

Janusz NAST

**Palaeartic *Auchenorrhyncha* (Homoptera)
Part 2.¹ Bibliography; Addenda and Corrigenda**

INTRODUCTION

This is written to supplement the first part of the Check Lists of Palaeartic *Auchenorrhyncha* issued in 1972; the present paper contains the basic bibliography to it and some additions and corrections.

The bibliography comprises only those papers which have not been covered by the well known and available World Bibliographies published by Z. P. METCALF. They were:

- METCALF Z. P. [1942]. Bibliography of the *Homoptera* (*Auchenorrhyncha*). In 2 volumes [Raleigh, N.C.], 886+186 pp.
- METCALF Z. P. [1960]. A Bibliography of the *Cercopoidea* (*Homoptera: Auchenorrhyncha*). [Raleigh, N.C.]. 262 pp.
- METCALF Z. P. 1962. A Bibliography of the *Cicadoidea* (*Homoptera: Auchenorrhyncha*). [Raleigh, N.C.]. 229 pp.
- METCALF Z. P., WADE V. 1963. A Bibliography of the *Membracoidea* and Fossil *Homoptera* (*Homoptera: Auchenorrhyncha*). [Raleigh, N.C.]. 200 pp.
- METCALF Z. P. 1964. Bibliography of the *Cicadelloidea* (*Homoptera: Auchenorrhyncha*). Washington, D.C. 349 pp.

Some entries omitted in the first part, as well as some corrections and misprints are given at the end of this paper.

The following literature is, by necessity, restricted only to those papers in which new taxa have been introduced. Unfortunately, a full faunistic bibliography is beyond the powers of the writer. Only the local faunists are able

¹ Cf.: NAST J. 1972. Palaeartic *Auchenorrhyncha* (*Homoptera*). An annotated Check List. Warszawa. 550 pp.

to gather a complete literature referring to their countries. As an example it can be noted that scarcely 40% of the faunistic literature connected with the Polish *Auchenorrhyncha* (till 1955) was known to Z. P. METCALF who unquestionably was a consummate bibliographer. Apparently a similar situation is in other countries.

BIBLIOGRAPHY

The transliteration of title has been made only when a paper had no other title written in the Latin alphabet. English, French and German titles take precedence of those in less known languages.
