

ADDITIONS TO FLORIDA INSECTS TAKEN IN LIGHT TRAPS¹

S. W. FROST

The Pennsylvania State University, University Park, Pennsylvania

Since the publication of "Insects taken in light traps at The Archbold Biological Station, Highlands County, Florida" (Frost 1964), many additional records have been obtained. Methods of entry and abbreviations are the same as those used in 1964. A few additional abbreviations are added: BM, British Museum; BBM, Bernice P. Bishop Museum, Honolulu; CDA, Canada Department of Agriculture; CSC, California State College; ISU, Iowa State University; KSU, Kansas State University; MCZ, Museum Comparative Zoology; SJSC, San Jose State College; UMO, University of Missouri; UNM, University of New Mexico; UU, University of Utah. The details of operation of the traps are given in previous papers (Frost 1962, 1963). An asterisk (*) indicates a species identified by the author.
