Results of the Entomofauna of the World, based upon info-system of the Cesa

Under this major title, totally 88 regional reports, a generic list of the pterygot insects and a bibliographical evaluation are published in this issue of the Priamus (supplement). The Project "Entomofauna of the World" (except *Lepidoptera*) has been carrying out by the researchers of the Cesa for some years. The temporary results of the reports submitted here are based upon not only the literary data, but also the field results of the authors' expeditions to several states realized in earlier decades.¹ In each report submitted², faunistical, taxonomical and nomenclatural information are revised as far as possible, updated accordingly with footnotes. References to the faunal information of some states published in recent years are also mentioned in the related reports. The following states are newly added to the research program on the pterygot fauna within the frame of entomofaunal surveys of the Cesa: Austria, Bulgaria, Creta, France, Germany, Greece, Hungary, Italy, Macedonia, Romania, Spain, Sweden and Ukraine in Europe; Afghanistan, China, Cyprus, Israel, India, Iraq, Jordan, Japan, Kazakhstan, Kirgizistan, Lebanon, Sri Lanka, Nepal, Pakistan, Syria, Saudi Arabia, Thailand, Tadjikistan, Turkmenistan, Taiwan, Uighur Ili, Uzbekistan, and Yemen in Asia; Argentina, Brazil, Chile, Colombia, Costa Rica, Mexico, Peru, Surinam, United States, and Venezuela in America. Recording the faunal data of these states mentioned above are very at the beginning. Comparatively more advanced faunal lists belong to Turkey and some Middle East countries in Asia. Concerning the order Lepidoptera, results of the Project Lepidoptera of the Old World (LOW), will be published in the next issue of this serial. Finally, this not an ordinary but a planned, long-termed study. If it is needed, the Cesa projects with their published reports should be compared by the readers with the equivalent attempts only.

List of the genera of the pterygot insects used in the Project Entomofauna of the World by the Cesa

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: List of the genera of the pterygot insects used in the Project Entomofauna of the World by the Cesa. *Priamus* (suppl.) 18: 8- 129.
In this paper, totally 6028 generic names of various pterygot orders (except Lepidoptera) are listed. The families of the generic names are also added. Synonyms of the generic names are arranged chronologically, if possible.

An attempt on the bibliographical evaluation of the Project Entomofauna of World

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: List of the genera of the pterygot insects used in the Project Entomofauna of the World by the Cesa. *Priamus* (suppl.) 18: 130-239.

In this paper, totally 946 publications of various pterygot orders (except *Lepidoptera*) are evaluated under four parts. In the first part, under the title of Publications with faunistical information, totally 848 articles are listed as author indexes. In the part entitled “publications with taxonomical evaluations” totally 553 publications are arranged alphabetically. In the part of publications with identification keys to the taxa, totally 135 publications are used. In the last part, “selected bibliography according to some pterygot orders”, the used publications in the reports related with 17 orders (*Ephemeroptera*, *Plecoptera*, *Odonata*, *Orthoptera*, *Mantodea*, *Blattodea*, *Dermaptera*, *Thysanoptera*, *Hemiptera*, *Homoptera*, *Neuroptera*, *Mecoptera*, *Trichoptera*, *Lepidoptera*, *Diptera*, *Hymenoptera*, and *Coleoptera*) are arranged as author indexes.

Brief explanatory information:

Previously published articles	Yes ³
Previously published report	Yes (see note 2)
Expedition made by the Cesa	-
Planned expeditions	-
Further planned publications	Yes

The results on this subject submitted here, are of course temporary. There are still many publications that used in the reports or to be used in future. In the coming reports on this topic more detailed bibliographical evaluations will be published.

Below, the publications used in the reports are arranged under the following four titles: Publications with faunistical information with a list of totally 848 articles; publications with taxonomical evaluations with 553 publications arranged alphabetically; publications with identification keys to the taxa with 135 publications, and finally, “Selected bibliography according to some pterygot orders”, the used publications in the reports related with 17 orders (*Ephemeroptera*, *Plecoptera*, *Odonata*, *Orthoptera*, *Mantodea*, *Blattodea*, *Dermaptera*,

³ Articles on the insect bibliography have been previously published by the authors especially on the order *Lepidoptera* (see: **Koçak, A.Ö. & S.Seven**, 1994, Türkiye *Lepidoptera* Bibliyografyası. Cent. ent. Synonymic and distributional list of the pterygot insects of Afghanistan

(Results of the Entomofauna of the World based upon info-system of the Cesa)

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Afghanistan (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 1. *Priamus* (suppl.) 18: 240-260.

In this study, totally 596 species are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on Lepidoptera of Afghanistan recorded in info-system of the Cesa, total pterygot species of Afghanistan increase to 2195.

Key words: List, distribution, *pterygota*, *Insecta*, Afghanistan.

Brief explanatory information:

Previously published article	Yes ⁵
Previously published report	Yes
Expedition made by the Cesa	No
Planned expeditions	No
Further planned publications	yes

In this study, totally 596 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes.⁶ Original references to some taxa are given in blue colour.

Within the frame of the Project Entomofauna, the Lepidoptera of this country has been previously published by the authors as a list of 1599 species.⁷ By this way, total number of the pterygots increased to 2195.

The study is still continuing, and the new results will be published within this Project.

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Caucasus (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 2.

Priamus (suppl.) 18: 261-361.

In this study, totally 3003 species are listed. Synonymous names are arranged chronologically. Range of each species is given as codes.

Key words: List, distribution, *pterygota*, *Insecta*, Caucasus.

Brief explanatory information:

Previously published article	yes ¹⁰
Previously published report	yes
Expedition made by the Cesa	no
Planned expeditions	yes
Further planned publications	yes

In this study, totally 3003 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

Within the frame of the Project Entomofauna, the Lepidoptera of this country has been previously published by the authors as a list of 943 noctuid species. However, the info-system of the Cesa has totally 2959 lepidopteran species of the Caucasus [unpublished yet]. By this way, total number of the pterygots may increase to 5962.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of China (Results of the Entomofauna of the World based upon info-system of the Cesa)

Abstract: Synonymic and distributional list of the pterygot insects of China (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 3.
Priamus (suppl.) 18: 362-394.

In this study, totally 990 species are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on Lepidoptera of China recorded in info-sytem of the Cesa, total pterygot species of China increase to 6655.

Key words: List, distribution, *pterygota*, *Insecta*, China.

Brief explanatory information:

Previously published articles	yes
Previously published report	no
Expedition made by the Cesa	no
Planned expeditions	no
Further planned publications	yes

In this study, totally 990 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

In info-system of the Cesa, totally 5665 recorded species of Lepidoptera from China are found. Taking this information into consideration, total number of the pterygots may increase to 6655.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Cyprus (Results of the Entomofauna of the World based upon info-system of the Cesa)

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Cyprus (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 4. *Priamus* (suppl.) 18: 395-476.

In this study, totally 1387 pterygot species (including Lepidoptera) are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. A selected bibliography on the Lepidoptera of Cyprus is also mentioned.

Key words: List, distribution, *pterygota*, *Insecta*, Cyprus.

Brief explanatory information:

Previously published article	no
Previously published report	no
Expedition made by the Cesa	Yes ¹²
Planned expeditions	Yes
Further planned publications	Yes

In this study, list of the pterygot species are listed in the first part. For this purpose totally 683 species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour. Similarly, the Lepidoptera list at specific level is given in the second part. Totally 704 species are mentioned. Finally, a selected bibliography on the Lepidoptera of Cyprus is given. Totally 388 publications are arranged according to the authors and date of publications. By this way, 1387 pterygot insects (including Lepidoptera) are recorded in Cyprus Island within the frame of the Entomofuna project.

The study is still continuing, and the new results will be published within this Project.
