 199. ♀.

lineaticeps Ashmead. D. C., Va.

Teleas lineaticeps Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 198, 199. ♂.

mandibularis (Ashmead). Fla. (Jacksonville).

Prosacantha mandibularis Ashmead, 1887. Ent. Amer. 3: 117. ♀.

pallidipes Ashmead. N. J.

Teleas pallidipes Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 199, 200. ♂.

Genus TRIMORUS Foerster

Trimorus Foerster, 1856. Hym. Stud., v. 2, pp. 101, 104.

Type-species: *Gryon nanno* Walker. Desig. by Ashmead, 1903.

Trichasius Provancher, 1887. Addit. Corr. Faune Ent. Canada Hym., p. 209.

Type-species: *Trichasius clavatus* Provancher. Monotypic.

Hoplogrypon Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 181, 200.

Type-species: *Prosacantha minutissima* Ashmead. Orig. desig.

Paragrypon Kieffer, 1908. Soc. Sci. de Bruxelles, Ann. 32: 189, 199.

Type-species: *Paragrypon pedestris* Kieffer. Desig. by Kieffer, 1926.

Allogrypon Kieffer, 1910. In Wytsman, Gen. Ins., fasc. 80B, p. 95.

Type-species: *Prosacantha carabororum* Riley. Desig. by Muesebeck and Walkley, 1951.

Hemimorus Cameron, 1912. Soc. Ent. 27: 77.

Type-species: *Hemimorus clavicornis* Cameron. Monotypic.

The species of this genus are very numerous but most of the described North American forms are known only from single specimens. Practically nothing is known concerning the biology and host relations of the group, but the single apparently reliable rearing record suggests parasitization in eggs of Carabidae.

Revision: Fouts, 1948. U. S. Natl. Mus., Proc. 98: 91-148 (North American species).

Taxonomy: Maneval, 1937. Mus. Roy. d'Hist. Nat. de Belg., Bul. 13 (22): 17-27. —Masner, 1964. Acta Soc. Ent. Cechoslov. 61: 144.

schwarzii (Ashmead). D. C.

Prosacantha Schwarzii Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 186, 192. ♀.

sculpturatus Fouts. Md. (Glen Echo).

Trimorus sculpturatus Fouts, 1948. U. S. Natl. Mus., Proc. 98: 100, 129. ♀.

silvaticus Fouts. B. C. (Hollyburn).

Trimorus silvaticus Fouts, 1948. U. S. Natl. Mus., Proc. 98: 101, 132. ♀.

solitarius (Ashmead). Ont. (Ottawa).

Hoplogryon solitarius Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 202, 205. ♂.

striatifrons (Ashmead). Fla. (Jacksonville).

Prosacantha striatifrons Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 187, 188. ♂.

striativentris (Ashmead). D. C.

Prosacantha striativentris Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 187, 197. ♂.

striopunctatus Fouts. Md., Pa.

Trimorus striopunctatus Fouts, 1948. U. S. Natl. Mus., Proc. 98: 98, 111. ♀.

subapterus Fouts. B. C. (Chilliwack).

Trimorus subapterus Fouts, 1948. U. S. Natl. Mus., Proc. 98: 98, 109. ♀.

sulcatus (Kieffer). Tex.

Hoplogryon sulcatus Kieffer, 1904. Arkiv for Zool. 1: 538. ♂.

tenuicornis (Kieffer). Wash., Calif.

Hoplogryon tenuicornis Kieffer, 1906 (1905). Berlin. Ent. Ztschr. 50: 263. ♂.

texanus Fouts. Tex. (Brownwood).

Trimorus texanus Fouts, 1948. U. S. Natl. Mus., Proc. 98: 101, 141. ♀.

tripartitus (Kieffer). Pa. (Jeannette).

Hoplogryon tripartitum Kieffer, 1908. Soc. Sci. de Bruxelles, Ann. 32: 33. ♂.

utahensis (Ashmead). Utah (Park City).

Prosacantha utahensis Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 186, 189. ♀.

varius Fouts. Md. (Cabin John).

Trimorus varius Fouts, 1948. U. S. Natl. Mus., Proc. 98: 99, 120. ♂.

vinctus Fouts. Iowa (Ames).

Hoplogryon similis Fouts, 1924. Ent. Soc. Wash., Proc. 26: 160 ♀. Preocc. by Thomson, 1859.

Trimorus riuctus Fouts, 1948. U. S. Natl. Mus., Proc. 98: 101, 140. N. name.

virginiensis (Kieffer). Va.

Hoplogryon tibialis Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 201, 203. ♀. Preocc. by Foerster, 1841.

Hoplogryon virginianensis Kieffer, 1910. In Wytsman, Gen. Ins., fasc. 80B, p. 98. N. name.

whittakeri Fouts. B. C. (Chilliwack).

Trimorus whittakeri Fouts, 1948. U. S. Natl. Mus., Proc. 98: 101, 138. ♀.

xanthognathus (Ashmead). Fla. (Jacksonville).

Prosacantha xanthognatha Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 187, 197. ♂.

xanthopus Fouts. Md. (Glen Echo).

Trimorus xanthopus Fouts, 1948. U. S. Natl. Mus., Proc. 98: 100, 126. ♀.

Genus TRISACANTHA Ashmead

Trisacantha Ashmead, 1887. Ent. Amer. 3: 117.

Type-species: *Trisacantha americana* Ashmead. Monotypic.

Pentacantha Ashmead, 1888. Canad. Ent. 20: 51. Preocc. by Stal, 1871.

Type-species: *Pentacantha canadensis* Ashmead. Monotypic.

Trissacantha Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 180, 182. Emend.

Propentacantha Kieffer, 1926. Das Tierreich, Lief. 48, pp. xxi, 173, 241. N. name for *Pentacantha* Ashmead.

Host relationships of members of this group are unknown.

americana Ashmead. Fla.

Trisacantha americana Ashmead, 1887. Ent. Amer. 3: 117. ♂.

canadensis (Ashmead). Ont., Kans.

Pentacantha Canadensis Ashmead, 1888. Canad. Ent. 20: 51. ♀.

longicornis (Kieffer). Tex.

Pentacantha longicornis Kieffer, 1904. Arkiv for Zool. 1: 536. ♂.

rufitarsis (Kieffer). Calif. (Santa Clara).

Pentacantha rufitarsis Kieffer, 1906 (1905). Berlin. Ent. Ztschr. 50: 263. ♀.

rugosa Ashmead. Va. (Arlington).

Trissacantha rugosa Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 183. ♂.

striaticeps Kieffer. Tex.

Trissacantha striaticeps Kieffer, 1904. Arkiv for Zool. 1: 535. ♂.

SUBFAMILY TELENOMINAE

Most of the species of this subfamily develop as parasites in the eggs of Lepidoptera or Hemiptera but a few parasitize the eggs of Diptera and Neuroptera.

Family PLATYGASTRIDAE

Members of this family for which host associations are known are mainly parasites of Diptera, and especially of the Cecidomyiidae, but some are important parasites of mealybugs and whiteflies. Occasional species have been reared from wasp larvae of the subfamily Crabroninae, from hymenopterous galls, and from eggs of certain Coleoptera.

Revision: Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 247-330. —Kieffer, 1926. Das Tierreich, Lief. 48, pp. 557-884.

Biology: Kieffer, 1926. Das Tierreich, Lief. 48, pp. 7-10. — Clausen, 1940. Entomophagous Insects, pp. 239-249.

SUBFAMILY INOSTEMMATINAE

Taxonomy: Ashmead, 1903. N. Y. Ent. Soc., Jour. 11: 95-96. — Szabo, 1959. Mus. Natl. Hungarici, Ann. Hist.-Nat. 51: 390. — Kozlov, 1970. Ent. Obozr. 49: 220-222 (English transl.: Ent. Rev. 49: 123-124).

TRIBE INOSTEMMATINI

Genus METACLYSIS Foerster

Metaclysis Foerster, 1856. Hym. Stud., v. 2, pp. 106, 109.

Type-species: *Metaclysis areolatus* Foerster. Monotypic.

Parinostemma Kieffer, 1914. In Andre, Spec. Hym. Eur. Alg., v. 11, p. 355.

Type-species: *Inostemma quinda* Walker. Orig. desig.

Taxonomy: Masner, 1965. Brit. Mus. (Nat. Hist.), Bul., Ent., Sup. 1, p. 131. — Hellen, 1968. Notulae Ent. 48: 45. — Kozlov, 1970. Ent. Obozr. 49: 220 (English transl.: Ent. Rev. 49: 123).

carinata (Ashmead). D. C.

Monocrita carinata Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 253, 254. ♀.

floridana (Ashmead). Fla. (Jacksonville).

Acerota Floridana Ashmead, 1887. Canad. Ent. 19: 128. ♀.

Genus INOSTEMMA Haliday

Inostemma Haliday, 1833. Ent. Mag. 1: 270.

Type-species: *Psilus boscii* Jurine. Monotypic.

Acerota Foerster, 1856. Hym. Stud., v. 2, p. 107. No species. — Ashmead, 1887. Canad. Ent. 19: 128. Two species.

Type-species: *Acerota caryae* Ashmead. Desig. by Muesebeck and Walkley, 1951.

Brachinostemma Kieffer, 1916. Zentbl. f. Bakt., Parasitenk. u. Infektionskrankheiten, Abt. 2, 46: 551.

Type-species: *Brachinostemma mediterraneum* Kieffer. Orig. desig.

Inocerota Szelenyi, 1939. Mus. Nat. Hungarici, Ann. 32 (Zool.): 121.

Type-species: *Inocerota discensus* Szelenyi. Orig. desig.

Revision: Kieffer, 1926. Das Tierreich, Lief. 48, pp. 579-595. — Szelenyi, 1938. Mus. Nat. Hungarici, Ann. 31 (Zool.): 108-128 (Palearctic species).

Taxonomy: Masner, 1964. Acta Soc. Ent. Cechoslov. 61: 146-148.

Biology: Marchal, 1906. Arch. de Zool. Expt. et Gen. 34: 537-573. — Adler, 1908. Ztschr. f. Wiss. Insektenbiol. 4: 306-307. — Myers, 1927. Bul. Ent. Res. 18: 129-133.

americanum (Ashmead). Fla. (Jacksonville).

Allotropa Americana Ashmead, 1887. Canad. Ent. 19: 125. ♂.

Monocrita melanostropha Ashmead, 1887. Canad. Ent. 19: 126. ♀.

Acerota caryae Ashmead, 1887. Canad. Ent. 19: 128. ♀, ♂.

belonocnemae (Ashmead). Fla. (Jacksonville). Host: *Belonocnema treatae* Mayr gall.

Metaclysis belonocnemae Ashmead, 1887. Canad. Ent. 19: 125. ♀.

californicum Ashmead. Calif. (Los Angeles County). Host: Cecidomyiid gall-maker on *Thelypodium integrifolium*.

Inostemma californica Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 257, 259. ♀, ♂.

cedidomyiae (Ashmead). Calif. (Los Angeles County). Host: Cecidomyiid gall-maker on *Ephedra californica*.

Acerota cecidomyiae Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 260, 261. ♂.

horni Ashmead. Fla. (Jacksonville).

Inostemma Horni Ashmead, 1887. Canad. Ent. 19: 126. ♀, ♂.

leguminicola Fouts. N. Y. (Ithaca). Host: *Dasineura leguminicola* (Lint.).

Inostemma leguminicola Fouts, 1923. Ent. Soc. Wash., Proc. 25: 64. ♀.

leonardi (Fouts). N. Y. (McLean Bogs).

Acerota leonardi Fouts, 1925. Ent. Soc. Wash., Proc. 27: 147. ♂.

lintneri Ashmead. Ont., N. Y., D. C.

Inostemma Lintneri Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 257, 259. ♀.

packardi Ashmead. Fla. (Jacksonville).

Inostemma Packardi Ashmead, 1887. Canad. Ent. 19: 127. ♀.

rileyi Ashmead. Fla. (Jacksonville).

Inostemma Rileyi Ashmead, 1887. Canad. Ent. 19: 127. ♀.

Genus ISOSTASIUS Foerster

Isostasius Foerster, 1856. Hym. Stud., v. 2, pp. 106, 109.

Type-species: *Platygaster punctiger* Nees. Monotypic.

Monocrita Foerster, 1856. Hym. Stud., v. 2, pp. 106, 109.

Type-species: *Inostema atinas* Walker. Monotypic.

Trisinostema Kieffer, 1914. In Andre, Spec. Hym. Eur. Alg., v. 11, p. 357.

Type-species: *Inostema braesia* Walker. Orig. desig.

Taxonomy: Masner, 1965. Brit. Mus. (Nat. Hist.), Bul., Ent., Sup. 1, p. 130.

fuscipennis Ashmead. D. C.

Isostasius fuscipennis Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 255. ♀.

musculus Ashmead. Fla. (Jacksonville).

Isostasius musculus Ashmead, 1887. Canad. Ent. 19: 126. ♀.

Genus TETRABAEUS Kieffer

Tetrabaeus Kieffer, 1912. In Andre, Spec. Hym. Eur. Alg., v. 11, p. 87.

Type-species: *Aphanoherus americanus* Brues. Orig. desig.

Crabroborus Muesebeck, 1963. Beitr. z. Ent. 13: 391.

Type-species: *Crabroborus krombeini* Muesebeck. Orig. desig.

Taxonomy: Masner, 1964. Acta Soc. Ent. Cechoslov. 61: 148-149.

americanus (Brues). Que., Md., Wis. Host: *Ectemnius (Hypocrabro) paucimaculatus* (Pack.).

Euplitilis (Corynopus) rufigaster (Pack.), E. (C.) *coarctata modesta* (Roh.).

Aphanoherus americanus Brues, 1908. Wis. Nat. Hist. Soc., Bul. 6: 156. ♀.

Crabroborus krombeini Muesebeck, 1963. Beitr. z. Ent. 13: 392. ♀, ♂.

Biology: Krombein, 1964. Biol. Soc. Wash., Proc. 77: 104-108, fig. 11.

Genus ACEROTELLA Masner

Acerotella Masner, 1964. Acta Soc. Ent. Cechoslov. 61: 148.

Type-species: *Acerota evanescens* Kieffer. Orig. desig.

No North American species of *Acerotella* have been described, but the U. S. National Museum of Natural History has isolated specimens of the genus from Maine, New York, Maryland, and Michigan.

Genus ALLOTROPA Foerster

Allotropa Foerster, 1856. Hym. Stud., v. 2, pp. 106, 109.

Type-species: *Inostemma mecrida* Walker. Monotypic.

The species of *Allotropa* are parasites of mealybugs. Some seem to be important in the control of certain pest species.

ashmeadi Muesebeck. Conn., Md., Va., La. Host: *Pseudococcus comstocki* (Kuw.), *Ferrisia virgata* (Ckll.), *Phenacoccus* sp., *Puto cupressi* (Coleman).

Iphitrichelus americanus Ashmead, 1891 (1890). Ent. Soc. Wash., Proc. 2: 58. *Nom. nud.*

Iphitracelus (!) americanus Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 250. ♂. Preocc. by

Allotropa americana Ashmead, 1887, which is now in *Inostemma*.

Allotropa ashmeadi Muesebeck, 1939. Canad. Ent. 71: 159. N. name.

burrelli Muesebeck. Estab. in Conn., Del., Pa., Va., W. Va., Ohio. Introd. from Japan. Host:

Pseudococcus comstocki (Kuw.).

Allotropa burrelli Muesebeck, 1942. Brooklyn Ent. Soc., Bul. 37: 170. ♀, ♂.

Biology: Clancy, 1944. Jour. Agr. Res. 69: 159-167. —Clausen, 1956. U. S. Dept. Agr., Tech. Bul. 1139: 74-75.

citri Muesebeck. Released and recovered in Calif. but doubtfully estab. Introd. from So. China. Host: *Planococcus citri* (Risso).

Allotropa citri Muesebeck, 1954. Brooklyn Ent. Soc., Bul. 49: 18. ♀, ♂.

convexifrons Muesebeck. Conn., N. Y., N. J., Va.; Japan, USSR. Host: *Pseudococcus comstocki* (Kuw.), *P. longispinus* (Targ.-Tozz.).

Allotropa convexifrons Muesebeck, 1942. Brooklyn Ent. Soc., Bul. 37: 171. ♀, ♂.

Biology: Garman, Brigham, Schread and Smith, 1943. Conn. State Agr. Expt. Sta., Bul. 472: 232. —Haeussler and Clancy, 1944. Jour. Econ. Ent. 37: 503-509. —Shenderovskaya, 1967. Zashch. Rast. 12: 51. (In Russian).

merrilli Muesebeck. Fla., La. Host: *Trionymus* sp. on bald cypress.

Allotropa merrilli Muesebeck, 1954. Brooklyn Ent. Soc., Bul. 49: 20. ♀, ♂.

utilis Muesebeck. N. S., N. H., Vt., Ont., B. C.; Japan. Host: *Phenacoccus aceris* (Sign.), *P. persimilis* Ckll.

Allotropa utilis Muesebeck, 1939. Canad. Ent. 71: 158. ♀, ♂.

Biology: Gilliatt, 1939. Canad. Ent. 71: 160-163. —Marshall and Pickett, 1944. Canad. Ent. 76: 19. —Wishart, 1947 (1946). Ontario Ent. Soc., 77th Ann. Rpt., p. 36. —McLeod, 1954. Ent. Soc. Brit. Columbia, Proc. 50: 19. —Murakami, 1962. Kyushu Univ. Facul. Agr., Sci. Bul. 19: 390-402. —Murakami, 1963. Kyushu Univ. Facul. Agr., Sci. Bul. 20: 229-240.

TRIBE IPHITRACHELINI

The members of this group are set off sharply from the remainder of the Inostemmatinae by their 4-segmented tarsi. Nothing is known concerning their biology or host relations.

Taxonomy: Masner, 1957. Acta Soc. Ent. Cechoslov. 54: 54-61. —Hellen, 1968. Notulae Ent. 48: 45. —Kozlov, 1970. Ent. Obozr. 49: 222 (English transl.: Ent. Rev. 49: 124).

Genus IPHITRACHELUS Walker

Iphitracelus Walker, 1835. Ent. Mag. 3: 273.

Type-species: *Iphitracelus lar* Walker. Monotypic.

Taxonomy: Jackson, 1966. Ent. Soc. Wash., Proc. 68: 265-268.

foutsi Jackson. Md. (Cabin John).

Iphitracelus foutsi Jackson, 1966. Ent. Soc. Wash., Proc. 68: 265. ♀.

SUBFAMILY SCELIOTRACHELINEAE

Two genera of this group occur in North America. One of these, *Fidiobia* Ashmead, has generally been placed in the Inostemmatinae; the other, *Amitus* Haldeman, in the Platygastrinae. In the more recent treatments of these genera, however, the two are considered as being closely allied and as belonging in a distinct section of the family which is currently called the subfamily *Sceliotrachelinae*.

Taxonomy: Brues, 1909 (1908). In Wytsman, Gen. Ins., fasc. 80, pp. 12-13. —Szabo, 1959. Mus. Natl. Hungarici, Ann. Hist.-Nat. 51: 389-396 (proposal of tribal name Amitini for this group). —Masner, 1964. Psyche 71: 8-11. —Kozlov, 1970. Ent. Obozr. 49: 222-223 (English transl.: Ent. Rev. 49: 124-125).

Genus FIDIOBIA Ashmead

Fidiobia Ashmead, 1894. Cincinnati Soc. Nat. Hist., Jour. 17: 170.

Type-species: *Fidiobia flavipes* Ashmead. Monotypic.

Rosnetia Brues, 1908. Wis. Nat. Hist. Soc., Bul. 6: 157.

Type-species: *Rosnetia tritici* Brues. Orig. desig.

Triclavus Brethes, 1916. Buenos Aires Mus. Nac. de Hist. Nat., An. 27: 411.

Type-species: *Triclavus bonariensis* Brethes. Monotypic.

Platyllostropa Szelenyi, 1938. Mus. Natl. Hungarici, Ann. Hist.-Nat. 31 (Zool.): 126.

Type-species: *Platyllostropa gallicola* Szelenyi. Orig. desig.

The species of *Fidiobia*, for which reliable rearing records are available, are parasitic in the eggs of Coleoptera (Curculionidae and Chrysomelidae).

drakei (Ogloblin). Iowa (Ames).

Triclavus drakei Ogloblin, 1944. Ent. Soc. Wash., Proc. 46: 156. ♀.

flavipes Ashmead. N. Y., Pa., Ohio. Host: *Fidia viticida* Walsh.

Fidiobia flavipes Ashmead, 1894. Cincinnati Soc. Nat. Hist., Jour. 17: 171. ♀.

Rosnetia tritici Brues, 1908. Wis. Nat. Hist. Soc., Bul. 6: 157. ♀.

rugosifrons Crawford. Pa., Ind. Host: *Hypera punctata* (F.).

Fidiobia rugosifrons Crawford, 1917 (1916). Insecutor Inscitiae Menstruus 4: 141. ♀, ♂.

Genus AMITUS Haldeman

Amitus Haldeman, 1850. Amer. Jour. Sci. (2)9: 109.

Type-species: *Amitus aleurodinis* Haldeman. Monotypic.

Zacrita Foerster, 1878. Naturh. Ver. Rheinlande, Verh. 35: 46.

Type-species: *Zacrita longicornis* Foerster. Orig. desig.

Passalida Brethes, 1914. Nunquam otiosus, Buenos Aires, p. 2.

Type-species: *Passalida spinifera* Brethes. Orig. desig.

The species of this genus, of which the host relations are known, are parasites of Aleyrodidae.

Taxonomy: Fouts, 1924. U. S. Natl. Mus., Proc. 63 (15): 8-10. —De Santis, 1941. Soc. Brasil.

Agron., Bol. 4: 5. —Debauche, 1947. Soc. Ent. de Belg., Bul. et Ann. 83: 282. —Szabo, 1959.

Mus. Natl. Hungarici, Ann. Hist.-Nat. 51: 389-390. —Masner, 1964. Psyche 71: 9. —Hellen,

1968. Notulae Ent. 48: 46.

aleurodinis Haldeman. Mass., Conn., Pa., N. J., D. C., Fla., Ill., Calif. Host: *Tetraleurodes mori* (Quaint.), *Trialeurodes fernaldi* (Morrill), *Aleuroplatus plumosus* (Quaint.), *Aleurochiton forbesii* (Ashm.).

Amitus aleurodinis Haldeman, 1850. Amer. Jour. Sci. (2)9: 110. ♀, ♂.

Elaptus (!) *aleurodis* Forbes, 1885. Ill. State Entomologist, Rept. 14: 110. ♀.

Anaphes mellicornis Ashmead, 1887. Canad. Ent. 19: 194. ♀.

Taxonomy: Gahan, 1927. U. S. Natl. Mus., Proc. 71 (4): 39.

arcturus Whittaker. B. C. (Hollyburn).

Amitus arcturus Whittaker, 1930. Ent. Soc. Wash., Proc. 32: 69. ♀, ♂.

spiniferus (Brethes). Tex.; Mex., Brazil, Argentina. Host: *Aleurothrixus flocosus* (Maskell).

Passalida spiniferus Brethes, 1914. Nunquam otiosus, Buenos Aires, 1914, p. 3.

SUBFAMILY PLATYGASTRINAE

The species of this subfamily are essentially parasites of Cecidomyiidae; apparently very rarely cynipid or tenthredinid gall-makers are the hosts. Some species are polyembryonic.

Revision: Fouts, 1924. U. S. Natl. Mus., Proc. 63 (15): 1-145 (North American species).

Taxonomy: Kozlov, 1970. Ent. Obozr. 49: 223-224 (English transl.: Ent. Rev. 49: 125-126).

Biology: Marchal, 1906. Arch. de Zool. Expt. et Gen. 34: 573-627.

Genus METANOPEDIAS Brues

Metanopedias Brues, 1910. Amer. Mus. Nat. Hist., Bul. 28: 79.

Type-species: *Metanopedias sicarius* Brues. Monotypic.

Taxonomy: Jackson, 1966. Ent. Soc. Amer., Ann. 59: 734-736. —Jackson and Masner, 1966. Canad. Ent. 98: 1214-1219.

brunneipes (Ashmead). Throughout the U. S. and southeastern Canada; Mexico, Costa Rica, and the Caribbean. Host: Apparently various Cecidomyiid gall-makers.

Trichacis brunneipes Ashmead, 1887. Canad. Ent. 19: 131. ♀.

Trichasis (?) *rubicola* Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 295, 296. ♀, ♂.

Trichasis (?) *arizonicensis* Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 295, 296. ♀, ♂. Preocc. by *Isohombus arizonicensis* Ashmead, 1893, when the latter was placed in *Trichacis*.

Metanopiedias sicarius Brues, 1910. Amer. Mus. Nat. Hist., Bul. 28: 79. ♀.

Genus TRICHACIS Foerster

Trichacis Foerster, 1856. Hym. Stud., v. 2, pp. 108, 115.

Type-species: *Platygaster pisii* Walker. Desig. by Ashmead, 1893.

Trichasis Thomson, 1859. Ofvers. Kongl. Vetensk.-Akad.. Forh. 16: 70, 78. Emend.

Taxonomy: Fouts, 1924. U. S. Natl. Mus., Proc. 63 (15): 13-18.

Biology: Marchal, 1906. Arch. de Zool. Expt. et Gen. 34: 548-557 (Development of the European *T. remulus* (Walker) as a parasite of the Hessian fly, *Mayetiola destructor* (Say)).

arizonicensis (Ashmead). Ariz. (Ft. Huachuca).

Isohombus arizonicensis Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 277. ♀.

cornicola (Ashmead). Mo. (Kirkwood). Host: Cecidomyiid gall-maker on *Cornus pauciflora*.

Synopeas cornicola Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 286, 288. ♀, ♂.

cornuta Fouts. Tex. (Brownwood).

Trichacis cornuta Fouts, 1925. Ent. Soc. Wash., Proc. 27: 93. ♀.

rufipes Ashmead. D. C., Va., Fla., Mo.

Trichasis (?) *rufipes* Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 295. ♀, ♂.

texana Fouts. Tex. (Brownwood).

Trichacis texana Fouts, 1925. Ent. Soc. Wash., Proc. 27: 94. ♀.

virginiensis Ashmead. Va. (Arlington).

Trichasis (?) *virginiensis* Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 295, 297. ♀.

Genus ISOCYBUS Foerster

Isocybus Foerster, 1856. Hym. Stud., v. 2, pp. 108, 114.

Type-species: *Platygaster grandis* Nees. Desig. by Ashmead, 1893.

Revision: Kieffer, 1926. Das Tierreich, Lief. 48, pp. 718-732.

Taxonomy: Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 327-330. —Fouts, 1924. U. S. Natl. Mus., Proc. 63 (15): 10-12.

auripes (Provancher). Que. (Cap Rouge).

Trichacis auripes Provancher, 1888. Addit. Corr. Faune Ent. Canada Hym., p. 403. “♀” = ♂.

Taxonomy: Masner, 1969. Nat. Canad. 96: 783 (Lectotype selected).

canadensis (Provancher). Que., Ont., Mich., Iowa, Tex., Colo. The distribution and synonymy shown here are from the literature and seem open to some doubt.

Platygaster Canadensis Provancher, 1887. Addit. Corr. Faune Ent. Canada Hym., p. 181. ♂.

Monocrita Canadensis Ashmead, 1887. Canad. Ent. 19: 126. “♀” = ♂.

Isocybus nigriclavus Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 328. ♀.

Taxonomy: Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 329. —Fouts, 1924. U. S. Natl. Mus., Proc. 63 (15): 11-12. —Masner, 1969. Nat. Canad. 96: 780.

Genus PLATYGASTER Latreille

Platygaster Latreille, 1809. Gen. Crust. Ins., v. 4, p. 31.

Type-species: *Scelio ruficornis* Latreille. Monotypic.

Epimeces Westwood, 1833. Mag. Nat. Hist. 6: 421. Preocc. by Billberg, 1820.

Type-species: *Epimeces ensifer* Westwood. By elimination, Foerster, 1856.

Isorhombus Foerster, 1856. Hym. Stud., v. 2, pp. 107, 112, 113. No species. —Ashmead, 1887. Canad. Ent. 19:129. One species.

Type-species: *Isorhombus hyalinipennis* Ashmead. First included species.

Hypocampsis Foerster, 1856. Hym. Stud., v. 2, pp. 108, 115. No species. —Thomson, 1859.

Overs. Kongl. Vetensk.-Akad., Forh. 16: 70, 82. Three species.

Type-species: *Hypocampsis hyalinata* Thomson. Desig. by Ashmead, 1903.

Polygnotus Foerster, 1856. Hym. Stud., v. 2, pp. 108, 115.

Type-species: *Platygaster striolatus* Nees. Orig. desig.

Aneuron Brues, 1910. Wis. Nat. Hist. Soc., Bul. 8: 49.

Type-species: *Aneuron unornata* Brues. Orig. desig.

Misocyclops Kieffer, 1914. In Andre, Spec. Hym. Eur. Alg., v. 11, pp. 353, 362.

Type-species: *Platygaster ornatus* Kieffer. Monotypic.

Parepimeces Kieffer, 1926. Das Tierreich, Lief. 48, pp. xxxiv, 563, 760. N. name for *Epimeces* Westwood.

Revision: Fouts, 1924. U. S. Natl. Mus., Proc. 63 (15): 23-108. —Kieffer, 1926. Das Tierreich, Lief. 48, pp. 732-843.

abicornis MacGown and Osgood. Maine. Host: *Dasineura balsamicola* (Lint.).

Platygaster abicornis MacGown and Osgood, 1971. Canad. Ent. 103: 1143. ♀, ♂.

aciculata Ashmead. Pa.

Platygaster aciculatus Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 323, 326. ♂.

actinomeridis (Ashmead). D. C. Host: Cecidomyiid gall-maker on *Verbesina alternifolia*.

Polygnotus actinomeridis Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 302, 317. ♀.

affinis Fouts. Tex. (Brownwood).

Platygaster affinis Fouts, 1925. Ent. Soc. Wash., Proc. 27: 94. ♀.

alnicola (Ashmead). D. C. Host: *Dasineura serrulatae* (O. S.).

Polymelus alnicola Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 278, 283. ♀, ♂.

americana (Ashmead). Fla.

Epimeces americanus Ashmead, 1887. Canad. Ent. 19: 129. ♀, (♂ misdet.).

aneura (Provancher). Que.

Anenyrynchus (!) *aneurus* Provancher, 1887. Addit. Corr. Faune Ent. Canada Hym., p. 176.

"♀" = ♂.

Taxonomy: Masner, 1969. Nat. Canad. 96: 777.

anornata (Brues). N. Y., Mass.

Aneuron anornata Brues, 1910. Wis. Nat. Hist. Soc., Bul. 8: 49. ♀, ♂.

Taxonomy: Masner, 1965. Psyche 72: 301 (Lectotype designated).

antennariae (Ashmead). Wis. (Milwaukee). Host: *Rhopalomyia antennariae* (Whlr.).

Synopeas antennariae Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 286, 288. ♀, ♂.

anura Fouts. Tex. (Brownwood).

Platygaster anura Fouts, 1925. Ent. Soc. Wash., Proc. 27: 94. ♀, ♂.

aphidis Ashmead. N. Y. (Richfield Springs).

Platygaster aphidis Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 323, 325. ♂.

artemisiae (Ashmead). Calif. (Lancaster). Host: Cecidomyiid on *Artemisia californica*.

Polygnotus artemisiae Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 301, 309. ♀, ♂.

astericola (Ashmead). N. H. (Holderness). Host: Cecidomyiid gall-maker on *Aster*.

Polygnotus astericola Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 302, 320. ♀, ♂.

asyntaptae (Ashmead). Ill. (Maywood). Host: *Asynapta* sp. on willow.

Polygnotus asyntaptae Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 302, 315. ♀, ♂.

atrae Fouts. Ariz. (Fort Grand). Host: *Procecidochares atra* (Loew).

Platygaster atrae Fouts, 1924. U. S. Natl. Mus., Proc. 63 (15): 28, 87. ♀, ♂.

atriplicis (Ashmead). Calif., Idaho. Host: Cecidomyiid gall-maker on *Atriplex canescens*.

Polygnotus atriplicis Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 304, 308. ♀, ♂.

attenuata Walker. Ont.; Europe. Host: *Dasineura alopecuri* (Reuter).

Platygaster attenuatus Walker, 1835. Ent. Mag. 3: 245. ♀, ♂.

Biology: Gilbert, 1935. Canad. Ins. Pest Rev. 13: 88. —Graham, 1965. Canada Dept. Agr., Inform. Bul. 4: 54.

baccharicola (Ashmead). Fla., Miss., La. Host: Originally cited as *Cecidomyia baccharicola* Ashm. MS.

Polygnotus baccharicola Ashmead, 1887. Canad. Ent. 19: 132. ♀, ♂.

burkei (Rohwer). Calif. (Placerville). Host: Cecidomyiid on *Pinus ponderosa*.

Polygnotus burkei Rohwer, 1917. U. S. Natl. Mus., Proc. 53: 170. ♀, ♂.

californica (Ashmead). Calif., Idaho. Host: *Rhopalomyia californica* Felt.

Polygnotus californicus Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 302, 321. ♀, ♂.

caryae Ashmead. N. Y. (Nyack). Host: *Caryomyia holotricha* (O. S.).

Platygaster caryae Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 323. ♀, ♂.

coloradensis (Ashmead). Colo., Utah, Idaho. Host: *Rhopalomyia betheliana* Ckll.

Polygnotus coloradensis Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 302, 320. ♀, ♂.

columbiana Fouts. Mo. (Cadet). Host: Cecidomyiid in elder flower bud.

Polygnotus alnicola Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 301, 310. ♀. Preocc. by

Polymecus alnicola Ashmead, 1893, p. 283, when this was placed in *Platygaster*.

Platygaster columbiana Fouts, 1924. U. S. Natl. Mus., Proc. 63 (15): 29, 95. N. name.

compressiventris (Ashmead). D. C.

Polymecus compressiventris Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 278, 282. ♀.

confusa Fouts. Colo.

Ectadius pallipes Ashmead, 1890. Colo. Biol. Assoc., Bul. 1: 9. ♀, ♂. Preocc. by Say, 1829.

Ectadius pallidipes Dalla Torre, 1898. Cat. Hym., v. 5, p. 486. Emend. Preocc. by Dalla Torre, 1898.

Platygaster confusa Fouts, 1924. U. S. Natl. Mus., Proc. 63 (15): 26, 44. N. name.

cynipicola (Ashmead). Va. (Arlington). Host: *Neuroterus quercusbatatus* (Fitch).

Polygnotus cynipicola Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 302, 314. ♀, ♂ = ♀.

diplosidis (Ashmead). Mass. to N. C. and w. to Calif. Host: *Cecidomyia piniinopis* O. S.

Polygnotus diplosidis Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 300, 306. ♀.

Polygnotus pinicola Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 301, 307. ♀, ♂.

Taxonomy: Fouts, 1924. U. S. Natl. Mus., Proc. 63 (15): 58-60.

distincta Fouts. Calif. Host: *Thecodiplosis piniradiatae* (Snow and Mills), *Cecidomyia resinicoloides* Williams.

Platygaster distincta Fouts, 1926. Ent. Soc. Wash., Proc. 28: 176. ♂.

errans Fouts. Fla., Ga., La.

Platygaster errans Fouts, 1924. U. S. Natl. Mus., Proc. 63 (15): 29, 93. ♀.

erythropus (Ashmead). Ont. (Ottawa).

Metaclisia erythropus Ashmead, 1888. Canad. Ent. 20: 51. "♀" = ♂.

europiae (Ashmead). Calif. Host: Cecidomyiid gall-maker on *Eurotia*.

Polygnotus europiae Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 302, 315. ♀.

euurae (Ashmead). Mo. (St. Louis). Host: *Enura s-nodus* Walsh.

Polygnotus euurae Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 304, 318. ♂.

exiguae Fouts. Colo. Host: *Rhabdophaga coloradensis* Felt on *Salix exigua*.

Platygaster exiguae Fouts, 1926. Ent. Soc. Wash., Proc. 28: 175. ♀.

feltii Fouts. Tex. Host: *Walshomyia texana* Felt.

Platygaster feltii Fouts, 1920. Ent. Soc. Wash., Proc. 22: 70. ♀, ♂.

filicaudis Fouts. Fla. (Paradise Key).

Platygaster filicaudis Fouts, 1925. Ent. Soc. Wash., Proc. 27: 95. ♀, ♂.

filicornis (Ashmead). Ont., N. H., D. C., Wis. Host: *Thecodiplosis piniresinosae* Kearby and Benjamin.

Polygnotus filicornis Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 302, 321. ♀, ♂.

flavitarsis Fouts. Md. (Glen Echo).

Platygaster flavitarsis Fouts, 1926. Ent. Soc. Wash., Proc. 28: 176. ♀.

floridensis Ashmead. Fla. (Jacksonville).

Platygaster Floridensis Ashmead, 1887. Canad. Ent. 19: 132. ♀.

fumipennis Fouts. Calif. (San Francisco). Host: Cecidomyiid gall-maker on *Baccharis pilularis*.

Platygaster fumipennis Fouts, 1924. U. S. Natl. Mus., Proc. 63 (15): 29, 87. ♀, ♂.

fuscipennis Fouts. Md. (Glen Echo).

Platygaster fuscipennis Fouts, 1924. U. S. Natl. Mus., Proc. 63 (15): 26, 39. ♀.

gahani Fouts. Calif., Oreg.

Platygaster gahani Fouts, 1924. U. S. Natl. Mus., Proc. 63 (15): 26, 55. ♀.

herrickii Packard. Ont. to N. C. and w. at least to Nebr. Host: *Mayetiola destructor* (Say).

Platygaster herrickii Packard, 1880. U. S. Ent. Comm., Bul. 4: 20, 21.

Taxonomy: Fouts, 1924. U. S. Natl. Mus., Proc. 63 (15): 47-48. — Gahan, 1934 (1933). U. S. Dept. Agr., Misc. Pub. 174: 14-18.

Biology: Hill and Emery, 1937. Jour. Agr. Res. 55: 199-213. — Hill, Pinckney and Udine, 1939. U. S. Dept. Agr., Tech. Bul. 689: 1-15. — Hill and Pinckney, 1940. U. S. Dept. Agr., Tech. Bul. 715: 4, 11. — Hill, 1953. U. S. Dept. Agr., Circ. 923: 3.

hiemalis Forbes. Occurs throughout the wheat-growing areas of the United States from N. Y. and Pa. to Oreg. and in southern Canada; also Europe and No. Africa. Host: *Mayetiola destructor* (Say).

Platygaster herrickii Fitch, 1866. Cultiv. and Country Gent. 28: 354. *Nom. nud.*

Platygaster minutus Lindeman, 1887. Soc. Imp. Nat. Moscou, Bul. (2) 1: 188. Preocc. by Zetterstedt, 1838.

Platygaster hiemalis Forbes, 1888. Psyche 5: 39. ♀, ♂.

Platygaster minutula Dalla Torre, 1898. Cat. Hym., v. 5, p. 474. N. name for *P. minutus* Lindeman.

Taxonomy: Gahan, 1934 (1933). U. S. Dept. Agr., Misc. Pub. 174: 4-10. (See this paper for detailed references to the early literature on *P. hiemalis*).

Biology: Leiby and Hill, 1923. Jour. Agr. Res. 25: 337-349. — Hill, 1926. Jour. Agr. Res. 32: 261-275. — Hill, Pinckney and Udine, 1939. U. S. Dept. Agr., Tech. Bul. 689: 1-15. — Hill and Pinckney, 1940. U. S. Dept. Agr., Tech. Bul. 715: 3-4, 11. — Johannsen and Butt, 1941. Embryology of insects and myriapods....., pp. 311-316. — Hill, 1953. U. S. Dept. Agr., Circ. 923: 3.

huachucae (Ashmead). Ariz. (Ft. Huachuca). Ecology: From gall on sunflower.

Polygnotus huachucae Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 302, 316. ♀, ♂.

hyalinipennis (Ashmead). N. Y., Fla. Host: *Caryomyia tubicola* (O. S.).

Isorhombus hyalinipennis Ashmead, 1887. Canad. Ent. 19: 129. ♀.

kalmiae Fouts. Md. (Glen Echo).

Platygaster kalmiae Fouts, 1925. Ent. Soc. Wash., Proc. 27: 95. ♂.

laevicollis (Ashmead). D. C., La.

Polygnotus laevicollis Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 304, 320. ♂.

lampronota Fouts. Idaho, Calif. Host: *Rhopalomyia californica* Felt.

Platygaster lampronota Fouts, 1924. U. S. Natl. Mus., Proc. 63 (15): 26, 48. ♀, ♂.

Biology: Doutt, 1961. Ent. Soc. Amer., Ann. 54: 51.

laticeps (Ashmead). Fla. (Jacksonville).

Polygnotus laticeps Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 311. ♂, (♀ misdet.).

leguminicola Fouts. Oreg. (Forest Grove). Host: *Dasineura leguminicola* (Lint.).

Platygaster leguminicola Fouts, 1920. Ent. Soc. Wash., Proc. 22: 69. ♀, ♂.

linearis Fouts. S. Dak., Iowa. Host: *Lasioptera echinochloae* Felt.

Polynecus lasiopterae Gahan, 1917. U. S. Natl. Mus., Proc. 53: 217. ♀, ♂. Preocc. by Kieffer and Jorgensen, 1910.

Platygaster linearis Fouts, 1924. U. S. Natl. Mus., Proc. 63 (15): 29, 93. N. name.

longiventris (Ashmead). Fla. Host: *Chilophaga gyranitis* Gagne.

Isocystus longiventris Ashmead, 1887. Canad. Ent. 19: 130. ♀.

lucida Fouts. Colo., Calif., Alaska. Host: Cecidomyiids in cones of *Picea engelmanni*, *P. sitchensis* and *P. glauca*.

Platygaster lucida Fouts, 1924. U. S. Natl. Mus., Proc. 63 (15): 26, 54. ♀.

lupinicola (Ashmead). Calif. (San Francisco). Host: Cecidomyiid gall-maker on *Lupinus*.

Polymecus lupinicola Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 278, 281. ♀, (♂ misdet.).

mainensis MacGown and Osgood. Maine, N. H. Host: *Dasineura balsamicola* (Lint.).

Platygaster mainensis MacGown and Osgood, 1971. Canad. Ent. 103: 1144. ♀, ♂.

marylandica Fouts. Md. (Glen Echo).

Platygaster marylandica Fouts, 1924. U. S. Natl. Mus., Proc. 63 (15): 28, 85. ♀, ♂.

melanocera (Ashmead). Fla.

Synopeas melanocera Ashmead, 1887. Canad. Ent. 19: 130. ♀.

Platygaster gracilis Ashmead, 1887. Canad. Ent. 19: 132. ♂.

melliscapus (Ashmead). D. C.

Polymecus melliscapus Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 278, 282. ♀.

minutissima Fouts. Tex. (Brownwood).

Platygaster minutissima Fouts, 1925. Ent. Soc. Wash., Proc. 27: 96. ♂.

nigricoxa Fouts. Calif. (San Francisco). Host: *Dasineura lupini* Felt.

Platygaster nigricoxa Fouts, 1925. Ent. Soc. Wash., Proc. 27: 147. ♀, ♂.

nigrifemur (Ashmead). Colo.

Ectadius nigrifemur Ashmead, 1890. Colo. Biol. Assoc., Bul. 1: 10. ♀, ♂.

nigripes (Ashmead). Colo. (Greeley).

Monocrita nigripes Ashmead, 1890. Colo. Biol. Assoc., Bul. 1: 9. ♂.

noveboracensis (Brues). N. Y. (Albany). Ecology: From a cecidomyiid gall.

Eritrissomerus noveboracensis Brues, 1910. Wis. Nat. Hist. Soc., Bul. 8: 48. ♂.

obscuripennis Ashmead. Ont., N. Y., N. H., Pa. Host: *Mayetiola rigidae* (O. S.).

Platygaster obscuripennis Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 323, 325. ♂, (♀ misdet.).

oenone Fouts. B. C. (Revelstoke).

Platygaster oenone Fouts, 1925. Ent. Soc. Wash., Proc. 27: 149. ♀.

opaca Ruthe. Greenland; Iceland, Europe.

Platygaster opacus Ruthe, 1859. Stettin. Ent. Ztg. 20: 313.

pallida Fouts. N. Y. (McLean Bogs).

Platygaster pallida Fouts, 1925. Ent. Soc. Wash., Proc. 27: 148. ♂.

pallipes Say. U. S.

Platygaster pallipes Say, 1828. Contrib. Maclur. Lyc. Phila. 1: 80.

Isocybus pallidipes Dalla Torre, 1898. Cat. Hym., v. 5, p. 470. Emend.

pentatoma (Ashmead). Va. (Arlington).

Anopedioides pentatoma Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 292. ♀.

perplexa Fouts. Colo. (Grant).

Platygaster perplexa Fouts, 1925. Ent. Soc. Wash., Proc. 27: 96. ♂.

picipes (Ashmead). D. C.

Polymecus picipes Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 278, 282. ♀.

pini Fouts. Wis., Mo., Colo. Host: Cecidomyiid on *Pinus edulis*, *Lestodiplosis juniperina* (Felt).

Platygaster pini Fouts, 1924. U. S. Natl. Mus., Proc. 63 (15): 30, 99. ♀, ♂.

Biology: Haseman and McLane, 1940. Ent. Soc. Amer., Ann. 33: 614.

pluto (Ashmead). Fla. (Jacksonville).

Hypocampsis Pluto Ashmead, 1887. Canad. Ent. 19: 131. ♀.

prolata MacGown. Ga. (Clark County).

Platygaster prolata MacGown, 1971. Canad. Ent. 103: 1637. ♀.

relativa Fouts. N. H. (Holderness).

Platygaster relativa Fouts, 1924. U. S. Natl. Mus., Proc. 63 (15): 30, 104. ♀.

rohweli Fouts. Oreg., Calif. Ecology: From cones of *Abies concolor* and *Pinus lambertiana*.

Platygaster rohweli Fouts, 1924. U. S. Natl. Mus., Proc. 63: 30, 100. ♀, ♂.

- rubi** (Ashmead). N. J., Va. Host: *Lasioptera farinosa* (O. S.).
Polygnotus rubi Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 302, 315. ♀.
- rufidens** Fouts. Md. (Glen Echo).
Platygaster rufidens Fouts, 1925. Ent. Soc. Wash., Proc. 27: 97. ♂.
- rufipes** (Ashmead). Va. (Arlington).
Synopeas rufipes Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 286, 287. ♀.
- salicicola** (Ashmead). Calif. (Los Angeles). Host: Cecidomyiid gall-maker on willow.
Polygnotus salicicola Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 300, 305. ♀, ♂.
- scorpioides** Muesebeck and Walkley. Ont.
Ectadius canadensis Ashmead, 1888. Canad. Ent. 20: 51. ♀. Preocc. by Provancher, 1887.
Platygaster scorpioides Muesebeck and Walkley, 1951. U. S. Dept. Agr., Agr. Monog. 2, p. 714. N. name.
- scutellator** Fouts. Md. (Glen Echo).
Platygaster scutellator Fouts, 1925. Ent. Soc. Wash., Proc. 27: 96. ♂.
- semiglabra** (Girault). N. Y. Host: *Rhopalomyia hirtipes* (O. S.).
Polymerus semiglaber Girault, 1920. U. S. Natl. Mus., Proc. 58: 177. ♀, ♂.
- shastensis** Fouts. Oreg., Calif. Ecology: From cones of *Abies shastensis*.
Platygaster shastensis Fouts, 1924. U. S. Natl. Mus., Proc. 63 (15): 26, 53. ♀.
- signata** Fouts. Tex. (Brownwood).
Platygaster signata Fouts, 1925. Ent. Soc. Wash., Proc. 27: 97. ♀.
- solidaginis** (Ashmead). Pa. to Fla. Host: *Asteromyia carbonifera* (O. S.), cecidomyiid gall-maker on *Solidago*.
Polygnotus solidaginis Ashmead, 1887. Canad. Ent. 19: 131. ♀, ♂.
Polygnotus angulatus Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 304, 319. ♂.
- Taxonomy: Fouts, 1924. U. S. Natl. Mus., Proc. 63 (15): 65-67. —Masner and Muesebeck, 1968. U. S. Natl. Mus. Bul. 270: 95.
- striaticeps** (Ashmead). Calif., Idaho. Host: Cecidomyiid gall-maker on *Bigelovia* or *Artemisia*.
Polygnotus striaticeps Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 301, 308. ♀, ♂.
- striaticollis** (Ashmead). Fla. (Jacksonville).
Polygnotus striaticollis Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 304, 319. ♂.
- striatifrons** Fouts. Md. (Glen Echo).
Platygaster striatifrons Fouts, 1925. Ent. Soc. Wash., Proc. 27: 98. ♂.
- tacita** Fouts. Tex. (Brownwood).
Platygaster tacita Fouts, 1925. Ent. Soc. Wash., Proc. 27: 98. ♀.
- taylori** MacGown. Pa., Va. Host: *Lasioptera nodulosa* (Beutn.).
Platygaster taylori MacGown, 1974. Canad. Ent. 106: 437. ♀, ♂.
- texana** Fouts. Tex. (Uvalde).
Platygaster texana Fouts, 1924. U. S. Natl. Mus., Proc. 63 (15): 28, 82. ♀, ♂.
- tumida** (Ashmead). D. C. Host: *Cincticornia symmetrica* (O. S.).
Polygnotus tumidus Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 301, 310. ♀.
- utahensis** (Ashmead). Utah, Idaho. Host: Cecidomyiid gall-maker on *Artemisia tridentata*.
Polygnotus utahensis Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 301, 314. ♂.
- Taxonomy: Fouts, 1924. U. S. Natl. Mus., Proc. 63 (15): 68-69. —Masner and Muesebeck, 1968. U. S. Natl. Mus. Bul. 270: 96.
- vancouverensis** (Ashmead). B. C. (Vancouver Isl.).
Polymerus vancouverensis Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 278, 281. ♀.
- variabilis** Fouts. N. C., Mo. Host: *Rhopalomyia carolina* Felt or *R. solidaginis* (Loew) on goldenrod.
Platygaster variabilis Fouts, 1924. U. S. Natl. Mus., Proc. 63 (15): 30, 106. ♀, ♂.
- vernoniae** (Ashmead). Va. (Arlington). Ecology: From gall on *Vernonia noveboracensis*.
Polygnotus vernoniae Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 302, 317. ♀, ♂.
- virginiensis** (Ashmead). Mass., N. H., Pa., Md., D. C., Va. Host: *Thecodiplosis cypressiananassa* (O. S.).
Polygnotus virginieensis Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 301, 309. ♀, ♂.

Polygnotus proximus Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 301, 312. ♀, ♂.

Taxonomy: Fouts, 1924. U. S. Natl. Mus., Proc. 63 (15): 77-79.
viticola (Ashmead). D. C. Host: *Lasioptera vitis* O. S.

Polygnotus viticola Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 301, 313. ♀, ♂.
websteri Fouts. Ohio.

Platygaster websteri Fouts, 1924. U. S. Natl. Mus., Proc. 63 (15): 26, 50. ♀.

zosine Walker. N. Y., s. to Va. and w. to Iowa and Mo. Host: *Mayetiola destructor* (Say).

Platygaster zosine Walker, 1836. Ent. Mag. 3: 266. ♂.

Polygnotus zozini Marchal, 1897. Soc. Ent. de France, Ann. 66: 93. Emend.

Platygaster longicaudatus Kieffer, 1906. Soc. Sci. de Bruxelles, Ann. 30: 131. ♀, ♂.

Platygaster brevicaudatus Kieffer, 1906. Soc. Sci. de Bruxelles, Ann. 30: 133. ♀, ♂.

Polygnotus vernalis Myers, 1917. U. S. Natl. Mus., Proc. 53: 256. ♀, ♂.

Taxonomy: Gahan, 1934 (1933). U. S. Dept. Agr., Misc. Pub. 174: 10-14.

Biology: Hill, 1922. Ent. Soc. Wash., Proc. 34: 111-113. — Hill, 1923. Jour. Agr. Res. 25: 31-42.
 — Leiby and Hill, 1924. Jour. Agr. Res. 28: 829-839. — Hill, Pinckney and Udine, 1939. U. S. Dept. Agr., Tech. Bul. 689: 8-9. — Hill and Pinckney, 1940. U. S. Dept. Agr., Tech. Bul. 715: 3-4, 11. — Hill, 1953. U. S. Dept. Agr., Circ. 923: 1-15.

Genus EUXESTONOTUS Fouts

Euxestonotus Fouts, 1925. Ent. Soc. Wash., Proc. 27: 98.

Type-species: *Platygaster error* Fitch. Orig. desig.

Eoxestonotus Debauche, 1947. Soc. Ent. de Belg., Bul. et Ann. 83: 267.

Type-species: *Eoxestonotus pini* Debauche. Orig. desig.

Taxonomy: Fouts, 1925. Ent. Soc. Wash., Proc. 27: 98-100 (Key to No. Amer. species).

—Ghesquière, 1948. Soc. Ent. de Belg., Bul. et Ann. 84: 42-43. —Masner, 1964. Acta Soc. Ent. Cechoslov. 61: 151-152.

brevicornis Fouts. Md., Ohio. Host: Cecidomyiid on phlox.

Euxestonotus brevicornis Fouts, 1925. Ent. Soc. Wash., Proc. 27: 99. ♀.

error (Fitch). Conn., N. Y., Pa., Md., D. C., Va., Ind. and possibly throughout the range of its host, the wheat midge. Host: *Stitaplopis moseellana* Gehin.

Platygaster error Fitch 1861 (1860). N. Y. State Agr. Soc., Trans. 20: 838.

Taxonomy: Gahan, 1934 (1933). U. S. Dept. Agr., Misc. Pub. 174: 18-22.

Biology: Gahan, 1934 (1933). U. S. Dept. Agr., Misc. Pub. 174: 21-22.

flavipes Fouts. Md. (Glen Echo).

Euxestonotus flavipes Fouts, 1925. Ent. Soc. Wash., Proc. 27: 99. ♀.

rufidens Fouts. Pa. (Carlisle).

Euxestonotus rufidens Fouts, 1925. Ent. Soc. Wash., Proc. 27: 99. ♂.

Genus ERITRISSOMERUS Ashmead

Eritrissomerus Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 363, 364, 398.

Type-species: *Eritrissomerus cecidomyiae* Ashmead. Orig. desig.

Revision: Fouts, 1924. U. S. Natl. Mus., Proc. 63 (15): 19-23.

Taxonomy: Masner, 1964. Acta Soc. Ent. Cechoslov. 61: 150.

cecidomyiae Ashmead. Fla. (Jacksonville). Host: Cecidomyiid gall-maker on hickory.

Eritrissomerus cecidomyiae Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 299. ♀, ♂.

floridanus (Ashmead). Fla. (Jacksonville).

Polygnotus floridanus Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 304, 318. “♂” = ♀.

pallipes Harrington. Que. (Hull).

Eritrissomerus pallipes Harrington, 1899. Roy. Soc. Canada, Trans. (2) 5: 191. ♀, ♂.

parvus Fouts. Md. (Cabin John).

Eritrissomerus parvus Fouts, 1924. U. S. Natl. Mus., Proc. 63 (15): 19, 22. ♀.

Genus PESTOPILEURA Foerster

Catillus Foerster, 1856. Hym. Stud., v. 2, pp. 111, 144. Preocc. by Brongniart, 1822.

Type-species: *Platygaster catillus* Walker. Monotypic.

Pestopleura Foerster, 1856. Hym. Stud., v. 2, p. 144. N. name.

Revision: Kieffer, 1926. Das Tierreich, Lief. 48, pp. 627-631.

Taxonomy: Debauche, 1947. Soc. Ent. de Belg., Bul. et Ann. 83: 272.

platygaster (Fouts). D. C.

Leptacis platygaster Fouts, 1925. Ent. Soc. Wash., Proc. 27: 100. ♀.

Taxonomy: Masner and Muesebeck, 1968. U. S. Natl. Mus. Bul. 270: 83.

Genus SYNOPEAS Foerster

Synopeas Foerster, 1856. Hym. Stud., v. 2, pp. 108, 114. No species. — Thomson, 1859.

Ofvers. Kongl. Vetensk-Akad., Forh. 16: 71. Thirteen species.

Type-species: *Synopeas inermis* Thomson. Desig. by Muesebeck and Walkley, 1951.

Ectadius Foerster, 1856. Hym. Stud., v. 2, pp. 108, 113, 114, 144.

Type-species: *Platygaster craterus* Walker. Monotypic.

Polymecus Foerster, 1856. Hym. Stud., v. 2, p. 144. N. name, unnecessarily proposed for *Ectadius* Foerster, which Foerster thought to be preocc. by *Ectadium* E. Meyer in Botany.

Sactogaster Foerster, 1856. Hym. Stud., v. 2, pp. 108, 113.

Type-species: *Epimeces ventralis* Westwood. Desig. by Ashmead, 1893.

Synopus Ashmead, 1896. Zool. Soc. London, Proc. for 1895, p. 802. Error.

Dolichotrypes Crawford and Bradley, 1911. Ent. Soc. Wash., Proc. 13: 124.

Type-species: *Dolichotrypes hopkinsi* Crawford and Bradley. Orig. desig.

Taxonomy: Ghesquiere, 1948. Soc. Ent. de Belg., Bul. et Ann. 84: 44. — Masner, 1960. Rev. de Zool. et de Bot. Africaines 62: 3-5. — Masner, 1964. Acta Soc. Ent. Cechoslov. 61: 149-150.

Superfamily CERAPHRONOIDEA

By CARL F. W. MUESEBECK

Superfamily rank for this group was first proposed by Masner in 1956 (*Acta Faun. Ent. Mus. Nat. Pragae* 1: 101), although without indication of basic differences from the Proctotrupoidea. In 1967, however, Masner and Dessart (*Inst. Roy. Sci. Nat. de Belg.*, Bul. 43: 1-33) defined the superfamily in detail and recognized it as comprising two families, Ceraphronidae and Megaspilidae, the latter being divided into the subfamilies Megaspilinae and Lagynodinae. This classification appears to be sound. The members of this superfamily are remarkable for the possession of two apical spurs on the anterior tibiae.

In his 1914 revision of this group Kieffer used the name Calliceratidae, based on *Calliceras* Nees, 1834, since *Ceraphron* Jurine, 1807, which had been considered the type-genus of the family, was a junior homonym of *Ceraphron* Panzer, 1805. Kieffer was generally followed in the literature of the succeeding thirty years. However, in its Opinion 174, issued in 1946, the International Commission on Zoological Nomenclature suppressed *Ceraphron* Panzer, under suspension of the Rules, and validated *Ceraphron* Jurine with *C. sulcatus* Jurine, 1807, as type-species; since then the names *Ceraphron* and Ceraphronidae have again come into general use.

Apparently species of this superfamily are largely hyperparasites, developing especially on larvae of Aphidiidae, Braconidae, Ichneumonidae, Bethylidae, Dryinidae and Tachinidae. Some, however, are evidently primary parasites of Aleyrodidae, various small Diptera (i. e., Cecidomyiidae, Phoridae), certain neuropteroids and some cynipoid gall-makers; others occur in ant nests where they presumably develop as parasites of certain myrmecophilous Diptera.

Revision: Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 102-136 (North American species).

Family CERAPHRONIDAE

This family is treated here as restricted by Masner and Dessart in 1967.

Taxonomy: Masner and Dessart, 1967. Inst. Roy. Sci. Nat. de Belg., Bul. 43: 25-29.

Genus CERAPHRON Jurine

Ceraphron Jurine, 1807. Nouv. Meth. Class. Hym. Dipt., p. 303. Preoccupied by *Ceraphron* Panzer, 1805, but validated by the International Commission on Zoological Nomenclature in its Opinion 174, published in 1946, and placed on the Official List of generic names in zoology as name no. 615.

Type-species: *Ceraphron sulcatus* Jurine. Desig. by Internat. Comn. Zool. Nomencl. Op. 174, 1946.

Calliceras Nees, 1834. Hym. Ichn. Aff. Monog., v. 2, p. 278.

Type-species: *Calliceras fuscicornis* Nees. Desig. by Blanchard, 1843.

Hadroceras Foerster, 1840. Beitr. Monog. Pteromalinen, p. xliv. Unnecessarily proposed as a new name for *Calliceras* Nees.

Megaspilidea Ashmead, 1888. Canad. Ent. 20: 48, 49.

Type-species: *Megaspilidea minuta* Ashmead. Monotypic.

Pristomicrops Kieffer, 1906. Soc. Sci. de Bruxelles, Ann. 30: 146.

Type-species: *Pristomicrops elavatus* Kieffer. Monotypic.

Cerataphron Schulz, 1906. Spolia Hym., p. 152. Emend.

Allomicrops Kieffer, 1914. Das Tierreich, Lief. 42, pp. xv, 69, 138.

Type-species: *Ceraphron abnormis* Perkins. Monotypic.

Eulagynodes Girault, 1917. New Javanese Hymenoptera, p. 9 (private pub.).

Type-species: *Eulagynodes bicolor* Girault. Orig. desig.

Ceranogmus Risbec, 1953. Inst. Francais d'Afrique Noire, Bul. 15: 560.

Type-species: *Ceranogmus testaceus* Risbec. Monotypic.

Some species of *Ceraphron* develop as primary parasites and others as hyperparasites. There are few published rearing records for described North American species but in other parts of the world species of *Ceraphron* have been found to parasitize Diptera (Cecidomyiidae, Drosophilidae, Phoridae, Sciaridae and Syrphidae), Hymenoptera (Braconidae, Ichneumonidae, Dryinidae and Bethylidae), Homoptera (Aleyrodidae, Aphididae and Coccoidea, the last two possibly as hyperparasites) and certain small neuropteroids. Specimens of *Ceraphron* have also been taken in the nests of ants.

Revision: Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 123-132. —Kieffer, 1914. Das Tierreich, Lief. 42, pp. 70-114.

Genus NEOCERAPHRON Ashmead

- Neoceraphron* Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 136.
 Type-species: *Ceraphron macroneurus* Ashmead. Monotypic.
Neocerataphron Schulz, 1906. Spolia Hym., p. 152. Emend.

Taxonomy: Szelenyi, 1938. *Folia Ent. Hungarica* 3: 109-112. — Hellen, 1966. *Fauna Fennica* 20: 41. — Masner and Dessart, 1967. *Inst. Roy. Sci. Nat. de Belg.*, Bul. 43: 18-19.
macroneurus (Ashmead). Fla.
Ceraphron macroneurus Ashmead, 1887. *Ent. Amer.* 3: 97. ♂.

Genus APHANOGLMUS Thomson

- Aphanogmus* Thomson, 1858. *Ofvers. Kongl. Vetensk.-Akad., Forh.* 15: 287, 305.
 Type-species: *Aphanogmus fumipennis* Thomson. Desig. by Ashmead, 1893.

From the little available information on the biology of members of this genus it appears that some species are primary parasites of certain Diptera, particularly Cecidomyiidae, and other species develop as hyperparasites.

Taxonomy: Szelenyi, 1940. *Mus. Natl. Hungarici*, Ann. (Zool.) 33: 122-136. — Dessart, 1962. *Soc. Roy. d'Ent. de Belg.*, Bul. et Ann. 98: 294-300. — Dessart, 1963. *Soc. Habropeltis nigerrimus var. *sublevis* Kieffer, 1906 (1905). Berlin. Ent. Ztschr. 50: 257. ♂.

Genus CONOSTIGMUS Dahlbom

Conostigmus Dahlbom, 1858 (1857). Ofvers. Kongl. Vetensk.-Akad., Forh. 14: 291. No species. — Kieffer, 1907. In Andre, Spec. Hym. Eur. Alg., v. 10, pp. 80-173. Many species.

Type-species: *Megaspilus alutaceus* Thomson. Desig. by Muesebeck and Walkley, 1951.

Eumegaspilus Ashmead, 1888. Canad. Ent. 20: 48, 49.

Type-species: *Eumegaspilus canadensis* Ashmead. Desig. by Muesebeck and Walkley, 1951.

Eumegalospilus Schulz, 1906. Spolia Hym., p. 152. Emend.

Conostigmoides Dodd, 1914. Roy. Soc. So. Austral., Trans. 38: 88, 94.

Type-species: *Eumegaspilus erythrothorax* Ashmead. Orig. desig.

Hosts have been recorded for relatively few of the known species. However, several species, in North America and elsewhere, have been reared from the puparia of Syrphidae, others from the puparia of Tachinidae; and an African species has been recorded repeatedly from the puparia of the tsetse fly, *Glossina palpalis* Rob.-Desv. A number of other species have been found in the nests of ants where they presumably developed as parasites of myrmecophilous Diptera.

Revision: Kieffer, 1907. In Andre, Spec. Hym. Eur. Alg., v. 10, pp. 80-173. — Kieffer, 1914. Das Tierreich, Lief. 42, pp. 166-221.

Neolygocerus Ishii, 1951. Oyo-Dobuts.-Zasshi 16: 93.

Type-species: *Neolygocerus koyamae* Ishii. Monotypic.

Species of this genus are most commonly associated with sternorrhynchous Homoptera, especially aphids and mealybugs, and to a lesser extent chermids and psyllids. They usually develop either as hyperparasites through other Hymenoptera that are primary parasites, or as parasites of predatory larvae such as those of Syrphidae (various genera) and Chamaemyiidae (especially *Leucopis* and *Crematiania*). Other recorded hosts include species of Coniopterygidae, Hemerobiidae and the phytophagous dipterous genera *Mayetiola* and *Meromyza*.

triticum (Taylor). U. S. Host: *Mayetiola destructor* (Say).

Ceraphron triticum Taylor, 1860. Amer. Agr., p. 300. ♂.

Genus ECNOMOTHORAX Dessart and Masner

Ecnomothorax Dessart and Masner, 1965. Soc. Roy. d'Ent. de Belg., Bul. et Ann. 101: 276.

Type-species: *Ecnomothorax muesebecki* Dessart and Masner. Orig. desig.

muesebecki Dessart and Masner. Mo., Ark.

Ecnomothorax muesebecki Dessart and Masner, 1965. Soc. Roy. d'Ent. de Belg., Bul. et

Ann. 101: 277. ♀, ♂.

SUBFAMILY LAGYNODINAE

Taxonomy: Masner and Dessart, 1967. Inst. Roy. Sci. Nat. de Belg., Bul. 43 (22): 1-33.

Genus LAGYNODES Foerster

Microps Haliday, 1833. Ent. Mag. 1: 272. Preocc. by Dahl, 1823; Wagler, 1830.

Type-species: *Microps rubi* Haliday. Monotypic.

Lagynodes Foerster, 1840. Beitr. Monog. Pteromalinen, p. xliv.

Type-species: *Lagynodes rufus* Foerster. Monotypic.

Triogmus Marshall, 1874. Ent. Annual, 1874, p. 134.

Type-species: *Triogmus furcifer* Marshall. Monotypic.

Plastomicrops Kieffer, 1906. Soc. Sci. de Bruxelles, Ann. 30: 145.

Type-species: *Plastomicrops acuticornis* Kieffer. Desig. by Muesebeck and Walkley, 1956.

Lagynodes Sharp, 1908. In Zool. Rec., 1906, p. 308. Error.

Laginodes Risbec, 1953. Inst. Francais d'Afrique Noire, Bul. 15: 560. Error.

There seem to be no reliable records of host association for species of *Lagynodes*. However, specimens of some species have been taken in ant nests.

Revision: Kieffer, 1914. Das Tierreich, Lief. 42, pp. 130-138. —Dessart, 1966. Inst. Roy. Sci. Nat. de Belg., Bul. 42 (18): 1-85.

Taxonomy: Szelenyi, 1936. Mus. Natl. Hungarici, Ann. (Zool.) 30: 56-64. —Jansson, 1945. Opusc. Ent. 10: 141-142.

longicornis (Ashmead). Fla. (Ft. George Isl.).

Ceraphron longicornis Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 125, 132. ♂.

Lagynodes minutus Ashmead, 1893. U. S. Natl. Mus., Bul. 45: 121. ♀.

xanthus Whittaker. B. C. (Hollyburn).

Lagynodes xanthus Whittaker, 1930. Ent. Soc. Wash., Proc. 32: 72. ♀.

Superfamily TRIGONALOIDEA

By ROBERT W. CARLSON

Family TRIGONALIDAE

According to Malyshev (1968) this small family includes about 70 species which are scattered throughout the world. The species are all parasitic. The hymenopterous or dipterous primary hosts are usually parasites or predators of larval Lepidoptera. It is thought that at least some species can be primary larval parasites of sawflies, and Cooper (1954) hypothesized that sawflies were the hosts of ancestral Trigonidae. That seems quite possible in view of the isolated and undeterminable phyletic position of the family, but I know of no rearings of Nearctic trigonalids as primary or secondary parasites of sawflies.

Trigonalid eggs are deposited singly on the leaves of angiosperms, apparently always near the edges of leaves. They are tiny and tough-shelled, enabling them to be ingested without destruction by leaf feeding caterpillars. It appears that if the tough shell is not cracked when an egg is ingested hatching does not occur. Eclosion from the egg occurs in the intestine of the caterpillar, and the first instar trigonalid bores through the intestinal wall and apparently remains in the body cavity of the caterpillar without developing further pending parasitization of the caterpillar by an ichneumonid or tachinid or predation upon it by a social or solitary vespid. When the primary host is a social vespid, a first instar trigonalid would apparently be fed to a larval vespid by a foraging worker.

Revision: Townes, 1956. U. S. Natl. Mus., Proc. 106: 295-304.

Taxonomy: Schulz, 1907. In Wytsman, Gen. Ins., fasc. 61, 24 p. (Genera of world). — Bischoff, 1938. In Hedicke, Hym. Cat., pt. 5, 18 p. (world catalog).

Biology: Clausen, 1929; 1931. Ent. Soc. Wash., Proc. 31: 67-79; 33: 70-81. — Clausen, 1940.

Entomophagous Insects, p. 56-61. — Cooper, 1954. Ent. Soc. Wash., Proc. 56: 280-288.

Genus ORTHOGONALYS Schulz

Orthogonalys Schulz, 1905. Hym. Stud., p. 76.

Type-species: *Orthogonalys boliviensis* Schulz. Monotypic.

Orthogonatlos Schulz, 1907. In Wytsman, Gen. Ins., fasc. 61, p. 8. Emend.

Tapinogonatlos Schulz, 1907. In Wytsman, Gen. Ins., fasc. 61, p. 14.

Type-species: *Trigonalyss pulchellus* Cresson. Desig. by Viereck, 1914.

pulchella (Cresson). Southern Maine s. to n. Va., w. to w. N. Y. and W. Va. Host: *Archytas aterrimus* (R.-D.), *Nilea lobeliae* (Coq.).

Trigonalyss pulchellus Cresson, 1867. Ent. Soc. Phila., Proc. 6: 351. ♂.

Biology: Townes, 1956. U. S. Natl. Mus., Proc. 106: 298 (oviposition behavior).

Genus LYCOGASTER Shuckard

Lycogaster Shuckard, 1841. Entomologist 1: 123.

Type-species: *Lycogaster pullata* Shuckard. Monotypic.

pullata nevadensis (Cresson). Southwestern S. Dak., Colo., n. N. Mex., Nev., w. Oreg. Ecology: A number of specimens were reared from unknown pupal or larval-pupal parasites of *Hyphantria cunea* (Drury) at Boulder, Colo. Host: *Euodynerus foraminatus scutellaris* (Sauss.).

Trigonalyss neradensis Cresson, 1879. Amer. Ent. Soc., Trans. 7: vii in Proc. ♂, ♀.

pullata pullata Shuckard. Vt., Mass., R. I., N. Y., Md., D. C., n. Va., w. N. C., n. Ga., n. N. Dak. Host: *Euodynerus foraminatus foraminatus* (Sauss.), *Enicospilus americanus* (Christ).

Lycogaster pullatus Shuckard, 1841. Entomologist 1: 124. ♀.

Lycogaster pullatus var. *hollensis* Melander and Brues, 1902. Biol. Bul. 3: 36. ♂, ♀.

Biology: Cooper, 1954. Ent. Soc. Wash., Proc. 56: 280-288. —Townes, 1956. U. S. Natl. Mus., Proc. 106: 299-300.

Genus POECILOGONALOS Schulz

Poecilogonalos Schulz, 1907. In Wytsman, Gen. Ins., fasc. 61, p. 9.

Type-species: *Trigonalys pulchella* Westwood. Monotypic. The type-species is an objective synonym of *P. thwaitsii* (Westwood).

This genus includes only one Nearctic species, but according to Townes (1956, trigonalid revision, p. 300) *Poecilogonalos* is rather large and widely distributed.

costalis (Cresson). Southeastern Mass. s. to mid Fla., w. to s. Ohio and s.w. La. Ecology: Has been reared as a secondary parasite of *Phosphila turbulenta* Hbn. and *Automeris io* (F.). Host: *Lespesia* sp. ex *Phosphila turbulenta* Hbn.

Trigonalys (*Lycogaster*) *costalis* Cresson, 1867. Ent. Soc. Phila., Proc. 6: 352. ♂.

Trigonalys sulcatus Davis, 1898 (1897). Amer. Ent. Soc., Trans. 24: 349. ♂.

Biology: Townes, 1956. U. S. Natl. Mus., Proc. 106: 301-302 (oviposition behavior).

Genus BAREOGONALOS Schulz

Bareogonalos Schulz, 1907. In Wytsman, Gen. Ins., fasc. 61, p. 18.

Type-species: *Trigonalys canadensis* Harrington. Monotypic.

Nippogonalos Uchida, 1929. Insecta Matsumurana 3: 79.

Type-species: *Nippogonalos jezoensis* Uchida. Monotypic and orig. desig.

canadensis (Harrington). Southwestern B. C., n.w. Calif. Host: *Vespa arenaria* (F.), *V. pensylvanica* (Sauss.).

Trigonalys Canadensis Harrington, 1896. Canad. Ent. 28: 108. "♂" = ♀.

Taxonomy: Harrington, 1898. In Taylor, Canad. Ent. 30: 15-16 (male described).

Biology: Taylor, 1898. Canad. Ent. 30: 14-15.
