Synonymic and distributional list of the pterygot insects of Bulgaria

(Results of the Entomofauna of the World based upon info-system of the Cesa)

66

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Bulgaria (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 66. *Priamus* (suppl.) 18: 2172-2233.

In this study, totally 1582 species are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on Lepidoptera of Bulgaria recorded in info-system of the Cesa, total pterygot species of Bulgaria increase to 4503.

Key words: List, distribution, *pterygota*, *Insecta*, Bulgaria.

Brief explanatory information:

Previously published article	no
Previously published report	no
Expedition made by the Cesa	yes ¹³⁰
Planned expeditions	no
Further planned publications	yes

In this study, totally 1582 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

In info-system of the Cesa, totally 2921 recorded species of Lepidoptera from Bulgaria are found. Taking this information into consideration, total number of the pterygots may increase to 4503.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Creta

(Results of the Entomofauna of the World based upon info-system of the Cesa)

67

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Creta (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 67
Priamus (suppl.) 18: 2234-2244.

In this study, totally 277 species are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on Lepidoptera of Creta recorded in info-system of the Cesa, total pterygot species of Creta increase to 1358.

Key words: List, distribution, *pterygota*, *Insecta*, Creta.

Brief explanatory information:

Previously published article	no
Previously published report	no
Expedition made by the Cesa	no
Planned expeditions	no
Further planned publications	yes

In this study, totally 277 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

In info-system of the Cesa, totally 1081 recorded species of Lepidoptera from Creta are found. Taking this information into consideration, total number of the pterygots may increase to 1358.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of France

(Results of the Entomofauna of the World based upon info-system of the Cesa)

68

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of France (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 68.

Priamus (suppl.) 18: 2245-2319.

In this study, totally 1884 species are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on Lepidoptera of France recorded in info-system of the Cesa, total pterygot species of France increase to 6785.

Key words: List, distribution, *pterygota*, *Insecta*, France.

Brief explanatory information:

Previously published article	no
Previously published report	no
Expedition made by the Cesa	no
Planned expeditions	no
Further planned publications	yes

In this study, totally 1884 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

In info-system of the Cesa, totally 4901 recorded species of Lepidoptera from France are found. Taking this information into consideration, total number of the pterygots may increase to 6785.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Germany

(Results of the Entomofauna of the World based upon info-system of the Cesa)

69

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Germany (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 69.
Priamus (suppl.) 18: 2320-2378.

In this study, totally 1425 species are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on Lepidoptera of Germany recorded in info-system of the Cesa, total pterygot species of Germany increase to 4971.

Key words: List, distribution, *pterygota*, *Insecta*, Germany.

Brief explanatory information:

Previously published article	no
Previously published report	no
Expedition made by the Cesa	yes ¹³¹
Planned expeditions	no
Further planned publications	yes

In this study, totally 1425 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

In info-system of the Cesa, totally 3546 recorded species of Lepidoptera from Germany are found. Taking this information into consideration, total number of the pterygots may increase to 4971.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Greece

(Results of the Entomofauna of the World based upon info-system of the Cesa)

70

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Greece (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 70.

Priamus (suppl.) 18: 2379-2454.

In this study, totally 2097 species are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on Lepidoptera of Greece recorded in info-sytem of the Cesa, total pterygot species of Greece increase to 5236.

Key words: List, distribution, *pterygota*, *Insecta*, Greece.

Brief explanatory information:

Previously published article	no
Previously published report	no
Expedition made by the Cesa	no
Planned expeditions	no
Further planned publications	yes

In this study, totally 2097 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

In info-system of the Cesa, totally 3139 recorded species of Lepidoptera from Greece are found. Taking this information into consideration, total number of the pterygots may increase to 5236.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Hungary

(Results of the Entomofauna of the World based upon info-system of the Cesa)

71

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Hungary (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 71. *Priamus* (suppl.) 18: 240-260.

In this study, totally 1447 species are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on Lepidoptera of Hungary recorded in info-sytem of the Cesa, total pterygot species of Hungary increase to 4770.

Key words: List, distribution, *pterygota*, *Insecta*, Hungary.

Brief explanatory information:

Previously published article	no
Previously published report	no
Expedition made by the Cesa	no
Planned expeditions	no
Further planned publications	yes

In this study, totally 1447 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

In info-system of the Cesa, totally 3323 recorded species of Lepidoptera from Hungary are found. Taking this information into consideration, total number of the pterygots may increase to 4770.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Italy

(Results of the Entomofauna of the World based upon info-system of the Cesa)

72

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Italy (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 72.

Priamus (suppl.) 18: 2514-2600.

In this study, totally 2344 species are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on Lepidoptera of Italy recorded in info-system of the Cesa, total pterygot species of Italy increase to 7121.

Key words: List, distribution, *pterygota*, *Insecta*, Italy.

Brief explanatory information:

Previously published article	no
Previously published report	no
Expedition made by the Cesa	no
Planned expeditions	no
Further planned publications	yes

In this study, totally 2344 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

In info-system of the Cesa, totally 4797 recorded species of Lepidoptera from Italy are found. Taking this information into consideration, total number of the pterygots may increase to 7121.

The study is still continuing, and the new results will be published within this Project.
