Synonymic and distributional list of the pterygot insects of Saudi Arabia

(Results of the Entomofauna of the World based upon info-system of the Cesa)

21

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Saudi Arabia (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 21. Priamus (suppl.) 18: 892-901.

In this study, totally 248 species (except Lepidoptera) are listed. Synonymous names are arranged chronologically. Range of each species is given as codes.

Key words: List, distribution, *pterygota*, *Insecta*, Saudi Arabia.

Brief explanatory information:

Previously published article	yes
Previously published report	no
Expedition made by the Cesa	no
Planned expeditions	no
Further planned publications	yes

In this study, totally 248 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Syria (Results of the Entomofauna of the World based upon info-system of the Cesa)

22

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Syria (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 22.

Priamus (suppl.) 18: 902-941.

In this study, totally 1204 species are listed. Synonymous names are arranged chronologically. Range of each species is given as codes.

Key words: List, distribution, *pterygota*, *Insecta*, Syria.

Brief explanatory information:

Previously published article	no
Previously published report	no
Expedition made by the Cesa	no
Planned expeditions	yes
Further planned publications	yes

In this study, totally 1204 pterygot species (except *Lepidoptera*) are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Thailand

(Results of the Entomofauna of the World based upon info-system of the Cesa)

23

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Thailand (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 23.

Priamus (suppl.) 18: 942-950.

In this study, totally 275 species are listed. Synonymous names are arranged chronologically. Range of each species is given as codes.

Key words: List, distribution, *pterygota*, *Insecta*, Thailand.

Brief explanatory information:

Previously published article	yes ⁴⁸
Previously published report	no
Expedition made by the Cesa	yes ⁴⁹
Planned expeditions	no
Further planned publications	yes

⁴⁹ <http://www.members.tripod.com/entcesa/Intent.pdf>

In this study, totally 275 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

Within the frame of the Project Entomofauna, the Lepidoptera of this country has been previously published by the authors as a list of xx species. By this way, total number of the pterygots increased to xxx.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Tadjikistan

(Results of the Entomofauna of the World based upon info-system of the Cesa)

24

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Tadjikistan (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 24.

Priamus (suppl.) 18: 950-973.

In this study, totally 629 species are listed. Synonymous names are arranged chronologically. Range of each species is given as codes.

Key words: List, distribution, *pterygota*, *Insecta*, Tadjikistan.

In this study, totally 629 pterygot species (except *Lepidoptera*) are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

The study is still continuing, and the new results will be published within this Project.

Brief explanatory information:

Previously published article	no
Previously published report	no
Expedition made by the Cesa	no
Planned expeditions	no
Further planned publications	yes

Synonymic and distributional list of the pterygot insects of Turkmenistan

(Results of the Entomofauna of the World based upon info-system of the Cesa)

25

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Turkmenistan (*Results of the Entomofauna of the World, based upon info-system of the Cesa*) – 25.

Priamus (suppl.) 18: 973-1004.

In this study, totally 887 species are listed. Synonymous names are arranged chronologically. Range of each species is given as codes.

Key words: List, distribution, *pterygota*, *Insecta*, Turkmenistan.

Brief explanatory information:

Previously published article	no
Previously published report	no
Expedition made by the Cesa	Yes
Planned expeditions	No
Further planned publications	Yes

In this study, totally 887 pterygot species are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

The study is still continuing, and the new results will be published within this Project.

Synonymic and distributional list of the pterygot insects of Turkey

(Results of the Entomofauna of the World based upon info-system of the Cesa)

26

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: Synonymic and distributional list of the pterygot insects of Turkey (Results of the Entomofauna of the World based upon info-system of the Cesa) – 26. *Cent. Ent. Stud., Priamus Suppl.* 18: 1004-1724.

In this study, the species lists of the pterygot (except *Lepidoptera*) fauna of Turkey are given. The lists presented are divided into two parts. In the first part, a general list of 11224 pterygot species (except *Lepidoptera*) is given with the synonymous scientific names arranged chronologically and the world range of the species in codes. Together with the information on *Lepidoptera* of Turkey recorded in info-system of the Cesa, total pterygot species of Turkey increase to 16429. In the present study, sporadically, the original references to the species are also mentioned. In the second part, the provincial faunal lists are mentioned. Totally 81 provinces with the number of the known pterygot species are given for the first time. These are as follows; Adana Province (983), Adıyaman Province (242), Afyonkarahisar Province (250), Ağrı Province (201), Amasya Province (372), Ankara Province (1565), Antalya Province (1212), Artvin Province (598), Aydın Province (395), Balıkesir Province (383), Bilecik Province (364), Bingöl Province (157), Bitlis Province (273), Bolu Province (422), Burdur Province (296), Bursa Province (732), Çanakkale Province (317), Çankırı Province (240), Çorum Province (217), Denizli Province (280), Diyarbakır Province (374), Edirne Province (321), Elazığ Province (250), Erzincan Province (420), Erzurum Province (1210), Eskişehir Province (368), Gaziantep Province (275), Giresun Province (115), Gümüşhane Province (205), Hakkari Province (364), Hatay Province (635), Isparta Province (540), İçel Province (1122), İstanbul Province (652), İzmir Province (1186), Kars Province (481), Kastamonu Province (281), Kayseri Province (574), Kırklareli Province (273), Kırşehir Province (133), Kocaeli Province (213), Konya Province (888), Kütahya Province (260), Malatya Province (282), Manisa Province (423), Kahramanmaraş Province (455), Mardin Province (284), Muğla Province (572), Muş Province (145), Nevşehir Province (431), Niğde Province (372), Ordu Province (137), Rize Province (253), Sakarya Province (176), Samsun Province (318), Siirt Province (193), Sinop Province (199), Sivas Province (374), Tekirdağ Province (188), Tokat Province (334), Trabzon Province (286), Tunceli Province (158), Şanlıurfa Province (366), Uşak Province (102), Van Province (588), Yozgat Province (178), Zonguldak Province (148), Aksaray Province (96), Bayburt Province (150), Karaman Province (179), Kırıkkale Province (109), Batman Province (30), Şırnak Province (191), Bartın Province (51), Ardahan Province (111), Iğdır Province (179), Yalova Province (57), Karabük Province (89), Kilis Province (16), Osmaniye Province (224), Düzce Province (61).

Brief explanatory information:

Previously published article	Yes
Previously published report	Yes
Expedition made by the Cesa	Yes
Planned expeditions	Yes
Further planned publications	Yes

In this study, totally 11224 pterygot species (except *Lepidoptera*) are listed alphabetically. To each species, synonymous scientific names which are arranged chronologically, are attached. Nomenclaturally unavailable names, including incorrect spellings are marked with #. Ranges of the species are cited as in codes. Original references to some taxa are given in blue colour.

Within the frame of the Cesa projects, numerous articles regarding Lepidoptera of Turkey were published by the authors. More comprehensive ones are the checklists of Turkey.⁵⁰ Separately, the current number of species recorded in database of the Cesa is 5205. By this way, total number of the pterygots for Turkey increase to 16429.

The study is still continuing, and the new results will be published within this Project.
