Synonymic and distributional list of the pterygot insects of Indonesia

(Results of the Entomofauna of the World based upon info-system of the Cesa)

5

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Indonesia (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 5.
Priamus (suppl.) 18: 477-487.

In this study, totally 328 species are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on Lepidoptera of Indonesia recorded in info-system of the Cesa, total pterygot species of Indonesia increase to 5685.

Key words: List, distribution, *pterygota*, *Insecta*, Indonesia.

Brief explanatory information:

Previously published article	yes ¹³
Previously published report	no
Expedition made by the Cesa	no
Planned expeditions	no
Further planned publications	yes

In this study, totally 328 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour. In info-system of the Cesa, totally 5357 recorded species of *Lepidoptera* from Indonesia are found. Taking this information into consideration, total number of the pterygots may increase to 5685.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Israel (Results of the Entomofauna of the World based upon info-system of the Cesa)

6

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Israel (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 6.

Priamus (suppl.) 18: 488-542.

In this study, totally 1642 species are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on Lepidoptera of Israel recorded in info-system of the Cesa, total pterygot species of Israel increase to 3050.

Key words: List, distribution, *pterygota*, *Insecta*, Israel.

Brief explanatory information:

Previously published article	yes
Previously published report	no
Expedition made by the Cesa	no
Planned expeditions	no
Further planned publications	yes

In this study, totally 1642 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour. In info-system of the Cesa, totally 1408 recorded species of Lepidoptera from Israel are found. Taking this information into consideration, total number of the pterygots may increase to 3050.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of India (Results of the Entomofauna of the World based upon info-system of the Cesa)

7

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of India (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 7.

Priamus (suppl.) 18: 543-560.

In this study, totally 564 species are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on Lepidoptera of India recorded in info-sytem of the Cesa, total pterygot species of India increase to 6994.

Key words: List, distribution, *pterygota*, *Insecta*, India.

Brief explanatory information:

Previously published article	yes ²²
Previously published report	no
Expedition made by the Cesa	no
Planned expeditions	no
Further planned publications	yes

In this study, totally 564 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour. In info-system of the Cesa, totally 6430 recorded species of Lepidoptera from India are found. Taking this information into consideration, total number of the pterygots may increase to 6994.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Iraq (Results of the Entomofauna of the World based upon info-system of the Cesa)

8

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Iraq (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – **8**.

Priamus (suppl.) 18: 561-577.

In this study, totally 466 pterygot species are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Taking earlier publications of the authors into consideration, species number of the pterygot fauna of Iraq increased to 1650.

Key words: List, distribution, *pterygota*, *Insecta*, Iraq.

Brief explanatory information:

Previously published article	yes
Previously published report	yes
Expedition made by the Cesa	no
Planned expeditions	no
Further planned publications	yes

In this study, totally 466 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

Within the frame of the Project Entomofauna, the Lepidoptera²³ of this country has been previously published by the authors as a list of 1184 species. By this way, total number of the pterygots increased to 1650.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Iran (Results of the Entomofauna of the World based upon info-system of the Cesa)

9

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Iran (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 9. *Priamus* (suppl.) 18: 578-649.

In this study, totally 2208 pterygot species (except *Lepidoptera*) are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Taking earlier publications of the authors into consideration, species number of the pterygot fauna of Iran increased to 5503.

Key words: List, distribution, *pterygota*, *Insecta*, Iran.

Brief explanatory information:

Previously published articles	yes ²⁴
Previously published report	yes
Expedition made by the Cesa	yes ²⁵
Planned expeditions	yes
Further planned publications	yes

In this study, totally 2208 pterygot species (except *Lepidoptera*) are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

²⁵ <http://www.members.tripod.com/entcesa/Intent.pdf>

Within the frame of the Project Entomofauna, the Lepidoptera of this country has been previously published by the authors as a list of 3295 species. By this way, total number of the pterygots increased to 5503.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Jordan (Results of the Entomofauna of the World based upon info-system of the Cesa)

10

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Jordan (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – **10**.
Priamus (suppl.) 18: 650-667.

In this study, totally 491 pterygot species (except *Lepidoptera*) are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on *Lepidoptera* of Jordan recorded in info-system of the Cesa, total pterygot species of Jordan increase to 1077.

Key words: List, distribution, *pterygota*, *Insecta*, Jordan.

Brief explanatory information:

Previously published article	no
Previously published report	no
Expedition made by the Cesa	no
Planned expeditions	yes
Further planned publications	yes

In this study, totally 491 pterygot species (except *Lepidoptera*) are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour. In info-system of the Cesa, totally 586 recorded species of *Lepidoptera* from Jordan are found. Taking this information into consideration, total number of the pterygots may increase to 1077.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Japan (Results of the Entomofauna of the World based upon info-system of the Cesa)

11

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Japan (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 11.
Priamus (suppl.) 18: 668-681.

In this study, totally 344 species (except *Lepidoptera*) are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on *Lepidoptera* of Japan recorded in info-system of the Cesa, total pterygot species of Japan increase to 2407.

Key words: List, distribution, *pterygota*, *Insecta*, Japan.

Brief explanatory information:

Previously published article	yes ²⁷
Previously published report	no
Expedition made by the Cesa	no
Planned expeditions	no
Further planned publications	yes

In this study, totally 344 pterygot species (except *Lepidoptera*) are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour. In info-system of the Cesa, totally 2063 recorded species of *Lepidoptera* from Japan are found. Taking this information into consideration, total number of the pterygots may increase to 2407.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Kazakhstan

(Results of the Entomofauna of the World based upon info-system of the Cesa)

12

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Kazakhstan (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 12. *Priamus* (suppl.) 18: 682-730.

In this study, totally 1340 species (except *Lepidoptera*) are listed. Synonymous names are arranged chronologically. Range of each species is given as codes.

Key words: List, distribution, *pterygota*, *Insecta*, Kazakhstan.

Brief explanatory information:

Previously published article	yes ²⁸
Previously published report	yes
Expedition made by the Cesa	yes ²⁹
Planned expeditions	no
Further planned publications	yes

In this study, totally 1340 pterygot species (except *Lepidoptera*) are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Kirgizistan

(Results of the Entomofauna of the World based upon info-system of the Cesa)

13

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Kirgizistan (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 13.
Priamus (suppl.) 18: 731-748.

In this study, totally 464 pterygot species (except *Lepidoptera*) are listed. Synonymous names are arranged chronologically. Range of each species is given as codes.

Key words: List, distribution, *pterygota*, *Insecta*, Kirgizistan.

Brief explanatory information:

Previously published article	no
Previously published report	no
Expedition made by the Cesa	yes
Planned expeditions	no
Further planned publications	yes

In this study, totally 464 pterygot species (except *Lepidoptera*) are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Lebanon

(Results of the Entomofauna of the World based upon info-system of the Cesa)

14

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Lebanon (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 14.

Priamus (suppl.) 18: 749-765.

In this study, totally 472 pterygot species (except *Lepidoptera*) are listed. Synonymous names are arranged chronologically. Range of each species is given as codes.

Key words: List, distribution, *pterygota*, *Insecta*, Lebanon.

Brief explanatory information:

Previously published article	yes ³⁰
Previously published report	no
Expedition made by the Cesa	no
Planned expeditions	yes
Further planned publications	yes

In this study, totally 472 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Sri Lanka

(Results of the Entomofauna of the World based upon info-system of the Cesa)

15

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Sri Lanka (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 15.

Priamus (suppl.) 18: 766-769.

In this study, totally 96 species (except Lepidoptera) are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the lepidopteran records in the info-system of the Cesa total species number of the pterygot increased to 1730.

Key words: List, distribution, *pterygota*, *Insecta*, Sri Lanka.

Brief explanatory information:

Previously published article	no
Previously published report	no
Expedition made by the Cesa	no
Planned expeditions	no
Further planned publications	yes

In this study, totally 96 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

Within the frame of the Project Entomofauna, the Lepidoptera of this country totally 1634 lepidopteran species were recorded in the database of the Cesa [unpublished]. Together with this information, total number of the pterygots increased to 1730.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Myanmar

(Results of the Entomofauna of the World based upon info-system of the Cesa)

16

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Myanmar (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 16. *Priamus* (suppl.) 18: 770-774.

In this study, totally 133 pterygot species (except Lepidoptera) are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on Myanmar Lepidoptera recorded in info-system of the Cesa, total pterygot species of Myanmar increase to 2250.

Key words: List, distribution, *pterygota*, *Insecta*, Myanmar.

Brief explanatory information:

Previously published article	yes ³¹
Previously published report	no
Expedition made by the Cesa	no
Planned expeditions	no
Further planned publications	yes

In this study, totally 133 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

Within the frame of the Project Lepidoptera of Indo-China (LIC) of the Cesa, the Lepidoptera of Indo-China has been previously published by the authors as a list of 11474 species group taxa. In info-system of the Cesa, totally 2117 recorded species of Lepidoptera from Myanmar are found. Taking this information into consideration, total number of the pterygots may increase to 2250.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Malaysia

(Results of the Entomofauna of the World based upon info-system of the Cesa)

17

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Malaysia (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 17. *Priamus* (suppl.) 18: 775-783.

In this study, totally 258 pterygot species (except Lepidoptera) are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on Lepidoptera of Malaysia recorded in info-sytem of the Cesa, total pterygot species of Malaysia increase to 4571.

Key words: List, distribution, *pterygota*, *Insecta*, Malaysia.

Brief explanatory information:

Previously published article	yes ³³
Previously published report	no
Expedition made by the Cesa	no
Planned expeditions	no
Further planned publications	yes

In this study, totally 258 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

Within the frame of the Project Lepidoptera of Indo-China (LIC) of the Cesa, the Lepidoptera of Indo-China has been previously published by the authors as a list of 11474 species group taxa. In info-system of the Cesa, totally 4313 recorded species of Lepidoptera from Myanmar are found. Taking this information into consideration, total number of the pterygots may increase to 4571.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Nepal

(Results of the Entomofauna of the World based upon info-system of the Cesa)

18

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Nepal (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 18.

Priamus (suppl.) 18: 784-787.

In this study, totally 82 species are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on Lepidoptera of Nepal recorded in info-sytem of the Cesa, total pterygot species of Nepal increase to 1320.

Key words: List, distribution, *pterygota*, *Insecta*, Nepal.

Brief explanatory information:

Previously published articles	yes ³⁷
Previously published report	no
Expedition made by the Cesa	no
Planned expeditions	no
Further planned publications	yes

In this study, totally 82 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

In info-system of the Cesa, totally 1238 recorded species of Lepidoptera from Nepal are found. Taking this information into consideration, total number of the pterygots may increase to 1320.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Pakistan

(Results of the Entomofauna of the World based upon info-system of the Cesa)

19

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Pakistan (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 19.

Priamus (suppl.) 18: 788-795.

In this study, totally 202 species are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on Lepidoptera of Pakistan recorded in info-sytem of the Cesa, total pterygot species of Pakistan increase to 1236.

Key words: List, distribution, *pterygota*, *Insecta*, Pakistan.

Brief explanatory information:

Previously published articles	yes ⁴⁰
Previously published report	no
Expedition made by the Cesa	yes ⁴¹
Planned expeditions	no
Further planned publications	yes

In this study, totally 202 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

In info-system of the Cesa, totally 1034 recorded species of Lepidoptera from Pakistan are found. Taking this information into consideration, total number of the pterygots may increase to 1236.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Russia

(Results of the Entomofauna of the World based upon info-system of the Cesa)

20

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Russia (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 20.
Priamus (suppl.) 18: 796-892.

In this study, totally 2786 species are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on Lepidoptera of Russia recorded in info-sytem of the Cesa, total pterygot species of Russia increase to 8844.

Key words: List, distribution, *pterygota*, *Insecta*, Russia.

Brief explanatory information:

Previously published articles	yes ⁴³
Previously published report	no
Expedition made by the Cesa	no
Planned expeditions	yes
Further planned publications	yes

In this study, totally 2786 pterygot species (except Lepidoptera) are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

Within the frame of the Cesa projects, the Lepidoptera of this country has been previously published by the authors as a list of 5951 species.⁴⁴ However, in info-system of the Cesa, totally 6058 recorded species of Lepidoptera from Russia are found. Taking the last information into consideration, total number of the pterygots may increase to 8844.

The study is still continuing, and the new results will be published within this Project.
