Synonymic and distributional list of the pterygot insects of Taiwan

(Results of the Entomofauna of the World based upon info-system of the Cesa)

27

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Taiwan (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 27.
Priamus (suppl.) 18: 1725-1729.

In this study, totally 124 species are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on Lepidoptera of Taiwan recorded in info-system of the Cesa, total pterygot species of Taiwan increase to 2271.

Key words: List, distribution, *pterygota*, *Insecta*, Taiwan.

Brief explanatory information:

Previously published article	no
Previously published report	no
Expedition made by the Cesa	no
Planned expeditions	no
Further planned publications	yes

In this study, totally 124 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

In info-system of the Cesa, totally 2147 recorded species of *Lepidoptera* from Taiwan are found. Taking this information into consideration, total number of the pterygots increase to 2271.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Uighur Ili

(Results of the Entomofauna of the World based upon info-system of the Cesa)

28

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Uighur Ili (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 28. *Priamus* (suppl.) 18: 1730-1738.

In this study, totally 214 species are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on Lepidoptera of Uighur Ili recorded in info-system of the Cesa, total pterygot species of Uighur Ili increase to 1524.

Key words: List, distribution, *pterygota*, *Insecta*, Uighur Ili.

Brief explanatory information:

Previously published article	yes ⁵⁴
Previously published report	no
Expedition made by the Cesa	yes
Planned expeditions	no
Further planned publications	yes

In this study, totally 214 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

Info-system of the Cesa has totally 1310 recorded species of *Lepidoptera* from Uighur Ili. Taking this information into consideration, total number of the pterygots increase to 1524.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Uzbekistan

(Results of the Entomofauna of the World based upon info-system of the Cesa)

29

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Uzbekistan (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 29.

Priamus (suppl.) 18: 1739-1766.

In this study, totally 689 species are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on Lepidoptera of Uzbekistan recorded in info-system of the Cesa, total pterygot species of Uzbekistan increase to 1594.

Key words: List, distribution, *pterygota*, *Insecta*, Uzbekistan.

Brief explanatory information:

Previously published article	no
Previously published report	no
Expedition made by the Cesa	no
Planned expeditions	no
Further planned publications	yes

In this study, totally 689 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

In info-system of the Cesa, totally 905 recorded species of Lepidoptera from Uzbekistan are found. Taking this information into consideration, total number of the pterygots may increase to 1594.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Vietnam

(Results of the Entomofauna of the World based upon info-system of the Cesa)

30

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Vietnam (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 30. *Priamus* (suppl.) 18: 1766-1769.

In this study, totally 111 species are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on *Lepidoptera* of Vietnam recorded in info-system of the Cesa, total pterygot species of Vietnam increase to 1728.

Key words: List, distribution, *pterygota*, *Insecta*, Vietnam.

Brief explanatory information:

Previously published article	yes ⁵⁵
Previously published report	no
Expedition made by the Cesa	no
Planned expeditions	no
Further planned publications	yes

In this study, totally 111 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

In info-system of the Cesa, totally 1617 recorded species of *Lepidoptera* from Vietnam are found. Taking this information into consideration, total number of the pterygots may increase to 1728.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Yemen

(Results of the Entomofauna of the World based upon info-system of the Cesa)

31

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Yemen (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 31.
Priamus (suppl.) 18: 1770-1775.

In this study, totally xx species are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on Lepidoptera of Yemen recorded in info-sytem of the Cesa, total pterygot species of Yemen increase to 682.

Key words: List, distribution, *pterygota*, *Insecta*, Yemen.

Brief explanatory information:

Previously published article	yes ⁵⁶
Previously published report	no
Expedition made by the Cesa	no
Planned expeditions	no
Further planned publications	yes

In this study, totally 140 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

Info-system of the Cesa has totally 542 recorded species of Lepidoptera from Yemen. Taking this information into consideration, total number of the pterygots may increase to 682.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of The Philippines (Results of the Entomofauna of the World based upon info-system of the Cesa)

32

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of the Philippines (Results of the Entomofauna of the World, based upon info-system of the Cesa) – 32. Priamus (suppl.) 18: 1776-1780.

In this study, totally 125 species are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on Lepidoptera of the Philippines recorded in info-system of the Cesa, total pterygot species of the Philippines increase to 2649.

Key words: List, distribution, *pterygota*, *Insecta*, Philippines.

Brief explanatory information:

Previously published article	yes ⁵⁸
Previously published report	yes ⁵⁹
Expedition made by the Cesa	yes
Planned expeditions	no
Further planned publications	yes

In this study, totally 125 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

In info-system of the Cesa, totally 2524 recorded species of Lepidoptera from the Philippines are found. Taking this information into consideration, total number of the pterygots may increase to 2649.

Synonymic and distributional list of the pterygot insects of Papua New Guinea (Results of the Entomofauna of the World based upon info-system of the Cesa)

33

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of the Papua New Guinea (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 33. *Priamus* (suppl.) 18: 1781-1785.

In this study, totally 126 species are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on Lepidoptera of the Papua New Guinea recorded in info-sytem of the Cesa, total pterygot species of the Papua New Guinea increase to 1886.

Key words: List, distribution, *pterygota*, *Insecta*, Papua New Guinea.

Brief explanatory information:

Previously published article	yes ⁶⁰
Previously published report	no
Expedition made by the Cesa	no
Planned expeditions	yes
Further planned publications	yes

In this study, totally 126 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

In info-system of the Cesa, totally 1760 recorded species of Lepidoptera from Myanmar are found. Taking this information into consideration, total number of the pterygots may increase to 1886.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of New Caledonia

(Results of the Entomofauna of the World based upon info-system of the Cesa)

34

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of New Caledonia (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 34. *Priamus* (suppl.) 18: 1786-1787.

In this study, totally 11 pterygot species (except *Lepidoptera*) are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on *Lepidoptera* of New Caledonia recorded in info-sytem of the Cesa, total pterygot species of New Caledonia increase to 562.

Key words: List, distribution, *pterygota*, *Insecta*, New Caledonia.

Brief explanatory information:

Previously published article	yes ⁷¹
Previously published report	no
Expedition made by the Cesa	no
Planned expeditions	yes
Further planned publications	yes

In this study, totally 11 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

In info-system of the Cesa, totally 551 recorded species of *Lepidoptera* from New Caledonia are found. Taking this information into consideration, total number of the pterygots may increase to 562.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Australia

(Results of the Entomofauna of the World based upon info-system of the Cesa)

35

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Australia (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 35. *Priamus* (suppl.) 18: 1788-1795.

In this study, totally 205 species are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on Lepidoptera of Australia recorded in info-system of the Cesa, total pterygot species of Australia increase to 3442.

Key words: List, distribution, *pterygota*, *Insecta*, Australia.

Brief explanatory information:

Previously published article	yes ⁷³
Previously published report	no
Expedition made by the Cesa	no
Planned expeditions	yes
Further planned publications	yes

In this study, totally 205 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

In info-system of the Cesa, totally 3137 recorded species of Lepidoptera from Myanmar are found. Taking this information into consideration, total number of the pterygot species may increase to 3442.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Algeria (Results of the Entomofauna of the World based upon info-system of the Cesa)

36

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Algeria (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 36.
Priamus (suppl.) 18: 1796-1839.

In this study, totally 1183 species are listed. Synonymous names are arranged chronologically. Range of each species is given as codes.

Key words: List, distribution, *pterygota*, *Insecta*, Algeria.

Brief explanatory information:

Previously published article	Yes
Previously published report	yes ⁷⁴
Expedition made by the Cesa	No
Planned expeditions	No
Further planned publications	yes

In this study, totally 1183 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Angola

(Results of the Entomofauna of the World based upon info-system of the Cesa)

37

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Angola (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 37.

Priamus (suppl.) 18: 1840-1845.

In this study, totally 137 pterygot species (except *Lepidoptera*) are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on *Lepidoptera* of Angola recorded in info-system of the Cesa, total pterygot species of Angola increase to 912.

Key words: List, distribution, *pterygota*, *Insecta*, Angola.

Brief explanatory information:

Previously published article	yes ⁷⁵
Previously published report	yes ⁷⁶
Expedition made by the Cesa	no
Planned expeditions	no
Further planned publications	yes

In this study, totally 137 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

Info-system of the Cesa has totally 775 recorded species of *Lepidoptera* from Angola. Taking this information into consideration, total number of the pterygots increase to 912.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Botswana (Results of the Entomofauna of the World based upon info-system of the Cesa)

38

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Botswana (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 38.

Priamus (suppl.) 18: 1846-1849.

In this study, totally 83 species are listed. Synonymous names are arranged chronologically. Range of each species is given as codes.

Key words: List, distribution, *pterygota*, *Insecta*, Botswana.

Brief explanatory information:

Previously published article	no
Previously published report	yes ⁷⁹
Expedition made by the Cesa	no
Planned expeditions	no
Further planned publications	yes

In this study, totally 83 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Cameroon

(Results of the Entomofauna of the World based upon info-system of the Cesa)

39

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Cameroon (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 39.

Priamus (suppl.) 18: 1850-1857.

In this study, totally 228 species are listed. Synonymous names are arranged chronologically. Range of each species is given as codes.

Key words: List, distribution, *pterygota*, *Insecta*, Cameroon.

Brief explanatory information:

Previously published article	yes
Previously published report	yes ⁸⁰
Expedition made by the Cesa	no
Planned expeditions	no
Further planned publications	yes

In this study, totally 228 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Canary Islands

(Results of the Entomofauna of the World based upon info-system of the Cesa)

40

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Canary Islands (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 40. *Priamus* (suppl.) 18: 1858-1867.

In this study, totally 242 species are listed. Synonymous names are arranged chronologically. Range of each species is given as codes.

Key words: List, distribution, *pterygota*, *Insecta*, Canary Islands.

Brief explanatory information:

Previously published article	yes
Previously published report	no
Expedition made by the Cesa	no
Planned expeditions	no
Further planned publications	yes

In this study, totally 242 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Congo

(Results of the Entomofauna of the World based upon info-system of the Cesa)

41

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Congo (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 41. *Priamus* (suppl.) 18: 1868-1869.

In this study, totally 14 species are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on Lepidoptera of Congo recorded in info-system of the Cesa, total pterygot species of Congo increase to 603.

Key words: List, distribution, *pterygota*, *Insecta*, Congo.

Brief explanatory information:

Previously published article	yes ⁸³
Previously published report	yes ⁸⁴
Expedition made by the Cesa	no
Planned expeditions	no
Further planned publications	yes

In this study, totally 14 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour. In info-system of the Cesa, totally 589 recorded species of Lepidoptera from Congo. Taking this information into consideration, total number of the pterygots may increase to 603.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Ethiopia

(Results of the Entomofauna of the World based upon info-system of the Cesa)

43

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Ethiopia (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 43. *Priamus* (suppl.) 18: 1897-1905.

In this study, totally 224 species are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on Lepidoptera of Ethiopia recorded in info-sytem of the Cesa, total pterygot species of Ethiopia increase to 1174.

Key words: List, distribution, *pterygota*, *Insecta*, Ethiopia.

Brief explanatory information:

Previously published article	yes ⁸⁹
Previously published report	yes ⁹⁰
Expedition made by the Cesa	yes
Planned expeditions	no
Further planned publications	yes

In this study, totally 224 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

In info-system of the Cesa, totally 950 recorded species of Lepidoptera from Myanmar are found. Taking this information into consideration, total number of the pterygots may increase to 1174.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Gabon

(Results of the Entomofauna of the World based upon info-system of the Cesa)

44

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Gabon (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 44. *Priamus* (suppl.) 18: 1906-1908.
In this study, totally 46 species are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on Lepidoptera of Gabon recorded in info-sytem of the Cesa, total pterygot species of Gabon increase to 806.
Key words: List, distribution, *pterygota*, *Insecta*, Gabon.

Brief explanatory information:

Previously published article	no
Previously published report	yes ⁹¹
Expedition made by the Cesa	no
Planned expeditions	no
Further planned publications	yes

In this study, totally 46 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

In info-system of the Cesa, totally 760 recorded species of Lepidoptera from Myanmar are found. Taking this information into consideration, total number of the pterygots may increase to 806.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Ivory Coast (Results of the Entomofauna of the World based upon info-system of the Cesa)

45

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Ivory Coast (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 45. *Priamus* (suppl.) 18: 1909-1912.

In this study, totally 92 species are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on Lepidoptera of Ivory Coast recorded in info-system of the Cesa, total pterygot species of Ivory Coast increase to 657.

Key words: List, distribution, *pterygota*, *Insecta*, Ivory Coast.

Brief explanatory information:

Previously published article	no
Previously published report	yes ⁹²
Expedition made by the Cesa	no
Planned expeditions	no
Further planned publications	yes

In this study, totally 92 pterygot species (except *Lepidoptera*) are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

In info-system of the Cesa, totally 565 recorded species of *Lepidoptera* from Ivory Coast are found. Taking this information into consideration, total number of the pterygots may increase to 657.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Kenya

(Results of the Entomofauna of the World based upon info-system of the Cesa)

46

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Kenya (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 46.

Priamus (suppl.) 18: 1913-1923.

In this study, totally 317 species are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on Lepidoptera of Kenya recorded in info-system of the Cesa, total pterygot species of Kenya increase to 2126.

Key words: List, distribution, *pterygota*, *Insecta*, Kenya.

Brief explanatory information:

Previously published article	yes
Previously published report	yes ⁹³
Expedition made by the Cesa	no
Planned expeditions	yes
Further planned publications	yes

In this study, totally 317 pterygot species (except *Lepidoptera*) are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

In info-system of the Cesa, totally 1809 recorded species of *Lepidoptera* from Kenya are found. Taking this information into consideration, total number of the pterygots may increase to 2126.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Libya

(Results of the Entomofauna of the World based upon info-system of the Cesa)

47

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Libya (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 47.

Priamus (suppl.) 18: 1924-1935.

In this study, totally 271 species are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on Lepidoptera of Libya recorded in info-sytem of the Cesa, total pterygot species of Libya increase to 751.

Key words: List, distribution, *pterygota*, *Insecta*, Libya.

Brief explanatory information:

Previously published article	no
Previously published report	yes ⁹⁴
Expedition made by the Cesa	no
Planned expeditions	no
Further planned publications	yes

In this study, totally 271 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

In info-system of the Cesa, totally 480 recorded species of Lepidoptera from Libya are found. Taking this information into consideration, total number of the pterygots may increase to 751.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Madagascar

(Results of the Entomofauna of the World based upon info-system of the Cesa)

48

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Madagascar (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – **48**.

Priamus (suppl.) 18: 1936-1941.

In this study, totally 140 species are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on Lepidoptera of Madagascar recorded in info-system of the Cesa, total pterygot species of Madagascar increase to 1469.

Key words: List, distribution, *pterygota*, *Insecta*, Madagascar.

Brief explanatory information:

Previously published article	yes
Previously published report	yes ⁹⁵
Expedition made by the Cesa	no
Planned expeditions	no
Further planned publications	yes

In this study, totally 140 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

In info-system of the Cesa, totally 1329 recorded species of Lepidoptera from Madagascar are found. Taking this information into consideration, total number of the pterygots may increase to 1469.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Malawi

(Results of the Entomofauna of the World based upon info-system of the Cesa)

49

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Malawi (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 49. *Priamus* (suppl.) 18: 1942-1945.

In this study, totally 94 pterygot species (except *Lepidoptera*) are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on *Lepidoptera* of Malawi recorded in info-sytem of the Cesa, total pterygot species of Malawi increase to 854.

Key words: List, distribution, *pterygota*, *Insecta*, Malawi.

Brief explanatory information:

Previously published article	yes ¹⁰⁰
Previously published report	yes ¹⁰¹
Expedition made by the Cesa	no
Planned expeditions	no
Further planned publications	yes

In this study, totally 94 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

In info-system of the Cesa, totally 760 recorded species of *Lepidoptera* from Malawi are found. Taking this information into consideration, total number of the pterygots increase to 854.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Marocco

(Results of the Entomofauna of the World based upon info-system of the Cesa)

50

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Marocco (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 50.
Priamus (suppl.) 18: 1946-1979.

In this study, totally 888 pterygot species (except *Lepidoptera*) are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on *Lepidoptera* of Marocco recorded in info-system of the Cesa, total pterygot species of Marocco increase to 2075.

Key words: List, distribution, *pterygota*, *Insecta*, Marocco.

Brief explanatory information:

Previously published article	no
Previously published report	yes ¹⁰²
Expedition made by the Cesa	no
Planned expeditions	yes
Further planned publications	yes

In this study, totally 888 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

In info-system of the Cesa, totally 1187 recorded species of *Lepidoptera* from Marocco are found. Taking this information into consideration, total number of the pterygots may increase to 2075.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Mozambique

(Results of the Entomofauna of the World based upon info-system of the Cesa)

51

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Mozambique (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 51. *Priamus* (suppl.) 18: 1980-1984.

In this study, totally 115 species are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on Lepidoptera of Mozambique recorded in info-system of the Cesa, total pterygot species of Mozambique increase to 824.

Key words: List, distribution, *pterygota*, *Insecta*, Mozambique.

Brief explanatory information:

Previously published article	yes
Previously published report	yes ¹⁰³
Expedition made by the Cesa	no
Planned expeditions	no
Further planned publications	yes

In this study, totally 115 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

In info-system of the Cesa, totally 729 recorded species of Lepidoptera from Mozambique are found. Taking this information into consideration, total number of the pterygots may increase to 824.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Namibia

(Results of the Entomofauna of the World based upon info-system of the Cesa)

52

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Namibia (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 52. *Priamus* (suppl.) 18: 1985-1991.

In this study, totally 193 pterygot species (except *Lepidoptera*) are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on *Lepidoptera* of Namibia recorded in info-system of the Cesa, total pterygot species of Namibia increase to 666.

Key words: List, distribution, *pterygota*, *Insecta*, Namibia.

Brief explanatory information:

Previously published article	yes
Previously published report	yes ¹⁰⁴
Expedition made by the Cesa	no
Planned expeditions	no
Further planned publications	yes

In this study, totally 193 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

In info-system of the Cesa, totally 473 recorded species of *Lepidoptera* from Namibia are found. Taking this information into consideration, total number of the pterygots may increase to 666.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Nigeria

(Results of the Entomofauna of the World based upon info-system of the Cesa)

53

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Nigeria (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 53.

Priamus (suppl.) 18: 1992-1997.

In this study, totally 161 species are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on Lepidoptera of Nigeria recorded in info-system of the Cesa, total pterygot species of Nigeria increase to 1480.

Key words: List, distribution, *pterygota*, *Insecta*, Nigeria.

Brief explanatory information:

Previously published article	yes
Previously published report	yes ¹⁰⁷
Expedition made by the Cesa	no
Planned expeditions	no
Further planned publications	yes

In this study, totally 161 pterygot species (except *Lepidoptera*) are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

In info-system of the Cesa, totally 1319 recorded species of *Lepidoptera* from Nigeria are found. Taking this information into consideration, total number of the pterygots may increase to 1480.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Rwanda (Results of the Entomofauna of the World based upon info-system of the Cesa)

54

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Rwanda (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 54. *Priamus* (suppl.) 18: 1998-2000.

In this study, totally 47 species are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on Lepidoptera of Rwanda recorded in info-sytem of the Cesa, total pterygot species of Rwanda increase to 376.
Key words: List, distribution, *pterygota*, *Insecta*, Rwanda.

Brief explanatory information:

Previously published article	yes
Previously published report	yes ¹⁰⁸
Expedition made by the Cesa	no
Planned expeditions	no
Further planned publications	yes

In this study, totally 47 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

In info-system of the Cesa, totally 329 recorded species of Lepidoptera from Rwanda are found. Taking this information into consideration, total number of the pterygots may increase to 376.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Somalia

(Results of the Entomofauna of the World based upon info-system of the Cesa)

56

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Somalia (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 56. *Priamus* (suppl.) 18: 2007-2012.

In this study, totally 153 pterygot species (except *Lepidoptera*) are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on *Lepidoptera* of Somalia recorded in info-system of the Cesa, total pterygot species of Somalia increase to 490.

Key words: List, distribution, *pterygota*, *Insecta*, Somalia.

Brief explanatory information:

Previously published article	yes
Previously published report	yes ¹¹¹
Expedition made by the Cesa	no
Planned expeditions	no
Further planned publications	yes

In this study, totally 153 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

In info-system of the Cesa, totally 337 recorded species of *Lepidoptera* from Somalia are found. Taking this information into consideration, total number of the pterygots may increase to 490.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of South Africa

(Results of the Entomofauna of the World based upon info-system of the Cesa)

57

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of South Africa (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 57.
Priamus (suppl.) 18: 2013-2036.

In this study, totally 765 pterygot species (except *Lepidoptera*) are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on *Lepidoptera* of South Africa recorded in info-system of the Cesa, total pterygot species of South Africa increase to 8370.

Key words: List, distribution, *pterygota*, *Insecta*, South Africa.

Brief explanatory information:

Previously published article	yes
Previously published report	yes ¹¹²
Expedition made by the Cesa	yes
Planned expeditions	yes
Further planned publications	yes

In this study, totally 765 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

In info-system of the Cesa, totally 7605 recorded species of *Lepidoptera* from South Africa are found. Taking this information into consideration, total number of the pterygots may increase to 8370.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Sudan

(Results of the Entomofauna of the World based upon info-system of the Cesa)

58

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Sudan (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 58.

Priamus (suppl.) 18: 2037-2043.

In this study, totally 169 species are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on Lepidoptera of Sudan recorded in info-system of the Cesa, total pterygot species of Sudan increase to 902.

Key words: List, distribution, *pterygota*, *Insecta*, Sudan.

Brief explanatory information:

Previously published article	no
Previously published report	yes ¹²⁰
Expedition made by the Cesa	no
Planned expeditions	no
Further planned publications	yes

In this study, totally 169 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

In info-system of the Cesa, totally 738 recorded species of Lepidoptera from Sudan are found. Taking this information into consideration, total number of the pterygots may increase to 902.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Tanzania

(Results of the Entomofauna of the World based upon info-system of the Cesa)

59

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Tanzania (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) –59.
Priamus (suppl.) 18: 2044-2055.

In this study, totally 338 pterygot species (except *Lepidoptera*) are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on *Lepidoptera* of Tanzania recorded in info-system of the Cesa, total pterygot species of Tanzania increase to 2019.

Key words: List, distribution, *pterygota*, *Insecta*, Tanzania.

Brief explanatory information:

Previously published article	yes
Previously published report	yes ¹²¹
Expedition made by the Cesa	no
Planned expeditions	no
Further planned publications	yes

In this study, totally 338 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

In info-system of the Cesa, totally 1681 recorded species of *Lepidoptera* from Tanzania are found. Taking this information into consideration, total number of the pterygots may increase to 2019.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Tunis

(Results of the Entomofauna of the World based upon info-system of the Cesa)

60

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Tunis (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 60.

Priamus (suppl.) 18: 2056-2083.

In this study, totally 699 species are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on Lepidoptera of Tunis recorded in info-system of the Cesa, total pterygot species of Tunis increase to 1500.

Key words: List, distribution, *pterygota*, *Insecta*, Tunis.

Brief explanatory information:

Previously published article	yes
Previously published report	yes ¹²²
Expedition made by the Cesa	no
Planned expeditions	yes
Further planned publications	yes

In this study, totally 699 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

In info-system of the Cesa, totally 801 recorded species of Lepidoptera from Tunis are found. Taking this information into consideration, total number of the pterygots may increase to 1500.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Uganda

(Results of the Entomofauna of the World based upon info-system of the Cesa)

61

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Uganda (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 61. *Priamus* (suppl.) 18: 2084-2090.

In this study, totally 182 species are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on Lepidoptera of Uganda recorded in info-system of the Cesa, total pterygot species of Uganda increase to 1930.

Key words: List, distribution, *pterygota*, *Insecta*, Uganda.

Brief explanatory information:

Previously published article	yes
Previously published report	yes ¹²³
Expedition made by the Cesa	no
Planned expeditions	no
Further planned publications	yes

In this study, totally 182 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

In info-system of the Cesa, totally 1748 recorded species of Lepidoptera from Uganda are found. Taking this information into consideration, total number of the pterygots may increase to 1930.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Zaire

(Results of the Entomofauna of the World based upon info-system of the Cesa)

62

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Zaire (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 62.
Priamus (suppl.) 18: 2084-2104.

In this study, totally 415 species are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on Lepidoptera of Zaire recorded in info-system of the Cesa, total pterygot species of Zaire increase to 2877.

Key words: List, distribution, *pterygota*, *Insecta*, Zaire.

Brief explanatory information:

Previously published article	yes
Previously published report	yes
Expedition made by the Cesa	no
Planned expeditions	no
Further planned publications	yes

In this study, totally 415 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

In info-system of the Cesa, totally 2462 recorded species of Lepidoptera from Zaire are found. Taking this information into consideration, total number of the pterygots may increase to 2877.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Zambia

(Results of the Entomofauna of the World based upon info-system of the Cesa)

63

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Zambia (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – **63**.

Priamus (suppl.) 18: 2105-2108.

In this study, totally 65 species are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on Lepidoptera of Zambia recorded in info-system of the Cesa, total pterygot species of Zambia increase to 692.

Key words: List, distribution, *pterygota*, *Insecta*, Zambia.

Brief explanatory information:

Previously published article	no
Previously published report	yes ¹²⁶
Expedition made by the Cesa	no
Planned expeditions	no
Further planned publications	yes

In this study, totally 65 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

In info-system of the Cesa, totally 627 recorded species of Lepidoptera from Zambia are found. Taking this information into consideration, total number of the pterygots may increase to 692.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Austria

(Results of the Entomofauna of the World based upon info-system of the Cesa)

65

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Austria (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 65. *Priamus* (suppl.) 18: 2116-2171.

In this study, totally 1341 pterygot species (except Lepidoptera) are listed. Synonymous names are arranged chronologically. Range of each species is given as codes. Together with the information on Lepidoptera of Austria recorded in info-system of the Cesa, total pterygot species of Austria increase to 5314.

Key words: List, distribution, *pterygota*, *Insecta*, Austria.

Brief explanatory information:

Previously published article	no
Previously published report	no
Expedition made by the Cesa	yes ¹²⁹
Planned expeditions	no
Further planned publications	yes

In this study, totally 1341 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

In info-system of the Cesa, totally 3973 recorded species of Lepidoptera from Austria are found. Taking this information into consideration, total number of the pterygots may increase to 5314.

The study is still continuing, and the new results will be published within this Project.
